necessary.)

### Caution

#### *Operation to reset*

The microcomputer may fall into malfunction (impossibility to operate, erroneous display, etc.) when the power cord is unplugged while power is ON or due to an external factor. In this case, execute the following procedure to reset the microcomputer and return it to normal condition.

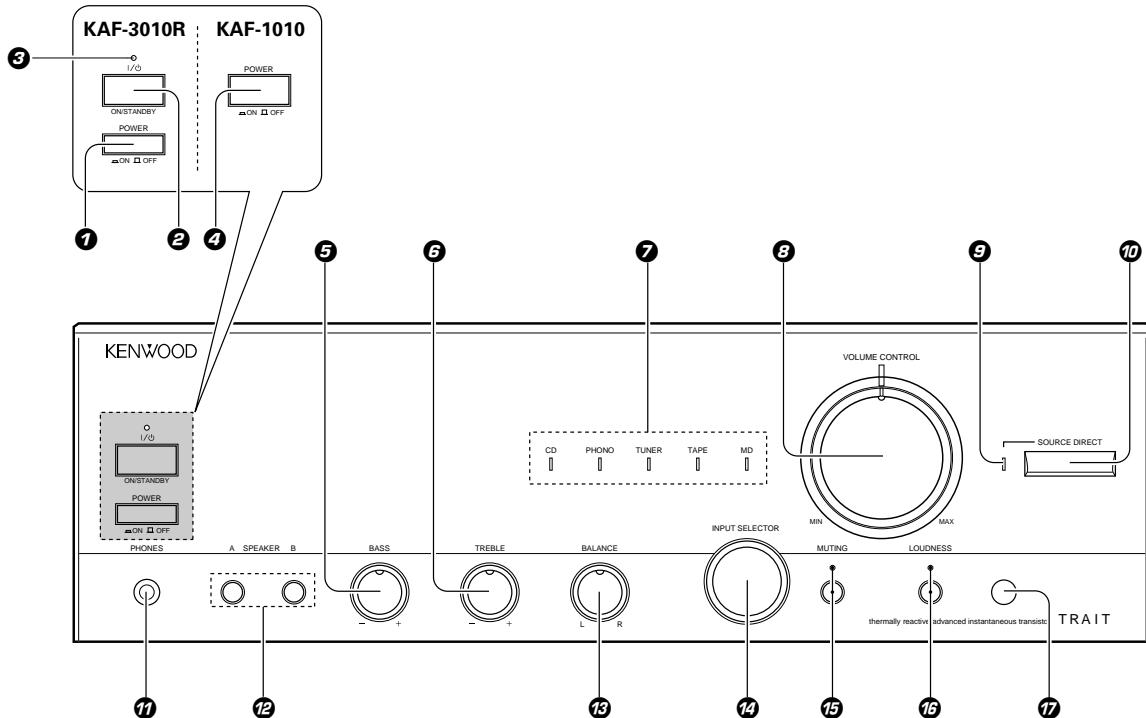

**Set the POWER to OFF then, while holding down the REMOTE POWER key, set the MAIN POWER key to ON.**

- Please note that resetting the microcomputer clears the contents stored in it and returns it to the condition when it left the factory.

## CONTROLS

### Main unit

#### ① POWER switch (KAF-3010R)

Usually leave this switch to the on position.

When the unit is not to be used for a long period of time, set the switch to the OFF position for safety.

#### ② ON/STANDBY key (KAF-3010R)

This key effective when the POWER key is set to the on (standby) position, and pressing this key turns power ON and off (standby).

#### ③ Standby indicator (KAF-3010R)

#### ④ POWER switch (KAF-1010)

#### ⑤ BASS knob

To adjust low frequencies.

#### ⑥ TREBLE knob

To adjust high frequencies.

#### ⑦ INPUT indicator

An indicator lights for the source selected with the INPUT SELECTOR knob.

#### ⑧ VOLUME CONTROL knob

Adjust the volume.

#### ⑨ SOURCE DIRECT indicator

Usually leave this switch to the on (standby) position.

#### ⑩ SOURCE DIRECT key

To listen to a source with high quality sound.

#### ⑪ PHONES jack

Used for headphone listening.

#### ⑫ SPEAKERS A/B switches

Press to select the A and/or B speaker systems.

#### ⑬ BALANCE knob

Adjust the volume balance between left and right.

#### ⑭ INPUT SELECTOR knob

Turn to select the input sources.

#### ⑮ MUTING key/indicator

Mute the sound temporarily.

#### ⑯ LOUDNESS key/indicator

Use to emphasize deep bass sounds.

#### ⑰ Remote sensor(KAF-3010 ONLY)

#### About the standby indicator (KAF-3010R only)

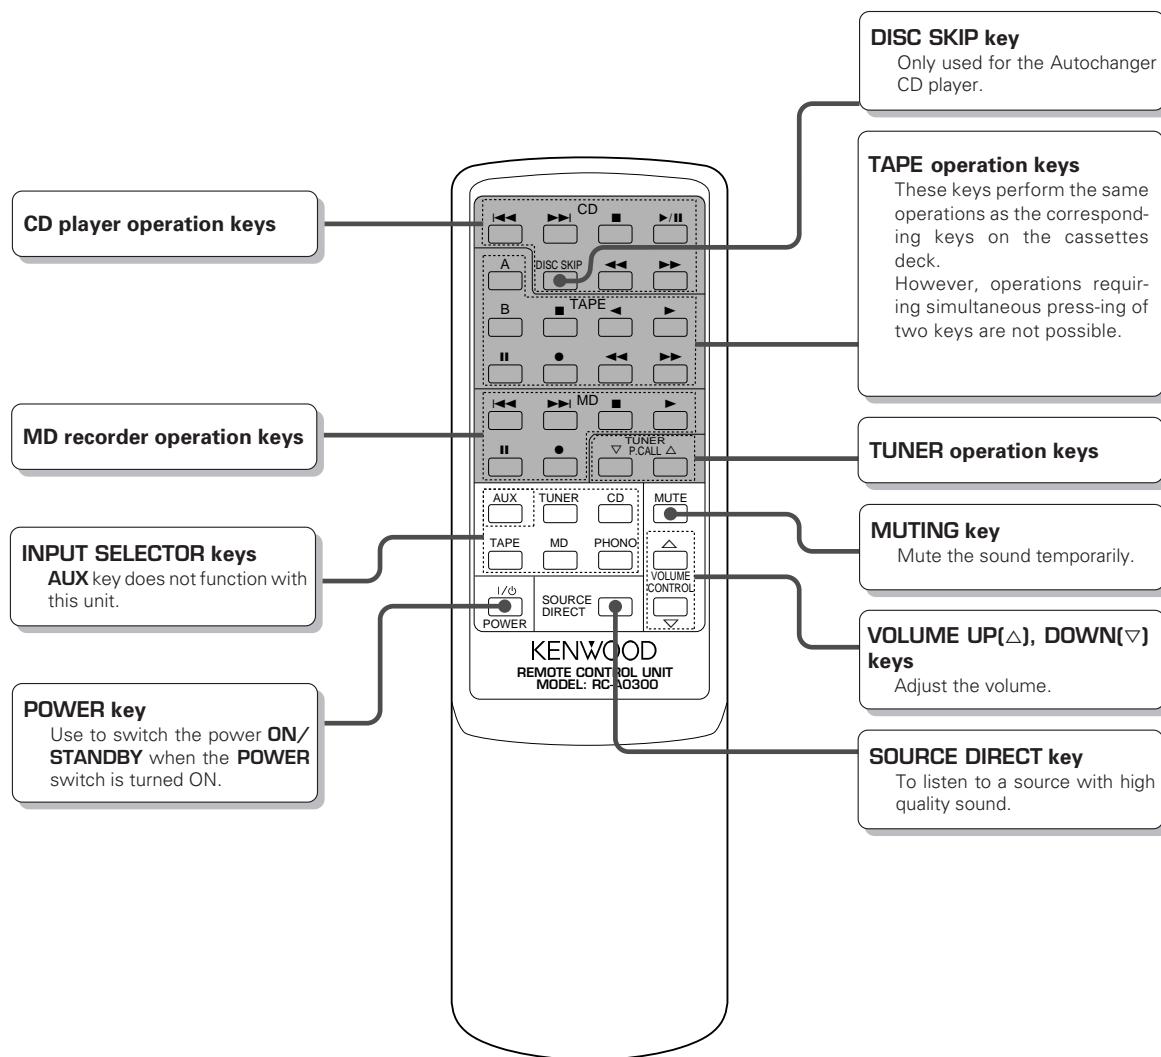

This unit has a standby indicator that lights to show that a small amount of current is being supplied to the unit in order to preserve the memory. This is called the Standby mode. When the Standby indicator is lit, the amplifier can be switched ON / STANDBY from the remote control.

**CAUTION:** For continued safety, replace safety critical components only with manufacturer's recommended parts (refer to parts list).  $\Delta$  indicates safety critical components. For continued protection against risk of fire, replace only with same type and rating fuse(s). To reduce the risk of electric shock, leakage-current or resistance measurements shall be carried out (exposed parts are acceptably insulated from the supply circuit) before the appliance is returned to the customer.

The DC voltage is an actual reading measured with a high impedance type voltmeter with no signal input. The measurement value may vary depending on the measuring instruments used or on the product.
