

Figures in parentheses are approximate DC voltages measured with VTVM.
 Underlined figures are approximate AC RMS values with 1000 cycle 1.9va.
 into "LOAD" indicated to give a DC VOLT output on 15.0A tap and a resistive load.
 Should require special 0.588ohm 15.0A tap.
 Unless otherwise specified, components are MFR's, others are NMF.
 Resistors are 1/2 W CONSTRUCTION.

TEST switch S89 shown in OPERATE position
 * Values with list markers approximate. Actual values are inductively selected for optimum results.
R4, R6
 Repair resistors for lower damping factors
 or per instructions
