

AIWA®**AD-F810****SERVICE
MANUAL**

STEREO CASSETTE DECK

• BASIC TAPE MECHANISM : $\alpha - 12$

• TYPE. H,U,C,E,K

SPECIFICATIONS

Type Stereo cassette tape deck**Track format**

4 tracks, 2 channels

Power supply

AD-F810 E

AC 220V, 50Hz

AD-F810 K

AC 240V, 50Hz

AD-F810 H, U, C

AC 120/220/240V switchable, 50/
60Hz**Power consumption**

AD-F810H 18W

AD-F810U, C, E, K 25W

Frequency response

Metal tape: 15 - 20,000Hz

CrO₂ tape: 15 - 19,000Hz

Normal tape: 15 - 18,000Hz

Signal-to-noise ratio80 dB (METAL tape DOLBY C NR
ON above 5kHz)**Wow and flutter**

0.065% (according to DIN 45500)

0.035% (WRMS)

Tape speed

4.8 cm/sec. (1-7/8 ips)

Recording system

AC bias (frequency 105kHz)

Erase system AC erase**Motor** DC servomotor × 1

DC motor × 1

Heads Playback head × 1 (PC-OCC coil
super DX head)Recording head × 1 (PC-OCC coil
super DX head)Erase head × 1 (Double-gap
sendust head)**Inputs** REC/LINE IN, maximum input
sensitivity: 50mV (47k Ω)**Outputs**PLAY/LINE OUT standard output
level: 370mV (0VU); suitable load
impedance: over 47k Ω

PHONES: 0.8mW (0VU)

suitable load impedance: 32 Ω **Dimensions**

430(W) × 140(H) × 318.3(D) mm

17 × 5-5/8 × 12-5/8 inches

Weight 4.9 kg

10.8 lbs

DISASSEMBLY INSTRUCTIONS

1. Notes on replacing the "Power Transformer".

When replacing the "Power Transformer", attach a "Plate, Shield" to the specified position to conform to the safety standard (spacing).

- 1) Attach the shield plate with adhesive tape while aligning it to portion ①. At this time, apply a threadlocking adhesive to it.

IC,LC6554H – 4694

Pin No.	Pin Name	I/O	Description
1 }	S 4	O	FL lighting segment output.
4	S 1		
5 }	G 5	O	FL lighting grid output and KEY SCAN output.
9	G 1		
10 }	D 1	I	KEY SCAN input.
15	D 6		
16	$\overline{I-REMO}$	I	Remote control input.
17	$\overline{I-AC OFF}$	I	AC OFF detection.
18	$\overline{D-REC}$	O	REC LED output. "L" when REC mode.
19	$\overline{D-PLAY}$	O	PLAY-LED output. "L" when PLAY mode.
20	$\overline{D-PAUSE}$	O	PAUSE LED output. "L" when PAUSE.
21	$\overline{D-RMT}$	O	REC MUTE LED output. "L" when REC MUTE.
22	O-CAL	O	Not used.
23	O-HX	O	
24	O-BIAS	O	BIAS OSC control output. "H" when REC mode.
25	$\overline{O-RMT}$	O	REC MUTE control output. "H" when REC-PLAY.
26	$\overline{O-MPX}$	O	DOLBY IC MPX control output. "L" when MPX ON.
27	$\overline{O-C/R MT}$	O	CUE/REVIEW MUTE control output. "H" when PLAY.
28	O-LMT	O	LINE MUTE control output. LINE MUTE when "H".
29	O-TAPE	O	TAPE/SOURCE control output of MONITOR. "H" when TAPE MONITOR.
30	TEST	—	Terminal for the system test. Connect to GND.
31	VSS	—	Connect to GND.
32	OSC 1	O	Microcomputer clock output.
33	OSC 2	I	Microcomputer clock input.
34	\overline{RES}	I	System reset terminal.
35	I-MS. SIG	I	MS control input.
36	I-CMPL	I	METER Lch control input.
37	I-CMPR	I	METER Rch control input.
38	O-MRES	O	METER AD converter control output.
39	O-DIRECT	O	Not used.
40	I-1DS2	O	Control input for switching programs. AD-F810 when "H".
41	I-TREEL	I	TAKE UP REEL PULSE input and automatic stop detection input for the linear counter.
42	I-SREEL	I	SUPPLY REEL PULSE input for the linear counter.
43	$\overline{M-CAPST}$	O	Capstan motor control output.
44	$\overline{SOL-PL}$	O	PLAY plunger control output.
45	$\overline{SOL-PA}$	O	PAUSE plunger control output.

Pin No.	Pin Name	I/O	Description
46	$\overline{M-SLOW}$	O	Reel motor voltage control output.
47	M-RVS	O	Reel motor control output.
48	M-FWD	O	
49	M-REEL	O	Not used.
50	$\overline{O-SCALE}$	O	
51	VP	—	Load power supply for the pull down resistor. Connect to -VP.
52	S16	O	FL lighting segment output.
63	S5		
64	VDD	—	System power supply terminal. Connect to +5 V.

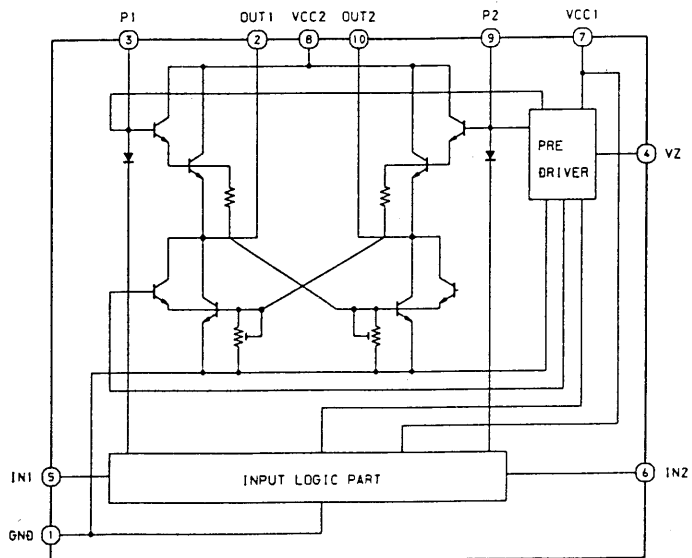

PU indicates that the pull up resistor is built in, and PD indicates that the pull down resistor is built in.
 PIN No. 22-25 output "L" when the system is initialized.

ADJUSTMENT

Initial Settings

1. REC BALANCE : Mechanical center
2. BIAS FINE : Center click position
3. REC SENS : Center click position
4. MPX FILTER SW : THRU (OFF)
5. DOLBY NR SW : OFF

1. Tape Speed Adjustment

- Settings :
- Test tape : TTA-100 (TTA-111S)
 - Test point : LINE OUT jack
 - Adjustment location : SFR (M2)

Method : Play back the test tape and adjust so that the frequency counter reads 3000Hz.

2. Azimuth Adjustment

- Settings :
- Test tape : TTA-310 (TTA-317E, SCC-1429)
 - Test point : LINE OUT jack
 - Adjustment location : Azimuth adjustment screw

Method : Play the 10kHz signal of the test tape and adjust so that the output is maximum and the waveforms in the Lissajous figure are in phase.

3. Playback Sensitivity Adjustment

- Settings :
- Test tape : TTA-200 (TTA-161, TCC-130)
 - Test point : LINE OUT jack
 - LEVEL meter : DOLBY NR mark
 - Adjustment location : SFR101 (L ch)
SFR102 (R ch)

Method : Play back the test tape and adjust so that the output level is $560\text{mV} \pm 10\text{mV}$.

4. Playback Frequency Response Check
 Settings : • Test tape : TTA-310 (TTA-317E, SCC-1429)
 • Test point : LINE OUT jack
 Method : Play back the 1kHz and 10kHz signals of the test tape and check that the output of the 10kHz signal is $0\text{dB} \pm 2\text{dB}$ with respect to that of the 1kHz signal.
5. Bias OSC. Frequency Adjustment
 Settings : • Test tape : TTA-620 (TTA-119MP)
 • Test points : TP3
 • Adjustment location : L303
 Method : Set to the record mode and adjust so that frequency counter reads $108\text{kHz} \pm 1\text{kHz}$.
6. HX Coil Adjustment
 Settings : • Test tape : TTA-620 (TTA-119MP)
 • Test point : TP1, TP2
 • Adjustment location : L301 (L ch)
 L302 (R ch)
 Method : Adjust L301, L302 so that the DC voltage at the test points is in the REC STANDBY mode.
7. Erase Head Position Adjustment
 Settings : • Test tape : TTA-620 (TTA-119MP)
 TTA-600 (TTA-119K)
 • Test point : LINE OUT jack
 • Adjustment location : Hexagonal nut of erase head
 • 0VU : 510mV
 Method : Record a 125Hz +10VU signal on a test tape TTA-620 (TTA-119MP) using this unit. Rewind the recorded section and erase. Turn the hexagonal nut clockwise gradually until the Rch play back output decreases approx. 10dB. Then stop erasing and turn the hexagonal nut three fourths turn (270-300 degrees) counterclockwise. Rewind the erased section and play back the erased section. Check that the Rch play back output decreases more than 60dB.
 [Over-erase check]
 Record a 10kHz -10VU signal on a test tape TTA-600 (TTA-119K) using this unit and let the Rch output be the reference output. Turn over the tape without rewinding, and erase (same time as recorded time). Turn over the tape without rewinding again, play back the recorded section. Check that the difference between the Rch play back output and reference output is within -0.8dB .
- * The test tapes used for checking should be erased. After checking, fast forward the test tapes.
8. MPX Filter Check
 Settings : • Test point : LINE OUT jack
 • Input signal : 19kHz signal (0VU) at input
 • MPX SW : ON
 Method : Set to the record mode and check that the output DOLBY NR SW ON becomes up to -30dB for the output at DOLBY NR SW OFF.
9. Recording/Playback Frequency Response Adjustment
 Settings : • Test tape : NORM. • TTA-600 (TTA-119K)
 CrO₂ • TTA-610 (TTA-119H)
 METAL • TTA-620
 (TTA-119MP)
 • Test point : LINE OUT jack
 • Input signal : 1kHz/10kHz (LINE IN)
 • Adjustment locations : SFR301 (L ch)
 SFR302 (R ch)
 Method : Apply a 1kHz signal and adjust the attenuator so that the output level at the LINE OUT jack is 40mV. Record and play back the 1kHz and 10kHz signals and adjust so that the output of the 10kHz signal is $0 \pm 0.3\text{dB}$ (NORM.), $0 \pm 1\text{dB}$ (CrO₂, METAL) with respect to that of the 1kHz signal.
10. Recording Sensitivity Adjustment
 Settings : • Test tape : NORM. • TTA-600 (TTA-119K)
 CrO₂ • TTA-610 (TTA-119H)
 METAL • TTA-620
 (TTA-119MP)
 • Input signal : 1kHz (LINE IN)
 • Test point : LINE OUT jack
 • Adjustment locations : SFR201 (L ch)
 SFR202 (R ch)
 Method : Apply a 1kHz signal and adjust the attenuator so that the output level at the LINE OUT jack is 50mV. Record and playback the 1kHz signal and adjust so that the output is $0 \pm 0.2\text{dB}$ (NORM.), $0 \pm 1\text{dB}$ (CrO₂, METAL).

PRACTICAL SERVICE FIGURE

Playback output : 560 ± 50mV (LINE OUT)
REC/PB output : 0VU ± 1dB (LINE OUT)
REC/PB distortion : Less than 1.8 % (MT, TTA-620,
CrO₂, TTA-610,
NORM., TTA-600)
Playback noise : Less than 1.1mV (MT, CrO₂)
(LINEAR) (DOLBY NR C ON)
Less than 3.0mV (NORM.)
(DOLBY NR OFF)
REC/PB noise : MT, CrO₂ : Less than 2.6/1.4/1.1mV
(LINEAR) (DOLBY OFF/B/C)
NORM : Less than 3.2/1.6/1.2mV
(DOLBY OFF/B/C)
Erase Ratio (125Hz) : More than 60dB
Crosstalk : More than 60dB (1kHz, 0VU)
Channel separation : More than 30dB (1kHz, 0VU)
Recording bias
frequency : 108kHz
Tape speed
TTA-100
(TTA-111S) : 3,000Hz ± 1.5 %
Wow & flutter : Less than 0.045 % (JIS/WRMS, PB)
Take-up torque : 28~48 g-cm
Fast forward torque : 120~190 g-cm
Rewind torque : 120~190 g-cm
Back-tension : 5~7 g-cm
Test tape : METAL TTA-620 (TTA-119MP)
CrO₂ TTA-610 (TTA-119H)
NORMAL TTA-600 (TTA-119K)

SPRING APPLICATION POSITION

PRINTING THE SERVICE MANUAL

The PDF of this service manual is not designed to be printed from cover to cover. The pages vary in size, and must therefore be printed in sections based on page dimensions.

NON-SCHEMATIC PAGES

Data that does NOT INCLUDE schematic diagrams are formatted to 8.5 x 11 inches and can be printed on standard letter-size and/or A4-sized paper.

SCHEMATIC DIAGRAMS

The schematic diagram pages are provided in two ways, full size and tiled. The full-sized schematic diagrams are formatted on paper sizes between 8.5" x 11" and 18" x 30" depending upon each individual diagram size. Those diagrams that are LARGER than 11" x 17" in full-size mode have been tiled for your convenience and can be printed on standard 11" x 17" (tabloid-size) paper, and reassembled.

TO PRINT FULL SIZE SCHEMATIC DIAGRAMS

If you have access to a large paper plotter or printer capable of outputting the full-sized diagrams, output as follows:

- 1) Note the page size(s) of the schematics you want to output as indicated in the middle window at the bottom of the viewing screen.
- 2) Go to the File menu and select Print Set-up. Choose the printer name and driver for your large format printer. Confirm that the printer settings are set to output the indicated page size or larger.
- 3) Close the Print Set Up screen and return to the File menu. Select "Print..." Input the page number of the schematic(s) you want to print in the print range window. Choose OK.

TO PRINT TILED VERSION OF SCHEMATICS

Schematic pages that are larger than 11" x 17" full-size are provided in a 11" x 17" printable tiled format near the end of the document. These can be printed to tabloid-sized paper and assembled to full-size for easy viewing.

If you have access to a printer capable of outputting the tabloid size (11" x 17") paper, then output the tiled version of the diagram as follows:

- 1) Note the page number(s) of the schematics you want to output as indicated in the middle window at the bottom of the viewing screen.
- 2) Go to the File menu and select Print Set-up. Choose the printer name and driver for your printer. Confirm that the plotter settings are set to output 11" x 17", or tabloid size paper in landscape () mode.
- 3) Close the Print Set Up screen and return to the File menu. Select "Print..." Input the page number of the schematic(s) you want to print in the print range window. Choose OK.

TO PRINT SPECIFIC SECTIONS OF A SCHEMATIC

To print just a particular section of a PDF, rather than a full page, access the Graphics Select tool in the Acrobat Reader tool bar.

- 1) To view the Graphics Select Tool, press and HOLD the mouse button over the Text Select Tool which looks like :
This tool will expand to reveal to additional tools.
Choose the Graphics Select tool by placing the cursor over the button on of the far right that looks like .
- 2) After selecting the Graphics Select Tool, place your cursor in the document window and the cursor will change to a plus (+) symbol. Click and drag the cursor over the area you want to print. When you release the mouse button, a marquee (or dotted lined box) will be displayed outlining the area you selected.
- 3) With the marquee in place, go to the file menu and select the "Print..." option. When the print window appears, choose the option under the section called "Print Range" which says "Selected Graphic".

Select OK and the output will print only the area that you outlined with the marquee.
