

DM-S500

SERVICE MANUAL

* Refer to parts list on page 25.

In compliance with Federal Regulations, following are reproductions of labels on, or inside the product relating to laser product safety.

KENWOOD-Crop. certifies this equipment conforms to DHHS Regulations No. 21 DFR 1040. 10, Chapter 1, Subchapter J.

**DANGER : Laser radiation when open and interlock defeated.
AVOID DIRECT EXPOSURE TO BEAM**

Refer to DM-SE7/SE9 (B51-5395-00) and DM-5090/9090 (B51-5387-00) service manuals if require circuit description.

Cautions

Note related to transportation and movement

Before transporting or moving this unit, carry out the following operations.

1. With no disc loaded in the unit, press the ON/STANDBY key to on.
 - Check that no disc is present in the unit.
2. Wait a few seconds and verify that the display shown appears.
3. Press the ON/STANDBY key to off (standby).

NO DISC

Maintenance

Cleaning

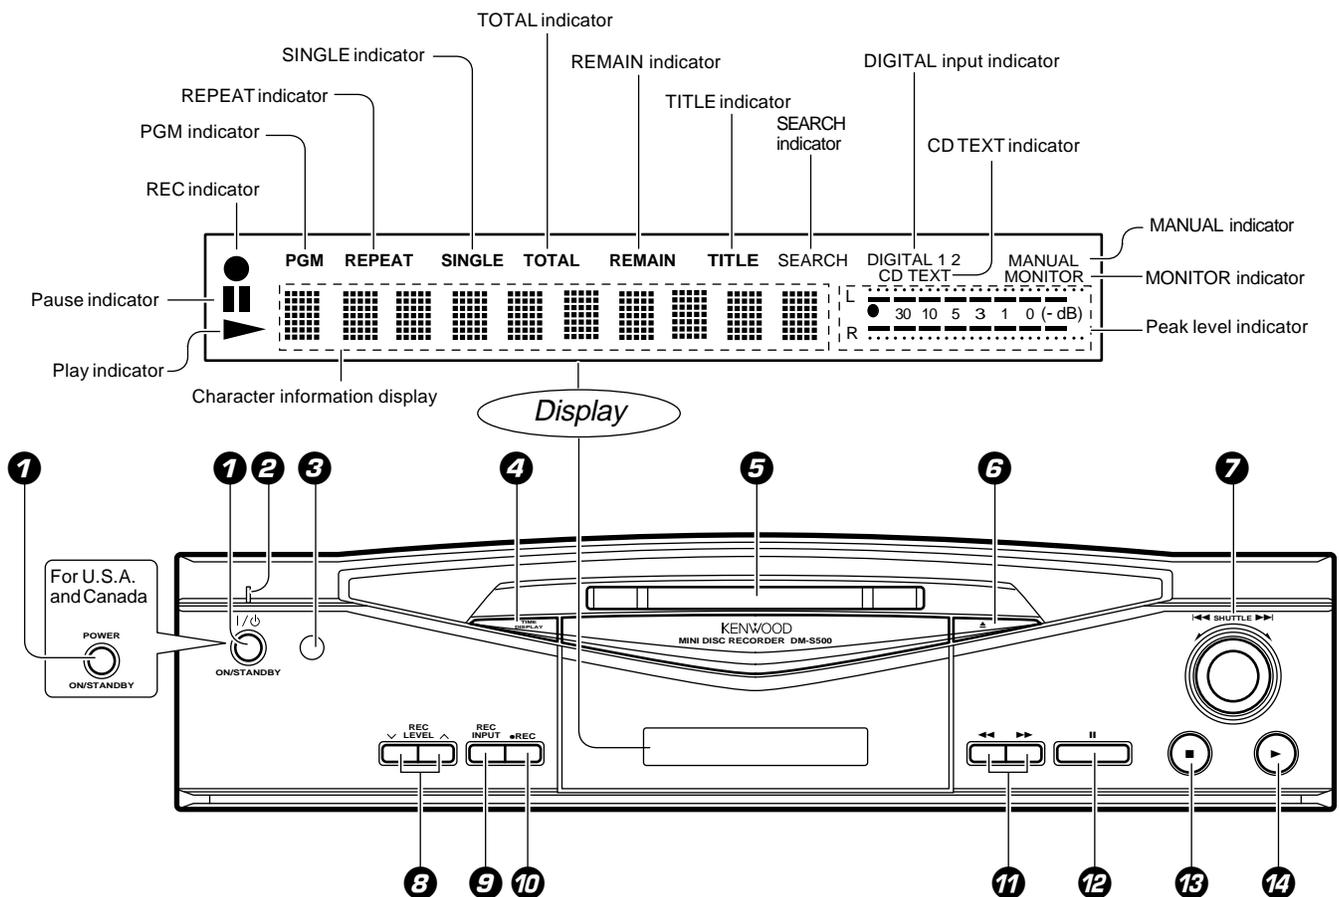

Unplug this appliance from the wall outlet before cleaning. Do not use volatile solvents such as alcohol, paint thinner, gasoline, or benzene, etc. to clean the cabinet. Use a clean dry cloth.

Caution against contact revitalizer

Do not use contact cleaners because it could cause a malfunction. Be specially careful against contact cleaners containing oil, for they may deform the plastic components.

CONTROLS

Display / Main unit

1 ON/STANDBY (I / ⏻) key

Press to turn the unit on or off (standby).

1 POWER key (For U.S.A. and Canada)

Press to turn the unit on or off.

2 Standby indicator

3 Remote control sensor

The key control signals from the remote control unit enter the main unit from here.

4 TIME DISPLAY key

5 Mini Disc insertion slot

Insert a minidisc.

6 Eject (▲) key

Press to unload the Mini Disc.

7 SHUTTLE (◀◀, ▶▶) knob

Use to skip disc tracks during playback.

During editing, this knob is used to select track numbers, title and characters.

8 REC LEVEL keys

This key is used to adjust the recording level.

9 REC INPUT key

This key is used to switch the recording input source.

10 REC (●) key

Press when starting recording.

11 Fast forward and fast backward (◀◀, ▶▶)

During playback, this key is used to move the played position forward or backward.

At the time of editing, the cursor movement and the selected title can be confirmed.

12 Pause (||) key

Press to temporary stop the disc operation.

13 Stop (■) key

Press to stop the disc operation.

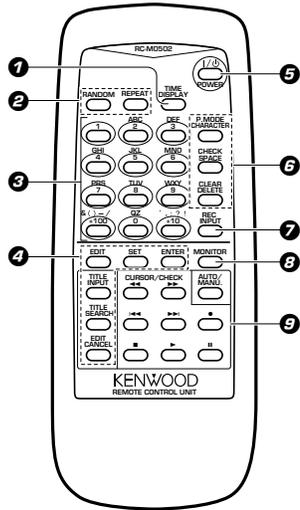

14 Play (▶) key

Press to start playback.

About the STANDBY mode

While the STANDBY indicator is lit on the display, a small amount of power is supplied to the system to back up the memory. This is called the standby mode. Under that condition, the system can be turned ON by the remote control unit.

Remote control unit

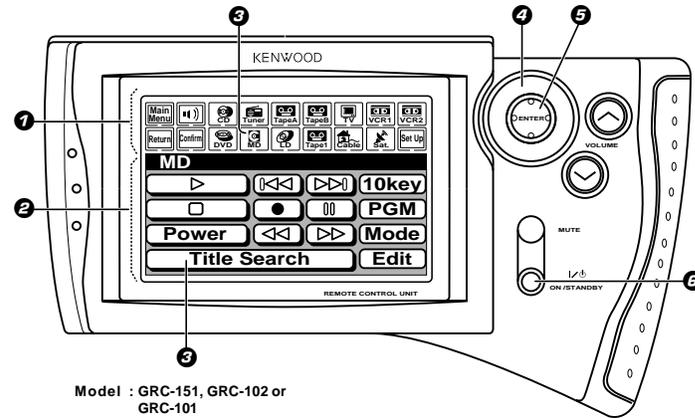

Model: RC-M0502
Infrared ray system

- 1 TIME DISPLAY key**
: Press to switch the time display mode.
- 2 Applied operation keys**
RANDOM key
: Used at the time of random playback.
REPEAT key
: Press to play tracks repeatedly.
- 3 Numeric keys**
: Press to specify the desired track number.
: Used at the time of title input for selection of characters and symbols.
- 4 Edit operation keys**
EDIT key
: This key is used to switch the editing mode.
SET key
: Press to set the editing result or input title definitely in memory.
ENTER key
: Press to execute editing or title input operation.
TITLE INPUT key
: This key is used to switch the title input mode.
TITLE SEARCH key
: This key is used to switch the title search mode.
EDIT CANCEL key
: Used to cancel editing.
- 5 POWER (I/⏻) key**
: Press to turn the unit on or off (standby).
- 6 Program operation keys**
P.MODE (Play mode)/CHARACTER key
: This key is used in program playback. During title input, it is used to select the character group.
CHECK/SPACE key
: This key is used to check the program contents.
During title input, it is used to insert a blank space character.
CLEAR/DELETE key
: This key is used to clear the program. During title input, it is used to delete a character.
- 7 REC INPUT (Recordinginput) key**
: This key is used to switch the recording input source.
- 8 MONITOR key**
: The sound of the unit connected to "DIGITAL 2" is heard.
- 9 Basic operation keys**
Fast Forward and Fast Backward keys
: Fast forward and fast backward keys.
(Same function as the keys on the main unit.)
Skip keys
: Skip keys.
(Same function as the knob on the main unit.)
● : Record key ■ : Pause key
▶ : Stop key ► : Play key
- AUTO/MANU. key**
: This is used for selection of automatic (AUTO) or manual (MANU.) track number assignment at the time of recording.

Graphical Remote Control Unit (GRC)

A graphical remote control (GRC-151, GRC-102 or GRC-101) is sold separately. To enable remote control operation, simply connect this unit, cassette deck (sold separately), and other accessories to the AV CONTROL CENTER with the system control cords.

Model : GRC-151, GRC-102 or
GRC-101
Infrared ray system

1 Segment screen

This screen is used for selecting the icons for the main equipment.

2 Menu screen

This screen is used for selecting the icons for the operating modes.

MD recorder operation panel

Play icon (▶)

Pause icon (||)

Stop icon (■)

Search icons (◀◀ ▶▶)

These icons send the track forward or backward.

Mode icon

This icon is used to select the playback mode.

Skip icons (◀◀ ▶▶)

When selected, the next track in the icon direction is played.

10key Pad icon

This icon switches to the Numeric Icon menu screen.

Power icon

This icon is used to turn the unit on or off. You can use this icon only when you select "IR" in the setup menu.

Rec icon (●)

This icon is used for recording.

PGM icon

This icon is used for program playback.

Edit icon

This icon is used to select the editing mode.

Title Search icon

This icon is used to switch the title search mode.

3 Icons

Icons for the equipment used and operating mode are displayed.

4 Joystick

The joystick is used when selecting the icons.
(Lightly press the edge of 4.)

5 ENTER key

Press this button to input the selected icon (operation mode, and so on).

6 I/⏻ (ON/STANDBY) key

This key turns ON/STANDBY this unit or the equipment connected with the system control cords.

If your GRC unit is the GRC-100 or GRC-150

If the GRC unit provided with your AV CONTROL CENTER (optional) or receiver (optional) is the "GRC-100" or "GRC-150", the DM-S500 unit should be controlled using the remote control unit provided with this unit.

ADJUSTMENT

1. Test mode of the unit

1-1 Setting of the test mode

While pressing the [STOP] key, plug the AC power cord into the AC wall outlet.

1-2 Contents of the test mode

- ① [DOT TEST]
- ② [SEG TEST]
- ⌘ ③ [KEY TEST]
- ⌘ ④ [CYBER TEST] J type only

⌘ Used for production line only

1-3 Function of the test mode

- ① [DOT TEST]

The FL display starts the "NIAGARA MODE" by pressing the [PLAY] key in the [DOT TEST] mode.

- ② [SEG TEST]

Turn the FL indication ON by pressing the [PLAY] key in the [SEG TEST] mode.

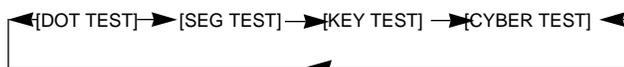

The FL indication changes cyclically as shown in the below by turning the SHUTTLE (←←←→→→).

1-4 Function of the key

- ① SHUTTLE (→→→) and down (←←←) keys

: Selects the test mode.

: Selects the FL indication

- ② Play key

: Proceeds the test mode or return to test mode.

- ③ Stop key

: Cancel the test mode.

1-5 Microprocessor reset

The microprocessor can be initialized while pressing the [EJECT] key, plug the AC power cord into the AC wall outlet.

2. Mechanism test mode

2-1 Setting the test mode

While pressing the [PLAY] key, plug the AC power cord into the AC wall outlet

2-2 Canceling the test mode

Unplug the AC power cord.

2-3 Basic operation in test mode

All operations are performed using the SHUTTLE (up/down), PLAY key and STOP key. The functions of each key are shown in the table below.

Function	Description
SHUTTLE (up/down)	Changes the parameter and mode.
PLAY key	Proceeds for definition.
STOP key	Returns for interrupt.

2-4 Selection of test mode

12 test modes are selected by turning the SHUTTLE.

No.	Display	Description	Section
1	TEMP ADJU	The work of adjustment is unnecessary in this mode	-
2	LDPWR ADJU	Laser power adjustment	3-5
3	LDPWR CHEC	Laser power check	3-5
4	EFBAL ADJU	Traverse adjustment	3-6
5	FBIAS ADJU	Focus bias adjustment	3-7
6	CPLAY MODE	Continuous playback mode	2-4-1
7	CREC MODE	Continuous recording mode	2-4-2
8	STT-LIMIT	Check the mechanism start limit SW position	-
9	JUMP MODE	Track jump checking mode	-
10	SRV DATA RE	Servo data reading	-
11	EEP MODE	E2PPROM data reading or rewrite	-
12	EEP INITIA	E2PROM data initializing	-

For more information on each adjustment mode, refer to each section of 3, "Electrical adjustment".

If other adjustment mode has been entered incorrectly, press the STOP key to exit the mode.

* The number 8 - 12 are not used for service. If these mode have been entered incorrectly, press the STOP key immediately to exit the mode. Specially, do not use EEP INITIAL. (E2PROM data has initialized if used it.)

2-4-1 Operation in continuous playback mode

1. Entering the continuous playback mode

- (1) Insert a recordable disc or pre-mastered disc into the unit.
- (2) Turn the SHUTTLE to display "CPLAY MODE".
- (3) Press the PLAY key. The display then changes from "CPLAY MODE" to "CPLAY MID".
- (4) After the access operation is completed, the display changes from "CPLAY MID" to "C=#### a=##".

Note: Numerals on the display appear the error rate and ADIP error.

2. Change the playback point.

- (1) Press the PLAY key during continuous playback. The display then changes as follows.

- (2) After the access operation is completed, the display changes "C=#### a=##".

DM-S500

ADJUSTMENT

Note: Numerals on the display appear the error rate and ADIP error.

3. Terminating the continuous playback mode
 - (1) Press the STOP key. The display then changes to "CPLAY MODE".
 - (2) Press the EJECT key to take out the disc.

Note : The playback start addresses of IN, MID, and OUT are described below.

IN	30H cluster
MID	300H cluster
OUT	700H cluster

2-4-2 Operation in continuous recording mode

1. Entering the continuous recording mode
 - (1) Insert a recordable disc into the unit.
 - (2) Turn the SHUTTLE to display "CREC MODE".
 - (3) Press the PLAY key. The display then changes from "CREC MODE" to "CREC MID".
 - (4) Press the PLAY key again. The display changes from "CREC MID" to "CREC (#####)", and the continuous recording is started.

Note : Numerals on the display (#####) appear the address of recording point.

2. Change the recording point.
 - (1) Turn the SHUTTLE to clockwise while "CREC MID" is displayed. The display changes as follows. (The recording point can be shifted.)

- (2) Press the ENTER key. The display then changes to "CREC(#####)", and the continuous recording is started.

Note : Numerals on the display (#####) appear the address of recording point.

3. Terminating the continuous recording mode
 - (1) Press the STOP key. The display then changes to "CREC MODE" and the REC display goes off.
 - (2) Press the EJECT key to take out the disc.

Notes :

1. The recording start addresses of IN, MID, and OUT are described below.

IN	30H cluster
MID	300H cluster
OUT	700H cluster
2. The STOP key can be pressed at any time to stop the recording.
3. An erasure prevention control is not detected in the test mode. Be careful not to enter the continuous recording mode using a disc containing the data that should not be erased.
4. Do not record continuously for more than five minutes.
5. Take care that no vibration is applied during continuous recording.

2-5 Other key function

Function	Description
▶	Plays back continuously when this key is pressed during stop. Turn on and off the tracking servo when it is pressed during continuous playback.
■	Stops the continuous playback and recording.
◀◀	The thread moves to the inner circumference while this key is pressed.
▶▶	The thread moves to the outer circumference while this key is pressed.

Note : An erasure prevention control is not detected in the test mode. Notice that recording is performed irrespective of the erasure prevention control position when the REC key is pressed.

2-6 Precaution on use of test mode

⚠ An erasure prevention control is not detected in the test mode. Therefore, when the recording laser power mode such as continuous recording mode and traverse adjustment mode is entered, the contents of the existing recording are erased irrespective of the control position. Be careful not to enter the continuous recording mode and traverse adjustment mode when using a disc, containing the data that should not be erased, in the test mode.

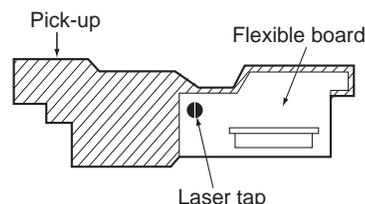

3. Electrical adjustment

3-1 Precaution during confirmation of Laser Diode emission

During adjustment, do not view the emission of a laser diode from just above for confirmation. This may damage your eyes.

3-2 Precaution on handling of Optical pick-up (KMS-260A)

The laser diode in an optical pick-up is easy to be subject to electrostatic destruction. Therefore, solder-bridge the laser tap on the flexible board when handling the optical pick-up. When removing the flexible board from the connector, make a solder bridge in advance, then remove the board. Be careful not to remove the solder bridge before inserting the connector. Moreover, take careful measures against electrostatic destruction. The flexible board is cut easily. Handle the flexible board with care.

3-3 Precaution during adjustment

- 1) Perform the adjustment and confirmation marked with "O" in the order shown in the table when the parts below are replaced.

ADJUSTMENT

- 2) In the test mode, perform the adjustment. After adjustment is completed, cancel the test mode.

	Optical pick-up	BD board		
		IC6	D101	IC1,IC2,IC10
1. Temperature compensation offset adjustment	X	O	O	O
2. Laser power adjustment	O	O	X	O
3. Traverse adjustment	O	O	X	O
4. Focus bias adjustment	O	O	X	O
5. Error rate confirmation	O	O	X	O

- 3) Perform the adjustment in the order described.
- 4) Use the following tools and measurement equipment.
- CD test disc TGYS-1
 - Laser power meter
 - Oscilloscope (with bandwidth of more than 40 MΩ)
(Calibrate the probe before measurement.)
 - Digital voltmeter
 - Thermometer
- 5) Take care that VC and GND (ground) are not connected on the oscilloscope when two or more signals are monitored on the oscilloscope. (VC and GND are short-circuited in this case.)

Note : The "#" display on the screen indicates an arbitrary figure.

3-4 Creating the recordable continuous recording disc

This disc is used for focus bias adjustment and error rate confirmation. How to create the recordable continuous recording disc is described below.

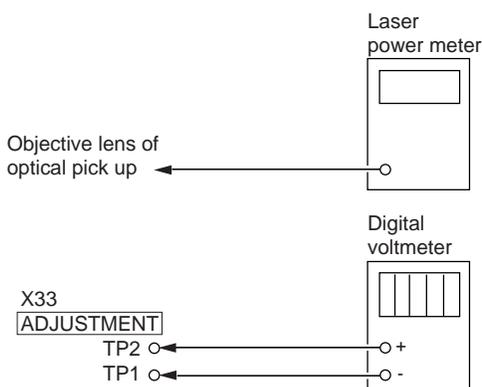

1. Insert a commercial recordable disc (blank disc).
2. Turn the SHUTTLE to display "CREC MODE."
3. Press the PLAY key to display "CREC MID".
4. After pressed the PLAY key, a display indicates "CREC(0300)" and the recording begins.
5. Terminate the recording within five minutes.
6. Press the STOP key to stop the recording.
7. Press the EJECT key to take out the recordable disc.

As a result, a continuously recorded disc can be created for focus bias adjustment and error rate confirmation.

Note : Take care that no vibration is applied during continuous recording.

3-5 Laser power adjustment

Connection :

Adjustment :

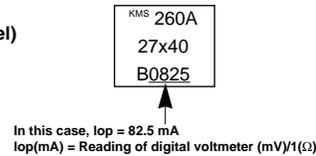

1. Put the laser power meter on the objective lens of the optical pick-up. Connect the digital voltmeter to TP1 and TP2.
 2. Turn the SHUTTLE to display "LDPWR ADJU".
(Laser power : For adjustment use)
 3. Press the PLAY key to display "(0.9mW)\$##".
 4. Adjust to turn SHUTTLE so that the laser power meter reads 0.86 - 0.94mW.
Set range 10mW of the laser power meter, then save to press PLAY key.
 5. "(7.0mW)\$##" is displayed.
 6. Adjust to turn the SHUTTLE so that laser power meter reads 6.9-7.1mW, then save to press PLAY key.
("LDPWR<\$##" is displayed momentarily.)
- ※ Don't output the laser power of 7.0mW more than 15sec.
7. Next turn the SHUTTLE to display "LDPWR CHEC".
 8. Press PLAY key to display "(0.9mW)\$##". Check the laser power meter reads 0.85-0.95mW.
 9. Next set range 10mW of the laser power meter, then press PLAY key to display "(7.0mW)\$##". Confirm that the laser power meter and digital voltmeter at that time read the specified value.

Specification :

Reading of laser power meter : 7.0 ± 0.1 mW

Reading of digital voltmeter : Optical pick-up indication value $\pm 10\%$

(Optical pick-up label)

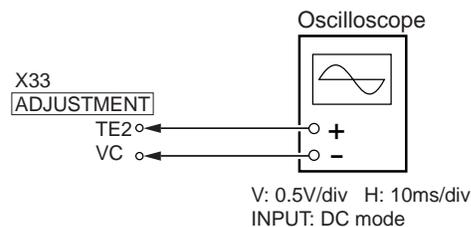

10. Press the PLAY key to display "LDPWR CHEC" and stop the laser emission. (The STOP key can be pressed at any time to stop the laser emission.)

Note : The "#" display on the screen indicates an arbitrary figure.

3-6 Traverse Adjustment

Connection :

Adjustment :

1. Connect the oscilloscope to (TE2) and (VC) on the X33 board.
2. Insert a commercial recordable disc.
3. Turn the SHUTTLE to display "EFBAL ADJU".

ADJUSTMENT

- Press the PLAY key to display "EFBAL MO-W" and after that press the PLAY key again to display "EF=\$##MOW".
- Turn the SHUTTLE so that the waveform on the oscilloscope satisfies the specified value. (When the SHUTTLE is turned, the #-marked figure in "EF=\$##" changes and the waveform also changes.) During this adjustment, the oscilloscope changes in units of about 3%. Adjust so that the waveform comes nearest to the specified value. (MO groove read power traverse adjustment)

(Traverse waveform)

Specification : A = B

- Press the PLAY key to display "EFB=##XSA" momentarily. After that, "EF=\$##MOR" is displayed. (Laser power READ power, focus servo ON, tracking servo OFF, and spindle(S) servo ON.)
- Turn the SHUTTLE so that the waveform on the oscilloscope satisfies the specified value. (When the SHUTTLE is turned, the #-marked figure in "EF=\$##" changes and the waveform also changes.) During this adjustment, the oscilloscope changes in units of about 2%. Adjust so that the waveform comes nearest to the specified value. (MO groove read power traverse adjustment)

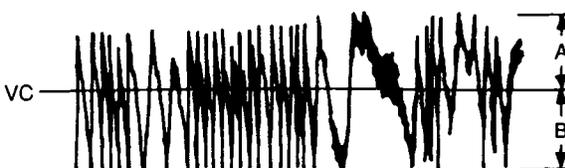

(Traverse waveform)

Specification : A = B

- Press the PLAY key to display "EFB=##XSA" momentarily and save the adjustment result in nonvolatile memory. After that, "EFBAL MO-P" is displayed.
- Press the PLAY key to display "EF=\$##MOP". (A pick-up moves automatically to pit block area.)
- Turn the SHUTTLE so that the waveform on the oscilloscope comes near to the specified value. During this adjustment, the waveform changes in units of about 2%. Adjust so that the waveform comes nearest to the specified value.

(Traverse waveform)

Specification : A = B

- Press the PLAY key to display "EFB=##XSA" momentarily and save the adjustment result in nonvolatile memory. After that, "EFBAL CHAN" is displayed. The disc rotation stops automatically.

Note : The "#" display on the screen indicates an arbitrary figure.

- Press the EJECT key to take out a recordable disc.
- Insert test disc TGYS-1.
- Press the PLAY key to display "EF=\$##CD". A servo is established automatically.
- Turn the SHUTTLE so that the waveform on the oscilloscope comes near to the specified value. During this adjustment, the waveform changes in units of about 2%. Adjust so that the waveform comes nearest to the specified value.

(Traverse waveform)

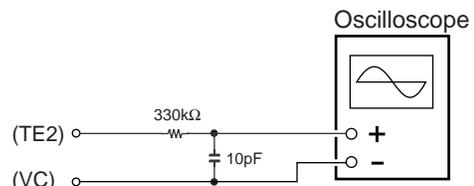

Specification : A = B

- Press the PLAY key to display "EFB=##XSA" momentarily and save the adjustment result in nonvolatile memory. After that, "EFBAL ADJU" is displayed.
- Press the EJECT key to take out test disc TGYS-1.

Notes :

- Data is erased during MO write when a recorded disc is used for this adjustment.
- If the traverse waveform is difficult to be monitored, connect an oscilloscope as shown in the figure below.

3-7 Focus bias adjustment

Connection :

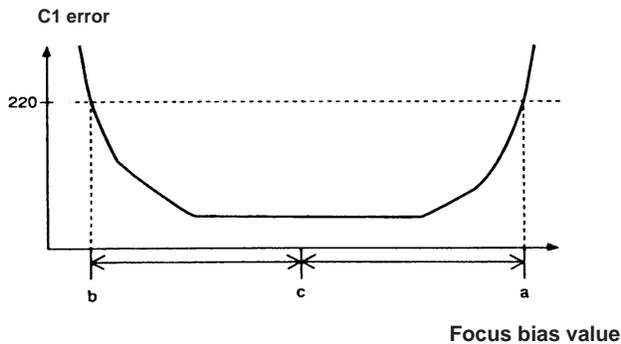

- Insert a continuously recorded disc (refer to 3-4, "Creating the recordable continuous recording disc").
- Turn the SHUTTLE to display "CPLAY MODE".
- Press the PLAY key to display "CPLAY MID".
- Press the STOP key when "C=**** a=**" is displayed.
- Turn the SHUTTLE to display "FBIAS ADJU".
- Press the PLAY key to display "a=## ####". The four-digit figure indicates the C1 error rate, and the two-digit figure after "a=" indicates the focus bias value.

ADJUSTMENT

7. Turn the SHUTTLE clockwise and detect the focus bias value in which the C1 error rate becomes 220.
8. Press the PLAY key to display "b=## #####".
9. Turn the SHUTTLE counterclockwise and detect the focus bias value in which the C1 error rate becomes 220.
10. Press the PLAY key to display "C=## #####".
11. Confirm that the C1 error rate at that time is less than 50, then press the PLAY key.
12. The display appears "**-**-**" (X" momentarily and save the adjustment result in nonvolatile memory. After that "FBIAS ADJU" is displayed.
13. Press the EJECT key to take out a continuous recording disc.

Notes :

1. The relation between the C1 error and focus bias value is shown in the figure below. Points "a" and "b" in the figure are detected by the above adjustment. Focal position "C" is automatically obtained from points "a" and "b" by calculation.
2. The C1 error rate fluctuates. Therefore, perform the adjustment according to the observed mean value.

3-8 Error rate confirmation

3-8-1 CD error rate confirmation

Confirmation :

1. Insert test disc TGYS-1.
2. Turn the SHUTTLE to display "CPLAY MODE".
3. Press the PLAY key to display "CPLAY MID".
4. "C=##### a=##" is displayed.
5. Confirm that the C1 error rate is less than 20.
6. Press the STOP key to stop the playback, then press the EJECT key to take out a test disc.

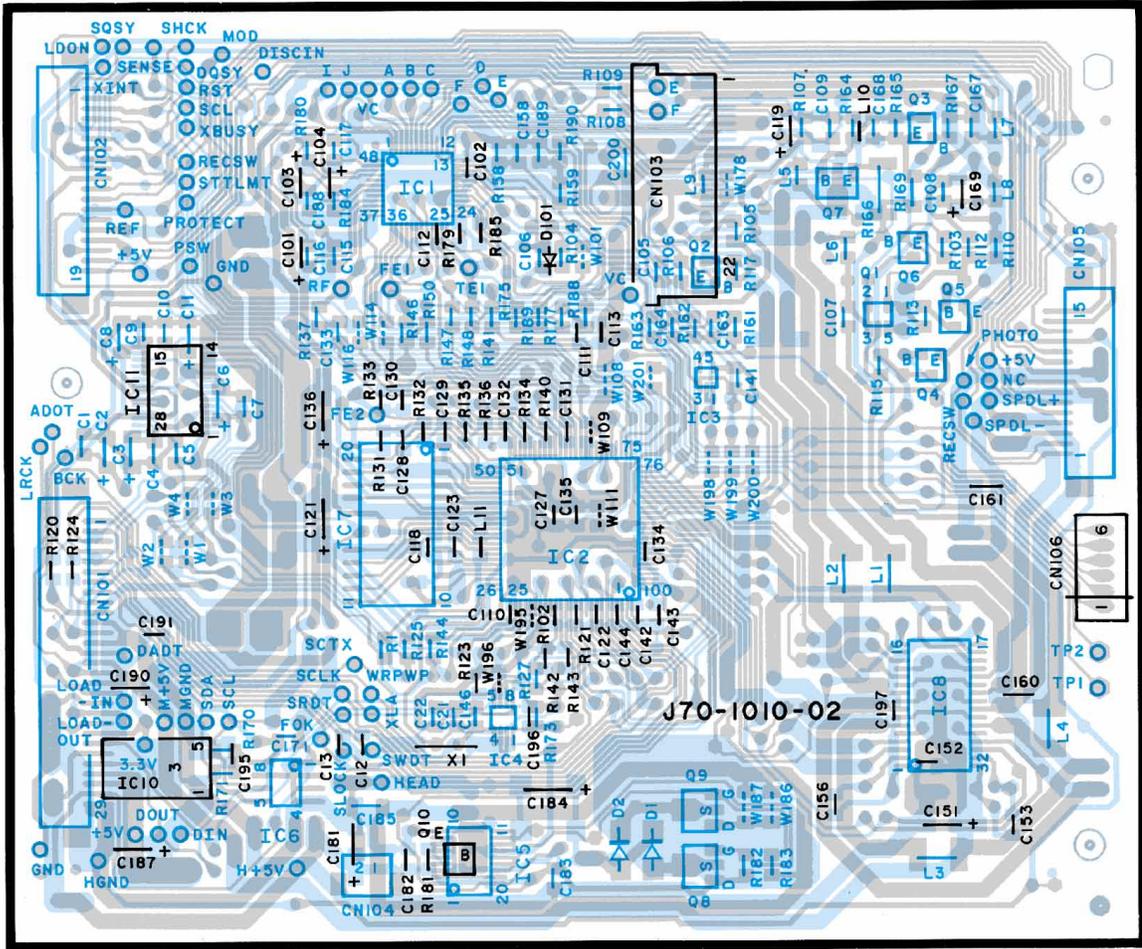

3-8-2 MO error rate confirmation

1. Insert a continuously recorded disc (refer to 3-4, "Creating the recordable continuous recording disc")
2. Turn the SHUTTLE to display "CPLAY MODE".
3. Press the PLAY key to display "CPLAY MID".
4. "C=##### a=##" is displayed.
5. Confirm that the C1 error rate is less than 50 and that ADIP error rate is 00.
6. Press the STOP key to stop the playback, then press the EJECT key to take out a test disc.

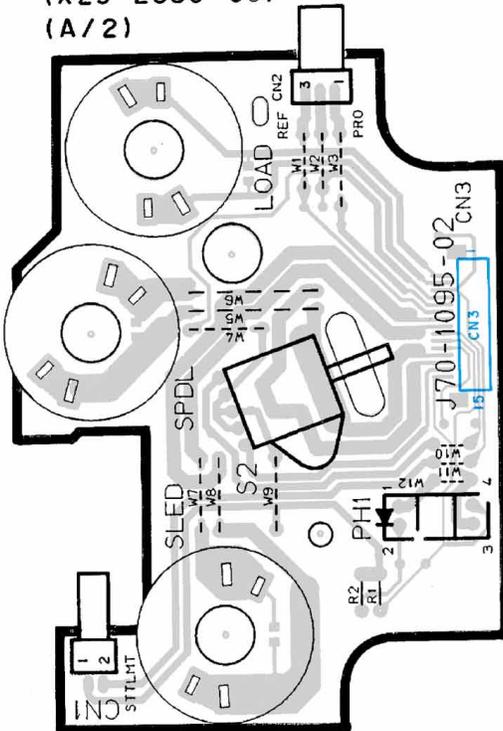

Note : The "#" display on the screen indicates an arbitrary figure.

SPECIFICATIONS

[Format]

SystemMindisc digital audio system
 Laser Semiconductor laser
 Recording method..... Field modulation overwrite method
 Audio compression
ATRAC (Adaptive Transform Acoustic Coding)
 Playing rotation.....Approx. 400 rpm ~ 900 rpm (CLV)

[D/A conversion]

D/A conversion1 Bit
 Oversampling128 fs (5644.8 KHz)

[A/D converter]

A/D conversionSigma-delta method
 Sampling frequency.....44.1 KHz

[Digital audio performance]

Frequency response (playback mode)
8 Hz ~ 20 KHz, ± 1 dB

[General]

Power consumption14 W
 DimensionsW: 400 mm (15 - 3 / 4")
 H: 100 mm (3 - 15 / 16")
 D: 365 mm (14 - 3 / 8")
 Weight (Net).....3.7 kg (8.2 lb)

1. KENWOOD follows a policy of continuous advancements in development. For this reason specifications may be changed without notice.
2. The full performance may not be exhibited at extremely cold locations (under a water-freezing temperature).

KENWOOD CORPORATION

14-6,Dogenzaka 1-chome, Shibuya-ku, Tokyo, 150 Japan

KENWOOD SERVICE CORPORATION

P.O. BOX 22745, 2201 East Dominguez St., Long Beach, CA 90801-5745, U.S.A.

Note:
 Component and circuit are subject to modification to insure best operation under differing local conditions. This manual is based on Europe (E) standard, and provides information on regional circuit modification through use of alternate schematic diagrams, and information on regional component variations through use of parts list.
