NIPPON COLUMBIA CO., LTD.

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

安全注意事項

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

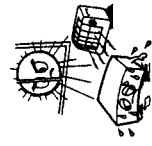

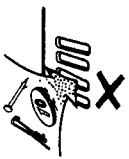

注意：為減少觸電危險，切勿拆下機殼（或機背）。機身內並無用戶修理用零件。請交由專業修理人員修理本機。

三角形內有箭頭的閃電符號旨在提醒用戶，本產品機殼內有未經絕緣的“危險電壓”，其幅度足以使人觸電而發生危險。

三角形內加感嘆符號旨在提醒用戶，有重要的操作與維修說明書配合本機。

警告：為減少着火或觸電危險，切勿讓本機受雨淋濕或受潮。

NOTE ON USE

		
<ul style="list-style-type: none"> Avoid high temperatures. Allow for sufficient heat dispersion when installed on a rack. 	<ul style="list-style-type: none"> Keep the set free from moisture, water, and dust. 	<ul style="list-style-type: none"> Do not let foreign objects in the set.
		
<ul style="list-style-type: none"> Handle the power cord carefully. Hold the plug when unplugging the cord. 	<ul style="list-style-type: none"> Unplug the power cord when not using the set for long periods of time. 	<ul style="list-style-type: none"> Do not let insecticides, benzene, and thinner come in contact with the set.
		
	<ul style="list-style-type: none"> *For sets with ventilation holes) Do not obstruct the ventilation holes. 	<ul style="list-style-type: none"> Never disassemble or modify the set in any way.

Please check to make sure the following items are included with the main unit in the carton:

- (1) Operating Instructions 1
- (2) Remote Power Cord 1
- (3) AC Power Cord 1

NOTE:

1. Always keep the POWER switch on the main unit turned on.
2. Turn the power on and off from the remote control unit of the pre-amplifier (AVP-A1, etc).
3. Unplug the power cord when you do not plan to use the unit for a long period of time.

PRECAUTIONS FOR INSTALLATION

Leave at least 10cm of space between this unit and any other component placed above.

FRONT PANEL

NAMES AND FUNCTIONS OF PARTS

- 1 Power switch (POWER)**
When this switch is pressed, the power is turned on, the POWER indicator 2 flashes for some seconds and then lights steadily, and stable operation condition is reached. When this switch is pressed again, the power is turned off.
- 2 Power indicator**
This lights orange when the power is on, and turns red when the power is turned off with remote terminal 6.
- 3 Speaker selector buttons (SPEAKERS)**
When button A is set to the "ON ()" position, sound is produced from the speaker systems connected to the "A" speaker terminals. When button B is set to the "ON ()" position, sound is produced from the speaker systems connected to the "B" speaker terminals. When both the A and B buttons are set to the "ON ()" position, sound is produced from the speaker systems connected to both the "A" and "B" speaker terminals. When both the A and B buttons are set to the "OFF ()" position, no sound is produced from the speaker systems. Use this when listening over headphones.
- 4 Speaker System terminal (SPEAKER SYSTEMS)**
Connect the speaker systems here.
- 5 Remote terminal (REMOTE ON-OFF)**
This terminal is used for remote control of the pre-amplifier. A low-voltage DC current is emitted from the terminal to turn on the power of a DENON pre-amplifier. The main unit's power can be turned on and off with the pre-amplifier's remote control unit when the pre-amplifier and main unit's input terminal are connected with the included cable. When the main unit's output terminal is connected to the input terminal of another power amplifier, the other power amplifier's power can be turned on and off.
- 6 AC IN**
Connect this to a power outlet using the included AC power cord.
- 7 Input terminal (INPUT)**
This is an input terminal (RCA connector). Connect it to the pre-amplifier's pre-out terminal.

PROTECTOR

Various protector circuits are included in this unit. The output is interrupted in the following case:

- (1) Muting time, which lasts for several seconds after the power is turned "on".
- (2) When the offset voltage of the power amplifier has drifted outside the prescribed range.
- (3) When the temperature of the power amplifier is abnormally high.
- (4) When a speaker terminal is shorted or a speaker's impedance is extremely low.

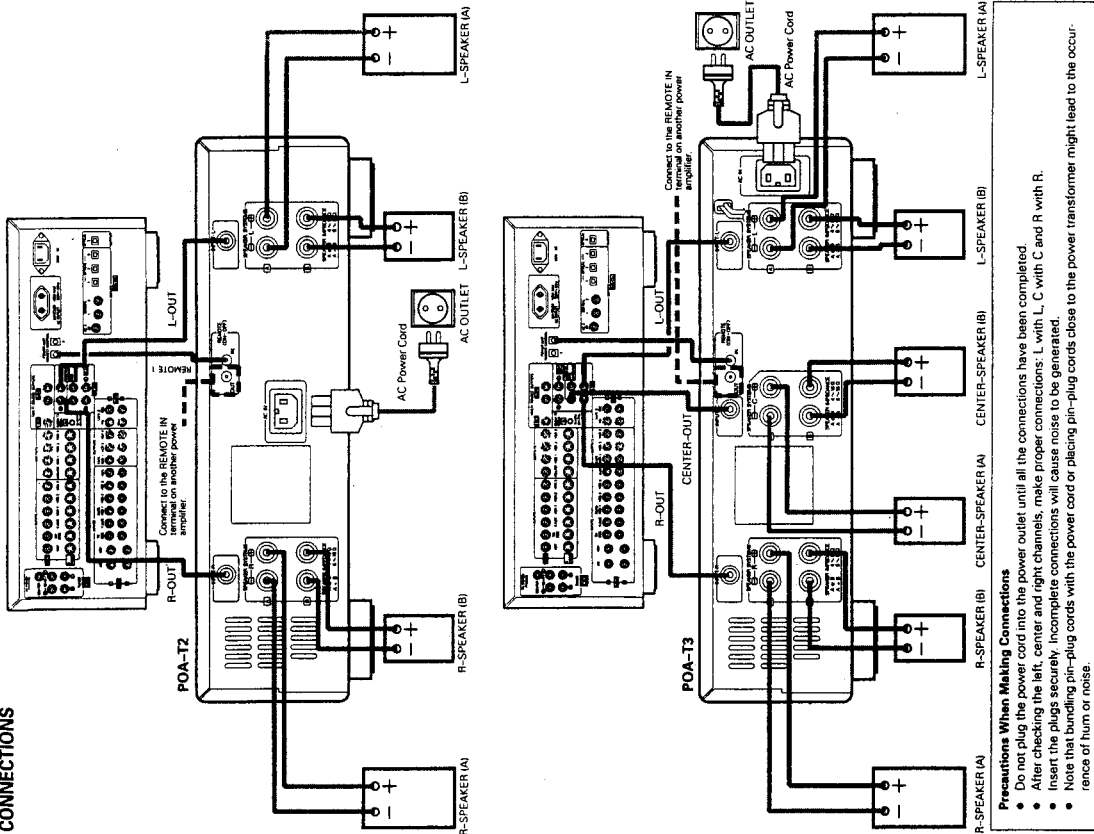

This set is equipped with a heat-dispersing motor fan. The motor fan operates when it senses that the temperature inside the set is high and the heat must be dispersed.

REAR PANEL

Manufactured under license from Lucasfilm Ltd. Lucasfilm and THX are registered trademarks of Lucasfilm Ltd.

CONNECTIONS

Precautions When Making Connections

- Do not plug the power cord into the power outlet until all the connections have been completed.
- After checking the left, center and right channels, make proper connections: L with L, C with C and R with R.
- Insert the plugs securely. Incomplete connections will cause noise to be generated.
- Note that bundling pin-plug cords with the power cord or placing pin-plug cords close to the power transformer might lead to the occurrence of hum or noise.

- Connection to the speaker system**
 - When connecting the speaker terminals to the speaker systems, make certain to connect the polarities correctly (+ to + and - to -). If the polarities are incorrect when the two are connected, the center area of the sound will be lacking, the positions of the musical instruments will not be clear, and the stereo directional sensitivity will be impaired.
 - During connection, be careful that the center wires in the speaker cords do not protrude from the terminals to contact any other terminal, and that the central wires in the separate speaker cords do not contact each other.
- Speaker impedance**
 - When only one of the A or B terminals is used, the speakers that are to be connected should have a nominal impedance of 4 to 16 Ω /ohms.
 - When the two sets (A + B) are to be used at the same time, use of speakers whose impedance is outside the range from 8 to 16 Ω /ohms will result in malfunction. Be careful not to let this happen.
 - Speakers with a lower impedance may cause the protective circuitry to operate.

SPECIFICATIONS

Rated Output Power: (8 Ω /ohms Load) 20 Hz to 20 kHz, T.H.D. 0.02% (4 Ω /ohms Load) 1 kHz, T.H.D. 0.5%	120 W 200 W	Input Impedance: Normal in:	47 k Ω /kohms
Total Harmonic Distortion: (-3 dB at rated output, 8 Ω /ohms) (20 Hz to 20 kHz)	0.008%	Output Impedance:	0.1 Ω /ohms (1 kHz)
Intermodulation Distortion: (60 Hz/7 kHz: 4/1 at rated output, 8 Ω /ohms)	0.002%	S/N Ratio: (IHF, A-weighting) (Normal)	110 dB
Power Band Width: (8 Ω /ohms, THD 0.05%)	5 Hz - 50 kHz	Output Terminals: Speakers A or B 4 Ω /ohms - 16 Ω /ohms A + B 8 Ω /ohms - 16 Ω /ohms	
Frequency Response: +0, -3 dB (at 1 W)	1 Hz - 100 kHz	Power Supply:	AC 230 V/50 Hz
Input Sensitivity: Normal in:	1.1 V	Power Consumption:	POA-T3 470 W POA-T2 330 W
		Dimensions: (Including control knobs and feet)	434 (W) x 135 (H) x 353 (D)mm
		Weight:	POA-T3 16 kg POA-T2 12.3 kg

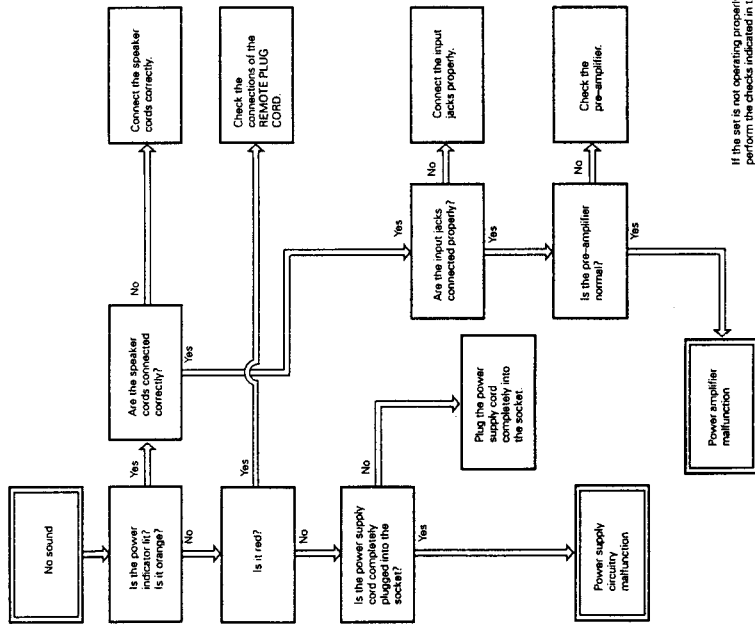

- Specifications and contents are subject to change without notice for purposes of improvement.

TROUBLESHOOTING

Before troubleshooting, be sure to check whether your audio system is really the source of the problem.

If you think the amplifier is out of order, first check the following one more time:

1. Are all the connections correctly made?
 2. Is the set being operated properly in accordance with the Operating Manual?
 3. Are the speakers and pre-amplifier being operated correctly?
- If the set does not operate properly, perform the checks indicated in the flow chart below. Turn off the power immediately, and contact the outlet where you purchased the amplifier or your nearest DENON dealer.

If the set is not operating properly, perform the checks indicated in this flow chart.

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltages" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point, within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

SAFETY INSTRUCTIONS

1. Read Instructions - All the safety and operating instructions should be read before the appliance is operated.
2. Retain Instructions - The safety and operating instructions should be retained for future reference.
3. Heed Warnings - All warnings on the appliance and in the operating instructions should be adhered to.
4. Follow Instructions - All operating and use instructions should be followed.
5. Water and Moisture - The appliance should not be used near water - for example, near a bathtub, washbowl, kitchen sink, laundry tub, in a wet basement, or near a swimming pool, and the like.
6. Carts and Stands - The appliance should be used only with a cart or stand that is recommended by the manufacturer.
- 6A. A combination and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.
7. Wall or Ceiling Mounting - The appliance should be mounted to a wall or ceiling only as recommended by the manufacturer.
8. Ventilation - The appliance should be situated so that its location or position does not interfere with its proper ventilation. For example, the appliance should not be situated on a bed, sofa, rug, or similar surface that may block the ventilation openings; or, placed in a built-in installation, such as a bookcase or cabinet that may impede the flow of air through the ventilation openings.
9. Heat - The appliance should be situated away from heat sources such as radiators, heat registers, stoves, or other appliances (including amplifiers) that produce heat.
10. Power Sources - The appliance should be connected to a power supply only of the type described in the operating instructions or as marked on the appliance.
11. Grounding or Polarization - Precautions should be taken so that the grounding or polarization means of an appliance is not defeated.
12. Power-Cord Protection - Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them; paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the appliance.
14. Cleaning - The appliance should be cleaned only as recommended by the manufacturer.
15. Power Lines - An outdoor antenna should be located away from power lines.
16. Outdoor Antenna Grounding - If an outside antenna is connected to the receiver, be sure the antenna system is grounded so as to provide some protection against voltage surges and built-up static charges. Article 810 of the National Electrical Code, ANSI/NFPA 70, provides information with regard to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna-discharge unit, size of grounding conductors, location of antenna-discharge unit, connection to grounding electrodes, and requirements for the grounding electrode. See Figure A.
17. Nonuse Periods - The power cord of the appliance should be unplugged from the outlet when left unused for a long period of time.
18. Object and Liquid Entry - Care should be taken so that objects do not fall and liquids are not spilled into the enclosure through openings.
19. Damage Requiring Service - The appliance should be serviced by qualified service personnel when:
 - A. The power-supply cord or the plug has been damaged, or
 - B. Objects have fallen, or liquid has been spilled into the appliance, or
 - C. The appliance has been exposed to rain, or
 - D. The appliance does not appear to operate normally or exhibits a marked change in performance, or
 - E. The appliance has been dropped, or the enclosure damaged.
20. Servicing - The user should not attempt to service the appliance beyond that described in the operating instructions. All other servicing should be referred to qualified service personnel.

● FOR U.S.A. & CANADA MODEL ONLY

CAUTION

TO PREVENT ELECTRIC SHOCK DO NOT USE THIS (POLARIZED) PLUG WITH AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

● POUR LE MODELE CANADIEN UNIQUEMENT

ATTENTION

POUR PREVENIR LES CHOCES ELECTRIQUES NE PAS UTILISER CETTE FICHE POLARISEE AVEC UN PROLONGATEUR, UNE PRISE DE COURANT OU UNE AUTRE SORTIE DE COURANT, SAUF SI LES LAMES PEUVENT ETRE INSEREES A FOND SANS EN LAISSER AUCUNE PARTIE A DECOUVERT.

● NUR FÜR EUROPÄISCHE MODELLE

Konformitätserklärung

Die DENON Electronic GmbH
Halskestraße 32
40880 Ratingen

Erklärt als Hersteller/Importeur, daß, das in dieser Bedienungsanleitung beschriebene Gerät den Technischen Vorschriften für Ton- und Fernseh-Rundfunkempfänger nach der Amtsblattverfügung 868/1989 (Amtsblatt des Bundesministers für Post und Telekommunikation vom 31. 8. 1989) entspricht.

NOTE:
 1. Always keep the POWER switch on the main unit turned on.
 2. Turn the power on and off from the remote control unit of the pre-amplifier (PPA-S10, etc.).
 3. Unplug the power cord when you do not plan to use the unit for a long period of time.

CAUTION:
 If only the STANDBY indicator is lit, this means that the power is turned off from the remote control unit. Turn the power on from the remote control unit of the pre-amplifier (PPA-S10, etc.).

HINWEIS:
 1. Lassen Sie den Netzschalter (POWER) am Hauptgerät stets eingeschaltet.
 2. Schalten Sie den Strom mit Hilfe des Fernbedienungsgerätes des Vorverstärkers (PPA-S10 o.ä.) ein und aus.
 3. Trennen Sie das Netzkabel vom Netz ab, wenn Sie beabsichtigen, das Gerät über einen längeren Zeitraum hinweg nicht zu benutzen.

VORSICHT:
 Wenn das STANDBY-Anzeige leuchtet, bedeutet dies, dass der Strom mit dem Fernbedienungsgerät ausgeschaltet worden ist. Schalten Sie den Strom mit dem Fernbedienungsgerät des Vorverstärkers (PPA-S10 usw.) ein.

REMARQUE:
 1. S'assurer que le commutateur d'alimentation (POWER) sur l'unité principale reste toujours fermé.
 2. Allumer et éteindre l'appareil avec le télécommande du préamplificateur (PPA-S10, etc.).
 3. Débrancher le cordon d'alimentation lorsque l'appareil ne sera pas utilisé pendant une longue période.

ATTENTION:
 Se seulement l'indicateur STANDBY (attente) est allumé, cela signifie que le courant est coupé de l'appareil à distance. Allumer l'appareil avec le télécommande du préamplificateur (PPA-S10, etc.).

NOTA:
 1. Tenete sempre l'interruttore della corrente (POWER) dell'unità principale nella posizione di attivazione.
 2. Spegnete e accendete la corrente usando il telecomando del preamplificatore (PPA-S10, ecc.).
 3. Scollegate il filo di alimentazione quando avete intenzione di non usare l'apparecchio per un lungo periodo.

AVISO:
 Si solo l'indicatore STANDBY (attesa) è illuminato, ciò significa che la corrente è stata spenta usando il telecomando. Riaccendete la corrente usando il telecomando del preamplificatore (PPA-S10, ecc.).

PRECAUTIONS FOR INSTALLATION
 Leave at least 10 cm of space between this unit and any other component placed above.

SICHERHEITSMASSNAHMEN BEIM EINBAU
 Lassen einen Mindestabstand von 10 cm zwischen diesem Gerät und der anderen Komponente, die daraufgestellt wird.

PRECAUTIONS D'INSTALLATION
 Prévoir un espace d'au moins 10 cm entre l'unité et tout autre appareil se trouvant au-dessus.

PRECAUZIONI PER L'INSTALLAZIONE
 Lasciate uno spazio libero di almeno 10 cm tra quest'unità e qualsiasi altro componente che è collocato sopra la stessa.

NOTE:
 1. Mantenga siempre activado el interruptor de alimentación (POWER) en la unidad principal.
 2. Conecte y desconecte la alimentación mediante la unidad de control remoto del preamplificador (PPA-S10, etc.).
 3. Cuando la unidad vaya a estar fuera de uso por un periodo prolongado de tiempo, desconecte el cable de alimentación.

PRECAUTION:
 Cuando solo el indicador STANDBY (espera) esté encendido, significa que la alimentación ha sido desconectada desde la unidad de control remoto. Conecte la alimentación mediante la unidad de control remoto del preamplificador (PPA-S10, etc.).

OPMERKING:
 1. Zorg ervoor dat de stroomschakelaar (POWER) van het hoofdtoestel in de afstandsbediening steeds staat.
 2. Schakel de spanning in en uit met de afstandsbediening van de voorversterker (PPA-S10, enz.).
 3. Trek het netkabel uit wanneer u denkt het toestel gedurende een lange periode niet te gebruiken.

WAARSCHUWING:
 Wanneer alleen de STANDBY-indicator brandt, betekent dit dat de spanning is afgeschaafd met de afstandsbediening. Schakel de spanning in met de afstandsbediening van de voorversterker (PPA-S10, enz.).

OBSERVERA:
 1. Låt alltid strömstyraren (POWER) på huvudenheten vara påslagen.
 2. Sätt strömmen till och från via fjärrkontrollen som medföljer förlovarstärken (PPA-S10 m.fl.).
 3. Koppla loss nätkabeln om apparaten inte skall användas under lång tid.

VARNING:
 Om endast strömindikatorn lyser betyder det att strömmen har stängts av via fjärrkontrollen. När du sedan står på strömmen igen måste detta göras från fjärrkontrollen som medföljer förlovarstärken (PPA-S10 m.fl.).

NOTA:
 1. Mantenga el interruptor de Corrente (POWER) na unidade principal sempre ligado.
 2. Ligue e desligue a corrente a partir da unidade de controle remoto do pré-amplificador (PPA-S10, etc.).
 3. Desconecte o fio de força quando intente não utilizar a unidade por longo tempo.

PRECAUCÃO:
 Se apenas estiver iluminado o indicador de aguardar (STANDBY), isto significa que a corrente está desligada a partir da unidade de controle remoto. Ligue a corrente a partir da unidade de controle remoto do pré-amplificador (PPA-S10, etc.).

PRECAUCIONES PARA LA INSTALACION
 Deje por lo menos 10 cm de espacio entre esta unidad y cualquier otro componente situado sobre ella.

VOORZORGSMAATREGELEN
 Bij plaatsing dient u een ruimte van minstens 10 cm open te laten tussen dit toestel en een ander erop geplaatst component.

FÖRSIKTIGHETSÅTGÄRDER VID INSTALLATIONEN
 Se till att det finns minst 10 cm mellanrum mellan apparaten och en ev. annan apparat som ställs ovanpå.

CUIDADOS NA INSTALAÇÃO
 Deixe um espaço de pelo menos 10 cm entre esta unidade e qualquer outro componente colocada acima.

ENGLISH

Please check to make sure the following items are included with the main unit in the carton:

- (1) Operating Instructions
- (2) Remote Power Cord
- (3) AC Power Cord

DEUTSCH

Bitte überprüfen Sie, ob die folgenden Teile vollständig in der Verpackung enthalten sind:

- (1) Bedienungsanleitung
- (2) Fernbedienungskabel
- (3) AC-Netzkabel

FRANCAIS

Veuillez contrôler que les articles suivants sont bien joints à l'appareil principal dans le carton:

- (1) Mode d'emploi
- (2) Cordon d'alimentation de télécommande
- (3) Cordon électrique AC

ITALIANO

Controllare che le parti seguenti si trovino imballate con l'apparecchio nella scatola di spedizione.

- (1) Libretto delle istruzioni
- (2) Fido di alimentazione a distanza
- (3) Fido di alimentazione CA

ESPAÑOL

Por favor verifique asegurándose de que los siguientes artículos son empacados en la caja pero separados de la unidad principal:

- (1) Manual de instrucciones
- (2) Cable de encendido automático
- (3) Cable de corriente CA

NERLANDS

Controleer of de volgende accessoires bij het hoofdtoestel in de doos zijn verpakt:

- (1) Gebruiksaanwijzing

NAMES AND FUNCTIONS OF PARTS

- 1 Power switch (POWER)**
When this switch is pressed, the power is turned on, the POWER indicator **2** flashes for some seconds and then lights steadily, and stable operation condition is reached.
When this switch is pressed again, the power is turned off.
- 2 Power indicator**
This lights orange when the power is on, and turns red when the power is turned off with remote terminal **5**.
- 3 Speaker selector buttons (SPEAKERS)**
When button A is set to the "ON ()" position, sound is produced from the speaker systems connected to the "A" speaker terminals.
When button B is set to the "ON ()" position, sound is produced from the speaker systems connected to the "B" speaker terminals.
When both the A and B buttons are set to the "ON ()" position, sound is produced from the speaker systems connected to both the "A" and "B" speaker terminals.
When both the A and B buttons are set to the "OFF ()" position, no sound is produced from the speaker systems. Use this when listening over headphones.
- 4 Speaker System terminal (SPEAKER SYSTEMS)**
Connect the speaker systems here.
- 5 Remote terminal (REMOTE ON-OFF)**
This terminal is used for remote control of the pre-amplifier. A low-voltage DC current is emitted from the terminal to turn on the power of a DENON pre-amplifier.
The main unit's power can be turned on and off with the pre-amplifier's remote control unit when the pre-amplifier and main unit's input terminal are connected with the included cable. When the main unit's output terminal is connected to the input terminal of another power amplifier, the other power amplifier's power can be turned on and off.
- 6 AC IN**
Connect the included AC power cord here.
- 7 Input terminal (INPUT)**
This is an input terminal (RCA connector). Connect it to the pre-amplifier's pre-out terminal.

PROTECTOR

Various protector circuits are included in this unit. The output is interrupted in the following case:

- (1) Muting time, which lasts for several seconds after the power is turned "on".
- (2) When the offset voltage of the power amplifier has drifted outside the prescribed range.
- (3) When the temperature of the power amplifier is abnormally high.
- (4) When a speaker terminal is shorted or a speaker's impedance is extremely low.

This set is equipped with a heat-dissipating motor fan.
The motor fan operates when it senses that the temperature inside the set is high and the heat must be dispersed.

CONNECTIONS

Precautions When Making Connections

- Do not plug the power cord into the power outlet until all the connections have been completed.
- After checking the left and right channels, make proper connections: L with L, and R with R.
- Insert the plugs securely. Incomplete connections will cause noise to be generated.
- Note that bundling pin-plug cords with the power cord or placing pin-plug cords close to the power transformer might lead to the occurrence of hum or noise.

Connection to the speaker system

- When connecting the speaker terminals to the speaker systems, make certain to connect the polarities correctly (+ to + and - to -). If the polarities are incorrect when the two are connected, the center area of the sound will be lacking, the positions of the musical instruments will not be clear, and the stereo directional sensitivity will be impaired.
- During connection, be careful that the center wires in the speaker cords do not protrude from the terminals to contact any other terminal, and that the central wires in the separate speaker cords do not contact each other.
- **Speaker impedance**
 - When only one of the A or B terminals is used, the speakers that are connected should have a nominal impedance of 4 to 16 Ω/ohms.
 - When the two sets (A + B) are to be used at the same time, use of speakers whose impedance is outside the range from 8 to 16 Ω/ohms will result in malfunction. Be careful not to let this happen.
 - Speakers with a lower impedance may cause the protective circuitry to operate.

TROUBLESHOOTING

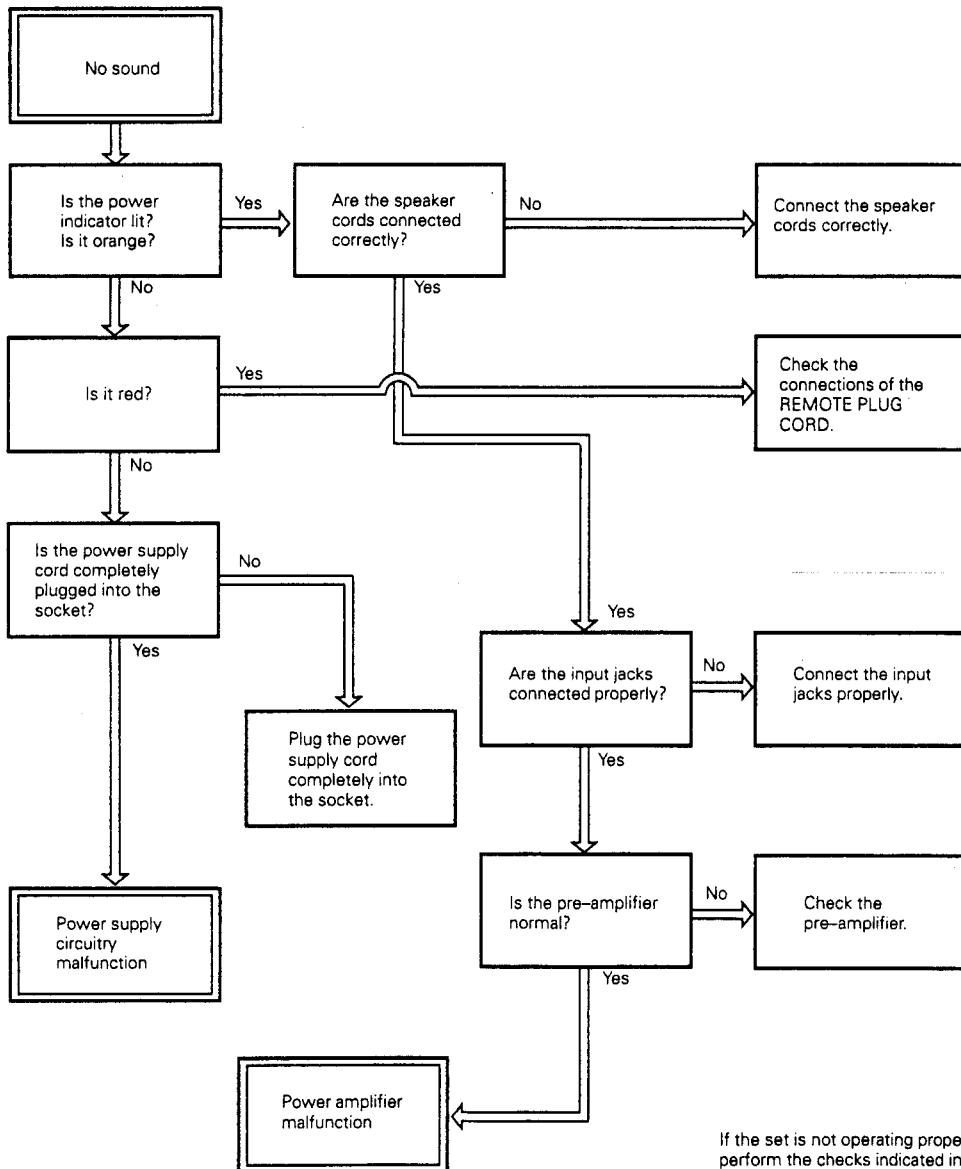

Before troubleshooting, be sure to check whether your audio system is really the source of the problem.

If you think the amplifier is out of order, first check the following one more time:

1. Are all the connections correctly made?
2. Is the set being operated properly in accordance with the Operating Manual?
3. Are the speakers and pre-amplifier being operated correctly?

If the set does not operate properly, perform the checks indicated in the flow chart below.

If none of the items listed apply to the difficulty, the amplifier is probably out of order. Turn off the power immediately, and contact the outlet where you purchased the amplifier or your nearest DENON dealer.

If the set is not operating properly, perform the checks indicated in this flow chart.

DISASSEMBLY (POA-T3)

1. Top Cover

Remove 8 screws **(A)** fixing the Top Cover and 2 screws **(B)** mounting the Rear Panel. Detach the Top Cover as shown in arrow direction.

2. Front Panel

Remove 4 upper screws **(D)** and 2 screws **(C)** fixing the Front Panel and detach the Front Panel as shown in arrow direction.

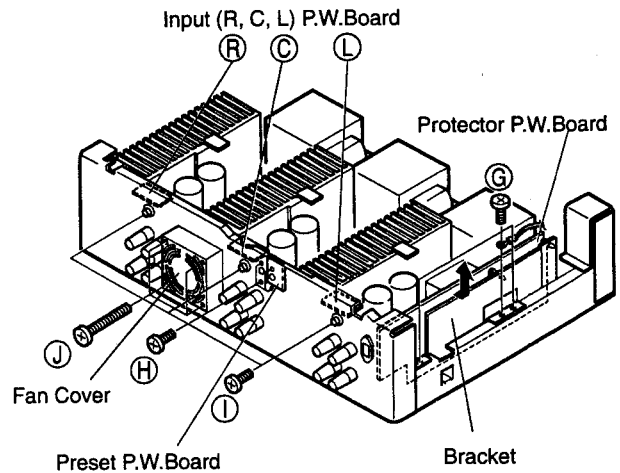

3. Each P.W.Board of Front Panel

- Speaker Switch P.W.Board
Remove 2 screws **(E)** fixing the Speaker Switch P.W.Board and detach the Speaker Switch P.W.Board as shown in arrow direction.
- Power Supply Switch P.W.Board
Remove 2 screws **(F)** mounting the Front Panel and detach the Power Supply Switch P.W. Board as shown in arrow direction.
- LED P.W.Board
Undo 2 Hooks and detach the LED P.W.Board.

4. Each P.W.Board and Fan of Rear Panel

- Protector P.W.Board
Remove 3 screws (G) fixing the bracket. Detach the Protector P.W.Board as shown in arrow direction.
- Preset P.W.Board
Remove 4 screws (H) fixing the Rear Panel and detach the Preset P.W.Board.
- Input (R, C, L) P.W.Board
Remove each screw (I) fixing the Rear Panel and detach each Input (R, C, L) P.W.Board.
- Fan Cover
Remove 4 screws (J) and detach the Fan Cover.

5. Power Supply Transformer

Remove 12 screws (K) mounting the Chassis and detach 3 Power Supply Transformers.

6. Power Amp. P.W.Board

Undo 2 Holders, remove a screw (L) fixing the Rear Panel and 4 screws (M) fixing Radiator Plate of Power Amp. P.W.Board. Detach 3 Power Amp. P.W.Boards as same way above.

(POA-T2/3200)

1. Top Cover

Remove 8 screws (A) fixing the Top Cover and 2 screws (B) mounting the Rear Panel. Detach the Top Cover as shown in arrow direction.

2. Front Panel

Remove 4 upper screws (D) and 2 screws (C) fixing the Front Panel and detach the Front Panel as shown in arrow direction.

3. Each P.W.Board of Front Panel

- Speaker Switch P.W.Board
Remove 2 screws (E) fixing the Speaker Switch P.W.Board and detach the Speaker Switch P.W.Board as shown in arrow direction.
- Power Supply Switch P.W.Board
Remove 2 screws (F) mounting the Front Panel and detach the Power Supply Switch Board as shown in arrow direction.
- LED P.W.Board
Undo 2 Hooks and detach the LED P.W.Board.

4. Each P.W.Board and Fan of Rear Panel

- Protector P.W.Board
Undo 2 Holders and remove 3 screws (G) fixing Protector P.W.Board. Detach the Protector P.W.Board as shown in arrow direction.
- Preset P.W.Board
Remove 4 screws (H) fixing the Rear Panel and detach the Preset P.W.Board.
- Input (R, L) P.W.Board
Remove each screw (I) fixing the Rear Panel and detach each Input (R, L) P.W.Board.
- Fan Cover (POA-T2 only)
Remove 4 screws (J) and detach the Fan Cover.

5. Power Supply Transformer

Remove 8 screws (K) mounting the Chassis and detach 2 Power Supply Transformers.

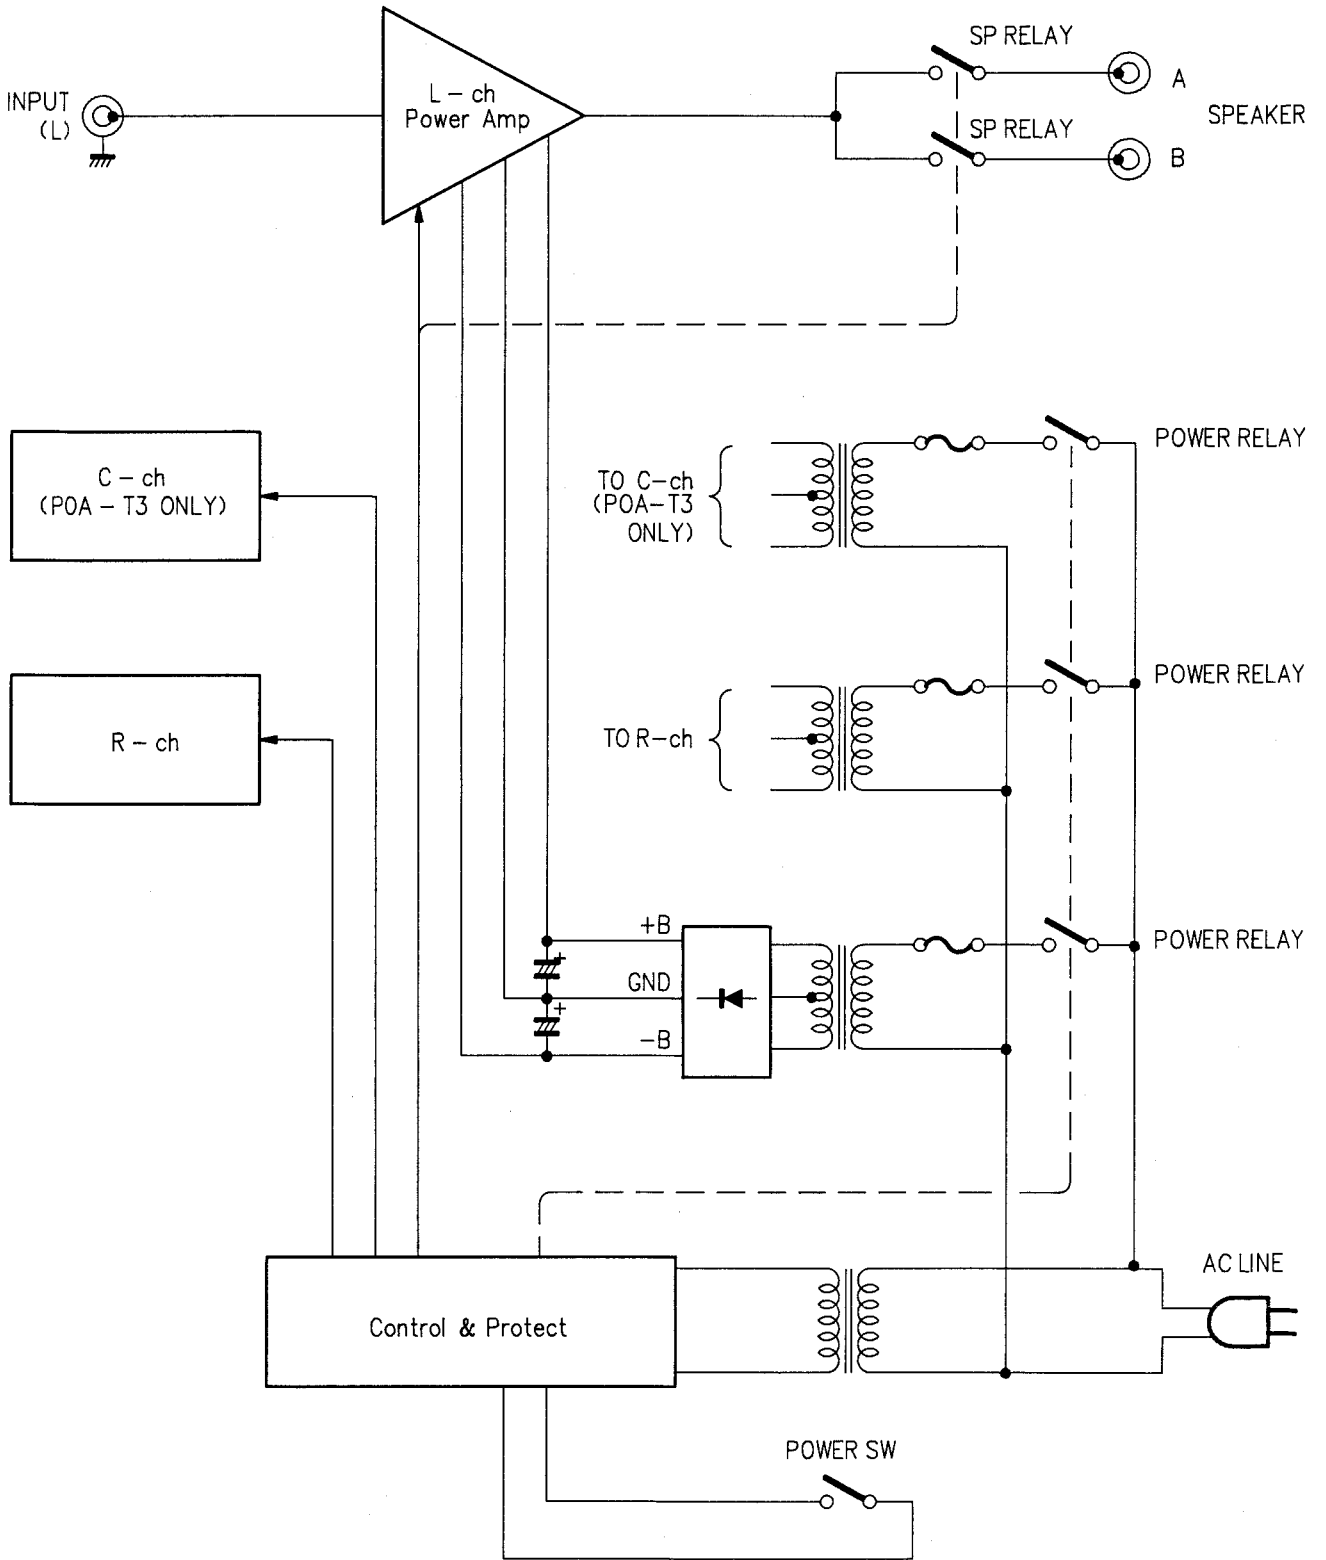

6. Power Amp. P.W.Board

Undo 2 Holders, remove a screw (L) fixing the Rear Panel and 4 screws (M) fixing Radiator Plate of Power Amp. P.W.Board. Detach 2 Power Amp. P.W.Boards as same way above.

BLOCK DIAGRAM

METHOD OF ADJUSTMENT

IDLE CURRENT ADJUSTMENT

● Setup

1. Keep the unit away from direct wind blown by an air-conditioner and an electric fan, and keep the unit under normal conditions. Adjust the range of ambient temperature to 15 – 30°C.
2. Set the following conditions as follows:
 - POWER (Power switch) to off
 - SPEAKERS (Speaker Terminal) to no load (Speakers Disconnected),(But SP-A SW to on.)
 - Disconnect input terminal

● Adjustment

1. Connect DC Voltmeter to Test points (TP101) of 1U-2909.
2. Turn POWER Switch "ON".
3. Adjust VR102 so that the DC Voltmeter reads $2 \pm 0.5\text{mV}$.
4. Then after 3 minutes warm-up time, readjust VR102 so that the DC Voltmeter reads $2 \pm 1\text{mV}$.
5. Adjust each channel as same way above.

OFFSET ADJUSTMENT

● Setup

1. Keep the unit away from direct wind blown by an air-conditioner and an electric fan, and keep the unit under normal conditions. Adjust the range of ambient temperature to 15 – 30°C.
2. Set the following conditions as follows:
 - POWER (Power switch) to off
 - SPEAKERS (Speaker Terminal) to no load (Speakers Disconnected),(But SP-A SW to on.)
 - Disconnect input terminal

● Adjustment

1. Connect Speaker A terminal to DC Voltmeter and oscilloscope.
2. Adjust oscilloscope range to 5mV/div.
3. Turn Power Switch "ON".
4. Adjust VR101 so that the DC Voltmeter reads $0 \pm 1\text{mV}$.
5. Then after 3 minutes warm-up time, readjust VR101 so that the DC Voltmeter reads $0 \pm 1\text{mV}$.
6. Adjust each channel as same way above.

NOTE FOR PARTS LIST

- Part indicated with the mark "◎" are not always in stock and possibly to take a long period of time for supplying, or in some case supplying of part may be refused.
- When ordering of part, clearly indicate "1" and "I" (i) to avoid mis-supplying.
- Ordering part without stating its part number can not be supplied.
- Part indicated with the mark "★" is not illustrated in the exploded view.
- Not including Carbon Film ±5%, 1/4W Type in the P.W.Board parts list. (Refer to the Schematic Diagram for those parts.)

WARNING:

Parts marked with this symbol  have critical characteristics.
Use ONLY replacement parts recommended by the manufacturer.

● Resistors

Ex.: RN 14K 2E 182 G FR
 Type Shape and performance Power Resistance Allowable error Others

RD : Carbon	2B : 1/8W	F : ±1%	P : Pulse-resistant type
RC : Composition	2E : 1/4W	G : ±2%	NL : Low noise type
RS : Metal oxide film	2H : 1/2W	J : ±5%	NB : Non-burning type
RW : Winding	3A : 1W	K : ±10%	FR : Fuse-resistor
RN : Metal film	3D : 2W	M : ±20%	F : Lead wire forming
RK : Metal mixture	3F : 3W		
	3H : 5W		

*** Resistance**

1 8 2 ⇒ 1800 ohm = 1.8 kohm
 Indicates number of zeros after effective number.
 2-digit effective number.

• Units: ohm

1 R 2 ⇒ 1.2 ohm
 1-digit effective number.
 2-digit effective number, decimal point indicated by R.

• Units: ohm

● Capacitors

Ex.: CE 04W 1H 2R2 M BP
 Type Shape and performance Dielectric strength Capacity Allowable error Others

CE : Aluminum foil electrolytic	0J : 6.3V	F : ±1%	HS : High stability type
CA : Aluminum solid electrolytic	1A : 10V	G : ±2%	BP : Non-polar type
CS : Tantalum electrolytic	1C : 16V	J : ±5%	HR : Ripple-resistant type
CQ : Film	1E : 25V	K : ±10%	DL : For charge and discharge
CK : Ceramic	1V : 35V	M : ±20%	HF : For assuring high frequency
CC : Ceramic	1H : 50V	Z : +80%	U : UL part
CP : Oil	2A : 100V	-20%	C : CSA part
CM : Mica	2B : 125V	P : +100%	W : UL-CSA type
CF : Metallized	2C : 160V	-0%	F : Lead wire forming
CH : Metallized	2D : 200V	C : ±0.25pF	
	2E : 250V	D : ±0.5pF	
	2H : 500V	= : Others	
	2J : 630V		

*** Capacity (electrolyte only)**

2 2 2 ⇒ 2200µF
 Indicates number of zeros after effective number.
 2-digit effective number.

• Units: µF.

2 R 2 ⇒ 2.2µF
 1-digit effective number.
 2-digit effective number, decimal point indicated by R.

• Units: µF.

*** Capacity (except electrolyte)**

2 2 2 ⇒ 2200pF = 0.0022µF
 (More than 2) — Indicates number of zeros after effective number.
 2-digit effective number.

• Units: µF.

2 2 1 ⇒ 220pF
 (0 or 1) — Indicates number of zeros after effective number.
 2-digit effective number.

• Units: pF.

• When the dielectric strength is indicated in AC, "AC" is included after the dielectric strength value.

NOTES
 ALL RESISTANCE VALUES IN OHM. k=1,000 OHM, M=1,000,000 OHM
 ALL CAPACITANCE VALUES IN MICRO FARAD. P=MICRO-MICRO FARAD
 EACH VOLTAGE AND CURRENT ARE MEASURED AT NO SIGNAL INPUT CONDITION.
 CIRCUIT AND PARTS ARE SUBJECT TO CHANGE WITHOUT PRIOR NOTICE.

WARNING:
 Parts marked with this symbol  have critical characteristics. Use ONLY replacement parts recommended by the manufacturer.

CAUTION:
 Before returning the unit to the customer, make sure you make either (1) a leakage current check or (2) a line to chassis resistance check. If the leakage current exceeds 0.5 milliamps, or if the resistance from chassis to either side of the power cord is less than 240 kohms, the unit is defective.

WARNING:
 DO NOT return the unit to the customer until the problem is located and corrected.
