CD TEST MODE

1. How to activate CD Test Mode
   Insert the AC plug while pressing the "Enter" button. FL display is fully illuminated and test mode will be activated. Insert the test disc and operate the test mode following the control method as shown below.
   Note: If no CD was inserted, it displays "No Disc" and cannot be operated.

2. How to cancel CD Test Mode
   Either one of the following operations will cancel the CD test mode.
   - Disconnect the AC plug.
   - Press "Function" button.
   - Press "Power" button.
   - Press "Band" button.

3. CD Test Mode functions
   When test mode is activated, the following mode functions can be used by pressing the operation keys.

Mode	Function	FL Display	Operation	Content
Start Mode	Button	Fully illuminate	• Initialization	
Sled Mode	⏮ ⏭	CD TEST	• Shift to the external circumference of Pick-Up. * Note 1 • Shift to the internal circumference of Pick-Up. (Normal operation during CD PLAY)	• SLED SERVO • SLED Operation Check
Search Mode	■	CD	• LASER DIODE illuminated all the time (CD block power ON) • Continuous Focus Search *Note 2 (Pickup lense repeat full swing)	• APC circuit check • Laser current measurement • Focus search waveform check • Focus error waveform check (In Search Mode, FOK/FZC is not checked)
Play Mode	▶	1Tr.0:01	• Normal Playback • When TOC READ is unavailable Continue focus search *Note 2 • Continue spindle motor kick spin	• FOCUS SERVO/TRACKING SERVO • CLV SERVO/SLED SERVO • FOK check • RF waveform check
Traverse Mode	⏸	1Tr.0:01	• Tracking servo OFF/ON • Repeat OFF/ON every time [⏸] button is pressed	• TRACKING SERVO OFF • Tracking Balance Check

* Note 1 : When pressing the ⏮ or ⏭ keys, take care to avoid damage to the gears. Because the sled motor is activated when the ⏮ or ⏭ keys are pressed, even when the pick-up is at outermost or innermost track. The sled operation is not as normal and moves outermost track with ⏮ button and innermost track with ⏭ button

* Note 2 : There are cases when the tracking servo cannot be locked owing to the protection circuit being operated when heat builds up in the driver IC if the focus search is operated continually for more than 10 minutes. In these case, the power supply should be switched off for an hour until heat has been reduced and then re-start.

4. The Operation Outline
   This operation of each mode is carried out in the direction of the arrows from the start mode as indicated in the following illustration
