DISASSEMBLY

When inspecting, repairing and lubricating, disassemble the tape player in the following manner.

1. Removal of bottom case

Remove two screws holding bottom case as shown in Fig. 2.

2. Removal of upper case

Pull out function selector.

Remove two screws holding upper case as shown in Fig. 3, and the one screw holding chassis shown in Fig. 4.

Since the speaker and its wire are attached to this case, be careful not to cut wires accidentally.

3. Removal of circuit board

Remove two screws holding circuit board as shown in Fig. 4. Also remove one screw holding power transistor (tightened to the chassis with bolt and nut).

LUBRICATION

Oil the parts shown in Fig. 5 and 6.

NOTE: When lubricating be sure to keep the pressure roller, the tape contacting face of the capstan, belt and idler from oil. If oil is deposited on belt, idler, capstan, pressure roller and so on, they will slip. Be sure to wipe the oil with alcohol.
