RESET

Resetting PowerPad

If you want to reconfigure PowerPad, you can reset it. You do not need to do this unless you experience a problem.

1. Open the cover and remove the batteries,
2. Use a pen or other thin-tipped object to press the blue button in the center of the battery case:

3. Reinstall the batteries and follow the instructions in this chapter to set up PowerPad again.

Receiver

If none of the above solutions work, reset the micro-processor:

(For USA and Canada)

1. Turn the receiver off.
2. Unplug the receiver.
3. Plug it back in while pressing and holding the Power button (you may need someone else to help you do this)
4. Continue to hold the Power button for more than 1 second.

(For Other Countries)

1. Turn the receiver off. (The Power button is OFF position.)
2. Press ON/STANDBY button while pressing and holding the Power button.
3. Continue to hold the Power button for more than 1 second.

CAUTION: For continued safety, replace safety critical components only with manufacturer's recommended parts (refer to parts list). Δ indicates safety critical components. For continued protection against risk of fire, replace only with same type and rating fuse(s). To reduce the risk of electric shock, leakage-current or resistance measurements shall be carried out (exposed parts are acceptably insulated from the supply circuit) before the appliance is returned to the customer.

The DC voltage is an actual reading measured with a high impedance type voltmeter as the AM/FM signal generator is specified to the conditions as shown in the list below. The measurement value may vary depending on the measuring instruments used or on the product. The value shown in () is actual reading measured in the AM mode.

MODE	CARRIER	MODULATION		ANT INPUT

FM	98MHz	1kHz	STEREO 67.5kHz 7.5kHz(Pilot)	60dB
AM	1000(999)kHz	400Hz	MONO 30% MOD	60dB
