HS 350 Controller Specifications

DVD player

Pickup:	Semiconductor laser, wavelength 650nm
Signal system:	NTSC / PAL
Video signal horizontal resolution:	More than 480 lines (DVD)
Video signal-to-noise ratio:	More than 60 dB (DVD)
Audio frequency response: (Stereo)	DVD (PCM): 20Hz ~ 22kHz (+/- 1.0dB) CD (PCM): 20Hz ~ 20kHz (+/- 1.0dB)
Audio signal-to-noise ratio:	More than 80 dB (PCM)
Total harmonic distortion:	Less than 0.01% (PCM)
Dynamic range:	DVD (PCM): More than 85 dB (EIAJ, 2kHz) CD: More than 85 dB (EIAJ)

FM Tuner

System:	PLL quartz-locked digital synthesizer system
Tuning range:	87.50 ~ 108.00 MHz
Antenna terminals:	75 Ohms, unbalanced
Intermediate frequency:	10.7 MHz

Video Outputs HDMI:

Component Video Output:	Y: 1 Vp-p/75 Ohms, sync negative polarity Cr: 0.7 Vp-p/75 Ohms Cb: 0.7 Vp-p/75 Ohms
CVBS Video:	1 Vp-p 75 Ohms
S-video:	Y: 1 Vp-p 75 Ohms C: PAL 0.3 Vp-p 75 Ohms / NTSC 0.286 Vp-p 75 Ohms

Audio line Outputs

Audio L/R:	2 Vrms, 1 kilohms
------------	-------------------

General

Power requirements:	AC 100-240 V, 50/60 Hz
Max power consumption:	230W
Idle power consumption:	Less than 2 W
Dimensions (WxHxD):	357mm x 105mm x 293mm
Weight:	7.5 kg

Apple and iPod are registered trademarks of Apple Computer, Inc.

HS 350

Troubleshooting

If you experience any of the following difficulties while using the system, use this troubleshooting guide to help you remedy the problem. Should any problem persist, consult your authorized Harman Kardon dealer.

No power.

- Is the power cord firmly plugged into the power outlet?
- One of the safety mechanisms may be operating. In this event, unplug the player from the power outlet briefly and then plug it in again.

No picture.

- Check that the system is connected correctly and securely.
- The video cable may be damaged. Replace it with a new one.
- Make sure the system is connected to a video input on the TV (see page 14).
- Make sure the TV is turned on.
- Make sure the correct video input on the TV is selected for viewing with this system.

Noise (interference) appears in the picture.

- Clean the disc.
- If video from this system has to go through your VCR to get to your TV, the copy-protection applied to some DVD programs could affect picture quality. If you still experience problems after checking your connections, please try connecting your DVD system directly to your TV's S-Video input, if your TV is equipped with this input (see page 14).

The aspect ratio of the screen is wrong (picture vertically expanded) when you play a wide picture even though you set "TV DISPLAY" in the SETUP menu to "16:9".

- If you connect the system with the SCART cable, connect directly to the TV. Otherwise the autoswitch function of the aspect ratio for the TV may not work.
- If the TV is not connected with a SCART cable to the HS, or if the autoswitch function does not work you should turn the TV to "16:9" (if possible with your TV).
- Depending on the TV, you may not be able to change the aspect ratio. In that case (TV not adjustable to 16:9) do not select "16:9" in the TV Display. Then, no change of the aspect ratio is needed.

There is no sound or volume is very low.

- Check that the speakers and components are connected correctly and securely.
- Make sure that you have selected the correct source on the system.
- Press **MUTE** on the remote control, if the words MUTE ON are blinking on the front panel display.
- The protective circuitry has been activated because of a short circuit. Turn off the system, eliminate the short circuit problem and turn on the power again.
- The audio interconnect is damaged. Replace it with a new one.
- The system is in pause mode or in slow-motion play mode, or fast forward or fast reverse. Press ► to return to normal play mode.
- Check the speaker settings (see page 20).

The left and right channels are unbalanced or reversed.

- Check that the speakers and components are connected correctly and securely.

Severe hum or noise is heard.

- Check that the speakers and components are connected securely.
- Check that the connecting cords are away from a transformer or motor and at least 3 meters away from fluorescent light.
- Move your TV away from the audio components.
- The plugs and jacks are dirty. Wipe them with a cloth slightly moistened with alcohol.
- Clean the disc.

The surround effect is difficult to hear when you are playing a Dolby Digital sound track.

- Check to see if the Dolby Digital mode is turned on properly, otherwise unload and load the disc again.
- Check the speaker connections.
- Depending on the DVD disc, the output signal may at times be mono or stereo even if the soundtrack is recorded in Dolby Digital format.

The sound comes from the center speaker only.

- Depending on the disc, sound may sometimes come from the center speaker only. This also applies to mono recordings (from disc or any analog source), when Pro Logic mode is selected. This is normal.

No sound is heard from the center speaker.

- Adjust center speaker volume (see pages 20).

No sound or only very low volume from the rear speakers.

- Adjust the rear speaker volume (see page 20).

The volume goes down automatically and can not be increased.

- The internal temperature is too high. Wait approximately one minute for the amplifier to reach normal working temperature.

Radio stations cannot be tuned in.

- Check that the antenna is connected correctly. Adjust the antenna and connect an external antenna if necessary.
- The signal strength of the stations is too weak for automatic tuning. Use manual tuning.
- No stations have been preset.
- The tuner mode is not selected, select the Radio mode.

The remote does not function.

- Remove any obstacles between the remote control and the system.
- Move the remote control closer to the system.
- Point the remote control at the remote sensor on the front panel.
- Replace all the batteries in the remote control with new ones if they are weak.
- Check that the batteries are loaded correctly.

The disc does not play.

- There is no disc inside. ("NO DISC" appears on the front panel display and the TV screen.) Insert a disc.
- Insert the disc correctly with the playback side facing down on the disc tray.
- Clean the disc.
- The system cannot play CD-ROM's, etc. (see page 3).
- DVD with wrong region code (see page 13).

The system starts playing the DVD automatically.

- The DVD features the auto playback function.

Playback stops automatically.

- Some discs include an auto pause signal. When playing such a disc, the system stops playback at the signal.

Troubleshooting

Track Skip or direct select with numeric buttons, Search, Slow-motion play, repeat play or Program play, etc., cannot be done.

- Depending on the DVD or VCD, some of the above operations may not be available (Playback control).

Messages do not appear on the TV screen in the language you want.

- Select the language for Display and Preferred Subtitle in the SETUP menu (see page 18). For all messages from the DVD (DVD menu, subtitles) in the proper language the disc must have the language you selected, if not, another language will be selected.

The audio language cannot be changed when you play a DVD.

- Multilingual sound is not recorded on the DVD.
- Changing the language for the sound by the Audio button on the remote or the Audio line in the Player Menu is prohibited on the DVD. In that case the audio language must be selected by the main menu on the DVD.

The subtitle language cannot be changed when you play a DVD.

- Multilingual subtitles are not recorded on the DVD.
- Changing the language for the subtitles by the Subtitle button on the remote or the Subtitle line in the Player Menu is prohibited on the DVD. In that case the subtitle language must be selected by the main menu on the DVD.

The subtitles cannot be turned off when you play a DVD.

- Depending on the DVD, you may not be able to turn the subtitles off.

The angles cannot be changed when you play a DVD.

- Multi-angles are not recorded on most DVDs.
- Change the angles when the angle mark appears on the TV screen.
- Changing the angles is prohibited on some DVDs.

The system does not operate properly.

- Static electricity, etc., may affect the system's operation.
Disconnect the AC power cord, then connect it again.

Please also refer to the Troubleshooting guide contained in your loudspeaker Owners Manual.

HS 350

Front Panel Controls

- 1** Main Information Display
- 2** Power On/Off (Standby)
- 3** Open/Close

- 4** USB On-The-Go Input
- 5** Headphone Jack
- 6** Volume Control

- 7** Slot Loader

1 Main Information Display: This display delivers messages and status indications to help you operate the HS 350 Controller.

2 Power On/Off (Standby): Press the button once to turn the HS 350 Controller on, press it again to put the unit in the Standby mode. Note that when the HS 350 Controller is switched on, the Power Indicator around the button turns white.

3 Eject: Press this button to release a disc from the loader.

4 USB On-The-Go Input: This input may be used to temporarily connect a USB thumb device or portable hard disk for direct playback of audio, image or video files or a USB hub. The USB inputs are designed to power a single USB device at a time. If additional hard disks are connected through a hub it is necessary that additional external power supplies are used to power the hub and hard disks.

5 Headphone Jack: This jack may be used to listen to the system's output through a pair of headphones. Be certain that the headphones have a standard 3.5 mm stereo phone plug. Note that the main room speakers will automatically be turned off when the headphone jack is in use.

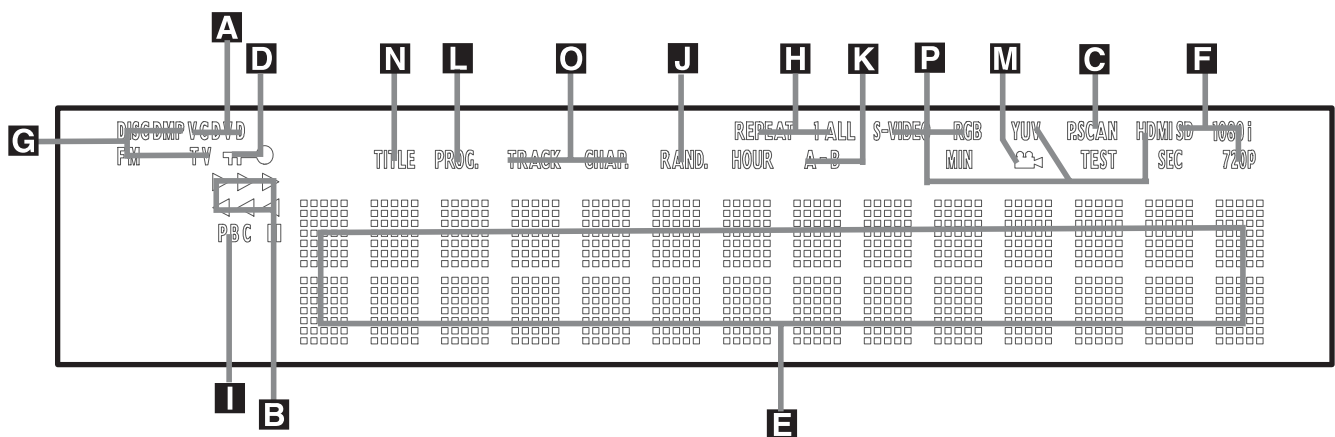

When configuring your system using EzSet/EQ, the calibration microphone should be plugged into this jack **5**.

6 Volume Control: Turn this knob clockwise to increase the volume, counterclockwise to decrease the volume. If the system is muted, adjusting volume control will automatically release the unit from the silenced condition.

7 Slot loader: Gently insert a CD or DVD into this slot, with the printed side of the disc facing up. Note there is no drawer. Press the **Eject Button 3** to release the disc

HS 350

Front Panel Display

- A** Disc Type Indicators
- B** Playback-Mode Indicators
- C** Progressive Scan Indicator
- D** Parental Lock Indicator
- E** Time Indicators
- F** Video Format Indicators

- G** Source Indicators
- H** Repeat Indicators
- I** VCD Playback Control Indicator
- J** Random Indicator
- K** A-B Repeat Indicator
- L** Program Indicator

- M** Angle Indicator
- N** Title Indicators
- O** Chapter/Track Number Indicators
- P** Video Output Indicators

A Disc Type Indicators: The CD or DVD indicator will illuminate to show the type of disc currently being played.

B Playback-Mode Indicators: These indicators light to show the current playback mode:

▶ Lights when a disc is playing in the normal mode

▶▶ Lights when the disc is in the Fast Search Forward mode. The on-screen banner display indicates the selected speed (2x, 8x, 16x, 100x).

|| Lights when the disc is paused.

◀◀ Lights when the disc is in the Fast Search Reverse mode. The on-screen banner display indicates the selected speed (2x, 8x, 16x, 100x).

C Progressive Scan Indicator: This indicator lights when the unit sends out a progressive scan signal.

D Parental Lock Indicator: This indicator lights when the parental-lock system is engaged in order to prevent anyone from changing the rating level without a code.

E Time Indicators: These positions in the indicator will show the running time of a DVD in play. When a CD is playing, these indicators will show the current track time, time remaining in the current track, or the total remaining time on the disc. When an iPod is playing, the display will show the elapsed and remaining time on the top line. The bottom line will scroll information about the song, title, album and artist.

NOTE: The Indicators **NOE** will also display text messages about the DVD's status, including **Reading** when a disc is loading, **STANDBY** when the unit is turned off, and **Disc Error** when a disc not compatible with the DVD is put into the play position.

F Video Format Indicators: These indicators will represent the video format currently playing.

G Source Indicators: These indicators will light to show which source is currently selected.

H Repeat Indicators: These indicators light when any of the Repeat functions are in use.

I VCD Playback Control Indicator: This indicator lights when the playback control function is turned on with VCDs.

J Random Indicator: This indicator lights when the unit is in the Random Play mode.

K A-B Repeat Indicator: This indicator lights when a specific passage for repeat playback has been selected.

L Program Indicator: This indicator lights when the programming functions are in use.

M Angle Indicator: This indicator blinks when alternative viewing angles are available on the DVD currently playing.

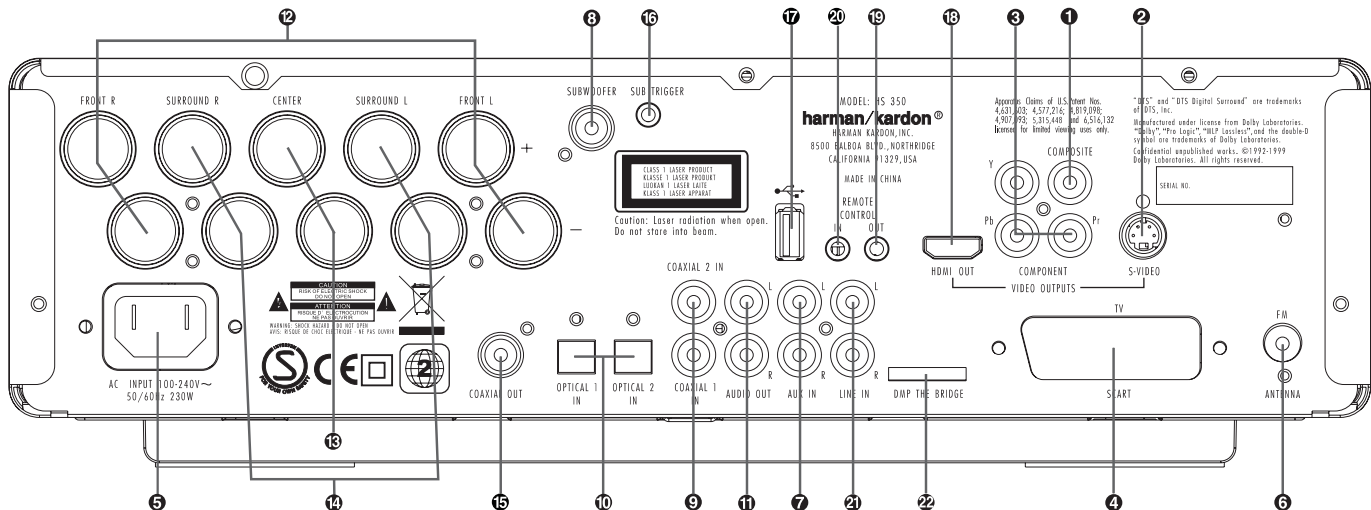

N Title Indicators: These two positions in the display will show the current title number when a DVD disc is playing.

O Chapter/Track Number Indicators: When a DVD disc is playing, these two positions in the display will show the current chapter. When a CD disc is playing they will show the current track number.

P Video Output Indicators: These indicators will represent the active video output.

HS 350

Rear Panel Connections

- 1 Composite Video Output
- 2 S-Video Output
- 3 Component Video Outputs
- 4 Scart TV Output
- 5 AC Power Cord
- 6 FM Antenna
- 7 Audio In
- 8 Subwoofer Output
- 9 Coaxial Digital Input
- 10 Optical Digital Input
- 11 Analog Audio Outputs
- 12 Front Speaker Outputs
- 13 Center Speaker Outputs
- 14 Surround Speaker Outputs
- 15 Coaxial Digital Output
- 16 Subwoofer Trigger Output
- 17 USB On-The-Go Input
- 18 HDMI Output
- 19 Remote IR Output
- 20 Remote IR Input
- 21 TV Audio In
- 22 ^{the Bridge} DMP Connector

1 Composite Video Output: Connect this jack to the video input on a television or video projector.

2 S-Video Output: Connect this jack to the S-Video input on a television or video projector.

3 Component Video Outputs: These outputs carry the component video signals for connection to display monitors with component video inputs. For standard analog TV's or projectors with inputs marked Y/Pr/Pb or Y/Cr/Cb, connect these outputs to the corresponding inputs. If you have a high-definition television or projector that is compatible with high scan rate progressive video, connect these jacks to the "HD Component" inputs. Note that if you are using a progressive scan display device, then "Progressive" must be selected in the Video Set-up Menu in order to take advantage of the progressive scan circuitry. See page 22 for more information on progressive scan video.

IMPORTANT: These jacks should NOT be connected to standard composite video inputs.

4 SCART OUT (TV): If your TV has a SCART socket, you can connect a SCART cable to your TV and to your DVD Player for improved video quality. The SCART cable carries both audio and video. You can select Composite Video or RGB video for that SCART connector's video output signal.

5 AC Power Cord: Connect this plug to an AC outlet. If the outlet is controlled by a switch, make certain that it is in the ON position.

6 FM Antenna: Connect to the supplied FM antenna.

7 Audio In: Connect to a line-level analog audio source: TV, tape player, Minidisc, PC, etc.

8 Subwoofer Output: Connect to the SUB/LFE input on the subwoofer.

9 Coaxial Digital Input: Connect the coax digital output from a DVD player, HDTV receiver, LD player, MD player, satellite receiver or CD player to this jack. The signal may be either a Dolby Digital signal, DTS signal or a standard PCM digital source. Do not connect the RF digital output of an LD player to these jacks.

10 Optical Digital Input: Connect the optical digital output from a DVD player, HDTV receiver, LD player, MD player, satellite receiver or CD player to this jack. The signal may be either a Dolby Digital signal, DTS signal or a standard PCM digital source.

11 Analog Audio Outputs: Connect these jacks to the analog audio input on a TV set or external audio system for analog audio playback or to the RECORD/INPUT jacks of an audio recorder for recording.

12 Front Speaker Outputs: Connect these outputs to the matching + or – terminals on your left and right speakers. In conformance with the new CEA color code specification, the White terminal is the positive, or "+" terminal that should be connected to the red (+) terminal on Front Left speaker with the older color coding, while the Red terminal is the positive, or "+" terminal that should be connected to the red (+) terminal on Front Right speaker. Connect the black (–) terminals on the HS to the black (–) terminals on the speakers. See page 14 for more information on speaker polarity.

13 Center Speaker Outputs: Connect these outputs to the matching + and – terminals on your center channel speaker. In conformance with the new CEA color code specification, the Green Terminal is the positive, or "+" terminal that should be connected to the red (+) terminal on speakers with the older color coding. Connect the black (–) terminal on the HS to the black negative (–) terminal on your speaker. (See page 14 for more information on speaker polarity.)

HS 350

Rear Panel Connections

14 Surround Speaker Outputs: Connect these outputs to the matching + and – terminals on your surround channel speakers. In conformance with the new CEA color code specification, the Blue terminal is the positive, or "+", terminal that should be connected to the red (+) terminal on the Surround Left speaker with older color coding, while the Gray terminal should be connected to the red (+) terminal on the Surround Right speaker with the older color coding. Connect the black (–) terminal on the HS to the matching black negative (–) terminals for each surround speaker. (See page 14 for more information on speaker polarity.)

Note: You'll find more details about all Audio/Video connections under Setup and Connections on the following pages.

15 Coaxial Digital Output: Connect this jack to the matching digital input connector on a digital recorder such as a CD-R or MiniDisc recorder.

16 Subwoofer Trigger Output: Connect this trigger output to the trigger input of the Harman Kardon subwoofer, so that the subwoofer will switch on and off at the same time as the rest of the system.

17 USB On-The-Go Input: This input may be used to temporarily connect a USB thumb device or portable hard disk for direct playback of audio, image or video files, a digital photo camera or a USB hub.

18 HDMI Output: Connect this output to the HDMI input of high-definition LCD, Plasma or video projector for the best possible picture quality.

19 Remote IR Output: This connection permits the IR sensor in the receiver to serve other remote controlled devices. Connect this jack to the "IR IN" jack on Harman Kardon or other compatible equipment.

20 Remote IR Input: If the HS 350's front-panel IR sensor is blocked due to cabinet doors or other obstructions, an external IR sensor may be used. Connect the output of the sensor to this jack.

21 TV Audio Input: If your screen is connected to the HS by an HDMI, Component, S-Video or Composite cable, connect the analog output of your TV to this input. If you have your TV connected to the HS with a Scart cable, an audio connection to the TV Input is not necessary.

22 The Bridge Digital Media Player (DMP) Connector: With the HS 350 turned off, connect one end of the optional Harman Kardon The Bridge to this proprietary connector, and the other to your compatible Apple iPod. When the Digital Media Player source is selected, you may view your iPod's control and navigation messages on your video display (if one is connected to one of the **Video Monitor Outputs 1 2 3 4 18**), and in the **Upper and Lower Display Lines E**. You may navigate the iPod and select tracks for playback using the **▲/▼/◀▶ Buttons 10** and the **Enter Button 7**.

DIGITAL LOUNGE 6XX

Digital Lounge Controller Specifications

DVD player	Pickup:	Semiconductor laser, wavelength 650nm

Troubleshooting

For the Controller

If you experience any of the following difficulties while using the system, use this troubleshooting guide to help you remedy the problem.

Should any problem persist, consult your authorized Harman Kardon dealer.

No power.

- Is the power cord firmly plugged into the power outlet?
- One of the safety mechanisms may be operating. In this event, unplug the player from the power outlet briefly and then plug it in again.

No picture.

- Check that the system is connected correctly and securely.
- The video cable may be damaged. Replace it with a new one.
- Make sure the system is connected to a video input on the TV (see page 14).
- Make sure the TV is turned on.
- Make sure the correct video input on the TV is selected for viewing with this system.

Noise (interference) appears in the picture.

- Clean the disc.
- If video from this system has to go through your VCR to get to your TV, the copy-protection applied to some DVD programs could affect picture quality. If you still experience problems after checking your connections, please try connecting your DVD system directly to your TV's S-Video input, if your TV is equipped with this input (see page 14).

The aspect ratio of the screen is wrong (picture vertically expanded) when you play a wide picture by the player or an external source connected to the screen even though you set "TV DISPLAY" in the SETUP menu to "Auto".

- If you connect the system or the external source with the SCART cable, connect directly to the TV. Otherwise the autoswitch function of the aspect ratio for the TV may not work.
- If the TV is not connected with a SCART cable to the HS (as recommended) or the external source, or if the autoswitch function does not work you should turn the TV to "Fill All".

There is no sound or volume is very low

- Check that the speakers and components are connected correctly and securely.
- Make sure that you have selected the correct source on the system.
- Press **MUTE** on the remote control, if the words MUTE ON are blinking on the front panel display.
- The protective circuitry has been activated because of a short circuit. Turn off the system, eliminate the short circuit problem and turn on the power again.
- The audio interconnect is damaged. Replace it with a new one.
- The system is in pause mode or in slow-motion play mode, or fast forward or fast reverse. Press ► to return to normal play mode.
- Check the speaker settings (see page 19).

The left and right channels are unbalanced or reversed.

- Check that the speakers and components are connected correctly and securely.

Severe hum or noise is heard.

- Check that the speakers and components are connected securely.
- Check that the connecting cords are away from a transformer or motor and at least 3 meters away from fluorescent light.
- Move your TV away from the audio components.
- The plugs and jacks are dirty. Wipe them with a cloth slightly moistened with alcohol.
- Clean the disc.
- Disconnect antenna cables from external sources (also PC) connected to the screen or system. If hum disappears use an antenna transformer between antenna and source.
- If PC is connected to the system disconnect the Audio and Video cables. If hum disappears use an audio transformer between PC audio out and system input. If hum persists unplug PC from your system and ask your local dealer for a proper solution (ground loop interrupt).

The surround effect is difficult to hear when you are playing a Dolby Digital sound track.

- Check to see if the Dolby Digital mode is turned on properly, otherwise unload and load the disc again.
- Check the speaker connections.
- Depending on the DVD disc, the output signal may at times be mono or stereo even if the soundtrack is recorded in Dolby Digital format.

The sound comes from the center speaker only.

- Depending on the disc, sound may sometimes come from the center speaker only. This also applies to mono recordings (from disc or any analog source), when Pro Logic mode is selected. This is normal.

No sound is heard from the center speaker.

- Adjust center speaker volume (see pages 19).

No sound or only very low volume from the rear speakers.

- Adjust the rear speaker volume (see page 19).

The volume goes down automatically and cannot be increased.

- The internal temperature is too high. Wait approximately one minute for the amplifier to reach normal working temperature.

Radio stations cannot be tuned in.

- Check that the antenna is connected correctly. Adjust the antenna and connect an external antenna if necessary.
- The signal strength of the stations is too weak for automatic tuning. Use manual tuning.
- No stations have been preset.
- The tuner mode is not selected, select the Radio mode.

The remote does not function.

- Remove any obstacles between the remote control and the system.
- Move the remote control closer to the system.
- Point the remote control at the remote sensor on the front panel.
- Replace all the batteries in the remote control with new ones if they are weak.
- Check that the batteries are loaded correctly.

The disc does not play.

- There is no disc inside. ("NO DISC" appears on the front panel display and the TV screen.) Insert a disc.
- Insert the disc correctly with the playback side facing down.
- Clean the disc.
- The system cannot play CD-ROM's, etc. (see page 3).
- DVD with wrong region code (see page 13).

Playback stops automatically.

- Some discs include an auto pause signal. When playing such a disc, the system stops playback at the signal.

Troubleshooting

Track Skip or direct select with numeric buttons, Search, Slow-motion play, repeat play or Program play, etc., cannot be done.

- Depending on the DVD or VCD, some of the above operations may not be available (Playback control).

Messages do not appear on the TV screen in the language you want.

- Select the language for Display and Preferred Subtitle in the SETUP menu (see page 18). For all messages from the DVD (DVD menu, subtitles) in the proper language, the disc must have the language you selected, if not, another language will be selected.

The audio language cannot be changed when you play a DVD.

- Multilingual sound is not recorded on the DVD.
- Changing the language for the sound by the Audio button on the remote or the Audio line in the Player Menu is prohibited on the DVD. In that case the audio language must be selected by the main menu on the DVD.

The subtitle language cannot be changed when you play a DVD.

- Multilingual subtitles are not recorded on the DVD.
- Changing the language for the subtitles by the Subtitle button on the remote or the Subtitle line in the Player Menu is prohibited on the DVD. In that case the subtitle language must be selected by the main menu on the DVD.

The subtitles cannot be turned off when you play a DVD.

- Depending on the DVD, you may not be able to turn the subtitles off.

The angles cannot be changed when you play a DVD.

- Multi-angles are not recorded on most DVDs.
- Change the angles when the angle mark appears on the TV screen.
- Changing the angles is prohibited on some DVDs.

The system does not operate properly.

- Static electricity, etc., may affect the system's operation. Disconnect the AC power cord, then connect it again.

Please also refer to the Troubleshooting guide contained in your loudspeaker Owners Manual

For the TV

Defect	Possible cause	Possible remedy
No picture although the mains plug is inserted and the unit is switched on.	<ul style="list-style-type: none"> • Mains switch in position "0" (OFF). • Mains plug of unit is not inserted into the plug receptacle. • The HDMI cable is not properly inserted. • Defective mains cable. 	<ul style="list-style-type: none"> • Shift mains switch to position "1". • Insert the mains cable plug into the plug receptacle. • Insert the HDMI cable firmly. • Call the service hotline.
Screen dark.	<ul style="list-style-type: none"> • Contrast setting too low. • No input signal, wrong input selected. 	<ul style="list-style-type: none"> • Set the brightness and/or contrast correctly (see Picture Calibration). • Check the connection cable; assign correct input to source.
Weak or excessive colours.	<ul style="list-style-type: none"> • Colour not correctly set. • Connection cable not correctly connected. 	<ul style="list-style-type: none"> • Set the colour correctly (see Picture Calibration). • Connect the cable correctly.

DIGITAL LOUNGE 6XX

Front Panel Controls

- 1** Main Information Display
- 2** Power On/Off (Standby)
- 3** Open/Close
- 4** USB On-The-Go Input
- 5** Headphone Jack
- 6** Volume Control
- 7** Slot Loader

1 Main Information Display: This display delivers messages and status indications to help you operate the Digital Lounge Controller.

2 Power On/Off (Standby): Press the button once to turn the Digital Lounge Controller on, press it again to put the unit in the Standby mode.

Note that when the Digital Lounge Controller is switched on, the Power Indicator around the button turns blue.

3 Eject: Press this button to release a disc from the loader.

4 USB On-The-Go Input: This input may be used to temporarily connect a USB thumb device or portable hard disk for direct playback of audio, image or video files or a USB hub. The USB inputs are designed to power a single USB device at a time. If additional hard disks are connected through a hub it is necessary that additional external power supplies are used to power the hub and hard disks.

5 Headphone Jack: This jack may be used to listen to the system's output through a pair of headphones. Be certain that the headphones have a standard 3.5 mm stereo phone plug. Note that the main room speakers will automatically be turned off when the headphone jack is in use.

When configuring your system using EzSet/EQ, the calibration microphone should be plugged into this jack **5**.

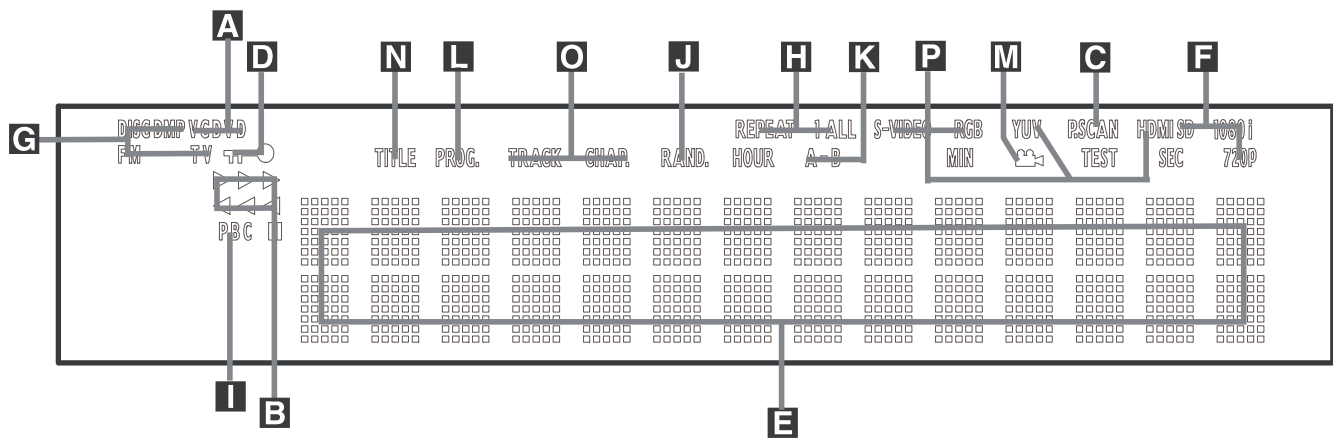

6 Volume Control: Turn this knob clockwise to increase the volume, counterclockwise to decrease the volume. If the system is muted, adjusting volume control will automatically release the unit from the silenced condition.

7 Slot loader: Gently insert a CD or DVD into this slot, with the printed side of the disc facing up. Note there is no drawer. Press the **Eject Button 3** to release the disc

DIGITAL LOUNGE 6XX

Front Panel Display

ENGLISH

- A** Disc Type Indicators
- B** Playback-Mode Indicators
- C** Progressive Scan Indicator
- D** Parental Lock Indicator
- E** Time Indicators
- F** Video Format Indicators
- G** Source Indicators
- H** Repeat Indicators
- I** VCD Playback Control Indicator
- J** Random Indicator
- K** A-B Repeat Indicator
- L** Program Indicator
- M** Angle Indicator
- N** Title Indicators
- O** Chapter/Track Number Indicators
- P** Video Output Indicators

A Disc Type Indicators: The CD or DVD indicator will illuminate to show the type of disc currently being played.

B Playback-Mode Indicators: These indicators light to show the current playback mode:

- ▶ Lights when a disc is playing in the normal mode
- ▶▶ Lights when the disc is in the Fast Search Forward mode. The on-screen banner display indicates the selected speed (2x, 8x, 16x, 100x).
- || Lights when the disc is paused.
- ◀◀ Lights when the disc is in the Fast Search Reverse mode. The on-screen banner display indicates the selected speed (2x, 8x, 16x, 100x).

C Progressive Scan Indicator: This indicator lights when the unit sends out a progressive scan signal.

D Parental Lock Indicator: This indicator lights when the parental-lock system is engaged in order to prevent anyone from changing the rating level without a code.

E Time Indicators: These positions in the indicator will show the running time of a DVD in play. When a CD is playing, these indicators will show the current track time, time remaining in the current track, or the total remaining time on the disc. When an iPod is playing, the display will show the elapsed and remaining time on the top line. The bottom line will scroll information about the song, title, album and artist.

NOTE: The Indicators **N O E** will also display text messages about the DVD's status, including **Reading** when a disc is loading, **STANDBY** when the unit is turned off, and **Disc Error** when a disc not compatible with the DVD is put into the play position.

F Video Format Indicators: These indicators will represent the video format currently playing.

G Source Indicators: These indicators will light to show which source is currently selected.

H Repeat Indicators: These indicators light when any of the Repeat functions are in use.

I VCD Playback Control Indicator: This indicator lights when the playback control function is turned on with VCDs.

J Random Indicator: This indicator lights when the unit is in the Random Play mode.

K A-B Repeat Indicator: This indicator lights when a specific passage for repeat playback has been selected.

L Program Indicator: This indicator lights when the programming functions are in use.

M Angle Indicator: This indicator blinks when alternative viewing angles are available on the DVD currently playing.

N Title Indicators: These two positions in the display will show the current title number when a DVD disc is playing.

O Chapter/Track Number Indicators: When a DVD disc is playing, these two positions in the display will show the current chapter. When a CD disc is playing they will show the current track number.

P Video Output Indicators: These indicators will represent the active video output.

DIGITAL LOUNGE 6XX

Rear Panel Connections

- 1 HDMI Output
- 2 Remote IR Output
- 3 Remote IR Input
- 4 USB On-The-Go Input
- 5 AC Power Cord
- 6 FM Antenna
- 7 Audio In
- 8 Subwoofer Output
- 9 Coaxial Digital TV Input
- 10 Optical Digital Input
- 11 Analog Audio Outputs
- 12 Front Speaker Outputs
- 13 Center Speaker Outputs
- 14 Surround Speaker Outputs
- 15 Coaxial Digital Output
- 16 Subwoofer Trigger Output
- 17 Coaxial Digital Input
- 18 DMP The Bridge Input
- 19 Analog Audio Inputs

1 HDMI Output: Connect this output to the HDMI input **1** of the screen, using the supplied HDMI - SP-DIF - Remote In/Out cable.

2 Remote IR Output: This connection permits the IR sensor in the receiver to serve other remote controlled devices. Connect this jack to the "IR IN" jack on Harman Kardon or other compatible equipment. Note this connection is only necessary for optional, additional products connected to the player. It is not necessary for proper control of the Digital Lounge system.

3 Remote IR Input: Connect this input to the Remote IR Output **1** of the TV, using the special HDMI - SP-DIF - Remote In/Out cable. This will allow you to control all components in your system by pointing the remote control to the TV only.

4 USB On-The-Go Input: This input may be used to temporarily connect a USB thumb device or portable hard disk for direct playback of audio, image or video files, a digital photo camera or a USB hub.

5 AC Power Cord: Connect this plug to an AC outlet. If the outlet is controlled by a switch, make certain that it is in the ON position.

6 FM Antenna: Connect to the supplied FM antenna.

7 Audio In: Connect to a line-level analog audio source: TV, tape player, Minidisc, PC, etc.

8 Subwoofer Output: Connect to the SUB/LFE input on the subwoofer.

9 Coaxial Digital TV Input: Connect the Coax Digital TV Output **15** of the screen to this jack, using the supplied HDMI - SP-DIF - Remote In/Out cable.

10 Optical Digital Input: Connect the optical digital output from a DVD player, HDTV receiver, LD player, MD player, satellite receiver or CD player to this jack. The signal may be either a Dolby Digital signal, DTS signal or a standard PCM digital source.

11 Analog Audio Outputs: Connect these jacks to the RECORD/INPUT jacks of an optional audio recorder for recording.

12 Front Speaker Outputs: Connect these outputs to the matching + or – terminals on your left and right speakers. In conformance with the new CEA color code specification, the White terminal is the positive, or "+" terminal that should be connected to the red (+) terminal on Front Left speaker with the older color coding, while the Red terminal is the positive, or "+" terminal that should be connected to the red (+) terminal on Front Right speaker. Connect the black (–) terminals on the Digital Lounge system to the black (–) terminals on the speakers. See page 15 for more information on speaker polarity.

13 Center Speaker Outputs: Connect these outputs to the matching + and – terminals on your center channel speaker. In conformance with the new CEA color code specification, the Green Terminal is the positive, or "+" terminal that should be connected to the red (+) terminal on speakers with the older color coding. Connect the black (–) terminal on the Digital Lounge system to the black negative (–) terminal on your speaker. (See page 15 for more information on speaker polarity.)

For Q509 on SMPS board	Sil-pad	sil-pad 400-3022	01.00.DP.QT.E113
For Amplifier board	Diathermanous Selenium Rubber	100*8*1mm	01.00.DP.JY.E583
Be buckled above volume button board	Insulated PVC	HS200-H02	01.00.DP.JY.E249
For hamulus of front panel	Insulated PVC	22.5*10*0.3mm(with Single side glued)	01.00.DP.JY.E541
	Insulated PVC	HS350-H01	01.00.DP.JY.E134
Between Tuner and chassis	sponge	20*10*8MM(with double sides glued)	01.00.DP.HM.E263
For Front Panel and Left/Right sides of chassis (4),For Front Panel and Volume Board(2)	Screw	3*6KBTNI	01.00.WJ.JG.E085
For chassis and pedestal underlay(6)	Screw	3*6PWBTTNI	01.00.WJ.JG.E543
For chassis and pedestal underlay(3)	Screw	3*6PWMHNI	01.00.WJ.JG.E795
For Front panel board and chassis and pedestal underlay(3)	Screw	3*8PWBTTNI	01.00.WJ.JG.E235
For Front panel and Front panel board/key(9)	Screw	3*8PAHC	01.00.WJ.JG.E166
For Loader and chassis(4),For PCB Bracket and chassis(4),For Mainboar and Bracket(2)	Screw	3*6PWBTTTC W=7	01.00.WJ.JG.E091
For SMPS board and chassis(6),For AV board and chassis(1),For Mainboard(2),For Amplifier board and Bracket(4)	Screw	3*6PWMHC W=7	01.00.WJ.JG.E451

HS650DL Component List			
Location.No.	Description	Specification	P/N
For Rear panel and chassis(2),For Top cover and the bottom side of chassis(4)	Screw	3*4RBTTNI	01.00.WJ.JG.E252
For output jacks(10),For frequency modulation module(2),For U type connect piece and rear panel(3)	Screw	3*8PAHO	01.00.WJ.JG.E321
For top cover and chassis, top cover and rear panel(5)	Screw	3*6PWBTTTO	01.00.WJ.JG.E403
For AC power socket (2)	Screw	3*10 PMHO	01.00.WJ.JG.E502
For IC and Heatsinks on SMPS board (10)	Screw	3*6PBTTTC	01.00.WJ.JG.E087
Among Heatsinks on SMPS board 3	Screw	3*6PWTTC W=7	01.00.WJ.JG.E093
For Button cover Board and button Board	Screw	1.7*4CAHNI D=3.2 Free-Lead	01.00.WJ.JG.E655
BD701 fixed with Heatsink on SMPS board(1)	Screw	3*8PBTTTC	01.00.WJ.JG.E417
For power jack(2)	Nut	M3	01.00.WJ.JG.E119
For uncovered Screw drilled through the chassis	Screw Jacket	Φ3*4mm	01.00.FZ.TG.E025
For Insulated gasket and volume button Board	Plastic Rivet	MBL3-2.5	01.00.SJ.QT.E104
	HDMI Cord	1770261-1(2M)	01.47.CNT.LJX.5.E241
	Microphone	H03-MCD12TWBKNN-R-A	01.00.SP.E254
WS-002E+WS-019 HO5VV-F 0.75x2C BK 2M	Power Cord	WS-002E+WS-019 HO5VV-F 0.75x2C BK 2M	01.47.CNT.ACX.E052
	Antenna	FM-TV-22 (Lead content less than 300PPM)	01.47.CNT.CTX.E016
	Loader	DL-05MH-H40P	01.15.JX.EDL05MH
IEC Head for FM Connector (NON-Screw Thread)	FM frequency modulation module	TFCF1E806A	01.49.E11
CN701 on SMPS to Power Jack with solder one end	Connect cable	VH-3Y Connector-2Y-240mm(Be same side)	01.47.CNT.LJX.7.E776
CN706 on SMPS to CN403 on Amplifier board	Connect cable	VH-4Y Connector-4Y-4Y-150mm(Be same side)	01.47.CNT.LJX.7.E726
CN405 on Amplifier board to CN902 on Speaker board	Connect cable	VH-10Y Connector-10Y-10Y-100mm(Be different side)	01.47.CNT.LJX.7.E777
Connect ground beside headphone jack to SMPS	Connect cable	70mm single-core cable (with solder one end and ground piece φ4 connect another end)	01.47.CNT.LJX.7.E795
CN601(A) on Front panel board to CN5(A) on Mainboard	Flat cable	1.0*22P*80mmA	01.48.BPX.1.E170
CN6(C) on Mainboard to CN704(C) on SMPS board	Flat cable	1.25*16P*80mmA(T=0.1mm)	01.48.BPX.1.E171
CN9(D) on Mainboard to CN301(D) on AV board,CN8(E) on Mainboard to CN302(E) on AV board	Flat cable	1.0*20P*70mmA	01.48.BPX.1.E172
CN7(F) on Mainboard to CN303(F) on AV board	Flat cable	1.25*18P*70mmA(T=0.1mm)	01.48.BPX.1.E173
CN702(G) on SMPS board to CN602(G) on Front panel board	Flat cable	1.25*14P*110mmA(T=0.1mm)	01.48.BPX.1.E174
CN703(I) on SMPS board to CN402(I) on Amplifier board	Flat cable	1.25*6P*110mmA(T=0.1mm)	01.48.BPX.1.E176
CN404 on Amplifier to CN901 on Speaker board	Flat cable	1.0*8P*50mmA	01.48.BPX.1.E177
CN4(B) on Mainboard to CN401 on Amplifier board	Flat cable	1.0*16P*80mmA	01.48.BPX.1.E150
CN604(J) on Front panel board to CN605(J) on Volume board	Flat cable	1.0*6P*40mmA	01.48.BPX.1.E154
Loader to CN2 on Mainboard	Flat cable	1.0*12P*220mmA	01.48.BPX.1.E156
Loader to CN1 on Mainboard	Flat cable	0.5*24P*200mmA	01.48.BPX.1.E028
Tuner to CN304 on AV board	Flat cable	1.25*11P*70mmA	01.48.BPX.1.E085
4-layers	Main Board (semi-manufactured goods)	HAV07M-5112C01(EU Version+Hitachi Loader)	02.11.HAV07M5112C01
2-layers	AV Board (semi-manufactured goods)	HAV07I-5113C01(EU Version)	02.14.HAV07I5113C01
2-layers	Speaker Board (semi-manufactured goods)	HAV07I-5118C01	02.14.HAV07I5118C01
2-layers	Front panel Board (semi-manufactured goods)	HAV07K-5115C01	02.15.HAV07K5115C01
2-layers	Front panel Board (semi-manufactured goods)	HAV07K-5116C01	02.15.HAV07K5116C01
4-layers	Amplifier Board (semi-manufactured goods)	HAV07A-5329C01	02.17.HAV07A5329C01
2-layers	SMPS Board (semi-manufactured goods)	HAV07P-5117C01	02.19.HAV07P5117C01

H	X	X	X	X	Z

LM358M; Dual Operational Amplifier (SOP8)

AT24C64-2.7; EEPROM (SO8)

74HCT14D; Schmitt Trigger(SO14)

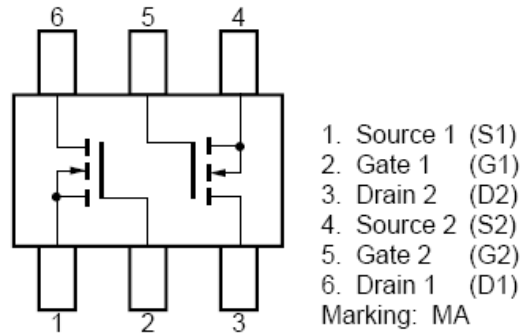

BA6287; Motor Driver(SOP8)

RClamp0514M; Low Capalitance TVS Diode Array(MSOP-10L)

UPA672T; MOS FIELD EFFECT TRANSISTOR (SC-70)

AK4683EQ; Stereo audio CODEC (LQFP-64)

PT2579-SN(L); RDS Demodulator IC
(SOP16)

NJM2068M; Pre-amp
(SO8)

EM78P156ELM-G; MCU (SOIC18)

74HCU04; Hex Inverter(TSSOP14)

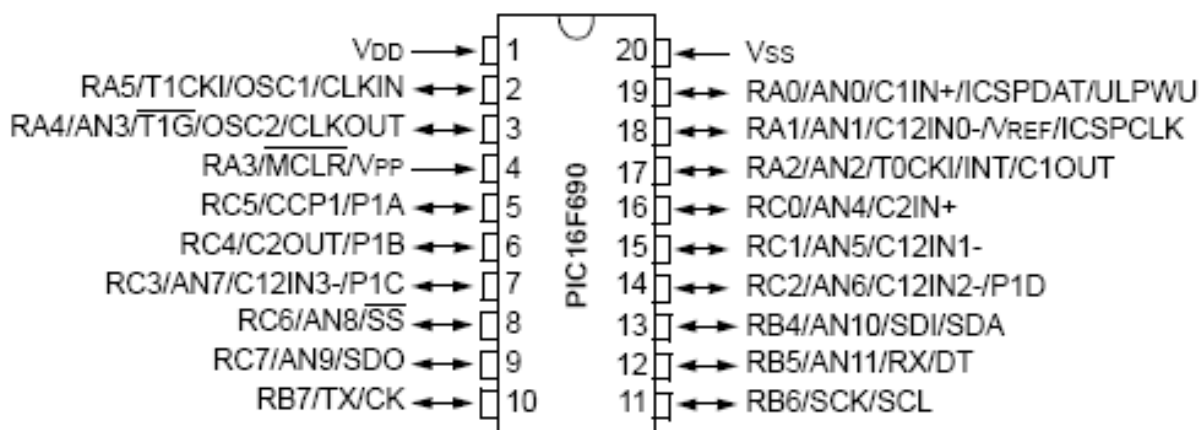

LM9022M; Vacuum Fluorescent Display Filament Driver (SOP8)

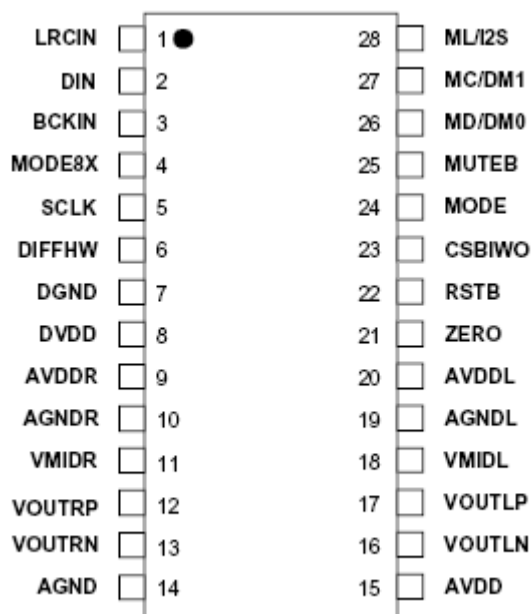

PC817; Photoelectric Coupler (DIP4)

PIC16F690-I/SS; MCU (SSOP20)

WM8740SEDS; DAC (SSOP28)

ADTL082ARZ; Pre-amp(SO8)

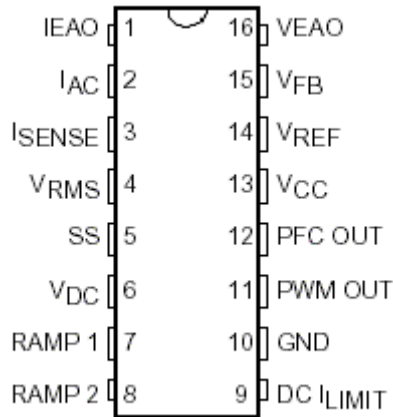

IRS20955STRPbF; PROTECTED DIGITAL AUDIO DRIVER (SOIC16)

IRF6645TRPbF; DirectFET (SJ)

ML4800CS; Power Factor Correction and PWM Controller(SOIC16)

EL817; Photocoupler (DIP4)

IRF7341; Mosfet (SO-8)

MP1411DH; Step-Down Converter (MSOP-10)

MC34063ADG; Step-Up/Down/ Inverting Switching Regulators (SO-8)

NCP3063BPG; Step-Up/Down/ Inverting Switching Regulators (DIP8)

AZ1117-1.8V /3.3V; LDO
(SOT-223)

BA33BCO; Dropout Voltage
Regulator (TO-220)

KA7809/7812; Voltage Regulator
(TO-220)

78L05/78L12; Voltage Regulator
(SOT-89)

79L12; Negative voltage regulators
(TO-92)

KA78R05CTU; Voltage Regulator
(TO-220F-4L)

BA00HC5FP;LDO (T0252-5)

1 Pin : ADJ 4 Pin : Vo
 2 Pin : PVoc 5 Pin : Vcc
 3 Pin : N.C. FIN : GND

AZ431AZ-A; Shunt Regulator (TO -92)

1. Ref 2. Anode 3. Cathode

FAN73832; Half-Bridge Gate-Drive IC (SOP8)

FAN7602MX; PWM Controller (SOP8)

2SB1132; Medium Power Transistor (SOT89)

(1) Base
 (2) Collector
 (3) Emitter

2SK3018T106; Small Switching (UMT3)

(1) Source
 (2) Gate
 (3) Drain

KTC8550; PNP Transistor(SOT23)

KTC8050; NPN Transistor(SOT23)

2N3906; PNP Transistor(SOT23)

2N3904; NPN Transistor (SOT23)

DTC114EUA; 100mA / 50V
Digital transistors (SOT23)

DTC343TK; NPN Transistor
(SMT3)

BSS123; N-Channel FET
(SOT23)

2SA1037AKR; General Purpose
Transistor (SMT3)

2SC5866; Medium Power Transistor
(TSMT3)

AF4835; P-Channel Mosfet(SO8)

Pin Name	Description
S	Source
G	Gate
D	Drain

FQPF13N50C; N-Channel
Mosfet (TO-220F)

DMN3033LSN; N-Channel
Mosfet (SOT-23)

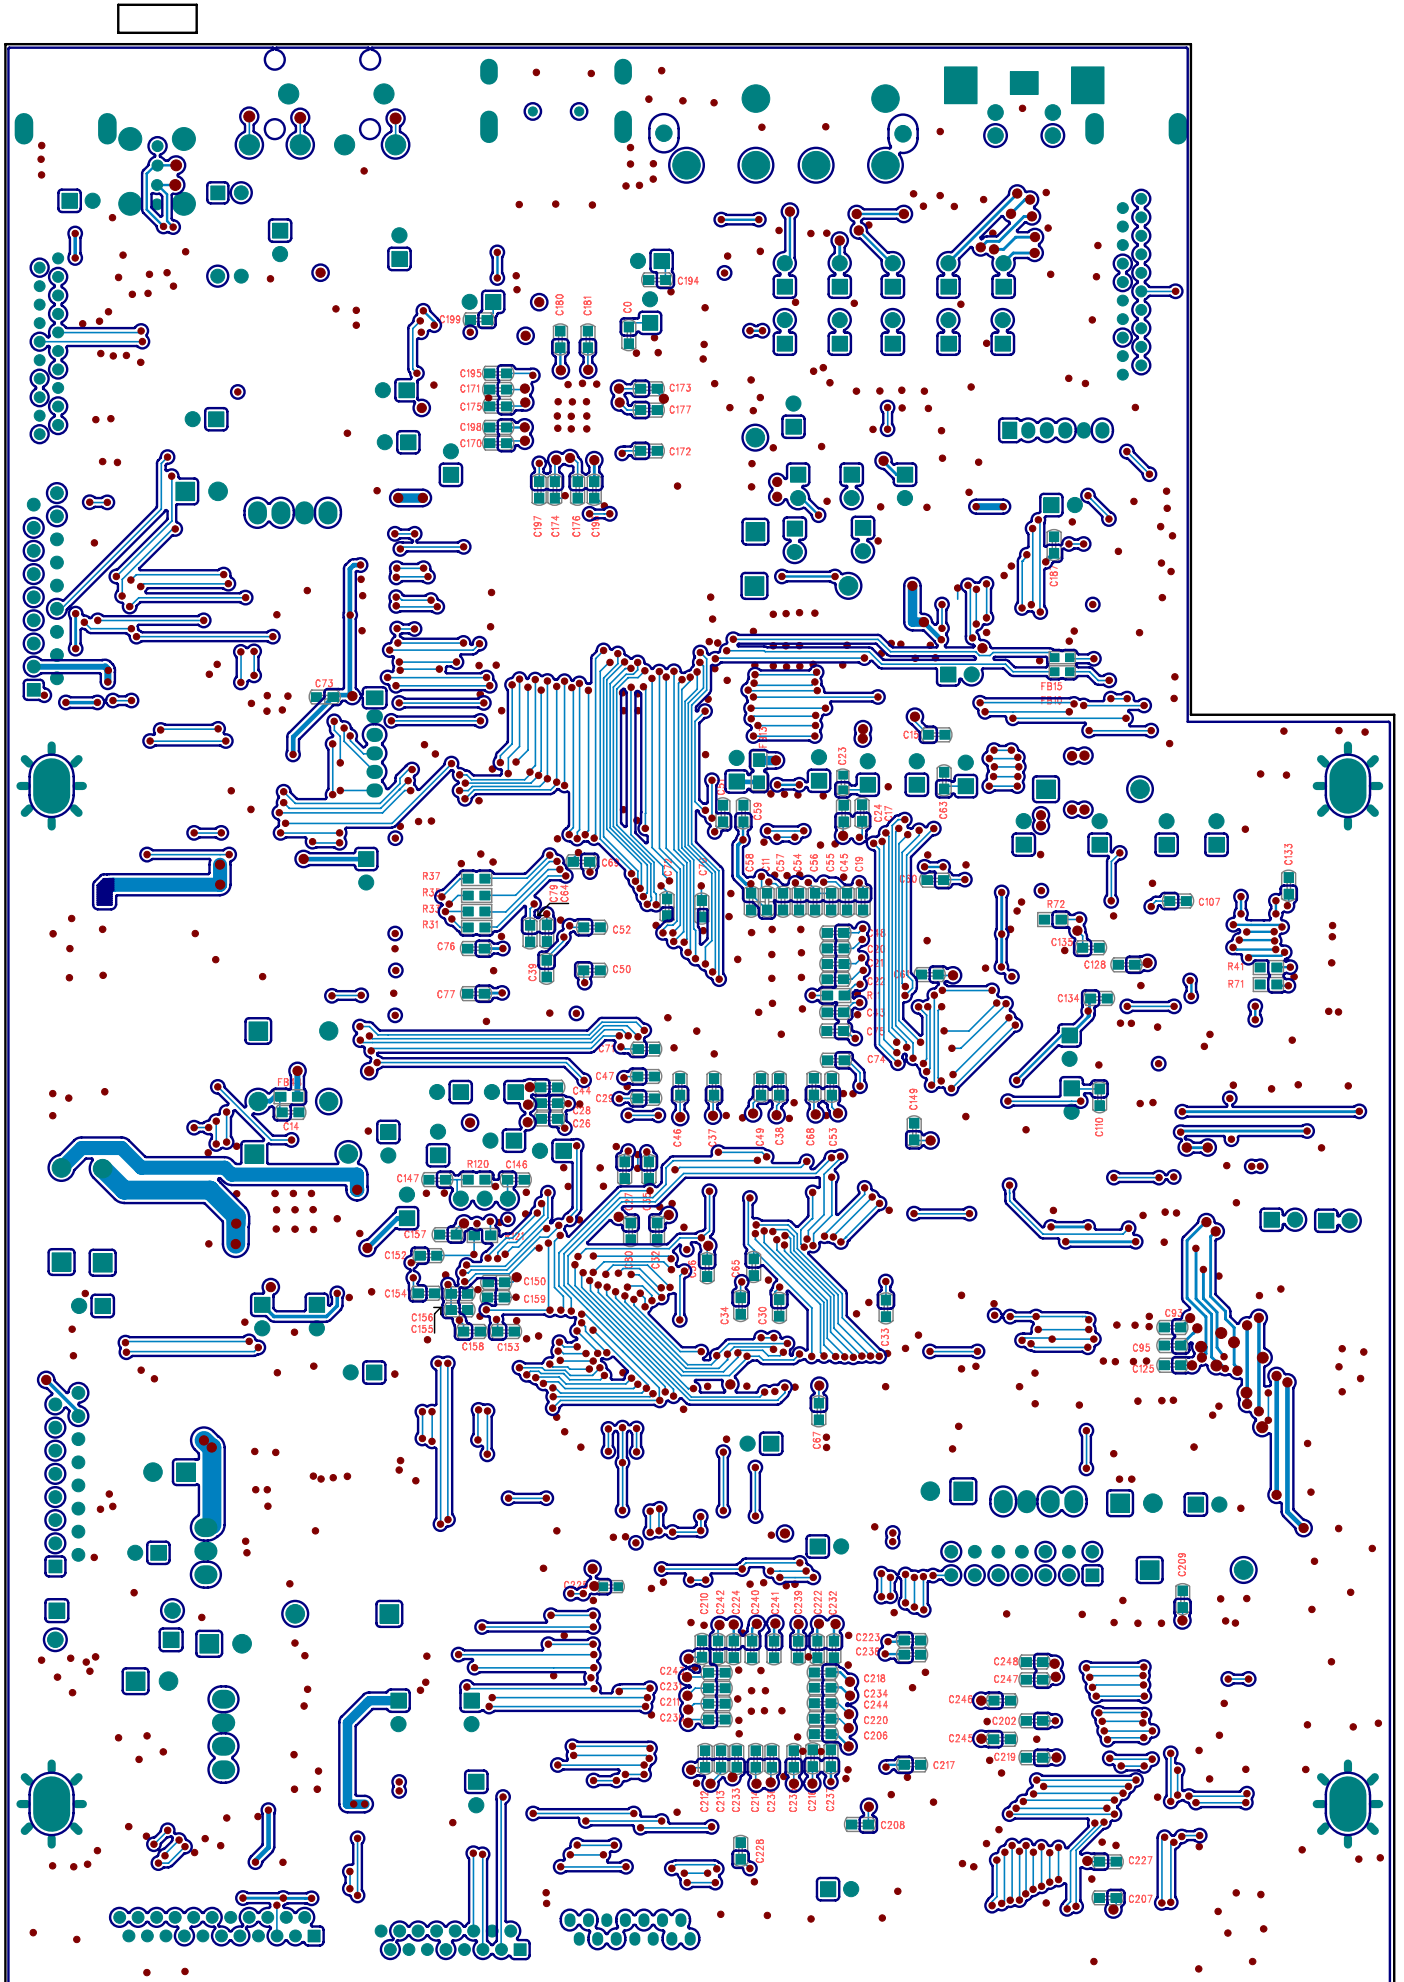

FDPF18N50; 500V N-Channel
MOSFET(TO-220)

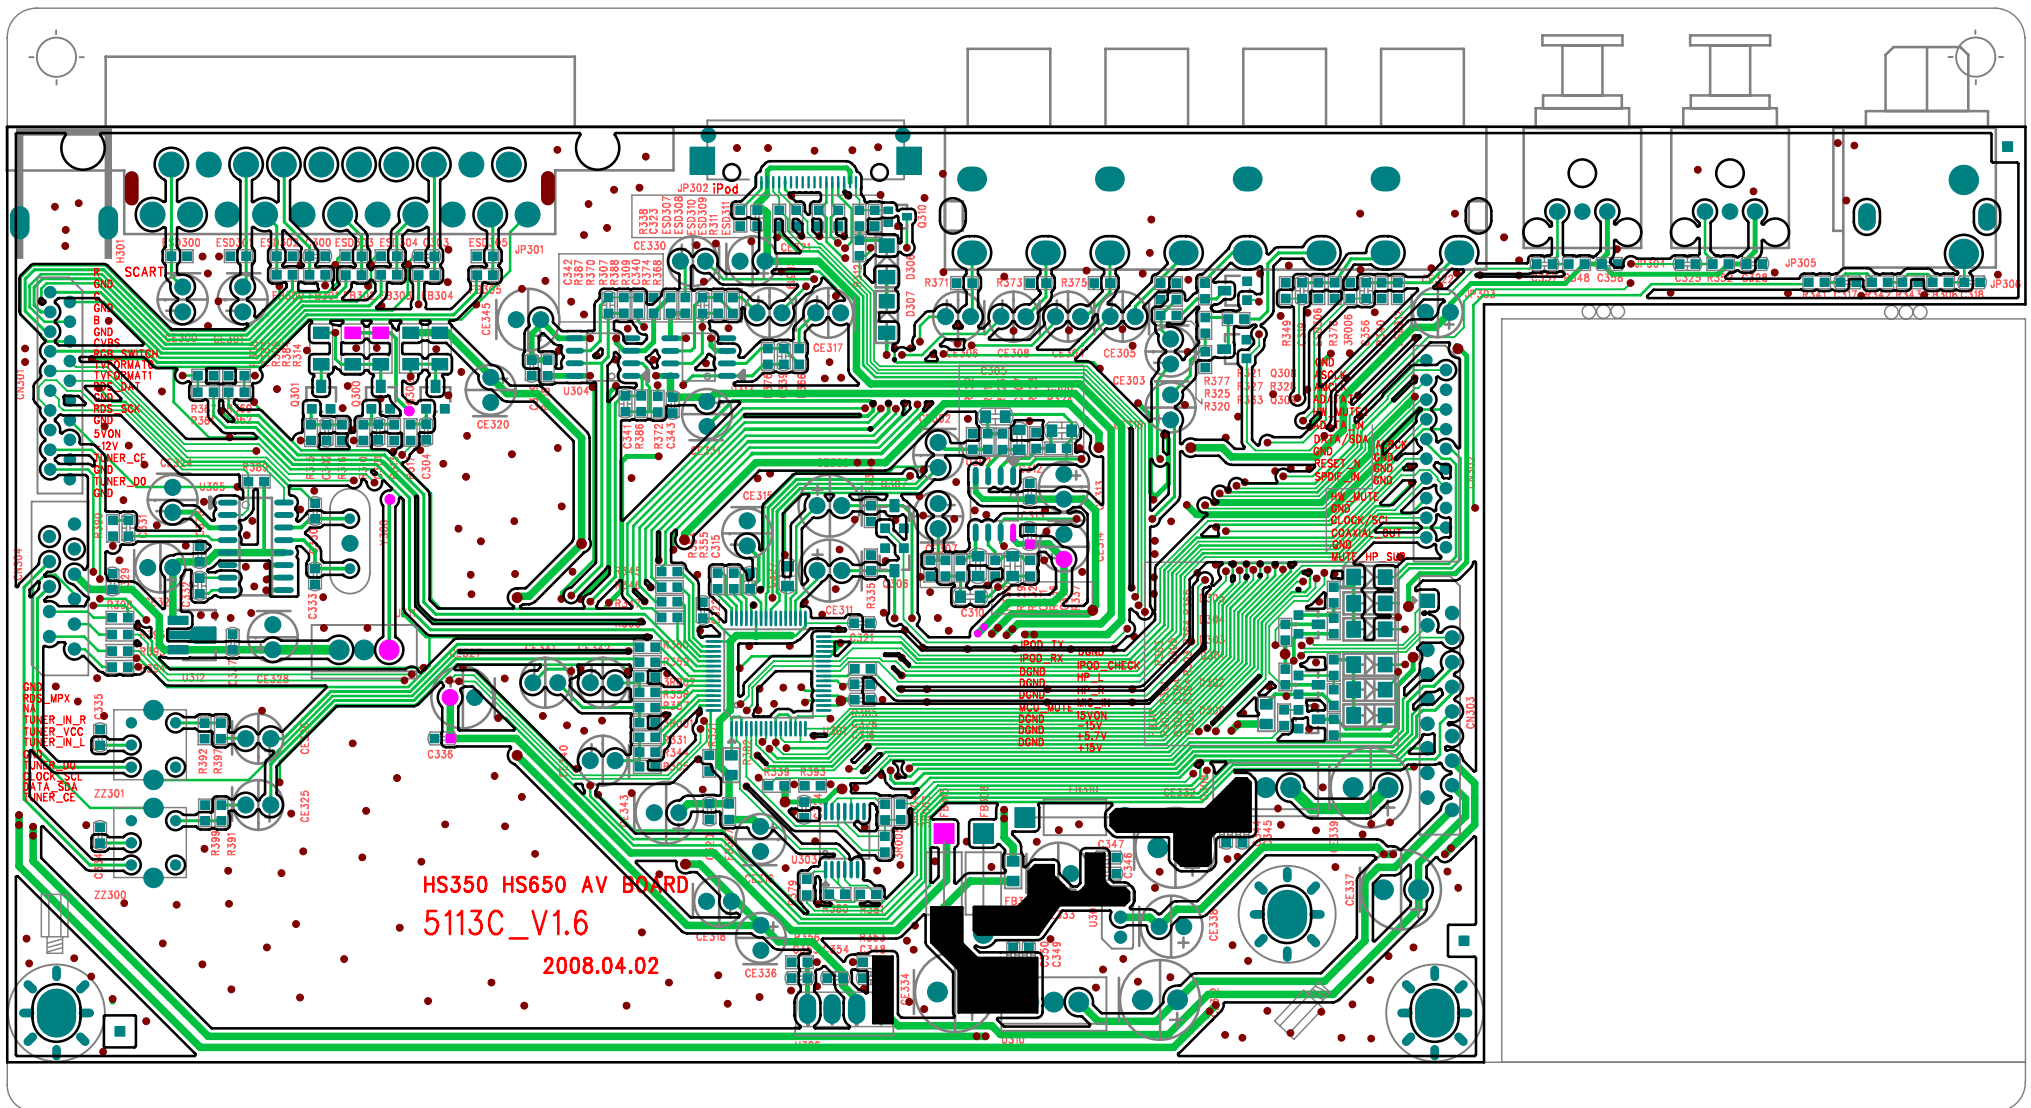

FQPF7N80C ;800V N-Channel
MOSFET(TO-220)

NO.	REVISION DATE	REV	REVISION HISTORY		
1	Mar 20, 2007	1.0	1. initial version.		
2	May 5, 2007	1.1	1. change U204 from TPS78601DCQR to BA00HC5FP. 2. add pull-up R11 for TUNER_CE. 3. change I2C2 -> I2C1 on CN4, ASIC_TEST -> SCL2 and EXTA16/ASIC -> SDA2 on CN3.	4. add MUTE_AMP circuit for amplifier board. 5. change ADC from PORTB to PORTA of AK3683. 6. pin2 of U18 change to float in order to improve the playability.	7. update DSP page, add SN74LVC823APW, change the Flash to top boot type.
3	June 5, 2007	1.2	1. change R240 R241 to N/A, install R655 CE621. 2. improve iPod noise issue, related components: Q310, 3R007, 3R008, 3R009, 3R010, 3R012, 3R013, FB314, C308, C309, C339, C340, C341, C342, C359, C360, CE345, D308, R307, R309, R311, R312, R318, R340, R348, R366, R368, R370, R372, R374, R376, R386, R387, R388. 3. change R393 in order to fix analog input no sound issue. 4. change DSP Flash from top boot type to bottom boot type. 5. change MUTE_DSP to DSP_MUTE on mainboard, change front panel MCU_MUTE to FPMCU_MUTE. 6. add FB10/FB15 on I2C which go to CPLD, add FB17(0 ohm)/FB19(0 ohm) on I2C which go to CN8, they are for avoiding misoperation.	7. change R385->0R, R205->0R, R206->150R, R207->0R, in order to fix amp output noise. 8. CN402/CN703/CN704/CN702/CN602 -> 180 degree + pin X-turn. 9. the power supply for AV board was changed to come from mainboard, that can cancel one flat cable which close to the high-voltage heatsink on SMPS board, CN7/CN303(12pin-1.0mm -> 18pin-1.25mm), CN6(12pin-1.25mm -> 16pin-1.25mm). 10. change MUTE LOGIC CIRCUIT on mainboard, change CN4(14pin-1.0mm -> 16pin-1.0mm). 11. add mute circuit on speaker board, change CN901(5pin-1.0mm -> 8pin-1.0mm).	12. amplifier board: change subwoofer mute circuit, add discharge circuit for fixing the noise cause by plug out AC cord, change CN404(5pin-1.0mm -> 8pin-1.0mm), CN401(14pin-1.0mm -> 16pin-1.0mm). 13. add R626/CE614 to fix random DC supply when power on, change R619 from 1.5k to 10R and R621 to N/A. 14. change MUTE_HP_SUB to MUTE_HP on AV board. 15. add mute circuit on speaker board.
4	Jan 31, 2008	1.4	1. change R58 from 0R to 1K to improve EMI issue from pick up. 2. R99 68R -> 75R, CE33 10uF->330uF, CE37 -> C249, to improve CVBS light noise and gain. 3. Exchange the pin order of CN3 4. Add C367, C644 to decrease the ripple voltage of +40V.	5. Add Relay K603 to replace FSA2257 to improve Heaphone THD, but FSA2257 still left, need to improve. 6. Change the coaxial 2 from C, D gate to E, F gate, add C324 to improve the crosstalk issue between coaxial 1 and coaxial 2.	7. Change CE322 ->100UF, add CE343 470UF, to improve the headphone THD.
