Service Bulletin

No. : MZ09-023

Date: April 10, 2009

Model: CC4001

Subject: Change of the main microcomputer (software)
(firmware improvement for an abnormal motor drive situation)

Symptom: There is a possibility of the loading motor turning and it will not stop, when an abnormality (soldering /short/opening etc.) was found in the motor drive circuit etc.

Solution: The security function has been improved by a program change in main microcomputer IC control.

Replace MICROPROCESSOR (O.T.P programmed) IC110 on the SERVO PWB.

Before upgrading, please check the current Microprocessor version. It can be confirmed on the "SERVICE MODE", please refer to the CC4001 Service Manual on page 7 for the procedure.

Note: If you have stock of the old version IC (not having the following label), please upgrade to the improved type.

New IC (Ver.18)
This label is on the IC.
