

The Harman Kardon Model AVR70/AVR70MK II AUDIO AND VIDEO RECEIVER

Manual A

Technical Manual

The following marks found in the parts list of this manual identify the models as follows.

- BK** AVR70 :North America area model Black version
(with Tact type mains switch)
- IB** AVR70 :International model Black version
(with Tact type mains switch)
- BK** AVR70MK II :North America area model Black version
(with Manual Operated Mechanical type mains switch)
- IB** AVR70[MOMS] :International model Black version
(with Manual Operated Mechanical type mains switch)

SPECIFICATIONS

FRONT AMP SECTION

	Nominal	Limit
Continuous Power Output (STEREO MODE), Input: CD		
THD : 0.09% 20 Hz-20 kHz	≥80 W	≥70 W
Both Channel Driven (1 kHz) (SURROUND MODE)	≥30 W	≥25 W
THD: 0.3%, 8 ohms, 1 kHz		
THD at 70 W, 8 ohms, Input: CD		
20 Hz	≤0.03%	≤0.09%
1 kHz	≤0.01%	≤0.09%
20 kHz	≤0.05%	≤0.09%
IM Distortion at 70 W, 8 ohms, Vol: Max.	≤0.03%	≤0.09%
Input Sensitivity for Rated Power Output (70W) (STEREO MODE, 1 kHz 8 ohms, Volume : Max)		
CD	275 mV	235-315 mV
TAPE1/2, TV/LD VCR1/2, AUX	220 mV	180-260 mV
S/N Ratio Input Shorted at 1kHz 1W Output (WTD IHF-A)		
CD 0.5 V Input	≥82 dB	≥78 dB
Tone Control		
Bass: 100 Hz	+10 dB	+10 ±2.5 dB
	-10 dB	-10 ±2.5 dB
Treble: 10kHz	+10 dB	+10 ±2.5 dB
	-10 dB	-10 ±2.5 dB
Frequency Response at -3dB		
Mode: Stereo, Ref: 1 kHz	10 Hz-70 kHz	15 Hz-50kHz
Channel Crosstalk Input Shorted by 1 kohms		
100Hz	≥55 dB	≥50 dB
1 kHz	≥45 dB	≥40 dB
10 kHz	≥35 dB	≥30 dB

CENTER AMP SECTION

	Nominal	Limit
RMS Output Power		
THD (0.3%, 8 ohms, 1 kHz)		
Only Center Channel Driven	≥80 W	≥70 W
S/N Ratio (Input Level : 245 mV)		
Input Shorted, IHF-A WTD	≥70 dB	≥65 dB
Frequency Response at-3 dB		
8 ohms, Dolby Pro-Logic	15 Hz - 22 kHz	30 Hz - 20 kHz

REAR AMP SECTION

	Nominal	Limit
RMS Output Power		
THD (0.7%, 8 ohms, 1 kHz)		
Only Rear Channel Driven	≥35 W	≥25 W
S/N Ratio (Input Shorted, IHF-A WTD)		
Delay : 20 ms, Input Level : 245 mV	≥70 dB	≥65 dB
Frequency Response at-3 dB		
8 ohms, Dolby Pro-Logic	15 Hz - 7 kHz	30 Hz - 6.5 kHz

SUB WOOFER SECTION

Line level at Pre out	Approx. 150 mVrms
Surround mode : Dolby Pro-Logic	
Center speaker mode : Large	
Input signal : L ch (only) 200mV	
Master volume : 0 dB	
Low pass crossover frequency	80 Hz cut off
Slope (Low Pass filter)	24 dB / octave

VIDEO AMP SECTION

	Nominal	Limit
Input Sensitivity/Impedance		
LD, TV, VCR1, VCR2, AUX	1 VP-P/75 Ω	±1 dB
Output Level/Impedance		
VCR1, VCR2, Monitor	1 VP-P/75 Ω	±1 dB
Frequency Response at-3 dB	DC-8 MHz	DC-6MHz

FM SECTION

	Nominal	Limit
Tuning Cover Range 75 kHz Step	87.50 - 108.00 MHz	
Mono Usable Sensitivity (75 ohms Input, 98 MHz)	≤13.5 dbf	≤19.2 dbf
Image Rejection (at 98 MHz)		
USA/Canada	>50 dB	≥40 dB
Europe	≥70 dB	≥60 dB
IF Rejection (at 98 MHz)	≥70 dB	≥65 dB
50 dB Quieting Sensitivity (at 98 Mhz, 100% MOD.)		
IHF Band Pass Filter		
Stereo	≤39.2 dbf	≤43.3 dbf
Distortion (1 kHz, 100% MOD. at 98 MHz, 65dbf Input)		
IHF Band Pass Filter		
Mono	≤0.2%	≤0.5%
S/N Ratio (500 μV Input, 100% MOD. at 98 MHz)		
IHF Band Pass Filter		
Stereo	≥68 dB	≥63 dB
Frequency Response (30 Hz - 15 kHz)		
USA/Canada De-Emphasis: 75μS	+0.5 dB	+1.0 dB
Europe De-Emphasis: 50μS	-2.0 dB	-4.0 dB
AM Suppression at 98 MHz		
	≥55 dB	≥45 dB
Muting Threshold (at 98 MHz)	27.2 dbf	23.3-32.0dbf
Overload Break-up at 98 MHz	71 dbf	65 dbf
Capture Ratio at 65 dbf	≤1.5 dB	≤2.5 dB
Stereo Separation (at 98 MHz, 100% MOD., 500 μV Input)		
IHF Band Pass Filter		
1 kHz	≥40 dB	≥30 dB
Tape out Level (at 98 MHz)	800 mV	600-1300 mV

AM SECTION

	Nominal	Limit
Tuning Cover Range (MW)		
USA/Canada : 10 kHz Step	520 - 1710 kHz	
Other : 9 kHz Step	531 - 1602 kHz	
Tuning Cover Range (LW)		
1 kHz Step	152 kHz - 282 kHz	
Usable Sensitivity		
MW at 999/1000 kHz	≤500 μV/m	≤800 μV/m
LW at 207 kHz	≤1500 μV/m	≤2000 μV/m
Image Rejection (at 999 kHz)	≥40 dB	≥35 dB
IF Rejection (at 999/1000 kHz)	≥60 dB	≥50 dB
Spurious Rejection (at 999/1000 kHz)		
	≥65 dB	≥55 dB
AGC Figure of Merit (From 100 mV/m at 999/1000 kHz)		
	≥55 dB	≥48 dB
Distortion (999/1000 Hz, 30% MOD. 50 mV/m Input)		
	≤1.0%	≤2.0%
Frequency Response (999/1000 kHz)		
at -3 dB	100 Hz - 2.2 kHz	150 Hz - 1.8 kHz
Selectivity (at 999/1000 Hz)		
9 kHz/10 kHz	≥30 dB	≥20 dB
18 kHz/20kHz	≥70 dB	≥60 dB
S/N Ratio (999/1000 kHz, With Antenna Input 50 mV/m)		
(Europe : Using 15 kHz L.P.F.)	≥50 dB	≥45 dB
Overload Break-up at 999/1000 kHz (THD 10%)		
	≥1000 mV/m	≥500 mV/m
TAPE Output Level at 999/1000 kHz (5 mV/m Input)	240 mV	150-340 mV

GENERAL

	Nominal	Limit
Power Consumption		
At Rated Power 2 Channel Driven	300 W	250 - 350 W
Idling at Minimum Volume Control	45 W	35 - 65 W
Power Supplies:		
USA/Canada	AC 120 V, 60 Hz	
Europe	AC 230 V, 50 Hz	
Dimensions (W x H x D) :		
inches	17 1/16 x 6 3/32 x 18 1/16	
mm	444 x 160 x 459	
Weight (lbs/kgs)	27.8/12.5	

These specifications are service target specs. Specifications and components are subject to change without notice. Overall performance will be maintained or improved.

ELECTROSTATICALLY SENSITIVE (ES) DEVICES

Some semiconductor (solid state) devices can be damaged easily by static electricity. Such components commonly are called Electrostatically Sensitive (ES) Devices. Examples of typical ES devices are integrated circuits and some field effect transistors and semiconductor "chip" components. The following techniques should be used to help reduce the incidence of component damage caused by static electricity.

1. Immediately before handling any semiconductor component or semiconductor-equipped assembly, drain off any electrostatic charge on your body by touching a known earth ground. Alternatively, obtain and wear a commercially available discharging wrist strap device, which should be removed for potential shock reasons prior to applying power to the unit under test.
2. After removing an electrical assembly equipped with ES devices, place the assembly on a conductive surface such as aluminum foil, to prevent electrostatic charge buildup or exposure of the assembly.
3. Use only a grounded-tip soldering iron to solder or unsolder ES devices.
4. Use only an anti-static solder removal device. Some solder removal devices not classified as "anti-static" can generate electrical charges sufficient to damage ES devices.
5. Do not use freon-propelled chemicals. These can generate electrical change sufficient to damage ES devices.
6. Do not remove a replacement ES device from its protective package until immediately before you are ready to install it. (Most replacement ES devices are packaged with leads electrically shorted together by conductive foam, aluminum foil or comparable conductive material.)
7. Immediately before removing the protective material from the leads of a replacement ES device, touch the protective material to the chassis or circuit assembly into which the device will be installed.
CAUTION: Be sure no power is applied to the chassis or circuit, and observe all other safety precautions.
8. Minimize bodily motions when handling unpackaged replacement ES devices. (Otherwise harmless motion such as the brushing together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity sufficient to damage an ES device.)

PRODUCT SAFETY NOTICE

Each precaution in this manual should be followed during servicing. Components identified with the IEC symbol **▲** in the parts list are of special significance to safety. When replacing a component identified with **▲**, use only the replacement parts designated, or parts with the same ratings or resistance, wattage, or voltage that are designated in the parts list in this manual. Leakage - current or resistance measurements must be made to determine that exposed parts are acceptably insulated from the supply circuit before returning the product to the customer.

LEAKAGE TEST (FOR SERVICE ENGINEERS IN THE U.S.A.)

Before returning the unit to the user, perform the following safety checks:

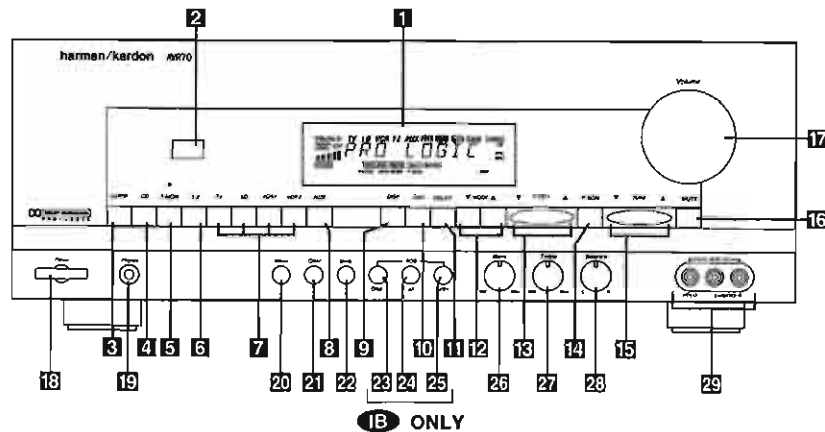

1. Inspect all lead dress to make certain that leads are not pinched or that hardware is not lodged between the chassis and other metal parts in the unit.
2. Be sure that any protective devices such as nonmetallic control knobs, insulating fishpapers, cabinet backs, adjustment and compartment covers or shields, isolation resistor-capacity networks, mechanical insulators, etc. Which were removed for servicing are properly reinstalled.
3. Be sure that no shock hazard exists; check for leakage current using Simpson Model 229 Leakage Tester, standard equipment item No. 21641, RCA Model WT540A or use alternate method as follows: Plug the power cord directly into a 120-volt AC receptacle (do not use an Isolation Transformer for this test). Using two clip leads, connect a 1500 Ohm, 10-watt resistor paralleled by a 0.15 μ F capacitor, in series with all exposed metal cabinet parts and a known earth ground, such as a water pipe or conduit. Use a VTVM or VOM with 1000 Ohms per volt, or higher sensitivity to measure the AC voltage drop across the resistor. (See Diagram.) Move the resistor connection to each exposed metal part having a return path to the chassis (antenna, metal, cabinet, escutcheon, etc.) and measure the AC voltage drop across the resistor. (This test should be performed with the power switch in both the On and Off positions.)

A reading of 0.35 volt RMS or more is excessive and indicates a potential shock hazard which must be corrected before returning the unit to the owner.

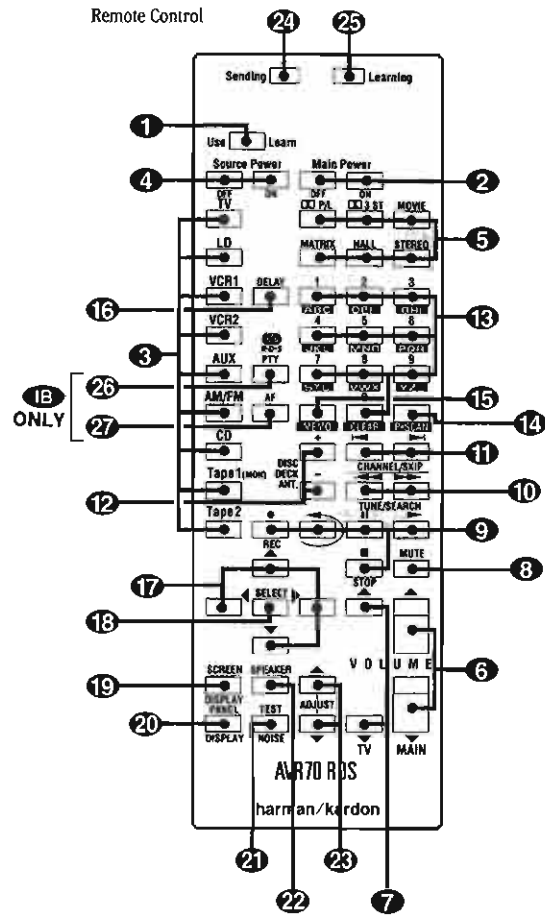

CONTROL AND FUNCTIONS

Front Panel

- 1 Information Display:** This display delivers messages and status indications to help you operate the receiver. Refer to the separate diagram for a complete explanation of the FL display.
- 2 Remote Sensor Window:** The sensor behind this window receives infrared signals from the remote control. Aim the remote at this area and do not block or cover it unless an external remote sensor is installed.
- 3 AM/FM Tuner Mode Selection:** Press this button once to select the tuner. Press it again to switch between FM, MW and LW.
- 4 CD:** Press this button to select the CD player.
- 5 Tape1/Monitor:** Press this button to select Tape One as the input source. A red LED above the button will illuminate to indicate that the Tape Monitor has been selected.
- 6 Tape 2:** Press this button to select Tape 2.
- 7 Video Sources:** Press any of these buttons to select a video input source.
- 8 Aux:** Press this button to select the source connected to the front panel Aux jacks.
- 9 Display:** Press this button to turn off the front panel FL display. The DISP indicator will illuminate to remind you that the unit is still turned on.
- 10 OSD (On Screen Display):** Press the button briefly to display a system status report on your video screen. Press and hold to change the video standard.
- 11 Delay:** Press this button to increase the delay to the rear (surround) channels.
- 12 Mode:** Press these buttons to scroll up ▲ or down ▼ through the list of available surround modes.
- 13 P-Set:** Press these buttons to manually scroll up ▲ or down ▼ through the FM, LW or AM stations programmed into the receiver's preset memory.
- 14 P-Scan:** Press this button to automatically scan through the FM or AM stations preset into the receiver's memory. Press the button again to stop the scan when the tuner is at the desired station.
- 15 Tune:** Press these buttons to manually scan up ▲ or down ▼ through the FM or AM bands.
- 16 Mute:** Press this button to cut the output to the speakers. Press it again to return to the previous volume level.
- 17 Volume Control:** Turn the knob clockwise to increase volume, counterclockwise to decrease the volume. Note that approximately two revolutions of the knob are required to go from no output to maximum volume.
- 18 Power:** Press this button once to turn the unit on or off. In order to use the remote control to turn the unit on the power switch must be pressed once, and then the unit must be turned off via the remote. The LED indicator light surrounding the power switch will glow amber when the unit is in the Standby mode and green when the unit is on.
- 19 Headphone Jack:** Plug standard stereo headphones into this jack for private listening.
NOTE: When the headphones are in use the output to the speakers is muted and the surround mode is automatically switched to STEREO. When the headphones are removed from the jack, sound to the speakers is restored and the unit returns to the previous sound mode.
- 20 Memo:** The memo button is used to enter stations to the tuner's preset memory in either the manual or automatic modes. It is also used in clearing the memory and entering the sleep timer period.
- 21 Clear:** The clear button is used to cancel tuning, memory input or when clearing the unit's memories.
- 22 FM Mode:** Press this button to select the tuning mode for FM stations.
- 23 RDS Display:** When a station transmitting RDS data is tuned, press this button to view the tuning frequency.
- 24 RDS AF:** The button is used to search for stations transmitting a specific programme type that offers better reception than the currently tuned station.
- 25 RDS PTY:** Press this button to view the programme type (PTY) when an RDS station is tuned. It is also used to initiate a search for RDS stations transmitting a specific programme type.
- 26 Bass:** This knob adjusts the tone of low frequency sounds. Turn it to the right to boost bass frequencies or to the left to cut bass frequencies.
- 27 Treble:** This knob adjusts the tone of high frequency sounds. Turn it to the right to boost high frequencies or to the left to cut high frequencies.
- 28 Balance:** This knob adjusts the balance between the front left and right speakers.
- 29 Front Panel Inputs:** Audio or Video sources connected to these jacks may be selected by pressing the Aux button 8.

- 1 Use/Learn:** This switch selects the operation mode of the remote control. Slide it to the left for normal operation. Slide it to the right when the remote is being programmed.
- 2 Main Power:** Press these buttons to turn the unit on or off.
- 3 Source Selection:** Pressing one of these buttons selects the input source that will be listened to through the receiver. When a source is selected the remote's transport and numeric number buttons will also transmit the commands needed to control that machine.
- 4 Source Power:** Press these buttons to control power for the last source device selected.
- 5 Surround Mode Selection:** Press one of these buttons to select a surround mode for the current listening session.
- 6 Main Volume:** These buttons control the unit's volume. Note that all channels are controlled simultaneously.
- 7 TV Volume:** These buttons adjust the volume for TV using the remote control codes programmed into the remote for a TV set or cable box. These buttons control the TV set only, regardless of which source is selected. This enables you to control the audio level of a TV set even when the receiver is not in use.
- 8 Mute:** Press this button to temporarily cut the audio output of the receiver. Press it again to return to the previous volume level.
- 9 Transport Controls:** These buttons control the tape or disc motion of the last playback source selected with the Source Selection buttons 4. Use them as you would the Play, Stop, Pause, Reverse Play and Record buttons on any VCR, CD or LD remote control.
- 10 Tune/Search & Fast Forward:** (These buttons have multiple functions, which vary according to the input device selected.)
a. When the TUNER has been selected, these buttons are used to manually tune stations.
- 11 Channel/Skip:** (These buttons have multiple functions, which vary according to the input device selected.)
a. When the TUNER has been selected, these buttons will scroll up ▲ or down ▼ through the stations that have been programmed in the preset memory.
b. When TV or VCR is selected, they are the channel up ▲ or channel down ▼ tuning buttons.
c. When CD or LD is selected these buttons act as forward and reverse "Skip" buttons to move to the next track or chapter on the disc.
- 12 Disc/Deck/Ant:** (These buttons have multiple functions, which vary according to the input device selected.)
a. When CD is selected and the unit is a CD changer, these buttons will change to the next disc + or previous disc -.
b. When Tape 1 or Tape 2 is the input source, and the tape machine is a compatible Harman Kardon dual cassette deck, these buttons will switch between the "A" and "B" sides.
c. When VCR 1 or VCR 2 is the input source, these buttons switch between VCR and TV as the unit's output.
d. When TV is the input source, these buttons may switch between video input sources or antenna/video, depending on the TV model.
- 13 Number Keys:** These buttons serve as a ten button numeric keypad to enter tuner preset positions. They are also to be used to select channel numbers when TV has been selected on the remote, or to select track numbers on a CD or LD player, depending on how the remote has been programmed. The letters below the buttons are used to enter information for tuner station names.
- 14 RDS PTY:** Press this button to view the Programme Type information for stations transmitting RDS data. This button is also used for PTY Auto Search functions.
- 15 RDS AF:** This button initiates a search of all RDS stations to find a stronger signal for the programme type currently selected.
- 16 Delay:** This button controls the amount of sound delay to the rear (surround) channels. Press it to increase the delay in the steps shown in the main Information Display or on-screen graphics.
- 17 Menu Controls:** These buttons control the action of the cursor or the selection of menu items when the receiver is being configured using the setup menus.
- 18 Select:** This button enters settings to the receiver's memory during system configuration.
- 19 Screen Display:** Press this button to activate the on screen menu system.
- 20 Panel Display:** Press this button to turn off all displays and indicators in the Information Display except for a small DSP indication in the lower right corner of the display 12. Press the button again to turn the display back on. Note that the display will briefly illuminate when a command is sent to the unit from the front panel or remote, even though the display is turned off.
- 21 Test Noise:** Press this button to begin calibration of the output level for each channel. A test signal will immediately be heard from the left front speaker and the TEST indicator 2 will flash.
- 22 Speaker Select:** When setting the system output levels, this button selects the speaker position being adjusted. Press it once to advance to the next speaker after each position is adjusted.
- 23 Level Adjust:** When setting the system output levels, press these buttons to increase or decrease the output level.
- 24 Sending LED:** This indicator should flash any time a button is pressed to confirm that a command is being sent to the receiver or another unit. If the light is dim or does not illuminate when a button is pressed the batteries in the remote should be replaced.
- 25 Learn LED:** This indicator will illuminate when a button on the remote is being programmed with signals from another remote during the "learning" mode. The light will go out when the signal is received and memorized.

- b. When CD, LD or VCR is the input source, these buttons act as the Fast Scan Forward ►►► or Fast Scan Reverse ◀◀◀ controls.
- a. When the TUNER has been selected, these buttons will scroll up ▲ or down ▼ through the stations that have been programmed in the preset memory.
- b. When TV or VCR is selected, they are the channel up ▲ or channel down ▼ tuning buttons.
- c. When CD or LD is selected these buttons act as forward and reverse "Skip" buttons to move to the next track or chapter on the disc.
- d. When a compatible Harman Kardon cassette player has been selected as Tape 1 or Tape 2, these buttons move the tape forward ►►► or backwards ◀◀◀ to the next selection using the Music Scan feature.
- a. When CD is selected and the unit is a CD changer, these buttons will change to the next disc + or previous disc -.
- b. When Tape 1 or Tape 2 is the input source, and the tape machine is a compatible Harman Kardon dual cassette deck, these buttons will switch between the "A" and "B" sides.
- c. When VCR 1 or VCR 2 is the input source, these buttons switch between VCR and TV as the unit's output.
- d. When TV is the input source, these buttons may switch between video input sources or antenna/video, depending on the TV model.
- a. When the TUNER has been selected, these buttons are used to manually tune stations.
- NOTE: The 0 button has a dual function. It also serves as the CLEAR button for use in programming the tuner or clearing the system memory.
- a. When the TUNER has been selected, these buttons are used to manually tune stations.

CONTROL AND FUNCTIONS

Front Panel

1 Information Display: This display delivers messages and status indications to help you operate the receiver. Refer to the separate diagram for a complete explanation of the FL display.

2 Remote Sensor Window: The sensor behind this window receives infrared signals from the remote control. Aim the remote at this area and do not block or cover it unless an external remote sensor is installed.

3 AM/FM Tuner Mode Selection: Press this button once to select the tuner. Press it again to switch between FM, MW and LW.

4 CD: Press this button to select the CD player.

5 Tape1/Monitor: Press this button to select Tape One as the input source. A red LED above the button will illuminate to indicate that the Tape Monitor has been selected.

6 Tape 2: Press this button to select Tape 2.

7 Video Sources: Press any of these buttons to select a video input source.

8 Aux: Press this button to select the source connected to the front panel Aux jacks.

9 Display: Press this button to turn off the front panel FL display. The DISP indicator will illuminate to remind you that the unit is still turned on.

10 OSD (On Screen Display): Press the button briefly to display a system status report on your video screen. Press and hold to change the video standard.

11 Delay: Press this button to increase the delay to the rear (surround) channels.

12 Mode: Press these buttons to scroll up ▲ or down ▼ through the list of available surround modes.

13 P-Set: Press these buttons to manually scroll up ▲ or down ▼ through the FM, LW or AM stations programmed into the receiver's preset memory.

14 P-Scan: Press this button to automatically scan through the FM or AM stations preset into the receiver's memory. Press the button again to stop the scan when the tuner is at the desired station.

15 Tune: Press these buttons to manually scan up ▲ or down ▼ through the FM or AM bands.

16 Mute: Press this button to cut the output to the speakers. Press it again to return to the previous volume level.

17 Volume Control: Turn the knob clockwise to increase volume, counterclockwise to decrease the volume. Note that approximately two revolutions of the knob are required to go from no output to maximum volume.

18 Power: press this button once to turn the unit on or off. In order to use the remote control to turn the unit on, the power switch must be pressed once, and then the unit must be turned off via the remote. The LED indicator light surrounding the power switch will glow amber when the unit is in the Standby mode and green when the unit is on.

19 Headphone Jack: Plug standard stereo headphones into this jack for private listening.

NOTE: When the headphones are in use the output to the speakers is muted and the surround mode is automatically switched to STEREO. When the headphones are removed from the jack, sound to the speakers is restored and the unit returns to the previous sound mode.

20 Memo: The memo button is used to enter stations to the tuner's preset memory in either the manual or automatic modes. It is also used in clearing the memory and entering the sleep timer period.

21 Clear: The clear button is used to cancel tuning, memory input or when clearing the unit's memories.

22 FM Mode: Press this button to select the tuning mode for FM stations.

23 RDS Display: When a station transmitting RDS data is tuned, press this button to view the tuning frequency.

24 RDS AF: The button is used to search for stations transmitting a specific programme type that offers better reception than the currently tuned station.

25 RDS PTY: Press this button to view the programme type (PTY) when an RDS station is tuned. It is also used to initiate a search for RDS stations transmitting a specific programme type.

26 Bass: This knob adjusts the tone of low frequency sounds. Turn it to the right to boost bass frequencies or to the left to cut bass frequencies.

27 Treble: This knob adjusts the tone of high frequency sounds. Turn it to the right to boost high frequencies or to the left to cut high frequencies.

28 Balance: This knob adjusts the balance between the front left and right speakers.

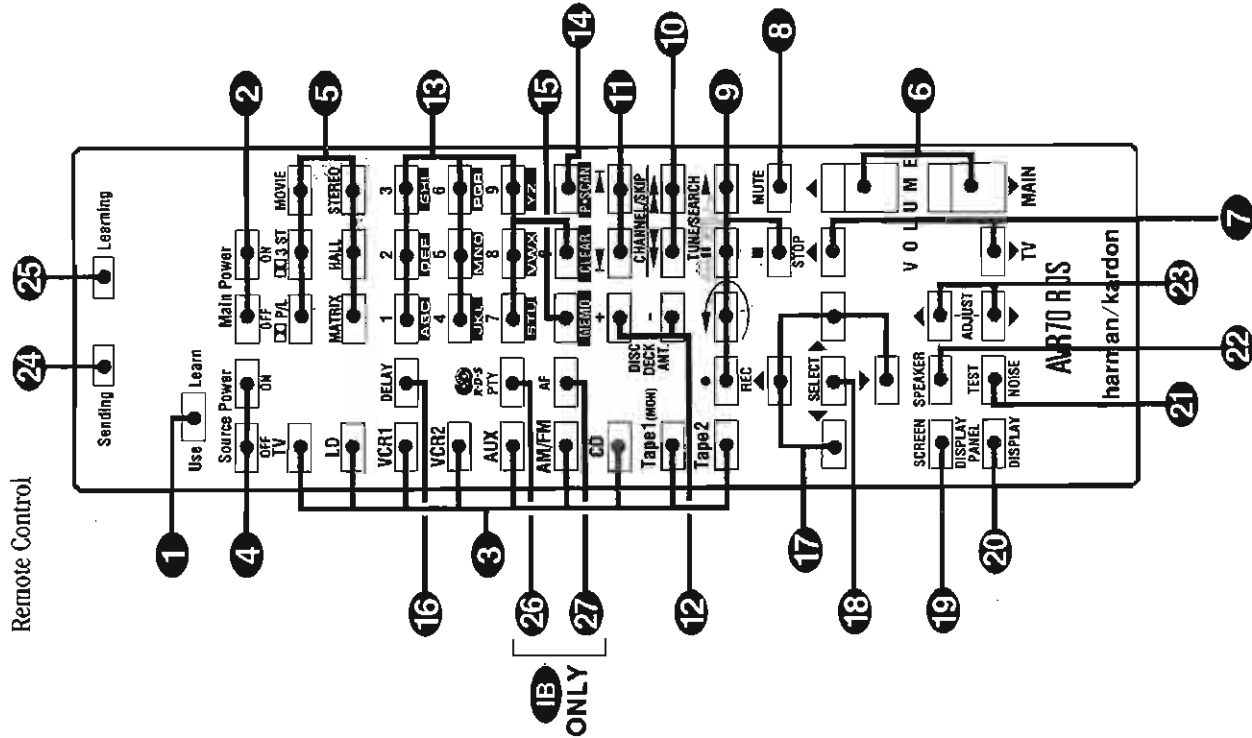

29 Front Panel Inputs: Audio or Video sources connected to these jacks may be selected by pressing the Aux button **8**.

Remote Control

- 1 Use/Learn:** This switch selects the operation mode of the remote control. Slide it to the left for normal operation. Slide it to the right when the remote is being programmed.
- 2 Main Power:** Press these buttons to turn the unit on or off.
- 3 Source Selection:** Pressing one of these buttons selects the input source that will be listened to through the receiver. When a source is selected the remote's transport and numeric number buttons will also transmit the commands needed to control that machine.
- 4 Source Power:** Press these buttons to control power for the last source device selected.
- 5 Surround Mode Selection:** Press one of these buttons to select a surround mode for the current listening session.
- 6 Main Volume:** These buttons control the unit's volume. Note that all channels are controlled simultaneously.

- 7 TV Volume:** These buttons adjust the volume for TV using the remote control codes programmed into the remote for a TV set or cable box. These buttons control the TV set only, regardless of which source is selected. This enables you to control the audio level of a TV set even when the receiver is not in use.
- 8 Mute:** Press this button to temporarily cut the audio output of the receiver. Press it again to return to the previous volume level.
- 9 Transport Controls:** These buttons control the tape or disc motion of the last playback source selected with the Source Selection buttons **3**. Use them as you would the Play, Stop, Pause, Reverse Play and Record buttons on any VCR, CD or LD remote control.
- 10 Tune/Search & Fast Forward:** (These buttons have multiple functions, which vary according to the input device selected.)
 - a. When the **TUNER** has been selected, these buttons are used to manually tune stations.

- b. When **CD**, **LD** or **VCR** is the input source, these buttons act as the Fast Scan Forward \blacktriangle or Fast Scan Reverse \blacktriangleright controls.
- 11 Channel/Skip:** (These buttons have multiple functions, which vary according to the input device selected.)
 - a. When the **TUNER** has been selected, these buttons will scroll up \blacktriangle or down \blacktriangleright through the stations that have been programmed in the preset memory.
 - b. When **TV** or **VCR** is selected, they are the channel up \blacktriangle or channel down \blacktriangleright tuning buttons.
 - c. When **CD** or **LD** is selected these buttons act as forward and reverse "Skip" buttons to move to the next track or chapter on the disc.
 - d. When a compatible Harman Kardon cassette player has been selected as **Tape 1** or **Tape 2**, these buttons move the tape forward \blacktriangle or backwards \blacktriangleright to the next selection using the Music Scan feature.
- 12 Disc/Deck/Ant:** (These buttons have multiple functions, which vary according to the input device selected.)
 - a. When **CD** is selected and the unit is a CD changer, these buttons will change to the next disc $+$ or previous disc $-$.
 - b. When **Tape 1** or **Tape 2** is the input source, and the tape machine is a compatible Harman Kardon dual cassette deck, these buttons will switch between the "A" and "B" sides.
 - c. When **VCR 1** or **VCR 2** is the input source, these buttons switch between VCR and TV as the unit's output.
 - d. When **TV** is the input source, these buttons may switch between video input sources or antenna/video, depending on the TV model.
 - e. When **LD** is the input source, these buttons will switch the side being played from "A" to "B" on compatible dual side players.
- 13 Number Keys:** These buttons serve as a ten button numeric keypad to enter tuner preset positions. They are also to be used to select channel numbers when **TV** has been selected on the remote, or to select track numbers on a CD or LD player, depending on how the remote has been programmed. The letters below the buttons are used to enter information for tuner station names.

NOTE: The **0** button has a dual function. It also serves as the **CLEAR** button for use in programming the tuner or clearing the system memory.

14 P-Scan: Press this button to automatically scan through the stations preset into the tuner memory. Press the button again to end the scan when the tuner stops at the desired station.

- 15 Memo:** The memo button is used to enter stations to the tuner's preset memory in either the manual or automatic modes. It is also used in the process of clearing the memory.
- 16 Delay:** This button controls the amount of sound delay to the rear (surround) channels. Press it to increase the delay in the steps shown in the main Information Display or on-screen graphics.
- 17 Menu Controls:** These buttons control the action of the cursor or the selection of menu items when the receiver is being configured using the setup menu.
- 18 Select:** This button enters settings to the receiver's memory during system configuration.
- 19 Screen Display:** Press this button to activate the on screen menu system.
- 20 Panel Display:** Press this button to turn off all displays and indicators in the Information Display except for a small **D I S P** indication in the lower right corner of the display **12**. Press the button again to turn the display back on. Note that the display will briefly illuminate when a command is sent to the unit from the front panel or remote, even though the display is turned off.
- 21 Test Noise:** Press this button to begin calibration of the output level for each channel. A test signal will immediately be heard from the left front speaker and the **TEST** indicator **20** will flash.
- 22 Speaker Select:** When setting the system output levels, this button selects the speaker position being adjusted. Press it once to advance to the next speaker after each position is adjusted.
- 23 Level Adjust:** When setting the system output levels, press these buttons to increase or decrease the output level.
- 24 Sending LED:** This indicator should flash any time a button is pressed to confirm that a command is being sent to the receiver or another unit. If the light is dim or does not illuminate when a button is pressed the batteries in the remote should be replaced.
- 25 Learn LED:** This indicator will illuminate when a button on the remote is being programmed with signals from another remote during the "learning" mode. The light will go out when the signal is received and memorized.
- 26 RDS PTY:** Press this button to view the Programme Type information for stations transmitting RDS data. This button is also used for PTY Auto Search functions.
- 27 RDS AF:** This button initiates a search of all RDS stations to find a stronger signal for the programme type currently selected.

A FM Antenna: Connect an indoor or external FM antenna to these terminals.

B AM Antenna: Connect the AM loop antenna supplied with the receiver to these terminals. If an external AM antenna is used, make connections to the AM and GND terminals in accordance with the instructions supplied with the antenna.

C Tape 1 Out: Connect these jacks to the RECORD/INPUT jacks of an audio recorder.

D Tape 1 In: Connect these jacks to the PLAY/OUT jacks of an audio recorder.

E Tape 2 Out: Connect these jacks to the RECORD/INPUT jacks of a second audio recorder.

F Tape 2 In: Connect these jacks to the PLAY/OUT jacks of a second audio recorder.

G CD IN: Connect these jacks to the output of a compact disc player or CD changer.

H Front R: Connect these terminals to the front right speaker.

I Front L: Connect these terminals to the front left speaker.

J Center: Connect these terminals to the center speaker.

K Surround R: Connect these terminals to the right surround speaker.

L Surround L: Connect these terminals to the left surround speaker.

M Pre-Outs: If external power amplifiers are used for any channels, connect these jacks to the inputs of the amplifier.

N Subwoofer Pre-Out: Connect this jack to the line level input of a powered subwoofer. If an external subwoofer amplifier is used, connect this jack to the subwoofer amplifier input.

O Remote IR Out: This connection permits the IR sensor in the receiver to serve other remote controlled devices. Connect this jack to the "IR IN" jack on Harman Kardon or other compatible equipment.

P Remote IR In: If the AVR70's front panel IR sensor is blocked due to cabinet doors or other obstructions, an external IR sensor may be used. Connect the output of the sensor to this jack.

Q Unswitched AC Outlet: This outlet may be used to power any AC device. The power will remain on at this outlet regardless of whether the AVR70 is on or off.

R Switched AC Outlet: This outlet may be used to power any device that you wish to have on when the unit is turned on.

NOTE: The power consumption of the device plugged into each of these outlets should not exceed 120 watts.

S Power Cable: Connect the AC plug to a non-switched AC wall output.

B ONLY

A VCR 1 Audio In: Connect these jacks to the audio PLAY/OUT jacks of a VCR.

B VCR 1 Audio Out: Connect these jacks to the RECORD/IN audio jacks of a VCR.

C VCR 1 Video In: Connect this jack to the composite video PLAY/OUT jacks of a VCR.

D VCR 1 Video Out: Connect this jack to the composite video RECORD/IN jacks of a VCR.

E VCR 1 S Video Out: Connect this jack to the "S" video RECORD/IN jacks of a VCR.

F VCR 1 S Video In: Connect this jack to the "S" video RECORD/IN jacks of a VCR.

G VCR 2 Audio In: Connect these jacks to the audio jacks PLAY/OUT of a second VCR.

H VCR 2 Audio Out: Connect these jacks to the audio RECORD/IN jacks of a second VCR.

I VCR 2 Video In: Connect this jack to the composite video PLAY/OUT jacks of a second VCR.

J VCR 2 Video Out: Connect this jack to the composite video RECORD/IN jacks of a second VCR.

K TV Audio In: Connect the audio outputs of a TV, cable converter or satellite receiver to these jacks.

L TV Video In: Connect the composite video output of a TV, cable converter or satellite receiver to this jack. The signals received at this jack are also used to trigger the "TV Auto-On" feature.

M LD Audio In: Connect the audio output of a laser disc player to these jacks.

N LD Video In: Connect the composite video output of a laser disc player to this jack.

O LD S Video In: Connect the "S" video output of a laser disc player to this jack.

P TV Monitor Video Out: Connect this jack to the composite video input of a TV monitor or video projector to view the on screen control menus and output of the receiver's video switcher.

Q TV Monitor S Video Out: Connect this jack to the S video input of a TV monitor or video projector to view S video sources selected by the receiver's video switcher.

Information Display

1 "Visual" Indicator: These indicators display which input source is being fed to the video monitor output.

2 Test: This indicator flashes when the output levels are being set using the built in test signal generator.

3 Memo: This indicator flashes when the Memo button is pressed when entering presets and other information into the tuner's memory.

4 Auto: This indicator signifies that the Automatic Tuning mode is in use for FM broadcasts.

5 Tuned: This indicator lights when an AM or FM station is properly tuned and locked.

6 Stereo: This indicator lights when an FM station is broadcasting in stereo.

7 Volume Indication: The last two indicators on the information display indicate the volume level. Note that dB is the reference level, not an indication that there is no output.

8 Tuner Frequency Indication: When the tuner is in use, the main Information Display will show the preset channel number, if any, the frequency band and the station frequency. Indicators at the right side of the display show kHz when an LW or MW station is tuned or MHz when an FM station is tuned.

9 Main Information Display: This ten digit display shows messages relating to the status, input source, surround mode, tuner, volume level or other aspects of the unit's operation.

10 DISP: This indicator lights when the FL display has been turned off using the Display button **10** to remind you that the unit is still turned on.

11 P-Scan: This indicator flashes when the stations programmed into the tuner memory are being automatically reviewed.

12 Auto Memo: This indicator flashes when the tuner is automatically scanning for stations and entering them into the preset memory.

13 Mode Status: These indicators display the currently selected surround mode.

14 Signal Level Indication: This is a visual indication of the strength of a radio station signal. The more bars visible, the stronger the station.

Rear Panel – Audio and System Connections

IB ONLY

A FM Antenna: Connect an indoor loop antenna supplied with the receiver to these terminals. If an external AM antenna is used, make connections to the **AM** and **GND** terminals in accordance with the instructions supplied with the antenna.

B AM Antenna: Connect the AM loop antenna supplied with the receiver to these terminals. If an external AM antenna is used, make connections to the **AM** and **GND** terminals in accordance with the instructions supplied with the antenna.

C Tape 1 Out: Connect these jacks to the **RECORD/INPUT** jacks of an audio recorder.

D Tape 1 In: Connect these jacks to the **PLAY/OUT** jacks of an audio recorder.

E Tape 2 Out: Connect these jacks to the **RECORD/INPUT** jacks of a second audio recorder.

F Tape 2 In: Connect these jacks to the **PLAY/OUT** jacks of a second audio recorder.

G CD IN: Connect these jacks to the output of a compact disc player or CD changer.

H Front R: Connect these terminals to the front right speaker.

I Front L: Connect these terminals to the front left speaker.

J Center: Connect these terminals to the center speaker.

K Surround R: Connect these terminals to the right surround speaker.

L Surround L: Connect these terminals to the left surround speaker.

M Pre-Outs: If external power amplifiers are used for any channels, connect these jacks to the inputs of the amplifier.

N Subwoofer Pre-Out: Connect this jack to the line level input of a powered subwoofer. If an external subwoofer amplifier is used, connect this jack to the subwoofer amplifier input.

O Remote IR Out: This connection permits the IR sensor in the receiver to serve other remote controlled devices. Connect this jack to the "IR IN" jack on Harman Kardon or other compatible equipment.

P Remote IR In: If the AVR70's front panel IR sensor is blocked due to cabinet doors or other obstructions, an external IR sensor may be used. Connect the output of the sensor to this jack.

Q Unswitched AC Outlet: This outlet may be used to power any AC device. The power will remain on at this outlet regardless of whether the AVR70 is on or off.

R Switched AC Outlet: This outlet may be used to power any device that you wish to have on when the unit is turned on.

NOTE: The power consumption of the device plugged into each of these outlets should not exceed 120 watts.

S Power Cable: Connect the AC plug to a non-switched AC wall outlet.

1 "Visual" Indicators: This indicator displays which being fed to the video.

2 Test: This indicator shows the output levels at the output in test signal.

3 Memo: This indicator blinks when the Memo button is pressed, indicating that information is being stored.

4 Auto: This indicator blinks when the Automatic Tuning function is active for FM broadcasts.

5 Tuned: This indicator blinks when the AM or FM station is tuned and locked.

Rear Panel – Video Connections

A VCR 1 Audio In: Connect these jacks to the audio PLAY/OUT jacks of a VCR.

B VCR 1 Audio Out: Connect these jacks to the RECORD/IN audio jacks of a VCR.

C VCR 1 Video In: Connect this jack to the composite video PLAY/OUT jacks of a VCR.

D VCR 1 Video Out: Connect this jack to the composite video RECORD/IN jacks of a VCR.

E VCR 1 S Video Out: Connect this jack to the "S" video RECORD/IN jacks of a VCR.

F VCR 1 S Video In: Connect this jack to the "S" video RECORD/IN jacks of a VCR.

G VCR 2 Audio In: Connect these jacks to the audio jacks PLAY/OUT of a second VCR.

H VCR 2 Audio Out: Connect these jacks to the audio RECORD/IN jacks of a second VCR.

I VCR 2 Video In: Connect this jack to the composite video PLAY/OUT jacks of a second VCR.

J VCR 2 Video Out: Connect this jack to the composite video RECORD/IN jacks of a second VCR.

K TV Audio In: Connect the audio outputs of a TV, cable converter or satellite receiver to these jacks.

L TV Video In: Connect the composite video output of a TV, cable converter or satellite receiver to this jack. The signals received at this jack are also used to trigger the "TV Auto-On" feature.

M LD Audio In: Connect the audio output of a laser disc player to these jacks.

N LD Video In: Connect the composite video output of a laser disc player to this jack.

O LD S Video In: Connect the "S" video output of a laser disc player to this jack.

P TV Monitor Video Out: Connect this jack to the composite video input of a TV monitor or video projector to view the on screen control menus and output of the receiver's video switcher.

Q TV Monitor S Video Out: Connect this jack to the S video input of a TV monitor or video projector to view S video sources selected by the receiver's video switcher.

Information Display

"Visual" Indicator: These indicators show which input source is selected to the video monitor output.

This indicator flashes when preset levels are being set using the test signal generator.

This indicator flashes when the Memo button is pressed, entering presets and other information into the tuner's memory.

This indicator signifies that automatic tuning mode is in use for broadcasts.

This indicator lights when an FM station is properly tuned and locked.

6 Stereo: This indicator lights when an FM station is broadcasting in stereo.

7 Volume Indication: The last two indicators on the information display indicate the volume level. Note that 0dB is the reference level, not an indication that there is no output.

8 Tuner Frequency Indication: When the tuner is in use, the main Information Display will show the preset channel number, if any, the frequency band and the station frequency. Indicators at the right side of the display show kHz when an LW or MW station is tuned or MHz when an FM station is tuned.

9 Main Information Display: This ten digit display shows messages relating to the status, input source, surround mode, tuner, volume level or other aspects of the unit's operation.

10 DISP: This indicator lights when the FL display has been turned off using the Display button 10 to remind you that the unit is still turned on.

11 P-Scan: This indicator flashes when the stations programmed into the tuner memory are being automatically reviewed.

12 Auto Memo: This indicator flashes when the tuner is automatically scanning for stations and entering them into the preset memory.

13 Mode Status: These indicators display the currently selected surround mode.

14 Signal Level Indication: This is a visual indication of the strength of a radio station signal. The more bars visible, the stronger the station.

SERVICE PROCEDURE

1. Tracking point memory

This service procedure can be used for measurement of the tuner circuit. With the POWER ON, press the "PRESET UP" button while pressing the "MEMO" button for at least 3 seconds or more. FLD will display "TRACKING". Frequencies will be memorized as follows:

	VERSION	P1	P2	P3	P4
FM	8K 1B	90.0	98.0	106.0	87.5

	SCAN STEP	P5	P6	P7	P8	P9	P10	P11	P12~P30
MW	10 KHz	600.0	1000.0	1400.0	520.0	←	←	←	←
	9 KHz	603.0	999.0	1404.0	531.0	←	←	←	←
	LW	↑	↑	↑	171.0	207.0	270.0	152.0	531.0

2. FLD segment luminous

This service procedure will illuminate all segments by the following steps: With the POWER ON, press the "FM/AM(TUNER)" button while pressing the "MEMO" button for at least three seconds or more. This procedure takes 1 minute and 40 seconds to finish; at this point the procedure is complete.

- All segments will be illuminated for 5 seconds.
- At the grid "1G", segments are illuminated in the following order:
 - ① KHz → ② MHz → ③ R → ④ PEAK → ⑤ L → ⑥ MULTI → ⑦ MONO → ⑧ MATRIX → ⑨ HALL → ⑩ P-SCAN → ⑪ TAPE → ⑫ COPY → ⑬ VCR1 → ⑭ SLEEP → ⑮ DISP → ⑯ TX

- At the grid "2G", to "11G", each one segment is illuminated individually.
- At the grid "12G", segments are illuminated in the following order:

- ① VISUAL → ② SIGNAL LEVEL → ③ CH → ④ SIGNAL BAR (LEFT SIDE) → ⑤ SIGNAL BAR (2nd LEFT) → ⑥ SIGNAL BAR (CENTER) → ⑦ SIGNAL BAR (2nd RIGHT) → ⑧ SIGNAL BAR (RIGHT SIDE) → ⑨ STEREO → ⑩ THX CINEMA → ⑪ PRO.LOGIC → ⑫ MOVIE → ⑬ AUTO MEMO → ⑭ 3.LOGIC → ⑮ SIMUL'D → ⑯ SURROUND

3. Selector check mode

This service program automatically operates input selector and surround mode by the following procedure. This service program continually repeats until power is shut off. When the POWER ON, press the "SURROUND MODE+" button while pressing the "MEMO" button 3 seconds or more.

STEP	INPUT SELECTOR	DSP MODE	FM MODE BAND	FREQUENCY	COPY SWITCH		NOTES
					TAPE	VCR1	
1	FM	STEREO	AUTO	98.0	SOURCE	SOURCE	
2	FM	STEREO	MONO	LAST	↑	↑	
3	CD	STEREO	AUTO	LAST	↑	↑	
4	TAPE1	P-LOGIC	AUTO	LAST	TUNER	SOURCE	TUNER-ON
5	TAPE2	MOVIE	AUTO	LAST	SOURCE	TV	
6	TV	3 CH	AUTO	LAST	↑	SOURCE	
7	TV	HALL	AUTO	LAST	CD	LD	
8	LD	MATRIX	AUTO	LAST	TAPE2	TV	
9	VCR1	MATRIX	AM/MW	1000/999	TUNER	VCR2	
10	VCR2	STEREO	AUTO	98.0	TUNER	SOURCE	TUNER-ON
11	AUX	STEREO	AUTO	LAST	SOURCE	AUX	

4. All clear

This service program can clear all memorized operations and functions. When the POWER ON, press the "CLEAR" button while pressing the "MEMO" button 3 seconds or more. FLD shows "CLEAR MEMO" and power will be OFF.

TEST EQUIPMENT REQUIRED

- AM/FM Signal Generator
- Video Signal Generator
- Digital Multimeter
- Distortion level meter

ALIGNMENT PROCEDURES

1. FM MONO. Distortion Adjustment

Step	Input Signal Source Connection	Signal Frequency	Source Signal Output Level and Modulation	Reception Frequency	Adjustment Point	Adjustment Value
1	Signal generator output to FM antenna terminal. (75 ohm)	98 MHz	500 uV/m (54 dB/m) MONO 1 KHz / Dev. 40KHz 53.3% 1B MONO 1KHz / Dev. 75KHz 100% BK	98 MHz (P2)	L201	Distortion level Minimum at TAPE-OUT

2. FM Muting Level Adjustment

Turn variable resistor R212 and stop at position "TUNED" is not shown (not indicated), then again turn the variable resistor R212 to the opposite revolution and stop at a position "TUNED" is shown.

Step	Input Signal Source Connection	Signal Frequency	Source Signal Output Level and Modulation	Reception Frequency	Adjustment Point	Adjustment Value
1	Signal generator output to FM antenna terminal. (75 ohm)	98 MHz	10 uV/m (20 dB/m) MONO 1 KHz / Dev. 40KHz 53.3% 1B MONO 1KHz / Dev. 75KHz 100% BK	98 MHz (P2)	R212	"TUNED" indicate on FLD
2			Over mentioned level +3 dB	AUTO SCAN	Only Confirm	"TUNED" indicate on FLD

3. FM STEREO Distortion Adjustment

Adjust the L channel with the RF signal modulated only L channel first and confirm the R channel with the RF signal modulated only R channel.

Step	Input Signal Source Connection	Signal Frequency	Source Signal Output Level and Modulation	Reception Frequency	Adjustment Point	Adjustment Value
1	Signal generator output to FM antenna terminal. (75 ohm)	98 MHz	500 uV/m (54 dB/m) L+R 1KHz / Dev. 40KHz 53.3% PILOT 19KHz / Dev. 8KHz 8% 1B	98 MHz (P2)	IF COIL in FRONT END	Distortion level Minimum at TAPE-OUT
2			L+R 1KHz / Dev. 67.5KHz 90% PILOT 19KHz / Dev. 6.75KHz 9% BK		R218	Distortion level Minimum at TAPE-OUT

REMARK: Adjustment with R128 is not necessary when the distortion level is less than 0.5% with adjusting IF coil.

4. FM STEREO Separation Adjustment

Step	Input Signal Source Connection	Signal Frequency	Source Signal Output Level and Modulation	Reception Frequency	Adjustment Point	Adjustment Value
1	Signal generator output to FM antenna terminal. (75 ohm)	98 MHz	same specification as FM STEREO distortion adjustment. Input only L channel.	98 MHz (P2)	R211	Output level Minimum at TAPE-OUT channel R
2		98 MHz	same specification as FM STEREO distortion adjustment. Input only R channel.	98 MHz (P2)	R211	Output level Similar as Rch at TAPE-OUT channel L

SERVICE PROCEDURE

1. Tracking point memory

This service procedure can be used for measurement of the tuner circuit. With the POWER ON, press the "PRESET UP" button while pressing the "MEMO" button for at least 3 seconds or more. FLD will display "TRACKING". Frequencies will be memorized as follows :

	VERSION	P1	P2	P3	P4
FM	IB	90.0	98.0	106.0	87.5

	SCAN STEP	P5	P6	P7	P8	P9	P10	P11	P12~ P30
MW	10 KHz	600.0	1000.0	1400.0	520.0	←	←	←	←
	9 KHz	603.0	999.0	1404.0	531.0	←	←	←	←
	LW	↑	↑	↑	171.0	207.0	270.0	152.0	531.0

2. FLD segment luminous

This service procedure will illuminate all segments by the following steps :
With the POWER ON, press the "FM/AM(TUNER)" button while pressing the "MEMO" button for at least three seconds or more. This procedure takes 1 minute and 40 seconds to finish; at this point the procedure is complete.

- All segments will be illuminated for 5 seconds.
- At the grid "1G", segments are illuminated in the following order :
① KHz → ② MHz → ③ R → ④ PEAK → ⑤ L → ⑥ MULTI → ⑦ MONO → ⑧ MATRIX → ⑨ HALL → ⑩ P-SCAN → ⑪ TAPE → ⑫ COPY → ⑬ VCR1 → ⑭ SLEEP → ⑮ DISP → ⑯ TX
- At the grid "2G", to "11G", each one segment is illuminated individually.
- At the grid "12G", segments are illuminated in the following order :
① VISUAL → ② SIGNAL LEVEL → ③ CH → ④ SIGNAL BAR (LEFT SIDE) → ⑤ SIGNAL BAR (2nd LEFT) → ⑥ SIGNAL BAR (CENTER) → ⑦ SIGNAL BAR (2nd RIGHT) → ⑧ SIGNAL BAR (RIGHT SIDE) → ⑨ STEREO → ⑩ THX CINEMA → ⑪ PRO. LOGIC → ⑫ MOVIE → ⑬ AUTO MEMO → ⑭ 3. LOGIC → ⑮ SIMUL'D → ⑯ SURROUND

3. Selector check mode

This service program automatically operates input selector and surround mode by the following procedure. This service program continually repeats until power is shut off. When the POWER ON, press the "SURROUND MODE+*" button while pressing the "MEMO" button 3 seconds or more.

STEP	INPUT SELECTOR	DSP MODE	FM MODE BAND	FREQUENCY	COPY SWITCH		NOTES
					TAPE	VCR1	
1	FM	STEREO	AUTO	98.0	SOURCE	SOURCE	
2	FM	STEREO	MONO	LAST	↑	↑	
3	CD	STEREO	AUTO	LAST	↑	↑	
4	TAPE1	P-LOGIC	AUTO	LAST	TUNER	SOURCE	TUNER-ON
5	TAPE2	MOVIE	AUTO	LAST	SOURCE	TV	
6	TV	3 CH	AUTO	LAST	↑	SOURCE	
7	TV	HALL	AUTO	LAST	CD	LD	
8	LD	MATRIX	AUTO	LAST	TAPE2	TV	
9	VCR1	MATRIX	AM/MW	1000/999	TUNER	VCR2	
10	VCR2	STEREO	AUTO	98.0	TUNER	SOURCE	TUNER-ON
11	AUX	STEREO	AUTO	LAST	SOURCE	AUX	

4. All clear

This service program can clear all memorized operations and functions. When the POWER ON, press the "CLEAR" button while pressing the "MEMO" button 3 seconds or more. FLD shows "CLEAR MEMO" and power will be OFF.

TEST EQUIPMENT REQUIRED

- 1) AM/FM Signal Generator
- 2) Video Signal Generator
- 3) Digital Multimeter
- 4) Distortion level meter

ALIGNMENT PROCEDURES

1. FM MONO. Distortion Adjustment

Step	Input Signal Source Connection	Signal Frequency	Source Signal Output Level and Modulation	Reception Frequency	Adjustment Point	Adjustment Value
1	Signal generator output to FM antenna terminal. (75 ohm)	98 MHz	500 uV/m (54 dB/m) MONO 1 KHz / Dev. 40KHz 53.3% IB MONO 1KHz / Dev. 75KHz 100% BK	98 MHz (P2)	L201	Distortion level Minimum at TAPE-OUT

2. FM Muting Level Adjustment

Turn variable resistor R212 and stop at position "TUNED" is not shown (not indicated), then again turn the variable resistor R212 to the opposite revolution and stop at a position "TUNED" is shown.

Step	Input Signal Source Connection	Signal Frequency	Source Signal Output Level and Modulation	Reception Frequency	Adjustment Point	Adjustment Value
1	Signal generator output to FM antenna terminal. (75 ohm)	98 MHz	10 uV/m (20 dB/m) MONO 1 KHz / Dev. 40KHz 53.3% IB MONO 1KHz / Dev. 75KHz 100% BK	98 MHz (P2)	R212	"TUNED" Indicate on FLD
2			Over mentioned level +3 dB	AUTO SCAN	Only Confirm	"TUNED" Indicate on FLD

3. FM STEREO Distortion Adjustment

Adjust the L channel with the RF signal modulated only L channel first and confirm the R channel with the RF signal modulated only R channel.

Step	Input Signal Source Connection	Signal Frequency	Source Signal Output Level and Modulation	Reception Frequency	Adjustment Point	Adjustment Value
1	Signal generator output to FM antenna terminal. (75 ohm)	98 MHz	500 uV/m (54 dB/m) L+R 1KHz / Dev. 40KHz 53.3% IB PILOT 19KHz / Dev. 6KHz 8% IB	98 MHz (P2)	IF COIL In FRONT END	Distortion level Minimum at TAPE-OUT
2			L+R 1KHz / Dev. 67.5KHz 90% PILOT 19KHz / Dev. 6.75KHz 9% BK		R218	Distortion level Minimum at TAPE-OUT

REMARK: Adjustment with R128 is not necessary when the distortion level is less than 0.5% with adjusting IF coil.

4. FM STEREO Separation Adjustment

Step	Input Signal Source Connection	Signal Frequency	Source Signal Output Level and Modulation	Reception Frequency	Adjustment Point	Adjustment Value
1	Signal generator output to FM antenna terminal. (75 ohm)	98 MHz	same specification as FM STEREO distortion adjustment. Input only L channel.	98 MHz (P2)	R211	Output level Minimum at TAPE-OUT channel R
2		98 MHz	same specification as FM STEREO distortion adjustment. Input only R channel.	98 MHz (P2)	R211	Output level Similar as Rich at TAPE-OUT channel L

5. AM IF Adjustment

Step	Input Signal Source Connection	Signal Frequency	Source Signal Output Level and Modulation	Reception Frequency	Adjustment Point	Adjustment Value
1	Signal generator output to transmission loop antenna. (*:Standard required loop)	999 KHz 1000 KHz	300 uV/m (50 dB/m)	Tuning point	LA06	Output level (L or R) Maximum at TAPE-OUT

This adjustment is normally not necessary, because the coil LA06 is preset by the original supplier.

6. AM Tracking Adjustment (MW)

Step	Input Signal Source Connection	Signal Frequency	Source Signal Output Level and Modulation	Reception Frequency	Adjustment Point	Adjustment Value
1	Signal generator output to transmission loop antenna. (*:Standard required loop)	603 KHz 600 KHz	Level 300 - 400 uV/m Mod. 400 Hz 30%	603 KHz 600 KHz	LA01	Output level (L or R) Maximum at TAPE-OUT
2		1404 KHz 1400 KHz		1404 KHz 1400 KHz		
3	Repeat step 1 and 2 until level is at maximum reading.					

7. AM Tracking Adjustment (LW)

Step	Input Signal Source Connection	Signal Frequency	Source Signal Output Level and Modulation	Reception Frequency	Adjustment Point	Adjustment Value
1	Signal generator output to transmission loop antenna. (*:Standard required loop)	171 KHz	Level 300 - 400 uV/m Mod. 400 Hz 30%	171 KHz	LA03	Output level (L or R) Maximum at TAPE-OUT
2		270 KHz		270 KHz	CA08	Output level (L or R) Maximum at TAPE-OUT
3	Repeat step 1 and 2 until level is at maximum reading.					

8. AM auto stop Adjustment

Step	Input Signal Source Connection	Signal Frequency	Source Signal Output Level and Modulation	Reception Frequency	Adjustment Point	Adjustment Value
1	Signal generator output to transmission loop antenna. (*:Standard required loop)	999 KHz 1000 KHz	500 uV/m (54 dB/m)	999 KHz 1000 KHz	RA11	"TUNED" indicate on FLD
2			1000 uV/m (60 dB/m)	AUTO SCAN		Only Confirm

REMARK: This adjustment is related to the FM muting Level Adjustment. The FM muting Level re-adjustment is necessary after this adjustment.

9. On Screen Display VCO Adjustment

Step	Input Signal Source and Connection	Measuring position	Measuring equipment	Input selector	Adjustment Point	Adjustment Value
1	Color bar or other standard video signal. Video signal generator output to LD video input.	IC QX60 26pin and GND.	DC voltmeter (Impedance > 10K ohmV)	LD	CX67	2.5V ±0.1V

REMARK: Connect the TV monitor to the monitor output terminal of the product.

10. Main amp idling current adjustment

- 1) With the power OFF, set semi - fixed resistor R743 (Lch), R744 (Rch), R786 (Center ch) on the PC board (PV04) to the center position.
- 2) Connect a digital voltmeter, set for the DC range, on the emitter resistor [R759 (Lch), R760 (Rch), R794 (Center ch)] on the PC board (PV04).
- 3) After the above, adjust the idling current as follows: Turn the power ON and adjust semi - fixed resistor R743 (Lch), R744 (Rch), R786 (Center ch) while observing the digital multimeter indication. The target value is 7.2 mV (20 mA).

All values are with no load on speaker terminals, volume set to minimum and no input with the unit switched to the CD position. Always allow the amplifier to stabilize for 10 minutes or longer prior to adjusting idle current.

11. Main amp DC offset adjustment

- 1) With the power OFF, connect a digital voltmeter, set for the DC range, to the speaker terminal.
- 2) After the above, adjust the DC offset as follows: Turn the power ON and adjust RN63 (Lch), RN64 (Rch), RN70 (Center ch) so that the output is ±20 mV.

5. AM IF Adjustment

Step	Input Signal Source Connection	Signal Frequency	Source Signal Output Level and Modulation	Reception Frequency	Adjustment Point	Adjustment Value
1	Signal generator output to transmission *loop antenna. (*:Standard required loop)	999 KHz IB 1000 KHz EK	300 μ V/m (50 dB/m)	Tuning point	LA06	Output level (L or R) Maximum at TAPE-OUT

This adjustment is normally not necessary, because the coil LA06 is preset by the original supplier.

6. AM Tracking Adjustment (MW)

Step	Input Signal Source Connection	Signal Frequency	Source Signal Output Level and Modulation	Reception Frequency	Adjustment Point	Adjustment Value
1	Signal generator output to transmission *loop antenna. (*:Standard required loop)	603 KHz IB 600 KHz EK	Level 300 - 400 μ V/m Mod. 400 Hz 30%	603 KHz IB 600 KHz EK	LA01	Output level (L or R) Maximum at TAPE-OUT
2		1404 KHz IB 1400 KHz EK	Level 300 - 400 μ V/m Mod. 400 Hz 30%	1404 KHz IB 1400 KHz EK	CA01	Output level (L or R) Maximum at TAPE-OUT
3	Repeat step 1 and 2 until level is at maximum reading.					

7. AM Tracking Adjustment (LW)

Step	Input Signal Source Connection	Signal Frequency	Source Signal Output Level and Modulation	Reception Frequency	Adjustment Point	Adjustment Value
1	Signal generator output to transmission *loop antenna. (*:Standard required loop)	171 KHz	Level 300 - 400 μ V/m Mod. 400 Hz 30%	171 KHz	LA03	Output level (L or R) Maximum at TAPE-OUT
2		270 KHz	Level 300 - 400 μ V/m Mod. 400 Hz 30%	270 KHz	CA08	Output level (L or R) Maximum at TAPE-OUT
3	Repeat step 1 and 2 until level is at maximum reading.					

8. AM auto stop Adjustment

Step	Input Signal Source Connection	Signal Frequency	Source Signal Output Level and Modulation	Reception Frequency	Adjustment Point	Adjustment Value
1	Signal generator output to transmission *loop antenna. (*:Standard required loop)	999 KHz IB 1000 KHz EK	500 μ V/m (54 dB/m)	999 KHz IB 1000 KHz EK	RA11	"TUNED" Indicate on FLD
2			1000 μ V/m (60 dB/m)	AUTO SCAN	Only Confirm	"TUNED" Indicate on FLD

REMARK: This adjustment is related to the FM muting Level Adjustment. The FM muting Level re-adjustment is necessary after this adjustment.

9. On Screen Display VCO Adjustment

Step	Input Signal Source and Connection	Measuring position	Measuring equipment	Input selector	Adjustment Point	Adjustment Value
1	Color bar or other standard video signal. Video signal generator output to LD video input.	IC QX60 26pin and GND.	DC voltmeter (Impedance > 10K ohm/V)	LD	CX67	2.5V \pm 0.1V

REMARK: Connect the TV monitor to the monitor output terminal of the product.

10. Main amp idling current adjustment

- 1) With the power OFF, set semi – fixed resistor R743 (Lch), R744 (Rch), R786 (Center ch) on the PC board (PV04) to the center position.
- 2) Connect a digital voltmeter, set for the DC range, on the emitter resistor [R759 (Lch), R760 (Rch), R794 (Center ch)] on the PC board (PV04).
- 3) After the above, adjust the idling current as follows:
Turn the power ON and adjust semi – fixed resistor R743 (Lch), R744 (Rch), R786 (Center ch) while observing the digital multimeter indication.
The target value is 7.2 mV (20 mA).

All values are with no load on speaker terminals, volume set to minimum and no input with the unit switched to the CD position. Always allow the amplifier to stabilize for 10 minutes or longer prior to adjusting idle current.

11. Main amp DC offset adjustment

- 1) With the power OFF, connect a digital voltmeter, set for the DC range, to the speaker terminal.
- 2) After the above, adjust the DC offset as follows:
Turn the power ON and adjust RN63 (Lch), RN64 (Rch), RN70 (Center ch) so that the output is ± 20 mV.

ALIGNMENT AND TEST POINTS

ALIGNMENT AND TEST POINTS

CIRCUIT DESCRIPTION

1. SURROUND CIRCUIT

This model incorporates a surround processor circuit that provides 6 types of the surround sound. Fig. 1-1 is a block diagram of the surround processor circuit.

The microprocessor transfers the data to the parameter control (Serial data, Serial clock, Request Ready) to operate the circuits in each mode.

(Block diagram of the surround processor circuit.)

Fig. 1-1

(1) Stereo

Set to this mode to listen to ordinary stereo sound. The rear L/R and center outputs will be muted.

Fig. 1-2

(2) Dolby pro logic

Q601 (LC8316E) is a Dolby pro logic decoder IC. When an audio signal recorded using the Dolby pro logic system is sent to this IC, the left, right, center and surround components are separated. The surround signal component is delayed by the digital delay circuit by 15-30 mS and is sent to the modified B-type decoder Q601 where noise reduction processing is performed.

(3) Movie, 3CH Logic Hall, Matrix

The Movie mode provides the feeling of presence you get from a 35-mm movie in a movie theater. 3CH Logic mode is used to improve the sound field center by applying directivity enhancement provided by the Dolby Pro Logic Surround decoder. Hall mode provides a sound-field effect of medium-sized circular hall with rich reverberations. Matrix mode is effective for playing sports broadcasts or outdoor live concerts. It provides a surround mode with a wide surround effect. All the connections of the circuits are the same in these modes. Q601, controlled by the microprocessor, processes the audio signals to produce various sound effects and creates surround components to use them as signals to drive the surround channel.

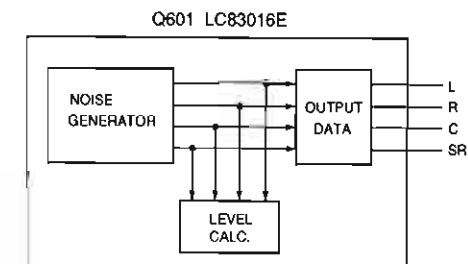

2. CENTER MODE

With Dolby pro logic, three center modes depend on the use of a center speaker as follows :

NORMAL	: Bass frequencies are sent only to the Left and Right Front channels. Select this mode when the Center Speaker is smaller than the Left and Right speakers.
WIDE	: Bass frequencies are sent to the Left, Center and Right speakers. Select this mode when the Center speaker is approximately the same size as the Left and Right speakers.
PHANTOM	: Center channel information is sent to the Left and Right speakers. Select this mode when you do not have a center channel speaker.

3. TEST TONE GENERATOR

The test tone generator generates a test tone (noise) to check the balance of sound output from each speaker in the Dolby pro logic mode. (This circuit is produced under license of the Dolby Laboratories Licensing Corp.)

(Flow of noise signals within the system.)

DISASSEMBLY PROCEDURES

1. Removing the top Cover

Remove the screws ① ~ ⑪

2. Removing the front panel

Remove the screws ① ~ ④

MAIN PCB BLOCK (P704)

1. Remove all of the screws on REAR PANEL. (900G)
2. Remove the REAR PANEL.
3. Remove the SPEAKER TERMINAL PCB. (P754)
4. Remove the screw x4 for MAIN PCB mounting.
5. Remove the screw x2 for both sides GIRD PCB of main heatsink.
6. Remove the both sides GIRD PCB.
7. Remove the screw x4 for MAIN PCB BLOCK mounting.
8. Remove the MAIN PCB BLOCK.

POWER SUPPLY PCB (PB04)

1. Remove the screw x2 for TRANSF mounting.
2. Remove the screw x2 for POWER SUPPLY PCB mounting.
3. Remove the POWER SUPPLY PCB.

MAIN VOL PCB (PU54)

1. Remove the MAIN VOL KNOB. (035B)
2. Remove the MAIN VOL NUT.
3. Pull out the MAIN VOL PCB.

3. Removing the rear panel

Remove the screws ① ~ ⑨

4. Removing the main PCB Block

Remove the screws ① ~ ⑫

5. Removing the shield plate

Remove the screws ① ②

TONE VOL PCB (PF04)

1. Remove the three TONE VOL KNOBS. (036B)
2. Remove the three TONE VOL NUTS.
3. Pull out the TONE VOL PCB.

FRONT FUNCTION PCB (PU04)

1. Remove the screw x4 for FRONT PANEL ASSY mounting.
2. Lay down the FRONT PANEL ASSY.
3. Remove the screw x16 for FRONT FUNCTION PCB.
4. Remove the FRONT FUNCTION PCB.

SCHEMATIC DIAGRAM (9) BK VERSION

P604-THX PRO-LOGIC DSP

This schematic diagram illustrates the internal circuitry of a P604-THX Pro-Logic DSP. It is organized into seven vertical sections labeled 1 through 7 at the bottom. The circuit includes several integrated circuits (ICs) such as the 74LS00 (NAND), 74LS04 (inverter), 74LS10 (NAND), and 74LS138 (3-to-8 decoder). It also features a central 21-pin DIP IC labeled 'ANAL. LOGIC'. The diagram shows a complex network of resistors (e.g., 10K, 15K, 20K, 100K, 1M, 100KΩ) and capacitors (e.g., 0.01μF, 0.001μF, 1μF, 100nF, 0.022μF, 0.01μF, 0.001μF). Power rails for +5V, +15V, and -15V are clearly indicated. Signal inputs are shown through connectors J401, J402, and J403. The output section (section 5) shows a multi-pin connector with pins numbered 1 through 32. Various other components like relays (RELO, REL0, REL1), diodes (1N4148, 1N4001), and a lamp (L407) are also depicted. Reference to other schematic diagrams (FROM REMOTE OUT SCHEMATIC DIAGRAM (2) and (3) and Page 44) is provided for continuity.

The diagram illustrates the internal circuitry of a radio tuner section, centered around a PY04-CONNECT interface. Key components include:

- MUTE BUFFER:** A circuit consisting of three 6X4 vacuum tube sockets, each with a 100K resistor and a 0.01μF capacitor. It is connected to a 100V line and provides a MUTE signal to the tuner.
- STATUS: MUTED (FM: NO SIGNAL):** A status indicator connected to the MUTE signal line.
- Control Connections:** The PY04-CONNECT provides various control signals such as TUNER-R, TUNER-L, FUNC-R, FUNC-L, DATA0, CLKO, and DATA1.
- Power and Reference:** Connections for 1.5V, 5V, and 15V power rails, along with ground points (GND).
- Capacitors:** Various electrolytic and ceramic capacitors are used for filtering and timing, including a 100μF capacitor connected to the 100V line.
- Resistors:** Numerous resistors are used throughout the circuit, with values ranging from 10K to 100K.
