

SERVICE MANUAL

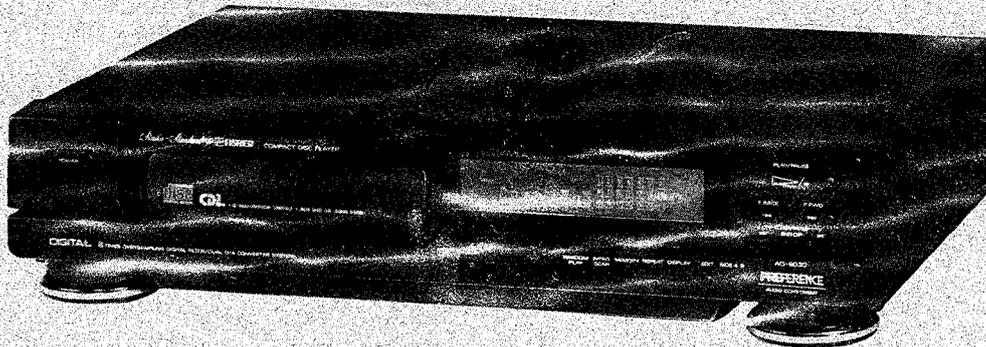

FISHER

COMPACT DISC PLAYER

AD-9030

(EUROPE)

137 350 40

SPECIFICATIONS

System Compact disc digital audio
Remote Control (RAD-752) 25-function, wireless remote control

AUDIO CHARACTERISTICS

Frequency Response 20 Hz - 20 kHz ± 0.5 dB
Harmonic Distortion Less than 0.005% (1 kHz)
(20kHz Low Pass filter)
Dynamic Range More than 92 dB
S/N Ratio More than 100 dB
Wow and Flutter Below measurable limits
Channel Separation More than 95 dB (1 kHz)
Output Voltage (maximum) 2 Vrms

FUNCTIONS

Track/Program Selection With FFWD and FRACK buttons
Index Selection With SCAN/INDEX \blacktriangleright and \blacktriangleleft buttons
Scanning (fast forward/fast back)
Play mode: 2-speed search with sound
Pause mode: 2-speed search without sound
Each/Remain/Total Time Display With DISPLAY button during the PLAY mode

PROGRAM FUNCTIONS

Program Memory 16 selections

Edit Disc Play
Tape Length Selection C-46, C-60, C-90
Display Side AB editing time display
Introscan Play 10 seconds/track
Random Play With the RANDOM PLAY button during the PLAY mode
Repeat Play One track/all tracks/all programmed tracks
Program Reset With STOP button during PROGRAMMED PLAY mode
Pause Each track
Disc Loading Motor-driven horizontal loading

DIGITAL SIGNAL PROCESSING

Optical Pickup 3-beam laser
Sampling Frequency 44.1 kHz
Filters 18-bit, 8 times oversampling digital filter
2-pole active filter

D/A Conversion Two 16-bit, linear, D/A converters

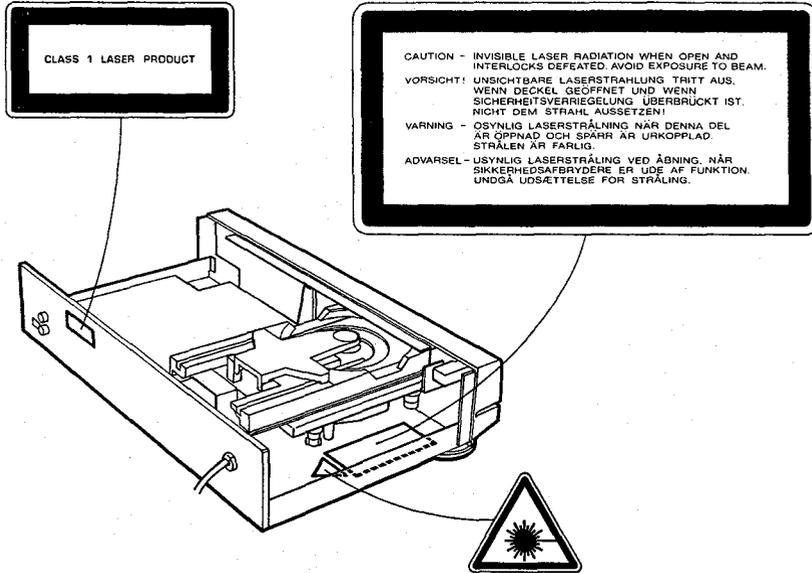

GENERAL

Power Requirements (50 Hz) AC 110/220V
20 Watts
Dimensions (WxHxD) 17.33" x 3.74" x 10.87"
Weight (approximate) 8.1 lbs.

- Specifications and design are subject to change without notice. -

REFERENCE No. WM-570339

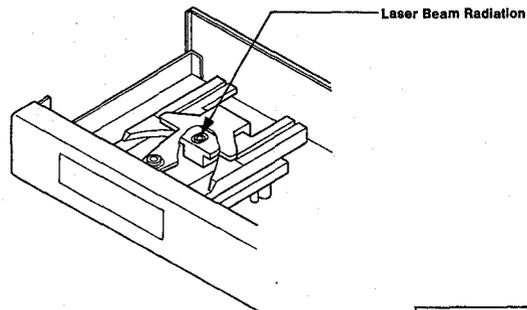

SAFETY CERTIFICATION

CAUTION - USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

THE COMPACT DISC PLAYER SHOULD NOT BE ADJUSTED OR REPAIRED BY ANYONE EXCEPT QUALIFIED SERVICE PERSONNEL.

LASER BEAM RADIATION SPOT

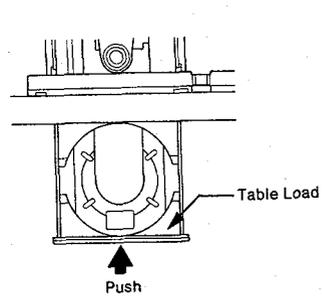

Laser Diode Properties
 Material: Ga-Al-As
 Wavelength: 755 - 815 nm (25°C)
 Laser Output: Continuous Wave max.0.5 mW

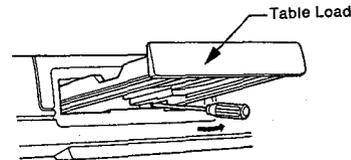

DISASSEMBLY PROCEDURES

REMOVING THE DISC TRAY

1. Apply Power Switch to the set and press the OPEN/CLOSE button to open the table load.
2. Apply OFF the Power Switch while the table load is open, and push the table load back in by hand to close it.

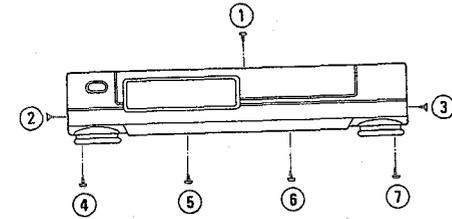

3. Pull out the table load by hand to open it again. The table load will disengage easily and come out smoothly.
4. Now remove the table load from the cabinet while pressing the tab in the direction of the arrow in the diagram below.

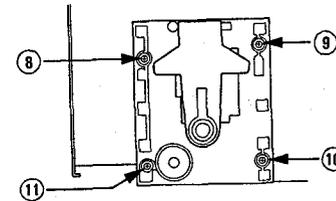

REMOVING THE MECHANISM

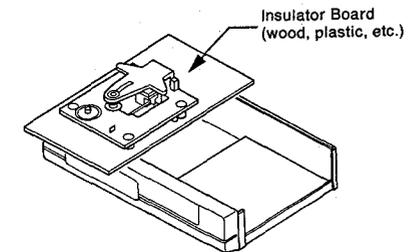

1. Take out the seven screws (1 ~ 7 in the diagram below) with which the Cabinet Front is mounted in place and remove the Cabinet Front.

2. Take out the four screws (8 ~ 11 in the diagram below) with which the mechanism is mounted in place and remove the mechanism.

- The mechanism should be removed with the lead wires still attached, and then placed on a wooden or plastic sheet as shown below to adjust the mechanism.

CD PLAYER ADJUSTMENT PROCEDURES

BEFORE CHECKING OR ADJUSTING CD PLAYER

- Procedures for all adjustments for the CD player from start to finish are described below.
- If no problems are found after each item is checked when the pick-up is replaced, there is no need to adjust all items again.

SETTING OF INITIAL POSITION OF VOLUME

- Set the variable resistors to the initial positions listed below:

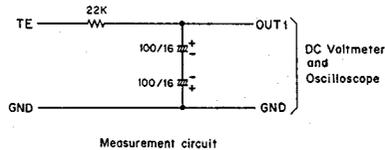

P101 (FOCUS GAIN)	Mechanical Center
P102 (TRACKING GAIN)	Mechanical Center
P103 (E/F BALANCE)	Mechanical Center
P104 (KICK GAIN)	Mechanical Center
P105 (TRACKING OFFSET)	Mechanical Center

FREE RUN FREQUENCY ADJUSTMENT

- Connect the frequency counter to VCO test terminal (CN11-3) PCK test pin and to GND. (Use a 10:1 probe.)
- Short the test terminal (CN12-4) HF test pin to GND. (Use 0.1µF Capacitor.)
- Push the POWER button to switch the power on and push the STOP button.
- Adjust the PLL coil T101 using a plastic screwdriver until the frequency counter indicator reads 4.3218MHz \pm 5kHz.

E/F BALANCE ADJUSTMENT

- Place the test disc (Modern Wave II) on the Disc Tray, and play the fourth item on the disc. Short the test terminal (CN11-1) TEST pin to GND, and test terminal (CN12-7) TROFF pin to GND to turn tracking servo OFF.
- Connect a DC Voltmeter and an oscilloscope via the low-pass filter like that shown in the illustration below to the test terminal (CN12-6) TE (tracking error) pin.

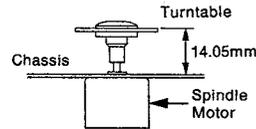

- Adjust P103 so that the DC Voltmeter reading is $0V \pm 50mV$ (oscilloscope waveform is symmetric to + and - about the zero level).

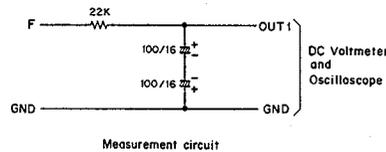

ADJUSTMENT OF TURNTABLE HEIGHT

This adjustment must be performed when the Spindle Motor is replaced.

- The turntable should be mounted so that its upper surface is $14.05mm \pm 0.1mm$ above the surface of the chassis.

- Place the test disc (Modern Wave II) on the turntable.
- Connect a DC Voltmeter and an oscilloscope via the low-pass filter shown below to test terminal (CN13-5) F (focus coil) pin.

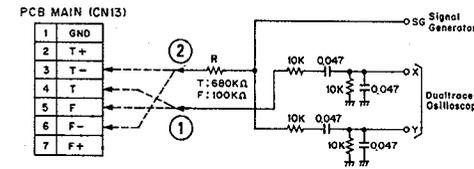

- Push the POWER button to switch the power on and PLAY the First and Last Track No. on the disc.
- If the DC Voltmeter reading is not in the ranges $0V \pm 0.2V$ for inner tracks and $0V \pm 0.35V$ for outer tracks, then the turntable height must be readjusted. Raise the turntable higher if the DC Voltmeter indicator is on the plus (+) side, and lower it if it is on the minus (-) side. (With this circuit 1V represents movement of approximately 0.55mm ~ 0.65mm.)

CD PLAYER ADJUSTMENT PROCEDURES (Continued)

ADJUSTMENT OF FOCUS/TRACKING GAIN

The measurement circuit diagrammed below must be used in order to adjust focus gain and tracking gain correctly.

FOCUS GAIN ADJUSTMENT

- Apply P101 to the position of Mechanical center position, and place the test disc (Modern Wave II) on the Disc Tray.
- Connect the measurement circuit described in the last section to the test terminal (CN13-5) F (focus coil) pin and (CN13-6) F- (minus) pin. (Use 100kΩ Resistor.)
- Push the POWER button to switch the power on and PLAY the first item on the test disc. Now apply a signal of 850Hz and 0.8Vp-p from the signal generator to the measurement circuit.
- Set the oscilloscope to X-Y operation, and while observing the lissajous waveform adjust P101 to the point where the phase difference is 90° as shown in Fig. 1 below.

Fig. 1

TRACKING GAIN ADJUSTMENT

- Apply P102 to the position of Mechanical center position, and place the test disc (Modern Wave II) on the Disc Tray.
- Connect the measurement circuit described in the last section to the test terminal (CN13-4) T (tracking coil) pin and (CN13-3) T- (minus) pin (Use 680kΩ Resistor.)
- Push the POWER button to switch the power on and PLAY the first item on the test disc. Now apply a signal of 850Hz and 0.8Vp-p from the signal generator to the measurement circuit.
- Set the oscilloscope to X-Y operation, and while observing the lissajous waveform adjust P102 to the point where the phase difference is 90° as shown in Fig. 1 above.

NOTE:
If these two adjustments are performed, the TRACKING OFFSET must also be adjusted.

TRACKING OFFSET ADJUSTMENT

- Push the POWER button to switch the power on and push the STOP button.
- Connect a DC Voltmeter to the test terminal (CN13-4) TC (tracking coil) pin and short the test terminal (CN12-2) TOF pin to GND.
- In this condition check that the DC Voltmeter indicator is in the range $150mV \pm 20mV$, and adjust P105 if it is not.

NOTE:
Perform this adjustment once again after adjusting the E/F BALANCE and TRACKING GAIN signals.

KICK GAIN ADJUSTMENT

- Place the test disc (Modern Wave II) on the Disc Tray.
- Set the oscilloscope to NORMAL TRIG., set the EXT. TRIG. pin to external trigger, and input the trigger from test terminal (CN11-4) THLD pin to the oscilloscope.
- Next connect test terminal (CN12-4) HF pin to Channel 1 of the oscilloscope, and connect test terminal (CN12-6) TE pin to Channel 2.
- Push the POWER button to switch the power on and PLAY the first item on the test disc, and the push the PAUSE button. Now observe the waveforms for HF and TE with triggers applied from test terminal (CN11-4) THLD pin. At this point, adjust P104 so that a kick pulse waveform of about 1 to 1.3 tracks as shown in Fig. 2 below is obtained.

 1. Parts order must contain Model Number, Part Number and Description.
 2. Ordering quantity of screws and resistors must be multiple of 10 pcs.

PRODUCT SAFETY NOTICE
 Each precaution in this manual should be followed during servicing. Components identified with the IEC symbol Δ in the parts list and the schematic diagram designate components in which safety can be of special significance. When replacing a component identified with Δ , use only the replacement parts designated, or parts with the same ratings of resistance, wattage or voltage that are designated in the parts list in this manual. Leakage-current or resistance measurements must be made to determine that exposed parts are acceptably insulated from the supply circuit before returning the product to the customer.
