CAUTION

**RISK OF ELECTRIC SHOCK
DO NOT OPEN**

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER SERVICE-ABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

CAUTION

TO PREVENT ELECTRIC SHOCK DO NOT USE THIS (POLARIZED) PLUG WITH AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

ATTENTION

POUR PREVENIR LES CHOCS ELECTRIQUES NE PAS UTILISER CETTE FICHE POLARISEE AVEC UN PROLONGATEUR UNE PRISE DE COURANT OU UNE AUTRE SORTIE DE COURANT, SAUF SI LES LAMES PEUVENT ETRE INSEREES A FOND SANS EN LAISSER AUCUNE PARTIE A DECOUVERT.

SAFETY INSTRUCTIONS

1. Read Instructions – All the safety and operating instructions should be read before the appliance is operated.
2. Retain Instructions – The safety and operating instructions should be retained for future reference.
3. Heed Warnings – All warnings on the appliance and in the operating instructions should be adhered to.
4. Follow Instructions – All operating and use instructions should be followed.
5. Water and Moisture – The appliance should not be used near water – for example, near a bathtub, washbowl, kitchen sink, laundry tub, in a wet basement, or near a swimming pool, and the like.
6. Carts and Stands – The appliance should be used only with a cart or stand that is recommended by the manufacturer.
- 6A. An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.
7. Wall or Ceiling Mounting – The appliance should be mounted to a wall or ceiling only as recommended by the manufacturer.
8. Ventilation – The appliance should be situated so that its location or position does not interfere with its proper ventilation. For example, the appliance should not be situated on a bed, sofa, rug, or similar surface that may block the ventilation openings; or, placed in a built-in installation, such as a bookcase or cabinet that may impede the flow of air through the ventilation openings.
9. Heat – The appliance should be situated away from heat sources such as radiators, heat registers, stoves, or other appliances (including amplifiers) that produce heat.

10. Power Sources – The appliance should be connected to a power supply only of the type described in the operating instructions or as marked on the appliance.
11. Grounding or Polarization – The precautions that should be taken so that the grounding or polarization means of an appliance is not defeated.
12. Power-Cord Protection – Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the appliance.
13. Protective Attachment Plug – The appliance is equipped with an attachment plug having overload protection. This is a safety feature. See Instruction Manual for replacement or resetting of protective device. If replacement of the plug is required, be sure the service technician has used a replacement plug specified by the manufacturer that has the same overload protection as the original plug.
14. Cleaning – The appliance should be cleaned only as recommended by the manufacturer.
15. Power Lines – An outdoor antenna should be located away from power lines.
16. Outdoor Antenna Grounding – If an outside antenna is connected to the receiver, be sure the antenna system is grounded so as to provide some protection against voltage surges and built up static charges. Section 810 of the National Electrical Code, ANSI/NFPA No. 70–1984, provides information with respect to proper grounding of the mast and sup-
 17. Nonuse Periods – The power cord of the appliance should be unplugged from the outlet when left unused for a long period of time.
 18. Object and Liquid Entry – Care should be taken so that objects do not fall and liquids are not spilled into the enclosure through openings.
 19. Damage Requiring Service – The appliance should be serviced by qualified service personnel when:
 - A. The power-supply cord or the plug has been damaged; or
 - B. Objects have fallen, or liquid has been spilled into the appliance; or
 - C. The appliance has been exposed to rain; or
 - D. The appliance does not appear to operate normally or exhibits a marked change in performance; or
 - E. The appliance has been dropped, or the enclosure damaged.
 20. Servicing – The user should not attempt to service the appliance beyond that described in the operating instructions. All other servicing should be referred to qualified service personnel.

FIGURE A
EXAMPLE OF ANTENNA GROUNDING ACCORDING
TO NATIONAL ELECTRICAL CODE INSTRUCTIONS
CONTAINED IN ARTICLE 810 – "RADIO AND
TELEVISION EQUIPMENT"

- a Use No. 10 AWG (5.3 mm²) copper, No. 8 AWG (8.4 mm²) aluminum, No. 17 AWG (1.0 mm²) copper-clad steel or bronze wire, or larger, as a ground wire.
- b Secure antenna lead-in and ground wires to house with stand-off insulators spaced from 4–6 feet (1.22–1.83 m) apart.
- c Mount antenna discharge unit as close as possible to where lead-in enters house.
- d Use jumper wire not smaller than No. 6 AWG (13.3 mm²) copper, or the equivalent, when a separate antenna-grounding electrode is used. See NEC Section 810-21 (j).

**CONNECTIONS
CONNEXIONS**

USA MODEL ONLY

Note to CATV system installer:

This reminder is provided to call the CATV system installer's attention to Article 820-22 of the NEC that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

Note:

- Please keep away AM loop antenna lead terminals from the metal parts of the back panel.

Remarque:

- Eloigner les bornes de l'antenne en boucle AM de toute partie métallique du panneau arrière.

- (FOR WEAK SIGNAL RECEPTION) When an outdoor antenna is used, do not detach the lead wires of the loop antenna from the terminals.

- (POUR RECEPTION D'ONDE FAIBLE) Lorsqu'une antenne extérieure est utilisée, ne pas détacher les fils de l'antenne en boucle de ses bornes.

- ACCESSORY LOOP ANTENNA Removal of loop antenna Move the supporting rod of the loop antenna upward to remove the antenna.

- ANTENNE CIRCULAIRE FOURNIE COMME ACCESSOIRE Dépose de l'antenne circulaire. Déplacer vers le haut la tige de support de l'antenne pour la détacher.

Fig. 3

CAUTION

- Noise may be generated if a near-by television set is on during AM broadcasting reception. The tuner should be used as far away from a television as possible.
- Effective period of memory back-up is about a month under normal temperature. If the memorized stations cannot be called back, preset the stations again.

PRECAUTION

- Il y aura des bruits si un téléviseur situé à proximité est allumé lors de la réception d'émissions AM. Le tuner devrait être utilisé le plus loin possible d'un téléviseur.
- La période effective de référence en mémoire st d'environ un mois dans les conditions de température normale. Si les stations mises en mémoire ne peuvent pas être captées, recommencer le pré réglage.

ENGLISH

DESIGNATIONS AND FUNCTIONS OF PANEL CONTROLS

- 1 POWER (Power ON-STANDBY/OFF Switch)**
The unit works 2 to 3 seconds after this switch is turned on.
- 2 SIGNAL (Signal Indicator)**
This lights when a station can be received.
- 3 STEREO/MONO (Stereo/Mono Indicator)**
"STEREO" lights automatically when receiving a stereo broadcast.
"MONO" lights when receiving a monaural broadcast or no broadcast at all.
- 4 TUNING MODE (AUTO/MANUAL)**
Pressing MODE **18** causes "AUTO" and "MANUAL" to light up alternately.
- 5 WIDE/NARROW (IF BAND LED Indicator)**
Pressing "IF BAND" **12** causes WIDE or NARROW to light up alternately.
- 6 MPX NR (MPX NR Indicator)**
This LED indicator lights up when the MPX NR button **11** is pressed and this circuit is operated.
- 7 TEN KEYS (Ten Key Buttons)**
Used to specify numbers for Memory and Preset Call. Channels 1-30 can be specified using these buttons.
Preset Call Setting Method
A station that has already been preset can be fetched by the following method.
Pressing **1**, **2**, **ENTER** in order fetches the station present in memory for channel 12.
- 8 ENTER (Enter Button)**
Used for setting Memory, and Preset Call.
- 9 TUNING (Tuning Buttons)**
Used to change the received frequency to a higher frequency (UP) or a lower frequency (DOWN).
- 10 BAND (Band Button)**
Selects between FM or AM.
- 11 MPX NR (MPX NR Button)**
Switches MPX NR "ON" or "OFF". Lights "ON" LED **6**.
ON: Suppresses noise when a stereo broadcast with a weak signal is being received.
OFF: Does not carry out the above operation.
- 12 IF BAND (IF Bandwidth Selector Button)**
Selects the bandwidth of the FM and AM intermediate frequency amplifier from 2 ranges, "WIDE" and "NARROW".
This LED indicator **5** lights up at this time.
- 13 AUTO MUTE/MANU (Tuning Mode Button)**
This switches between auto and manual tuning.
Auto tuning: When the UP key is pressed, the radio is tuned automatically to a higher frequency. Press the DOWN key to tune to a lower frequency. Use this position to eliminate noise when no signals or weak signals are being received.
Manual tuning: In this position, the radio can be tuned manually.
- 14 MEMORY (Memory Button)**
Used to store the frequency of the station currently received.
Pressing **MEMORY**, **1**, **2**, **ENTER** in order stores the station on channel 12 in memory. Up to 30 channels of either FM or AM can be stored in memory.
- 15 SIGNAL (Signal-Strength Indicators)**
The number of LEDs that light increases in correspondence with the strength of the signal being picked up by the antenna.
- 16 MEMORY (Memory Indicator)**
This indicator lights when the MEMORY button **14** is pressed.
- 17 CHANNEL (Channel Indicator)**
This displays the number of the channel at which the station is stored.
- 18 DIGITAL FREQUENCY INDICATOR**
Reception frequencies are digitally indicated with numbers. The FM frequency unit is MHz; the AM (MW) frequency unit is kHz.
- 19 REMOTE SENSOR (Remote Control Photosensitive Window)**
This sensor receives the infrared light transmitted from the wireless remote control unit.
When operating the wireless remote control unit, point it towards this sensor.
The wireless remote control unit included with the DENON AVC-2000, AVC-700 or DAP 2500 can be used to switch the preset channels up or down.

OPERATION INSTRUCTIONS

PREPARATION

CHECKING CONNECTIONS

- Check all the connections by referring to connection diagram (Fig. 1).
- Check that the right (R) and left (L) channels of the speakers are connected to the corresponding right (R) and left (L) plugs, and check that polarities (positive and negative) are correctly matched.
- Check that the right (R) and left (L) pins are correctly inserted to the corresponding jacks.
- Check that all the cords are firmly connected.
* Turn on the power with the POWER switch after checking all the connections.

CHECKING ANTENNA

1. Do not incorrectly connect the loop antenna. If you are not sure how to connect the loop antenna, refer to Fig. 1.
2. Use of loop antenna: Keep the loop antenna away from the main body. If the antenna contacts a metal body, reception sensitivity is degraded, thus resulting in unclear reproduction.

ADVICE FOR USE

- Do not place the set in direct sunlight, in hot areas such as near heating equipment, with high humidity or dust levels. This may cause damage to the unit.
- Check that all parts are connected correctly before turning on the power source.
- When user is absent for long periods, be sure to remove plug from wall socket.
- Do not use insecticide, benzene or thinner near the unit, or the cabinet color will fade. Avoid using polish: use a soft cloth (e.g. silicon cloth).
- It is not recommended to place players, decks and other objects on the this appliance so that the ventilation openings are blocked.
This will cause internal temperature rise and equipment failure. Do not use this appliance in a closed cabinet or container. This will cause internal temperature rise abnormally.

SPECIFICATIONS• **FM SECTION**

Frequency Range:	87.5 MHz~108.0 MHz
Antenna Terminal:	75 ohm Unbalanced
Usable Sensitivity:	1.0 μ V (11.2 dBf)

● FOR UNITED KINGDOM MODEL ONLY

WARNING:

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:

The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.

The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral
Brown: Live

● FÜR DEUTSCHE MODELL NUR

Die Deutsche Bundespost informiert

Sehr geehrter Rundfunkzuhörer,

Dieses Gerät ist von der Deutschen Bundespost als Ton- bzw. Fernseh-Rundfunkempfänger bzw. als Komponente einer solchen Anlage (Tuner, Verstärker, aktive Lautsprecherbox, Fernseh-Monitor u. dgl.) zugelassen. Es entspricht den zur Zeit geltenden Technischen Vorschriften und ist zum Nachweis dafür mit dem Zulassungszeichen der Deutschen Bundespost gekennzeichnet. Bitte überzeugen Sie sich selbst. Dieses Gerät darf im Rahmen der "Allgemeingenehmigung für das Errichten und Betreiben von Ton- und Fernseh-Rundfunkempfängern" in der Bundesrepublik Deutschland betrieben werden. Beachten Sie aber bitte, daß aufgrund dieser Genehmigung nur für die Allgemeinheit bestimmte Sendungen und solche, für die ebenfalls eine Allgemeine Empfangsgenehmigung erteilt worden ist^{*)}, empfangen und wiedergegeben werden dürfen. Wer unbefugt andere Sendungen (z. B. des Polizeifunks, des Mobilfunks) empfängt und wiedergibt, verstößt gegen die Genehmigungsaufgaben und macht sich daher nach § 15, Absatz 2a des Gesetzes über Fernmeldeanlagen strafbar.

Die Kennzeichnung mit dem Zulassungszeichen bietet Ihnen die Gewähr, daß dieses Gerät keine anderen ordnungsgemäß errichteten und betriebenen elektrischen Anlagen stört. Der Zusatzbuchstabe S^{**)} beim Zulassungszeichen besagt außerdem, daß das Gerät gegen störende Beeinflussungen durch andere ordnungsgemäß errichtete und betriebene elektrische Anlagen weitgehend unempfindlich ist, Geräte ohne den Zusatz S sind nicht besonders sicher gegen Beeinflussungen.

Sollten bei Geräten mit dem Zusatz S ausnahmsweise trotzdem Beeinflussungen auftreten, oder wenn Sie Fragen haben, so wenden Sie sich bitte an die örtlich zuständige Funkstörungenmeßstelle.

^{*)} Zur Zeit für den Empfang der Aussendungen von Amateurfunkstellen und der Normalfrequenz- und Zeitzeichensendungen.

^{**)} Weitere Zusätze haben in Bezug auf die Störfestigkeit keine Bedeutung. Sie geben bei Empfängern vielmehr Aufschluß über Empfangsmöglichkeiten.

Allgemeine Genehmigung für Ton- und Fernseh-Rundfunkempfänger

Die Allgemeine Ton- und Fernseh-Rundfunkgenehmigung vom 11.12.1970 (veröffentlicht im Bundesanzeiger Nr. 234 vom 16.12.1970) wird unter Bezug auf Abschnitt III der Genehmigung durch folgende Fassung der Allgemeinen Genehmigung für Ton- und Fernseh-Rundfunkempfänger gemäß den §§ 1 und 2 des Gesetzes über Fernmeldeanlagen ersetzt.

Genehmigung für Ton- und Fernseh-Rundfunkempfänger

- Die Errichtung und der Betrieb von Ton- und Fernseh-Rundfunkempfängern werden nach §§ 1 und 2 des Gesetzes über Fernmeldeanlagen in der Fassung der Bekanntmachung vom 17.3.1977 (BGBl. I, S. 459) allgemein genehmigt.
- Ton- und Fernseh-Rundfunkempfänger im Sinne dieser Genehmigung sind Funkanlagen gemäß § 1 Abs. 1 des Gesetzes über Fernmeldeanlagen, die ausschließlich die für Rundfunkempfänger zugelassenen Frequenzabstimmbereiche^{*)} aufweisen und zum Aufnehmen und gleichzeitigen Hör- oder Sichtbarmachen von Ton- oder Fernseh-Rundfunksendungen bestimmt sind. Zum Empfänger gehören auch eingebaute oder mit ihm fest verbundene Antennen sowie bei Unterteilung in mehrere Geräte die funktionsmäßig zugehörigen Geräte. Außer für den Empfang von Rundfunksendungen dürfen Ton- und Fernseh-Rundfunkempfänger nur mit besonderer Genehmigung der Deutschen Bundespost für andere Fernmeldezwecke zusätzlich benutzt werden. In den Empfängern eingebaute oder sonst mit ihm verbundene Zusatzgeräte (z.B. Ultraschallfernmeldeanlagen, Infrarotfernmeldeanlagen) werden von dieser Genehmigung nicht erfaßt (ausgenommen die Einrichtungen zum Empfang des Verkehrsroundfunks). Desgleichen sind andere technische Empfängerereigenschaften, die über den eigentlichen Zweck eines Rundfunkempfängers hinausgehen (z.B. zum Empfang anderer Funkdienste, für die Wiedergabe im Rahmen von Textübertragungsverfahren) hierdurch nicht genehmigt. Hierfür gelten besondere Regelungen.

Diese Genehmigung wird unter nachstehenden Auflagen erteilt.

- Ton- und Fernseh-Rundfunkempfänger müssen den jeweils geltenden Technischen Vorschriften für Ton- und Fernseh-Rundfunkempfänger entsprechen. Eingebaute Zusatzgeräte müssen den für sie geltenden Bestimmungen und technischen Vorschriften genügen. Änderungen der Technischen Vorschriften, die im Amtsblatt des Bundesministers für das Post- und Fernmeldewesen veröffentlicht werden, muß bei schon errichteten und in Betrieb genommenen Ton- und Fernseh-Rundfunkempfängern nachgekommen werden, wenn durch den Betrieb dieser Rundfunkempfänger andere elektrische Anlagen gestört werden. Senenmäßig hergestellte Ton- und Fernseh-Rundfunkempfänger müssen zum Nachweis dafür, daß sie den

^{*)} Siehe Technische Vorschriften für Ton- und Fernseh-Rundfunkempfänger, veröffentlicht im Amtsblatt des Bundesministers für das Post- und Fernmeldewesen.

^{**)} Für ausnahmsweise noch nicht gekennzeichnete, vor dem 1.7.1979 errichtete und in Betrieb genommene Ton-Rundfunkempfänger wird die Kennzeichnung nicht verlangt.

Technischen Vorschriften entsprechen, mit einer DBP-Prüfnummer gekennzeichnet sein ^{**)} Die DBP-Prüfnummer sagt über die elektrische und mechanische Sicherheit und die Einhaltung der Strahlenschutzbestimmungen nichts aus.

- Ton- und Fernseh-Rundfunkempfänger dürfen an ortsfesten oder nichtortsfesten Rundfunk-Empfangsantennenanlagen, -Verteilanlagen oder Kabelfernsehanlagen betrieben und im Rahmen der Bestimmungen über private Drahtfernmeldeanlagen mit Drahtfernmeldeanlagen verbunden werden. Auf demselben Grundstück oder innerhalb eines Fahrzeuges dürfen Ton- und Fernseh-Rundfunkempfänger mit anderen Geräten oder sonstigen Gegenständen (z.B. Plattenspieler, Magnetaufzeichnungs- und -Wiedergabegeräte, Antennen) verbunden werden, sofern diese Geräte von der Deutschen Bundespost genehmigt sind oder keiner Genehmigung bedürfen. Die räumliche Kombination von Funkanlagen mit Ton- oder Fernseh-Rundfunkempfängern ist nur dann zulässig, wenn die betreffenden Funkanlagen je für sich genehmigt sind.
- Mit Ton- oder Fernseh-Rundfunkempfängern dürfen aufgrund dieser Genehmigung nur Sendungen des Rundfunks empfangen werden, also übertragene Tonsignale (Musik, Sprache) und Fernsehsignale (nur Bildinformationen). Andere Sendungen (z.B. des Polizeifunks, der öffentlichen beweglichen Landfunkdienste, Datenübertragungen) dürfen nicht aufgenommen werden, werden sie jedoch unbeabsichtigt empfangen, so dürfen sie weder aufgezeichnet, noch anderen mitgeteilt, noch für irgendwelche Zwecke ausgewertet werden. Das Vorhandensein solcher Sendungen darf auch nicht anderen zur Kenntnis gebracht werden.
- Durch Ton- oder Fernseh-Rundfunkempfänger darf der Betrieb anderer elektrischer Anlagen nicht gestört werden.
- Änderungen der Ton- oder Fernseh-Rundfunkempfänger, die die zulässigen Frequenzabstimmbereiche der Empfänger erweitern, gehen über den Umfang dieser Genehmigung hinaus und bedürfen vor ihrer Ausführung einer besonderen Genehmigung der Deutschen Bundespost. Wer aufgrund dieser Genehmigung einen Ton- oder Fernseh-Rundfunkempfänger betreibt, hat bei einer Änderung der kennzeichnenden Merkmale von Ton- oder Fernseh-Rundfunksendern (insbesondere bei Änderung des Sendeverfahrens oder bei Frequenzwechseln) die ggf. notwendig werdenden Änderungen an den Rundfunkempfängern auf seine Kosten vorzunehmen zu lassen.
- Die Deutsche Bundespost ist berechtigt, Rundfunkempfänger und mit ihnen verbundene Geräte darauf zu prüfen, ob die Auflagen der Genehmigung und die Technischen Vorschriften eingehalten werden. Den Beauftragten der Deutschen Bundespost ist das Betreten der Grundstücke oder Räume, in denen sich Ton- oder Fernseh-Rundfunkempfänger befinden, zu den verkehrsüblichen Zeiten zu gestatten. Befinden sich die Rundfunkempfänger oder mit ihnen verbundene Geräte nicht im Verfügungsbereich desjenigen, der die Empfänger betreibt, so hat er den Beauftragten der Deutschen Bundespost Zutritt zu diesen Teilen zu ermöglichen.

III

Bei Funkstörungen die nicht durch Mangel der Rundfunkempfänger oder der mit ihnen verbundenen Geräte verursacht werden, können die Funkmedien der Deutschen Bundespost zur Feststellung der Störung in Anspruch genommen werden.

IV

- Diese Genehmigung kann allgemein oder durch die örtlich zuständige Oberpostdirektion einem einzelnen Betreiber gegenüber für einen bestimmten Rundfunkempfänger widerrufen werden. Ein Widerruf ist insbesondere zulässig, wenn die unter Abschnitt II aufgeführten Auflagen nicht erfüllt werden. Anstatt die Genehmigung zu widerrufen, kann die Deutsche Bundespost anordnen, daß bei einem Verstoß gegen eine Auflage ein Ton- oder Fernseh-Rundfunkempfänger außer Betrieb zu setzen ist und erst bei Einhaltung der Auflagen wieder betrieben werden darf. Die Auflagen dieser Genehmigung können jederzeit ergänzt oder geändert werden.
- Diese Genehmigung ersetzt die Allgemeine Ton- und Fernseh-Rundfunkgenehmigung vom 11.12.1970, sie gilt ab 1.7.1979.

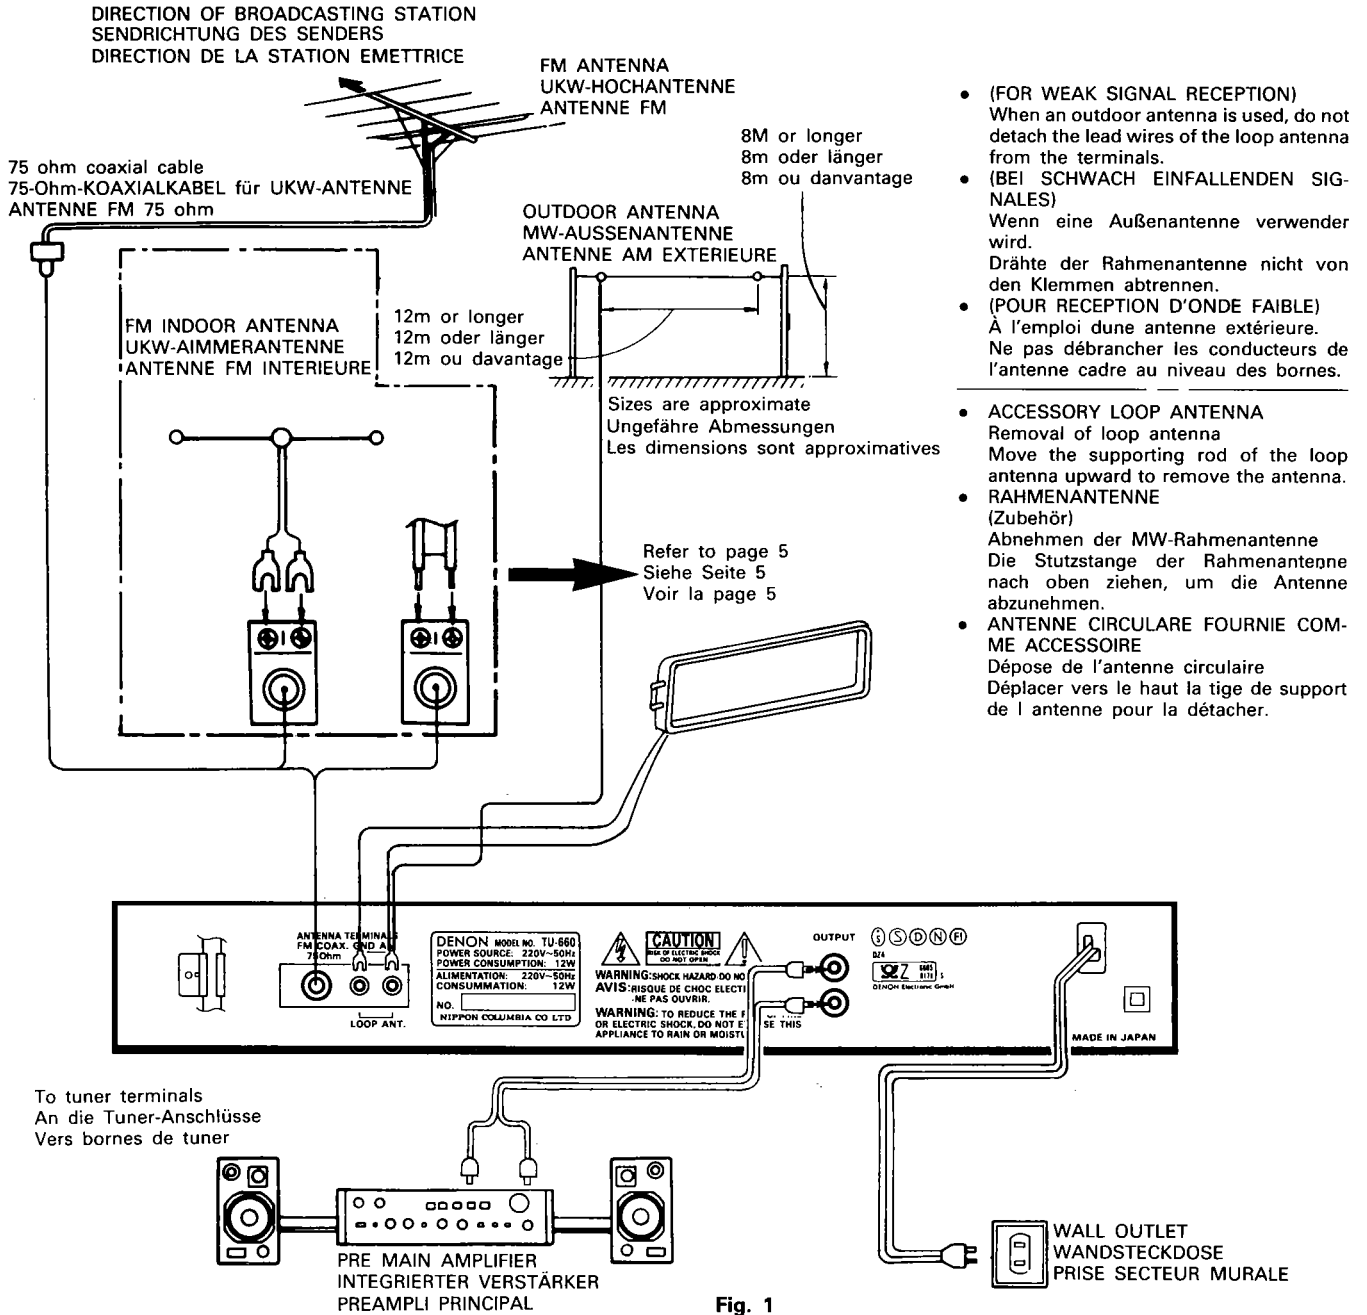

Bonn, den 14.5.1979

Der Bundesminister
für das Post- und Fernmeldewesen

PLEASE RECORD UNIT SERIAL NUMBER ATTACHED TO THE REAR OF THE CABINET FOR FUTURE REFERENCE"

**CONNECTIONS
ANSCHLÜSSE
CONNEXIONS**

- (FOR WEAK SIGNAL RECEPTION)
When an outdoor antenna is used, do not detach the lead wires of the loop antenna from the terminals.
- (BEI SCHWACH EINFALLENDEN SIGNALS)
Wenn eine Außenantenne verwendet wird. Drähte der Rahmenantenne nicht von den Klemmen abtrennen.
- (POUR RECEPTION D'ONDE FAIBLE)
À l'emploi d'une antenne extérieure. Ne pas débrancher les conducteurs de l'antenne cadre au niveau des bornes.
- ACCESSORY LOOP ANTENNA
Removal of loop antenna
Move the supporting rod of the loop antenna upward to remove the antenna.
- RAHMENANTENNE
(Zubehör)
Abnehmen der MW-Rahmenantenne
Die Stützstange der Rahmenantenne nach oben ziehen, um die Antenne abzunehmen.
- ANTENNE CIRCULAIRE FOURNIE COMME ACCESSOIRE
Dépose de l'antenne circulaire
Déplacer vers le haut la tige de support de l'antenne pour la détacher.

Fig. 1
Abb. 1

• **MULTI-VOLTAGE MODEL ONLY**

Setting the line voltage

- The customer can set the VOLTAGE SELECTOR KNOB on the back panel for appropriate line voltage by using a screwdriver.
- Do not use excessive force in setting the VOLTAGE SELECTOR KNOB – you may damage it.
- If the VOLTAGE SELECTOR KNOB does not turn smoothly, call qualified service personnel.

Setting the frequency step

Set the FREQUENCY STEP switch as described below.

- In the U.S.A. and Canada – set the switch to 100 kHz/10 kHz side.
With this setting, the frequency varies in 100 kHz steps in the range of 87.5 to 108.0 MHz (FM) and in 10 kHz steps in 520 to 1710 kHz (AM).
- Elsewhere – set the switch to 50 kHz/9 kHz side.
With this setting, the frequency varies in 50 kHz steps in the range of 87.50 to 108.00 MHz (FM) and in 9 kHz steps (AM) in 522 to 1611 kHz (AM).

DESIGNATIONS AND FUNCTIONS OF PANEL CONTROLS

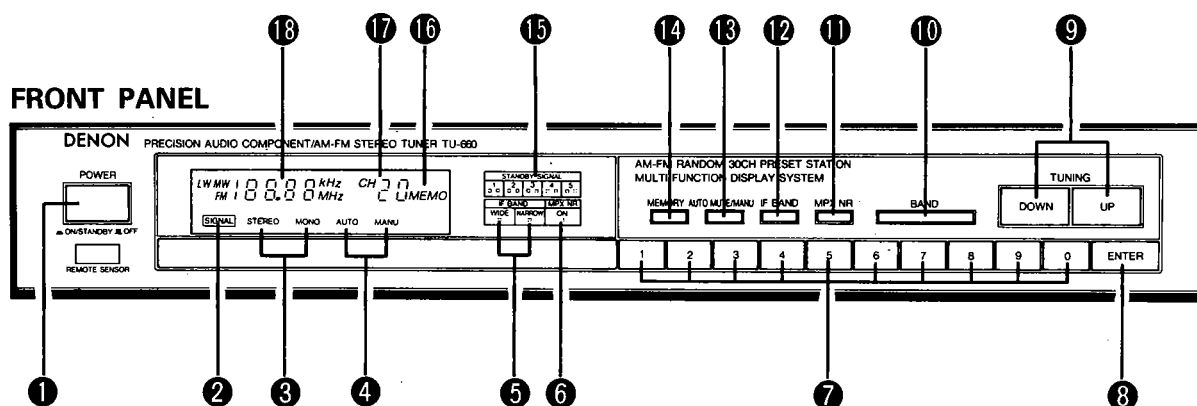

Fig. 4

- 1 POWER (Power ON-STANDBY/OFF Switch)**
The unit works 2 to 3 seconds after this switch is turned on. When the power is turned off by remote control, the unit is set to the standby mode and the STANDBY indicator (the first signal LED) lights. Set the power switch to the OFF position when not using for long periods of time.
- 2 SIGNAL (Signal Indicator)**
This lights when a station can be received.
- 3 STEREO/MONO (Stereo/Mono Indicator)**
"STEREO" lights automatically when receiving a stereo broadcast.
"MONO" lights when receiving a monaural broadcast or no broadcast at all.
- 4 TUNING MODE (AUTO/MANUAL)**
Pressing MODE **4** causes "AUTO" and "MANUAL" to light up alternately.
TU-660L: Pressing this button does not switch the tuner to Auto Tuning Mode, during reception of LW only.
- 5 WIDE/NARROW (IF BAND LED Indicator)**
Pressing "IF BAND" **12** causes WIDE and NARROW to light up alternately.
- 6 MPX NR (MPX NR Indicator)**
This LED indicator lights up when the MPX NR button **11** is pressed and this circuit is operated.
- 7 TEN KEYS (Ten Key Buttons)**
Used to specify numbers for Memory, Preset Call. Channels 1-30 can be specified using these buttons.
Preset Call Setting Method
A station that has already been preset can be fetched by the following method.
Pressing **1**, **2**, **ENTER** in order fetches the station present in memory for channel 12.
- 8 ENTER (Enter Button)**
Used for setting Memory, and Preset Call.
- 9 TUNING (Tuning Buttons)**
Used to change the received frequency to a higher frequency (UP) or a lower frequency (DOWN).
- 10 BAND (Band Button)**
Selects between FM or AM (MW).
TU-660L: Pressing this button changes the tuner from FM to MW to LW, then back to FM, in that order.
- 11 MPX NR (MPX NR Button)**
Switches MPX NR "ON" or "OFF". Lights "ON" LED **6**.
ON: Suppresses noise when a stereo broadcast with a weak signal is being received.
OFF: Does not carry out the above operation.
- 12 IF BAND (IF Bandwidth Selector Button)**
Selects the bandwidth of the FM and AM (MW) intermediate frequency amplifier from 2 ranges, "WIDE" and "NARROW".
This LED indicator **5** lights up at this time.
- 13 AUTO MUTE/MANU (Tuning Mode Button)**
This switches between auto and manual tuning.
Auto tuning: When the UP key is pressed, the radio is tuned automatically to a higher frequency. Press the DOWN key to tune to a lower frequency. Use this position to eliminate noise when no signals or weak signals are being received.
Manual tuning: In this position, the radio can be tuned manually.
TU-660L: Not available in this model, during reception of LW only.
- 14 MEMORY (Memory Button)**
Used to store the frequency of the station currently received.
Pressing **MEMORY**, **1**, **2**, **ENTER** in order stores the station on channel 12 in memory. Up to 30 channels of either FM or AM can be stored in memory.
- 15 SIGNAL (Signal-Strength Indicators)**
The number of LEDs that light increases in correspondence with the strength of the signal being picked up by the antenna.
- 16 MEMORY (Memory Indicator)**
This indicator lights when the MEMORY button **14** is pressed.
- 17 CHANNEL (Channel Indicator)**
This displays the number of the channel at which the station is stored.
- 18 DIGITAL FREQUENCY INDICATOR**
Reception frequencies are digitally indicated with numbers. The FM frequency unit is MHz; the AM (MW) frequency unit is kHz.

Fig. 5

OPERATION INSTRUCTIONS

PREPARATION

CHECKING CONNECTIONS

- Check all the connections by referring to connection diagram (Fig. 1).
- Check that the right (R) and left (L) channels of the speakers are connected to the corresponding right (R) and left (L) plugs, and check that polarities (positive and negative) are correctly matched.
- Check that the right (R) and left (L) pins are correctly inserted to the corresponding jacks.
- Check that all the cords are firmly connected.
- * Turn on the power with the POWER switch after checking all the connections.

CHECKING ANTENNA

1. Do not incorrectly connect the loop antenna. If you are not sure how to connect the loop antenna, refer to Fig. 1
2. Use of loop antenna: Keep the loop antenna away from the main body. If the antenna contacts a metal body, reception sensitivity is degraded, thus resulting in unclear reproduction.

CAUTION

1. Noise may be generated if a near-by television set is on during AM (MW), FM broadcasting reception. The tuner should be used as far away from a television as possible.
2. Effective period of memory back-up is about a month under normal temperature. If the memorized stations cannot be called back, preset the stations again.

NOTE ON USE

	<ul style="list-style-type: none"> • Avoid high temperatures • Allow for sufficient heat dispersion when installed on a rack. 		<ul style="list-style-type: none"> • Keep the set free from moisture, water, and dust.
	<ul style="list-style-type: none"> • Handle the power cord carefully. • Hold the plug when unplugging the cord. 		<ul style="list-style-type: none"> • Unplug the power cord when not using the set for long periods of time.
	<ul style="list-style-type: none"> • Do not let foreign objects in the set. 		<ul style="list-style-type: none"> • Do not let insecticides, benzene, and thinner come in contact with the set.
			<ul style="list-style-type: none"> • Do not obstruct the ventilation holes. *(for sets equipped with ventilation holes) • NEVER disassemble or modify the set in any way.

TECHNICAL DATA

FM SECTION

Frequency Range:	87.5 MHz~108.0 MHz
Antenna Terminals:	75 ohm Unbalanced
Usable Sensitivity:	0.8 μV (9.3 dBf) (DIN) 1.0 μV (11.2 dBf) (IHF)
S/N50 dB Sensitivity:	Monaural 1.6 μV (15.3 dBf) Stereo 20 μV (37.2 dBf) (μV is at 75 ohm, 0 dBf = 10 ⁻¹⁵ W) [New IHF Standard]
Image Interference Ratio:	80 dB
IF Interference Ratio:	100 dB
AM Suppression Ratio:	60 dB
Effective Selectivity:	NARROW 75 dB (±400 kHz) WIDE 50 dB (±400 kHz)
Capture Ratio:	1.3 dB
Frequency Characteristics:	20 Hz~15 kHz +0.5 dB, -1.5 dB
Signal-to-noise Ratio:	Monaural DIN 84 dB, 88 dB (IHF-A) Stereo DIN 78 dB, 82 dB
Total Harmonic Distortion:	Mono 1 kHz (at 75 kHz dev.) 0.06% Stereo 1 kHz (at 67.5 kHz dev.) 0.1%, 0.8% (DIN)
Stereo Separation 1 kHz:	50 dB

AM SECTION (MW and LW) MEDIUM WAVE

Frequency Range:	522 kHz ~ 1611 kHz (For Europe) 520 kHz ~ 1710 kHz (For U.S.A., Canada)
Antenna Terminals:	Terminal Type with Loop Ant.
Usable Sensitivity:	18 μV
Signal-to-noise Ratio:	53 dB

LONG WAVE

Frequency Range:	153 kHz ~ 281 kHz
Usable Sensitivity:	30 μV
Signal-to-noise Ratio:	50 dB

REMOTE CONTROL UNIT

Remote control system:	Infrared pulse
Power Supply:	DC 3V with two R03 (AAA) batteries
External dimensions:	58 (W) × 125 (H) × 19.5(D) mm
Weight:	80 g (including batteries)

OTHERS

Power Supply:	AC 220V or 240V 50 Hz AC 110/120/220/240V 50/60 Hz (Multiple)
Power Consumption:	12 W
Dimensions:	(W)×(H)×(D) 434 (17-3/32") (W) × 74 (2-29/32") (H) × 287 (11-19/64") mm
Net Weight:	3.1 kg (6 lbs 13 oz)

* Specifications are subject to change without notice.

REMOTE CONTROL UNIT

The accessory RC-126 remote control unit is used to control the tuner from a distance.

● Inserting the dry cell batteries

- 1 Remove the rear cover on the remote control unit.

- 2 Insert two size R03 ("AAA") dry cell batteries as shown in the diagram on the battery supply unit.

- 3 Replace the rear cover.

Notes on Use of the Batteries

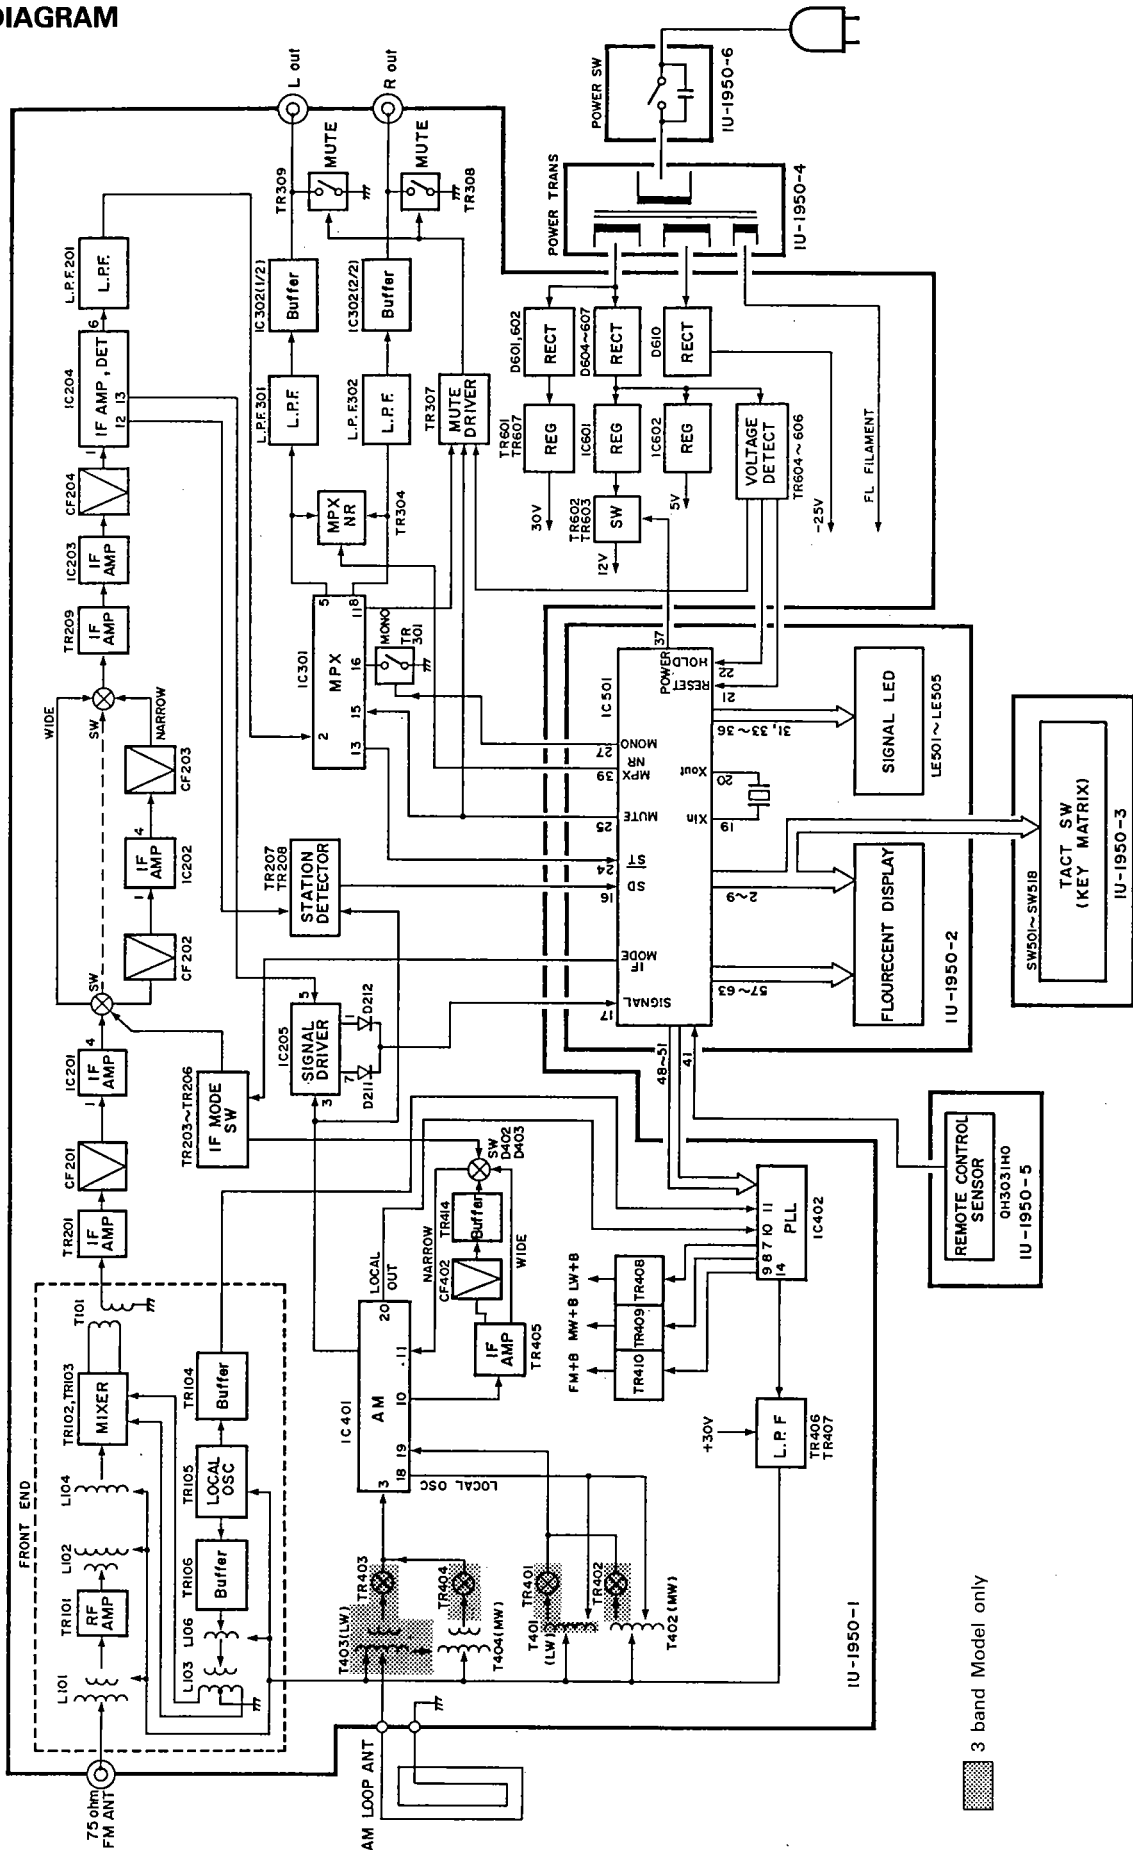

- The remote control unit uses size R03 ("AAA") dry cell batteries.
- The batteries will need to be replaced approximately once a year. This will depend upon how often the remote control unit is used.
- If, in less than a year from the time new batteries were inserted, the remote control fails to operate this unit from a near-by position, it is time to replace the batteries.
- Insert the batteries properly, following the diagram on the remote control battery supply unit, and making sure to align the plus and minus sides of each battery.
- Batteries are prone to damage and leakage. Therefore:
 - Do not combine new batteries with used ones.
 - Do not combine different types of batteries.
 - Do not jumper the opposite poles of the batteries, expose them to heat or break them open, or put them into open fire.
- When the remote control unit is not to be used for a long period of time, remove the batteries from the unit.
- If the batteries have leaked, remove any battery fluid from the inside of the battery supply unit by wiping it out thoroughly, and insert new batteries.

● Using the remote control unit

- Set the POWER switch on the tuner to OFF (■) when not using for long periods of time.
- Point the remote control unit towards the remote control sensor on the tuner when pressing keys.
- The remote control unit can be used at a distance of about 8 meters directly in front of the tuner. The remote control unit uses infrared rays, so it will not work if there are obstacles between it and the tuner. Also, if used at an angle, the distance from which operation is possible will be shortened.
- Do not press keys on the tuner and the remote control unit simultaneously, as this may result in malfunction.
- The remote control unit may not function if intense light is shining on the tuner's remote control sensor.
- Do not operate two remote control units simultaneously, as this may result in malfunction.

BLOCK DIAGRAM

3 band Model only

REMOVAL OF EACH SECTION

1. Removing the Top Cover

- ① Remove the five top cover installation screws (four on the sides, one on the rear).
- ② Slip the top cover slightly to the rear in the direction of the arrow, then lift it off.

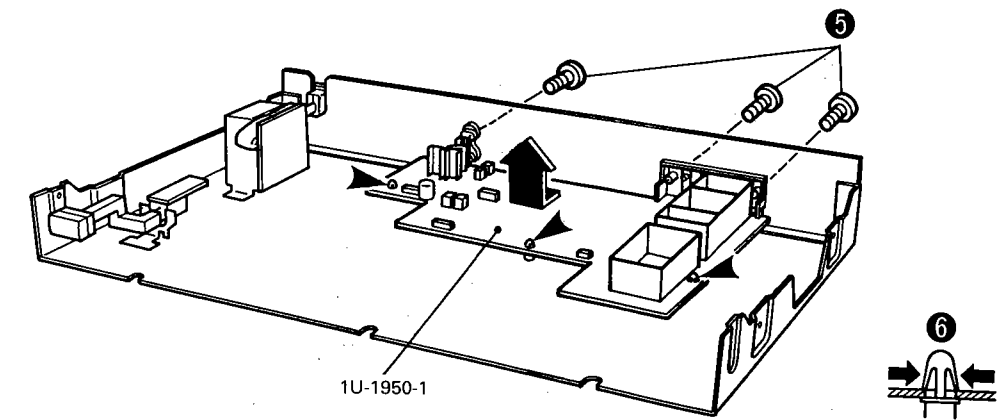

2. Removing the Front Panel Assembly

- ③ Remove the six front panel assembly installation screws (two on the sides, four on the bottom).
- ④ Pull the front panel assembly forward and off in the direction of the arrow.

3. Removing each Circuit Board

- ⑤ Remove the three installation screws securing the terminals of the 1U-1950-1 board.
- ⑥ Use radio pliers to grasp the P.W.B. holder (shown by the arrow) securing the 1U-1950-1 board, then remove the 1U-1950-1 board.
- ⑦ Remove the two installation screws from the 1U-1950-2 board, lift slightly up in the direction of the arrow, then pull forward and remove the 1U-1950-2 board.
- ⑧ Remove the two installation screws from the 1U-1950-3 board.
- ⑨ Unclasp the two installation hooks from the 1U-1950-3 board, lift the 1U-1950-3 board slightly up, then pull forward and remove.
- ⑩ Remove the installation screw from the 1U-1950-5 board, then pull forward and remove the 1U-1950-5 board.

4. Removing the Front Panel

- ⑪ Use a screwdriver to press the four hooks on the front panel (shown by arrows), then pull the front panel forward and remove.

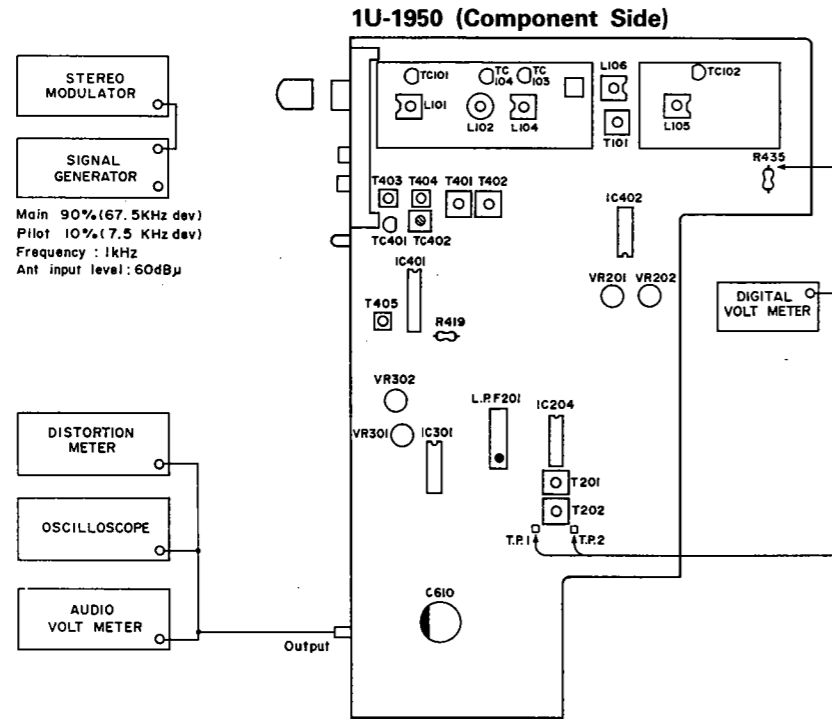

METHOD OF ADJUSTMENT

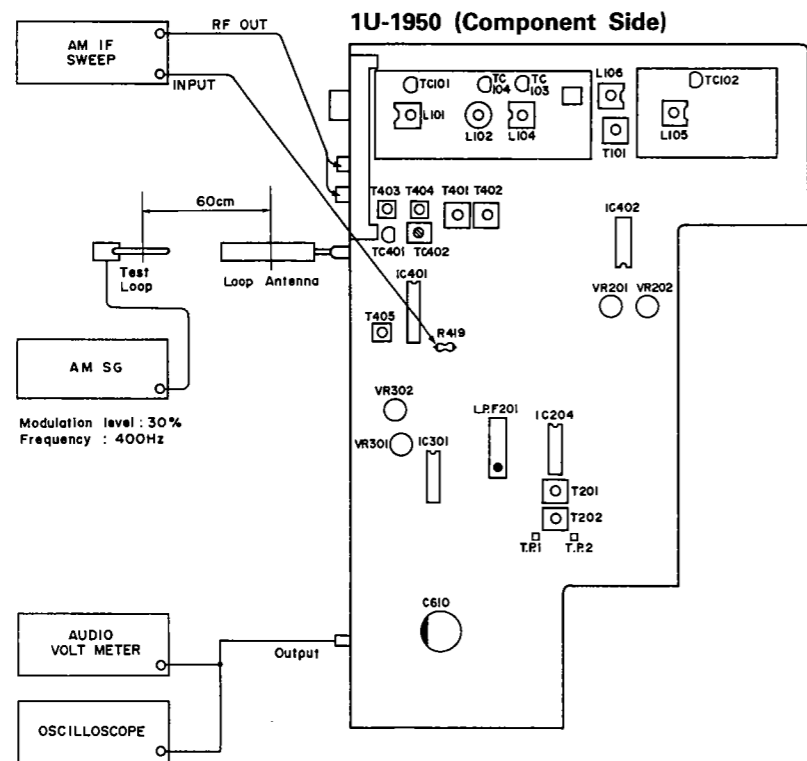

CONNECTION DIAGRAM OF MEASURING INSTRUMENTS

When making adjustments, be sure the power supply is at the rated voltage and the room air is on normal conditions with respect to temperature humidity.

NOTE FOR PARTS LIST

- Part indicated with the mark "⊙" are not always in stock and possibly to take a long period of time for supplying, or in some case supplying of part may be refused.
- When ordering of part, clearly indicate "1" and "1" (i) to avoid mis-supplying.
- Ordering part without stating its part number can not be supplied.
- Part indicated with the mark "★" is not illustrated in the exploded view.
- Please order CD101 through 105 (KV1320-5) in 5-piece sets. It is necessary to make replacements in 5-piece sets.
- Please order CD401 and 403 (SVC321SPA-D-2) in 2-piece sets. It is necessary to make replacements in 2-piece sets.

WARNING: Parts marked with this symbol  have critical characteristics. Use ONLY replacement parts recommended by the manufacturer.

Resistors

Ex.: RN 14K 2E 182 G FR

Type	Shape and performance	Power	Resistance	Allowable error	Others
RD : Carbon	2B : 1/4W	F : ±1%	P : Pulse-resistant type		
RC : Fixed	2E : 1/2W	G : ±2%	NL : Low noise type		
RS : Metallic film	2H : 3/4W	J : ±5%	NB : Non-burning type		
RW : Winding	3A : 1W	K : ±10%	FR : Fuse resistor		
RN : Metal film	3D : 2W	M : ±20%	F : Lead wire forming		
RK : Metal mixture	3F : 3W				
	3H : 5W				

★ Resistance
1 8 2 ⇨ 1800Ω = 1.8kΩ
 Indicates number of zeros after effective number
 2-digit effective number, decimal point indicated by R.
 • Units: Ω

Capacitors

Ex.: CE 04W 1H 2R2 M BP

Type	Shape and performance	Dielectric strength	Capacity	Allowable error	Others
CE : Aluminum foil electrolyte	0J : 6.3V	F : ±1%	HS : High stability type		
CA : Aluminum solid electrolyte	1A : 10V	G : ±2%	BP : Non-polar type		
CS : Tantalum electrolyte	1C : 16V	J : ±5%	HR : Ripple-resistant type		
CQ : Film	1E : 25V	K : ±10%	DL : For charge and discharge		
CK : Ceramic	1V : 35V	M : ±20%	HF : For assuring high frequency		
CC : Ceramic	1H : 50V	Z : +80%	U : UL part		
CP : Oil	2A : 100V	-20%	C : CSA part		
CM : Mica	2B : 125V	P : +100%	W : UL-CSA type		
CF : Metallized	2C : 160V	-0%	F : Lead wire forming		
CH : Metallized	2D : 200V	C : ±0.25pF			
	2E : 250V	D : ±0.5pF			
	2H : 500V	= : Others			
	2J : 630V				

★ Capacity
2 R 2 ⇨ 2.2μF
 1-digit effective number, decimal point indicated by R.
 2-digit effective number, decimal point indicated by R.
 • Units: μF, (for P, pF (μμF))
 • When the dielectric strength is indicated in AC, "AC" is included after the dielectric strength value.

NOTES
 ALL RESISTANCE VALUES IN OHM K=1,000 OHM M=1,000,000 OHM
 ALL CAPACITANCE VALUES IN MICRO FARAD P=MICRO-MICRO FARAD
 EACH VOLTAGE AND CURRENT ARE MEASURED AT NO SIGNAL INPUT CONDITION.
 CIRCUIT AND PARTS ARE SUBJECT TO CHANGE WITHOUT PRIOR NOTICE.

WARNING:
 Parts marked with this sym replacement parts recommen

CAUTION:
 Before returning the unit to the check or (2) a line to chassis res or if the resistance from chass the unit is defective.

WARNING - DO NOT return t corrected.

WARNING:
Parts marked with this symbol \triangle have critical characteristics. Use ONLY replacement parts recommended by the manufacturer.

CAUTION:
Before returning the unit to the customer, make sure you make either (1) a leakage current check or (2) a line to chassis resistance check. If the leakage current exceeds 0.5 milliamps, or if the resistance from chassis to either side of the power cord is less than 240 Kohms, the unit is defective.

WARNING - DO NOT return the unit to the customer until the problem is located and corrected.
