**Note:**

The products are subject to modification in components and circuits in different countries and regions. This is because each product must be used under the best condition. This manual provides information of modification based on the standard in the U.S., for the convenience of ordering associated components and parts.

We employ the following abbreviations of respective countries.

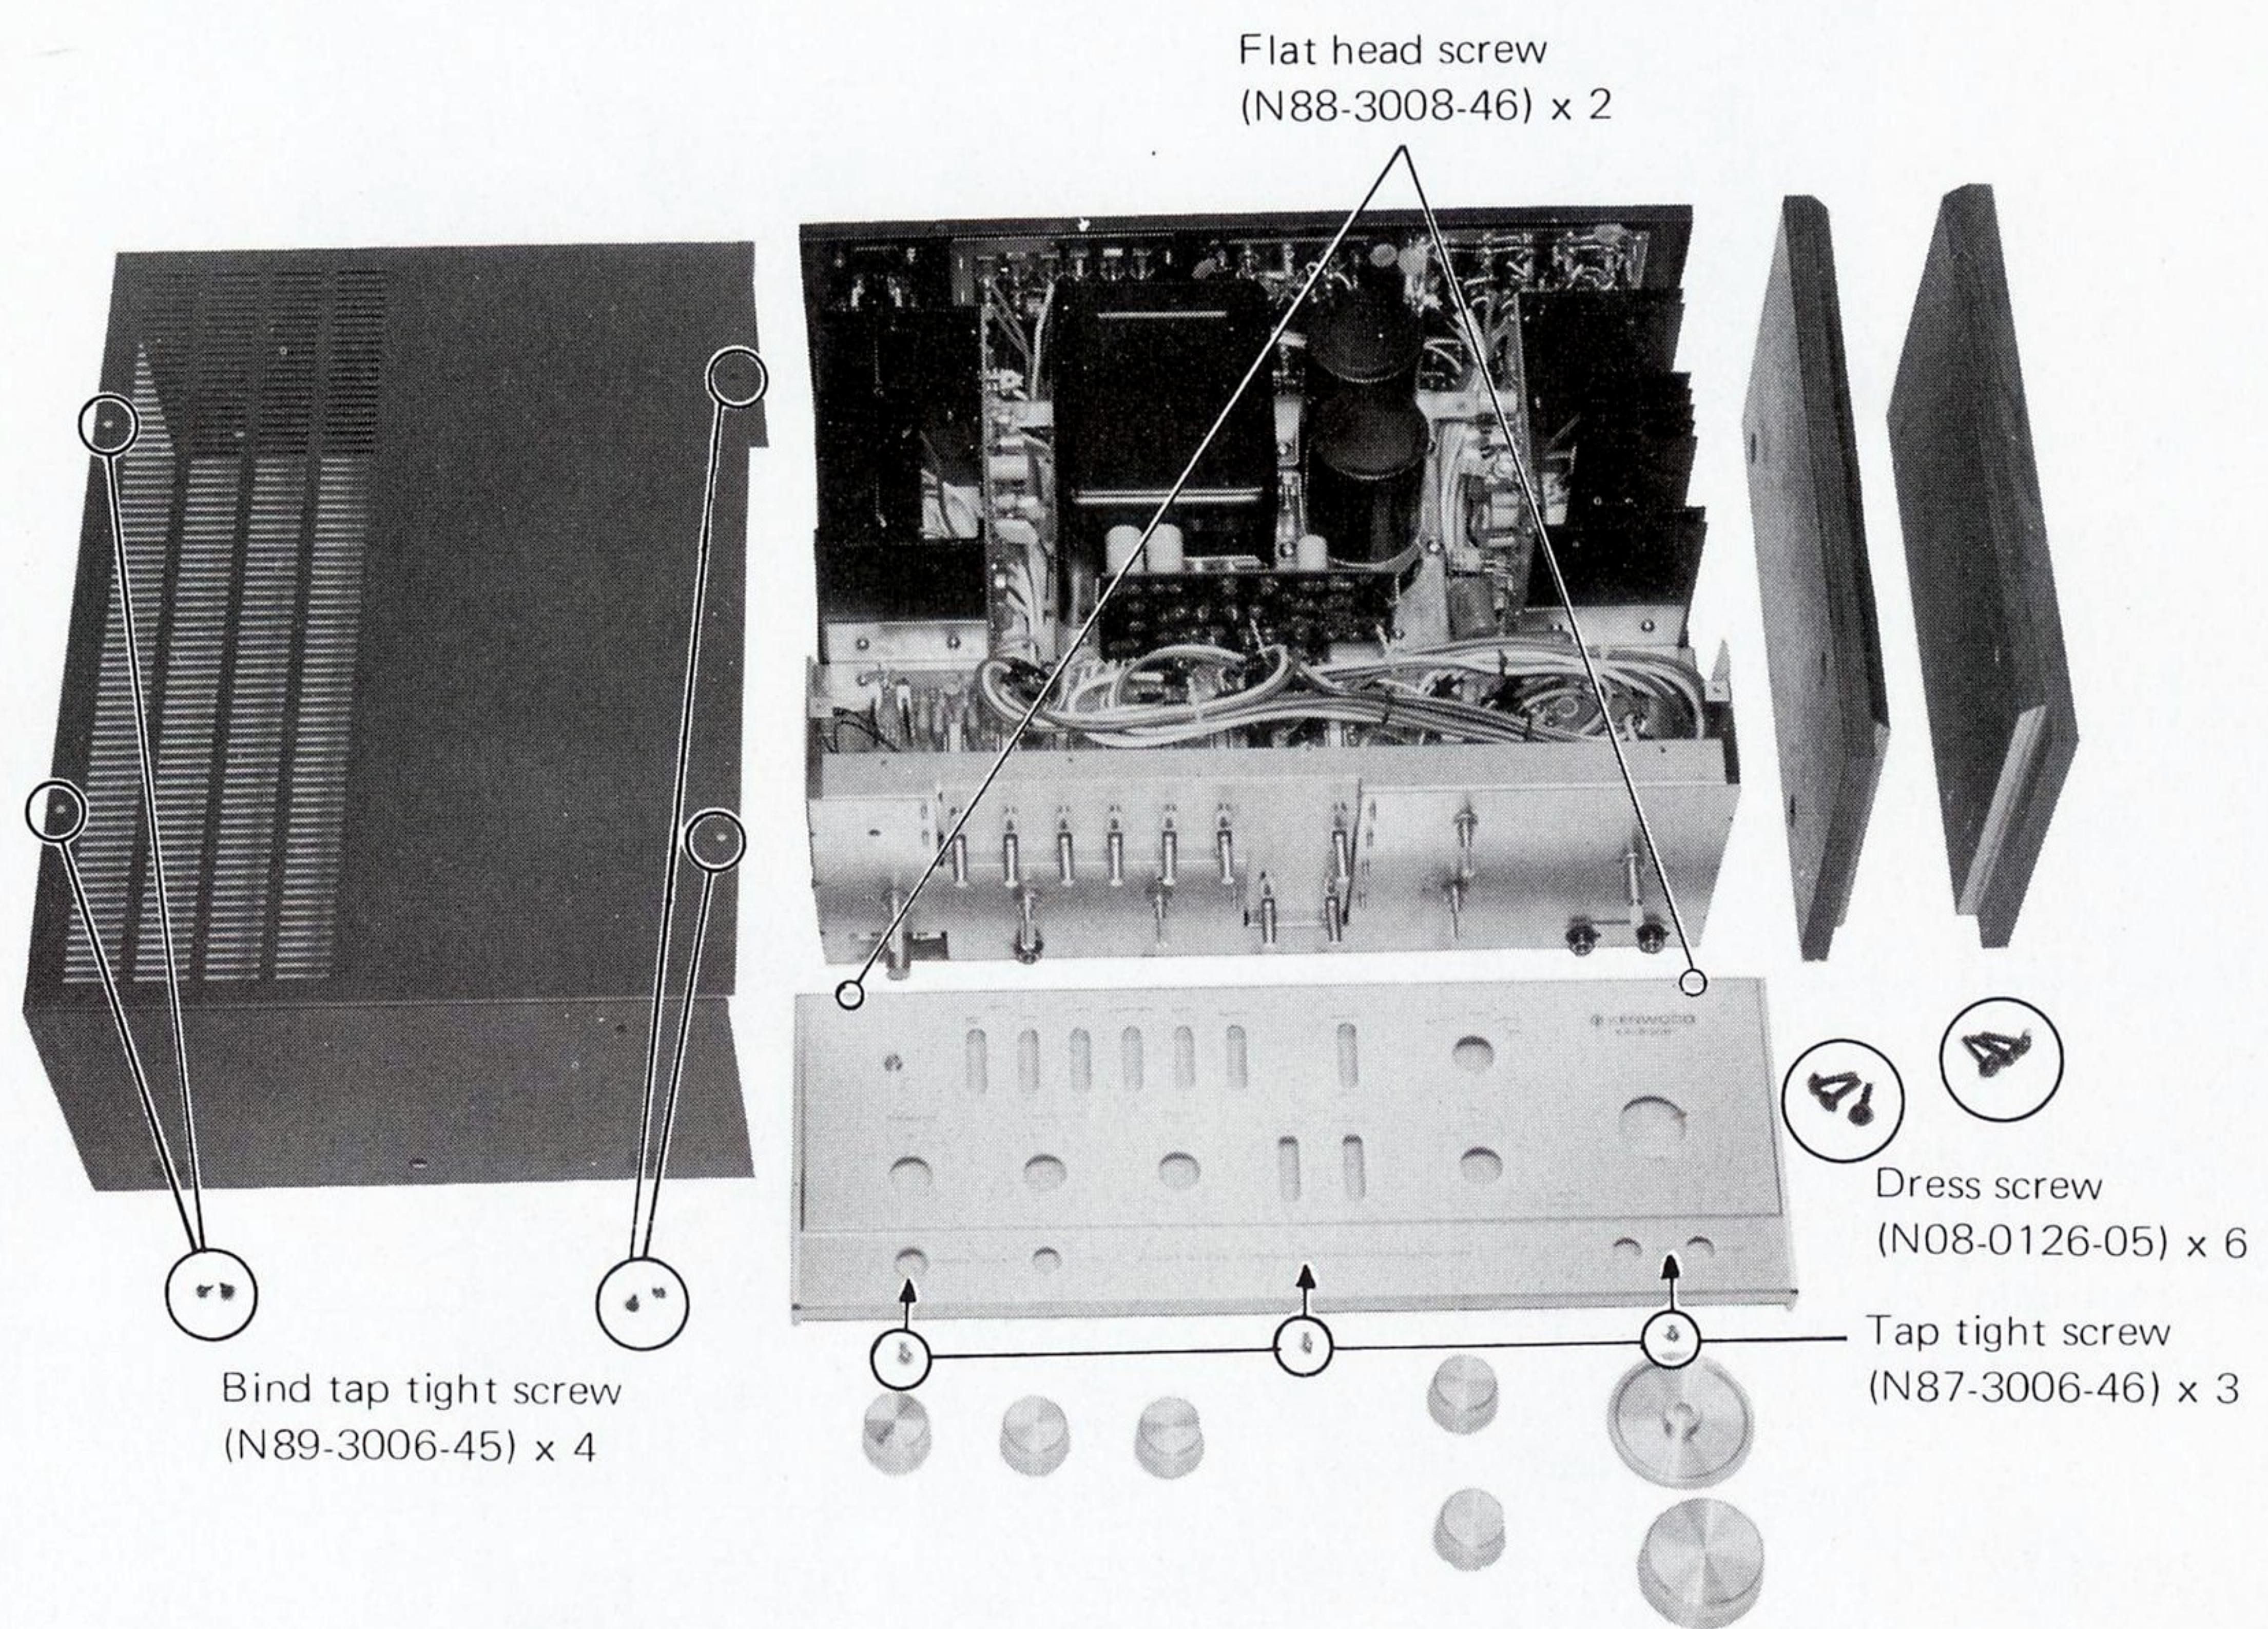

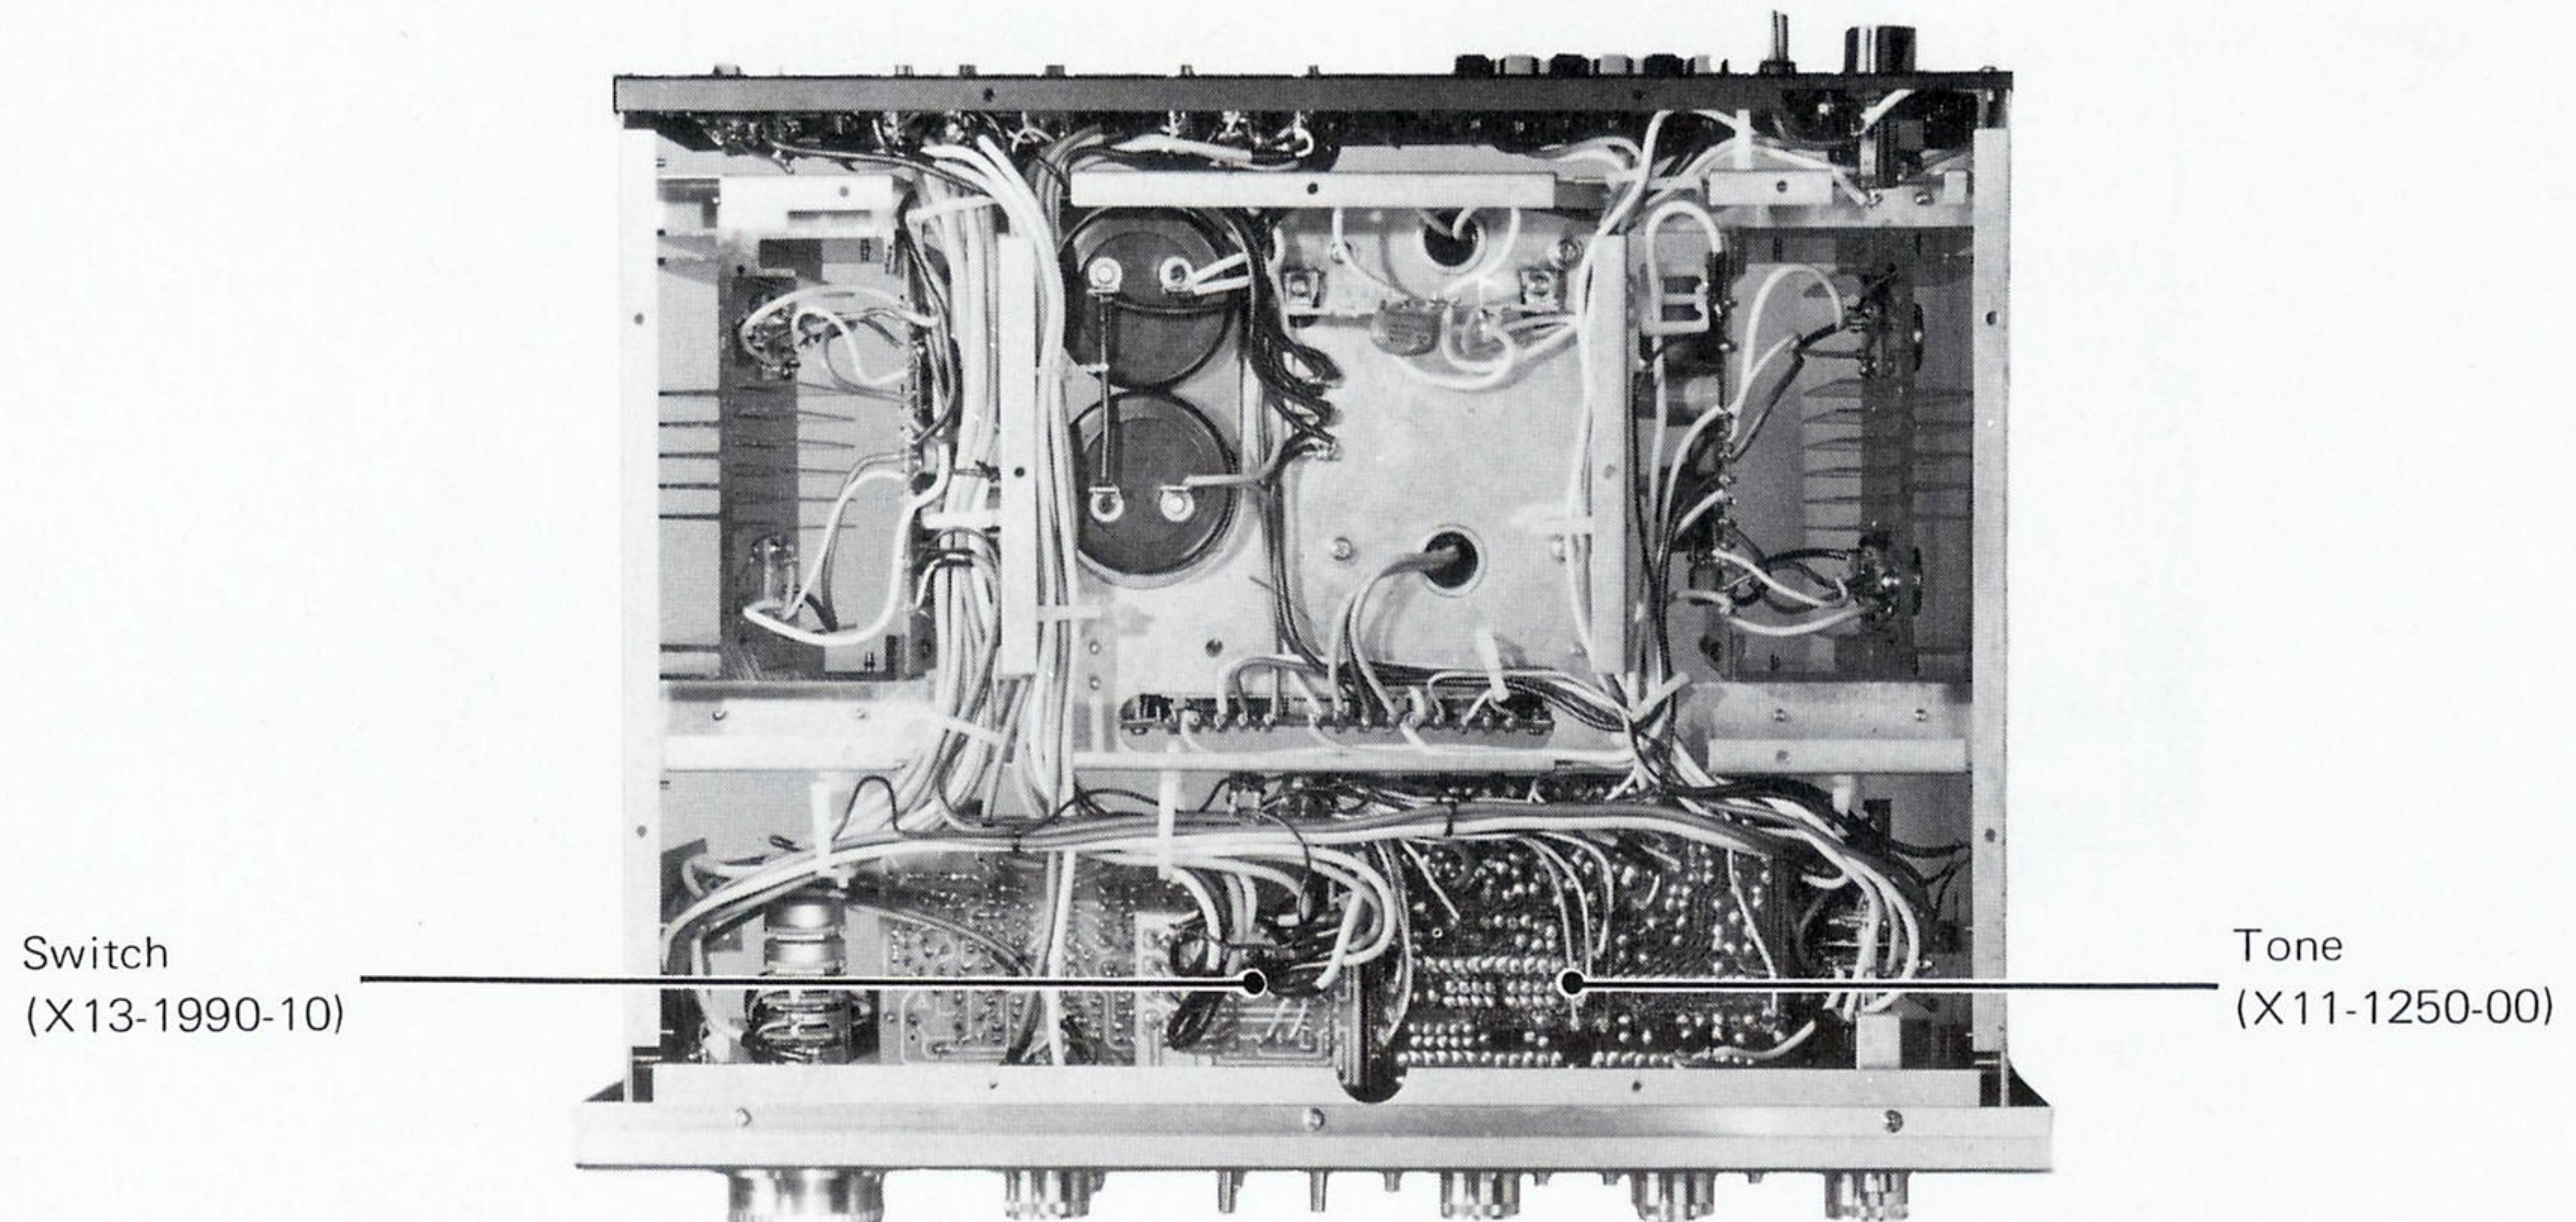

U.S.A.	K	England	T
Canada	P	Scandinavia	L
PX	U	South Africa	S
Australia	X	Other areas	M
Europe	W

## BOTTOM VIEW / DISASSEMBLY

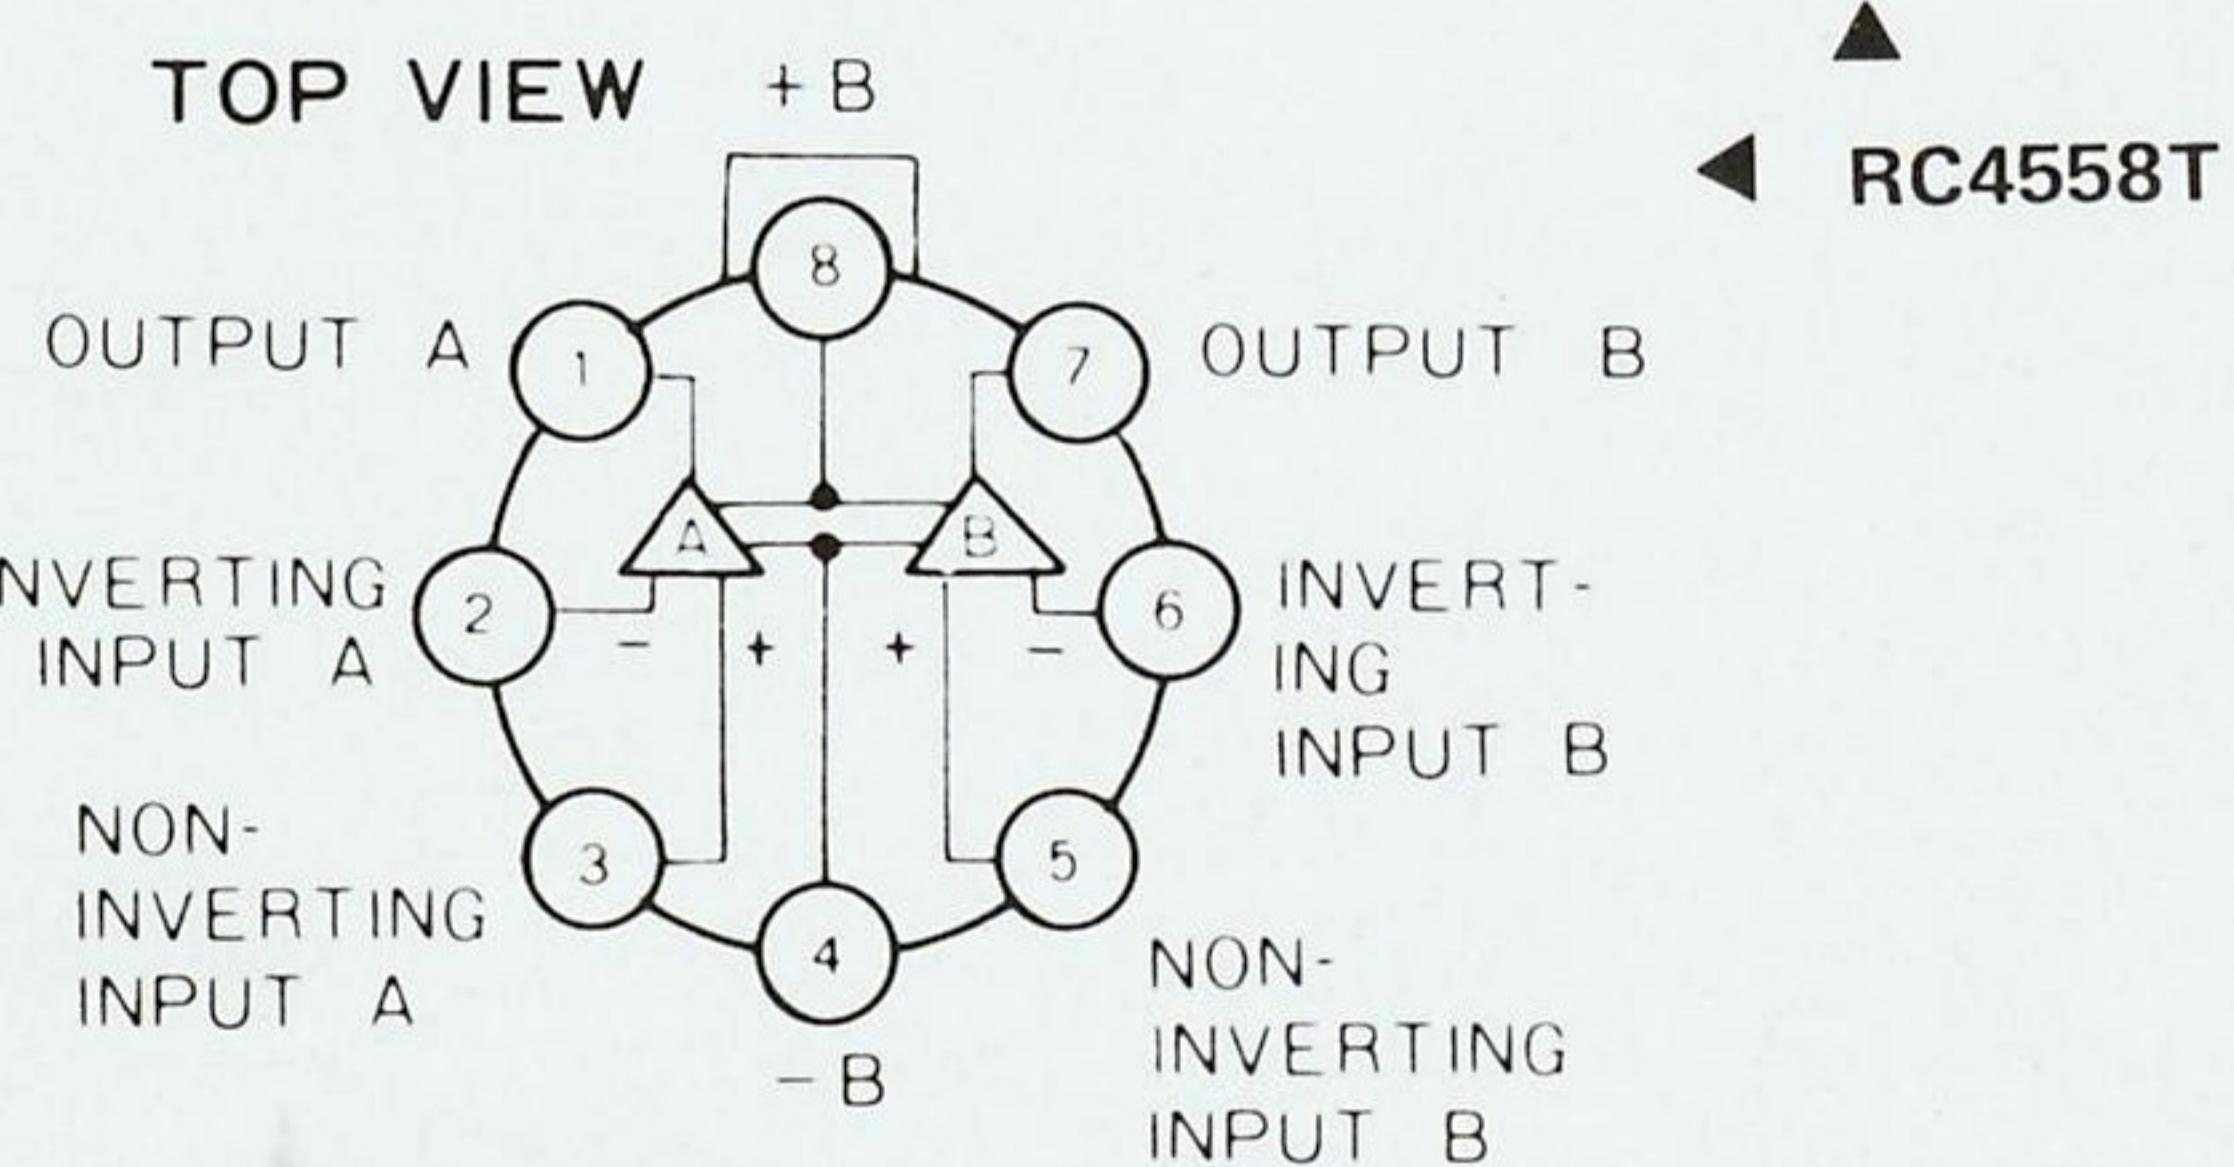

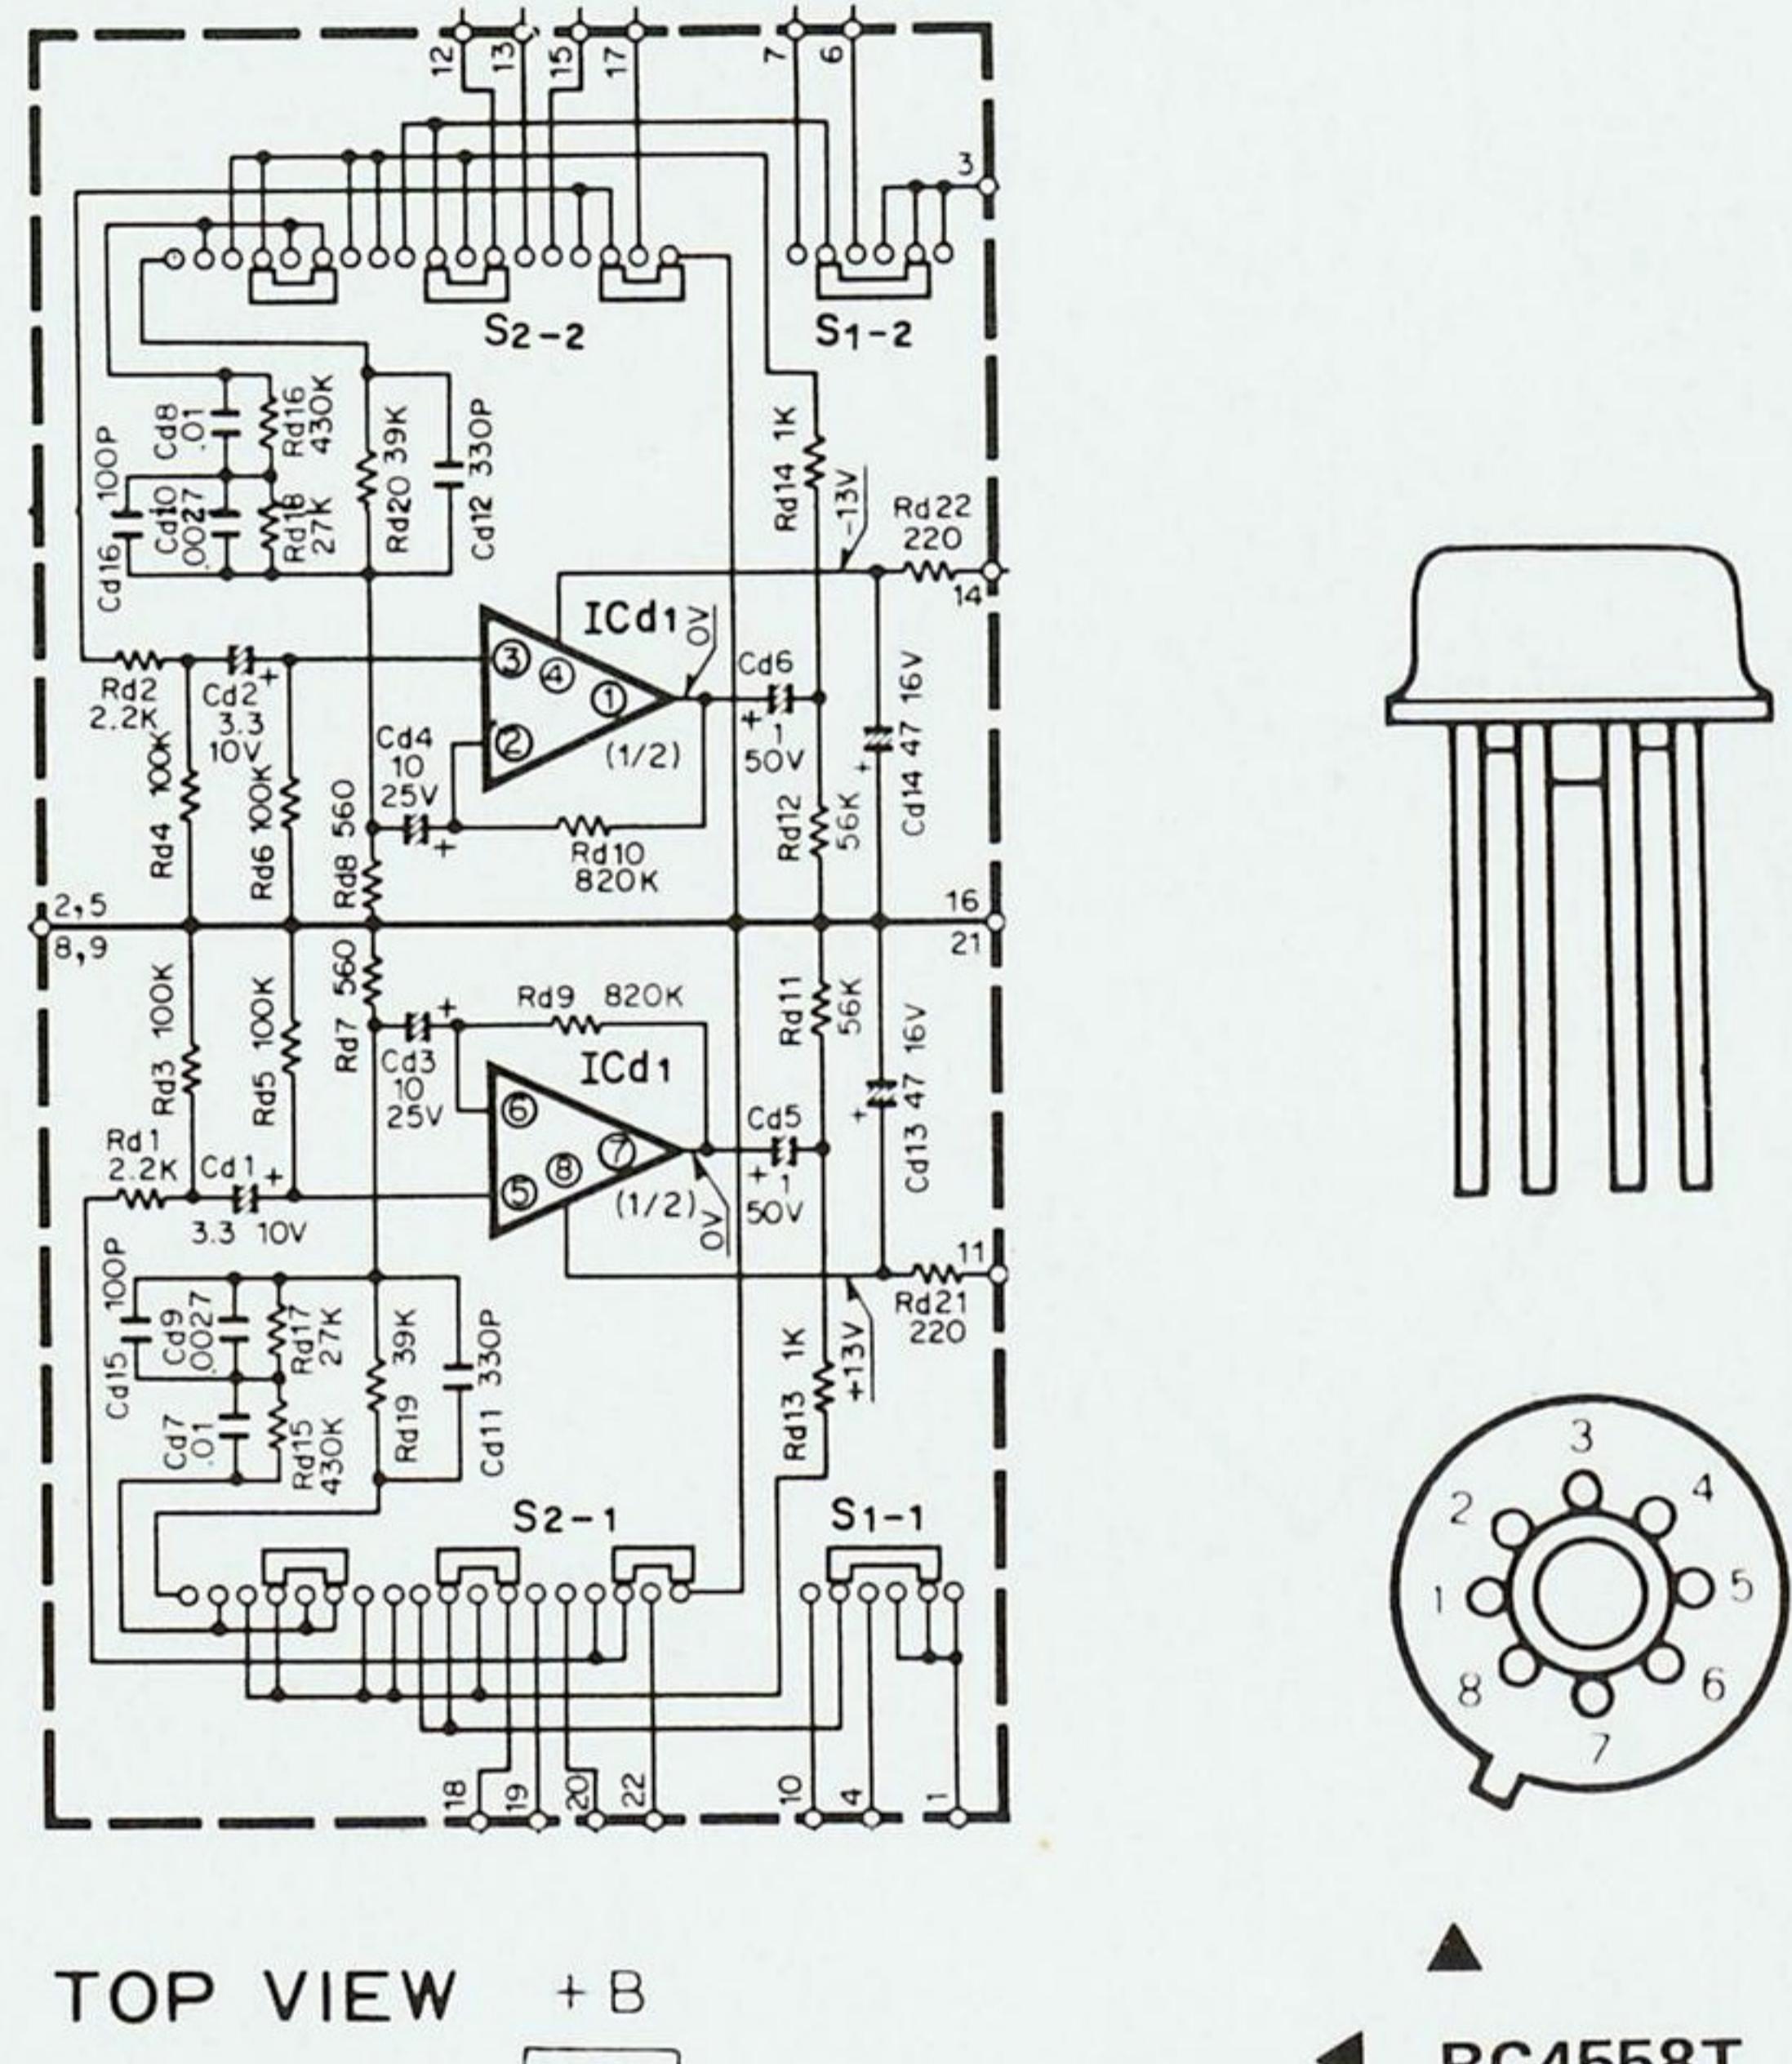

# PACKING / BLOCK & LEVEL DIAGRAM

# CIRCUIT DESCRIPTION

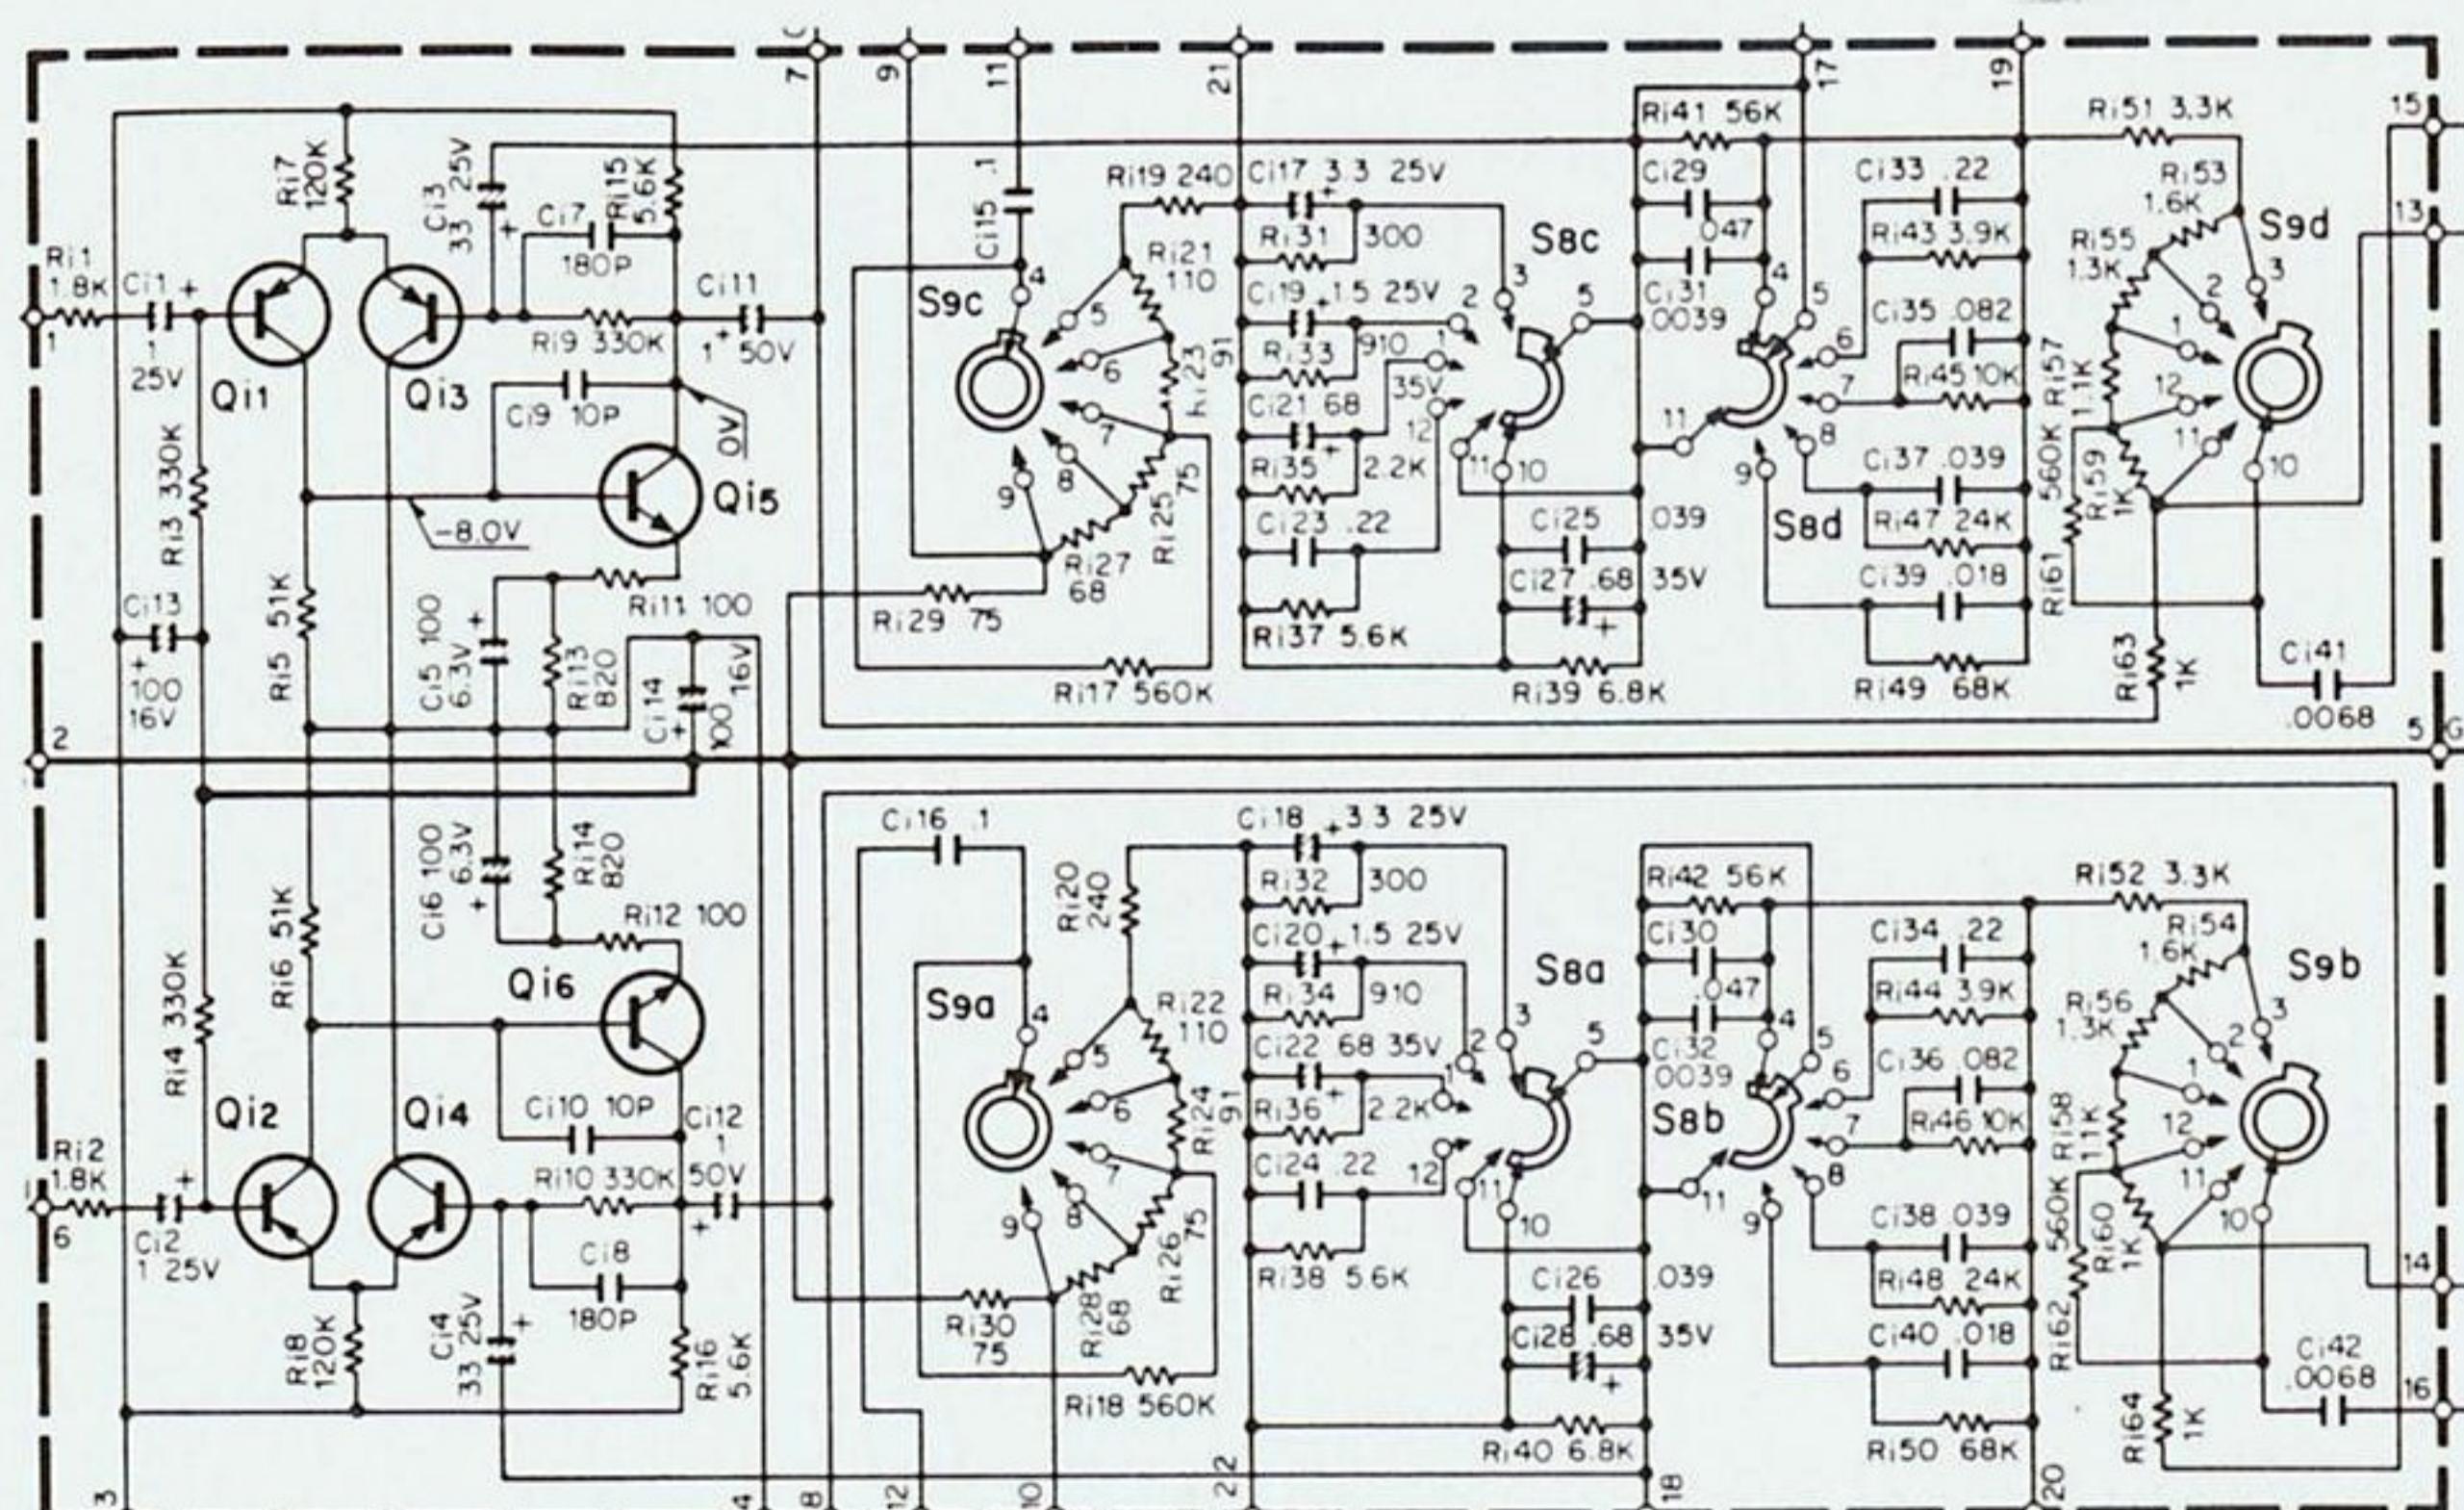

## PREAMP (X08-1330-10)

Metal can sealed monolithic IC is used here. This IC consists of the differential amplifier of the first stage and emitter followers of next stage, operating to provide Class A drive and pure complementary output. The circuit is a wide dynamic range circuit, operating with high input impedance and low output impedance and drawing two power supplied, positive and negative, and thus ensures stabilized equalizer characteristics.

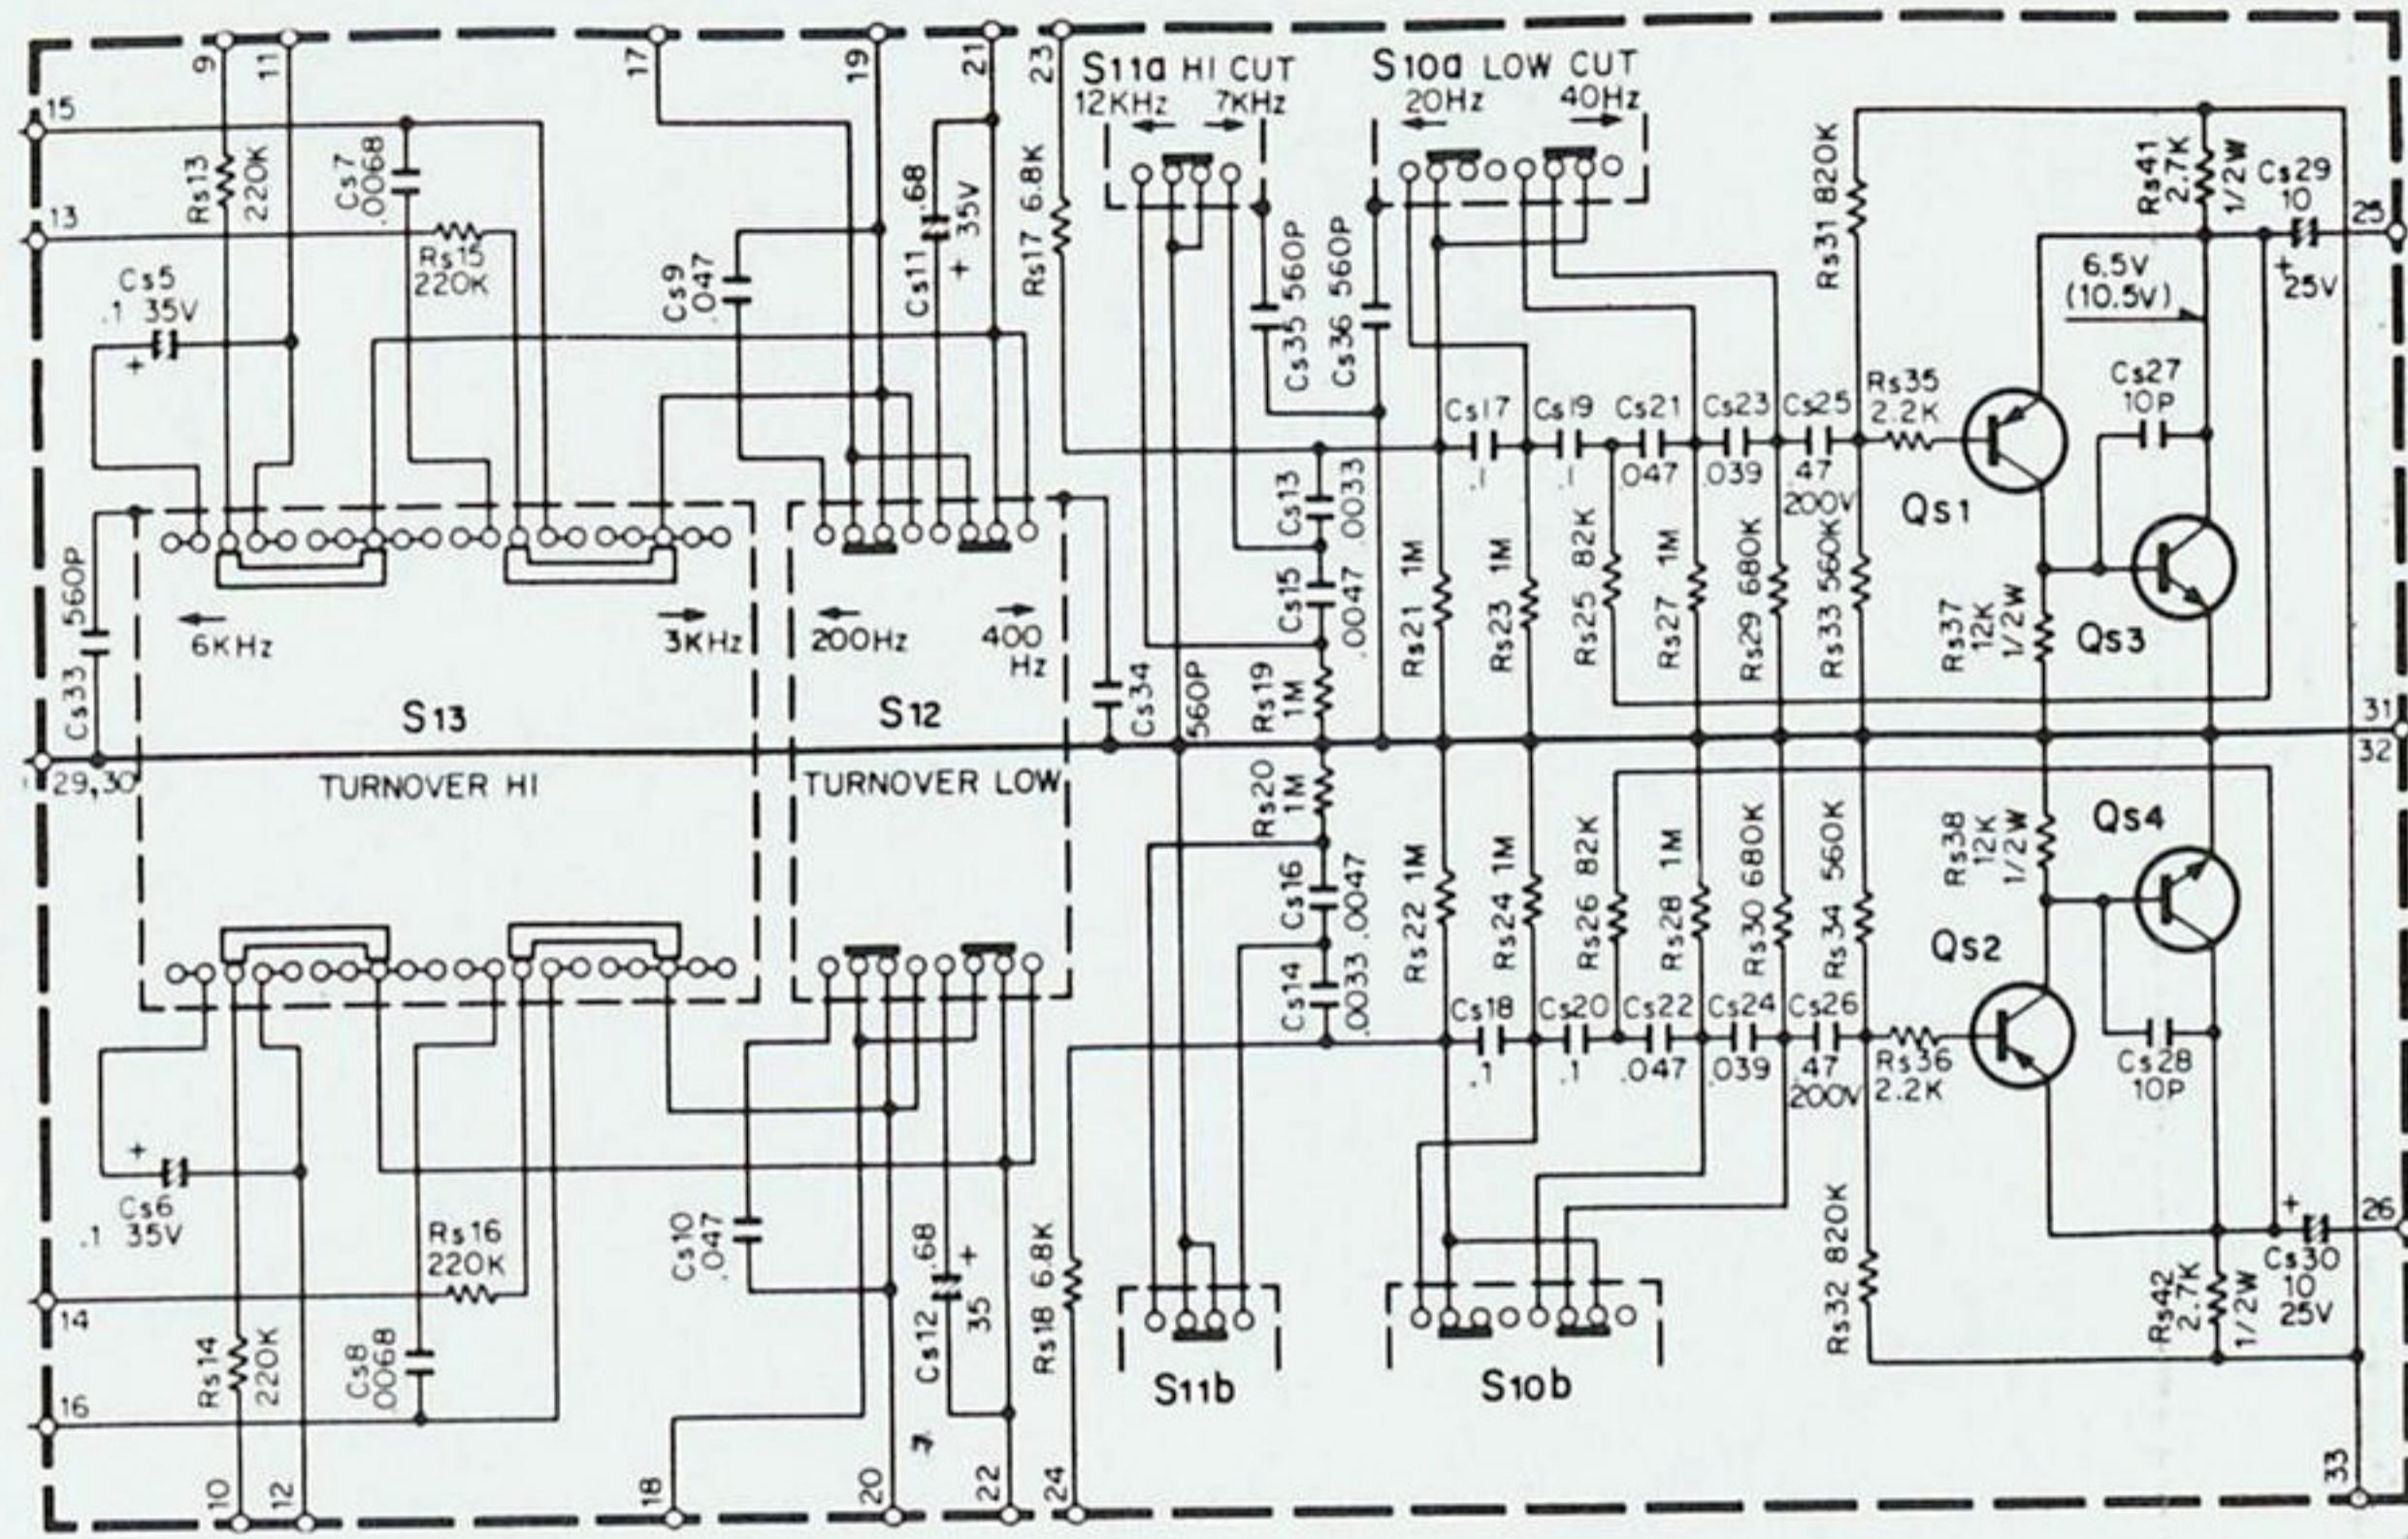

## TONE AMP (X11-1250-00)

This is a NF type tone control amplifier with two power supplies similar to preamp, and provides differential amplifier in the first stage.

## FILTER (X12-1090-00)

The circuit consists of PNP and NPN transistors and 100% negative feedback for each channel, therefore it has 0dB gain. Though it is no gain, the distortion factor is very low value.

## MAIN AMP (X07-1320-02)

Transistors are employed with all metal can sealed type. The first stage consists of differential amplifier which ensures good NFB effects and feeds the stabilized bias for a driver stage.

Transistors and thermistor for bias setting are used in the complementary circuit. Full temperature compensation is effected. Complementary and final circuitry consist of a direct-coupled pure complementary.

## PROTECTION CIRCUIT

Current limiter protection operates out of transistor's ASO (Area of Safe Operation). This protection circuit is accomplished by detecting the Ic of power transistor. Safeguard against overcurrent is decreased by the bias on the complementary stage. For DC drifts of the center voltage level, a relay is employed to cut the speaker line out of service when the center level drifts more than  $\pm 7$  volts. This protective action, as well as the ASO protection mentioned above, is self-return. All these protective schemes operate free from the influence of speaker load impedance. Confirm the current limiter protection to operate. The following is the method: connect the dummy resistor to both speaker terminals, and the oscilloscope across the dummy resistor of the left channel. And then feed the signal (1 kHz) to AUX jack of the amp. Next short-circuit the right speaker terminal, and the left output is increase. Other channel in the same.

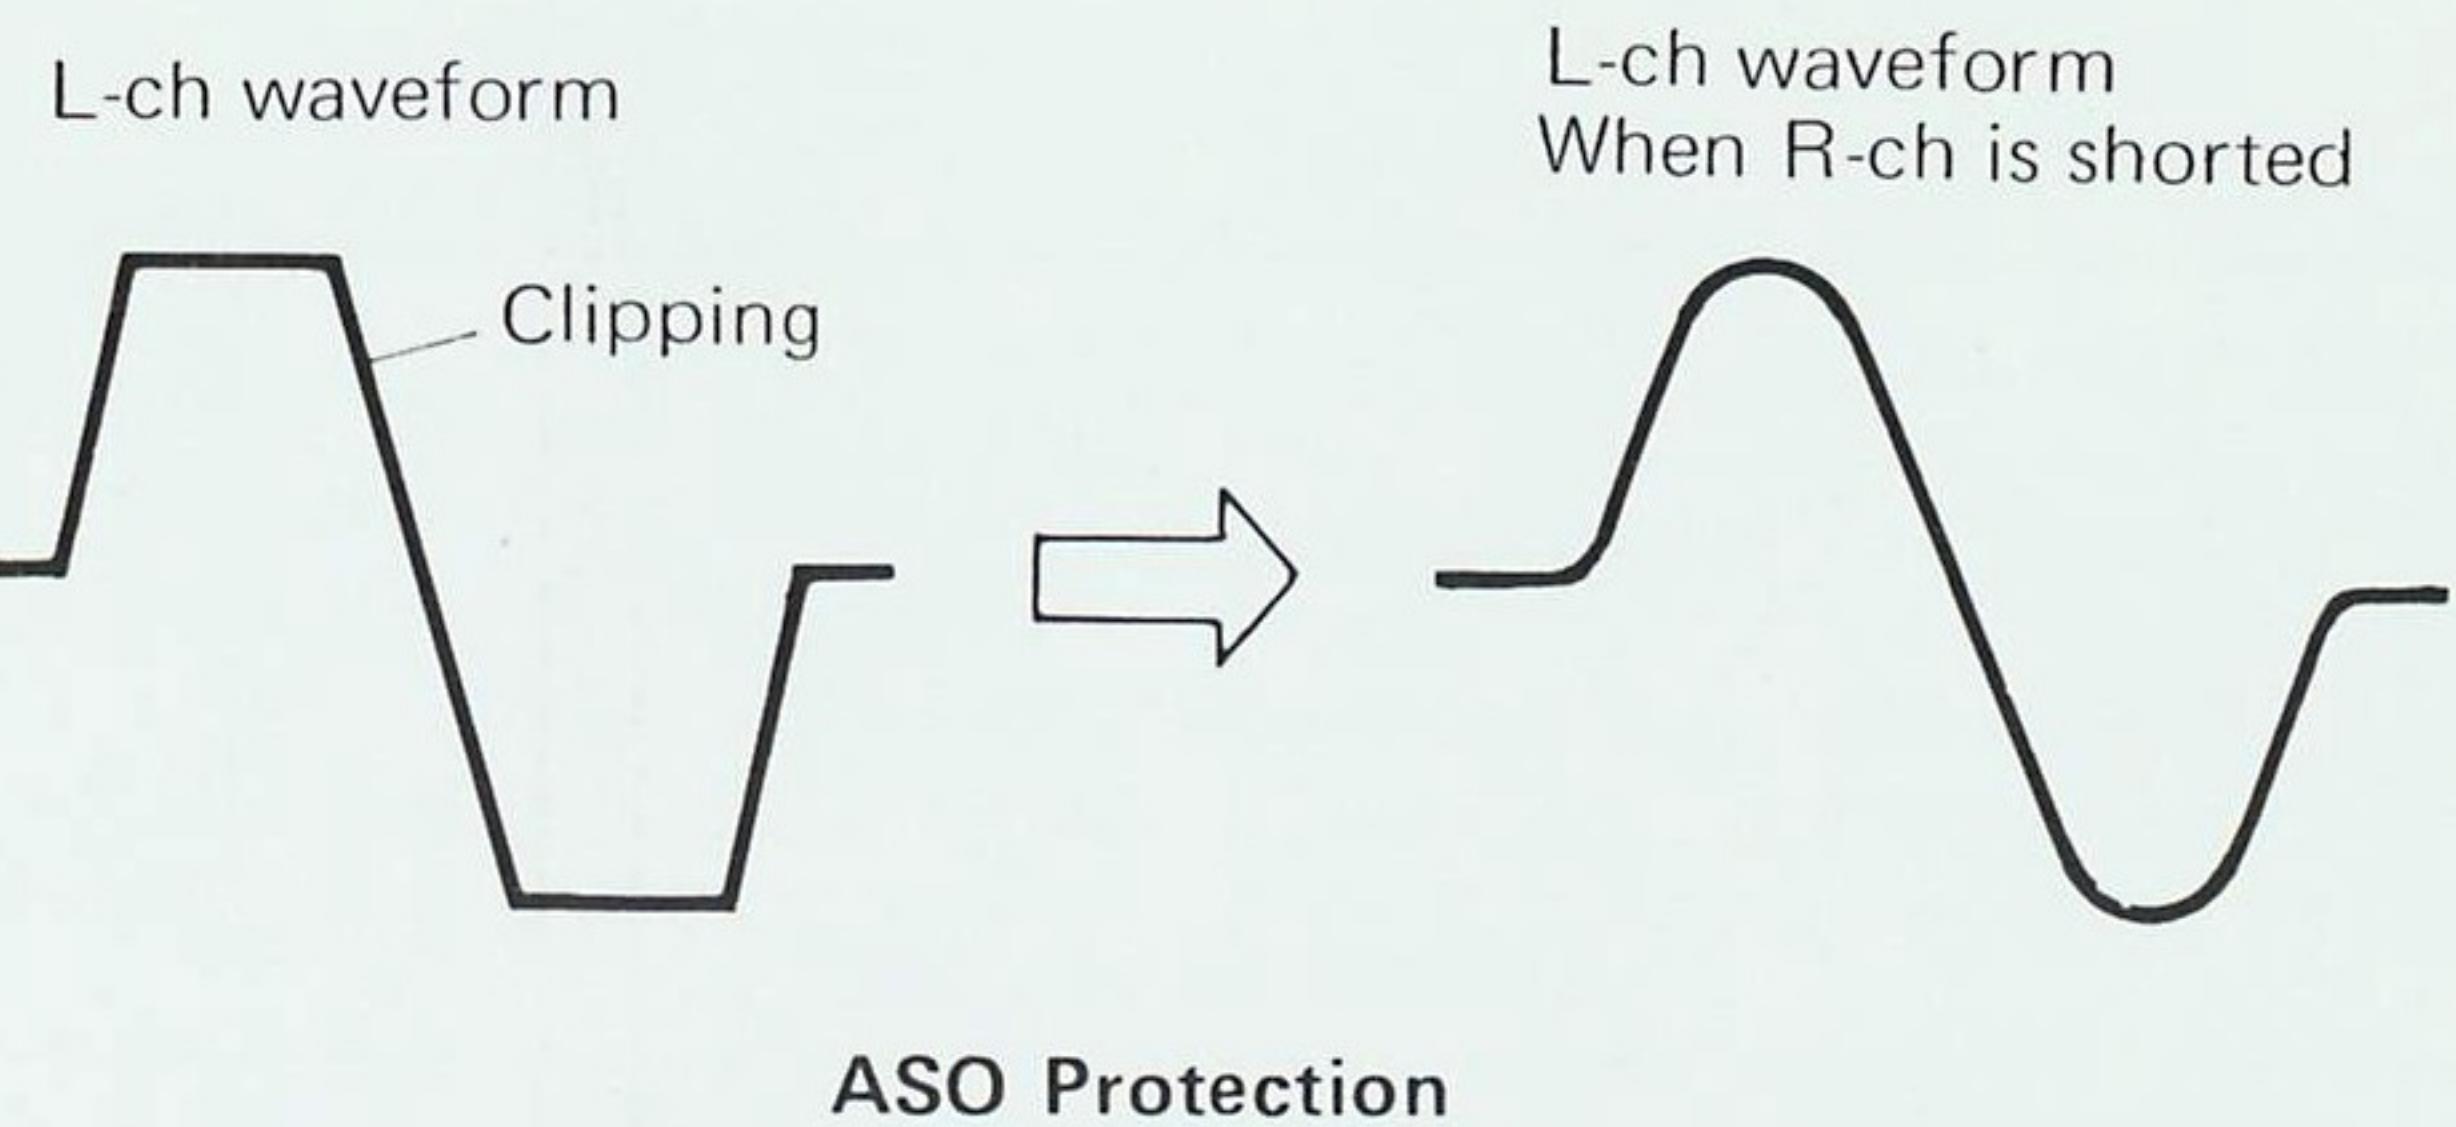

## MUTING CIRCUIT

When the power switch is on, the protection relay does not operate to eliminate the shock noise from speaker. And then the relay operates after power switch is on.

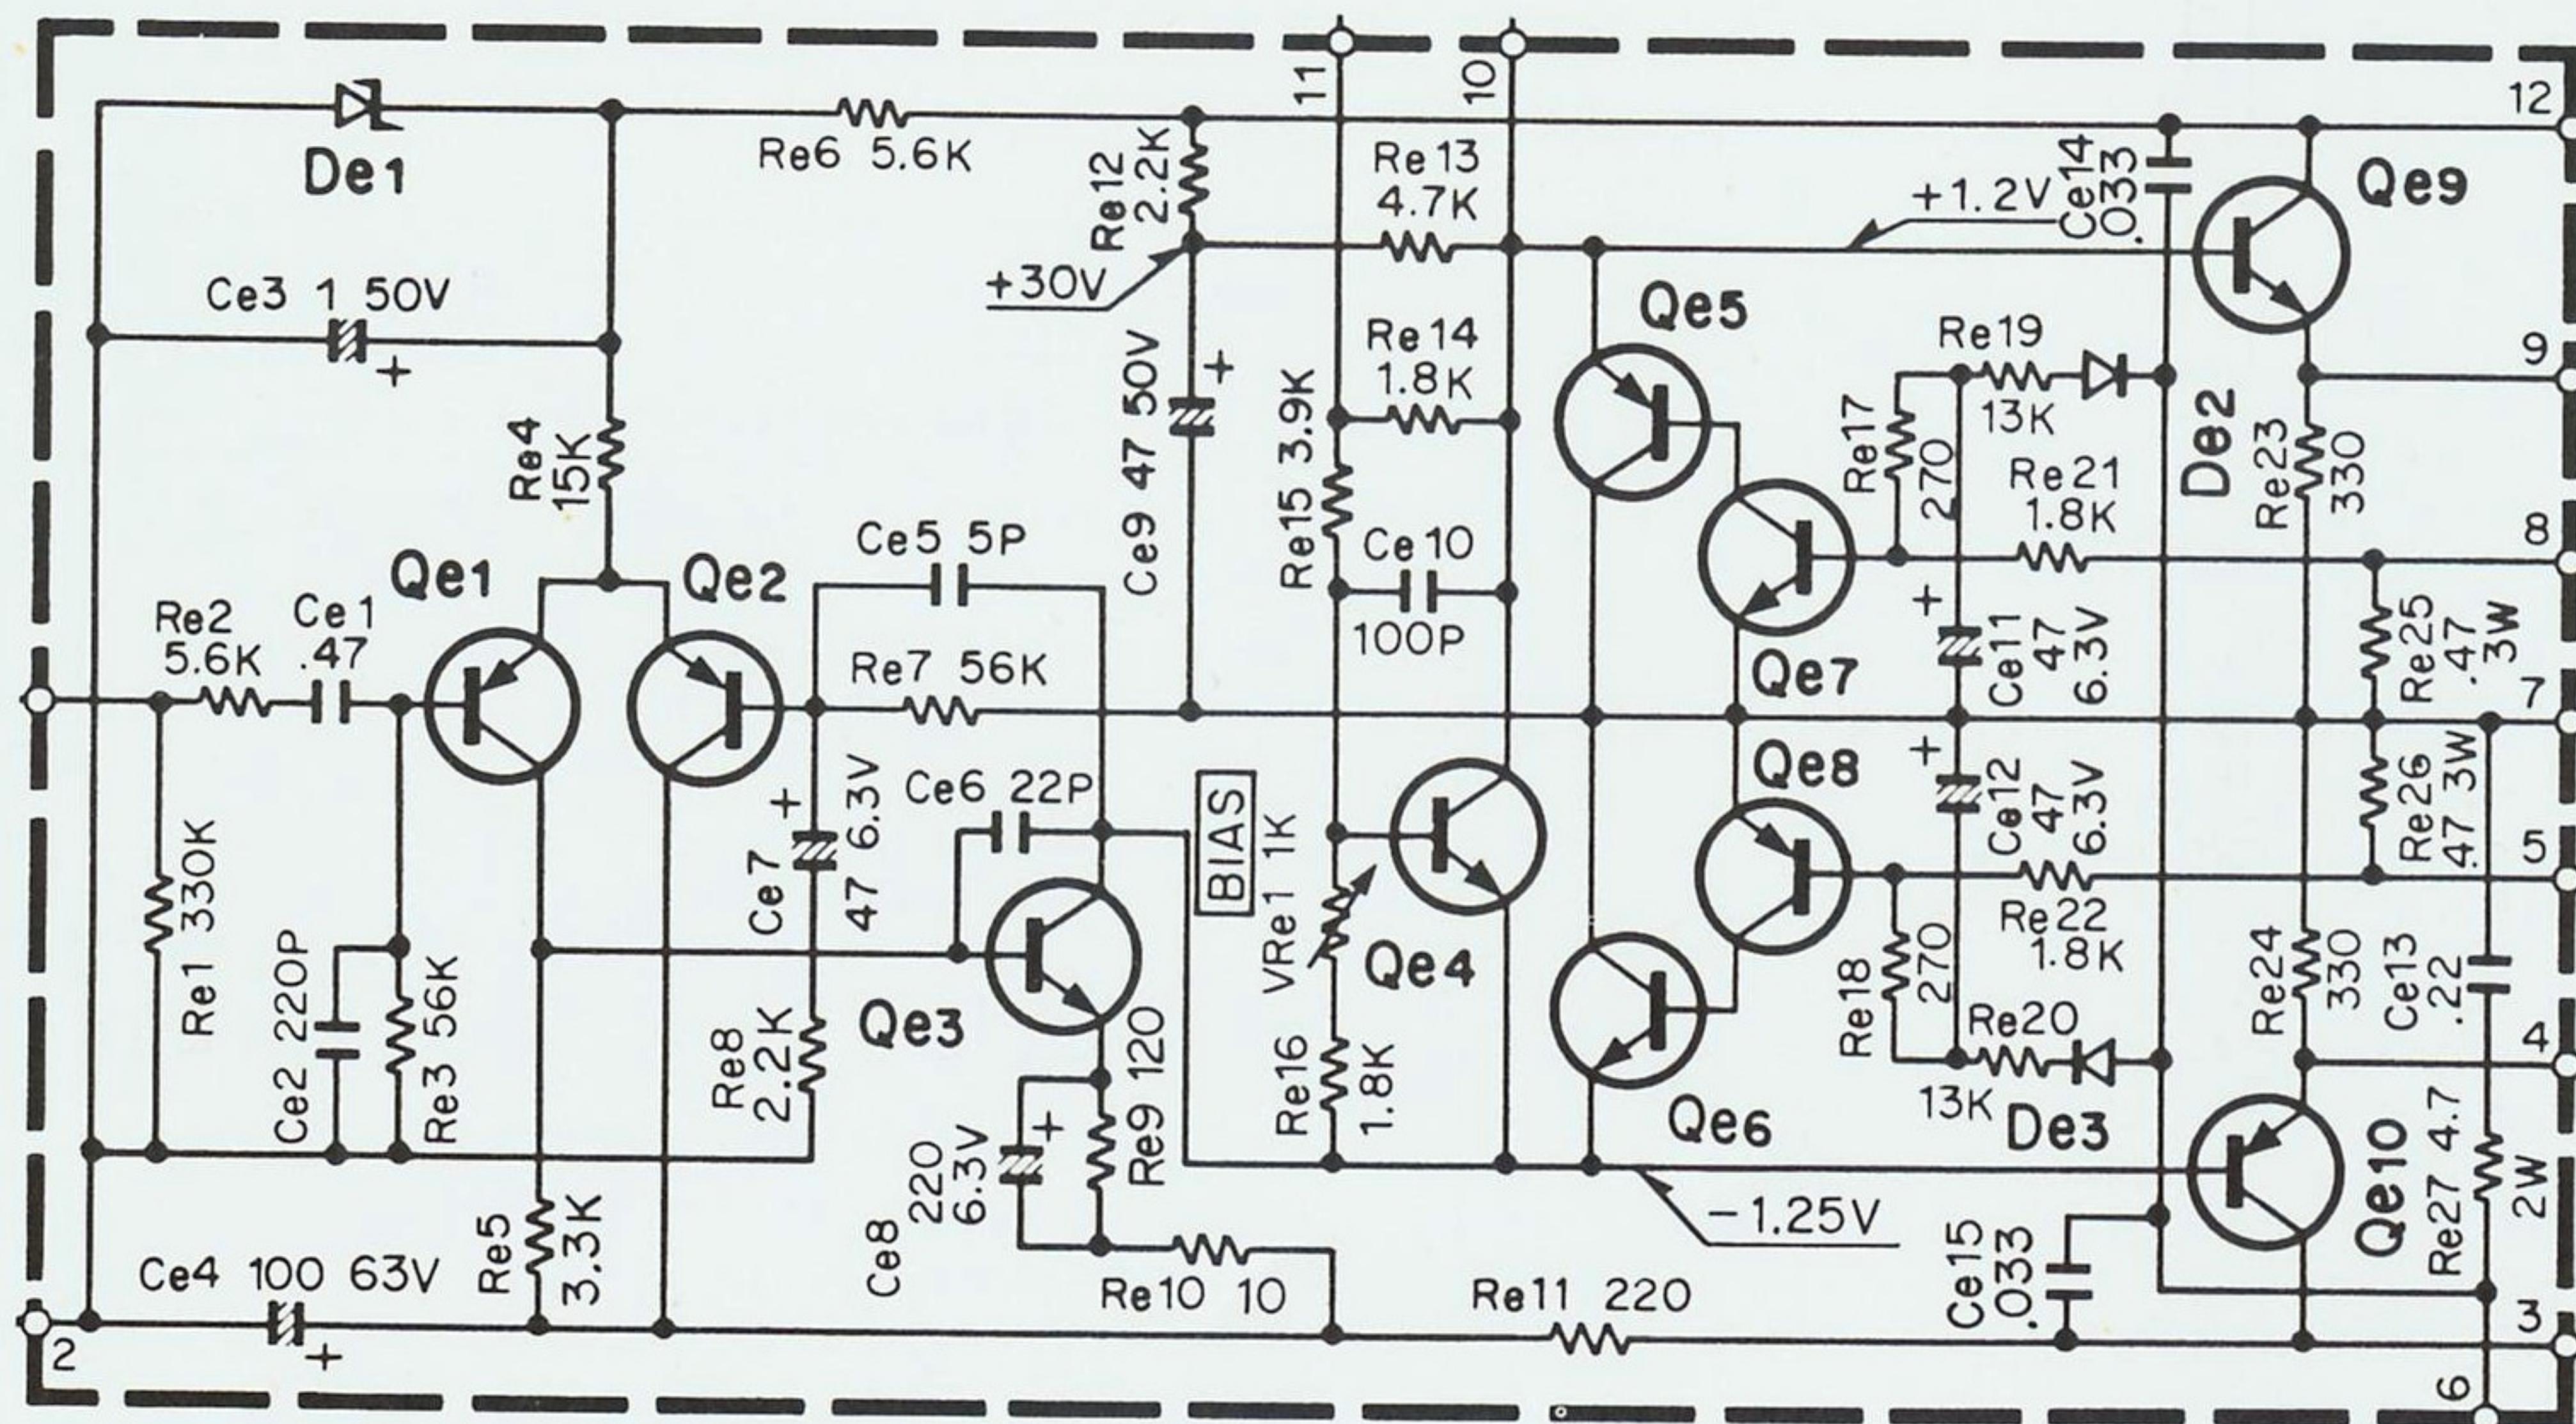

# ADJUSTMENT & TROUBLESHOOTING

## BIAS ADJUSTMENT

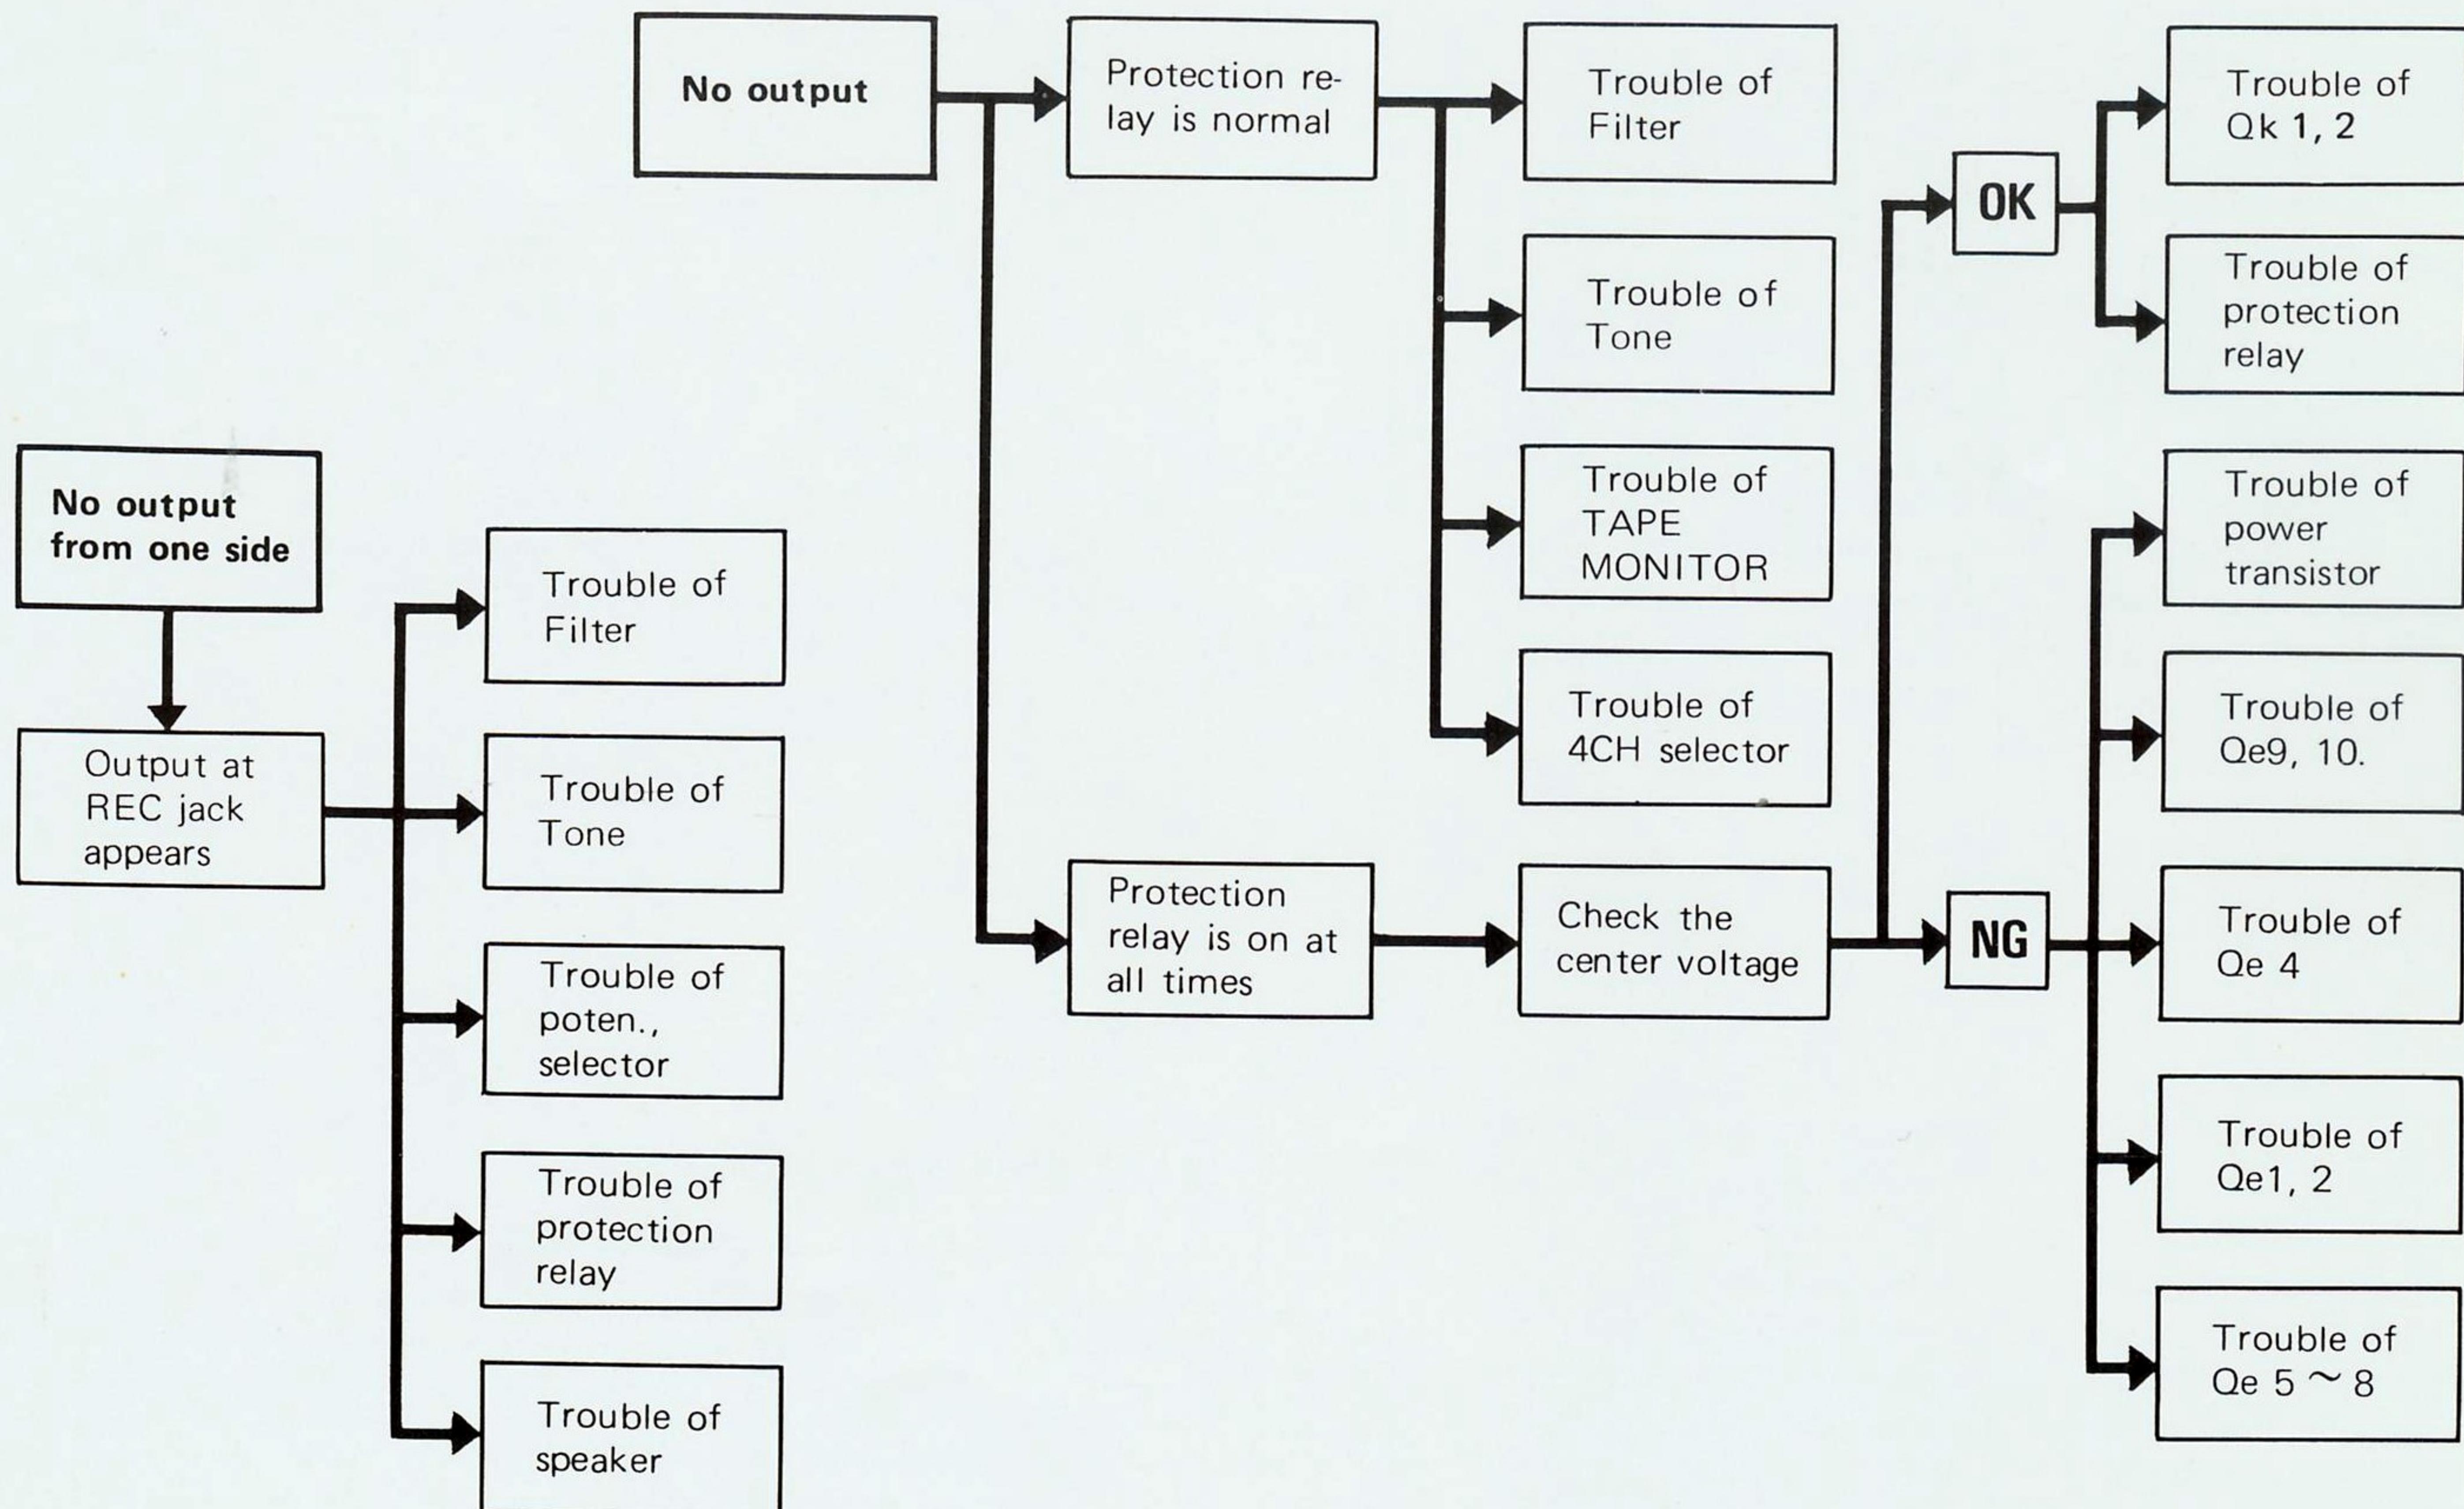

1. Turn the VOLUME to its mini.
2. Coupling the tester (ammeter) to the collector of power transistor.
3. Turn the pc trimmer potentiometer VRe1 so that the meter indicates 30mA.

ASO Protection

## TROUBLESHOOTING

## MAIN AMPLIFIER SECTION

### RMS Power Output

**Both channels driven**

70 x 2 watts into 8 ohms (20 Hz ~ 20,000 Hz)

73 x 2 watts into 8 ohms at 1,000 Hz

95 x 2 watts into 4 ohms at 1,000 Hz

85 x 2 watts into 8 ohms at 1,000 Hz

110 x 2 watts into 4 ohms at 1,000 Hz

**Each channel driven**

200 watts into 8 ohms

300 watts into 4 ohms

### Dynamic Power Output

0.2% at rated power into 8 ohms

0.05% at 1/2 rated power into 8 ohms at 1,000 Hz

0.2% at rated power into 8 ohms

0.05% at 1/2 rated power into 8 ohms

### Inter Modulation Distortion

(60 Hz : 7 kHz = 4: 1)

### Power Band Width

6 Hz ~ 40 kHz

### Damping Factor

30 at 8 ohms

### Speaker Impedance

Accept 4 ohms to 16 ohms

## PRE-AMPLIFIER SECTION

### Input Sensitivity and Impedance

**Phono 1**

2.5mV, 50 K ohms, 30 K ohms

**Phono 2**

2.5mV, 50 K ohms

**Tuner**

150mV, 50 K ohms

**AUX 1, 2**

150mV, 50 K ohms

**Tape Play A, B 4CH IN**

150mV, 50 K ohms

**Mic**

2.5mV, 50K ohms

### Maximum Input Voltage (rms)

**Phono 1, 2**

250mV, T.H.D. 0.2% at 1,000Hz

### Signal to Noise Ratio (IHF A Curve)

**Phono 1,2**

76 dB

**Tuner**

90 dB

**AUX 1, 2**

90 dB

**Tape Play A, B**

90 dB

**Mic**

76 dB

### Output Voltage and Impedance

**Tape Rec. A, B (Pin)**

150mV, 50 ohms

**(Din connector)**

40mV, 70 K ohms

**4CH Out**

150mV, 50 ohms

### Frequency Response

**Phono 1, 2**

RIAA Standard curve ±0.2 dB

**Tuner, AUX, Tape Play**

10 Hz ~ 20,000 Hz +0 dB

-1 dB

### Tone Controls

**Bass T.Over 400 Hz**

±10 dB at 100 Hz

**200 Hz**

±10 dB at 50 Hz

**Treble T.Over 3 KHz**

±10 dB at 10,000 Hz

**6 KHz**

±10 dB at 20,000 Hz

**Loudness Control (-30 dB)**

+8 dB at 100 Hz

+3 dB at 10,000 Hz

**Low Filter 20 Hz**

12 dB/oct

**40 Hz**

12 dB/oct

**High Filter 7 KHz**

6 dB/oct

**12 KHz**

6 dB/oct

## GENERAL

### Switches

**Speaker Selector**

OFF, A, B, A + B, C

**Input Selector**

Mic, Phono 1, 2, AUX 2 – Tuner AUX 1

**Mode**

L, R, STEREO, REV, MIX

**Function**

Muting, Loudness, Turn Over, Low High-Filter

**Tape Monitor**

A, B, A → B, B → A

### AC Outlet

Switched 2, Unswitched 1

### Power Consumption

415 watts at full power

30 watts at no signal

### Dimension

W 17-1/8" (435 mm), H 6-3/16" (157 mm)

D 11-13/16" (300 mm)

### Weight

29.7 lbs (13.5 kg)

**NOTE:** We reserve the right to make modifications in this model in accordance with technical developments.
