# DISASSEMBLY FOR REPAIR

## How to remove the switch unit

1. The switch unit (X13-5070-52) can be removed when its fixing pawls are removed from the front panel (1).
2. The escutcheon and the dial assembly can be removed when the escutcheon's pawls are removed from the P.C. board (2).
3. The power switch unit can be removed when its fixing pawls are removed from the front panel (3).

For Service Manuals Contact  
**MAURITRON TECHNICAL SERVICES**  
 8 Cherry Tree Rd, Chinnor  
 Oxon OX9 4QY  
 Tel:- 01844-351694 Fax:- 01844-352554  
 Email:- enquiries@mauritron.co.uk

## Removing the front panel

- For removing the front panel, extend the FIP retaining claws to the right and left and remove the FIP backward (4). Then remove the front panel while depressing the front panel bottom claws (5).

## Fitting the ground plate

- A grounding plate is fitted from the bottom plate side in the lower middle part of the front panel as a measure against static electricity. Exercise care at the time of removal of the front panel, as the tip of the grounding plate is inserted into the gap between the aluminium portion and the molded portion of the front panel (6).

# DISASSEMBLY FOR REPAIR/BLOCK DIAGRAM

## How to remove the P.C. board (X05) (A/2)

1. Remove two screws on the P.C. board (1).
2. Remove one unit holder (2).
3. Remove three rear panel fixing screws (3).
4. Raise the P.C. board upward together with the rear panel (4).

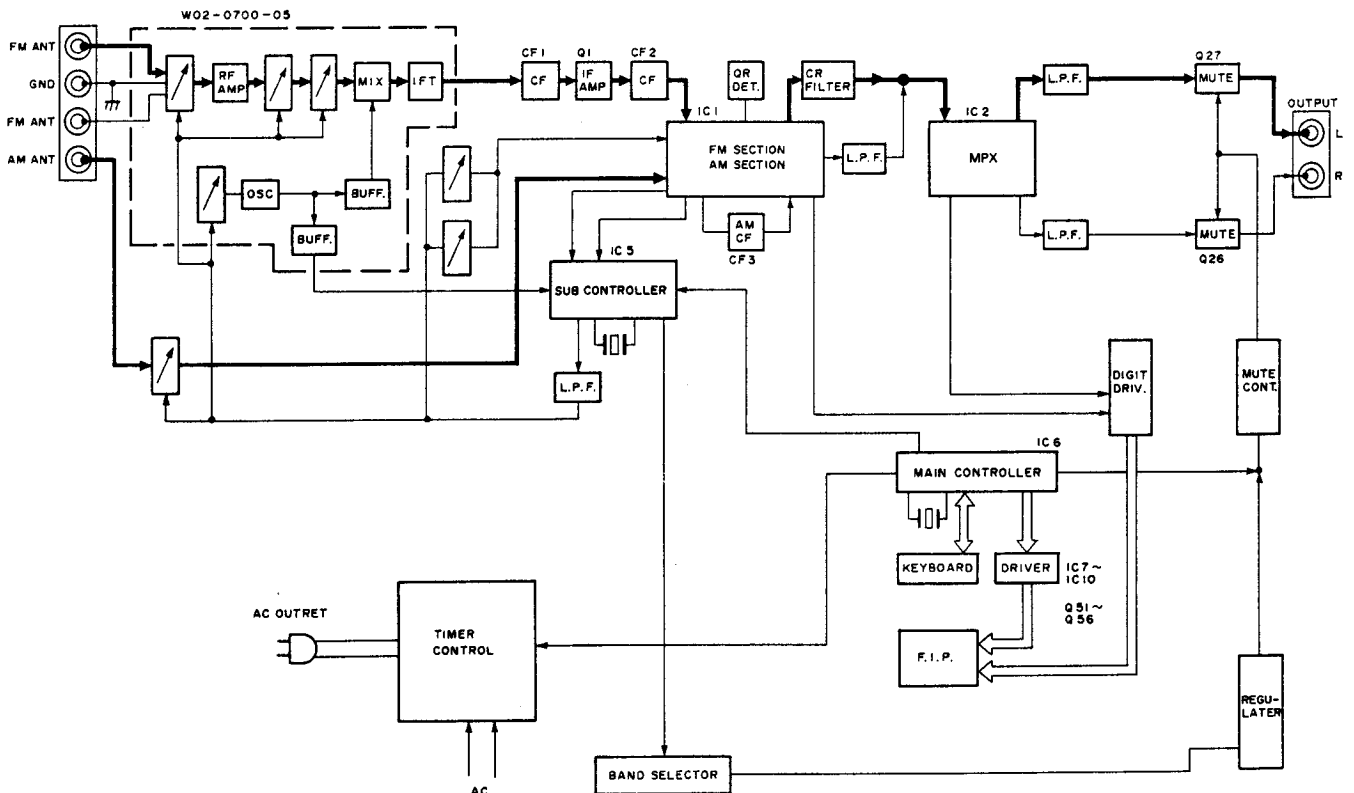

## How to remove the P.C. board (X05) (B/2)

1. Remove one screw on the P.C. board (5).
2. Remove one unit holder (6).
3. Remove the FIP from the pawls of the panel (7).
4. Raise the P.C. board upward (8).

## Function of components

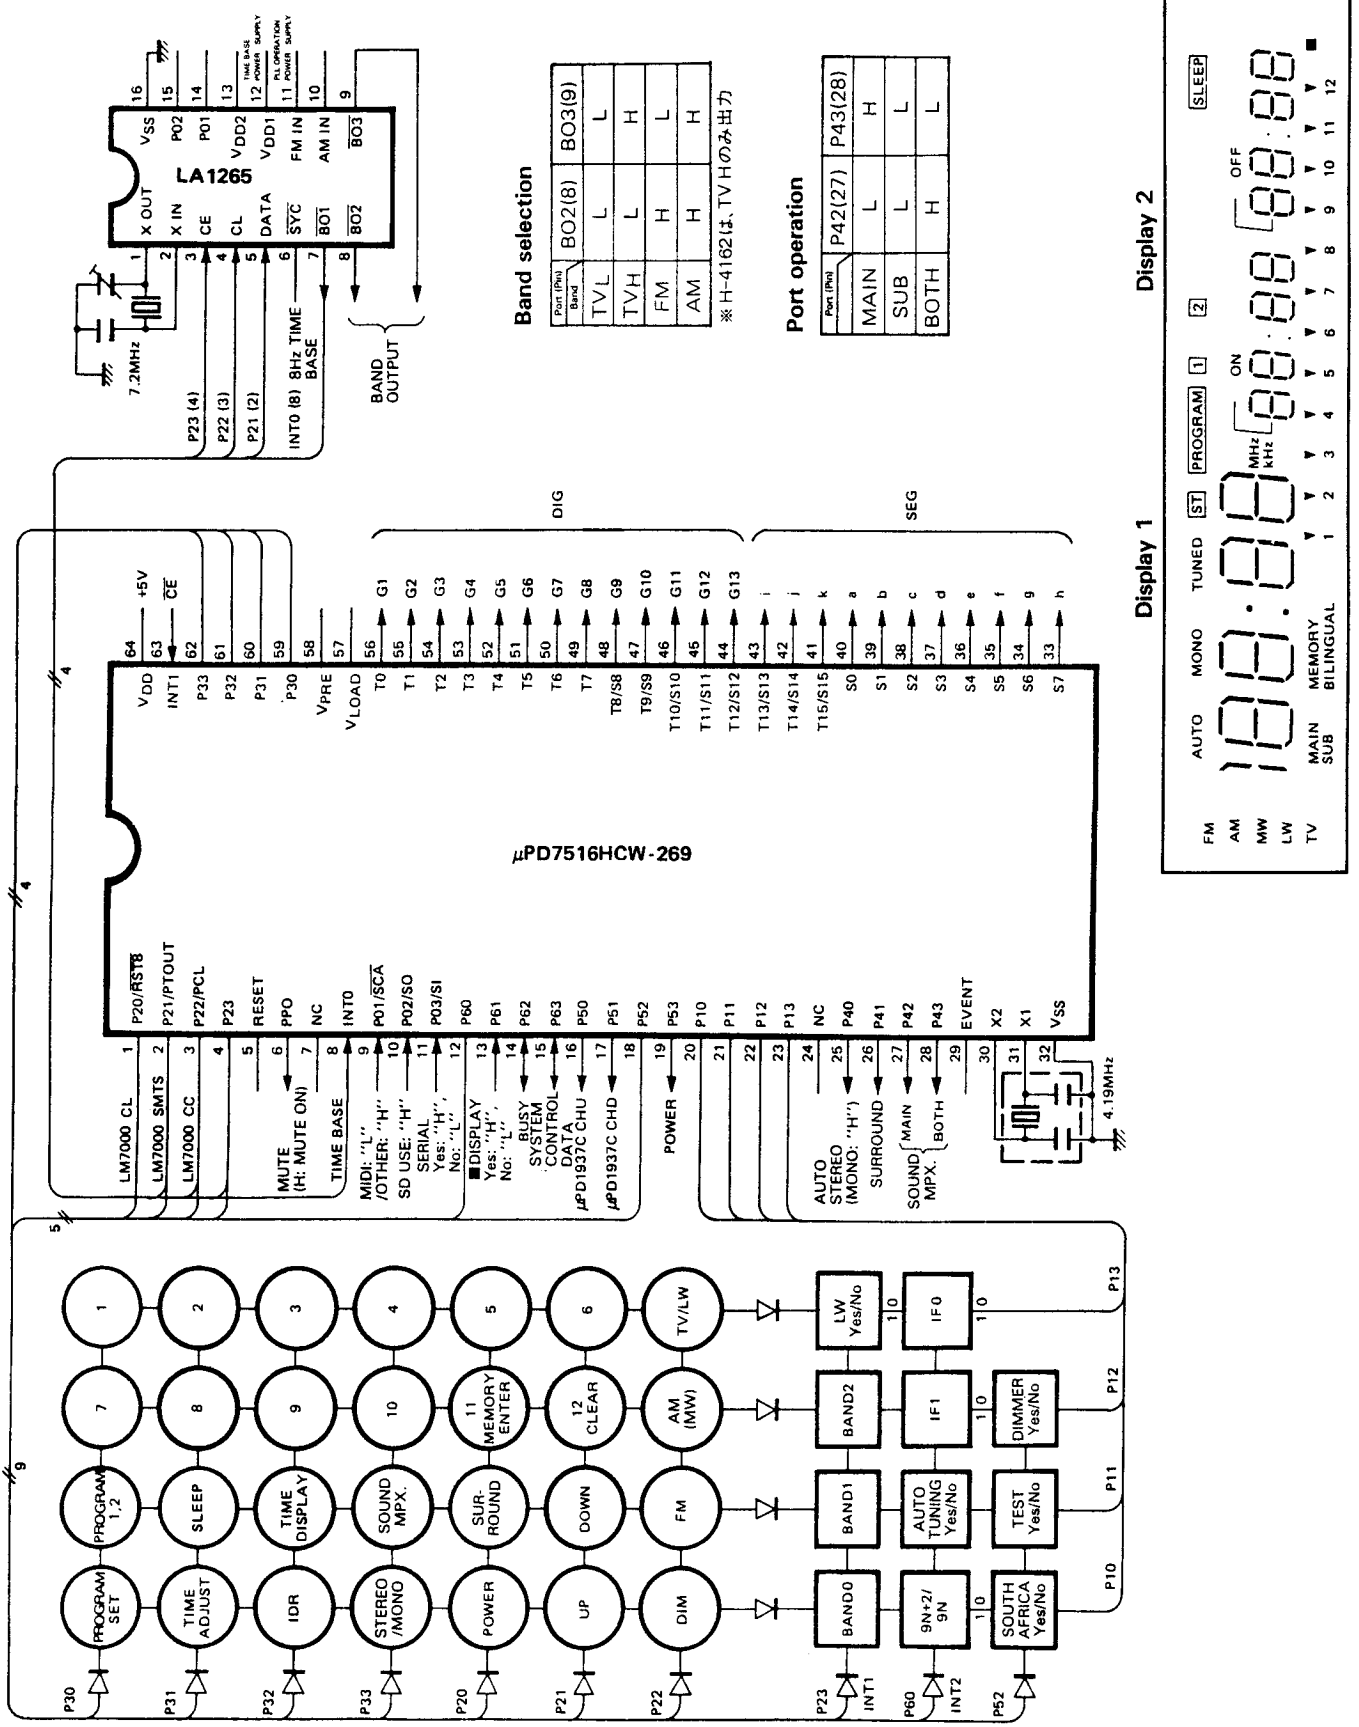

### Tuner unit (X05-3252-71)

Components	Use/Function	Operation/Condition/Interchangeability
IC1	AM/FM tuner (LA1265)	FM : IF AMP, Quadrature detection, AF pre-amp., tuning indicator, signal meter output AM : RF amp., oscillation, mixer, IF AMP. detection, AGC, OSC buffer, tuning indicator, signal meter output
IC2	MPX (AN7470)	For FM stereo
IC5	PLL frequency synthesizer (LM7001)	
IC6	Microcomputer ( $\mu$ PD7516HCW-269)	
IC7 ~ 10	FIP driver (LB1294)	
Q2	FM IF amp.	10.7MHz amp.
Q4	AM-FM switch	AM at switch OFF
Q5	Buffer	Impedance converter
Q6, Q7	AM RF select	RF selection of LW, MW
Q8, Q9	AM OSC select	OSC selection of LW, MW
Q10, Q11	L.P.F. select	L.P.F. selection of LW, MW
Q12, Q13	L.P.F.	L.P.F. of PLL
Q16 ~ 18	Band + B selector	ON/OFF with the control signal from LM7001
Q25	Inversion amp.	Auto stop control
Q26, 27	Mute switch	Muting during function selection
Q28	Mute driver	
Q29, 30	Mute control	
Q36	Mute control	Muting control at power OFF
Q37	A.V.R.	+12V
Q38	Power driver	ON/OFF of the +12V line
Q39	Power control	Power ON/OFF control
Q40	A.V.R.	+5V
Q52	Display driver	ST display (FIP)
Q53		TUNE display (FIP)
Q54		1 ~ 6 display (FIP)
Q55	Display control	Controls Q54 at power ON
Q56		+5V is supplied to Q52 and Q53 at power ON
Q57, 58	Channel select	T-7X : FM/AM channel frequency step selection
Q59		T-7LX : LW channel frequency step selection

# CIRCUIT DESCRIPTION

IC6:  $\mu$ PD7516HCW-269 Key matrix connection

# CIRCUIT DESCRIPTION

## IC6: $\mu$ PD7516HCW-269 Pin function

Terminal No.	Symbol	Name	I/O	Function												
1	P20		O	Key strobe signal, Normally "H"												
2	P21		O	Key strobe signal, Normally "H", Connected to LM7001 CL (No.4) pin												
3	P22		O	Key strobe signal, Normslly "H", Connected to LM7001 DATA (No.5) pin												
4	P23		O	Key strobe signal, Normally "L", Connected to LM7001 CE (No.3) pin												
5	RESET			Reset input pin. Pulse input when power plug is inserted into an AC outlet												
6	PPO	MUTE	O	Band select (active "H"), Muting signal during frequency scanning												
7	NC															
8	INTO	TIME BASE	I	Time base (8 Hz) input from LM7001												
9	P01		I	MIDI/Others assignment input; MIDI: "L", Others: "H"												
10	P02	SD	I	Stop signal input for auto tuning operation; When there is a station: "H", No station: "L"												
11	P03		I	With serial data: "H". Without serial data: "L", outputs the same logic signal as the POWER pin from BUSY (No.14) pin.												
12	P60		O	Key strobe signal, Normally "L"												
13	P61		I	Current assignment input of clock operation display; <input type="checkbox"/> No display: "H", <input type="checkbox"/> Display: "L"												
14	P62	BUSY	I/O	With serial data; During serial data output: "H", in normal input mode No serial data; POWER: "H", POWER OFF: "L"												
15	P63	DATA	I/O	Outputs data when serial data is output in normal input mode												
16	P50	UP	O	$\mu$ PC1362C, Normally "L", Connected to Channel UP pin												
17	P51	DOWN	O	$\mu$ PC1362C, Normally "L", Connected to Channel DOWN pin												
18	P52		O	Not used												
19	P53	POWER	O	Relay control signal output; POWER ON: "H", POWER OFF "L"												
20~23	P10~P13		I	Key return signal input port												
24	NC															
25	P40	MONO/STEREO	O	MONO/STEREO control pin; POWER OFF: "L", MONO: "H", AUTO: "L"												
26	P41	SURROUND	O	"L" and "H" are inverted by operating the Surround key. POWER OFF: "L"												
27	P42	MAIN	O	TV mode control pin, POWER OFF: "L"												
28	P43	BOTH	O													
				<table border="1"> <tr> <td></td> <td>P43</td> <td>P42</td> </tr> <tr> <td>MAIN</td> <td>L</td> <td>H</td> </tr> <tr> <td>SUB</td> <td>L</td> <td>L</td> </tr> <tr> <td>BOTH</td> <td>H</td> <td>L</td> </tr> </table>		P43	P42	MAIN	L	H	SUB	L	L	BOTH	H	L
	P43	P42														
MAIN	L	H														
SUB	L	L														
BOTH	H	L														
29	EVENT		I	Not used. Fixed at "H" or "L" as it is the input pin												
30	X2			System clock oscillation pin; 4.19 MHz												
31	X1															
32	V <sub>SS</sub>			GND (ground) pin												
33~40	S <sub>0</sub> ~S <sub>7</sub>		O	Flourescent display segment control pins for "a"~"h" display												
41~43	S <sub>13</sub> ~S <sub>15</sub>			Flourescent display segment control pins for "k"~"i" display												
44~56	T <sub>0</sub> ~T <sub>12</sub>		O	Flourescent display segment control pins for "G1"~"G13" display												
57	V <sub>LOAD</sub>			Power supply for flourescent display drive												
58	V <sub>PRE</sub>			Power supply for flourescent display pre-driver												
59~62	P30~P33		O	Key strobe signal, Normally "H"												
63	INT1	CE	I	Back up detection pin At the leading edge, the back up condition is activated by the interrupt which stops the clock.												
64	V <sub>DD</sub>			Power supply pin												

## OPERATION

### Clock setting

The clock employs 24 hour system.

**In case of power failure:** \_\_\_\_\_  
 When the time flashes on TIME display, this indicates a power failure occurred. Reset to the correct time.

### How to Set the Time

When the display is in frequency display mode, press the DISPLAY key to change to the time display.

OPERATION	DISPLAY WINDOW	COMMENT
1. Press ADJUST		The hour display on the left starts flashing.
2. Input the hour and minute using ten key (1 to 0)		24 hour display is used. Every input advances the flashing to the right by one. This indicates where to input the next.
Example		
9:05		Input in the order of 0 - 9 - 0 - 5
16:50		Input in the order of 1 - 6 - 5 - 0
		When 4 digits are input, the entire time display flashes. If a wrong time is input, press the CLEAR key and perform operation 2 and after.
		The entire time display illuminates and seconds are counted.
3. Press ENTER key.	 Illuminates.	Set the hour and minute according to operations 1 and 2. Use the time service from your TV, radio or telephone, then press ENTER key. This operation is practical and convenient. Pressing ADJUST key while setting the time brings the operation back to the first operation.

# OPERATION

## Timer function

The tuner has the function of a PROGRAM TIMER and SLEEP TIMER.

**PROGRAM TIMER** is for a timed playback or recording. Two sets of ON and OFF time are available within 24 hours. Set the PROGRAM TIMER key to STANDBY mode to repeat the same operation everyday.

For Service Manuals Contact  
**MAURITRON TECHNICAL SERVICES**  
 8 Cherry Tree Rd, Chinnor  
 Oxon OX9 4QY  
 Tel: 01844-351694 Fax: 01844-352554  
 Email: enquiries@mauritron.co.uk

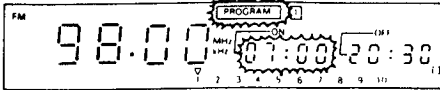

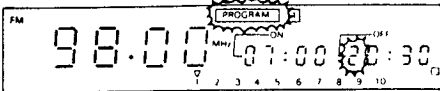

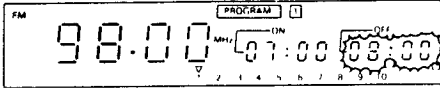

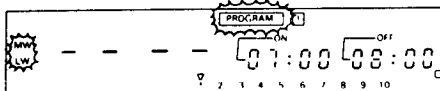

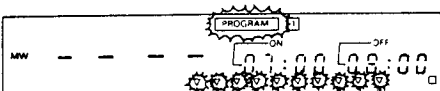

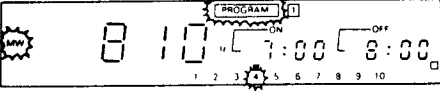

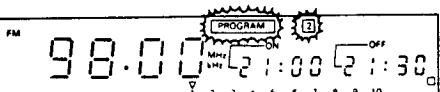

## How to set PROGRAM TIMER

Adjust to the present time before operating the PROGRAM TIMER. (see page 8)

Two sets of ON and OFF time are available on the TIMER, the band and preset channels can be programmed when the TIMER turns ON. Preset the station before the PROGRAM TIMER setting. Turn the power ON to start.

OPERATION	DISPLAY WINDOW	COMMENT
<b>PROGRAM 1 setting</b>	(Initial state)	
1. Press PROG (program)	<p>Example FM 98 MHz</p>	indicates a flashing display PROGRAM 1 flashes.
2. Press PROGRAM TIMER 1 & 2 to select PROGRAM 1.		Pressing PROGRAM TIMER 1 & 2 alternately flashes keys 1 and 2. Two programs for each key can be set.
3. Press ENTER		Wait till the preset time, then the timed program turns ON.
4. Input ON time by keys 1 to 0.		Pressing advances the flashing of the ON TIME DISPLAY to the right and the flashing indicates what to input. When 4 digits are input, the entire ON TIME DISPLAY flashes. When cancellation is necessary, press CLEAR to re-input.

# OPERATION

OPERATION	DISPLAY WINDOW	COMMENT
<p>5. Press ENTER key.</p> <p>6. Input OFF time by 1 to 0 keys.</p> <p>7. Press ENTER key.</p> <p>8. Press one of BAND SELECT or FM: [(AM: T-7X), (MW or LW: T-7LX)] key.</p> <p>9. Select the preset channel by 1 to 0 keys</p> <p>10. Press ENTER key.</p>	      <p style="text-align: center;">Example MW 810 kHz</p> 	<p>The entire ON TIME DISPLAY illuminates to indicate ON time is set. The left digit of the OFF TIME DISPLAY starts flashing.</p> <p>When the input is completed, the entire OFF TIME DISPLAY flashes. Press CLEAR key to cancel, start over from the beginning of the OFF time.</p> <p>The entire OFF TIME DISPLAY illuminates to indicate the OFF time is set. The display of FM, [(AM: T-7X), (MW or LW: T-7LX)] starts flashing. The frequency display becomes "-----".</p> <p>The pressed BAND key display illuminates and the PRESET CHANNEL indicator flashes.</p> <p>The selected PRESET CHANNEL indicator flashes and the preset frequency is displayed.</p> <p>BAND display and PRESET CHANNEL display illuminates to indicate the entire PROGRAM TIMER is set. The displays return to their original state in approx. 5 seconds.</p>
<p><b>PROGRAM 2 setting</b></p> <p>1. Press the PROG (program)</p> <p>2. Press PROGRAM TIMER 1 <math>\overline{2}</math> 2 to select PROGRAM 2.</p> <p>Repeat the instructions for PROGRAM 1 setting.</p>		<p>The characters on PROGRAM 2 flash.</p>

# OPERATION

## TIMER standby

Operation examples to function the timer are described below. In here, the current time is 00:00 and the 100.00 MHz FM broadcast is received.

OPERATION	DISPLAY WINDOW	COMMENT
<p><b>To function Program 1</b></p> <p>In this example, 98 MHz frequency, turn-on time of 21:00 and turn-off time of 21:30 are programmed:</p> <p>Press   <math>\Sigma</math> key so that 1 of the timer 1,2 indicator lights.</p>	<p>Contents of Program 1</p> <p>Approx. 5 seconds later</p>	<p>The contents of Program 1 are displayed approx. 5 seconds and only Program 1 is activated. Approx. 5 seconds later, the operation has been set and the frequency display returns to 100.00 MHz.</p> <p>By this operation, the power will be turned ON at 21:00 and turned OFF at 21:30.</p>
<p><b>To function Program 2</b></p> <p>In this example, 810 kHz frequency, turn-on time of 7:00 and turn-off time of 8:00 are programmed:</p> <p>Press   <math>\Sigma</math> 2 key so that 2 of the timer 1, 2 indicator lights.</p>	<p>Contents of Program 2</p> <p>Approx. 5 seconds later</p>	<p>The contents of Program 2 are displayed approx. 5 seconds and only Program 2 is activated. Approx. 5 seconds later, the operation has been set and the frequency display returns to 100.00 MHz.</p> <p>By this operation, the power will be turned ON at 7:00 and turned OFF at 8:00.</p>
<p><b>To function Program 1 and 2</b></p> <p>Press the   <math>\Sigma</math> 2 key so that 1 and 2 of the timer 1, 2 indicator light.</p>	<p>Contents of Programs</p> <p>Approx. 5 seconds later</p>	<p>The contents of the Program which will be turned on first are displayed approx. 5 seconds and both Programs (1 and 2) are activated. As the current time is 0:00, Program 2 will be turned ON first, so in this example, the contents of Program 2 are displayed approx. 5 seconds.</p> <p>Approx. 5 seconds later, the operation has been set and the frequency display in the display window returns to 100.00 MHz.</p> <p>By this operation, the power will be turned ON at 7:00 and OFF at 8:00, and also turned ON at 21:00 and OFF at 21:30.</p>

**Notes:**

Even though both timer 1 and 2 are programmed, when only the timer 1 is activated, the timer 2 does not function, and when only the timer 2 is activated, the timer 1 does not function.

For Service Manuals Contact  
**MAURITRON TECHNICAL SERVICES**  
 8 Cherry Tree Rd, Chinnor  
 Oxon OX9 4QY  
 Tel: 01844-351694 Fax: 01844-352554  
 Email: enquiries@mauritron.co.uk

## To deactivate the timer function

Now, 100.00 MHz FM broadcast is received.

OPERATION	DISPLAY WINDOW	COMMENT
<p>Press the   <math>\Sigma</math> 2 key so that both 1 and 2 of the timer 1, 2 indicator go off.</p>	<p>Approx. 5 seconds later</p>	<p>All the frequency and time indications are disappeared in the display window for approx. 5 seconds, and the timer function is deactivated.</p> <p>Then the frequency display in the display window returns to 100.00 MHz. By this, the timer will not function.</p>

# OPERATION

## To check the programmed contents

The contents of the timer 1 and 2 can be checked in sequence repeatedly by pressing the **1 2** key. When the timer function is not required, be sure to press the **1 2** key so that **1** and **2** of the timer 1, 2 indicator go off after checking the programmed contents.

**Notes:**

1. The timer operation functions only when the **1** or **2** of the timer 1, 2 indicator lights.
2. When the Program key is pressed or the POWER switch is turned ON/OFF between the ON-time and the OFF-time, the timer will not function correctly.
3. Set the program time so that Program 1 and 2 do not coincide each other. (See figure "Example".)
4. To function Program 1 and 2 continuously, be sure to leave more than 1 minute between the off-time of Program 1 and the on-time of Program 2.

**Example:** When receiving 98 MHz for one hour from 8:00 and 100.00 kHz for one hour from 9:00, set the ON-time of Program 1 to 8:00 and OFF-time to 8:59 and set the ON-time of Program 2 to 9:00 and OFF-time to 9:59.

5. If the timer function is left activated, the power will be supplied on the same time every day repeatedly. When the timer function is not required, deactivate the function according to "To deactivate the timer function".

6. During receiving the broadcast in the timer operable condition (with **1** or **2** of the timer 1, 2 indicator lit), when the timer-set time comes, the timer function is engaged.

At this time, the receiving broadcast station is changed to the programmed station. For this when recording the broadcast, be sure to check the programmed contents.

7. The programmed contents cannot be cancelled. If the timer function is not required, be sure to stop the function according to "To deactivate the timer function".

**Example:**

## How to set SLEEP TIMER

The sleep timer can be set every 10 minutes for maximum of 1 hour and the power is turned off at preset time.

OPERATION	DISPLAY WINDOW	COMMENT
<p>1. Press SLEEP key once.</p> <p>2. Thereafter, pressing SLEEP key is as shown in the diagram on the right.</p> <p>3. To release the sleep time, press the POWER switch to turn the power off.</p>		<p>The SLEEP TIMER operates either when the power is ON or OFF. When the power is OFF, if SLEEP is pressed the power turns ON. The broadcast station last received is received again. SLEEP illuminates and 60 is displayed under it.</p>

\* SLEEP TIMER has priority even when PROGRAM TIMER is set.

# ADJUSTMENT

T-7X/7LX

No.	ITEM	INPUT SETTINGS	OUTPUT SETTINGS	TUNER SETTINGS	ALIGNMENT POINTS	ALIGN FOR	FIG.
<b>FM SECTION</b> Unless otherwise specified, the individual switches should be set as following: SELECTOR: FM FM MODE/MUTING ON							
1	DISCRIMINATOR (With distortion adjustment in monaural mode)	(A) 98.0MHz 1kHz, ±75kHz dev 60dB(ANT input)	Connect a DC voltmeter between TP3 and TP4.	MONO 98.0MHz	T4	0V	(b)
2	VCO	(A) 98.0MHz 0 dev 60dB(ANT input)	Connect a 330kΩ resistor to TP9. Connect a frequency counter to the resistor via an AC voltmeter.	98.0MHz	VR1	76.00kHz	(c)
3	DISTORTION (STEREO)	(C) 98.0MHz 1kHz, ±68.25kHz dev Selector:L or R 60dB(ANT input)	(B)	98.0MHz	Front end IFT	Minimum distortion.	
4	SEPARATION (T-7LX only)	(C) 98.0MHz 1kHz, ±68.25kHz dev Selector:L or R 60dB(ANT input)	(B)	98.0MHz	VR2	Adjust so it that the crosstalk from L to R and R to L become minimum.	
5	TUNING LEVEL	(A) 98.0MHz 0 dev 16dB(ANT input)	(B)	98.0MHz	VR6	Adjust VR6 so that TUNED goes off. Then, adjust VR6 and stop at the point where TUNED goes on.	
<b>AM-MW SECTION</b> Keep the AM loop antenna installed. SELECTOR: AM.MW							
(1)	BAND EDGE (1)	-	Connect a DC voltmeter between VT2 and GND.	531kHz	L5	1.5V	(d)
(2)	BAND EDGE (2)	-	Connect a DC voltmeter between VT2 and GND.	1602kHz	TC4	8.0V	(d)
Repeat alignments (1) and (2) several times.							
(3)	RF ALIGNMENT (1)	(D) 603kHz 400Hz, 30% mod	(B)	603kHz	L3	Maximum amplitude and symmetry of the oscilloscope display.	
(4)	RF ALIGNMENT (2)	(D) 1404kHz 400Hz, 30% mod	(B)	1404kHz	TC2	Maximum amplitude and symmetry of the oscilloscope display.	
(5)	TUNING LEVEL	(D) 1000(999)kHz 400Hz, 30% mod 26dB(ANT input)	(B)	1000(999)kHz	VR5	Adjust VR5 so that TUNED goes off. Then, adjust VR5 and stop at the point where TUNED goes on.	
Repeat alignments (3) and (4) several times.							
<b>AM-LW SECTION (T-7LX only)</b> Keep the AM loop antenna installed. SELECTOR: AM.LW							
(6)	BAND EDGE (1)	-	Connect a DC voltmeter between VT2 and GND.	153kHz	L4	1.5V	(d)
(7)	BAND EDGE (2)	-	Connect a DC voltmeter between VT2 and GND.	281kHz	TC3	8.0V	(d)
Repeat alignments (6) and (7) several times.							
(8)	RF ALIGNMENT (1)	(D) 163kHz 400Hz, 30% mod	(B)	163kHz	L2	Maximum amplitude and symmetry of the oscilloscope display.	
(9)	RF ALIGNMENT (2)	(D) 270kHz 400Hz, 30% mod	(B)	270kHz	TC1	Maximum amplitude and symmetry of the oscilloscope display.	
Repeat alignments (8) and (9) several times.

# ABGLEICH

T-7X/7LX

N°	ITEM	REGLAGE DE L'ENTREE	REGLAGE DE LA SORTIE	REGLAGE DU TUNER	POINT DE L'ALIGNEMENT	ALIGNER POUR	FIG.
SECTION MF Sauf en cas d'indications spéciales, régler chaque commutateur comme suit: SELECTEUR: FM FM MODE/MUTING ON							
1	DISCRIMINATEUR (Avec l'ajustement de distorsion en mode monaural)	(A) 98,0MHz 1kHz.±75kHz dév 60dB(Entrée ANT)	Relier un voltmètre CC entre les TP3 et TP4.	MONO 98,0MHz	T4	0V	(b)
2	OSCILLATEUR CONTROLE PAR LA TENSION	(A) 98,0MHz 0 dév 60dB(Entrée ANT)	Relier une résistance de 330kΩ à TP9. Raccorder un compteur de fréquence à une résistance par l'intermédiaire d'un voltmètre CA.	98,0MHz	VR1	76,00kHz	(c)
3	DISTORSION (STEREO)	(C) 98,0MHz 1kHz.±68,25kHz dév Selection:L ou R 60dB(Entrée ANT)	(B)	98,0MHz	Tête H.F. IPT	Distorsion minimale.	
4	SEPARASION (T-7LX seulement)	(C) 98,0MHz 1kHz.±68,25kHz dév Selection:L ou R 60dB(Entrée ANT)	(B)	98,0MHz	VR2	Le régler de manière à ce que la diaphonie de L à R et de R à L devienne minimum.	
5	NIVEAU D'ACORDER	(A) 98,0MHz 0 dév 16dB(Entrée ANT)	(B)	98,0MHz	VR6	Ajuster VR6 que TUNED est non allumé. Alors, ajuster VR6 et arrêter le mouvement de VR6 au moment où le TUNED s'allume.	
SECTION MA - P O Laisser l'antenne bouche MA installée. SELECTEUR: AM, MW							
(1)	BORD DE BANDE (1)	-	Relier un voltmètre CC entre les YT2 et GND.	531kHz	L5	1,5V	(d)
(2)	BORD DE BANDE (2)	-	Relier un voltmètre CC entre les YT2 et GND.	1602kHz	TC4	8,0V	(d)
Répéter les points (1) et (2) plusieurs fois.							
(3)	ALIGNEMENT HT (1)	(D) 603kHz 400Hz. 30% mod	(B)	603kHz	L3	Amplitude et symétrie maximale de l'affichage de l'oscilloscope.	
(4)	ALIGNEMENT HT (2)	(D) 1404kHz 400Hz. 30% mod	(B)	1404kHz	TC2	Amplitude et symétrie maximale de l'affichage de l'oscilloscope.	
(5)	NIVEAU D'ACORDER	(D) 1000(999)kHz 400Hz. 30% mod 26dB(Entrée ANT)	(B)	1000(999)kHz	VR5	Ajuster VR5 que TUNED est non allumé. Alors, ajuster VR5 et arrêter le mouvement de VR5 au moment où le TUNED s'allume.	
Répéter les points (3) et (4) plusieurs fois.							
SECTION MA - G O (T-7LX seulement) Laisser l'antenne bouche MA installée. SELECTEUR: AM, LW							
(6)	BOAD DE BANDE (1)	-	Relier un voltmètre CC entre les VT2 et GND.	153kHz	L4	1,5V	(d)
(7)	BOAD DE BANDE (2)	-	Relier un voltmètre CC entre les VT2 et GND.	281kHz	TC3	8,0V	(d)
Répéter les points (6) et (7) plusieurs fois.							
(8)	ALIGNEMENT HT (1)	(D) 163kHz 400Hz. 30% mod	(B)	163kHz	L2	Amplitude et symétrie maximale de l'affichage de l'oscilloscope.	
(9)	ALIGNEMENT HT (2)	(D) 270kHz 400Hz. 30% mod	(B)	270kHz	TC1	Amplitude et symétrie maximale de l'affichage de l'oscilloscope.	
Répéter les points (8) et (9) plusieurs fois.

DC voltages are as measured with a high-impedance voltmeter during reception of the FM broadcast signal (with a signal strength of 60 dB at the ANT terminal). Values may vary slightly due to variations between individual instruments or/and units. Values in parentheses are as measured during reception of the AM broadcast signal (with a signal strength of 60 dB at the ANT terminal).

Les tensions c.c. doivent être mesurées à l'aide d'un voltmètre à haute impédance pendant la réception d'un signal de programme FM (avec une force de signal de 60 dB à la borne ANT). Les valeurs peuvent varier légèrement du fait des variations inhérentes aux instruments de mesure individuels. Les valeurs entre parenthèses doivent être mesurées pendant la réception d'un signal de programme AM (avec une force de signal de 60 dB à la borne ANT).

avec une force de signal de 60 dB à la borne ANT).

Die angegebenen Gleichspannungswerte wurden mit  
einem hochohmigen Spannungsmesser bei Empfang  
eines UKW-Signals (mit einer Feldstärke von 60 dB am  
Antennenanschluß) gemessen. Dabei schwanken die  
Meßwerte aufgrund von Unterschieden zwischen  
einzelnen Instrumenten oder Geräten u.U. geringfügig.  
Die eingeklammerten Gleichspannungswerte wurden  
bei Empfang eines MW-Signals (mit einer Feldstärke  
von 60 dB am Antennenanschluß) gemessen.

To reduce the risk of electric shock, leakage-current or resistance measurements shall be carried out (exposed parts are acceptably insulated from the supply circuit) before the appliance is returned to the customer.

c.c. doivent être mesurées avec un volt-impédance pendant la réception d'un programme FM (avec une force de signal borne ANT). Les valeurs peuvent différer du fait des variations inhérentes aux instruments de mesure individuels. Les valeurs entre parenthèses doivent être mesurées à la réception d'un signal de programme AM (avec une force de signal de 60 dB à la borne ANT).

Die angegebenen Gleichspannungswerte wurden mit einem hochohmigen Spannungsmesser bei Empfang eines UKW-Signals (mit einer Feldstärke von 60 dB am Antennenanschluß) gemessen. Dabei schwanken die Meßwerte aufgrund von Unterschieden zwischen einzelnen Instrumenten oder Geräten u.U. geringfügig. Die eingeklammerten Gleichspannungswerte wurden bei Empfang eines MW-Signals (mit einer Feldstärke von 60 dB am Antennenanschluß) gemessen.
