SERVICE MANUAL

(MIDI M-29/M-49)

KENWOOD

© 1995-9 PRINTED IN KOREA
B51-5107-00(N)2584

Cord with connector (15P)
(E30-2673-05)

In compliance with Federal Regulations, following are reproductions of labels on, or inside the product relating to laser product safety.

KENWOOD-Corp. certifies this equipment conforms to DHHS Regulations No. 21 CFR 1040. 10, Chapter 1, Subchapter J.

DANGER : Laser radiation when open and interlock defeated. AVOID DIRECT EXPOSURE TO BEAM.

PRECAUTIONS FOR REPAIR
DP-29 does not have a power supply transformer. Use RX-29, RX-49 or PS-94UA power supply to supply power.

BLOCK DIAGRAM

ADJUSTMENT

Since this CD system incorporates the following automatic adjustment function, when the pickup is replaced, it is not necessary to readjust it.

Since this CD unit does not need adjustment, the combination of PWB and laser pickup unit is not restricted.

• Automatic adjustment item

1. Focus offset (Fig.1)
2. Tracking offset (Fig.2)
3. E/F balance (Tracking error balance) (Fig.3)
4. RF level AGC function (HF level : constant)
5. RF level automatic follow-up of the tracking gain

This automatic adjustment is performed each time a disc is changed. Therefore, each disc is played back using the optimal settings.

Fig.1

Fig.3

Fig.2

Fig.4 Checking points

ADJUSTMENT

• The CD operating keys work.

Check the Focus-HF system.

Playback can be performed without a disc.

Yes

Does the pick-up move up and down twice?

Yes

Focus search OK.

No

Does the output waveform of IC1 (16) (FD) match that shown in Fig.2?

Yes

Check the area around IC5-CNP2.

No

Check the IC1 (50) (CLK) line, 4MHz.
Check the microprocessor data on pins (51) (CL), (52) (DAT) and (53) (CE).

Fig.5

• Playback can only be performed when a disc is loaded.

Is the Focus servo active? (Can you hear it working?)

No

Check the laser diode driver.
Check the area around IC1 (16)-(21) (Focus servo circuit).

Yes

Does the DRF signal change from "L" to "H"?

No

If the disc is not turning, the DRF should not change to "H".

Yes

Check the spin system.

Yes

Is HF waveform normal (See the Fig.6,7)?

No

Level is abnormal.

Yes

Check the periphery of IC1 pins 41 and 42.

Yes

Check the tracking system.

No

Waveform is unstable.

Yes

Check the spin system.

- The DC voltage is an actual reading measured with a high impedance type voltmeter. The measurement value may vary depending on the measuring instruments used or on the product. Refer to the voltage during PLAY unless otherwise specified; The value shown in () is the voltage measured at the moment of STOP.

CAUTION : For continued safety, replace safety critical components only with manufacturer's recommended parts (refer to parts list).
⚠ Indicates safety critical components. For continued protection against risk of fire, replace only with same type and rating fuse (s). To reduce the risk of electric shock, leakage-current or resistance measurements shall be carried out (exposed parts are acceptably insulated from the supply circuit) before the appliance is returned to the customer.

SPECIFICATIONS

Laser Semiconductor laser
Playing rotation 200 rpm~500 rpm (CLV)
Wow & flutter Unmeasurable limit

[General]

Dimensions W : 360 mm (14-3/16")
H : 109 mm (4-5/16")
D : 320 mm (12-5/8")
Weight (net) 2.7 kg (5.9 lb)

KENWOOD follows a policy of continuous advancements in development. For this reason specifications may be changed without notice.

Note :

Component and circuitry are subject to modification to insure best operation under differing local conditions. This manual is based on, the General Market (M) standard, and provides information on regional circuit modification through use of alternate schematic diagrams, and information on regional component variations through use of parts list.
