Safety Precautions

1. This design of this product contains special hardware and many circuits and components specially for safety purposes. For continued protection, no changes should be made to the original design unless authorized in writing by the manufacturer. Replacement parts must be identical to those used in the original circuits. Services should be performed by qualified personnel only.
2. Alterations of the design or circuitry of the product should not be made. Any design alterations of the product should not be made. Any design alterations or additions will void the manufacturer's warranty and will further relieve the manufacture of responsibility for personal injury or property damage resulting therefrom.
3. Many electrical and mechanical parts in the products have special safety-related characteristics. These characteristics are often not evident from visual inspection nor can the protection afforded by them necessarily be obtained by using replacement components rated for higher voltage, wattage, etc. Replacement parts which have these special safety characteristics are identified in the Parts List of Service Manual. Electrical components having such features are identified by shading on the schematics and by (Δ) on the Parts List in the Service Manual. The use of a substitute replacement which does not have the same safety characteristics as the recommended replacement parts shown in the Parts List of Service Manual may create shock, fire, or other hazards.
4. The leads in the products are routed and dressed with ties, clamps, tubings, barriers and the like to be separated from live parts, high temperature parts, moving parts and/or sharp edges for the prevention of electric shock and fire hazard. When service is required, the original lead routing and dress should be observed, and it should be confirmed that they have been returned to normal, after re-assembling.

5. Leakage current check (Electrical shock hazard testing)

After re-assembling the product, always perform an isolation check on the exposed metal parts of the product (antenna terminals, knobs, metal cabinet, screw heads, headphone jack, control shafts, etc.) to be sure the product is safe to operate without danger of electrical shock.

Do not use a line isolation transformer during this check.

- Plug the AC line cord directly into the AC outlet. Using a "Leakage Current Tester", measure the leakage current from each exposed metal parts of the cabinet, particularly any exposed metal part having a return path to the chassis, to a known good earth ground. Any leakage current must not exceed 0.5mA AC (r.m.s.)

● Alternate check method

Plug the AC line cord directly into the AC outlet. Use an AC voltmeter having, 1,000 ohms per volt or more sensitivity in the following manner. Connect a 1,500 Ω 10W resistor paralleled by a 0.15 μ F AC-type capacitor between an exposed metal part and a known good earth ground.

Measure the AC voltage across the resistor with the AC voltmeter.

Move the resistor connection to each exposed metal part, particularly any exposed metal part having a return path to the chassis, and measure the AC voltage across the resistor. Now reverse the plug in the AC outlet and repeat each measurement voltage measured any must not exceed 0.75 V AC (r.m.s.). This corresponds to 0.5 mA AC (r.m.s.).

Warning

1. This equipment has been designed and manufactured to meet international safety standards.
2. It is the legal responsibility of the repairer to ensure that these safety standards are maintained.
3. Repairs must be made in accordance with the relevant safety standards.
4. It is essential that safety critical components are replaced by approved parts.
5. If mains voltage selector is provided, check setting for local voltage.

⚠ CAUTION Burrs formed during molding may be left over on some parts of the chassis. Therefore, pay attention to such burrs in the case of preforming repair of this system.

■ Importance Administering point on the Safety

J ONLY

Full Fuse Replacement Marking

Graphic symbol mark
(This symbol means fast blow type fuse.)

should be read as follows ;

FUSE CAUTION

FOR CONTINUED PROTECTION AGAINST RISK OF FIRE, REPLACE ONLY WITH SAME TYPE AND RATING OF FUSES ;

F9901 : 800mA, 250V

J SEULEMENT

Marquage Pour Le Remplacement Complet De Fusible

Le symbole graphique (Ce symbole signifie fusible de type à fusion rapide.)

doit être interprété comme suit ;

PRECAUTIONS SUR LES FUSIBLES

POUR UNE PROTECTION CONTINUE CONTRE DES RISQUES D'INCENDIE, REMPLACER SEULEMENT PAR UN FUSIBLE DU MEME TYPE ;

F9901 : 800mA, 250V

Important for Laser Products

- 1.**CLASS 1 LASER PRODUCT**
- 2.**DANGER** : Invisible laser radiation when open and interlock failed or defeated. Avoid direct exposure to beam.
- 3.**CAUTION** : There are no serviceable parts inside the Laser Unit. Do not disassemble the Laser Unit. Replace the complete Laser Unit if it malfunctions.
- 4.**CAUTION** : The compact disc player uses invisible laserradiation and is equipped with safety switches which prevent emission of radiation when the drawer is open and the safety interlocks have failed or are defeated. It is dangerous to defeat the safety switches.

- 5.**CAUTION** : If safety switches malfunction, the laser is able to function.
- 6.**CAUTION** : Use of controls, adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

Warnings, Cautions and Others /
Mises en garde, précautions et indications diverses

(For U.S.A.)

CAUTION
RISK OF ELECTRIC SHOCK

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE OR DISASSEMBLE THIS APPLIANCE. REFER TO THE SERVICE MANUAL FOR REPAIRING.

The lightning flash with arrowhead symbol, within an equilateral triangle is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

IDENTIFICATION AND CERTIFICATION LABEL

• PLACED ON EXTERIOR SURFACE

Notes:
1 The date of manufacture.
2 The ID code of manufacturing plant.

INFORMATION

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

For Canada/pour le Canada

CAUTION: TO PREVENT ELECTRIC SHOCK, MATCH WIDE BLADE OF PLUG TO WIDE SLOT, FULLY INSERT.
PRECAUTION: POUR EVITER LES CHOCs ELECTRIQUES, INTRODUIRE LA LAME LA PLUS LARGE DE LA FICHE DANS LA BORNE CORRESPONDANTE DE LA PRISE ET POUSSER JUSQU'AU FOND.

1. CLASS 1 LASER PRODUCT
2. **DANGER:** invisible laser radiation when open and interlock failed or defeated. Avoid direct exposure to beam.
3. **CAUTION:** Do not open the top cover. There are no user serviceable parts inside the unit; leave all servicing to qualified service personnel.

1. **PRODUIT LASER CLASSE 1**
2. **ATTENTION:** Radiation laser invisible quand l'appareil est ouvert ou que le verrouillage est en panne ou désactivé. Eviter une exposition directe au rayon.
3. **ATTENTION:** Ne pas ouvrir le couvercle du dessus. Il n'y a aucune pièce utilisable à l'intérieur. Laisser à un personnel qualifié le soin de réparer votre appareil.

CAUTION

To reduce the risk of electrical shocks, fire, etc.:
1. Do not remove screws, covers or cabinet.
2. Do not expose this appliance to rain or moisture.

ATTENTION

Afin d'éviter tout risque d'électrocution, d'incendie, etc.:
1. Ne pas enlever les vis ni les panneaux et ne pas ouvrir le coffret de l'appareil.
2. Ne pas exposer l'appareil à la pluie ni à l'humidité.

Caution — POWER switch!

Disconnect the mains plug to shut the power off completely. The POWER switch in any position does not disconnect the mains line. The power can be remote controlled.

Attention — Commutateur POWER!

Déconnecter la fiche de secteur pour couper complètement le courant. Le commutateur POWER ne coupe jamais complètement la ligne de secteur, quelle que soit sa position. Le courant peut être télécommandé.

Thank you for purchasing the JVC Ultra Compact Component System. We hope it will be a valued addition to your home, giving you years of enjoyment. Be sure to read this instruction manual carefully before operating your new stereo system. In it you will find all the information you need to set up and use the system. If you have a query that is not answered by the manual, please contact your dealer.

Features

- Here are some of the things that make your System both powerful and simple to use.
- The controls and operations have been redesigned to make them very easy to use, freeing you to just enjoy the music.
 - With JVC's **COMPU PLAY** you can turn on the System and automatically start the Radio or CD Player with a single touch.
 - The System incorporates Active Hyper Bass Super PRO circuitry to faithfully reproduce low frequency sounds.
 - A 45-station preset capability (30 FM and 15 AM) in addition to auto-tune and manual tuning.
 - Versatile CD options include repeat, random and program play.
 - Timer functions: set the system to automatically come on, switch off.
 - You can connect various external units, such as an MD recorder, tape deck, etc.

How This Manual Is Organized

- Basic information that is the same for many different functions - e.g. setting the volume - is given in the section 'Common Operations', and not repeated under each function.
 - The names of buttons/controls and display messages are written in all capital letters: e.g. TUNER BAND, "NO DISC".
 - System functions are written with an initial capital letter only: e.g. Normal Play.
- Use the table of contents to look up specific information you require.
- We've enjoyed making this manual for you, and hope it serves you in enjoying the many features built into your System.

IMPORTANT CAUTIONS

- 1. Installation of the System**
 - Select a place which is level, dry and neither too hot nor too cold. (Between 5°C and 35°C or 41°F and 95°F.)
 - Leave sufficient distance between the System and a TV.
 - Do not use the System in a place subject to vibrations.

2. Power cord

- Do not handle the power cord with wet hands!
- Some power (5W) is always consumed as long as the power cord is connected to the wall outlet.
- When unplugging the System from the wall outlet, always pull the plug, not the power cord.

3. Malfunctions, etc.

- There are no user serviceable parts inside. In case of system failure, unplug the power cord and consult your dealer.
- Do not insert any metallic object into the System.

Specifications	16

Getting Started

Accessories

Check that you have all of the following items, which are supplied with the System.

- Power Cord (1)
- AM Loop Antenna (1)
- Remote Control (1)
- Batteries (2)
- FM Wire Antenna (1)
- Speaker Cords (2)

If any of these items are missing, contact your dealer immediately.

How To Put Batteries In the Remote Control

Match the polarity (+ and -) on the batteries with the + and - markings in the battery compartment.

CAUTION: Handle batteries properly.

- To avoid battery leakage or explosion:
- Remove batteries when the Remote Control will not be used for a long time.
 - When you need to replace the batteries, replace both batteries at the same time with new ones.
 - Don't use an old battery with a new one.
 - Don't use different types of batteries together.

Using the Remote Control

The Remote Control makes it easy to use many of the functions of the System from a distance of up to 7m (23 feet) away. You need to point the Remote Control at the remote sensor on the System's front panel.

CAUTION: Make all connections before plugging the System into an AC power outlet.

Connecting the FM Antenna

Using the Supplied Wire Antenna

Using the Coaxial Type Connector (Not Supplied)

A 75-ohm antenna with coaxial type connector should be connected to the FM 75-ohm COAXIAL terminal.

If reception is poor, connect the outside antenna.

Note: Before attaching a 75 ohm coaxial lead (the kind with a round wire going to an outside antenna), disconnect the supplied FM Wire Antenna.

CAUTION: To avoid noise, keep antennas away from the System, the connecting cord and the AC power cord.

Connecting the AM Antenna

AM loop antenna (Supplied)

Attach the AM loop to its base by snapping the tabs on the loop into the slot in the base.

Turn the loop until you have the best reception.

CAUTION: Make all connections before plugging the System into an AC power outlet.

Connecting the Speakers

1. Open the Speaker terminals on the rear of the Unit, and on the Speakers themselves.
2. Connect the speaker cords between the terminals as shown below.

CAUTION: A TV may display irregular colors if located near the speakers. If this happens, set the speakers away from the TV.

Removing the speaker grilles

The speaker grilles can be removed.

1. Insert your fingers at the top and pull towards you.
2. Also pull the bottom towards you.

When Attaching the speaker grille

Connecting an MD Recorder/Tape Deck

Connect (optional) signal cords between the System's MD/TAPE IN/OUT terminals and the output/input terminals of the external MD recorder, tape deck, etc.

You can then listen to the external source through the System, or record the System's CD player or tuner to the external unit.

CAUTION: Make all connections before plugging the System into an AC power outlet.

Connecting Auxiliary Equipment

Connect an (optional) signal cord between the AUX terminals on the System and the output terminals of your auxiliary equipment, (e.g. turntable). You can listen to this source.

Connecting an MD Recorder, etc (Digital Output)

Unplug the cap and connect an (optional) optical digital cord between the System's OPTICAL DIGITAL OUT terminal and the input terminal of the MD recorder, etc. You can record the digital output signal from the System's CD Player to the MD recorder, etc.

Connecting a Subwoofer System

Connect an (optional) signal cord between the SUB WOOFER OUT terminal and an external JVC subwoofer system, etc.

Connecting the AC Power Cord

Firmly insert the supplied AC power cord into the AC inlet on the back of the Unit.

The provided AC power cord for this unit has certain one-way direction connections to prevent electric shock. Refer to the illustration for correct connection.

CAUTIONS:

- ONLY USE THE JVC POWER CORD PROVIDED WITH THIS SYSTEM TO AVOID MALFUNCTION OR DAMAGE TO THE SYSTEM.
- BE SURE TO UNPLUG THE POWER CORD FROM THE OUTLET WHEN GOING OUT OR WHEN THE SYSTEM IS NOT IN USE FOR AN EXTENDED PERIOD OF TIME.

Now you can plug the AC power cord into the wall outlet, and your System is at your command!

COMPU PLAY

JVC's COMPU PLAY feature lets you control the most frequently used System functions with a single touch. With One Touch Operation you can play a CD, turn on the radio, or listen to an external equipment with a single press of the play button for that function. One Touch Operation turns the power on for you, then starts the function you have specified. If the System is not ready (no CD in place), the System still powers on so you can insert a CD.

How One Touch Operation works in each case is explained in the section dealing with that function.

The COMPU PLAY buttons are:

On the Unit

CD ▶ II button
TUNER BAND button
MD/TAPE button
AUX button

On the Remote Control

CD ▶ II button
TUNER BAND button
MD/TAPE button
AUX button

Common Operations

Turning the Power On and Off

Turning the System On

Press the POWER button.

The display comes on and the STANDBY indicator goes out. The System comes on ready to continue in the mode it was in when the power was last turned off.

- For example, if the last thing you were doing was listening to a CD, you are now ready to listen to a CD again. If you wish, you can change to another source.
- If you were listening to the Tuner last, the Tuner comes on playing the station it was last set to.

Turning the System Off

Press the POWER button again.

The STANDBY indicator lights up and the display is blank, except for the clock display.

Adjusting the Brightness (DIMMER)

You can adjust the brightness of the display. To make the display brighter, press the DIMMER button on the Remote Control.

To make the display darker, press the DIMMER button on the Remote Control again.

- The brightness of the volume illumination is also adjusted. In Standby mode, the normal brightness is the same as the darker brightness for the powered System. When you press the DIMMER button in Standby mode, the brightness becomes further darker.

In standby mode, the volume illumination does not light.

- Some power (SW) is always consumed even though power is turned off (called Standby Mode).
- To switch off the System completely, unplug the AC power cord from the AC outlet. When you unplug the AC power cord, the clock will be reset to AM 12:00 after about 20 minutes, and preset Tuner stations will be erased after about 24 hours.

Adjusting the Volume

Turn the VOLUME control of the Unit clockwise to increase the volume or counterclockwise to decrease it.

OR

With the System turned on, press the VOLUME + button on the Remote Control to increase the volume or press the VOLUME - button to decrease it.

CAUTION: DO NOT turn on the System and/or start playing any source without first setting the VOLUME control to minimum, as a sudden blast of sound could damage your hearing, speakers and/or headphones.

For private listening

Connect a pair of headphones to the PHONES jack. No sound comes out of the speakers. Be sure to turn down the volume before connecting or putting on headphones.

Reinforcing the Bass Sound (AHB SUPER PRO)

You can reinforce the bass sound to maintain rich, full bass at low volume (you can use this effect only for Playback).

To get the effect, press the AHB (Active Hyper Bass) SUPER PRO button on the Unit or the Remote Control.

The "BASS" indicator lights up on the display.

To cancel the effect, press the button again.

The "BASS" indicator goes out.

Tone Control (BASS/TREBLE)

You can control the tone by changing the bass and treble.

BASS Control

You can adjust the bass level (low frequency range level) between -6 and 6. (0: Flat)

1 Press the BASS button on the Remote Control.

2 Press the UP or DOWN button on the Remote Control to adjust the bass level.

TREBLE Control

You can adjust the treble level (high frequency range level) between -6 and 6. (0: Flat)

1 Press the TREBLE button on the Remote Control.

2 Press the UP or DOWN button on the Remote Control to adjust the treble level.

Showing the Time (DISPLAY)

In addition to a standard digital clock, an analogue clock (which advances every five minutes) can be displayed. The clock display order varies according to the System mode:

In Standby mode

Every time you press the DISPLAY button on the Remote Control (or the CLOCK button on the Unit), the clock display changes as shown below.

Digital Clock + Analogue Clock → Analogue Clock → Digital Clock → (back to the beginning)

When the System is turned on

Every time you press the DISPLAY button on the Remote Control (or the CLOCK button on the Unit), the time display changes as follows:

Current Source + Analogue Clock → Analogue Clock → Digital Clock → (back to the beginning)

Note: The clock must be set to the correct time first. (See "Setting the Clock" on page 13.)

Using the Tuner

When the System is in use, the display shows other items as well. For simplicity, we show here only the items described in this section. the desired preset number. After 1 second the display will show the preset number's band and frequency. Example: Press the UP button until the preset number 12 "P-12" appears.

One Touch Radio

Just press the TUNER BAND button to turn on the System and start playing the station you were last tuned to.

1 You can switch from any other sound source to the radio by pressing the TUNER BAND button.

Tuning in a Station

Press the TUNER BAND button.

The Band and Frequency you were last tuned to appear on the display.

(If the last station was selected using the preset number, the preset number appears first.)

Each time you press the button, the band alternates between FM and AM.

2 Select a station using one of the following methods.

Manual Tuning

Press the UP or DOWN button on the Unit or the Remote Control repeatedly to move from frequency to frequency until you find the station you want.

OR

Auto Tuning

If you press and hold the UP or DOWN button on the Unit or the Remote Control for one second or more, the frequency changes down, or up, automatically until a station is found.

OR

3 Preset Tuning using the Remote Control (Possible only after presetting stations)

Press the UP or DOWN button on the Remote Control to select

Presetting Stations

You can preset up to 30 FM stations and up to 15 AM stations using the Remote Control.

Note: Preset numbers may have been set to factory test frequencies prior to shipment. This is not a malfunction. You can preset the stations you want into memory by following one of the presetting methods below.

Manual Presetting

1 Select a band by pressing the TUNER BAND button.

2 Press the UP or DOWN button to tune in a station.

3 Press the SET button.

"P-12" is displayed. The lower 2 digits blink.

Press the UP, DOWN, >, or < button to select the preset number.

- UP button: Increases the preset number by 1.
- DOWN button: Decreases the preset number by 1.
- > button: Increases the preset number by ten.
- < button: Decreases the preset number by ten.

Press the SET button.

After 1 second, the display returns to the broadcast frequency display.

Repeat above steps 1 to 5 for each station you want to store in memory with a preset number.

To cancel during presetting, press the CANCEL button in step 3 or 4.

To change the preset stations, repeat the same steps as above.

Auto Presetting

In each band, you can automatically preset FM-30, AM-15 stations. Preset numbers will be allocated as stations are found, starting from the lowest frequency and moving up the frequency.

Select a band by pressing the TUNER BAND button.

Press the AUTO PRESET button on the Remote Control for more than two seconds.

Repeat steps 1-2 for the other band.

If you want to change the preset stations, carry out the Manual Presetting for the desired preset numbers.

CAUTION: If the System is unplugged or if a power failure occurs, the preset stations will be erased after about 24 hours. If this happens, you will need to preset the stations again.

To Change the FM Reception Mode

When you are tuned into an FM stereo broadcast, the "ST (Stereo)" indicator lights up and you can hear stereo effects. If an FM stereo broadcast is hard to receive or noisy, you can select Monaural mode. Reception improves, but you lose any stereo effect.

Press the FM MODE button on the Remote Control so that the "MONO" indicator lights up on the display.

To restore the stereo effect, press the FM MODE button on the Remote Control so that the "MONO" indicator goes off.

Using the CD Player

When the System is in use, the display shows other items as well. For simplicity, we show here only the items described in this section.

CAUTION: DO NOT try to close the CD holder by hand as it will be damaged.

You can use Normal, Random, Program or Repeat Play. Repeat Play can repeat all the tracks or just one of the tracks on the CD.

Here are the basic things you need to know to play a CD and locate the different tracks on it.

The Quickest Way To Start a CD Is With the One Touch Operation

- Press the CD > II button.
- The power is automatically turned on. If a CD is already inserted, it will start playing from the first track.
- If no CD is inserted, "NO DISC" appears on the display and the CD Player remains in Stop mode.

To Insert a CD

Press the OPEN/CLOSE > button (or the CD > button on the Remote Control).

The CD holder opens.

Place a CD, with its label side up as shown below.

Press the > button again to close the CD holder.

- You can place an 8 cm (3") CD without an adaptor.
- If the CD cannot be read correctly (because it is scratched, for example), "00 00000" appears on the display.

Basics of Using the CD Player - Normal Play

To Play a CD

Insert a CD.

Press the CD > II button.

The Play (▶) indicator lights up on the display and the first track of the CD begins playing.

The CD Player automatically stops when the last track of the CD has finished playing.

To stop playing the CD, press the ■ button on the Unit or the Remote Control.

The following information for the CD is displayed.

To stop playing and remove the CD, press the ■ button to open the CD holder.

To pause, press the CD > II button. The Pause (II) indicator will light up on the display.

To cancel pause, press the same button again. Play continues from the point where it was paused.

To Select a Track or Passage within a Track

During playback, press the ◀ or ▶ button on the Unit or the Remote Control to select the track you want. The selected track starts playing.

Listening to External Equipments

When the System is in Standby mode, the System is automatically turned on.
"AUX" appears on the display.

- Start playing the auxiliary equipment.
- Adjust the VOLUME control to the desired listening level.
- Apply sound effects, if you wish.
 - Press the AHB Super PRO button to reinforce the bass sound.
 - Press the BASS/TREBLE button to control the tone.
 - (See "Tone Control" on page 7.)

To exit AUX mode
You will automatically switch out of AUX mode when you select other source.

Note: For operation of the auxiliary equipment, refer to its own Instructions.

Listening to an External MD Recorder/Tape Deck

You can play an external MD recorder, tape deck, etc. through the system.
First make sure that the external equipment is properly connected to the System. (See page 4).

- Set the VOLUME control to minimum.
- Press the MD/TAPE button.
 - When the System is in Standby mode, the System is automatically turned on.
 - "MD/TAPE" appears on the display.

- Start playing the external equipment.
- Adjust the VOLUME control to the desired listening level.

- Apply sound effects, if you wish.
 - Press the AHB Super PRO button to reinforce the bass sound.
 - Press the BASS/TREBLE button to control the tone.
 - (See "Tone Control" on page 7.)

To exit MD/TAPE mode
You will automatically switch out of MD/TAPE mode when you select another source.

Note: You can also record the System's output signal to the external equipment. For operation, refer to the equipment's own instructions.

Listening to Auxiliary Equipment

You can listen to a turntable or other auxiliary equipment.
First make sure that the external equipment is properly connected to the System. (See page 5).

- Set the VOLUME to minimum position.
- Press the AUX button.

To cancel the programming before playing, press the CANCEL button in above step 4, 5 or 6.
To confirm the programmed tracks, press the PROGRAM button; the tracks making up the program will successively be displayed in the programmed order.

To stop playing, press the ■ button once.
To delete all the tracks in a program, press the ■ button (or the CANCEL button on the Remote Control) while the CD Player is stopped. The "PRGM" indicator goes out and the program is deleted. Normal Play is resumed.
The program will also be deleted when you press the ▲ button to open the CD holder.

Note: If the total playback time of the programmed tracks exceeds 99 minutes 59 seconds, the total playback time will go out on the display.

Random Play

The tracks will play in no special order when you use this mode.

Press the RANDOM button on the Remote Control.
Playback automatically starts and the "RADM" indicator lights up on the display.

To skip a track during playback, press the ►► button to jump to the next track in the random sequence. Press the ◄◄ button to jump back to the start of a track being played.
To cancel random play, press the RANDOM button again. The "RADM" indicator goes out and Normal Play is resumed.

Repeating Tracks

You can set the program or individual track playing to repeat as many times as you like.

Press the REPEAT button on the Remote Control.
The Repeat indicator changes with each press of the button, as shown below.
C → C ALL → blank display → (back to the beginning)

C : Repeats one track.
In Random Play mode, this indicator is skipped
C ALL : In Normal Play mode, repeats all the tracks.
In Program Play mode, repeats all the tracks in the program.
In Random Play mode, repeats all the tracks in random order.
To exit Repeat mode, press the REPEAT button until the Repeat indicator on the display goes out

- Press the ►► button once to skip to the beginning of the next track.
- Press the ◄◄ button to skip to the beginning of the track being played. Press twice quickly to skip to the beginning of the previous track.

Search Play

Holding down the ◄◄ or ►► button on the Unit or the Remote Control, during playback, will fast forward/backwards the CD so you can quickly find a particular passage in the track you are listening to.

Programming the Playing Order of the Tracks

You can program the playing order of the tracks using the Remote Control.
You can program up to 20 tracks in any desired order.
You can only make a program when the CD Player is stopped.

- Insert a CD.
- Press the CD ► button.
- Press the ■ button to stop the CD.
- Press the PROGRAM button.

The System enters the programming mode and the "PRGM" indicator lights up.

- Press the UP, DOWN, ►, or ◄ button to select the track to program.
 - UP button: Increases the track number by 1.
 - DOWN button: Decreases the track number by 1.
 - > button: Increases the track number by ten.
 - < button: Decreases the track number by ten.
- Example: for track 2, press the UP button twice. For track 12, press the > button, then press the UP button twice (or simply press the UP button 12 times).

Press the SET button.

Total playback time of the programmed tracks

- Repeat steps 5 and 6 to select the other tracks for the program.
- You can see the total playback time of programmed tracks on the display.

- Press the CD ► button.
- The System plays the tracks in the order you have programmed them.
- You can skip to a particular program track by pressing the ◄◄ or ►► button during Program Play.

Using the Timers

When the System is in use, the display shows other items as well. For simplicity, we show here only the items described in this section.

Press the POWER button to turn on the System.

Setting the ON time (Example: PM 12:15)

1. Press the TIMER/SNOOZE button on the Unit.
The Timer indicator lights up and the current ON time blinks on the display.

2. Press the $\blacktriangle$ or $\blacktriangleleft$ button on the Unit to set the time you want the Unit to come on.
Pressing the $\blacktriangle$ button moves the time forwards and pressing the $\blacktriangleleft$ button moves the time backwards. Hold down the button to move the time in 10-minute intervals.

Setting the OFF time (Example: PM 1:15)

1. Press the TIMER/SNOOZE button on the Unit.
The current OFF time blinks on the display.

2. Press the $\blacktriangle$ or $\blacktriangleleft$ button on the Unit to set the time you want the Unit to be turned off.
Pressing the $\blacktriangle$ button moves the time forwards and pressing the $\blacktriangleleft$ button moves the time backwards. Hold down the button to move the time in 10-minute intervals.

Selecting the music source

1. Press the TIMER/SNOOZE button on the Unit.
"TUNER" blinks on the display.

Setting the Clock

You can set the clock whether the System is on or off.

Notes:

- The clock must be correctly set for the timers to work.
- The procedure must be completed within two minutes. Otherwise, the setting is cleared and must be repeated from the beginning.

Press the CLOCK button on the Unit for more than two seconds.

The clock rapidly blinks.

Press the $\blacktriangleleft$ or $\blacktriangle$ button on the Unit to set the time.

Pressing the $\blacktriangle$ button moves the time forwards and pressing the $\blacktriangleleft$ button moves it backwards. Hold down the button to move the time in 10-minute intervals.

Press the CLOCK button.

- The selected time is set and the seconds start counting from 0. Each time the hour's digits change from 11 to 12, the display alternates between AM and PM. (12 midnight is indicated as "AM 12:00" and 12 noon is indicated as "PM 12:00".)

CAUTION: If there is a power failure, the clock loses its setting after about 20 minutes. The display shows "AM 12:00" and blinks, and the clock must be reset.

Note: The clock may gain or lose one to two minutes per month.

Setting the Daily Timer

You can set the timer whether the System is on or off.

Once you have set the Daily Timer, the timer will be activated at the same time every day. It can be cancelled and re-activated whenever you wish.

The Timer indicator on the display shows when the Daily Timer you have set is in effect.

Note: Perform each setting within 30 seconds. Otherwise, the setting is cleared and the procedure must be repeated from the beginning.

Setting the SLEEP Timer

Use the Sleep Timer to turn the System off after a certain number of minutes when it is playing. By setting the Sleep Timer, you can fall asleep to music and know that your System will turn off by itself rather than play all night.

- You can only set the Sleep Timer when the System is on and a source is playing.

Play a CD or tune in to the desired station.

Press the SLEEP button on the Unit or the Remote Control.

The "SLEEP" indicator lights up.

Set the length of time you want the source to play before shutting off.

- Each time you press the SLEEP button, it changes the number of minutes shown on the display in this sequence:

→ 30 → 60 → 90 → 120 → Cancelled → (back to the beginning)

After setting the number of minutes for the Sleep Timer, the display will stop blinking after 5 seconds and return to the display as before setting the Sleep Timer.

The System is now set to turn off after the number of minutes you set.

To Confirm the Sleep Time

When the SLEEP button is pressed, the remaining sleep time is displayed. Wait for 5 seconds until the display returns to the original display.

To Cancel the SLEEP Timer Setting

Press the SLEEP button until the "SLEEP" indicator goes off on the display.

- If you are setting the Daily Timer, the System will be turned on at the set time to wake you up.

Troubleshooting

- If you are having a problem with your System, check this list for a possible solution before calling for service.
- If you cannot solve the problem from the hints given here, or the System has been physically damaged, call a qualified person, such as your dealer, for service.

Symptom	Possible Cause	Action
No sound is heard.	• Connections are incorrect, or loose. • Headphones are connected.	• Check all connections and make corrections. (See pages 4 - 5). • Disconnect the headphones.
Poor radio reception	• The antenna is disconnected. • The AM Loop Antenna is too close to the System. • The FM Wire Antenna is not properly extended and positioned.	• Reconnect the antenna securely. • Change the position and direction of the AM Loop Antenna. • Extend FM Wire Antenna to the best reception position.
The CD skips.	The CD is dirty or scratched.	Clean or replace the CD.
The CD does not play.	The CD is upside down.	Put the CD in with the label side up.
Unable to operate the Remote Control.	• The path between the Remote Control and the sensor on the Unit is blocked • The batteries have lost their charge.	• Remove the obstruction. • Replace the batteries.
Operations are disabled.	The built-in microprocessor has malfunctioned due to external electrical interference.	Unplug the System then plug it back in.

Specifications

Amplifier		
Output Power	13 watts per channel, min. RMS, at 4 ohms from 80Hz to 20kHz, with no more than 10% total harmonic distortion (for U.S.A.)	Dimensions 120 × 160 × 186 mm (W/H/D) (4-3/4" × 6-5/16" × 7-3/8") Approx. 1.5 kg (3.3 lbs)
	30 W (15 W + 15 W) at 4 ohms (Max.) (For Canada)	Mass 380 × 164 × 295 mm (W/H/D) (15" × 6-1/2" × 11-5/8") Approx. 6.0 kg (13.3 lbs)

Care And Maintenance

Handle your CDs carefully, and they will last a long time.

Compact Discs

- Only CDs bearing this mark can be used with this System. However, continued use of irregular shape CDs (heart-shape, octagonal, etc.) can damage the System.

- Remove the CD from its case by holding it at the edges while pressing the case's center hole lightly.
- Do not touch the shiny surface of the CD, or bend the CD.

- Put the CD back in its case after use to prevent warping.
- Be careful not to scratch the surface of the CD when placing it back in the case.
- Avoid exposure to direct sunlight, temperature extremes, and moisture.

- A dirty CD may not play correctly. If a CD does become dirty, wipe it with a soft cloth in a straight line from center to edge.

CAUTION: Do not use any solvent (for example, conventional record cleaner, spray thinner, benzene, etc.) to clean a CD.

Moisture Condensation

Moisture may condense on the lens inside the System in the following cases:

- After turning on heating in the room.
- In a damp room.
- If the System is brought directly from a cold to a warm place.

Should this occur, the System may malfunction. In this case, leave the System turned on for a few hours until the moisture evaporates, unplug the AC power cord, and then plug it in again.

- If there are fingerprints, etc. on the lens, gently wipe clean with a cotton swab.

Description of Major ICs

■UPD780204GF(IC701):System controller

1.Terminal Layout

2.Pin Function

Pin No.	Symbol	I/O	Function	Pin No.	Symbol	I/O	Function
1	VDD	-	Power supply.	29	SAFETY1	I	Detection 1 for abnormal power voltage.
2	STATUS	O	Status signal output to IC603.	30	SAFETY0	I	Detection 0 for abnormal power voltage.
3	XRESET	O	Reset signal output to IC603.	31	KEY1	I	Key control signal input 1.
4	MCLK	O	Clock signal output to IC603.	32	KEY0	I	Key control signal input 0.
5	MDATA	O	Command signal output to IC603.	33	VOLP	I	Voltage of volume position.
6	MLD	O	Load signal output to IC603.	34	AVDD	-	Power supply.
7	+BCTL	O	Switched 5V control.	35	AVREF	-	Power supply.
8	BEAT2	O	Main clock selector 2.	36	BASS	O	Bass control signal output.
9	BEAT1	O	Main clock selector 1.	37	TRE	O	Treble control signal output.
10	RESET	I	Reset signal input.	38	RDSCLK	I	Clock signal input from IC4.
11	X2	O	Main clock signal.	39	REM	I	Remote control signal input.
12	X1	I	Main clock signal.	40	VSS	-	Connect to GND.
13	IC(VPP)	-	Connect to VSS.	41	MT1	O	CD door motor control signal output.
14	XT2	O	Sub clock signal.	42	MT0	O	CD door motor control signal output.
15	XT1	I	Sub clock signal.	43	MTS	O	CD door motor speed (L=normal,H=slow).
16	VDD	-	Power supply.	44	FAUX1	O	Function AUX 1.
17	SCK	O	Serial clock output to IC317.IC2	45	FAUX2	O	Function AUX 2.
18	SDATA	O	Serial data output to IC317.IC2	46	VDD	-	Power supply.
19	STB	O	Strobe signal output to IC317.	47	L.O.MUTE	O	Line out mute signal output.
20	BUPC	O	Sub clock control	48	FTU	O	Function Tuner.
21	BUP	I	Distinction of backup power source (H=Backup).	49	MPX	I	Detection of FM stereo(L=stereo).
22	SQCK	O	Outside clock for sub-code Q resister output.	50	SMUTE	O	System mute(mute=L).
23	NC	-	Non connect.	51	POUT	O	Power ON/OFF.
24	SUBQ	I	Sub-code / Q-code input.	52~67	S23~S38	O	FL segment control output.
25	AVSS	-	Power supply.	68~78	S1~S11	O	FL segment control output.
26	PERIOD	O	Strobe of Tuner PLL.	79	VLOAD	-	Connect to -28V
27	DOOR	I	Door OPEN/CLOSE & REST SW detection.	80~90	S12~S22	O	FL segment control output.
28	SAFETY2	I	Detection 2 for abnormal power voltage.	91~100	8G~3G	O	FL grid control signal.

Removal of main parts

■ Removing the rear cover

1. Remove the six screws A retaining the rear cover from behind the body.
2. Remove the two screws B retaining the rear cover from upper the body.
3. Remove the two screws C retaining the rear cover from bottom the body.
4. After passing the lock pawls at the speaker terminals through the position in Fig 1 remove the rear cover.

Fig. 1

Fig. 2

■ Removing the side panel and ornament panel

1. Remove the rear cover.
2. Remove the two screws D retaining the side panel from right and left of body.
3. Remove the two screws E retaining the front panel assembly from the bottom. (See Fig 3)
4. The slide is done in the direction of the arrow and side panels is detached.
5. The slide is done in the direction of the arrow and the ornament panels is detached.

Fig. 3

* These parts are installed and rear cover is installed at the end assembly.

Fig. 4

■ Removing the CD player assembly

- 1.Remove the rear cover from behind the body.
- 2.Remove the side panels and ornament panels.
(L and R)
- 3.After removing the four screws F from behind the body, dismount the heat sink.
- 4.Remove the two screws G retaining the CD mechanism assembly from right and left of body.
- 5.Remove the one screw H retaining the tuner function amplifier P.C.Board.
- 6.Disconnect the connector from CN602,CN641 on the tuner function amplifier P.C.Board (See Fig 7).
- 7.Disconnect the card wire from CN603,CN604 on the CD servo control P.C.Board (See Fig 6).
- 8.Disconnect the connector from CN311 on the main board (See Fig 6-1).
- 9.Remove the CD player while pulling it out toward the rear side.

Then the connector CN872 connected to the connector CN781 on the FL display microcomputer P.C.Board of the front assembly will be disconnected at the same time.(See Fig 6-1)

- * To ensure easy assembly of the CD player assembly, temporarily remove the tuner function amplifier P.C.Board, and after mounting the CD player assembly, assemble the tuner function amplifier P.C.Board.

Fig. 5

Fig. 6

Fig. 6-1

Fig. 7

■ Removing the CD servo control P.C.Board

- 1.Remove the CD mechanism assembly.
- 2.Remove the four screws I on the CD servo control P.C.Board.
- 3.Disconnect the card wire from CN601 on the CD servo control P.C.Board.
- 4.Disconnect the connector from P011 on the Motor P.C.Board.

Fig. 8

Fig. 9

CD Traverse mechanism assembly

■ Removing the CD Traverse mechanism assembly

- 1.Remove the CD mechanism assembly.
- 2.Remove the CD servo control P.C.Board.
- 3.Remove the four screws J retaining the mechanism bracket from CD mechanism assembly.

■ Removing the CD motor drive P.C.Board

- 1.Remove the CD mechanism assembly.
- 2.Remove the CD servo control P.C.Board.
- 3.Remove the CD traverse mechanism assembly.
- 4.Disconnect the loading belt.

*At this time, the grease of the gear must not place to the loading belt.

- 5.Remove two screws K retaining the loading motor from CD mechanism assembly.

Fig. 10

■ **Removing the CD door assembly**
(See Fig 11.12)

Disengage the two engagement section on both the right and left sides of the CD door while expanding the sections outward.

Fig. 11

Fig. 12

■ **Removing the operation switch P.C.Board**
(See Fig 13.14)

- 1.Remove the top panel while expanding the right and left side hooks outward.
- 2.Remove the operation switch P.C.Board upward.

Fig. 13

Fig. 14

■ Removing the tuner function amplifier P.C.Board

1. Lift connection P.C.Board for above and extract from the connector.
2. Pull out backward and detach tuner function amplifier P.C.Board.

■ Removing the main board

1. Lift connection P.C.Board for above and extract from the connector.
2. Disconnect the connector and card wire from CN971.CN301.CN351 on the main board.
3. Disconnect the connector CN911 on the power supply P.C.Board.
4. Disconnect the earth wire CN391 on the main board.
5. Pull out backward and detach main board.

Connection P.C.Board

Fig. 15

Tuner function amplifier P.C.Board

Fig. 16

■ Removing the Front panel assembly

1. The volume knob is pulled out.
2. The front panel assembly is detached from the chassis base while removing a right and left hooks 'a'.

■ Removing the Front P.C.Board

1. Remove the Front panel assembly.
2. The front P.C.Board is detached while expanding the hook 'b' in two places which is the fixation of front P.C.Board outside.

hook 'a'

Fig. 17

hook 'a'

Fig. 18

Main Adjustment

■ Test Instruments required for adjustment

- 1.Low frequency oscillator
(Frequency range:50Hz to 20kHz)
(Output:0dBs across 600 Ω terminating resistor)
- 2.Attenuator (Impedance:600 Ω)
- 3.Test disc:CTS-1000(Audio)
:CTS-1000&CRG-1211S(Optical Control)
- 4.Extension cord:Reference Next Page
- 5.Electronic voltmeter
- 6.Distortion meter
- 7.Jitter meter:NJM631
- 8.TE offset meter:LTM9055

■ Measuring conditions(Amplifier section)

Supply voltage
AC120V (60Hz)

Reference output level
 Speaker 0dBs(0.775V)/4 Ω
 Headphone -20dBs(0.077V)/32 Ω
 Line out 500mV(-3.8dBs)/47k Ω

Standard test frequency 1kHz

Reference input level AUX -3.8dBs

Output for measuring
At speaker terminal J3003(Dummy load : 4 Ω)

Posture of test Horizontal

■ Standard position of function switches

Function switch to AUX
Active hyper-bass pro switch to OFF

■ Standard position of volume control

Bass treble to center
Main volume adjust to reference output VOL4

■ Remarks of measuring

- 1.Negative side of the input and output on the measuring system, it ought to be separately to each other.
when using the 2 channels E.V.meter, never connect together on the negative side.
- 2.This model's amplifier is BTL.
On account of that minus speaker's terminal isn't same potential as earth in BTL (Balanced transformer-less) amplifier.
never connect minus side to the ground or negative.
- 3.When measuring power output with dummy load.
Connected wire to be used as big as possible.

■ Measuring condition(Tuner section)

Power source to tuner:DC5V
 AM modulation 400Hz 30%
 FM modulation 400Hz deviation 22.5kHz

■ Operation Confirmation

Do as follows by the method when you do the operation confirmation detaching the CD mechanism part from the main body.

- 1.Remove the CD mechanism assembly.
- 2.Operation Switch P.C.Board is detached from the CD mechanism assembly, and Operation Switch P.C.Board is connected with Front P.C.Board.
- 3.Flat wire A,B,C and D connected with the CD mechanism assembly are made an extension wire.
- 4.Switch S6382 on the substrate is short-circuited.
- 5.The disk is turned on, and the CD door is closed.
- 6.The power supply is turned on, and CD is reproduced.

Connect the Extension Cord

- (A) VMC0041-005
- (B) VMC0041-003
- (C) VWF1211-40TTB
- (D) VWF1207-40TTB

■ Arrangement Checking Test Pont

(CD Servo control board)

■ AMP Section

Items	Conditions	Adjustment and Confirmation Procedure	Standard Value
1. Amplifier gain check	*Measuring instrument :Oscilloscope *Measuring point :AUX IN :Speaker terminal	Input the 1kHz to AUX IN. Main volume is maximum. When speaker output becomes 0dB, input is $-16\text{dB} \pm 4\text{dB}$.	$-16\text{dB} \pm 4\text{dB}$
2. Noise level check	*Measuring instrument :Oscilloscope :Voltmeter *Measuring point :AUX IN :Speaker terminal	Switch and volume position Function switch : AUX. Bass treble : flat When main volume becomes maximum, confirm that speaker output is less than 4mV. When main volume becomes minimum, confirm that speaker output is less than 2.5mV	Less than 4mV Less than 2.5mV
3. Sub woofer output check	*Measuring instrument :Oscilloscope :Voltmeter *Measuring point :AUX IN :Sub woofer output terminal *Test disc :CTS-1000	Input the reference frequency 100Hz from AUX IN. By main volume is maximum position, bass and treble is flat position, Confirm the sub woofer output is $-14\text{dBs} \pm 4\text{dB}$.	$-14\text{dBs} \pm 4\text{dB}$
4. Super Bass /AHB effect	*Measuring instrument :Oscilloscope *Measuring point :Speaker terminal	Input the reference frequency 80Hz from AUX IN. Confirm the speaker terminal output is $11\text{dB} \pm 4\text{dB}$.	$11\text{dB} \pm 4\text{dB}$

■ CD Section

Items	Conditions	Adjustment and Confirmation Procedure	Standard Value
1.Jitter check	*Measuring instrument :jitter meter *Test point :TP601(GND side) :TP602(ARF side) *Test disc :CTS-1000	Connect the jitter meter between TP601(GND) and TP602(ARF) and when test disc (track 1) is played, confirm that the meter reading is 26n-sec or less.	26n-sec or less
2.RF level (eye pattern)	*Measuring instrument :Oscilloscope *Test point :TP601(GND side) :TP602(ARF side) *Test disc :CTS-1000	Connect the oscilloscope between TP601(GND) and TP602(ARF) and when test disc (track 1) is played, confirm that peak-to-peak value of oscilloscope waveform is within $1.1V \pm 0.2V$. Eye-pattern waveform  The maximum value of this waveform should be in the range of specifications and the waveform should be clear	within $1.1V \pm 0.2V$
3.Outer most area check	*Test disc :CTS-1000	Select "Track 26" on the outer area of test disc directly and check that it begins playback smoothly and that there are no abnormal conditions such as a tracking error.	
4.Pickup unit movement check(From the outer area to the inner area)	*Test disc :CTS-1000	Allow the pickup to skip over from the disc's outer most area to "Track 1" and check that it takes within 10 seconds for the player to enter play mode.	within 10 seconds

Flow of Functional Operation Until TOC Read

Maintenance of Laser Pickup Replacement of Laser Pickup

(1) Cleaning the pick up lens

Before you replace the pick up, please try to clean the lens with a alcohol soaked cotton swab.

(2) Life of the laser diode (Fig.1)

When the life of the laser diode has expired, the following symptoms will appear.

- (1) The level of RF output (EFM output: amplitude of eye pattern) will below.

(Fig.1)

(3) Semi-fixed resistor on the APC PC board

The semi-fixed resistor on the APC printed circuit board which is attached to the pickup is used to adjust the laser power. Since this adjustment should be performed to match the characteristics of the whole optical block, do not touch the semi-fixed resistor.

If the laser power is lower than the specified value, the laser diode is almost worn out, and the laser pickup should be replaced.

If the semi-fixed resistor is adjusted while the pickup is functioning normally, the laser pickup may be damaged due to excessive current.

Self Diagnosis Function of CD

1. Purpose

This function is designed to display an error to readily clarify the cause of such an error should any trouble occur in CD.

2. How to Use the Function

- (1) Turn the microcomputer action of the set to [TEST] mode.
- (2) Press **[STOP]** + **[VOLUME-]** + **[POWER]** on the remote control same time.
Confirm that all of the LCDs have been turned on when set to the [TEST] mode subsequent to the step in item (2).
- (3) When the CD trouble has occurred after starting CD, an error code will be displayed on the display section of LCD, etc.

3. Error code and location in trouble

CD Mechanism Ass'y and Parts List

■ Grease Point

Block No. M 2 M M

No. EXL-M6

NOTE

Please order motor after confirming the number of the P.C.Board because the combination of feed motor is different according to the P.C.Board used.

■ CD Mechanism Assembly Parts List

	Item	Parts Number	Parts Name	Q'ty	Description	Area
