ABOUT THIS MANUAL

Read the following information before using the service manual.

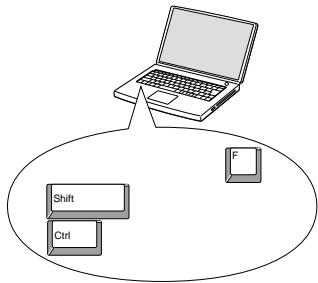

What you can do with this manual

Search for a Ref. No. (phrase) (Ctrl+Shift+F)

You can use the search function in Acrobat Reader to search for a Ref. No. in schematic diagrams, block diagrams, and parts lists.

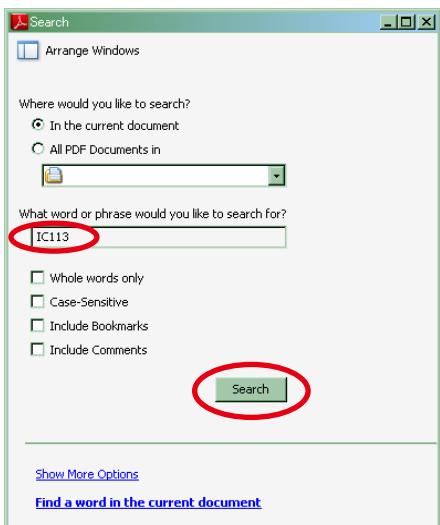

1.Press **Ctrl+Shift+F** on the keyboard.

- The Search window appears.

2.Enter the Ref. No. you want to search for in the Search window, and then click the **Search** button.

- A list of search results appears.

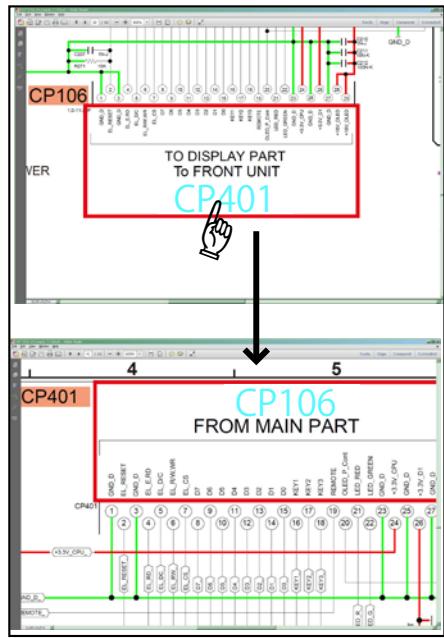

3.Click an item on the list.

- The screen jumps to the page for that item, and the search phrase is displayed.

Jump to the target of a schematic diagram connector

Click the Ref. No. of the target connector in the red box around a schematic diagram connector.

- The screen jumps to the target connector.

- Page magnification stays the same as before the jump.

Using Adobe Reader (Windows version)

Add notes to this data (Sign)

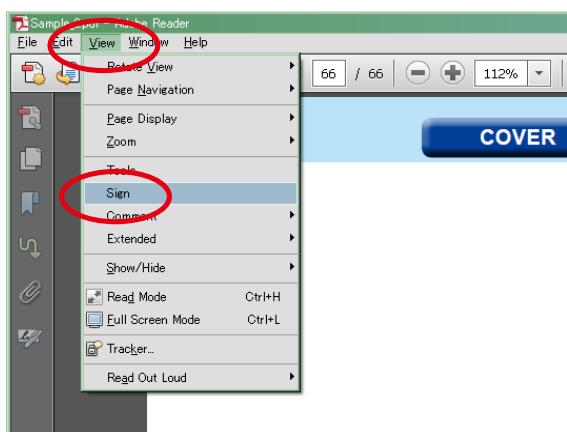

The Sign function lets you add notes to the data in this manual.

Save the file once you have finished adding notes.

[Example using Adobe Reader X]

On the "View" menu, click "Sign".

- The Sign pane appears.

[Example using Adobe Reader 9]

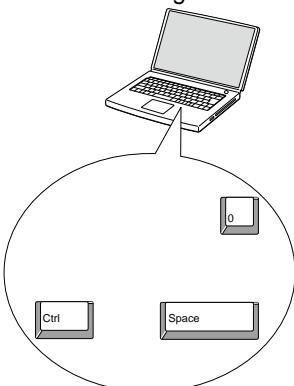

On the "Document" menu, click "Sign".

Magnify schematic / printed wiring board diagrams - 1

(Ctrl+Space, mouse operation)

Press **Ctrl+Space** on the keyboard and drag the mouse to select the area you want to view.

- The selected area is magnified.

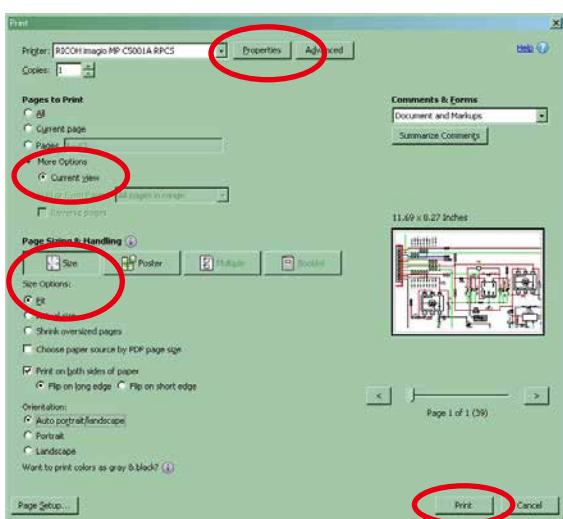

- When you want to move the area shown, hold down **Space** and drag the mouse.
- When you want to show a full page view, press **Ctrl+0** on the keyboard.

Print a magnified part of the manual

The Properties dialog box and functions will vary depending on your printer.

- Drag the mouse to magnify the part you want to print.
- On the "File" menu, click "Print".
- Configure the following settings in the Print dialog box.

- Click the **Print** button to start printing.

Properties

Click this button and check that the printer is set to a suitable paper size.

Page to print

Select the following checkbox.

"More Options" : "Current View"

Page Sizing & Handling

Select the following checkbox.

"Size" / "Size Options" : "Fit"

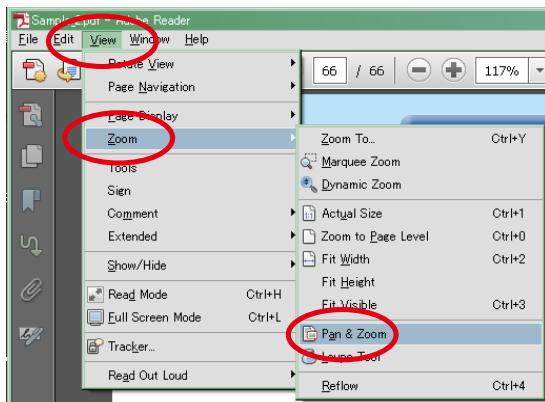

Magnify schematic / printed wiring board diagrams - 2

(Pan & Zoom function)

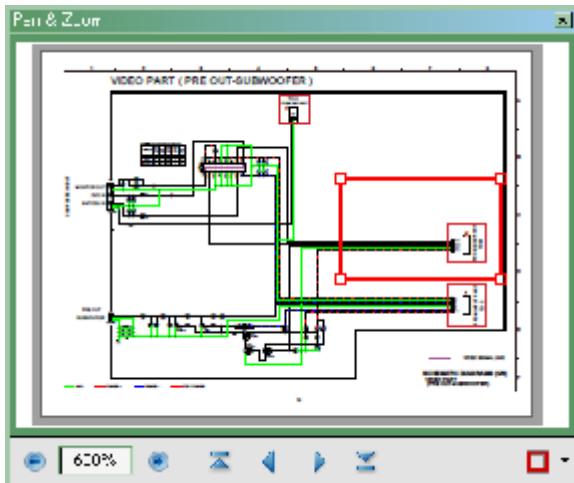

The Pan & Zoom function lets you see which part of a magnified diagram is being shown in a separate window.

[Example using Adobe Reader X]

On the "View" menu, point to "Zoom", and then click "Pan & Zoom".

- The Pan & Zoom window appears on the screen.

[Example using Adobe Reader 9]

On the "Tools" menu, point to "Select & Zoom", and then click "Pan & Zoom Window".

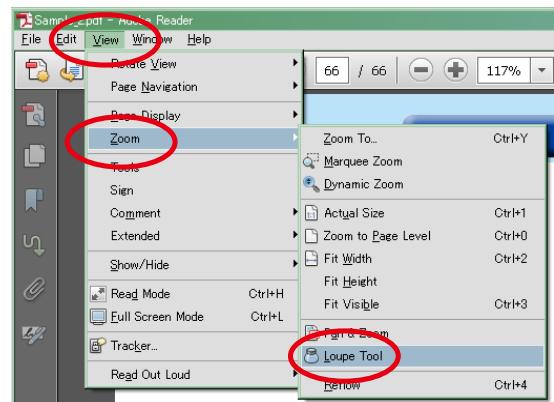

Magnify schematic / printed wiring board diagrams - 3

(Loupe Tool function)

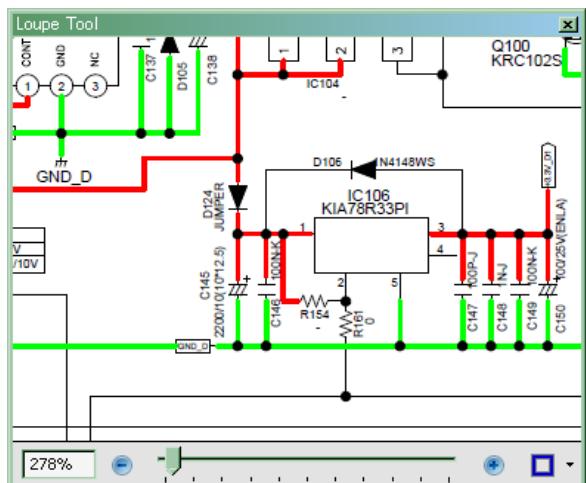

The Loupe Tool function lets you magnify a specific part of a diagram in a separate window.

[Example using Adobe Reader X]

On the "View" menu, point to "Zoom", and then click "Loupe Tool".

- The Loupe Tool window appears on the screen.

[Example using Adobe Reader 9]

On the "Tools" menu, point to "Select & Zoom", and then click "Loupe Tool Window".

SAFETY PRECAUTIONS

The following items should be checked for continued protection of the customer and the service technician.

leakage current check

Before returning the set to the customer, be sure to carry out either (1) a leakage current check or (2) a line to chassis resistance check. If the leakage current exceeds 0.5 millamps, or if the resistance from chassis to either side of the power cord is less than 460 kohms, the set is defective.

Be sure to test for leakage current with the AC plug in both polarities, in addition, when the set's power is in each state (on, off and standby mode), if applicable.

CAUTION Please heed the following cautions and instructions during servicing and inspection.

○ Heed the cautions!

Cautions which are delicate in particular for servicing are labeled on the cabinets, the parts and the chassis, etc. Be sure to heed these cautions and the cautions described in the handling instructions.

○ Cautions concerning electric shock!

- (1) An AC voltage is impressed on this set, so if you touch internal metal parts when the set is energized, you may get an electric shock. Avoid getting an electric shock, by using an isolating transformer and wearing gloves when servicing while the set is energized, or by unplugging the power cord when replacing parts, for example.
- (2) There are high voltage parts inside. Handle with extra care when the set is energized.

○ Caution concerning disassembly and assembly!

Through great care is taken when parts were manufactured from sheet metal, there may be burrs on the edges of parts. The burrs could cause injury if fingers are moved across them in some rare cases. Wear gloves to protect your hands.

○ Use only designated parts!

The set's parts have specific safety properties (fire resistance, voltage resistance, etc.). Be sure to use parts which have the same properties for replacement. The burrs have the same properties. In particular, for the important safety parts that are indicated by the  mark on schematic diagrams and parts lists, be sure to use the designated parts.

○ Be sure to mount parts and arrange the wires as they were originally placed!

For safety seasons, some parts use tapes, tubes or other insulating materials, and some parts are mounted away from the surface of printed circuit boards. Care is also taken with the positions of the wires by arranging them and using clamps to keep them away from heating and high voltage parts, so be sure to set everything back as it was originally placed.

○ Make a safety check after servicing!

Check that all screws, parts and wires removed or disconnected when servicing have been put back in their original positions, check that no serviced parts have deteriorate the area around. Then make an insulation check on the external metal connectors and between the blades of the power plug, and otherwise check that safety is ensured.

(Insulation check procedure)

Unplug the power cord from the power outlet, disconnect the antenna, plugs, etc., and on the power. Using a 500V insulation resistance tester, check that the insulation resistance value between the inplug and the externally exposed metal parts (antenna terminal, headphones terminal, input terminal, etc.) is 1MΩ or greater. If it is less, the set must be inspected and repaired.

CAUTION Concerning important safety parts

Many of the electric and the structural parts used in the set have special safety properties. In most cases these properties are difficult to distinguish by sight, and the use of replacement parts with higher ratings (rated power and withstand voltage) does not necessarily guarantee that safety performance will be preserved. Parts with safety properties are indicated as shown below on the wiring diagrams and the parts list in this service manual. Be sure to replace them with the parts which have the designated part number.

- (1) Schematic diagrams.....Indicated by the  mark.
- (2) Parts lists.....Indicated by the  mark.

The use of parts other than the designated parts could cause electric shocks, fires or other dangerous situations.

NOTE FOR SCHEMATIC DIAGRAM

WARNING:

Parts indicated by the  mark have critical characteristics. Use ONLY replacement parts recommended by the manufacturer.

CAUTION:

Before returning the set to the customer, be sure to carry out either (1) a leakage current check or (2) a line to chassis resistance check. If the leakage current exceeds 0.5 millamps, or if the resistance from chassis to either side of the power cord is less than 460 kohms, the set is defective.

WARNING:

DO NOT return the set to the customer unless the problem is identified and remedied.

NOTICE:

ALL RESISTANCE VALUES IN OHM. $k=1,000$ OHM / $M=1,000,000$ OHM

ALL CAPACITANCE VALUES ARE EXPRESSED IN MICRO FARAD, UNLESS OTHERWISE INDICATED. P INDICATES MICRO-MICRO FARAD. EACH VOLTAGE AND CURRENT ARE MEASURED AT NO SIGNAL INPUT CONDITION. CIRCUIT AND PARTS ARE SUBJECT TO CHANGE WITHOUT PRIOR NOTICE.

NOTE FOR PARTS LIST

1. Parts indicated by "nsp" on this table cannot be supplied.
2. When ordering a part, make a clear distinction between "1" and "I" (i) to avoid mis-supplying.
3. A part ordered without specifying its part number can not be supplied.
4. Part indicated by "★" mark is not illustrated in the exploded view.

WARNING: Parts indicated by the  mark have critical characteristics. Use ONLY replacement parts recommended by the manufacturer.

INSTRUCTIONS FOR HANDLING SEMI-CONDUCTORS AND OPTICAL UNIT

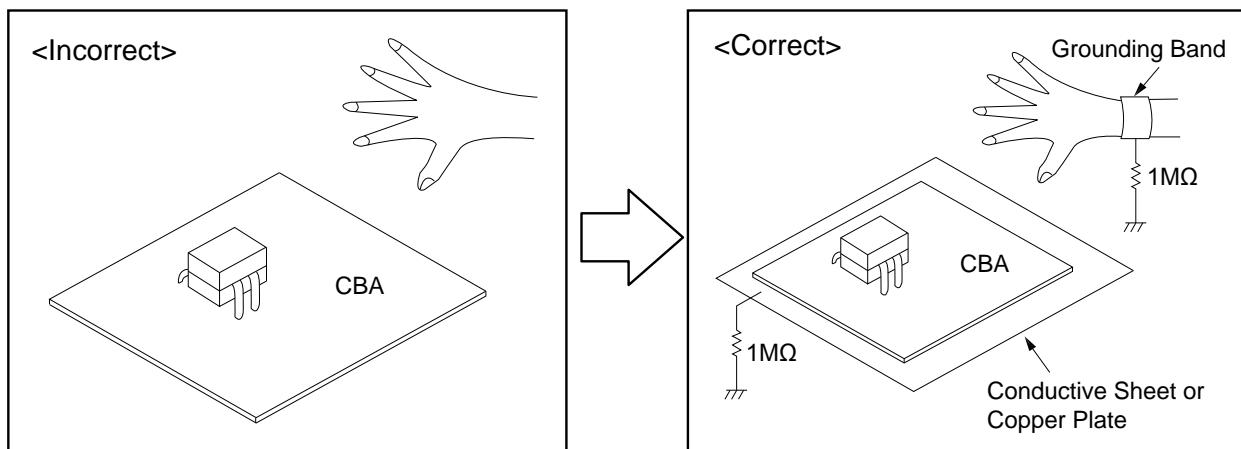

Electrostatic breakdown of the semi-conductors or optical pickup may occur due to a potential difference caused by electrostatic charge during unpacking or repair work.

1. Ground for Human Body

Be sure to wear a grounding band ($1\text{ M}\Omega$) that is properly grounded to remove any static electricity that may be charged on the body.

2. Ground for Workbench

Be sure to place a conductive sheet or copper plate with proper grounding ($1\text{ M}\Omega$) on the workbench or other surface, where the semi-conductors are to be placed. Because the static electricity charge on clothing will not escape through the body grounding band, be careful to avoid contacting semi-conductors with your clothing

Personal notes:

TECHNICAL SPECIFICATIONS

Bluetooth section

Communications system: Bluetooth Version 2.1 + EDR (Enhanced Data Rate)
Transmission power: Maximum 2.5 mW (Class 2)
Maximum communication range: Approx. 10 m in line of sight*²
Frequency band: 2.4 GHz band
Modulation scheme: FHSS (Frequency-Hopping Spread Spectrum)
Supported profiles: A2DP (Advanced Audio Distribution Profile) 1.2
 AVRCP (Audio Video Remote Control Profile) 1.4
Corresponding codec: SBC, AAC
Transmission range (A2DP): 20 Hz - 20,000 Hz

*²The actual communication range varies depending on the influence of such factors as obstructions between devices, electromagnetic waves from microwave ovens, static electricity, cordless phones, reception sensitivity, antenna performance, operating system, application software etc.

General

Power supply voltage/frequency: AC 230 V, 50/60 Hz(N), AC 120 V 60 Hz(U),
 AC 100 V 50/60 Hz(F), AC 220 V, 50 Hz(K)

Power consumption: 35 W

Power consumption in standby mode: 0.4 W

Power consumption in "Network Control" 4.0 W

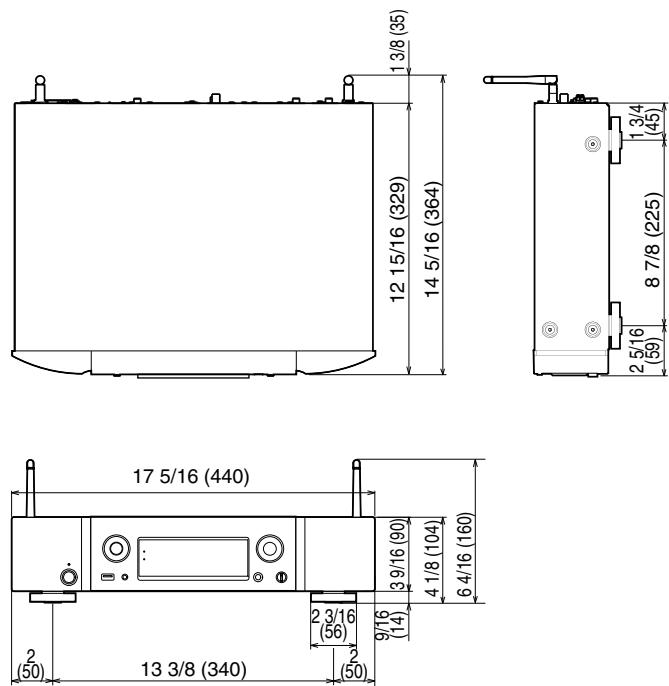

– "On" mode:

For the purpose of improvement, the specifications and design are subject to change without notice.

DIMENSION

Unit : in. (mm)

Weight : 13 lbs 4 oz (6.0 kg)

CAUTION IN SERVICING

Updating this unit

- When you replace the IC101, you need firmware updates. See "FIRMWARE UPDATE PROCEDURE".
- When you replace the WLAN MODULE, you need firmware updates. And MAC Address seal replacement is required. See "FIRMWARE UPDATE PROCEDURE".

Initializing this unit (Initialization for the factory)

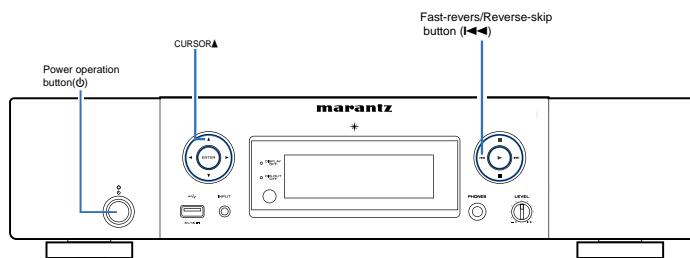

This unit initialization should be performed when the µcom, peripheral parts of µcom, and WLAN MODULE are replaced.

1. Press the power operation button "ø" to turn off the power, and remove the AC plug from the socket.
2. While holding down buttons "**CURSOR ▲**" and "**INPUT**" simultaneously, insert the AC plug into the wall outlet to turn on the power. (Factory Reset)
3. Press the power operation button to place this unit on standby.
4. While holding down buttons "**CURSOR ▼**" and "**◀◀**" simultaneously, press the power button to turn on the power. (Initialized)
5. Wait for more than 90 seconds after "**Initialized**" is displayed and then turn the power off.
(During this time, start and initialize the network devices.)

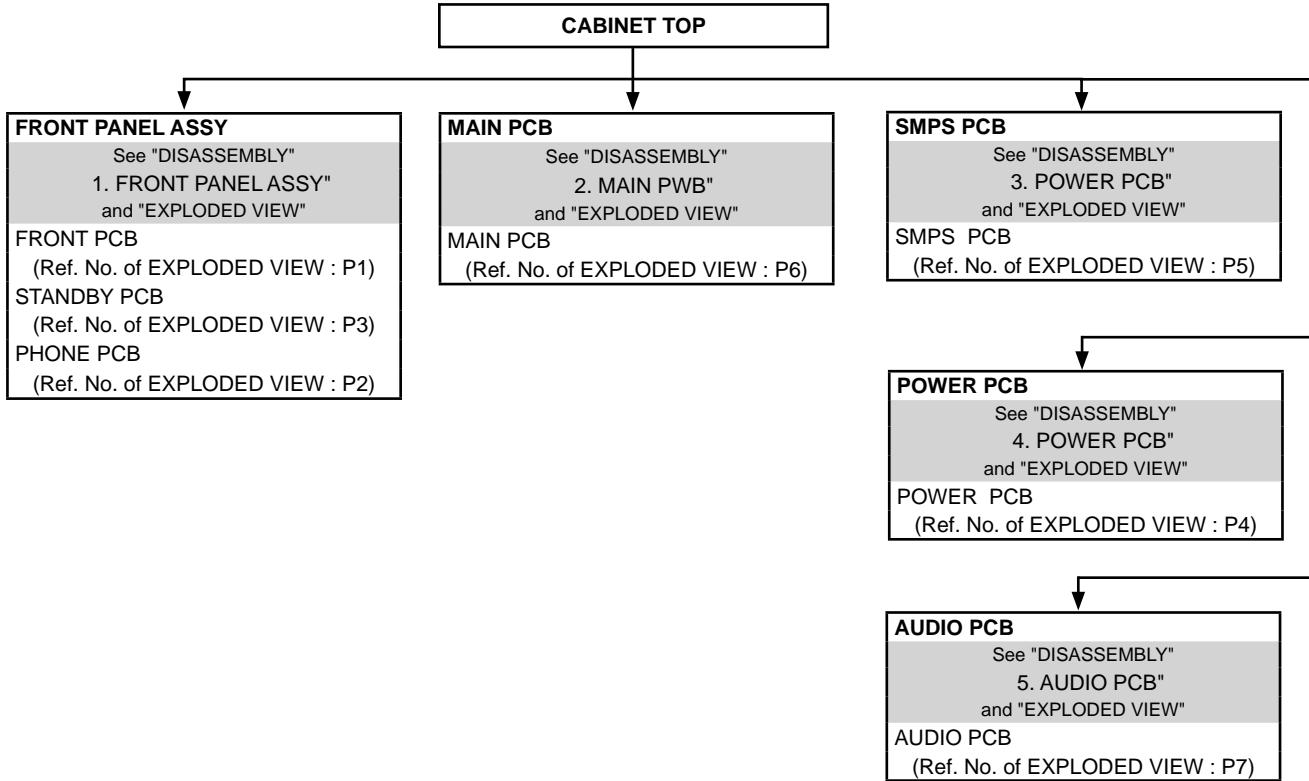

NOTE: • If step 5 fails, start over from step 1.

- All user settings will be lost and the factory setting will be recovered after the set is initialized.
So make sure to note down your setting beforehand for restoring after the initialization.

DISASSEMBLY

- Remove each part in the order of the arrows below.
- Reassemble removed parts in the reverse order.
- Read "Precautions During Work" before reassembling removed parts.
- If wire bundles are removed or moved during adjustment or part replacement, reshape the wires after completing the work. Failure to shape the wires correctly may cause problems such as noise.

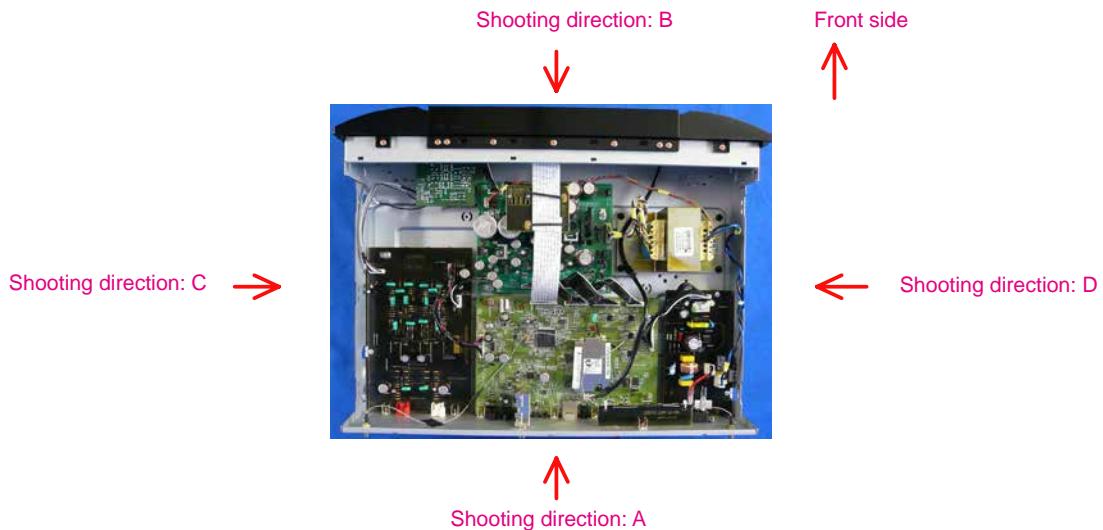

Explanatory Photos for DISASSEMBLY

- The angles from which the photos are taken are shown by "Photo angle : A, B, C, D".
- See the diagram below about the shooting direction of each photograph.
- Photographs with no shooting direction indicated were taken from the top of the unit.
- The photograph is NA6005U1B model.

The viewpoint of each photograph

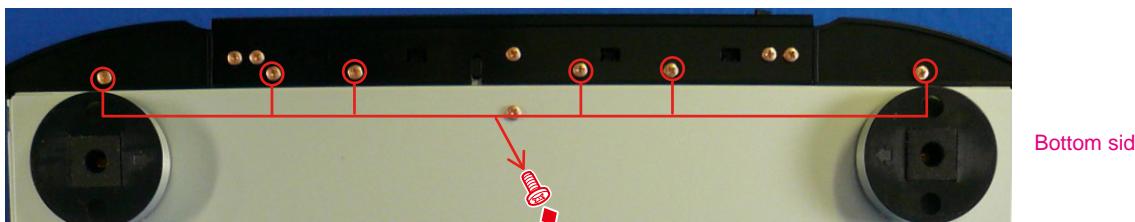

(Shooting direction:X)[View from the top]

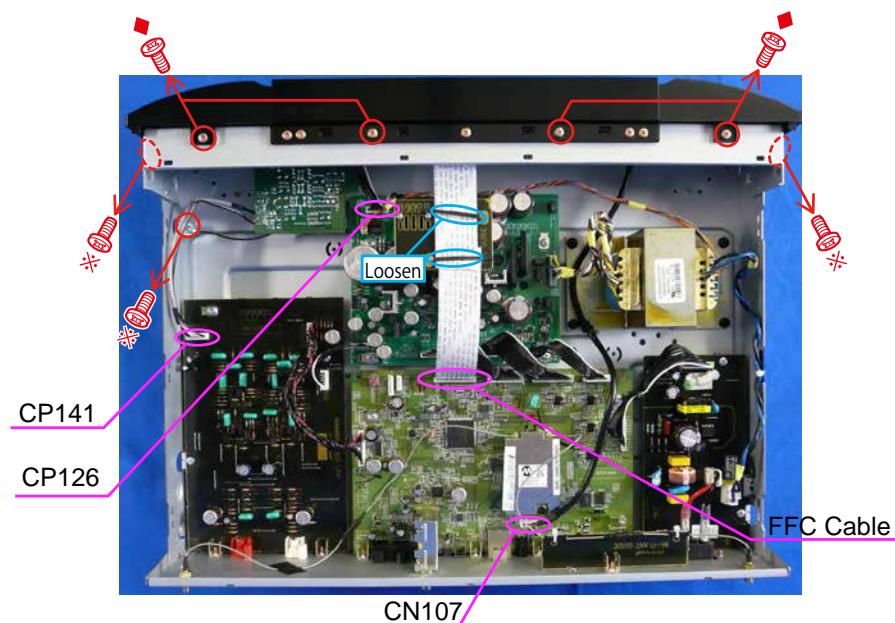

1. FRONT PANEL ASSY

Proceeding: CABINET TOP → FRONT PANEL ASSY

- (1) Remove the screws.

- (3) Remove the connector wires and FFC. Remove the screws.

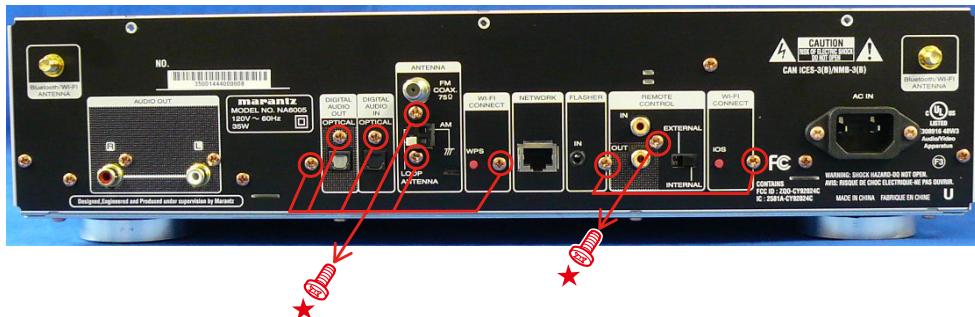

See "EXPLODED VIEW" for instructions on how to remove each PCB of the FRONT PANEL ASSY.

2. MAIN PCB

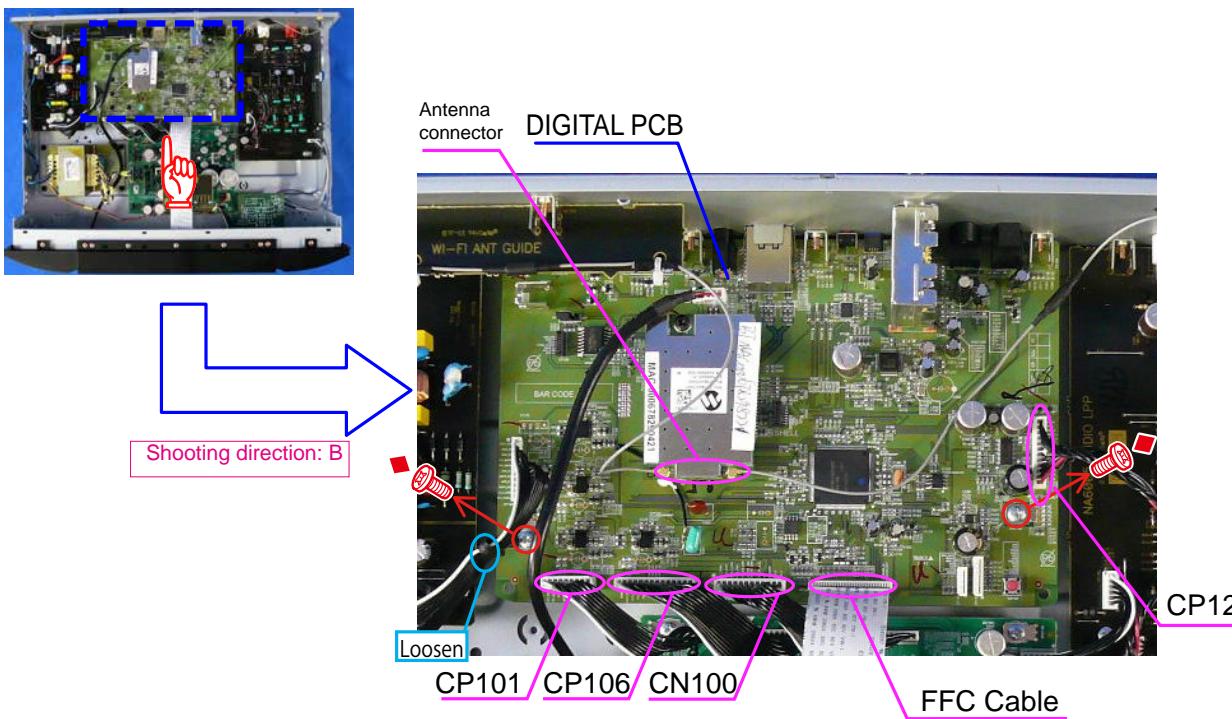

Proceeding: CABINET TOP →

MAIN PCB

- (1) Remove the screws.

- (2) Remove the screws. Remove the connector wires and FFC.

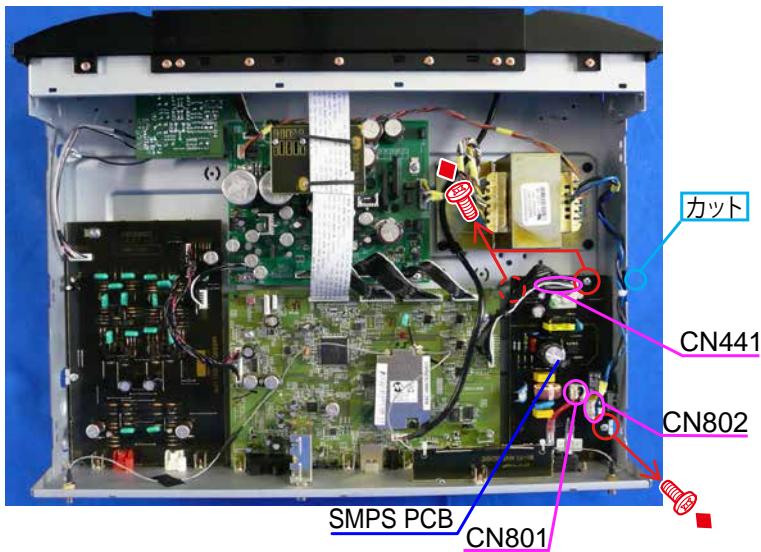

3. SMPS PCB

Proceeding: CABINET TOP → SMPS PCB

- (1) Remove the screw.

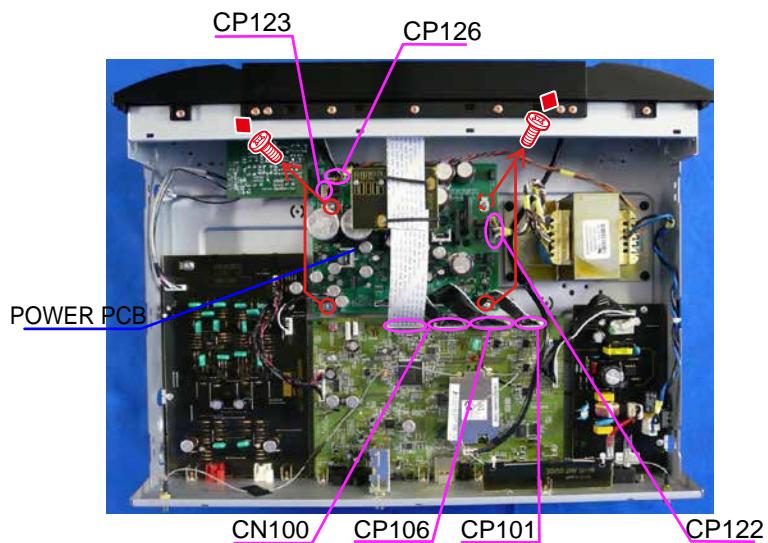

- (2) Remove the screws. Remove the connector wires and FFC.

4. POWER PCB

Proceeding: CABINET TOP → POWER PCB

- (1) Remove the screws. Remove the connector wires and FFC.

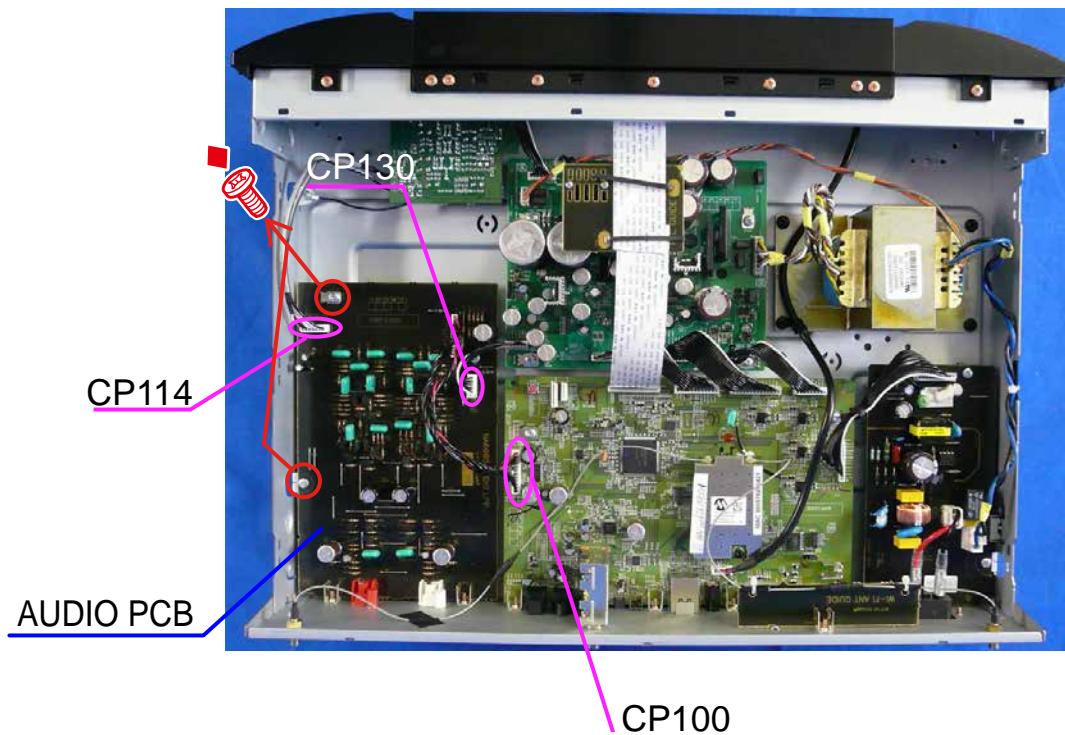

5. AUDIO PCB

Proceeding: CABINET TOP → AUDIO PCB

- (1) Remove the screws.

- (2) Remove the connector wires and remove the screws.

SPECIAL MODE

Special mode setting button

No.2, 6, 11, 15 : 

Hold down buttons **A** button and **B** button at the same time and press the "POWER" button to turn on the power.

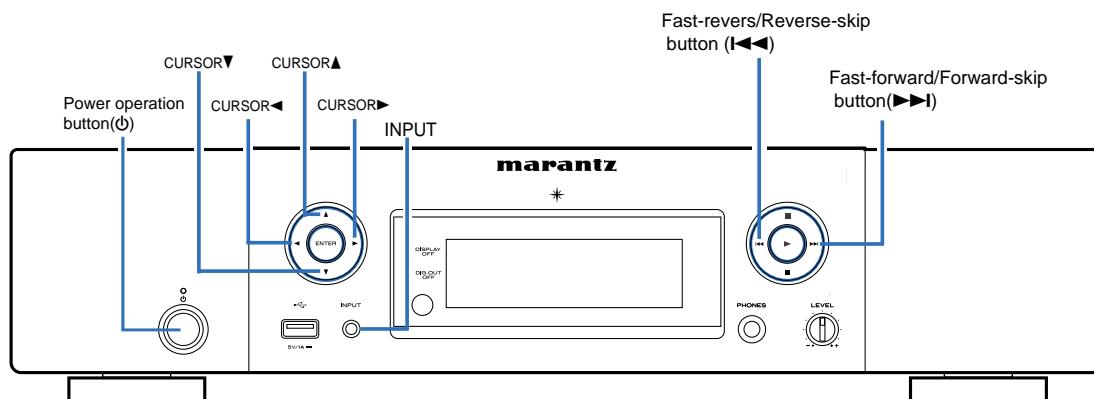

No.1, 4, 5, 7, 8, 9, 10, 12, 13, 14 : 

Hold down buttons **A** button and **B** button at the same time and connect the power cord to an outlet. Each button continue to press until the turning on POWER LED.

No.3 :

Hold down the Power button for at least 3 seconds while pressing the A button.

No.	Mode	Button A	Button B	Contents
1	Initialization for the factory	CURSOR ▲	INPUT 	The setting value to default. ※ Be sure to do the "Owner's Manual described Initialization" after the "Factory Initialization". 
2	Owner's Manual described initialization	CURSOR ▼	◀◀	The differences between this operation and restoring the factory default are as follows.  <ul style="list-style-type: none"> • Does not clear the version information such as rewriting failed log. • Does not clear the history of protection. • Network devices are started and initialized.
3	Version check	CURSOR ▲	-	Version Display.
4	Product mode 1	CURSOR ►	-	Development/Factory use. Not for service.
5	Product mode 2	CURSOR ◀	-	Development/Factory use. Not for service.
6	Protection history	CURSOR ◀	◀◀	Protection history view and reset.
7	"DPMS" force update	CURSOR ►	INPUT	Forced updated by DPMS.
8	"232C" force update	CURSOR ◀	INPUT	Development/Factory use. Not for service.
9	MAC Address rewrite	CURSOR ▼	INPUT	Development/Factory use. Not for service.
10	Access to development server mode	CURSOR ▲	◀◀	Development/Factory use. Not for service.
11	USB update	CURSOR ►	◀◀	Updated by USB
12	"USB" force update	CURSOR ◀	◀◀	Forced updated by USB
13	920 rewrite	CURSOR ▼	◀◀	Development/Factory use. Not for service.
14	Factory rewrite	CURSOR ▼	-	Development/Factory use. Not for service.

1. Initialization for the factory mode

Backup data initialization is carried out. See Initialization Items.

After initialization, move on to nomal mode.

CAUTION

Version information (such as rewriting failed log) Clear.

Clear the history of protection.

Operation

While holding down buttons "CURSOR ▲" and "INPUT" simultaneously, insert the AC plug into the wall outlet to turn on the power. 

Startup display

All lights display (2 seconds) - All off display (2 seconds)

Lighting of all LEDs on the unit (4 second)

"Factory Reset" displayed for 5 seconds.

Factory Reset

Initialization Items (Default setting)

	Setting
Source	Internet Radio
DIMMER	100%
Sleep	OFF
REPEAT/RANDOM	OFF
Favorite list	Clear all
iPod mode	Remote Mode
Setup Menu/Network	Set to Initial value, all
Protection history	NO PROTECT
Version up information	Clear all

2. Owner's Manual described initialization mode (User Reset)

Backup data initialization is carried out. Refer to Initialization Items.

After initialization, move on to nomal mode.

CAUTION

The differences between this operation and restoring the factory default are as follows.

- Does not clear the version information such as rewriting failed log.
- Does not clear the history of protection.
- Network devices are started and initialized 

Operation

In "STANDBY" status, press and hold the "CURSOR ▼" and "◀◀" buttons along with the power operation button to turn on the power.

Startup display

"Initialized" displayed for 5 seconds.

Initialized

Wait for more than 90 seconds after "Initialized" is displayed and then turn the power off. 
(During this time, start and initialize the network devices.)

3. Version check

Menu items appear in the Add Version. Otherwise, normal operation.

To exit this mode, unplug the power cord.

Display order

System u-com → System u-com (Boot loader) → Network u-com (Boot loader) → Network u-com (Image) → Serial No. → Bluetooth Mac Address

Operation

In standby status, hold down the Power button for at least 3 seconds while pressing the "CURSOR ▲" button.

Startup display

"Version" displayed for 5 seconds.

How to Display Version

Press the "INPUT" button and select the "Setup".

Press ENTER button.

The version of the system-μ Processor.

Press CURSOR ▼.

The version of the boot loader(system-μ Processor).

Press CURSOR ▼.

The version of the boot loader(network-μ Processor).

Press CURSOR ▼.

The version of the image(network- μ Processor).

Starting the CY920 is not completed.

Press CURSOR ▼

Serial No. displayed.

Press CURSOR ▼

Bluetooth Mac Address displayed.

4. Product Mode 1

Startup display

"Product Mode1" displayed for 5 seconds.

Not for service.

To exit this mode, unplug the power cord.

5. Product Mode 2

Startup display

"Product Mode2" displayed for 5 seconds.

Not for service.

To exit this mode, unplug the power cord.

6. Protection history display mode

To exit this mode, unplug the power cord.

Startup display

"Detect Protection" displayed for 5 seconds.

No history found.

Clear the Protection History.

When the Cursor ▲ button is pressed for over 5 seconds while the protection history is displayed, clear the protection history.

After clearing, will display "NO PROTECT". .

NOTE : Protection history is cleared, even when the set is Initialization for the factory mode.

7. "DPMS" force update mode

Update the firmware of DPMS.

Operation

Hold down buttons "CURSOR▶" button and "INPUT" button at the same time and connect the power cord to an outlet.
See "**PROCEDURE FOR UPGRADING THE VERSION OF THE FIRMWARE**".

Error code table

- Preparation operation rewritten, Update error code checking.

ErrCode	DPMS Update	FL Message
Hex	The occurred event	
01	Login failed (DPMS Access Login Incorrect notification)	Login failed 01

PROCEDURE AFTER REPLACING THE MICROPROCESSOR, ETC

The procedure after replacing the u-COM (Microprocessor), flash ROM, etc. is as follows.

PWB Name	Ref. No.	Description	After replaced	Remark
MAIN	IC101	R5F56108VNFP	B	
EXPLODED▲	P11▲	MODULE CY920-24C NA6005	D	
MAIN	IC100	GD25Q32B	A	K1B
MAIN	IC109	MX25L25635FMI-10G	C	

After replacing

A : The software has been written. The software is not written at the time of replacement.

B : The software has been written. The software may need to be rewritten by version updates. Check the version.

C : The software has not been written. The software needs to be written after replacement. See "Firmware UpdateProcedure" for information on writing the software.

D : The software has been written. Be sure to rewrite with the latest software for your service region. See "Firmware Update Procedure" for information on writing the software.

FIRMWARE UPDATE PROCEDURE

1. Updating by DPMS

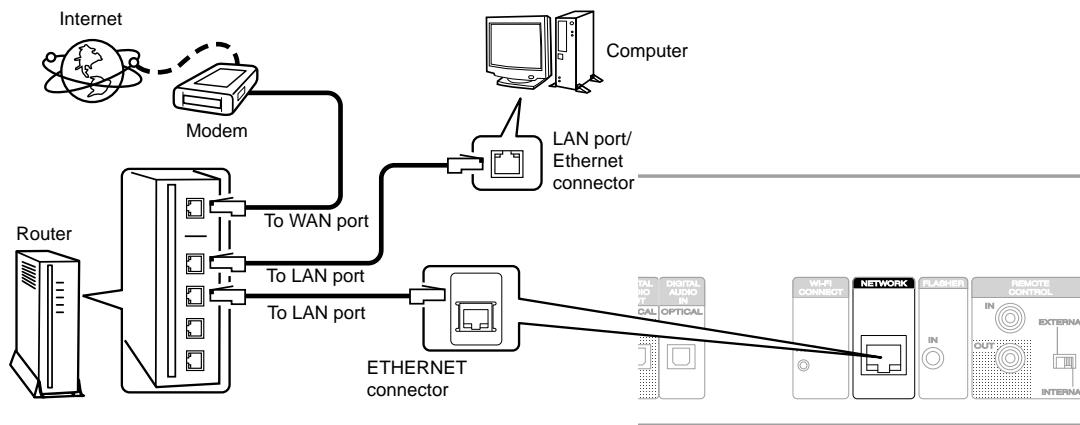

Download the latest firmware from the internet and update the firmware.

1.1. Network Connection

(1) System requirements

- A broadband internet connection
- Modem
- Router
- Ethernet cable (CAT-5 or greater recommended)

(2) Settings

1.2. Check and update the firmware

Check whether new firmware is available. It is also possible to check approximately how long the update will take.

- (1) Press POWER button to turn on power.
- (2) Press INPUT button to display menu.
 - Press CURSOR ▲ / ▼ buttons select to General. Press the ENTER.
 - Press CURSOR ▲ / ▼ buttons select to Firmware Update. Press the ENTER.
 - Press CURSOR ▲ / ▼ buttons select to UPDATE.
 - Press CURSOR ▲ / ▼ buttons select to CHECK For UPDATE.
- (3) Press the ENTER button.
 - If the latest firmware has been already installed, press the SOURCE button to close the Update menu.
- (4) Press ENTER button. Select YES, then press ENTER button.
- (5) To start the update.
- (6) When rewriting is completed, this unit restarts itself automatically.
- (7) Press the POWER button to turn off the power.
- (8) Hold down the POWER button for at least 3 seconds while pressing the CURSOR ▲ button.
This unit sets the version display mode.
Please confirm the firmware version.
- (9) Check MAC Address.
Setup → Network → Network Info → MAC Address
- (10) The back panel of the unit, MAC Address seals, please change new one.
Please confirm the MAC Address display is corresponding to the seal.
- (11) Hold down buttons "CURSOR ▲" button and "◀◀" button at the same time and press the "POWER" button to turn on the power. (Initialization for the factory)

--- Precautions for Updates ---

- The environment and settings must allow connection to broadband Internet for updates.
- Never turn off the power before an update is completed.
- It takes around 1 hour to complete the update.

Once an update is started, normal operations cannot be performed until it is completed.

The menu settings of this unit may be initialized.

Take note of your settings beforehand and reconfigure them after the update.

FIRMWARE UPDATE PROCEDURE

2. Updating by USB

The latest firmware can be downloaded to a USB memory for updates.

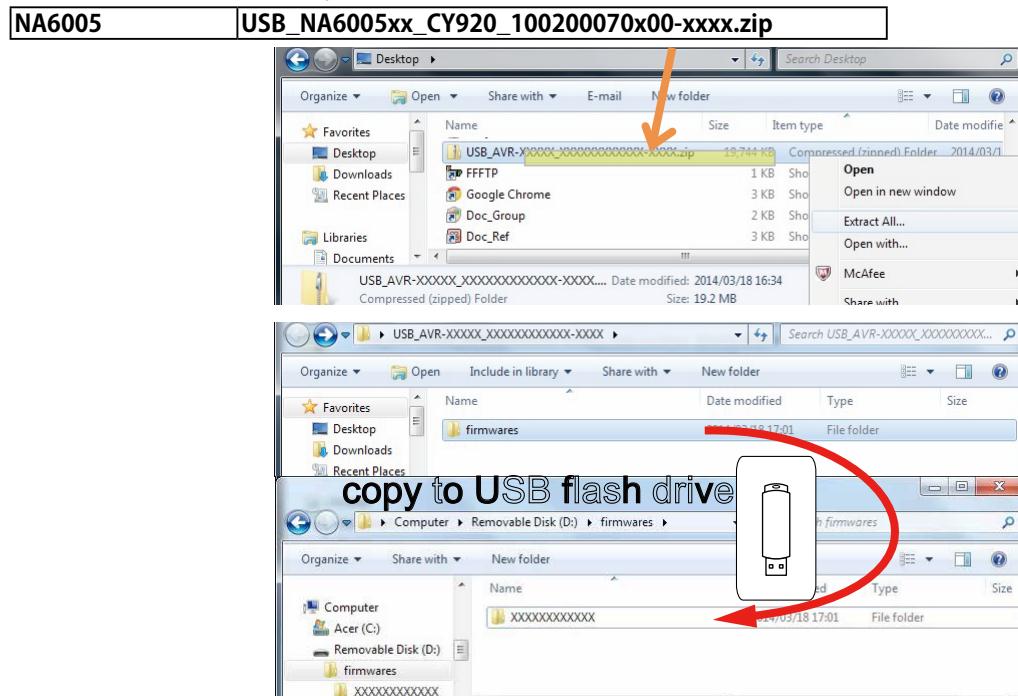

2.1. Connecting to the USB Memory

(1) Preparation

- USB format : Prepare a USB memory formatted in FAT16 or FAT32.
- USB flash drive (memory), use the USB2.0.
- Do not run the USB memory through a hub.
- Do not connect a computer to the USB port of this unit using a USB cable.
- Do not use an extension cable when connecting the USB unit.

2.2. Unzip Download File

Unzip the downloaded file on your computer.

You can find "**firmwares**" folder after unzipped.

Copy that folder to USB flash drive.

You have to put "**firmwares**" folder on root directly on USB flash drive(memory).

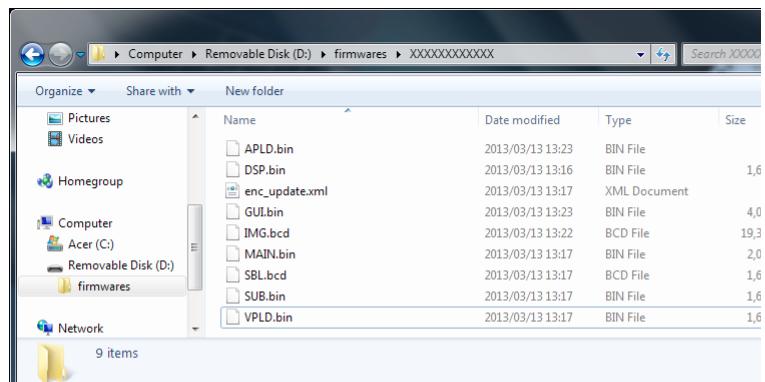

2.3. File structure on USB Memory

Copy the update files to the USB memory with the following structure:

USB memory root

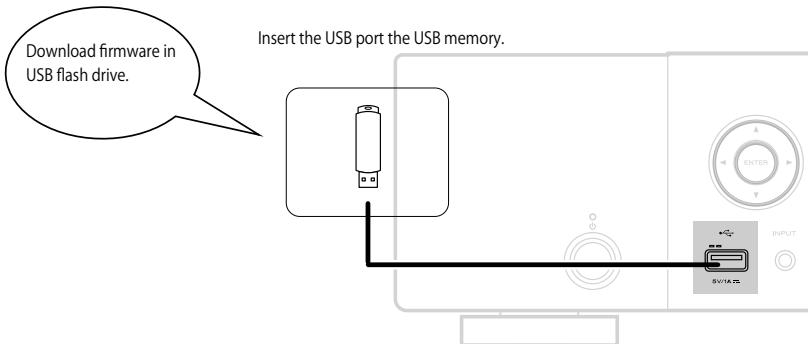

Model Name	Model Area	Product ID
NA6005	North America (U)	100200070100
	Europe (N)	100200070200
	Japan (F)	100200070400
	China (K)	100200070500

+ firmwares
+ 00020013XXXX
+ enc_update.xml
+ IMG.bcd
+ SYS.bin
+ SBL.bcd

2.4. Insert the USB memory in the USB port

NOTE : Remove the LAN cable from this unit when performing updates.

2.5. Start the update

Hold down buttons CURSOR ▶ button and ▶◀ button at the same time and press the "POWER" button to turn on the power.

2.6. Display during USB update

The following message appears on the display:

Display

2.7. Press the "ENTER" key on the remote control unit or this unit

Then start Firmware Update.

Display

2.8. The firmware update finishes

Update after restart.

After updating the firmware, check the version.

--- Precautions for Updates ---

- Wait for 60 seconds before turning the power back on(AC ON→OFF→ON).
- Never remove the USB memory before the update is finished.
- Never turn off the power before an update is completed.
- It takes around 30 minutes to complete the update.

Once an update is started, normal operations cannot be performed until it is completed.

Also, the settings of the unit may be initialized.

Take note of your settings beforehand and reconfigure them after the update.

3. "USB" force update mode

Mode used when this unit cannot be recovered.

Forcibly switches this unit to USB update mode.

3.1. Operation

Hold down buttons CURSOR ◀ button and ▶◀ button at the same time and connect the power cord to an outlet.

NOTE : It waits for the plug of AC plug until the electric charge inside a set is completely discharged for about 2 minutes, when AC plug is pulled out immediately before.

3.2. Display during USB update

The following message appears on the display:

Display

3.3. The firmware update finishes

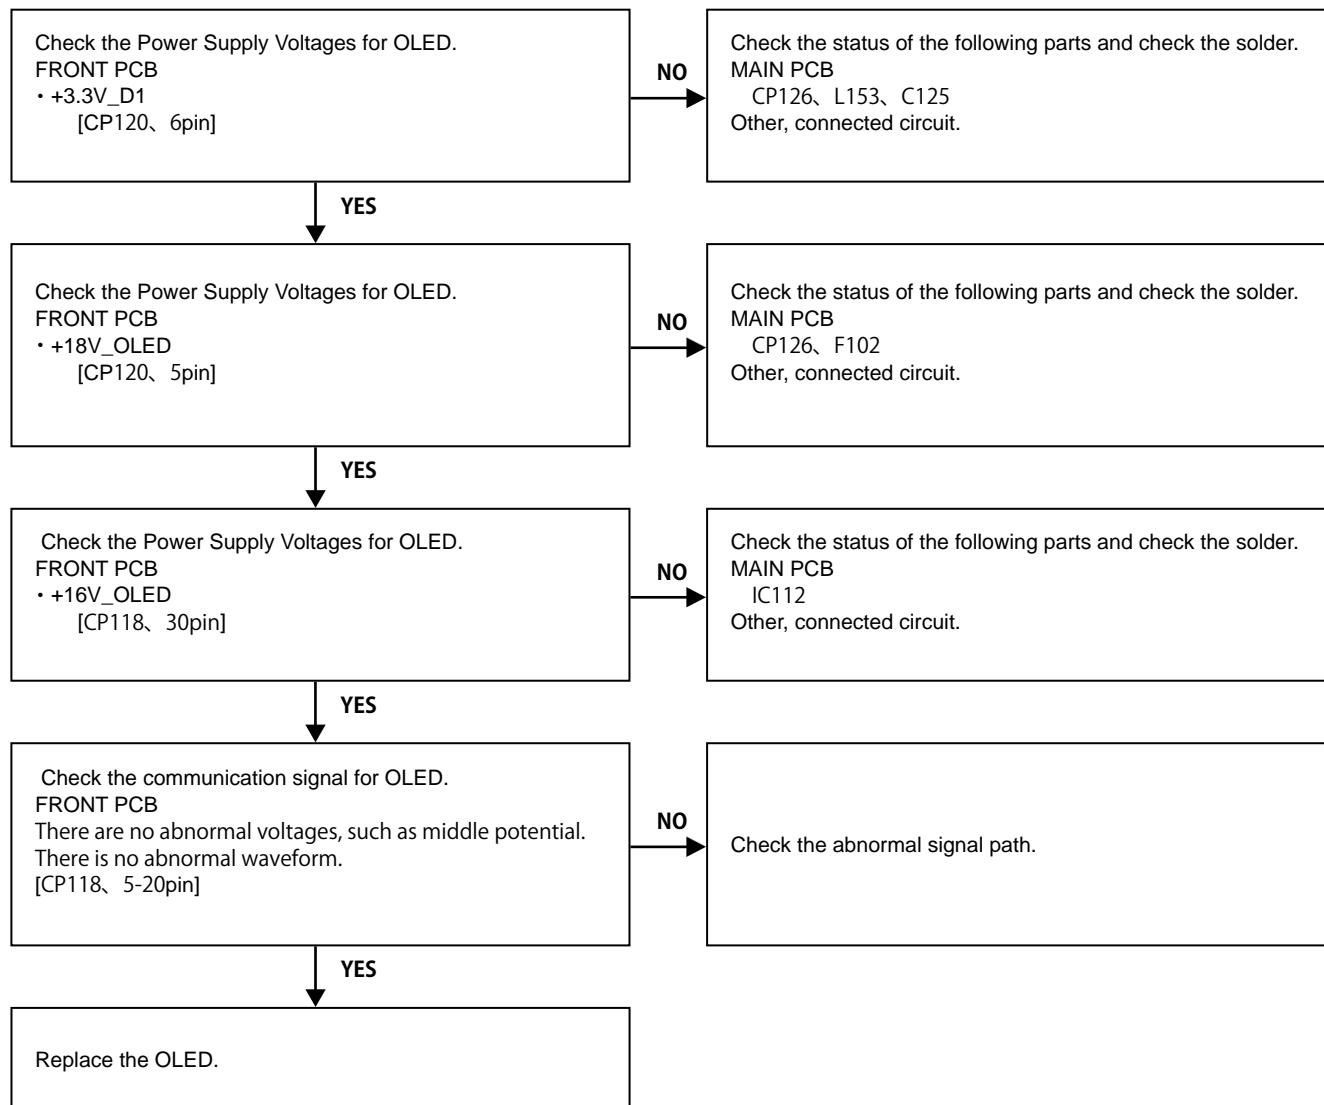

The update after the restart, all devices will be updated.

After updating the firmware, check the version.

Personal notes :

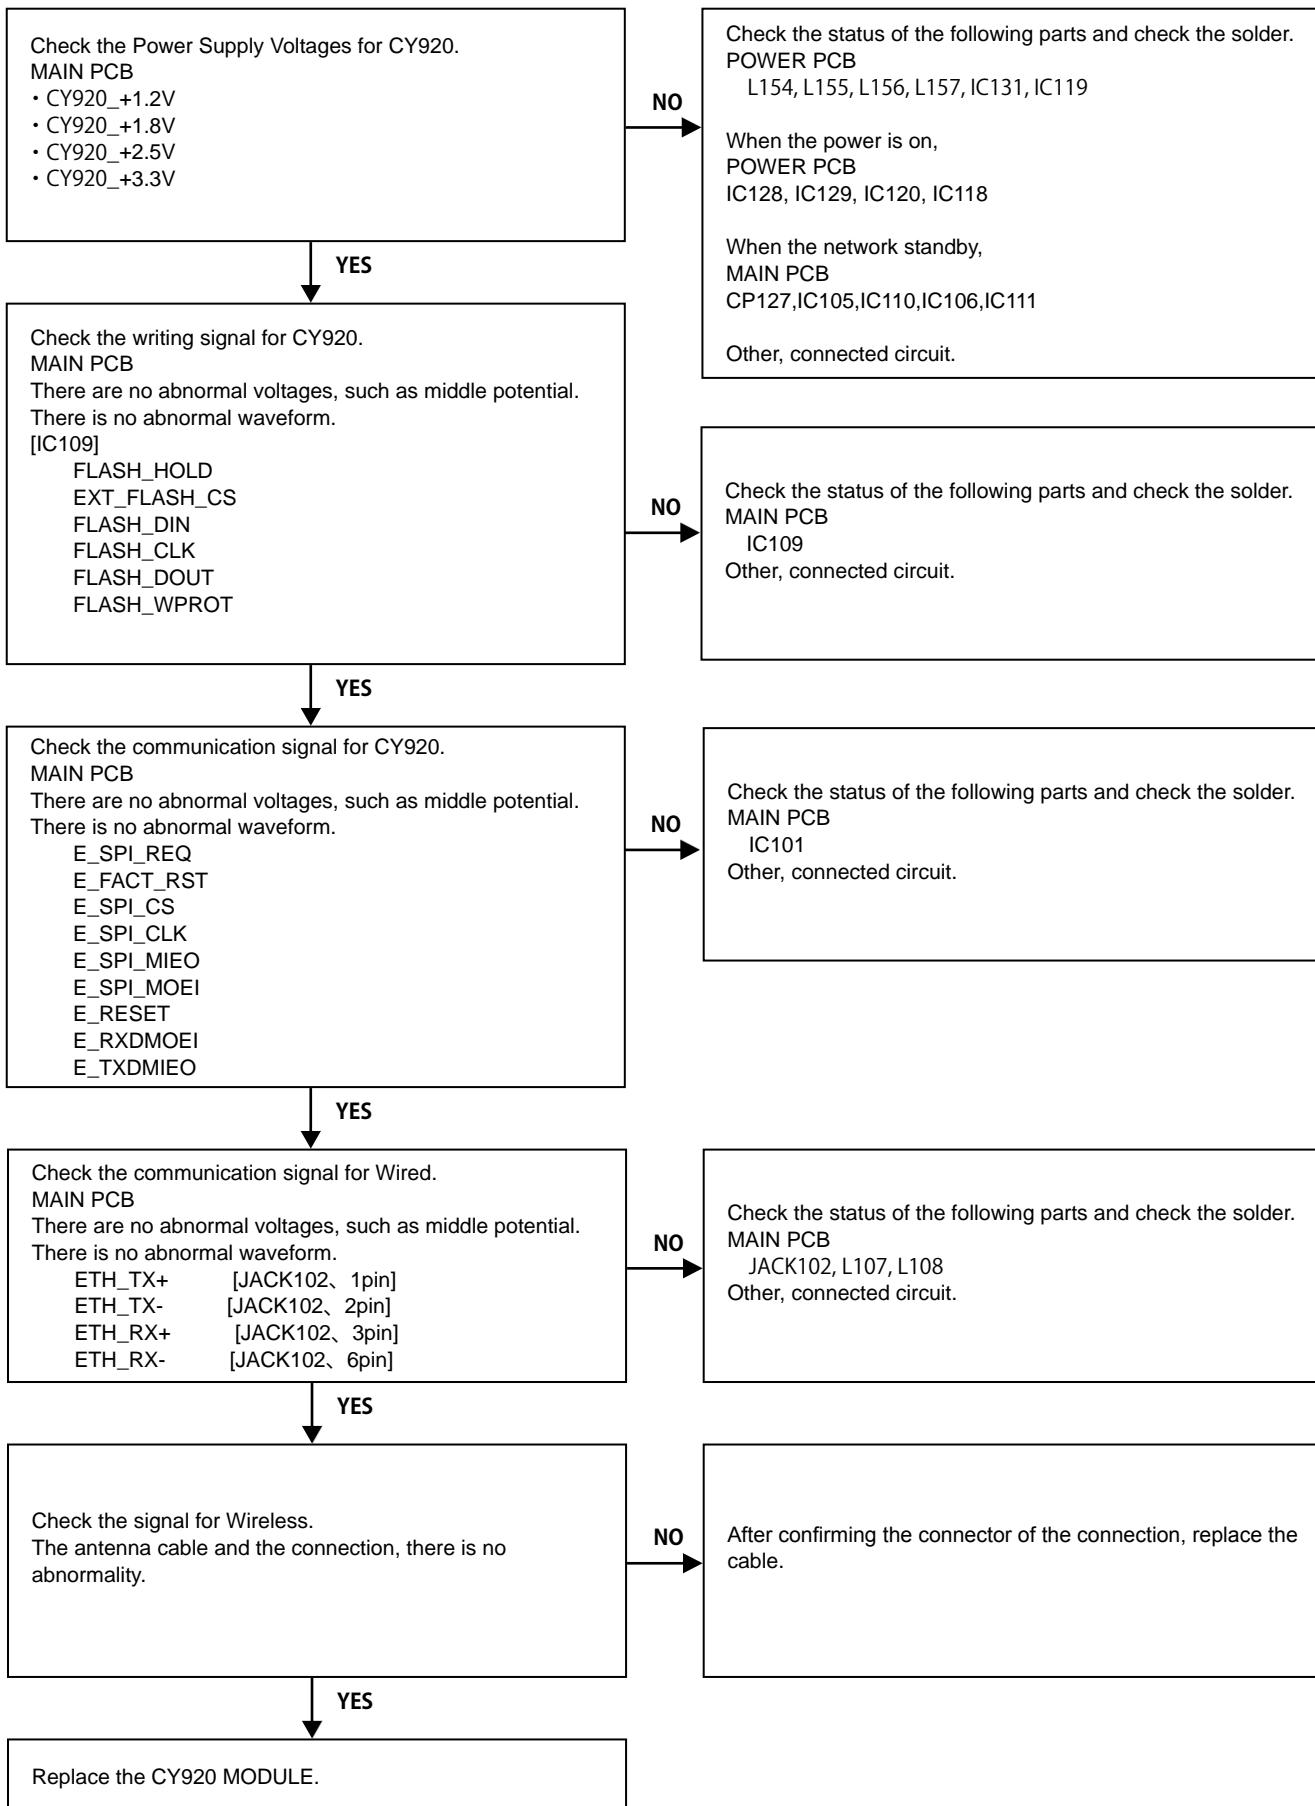

TROUBLE SHOOTING

1. OLED doesn't light

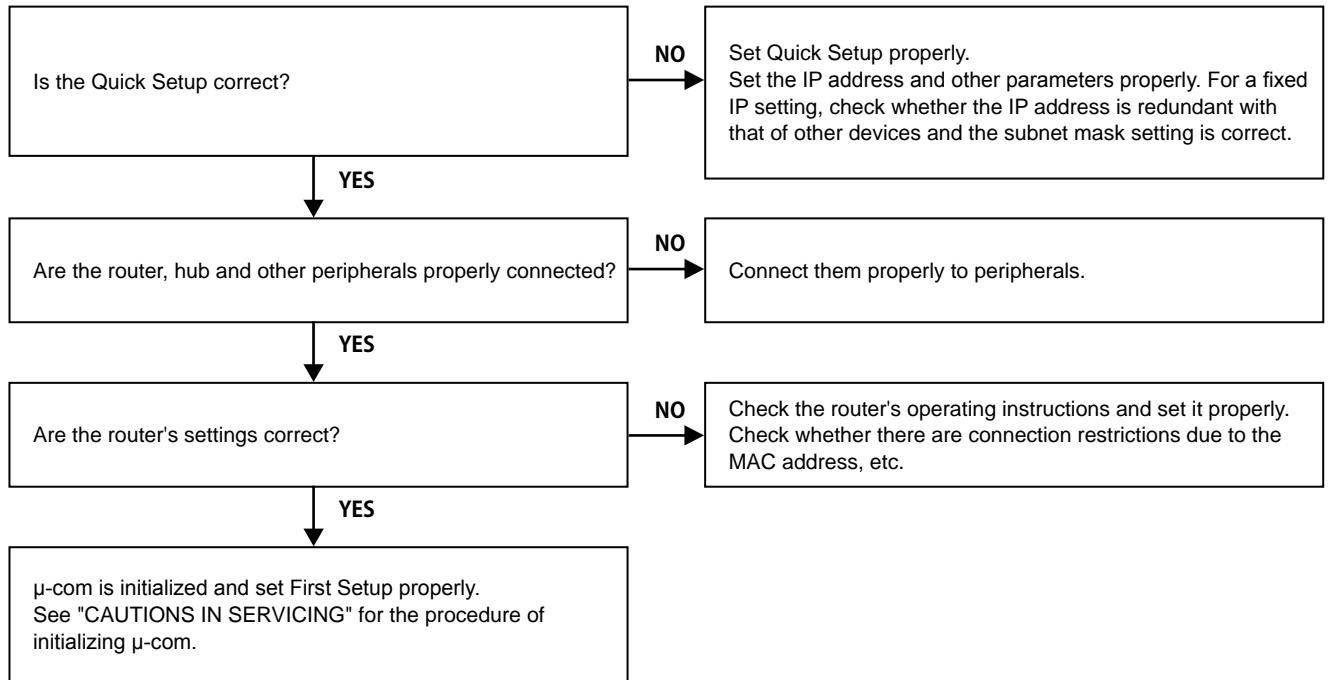

2. Cannot connect to network. / Cannot connect to Bluetooth.

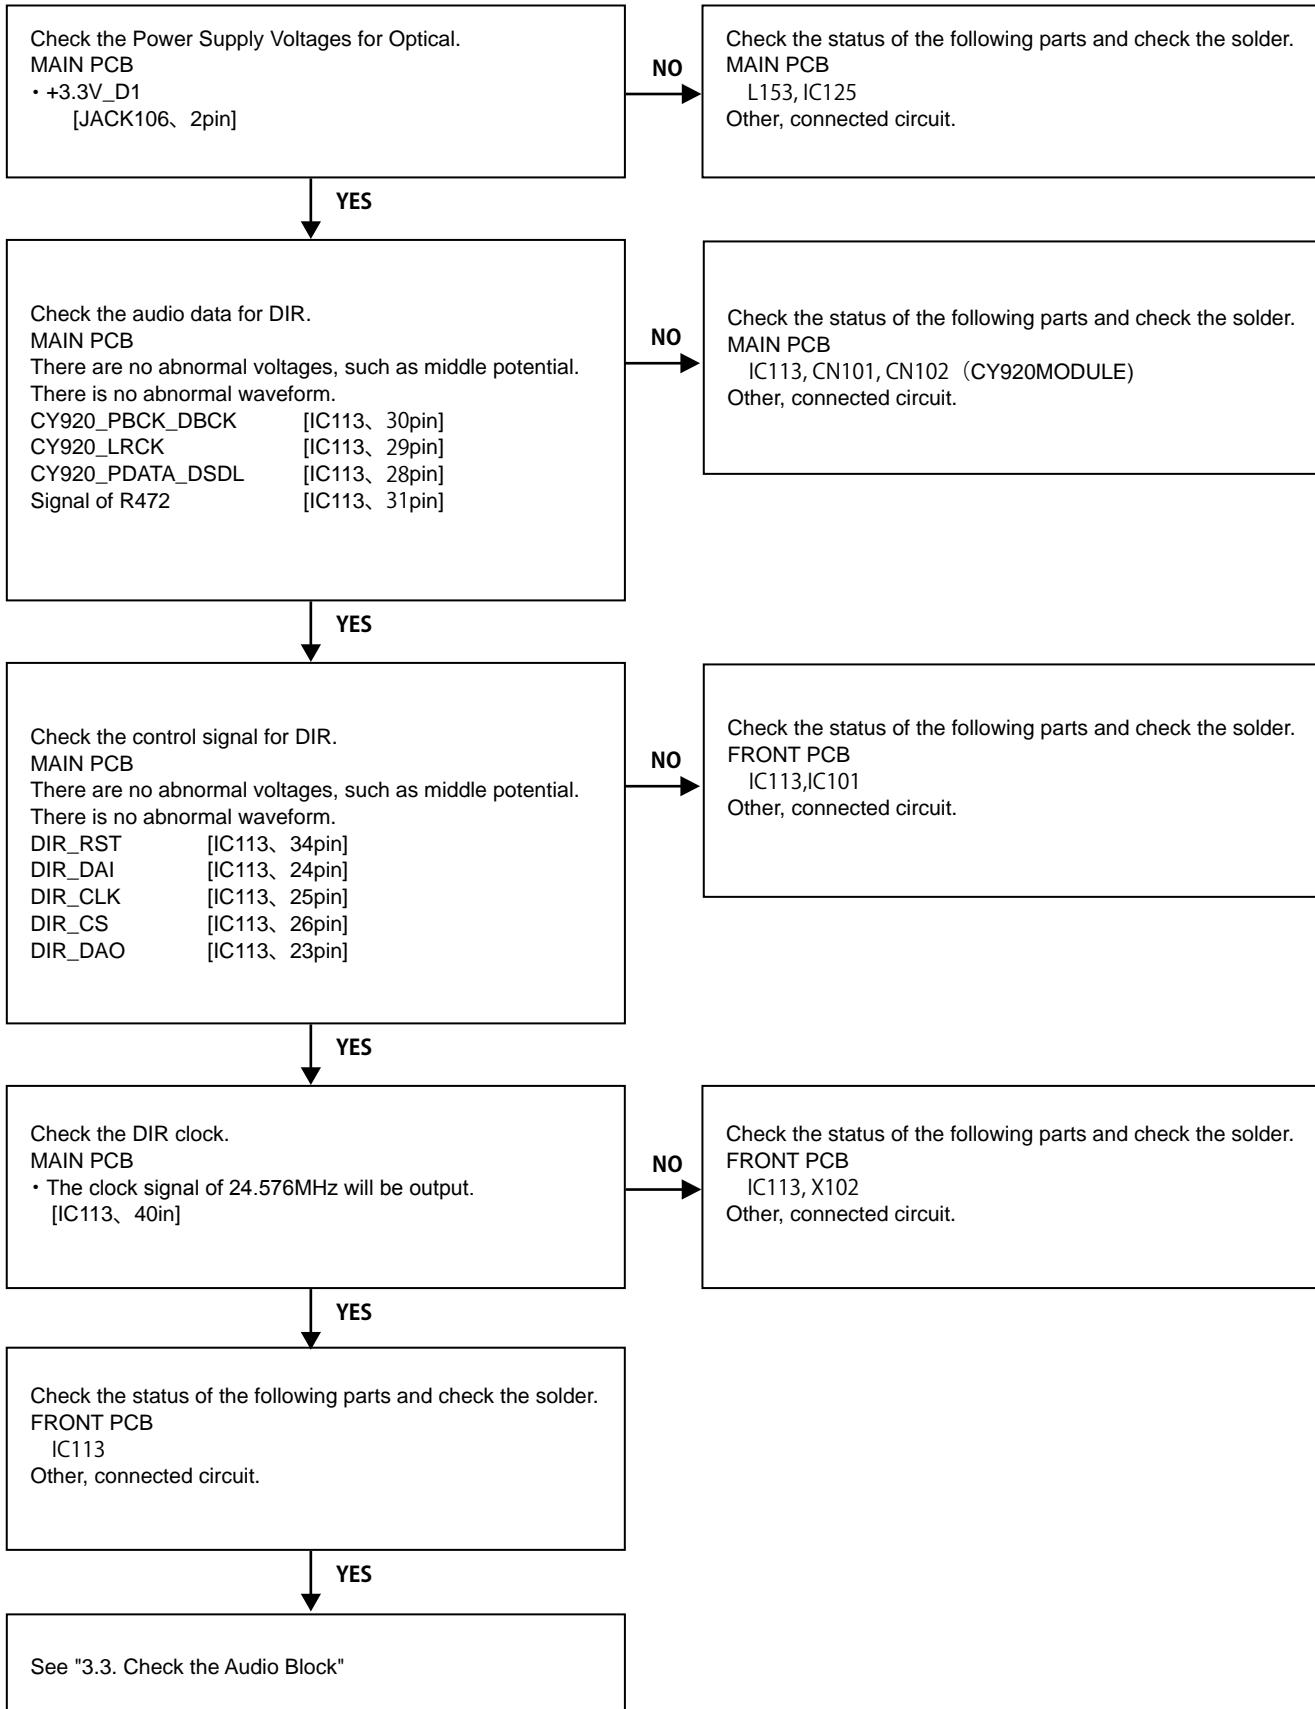

2.1. First Setup doesn't operate normally, Ethernet doesn't playback, Bluetooth does not.

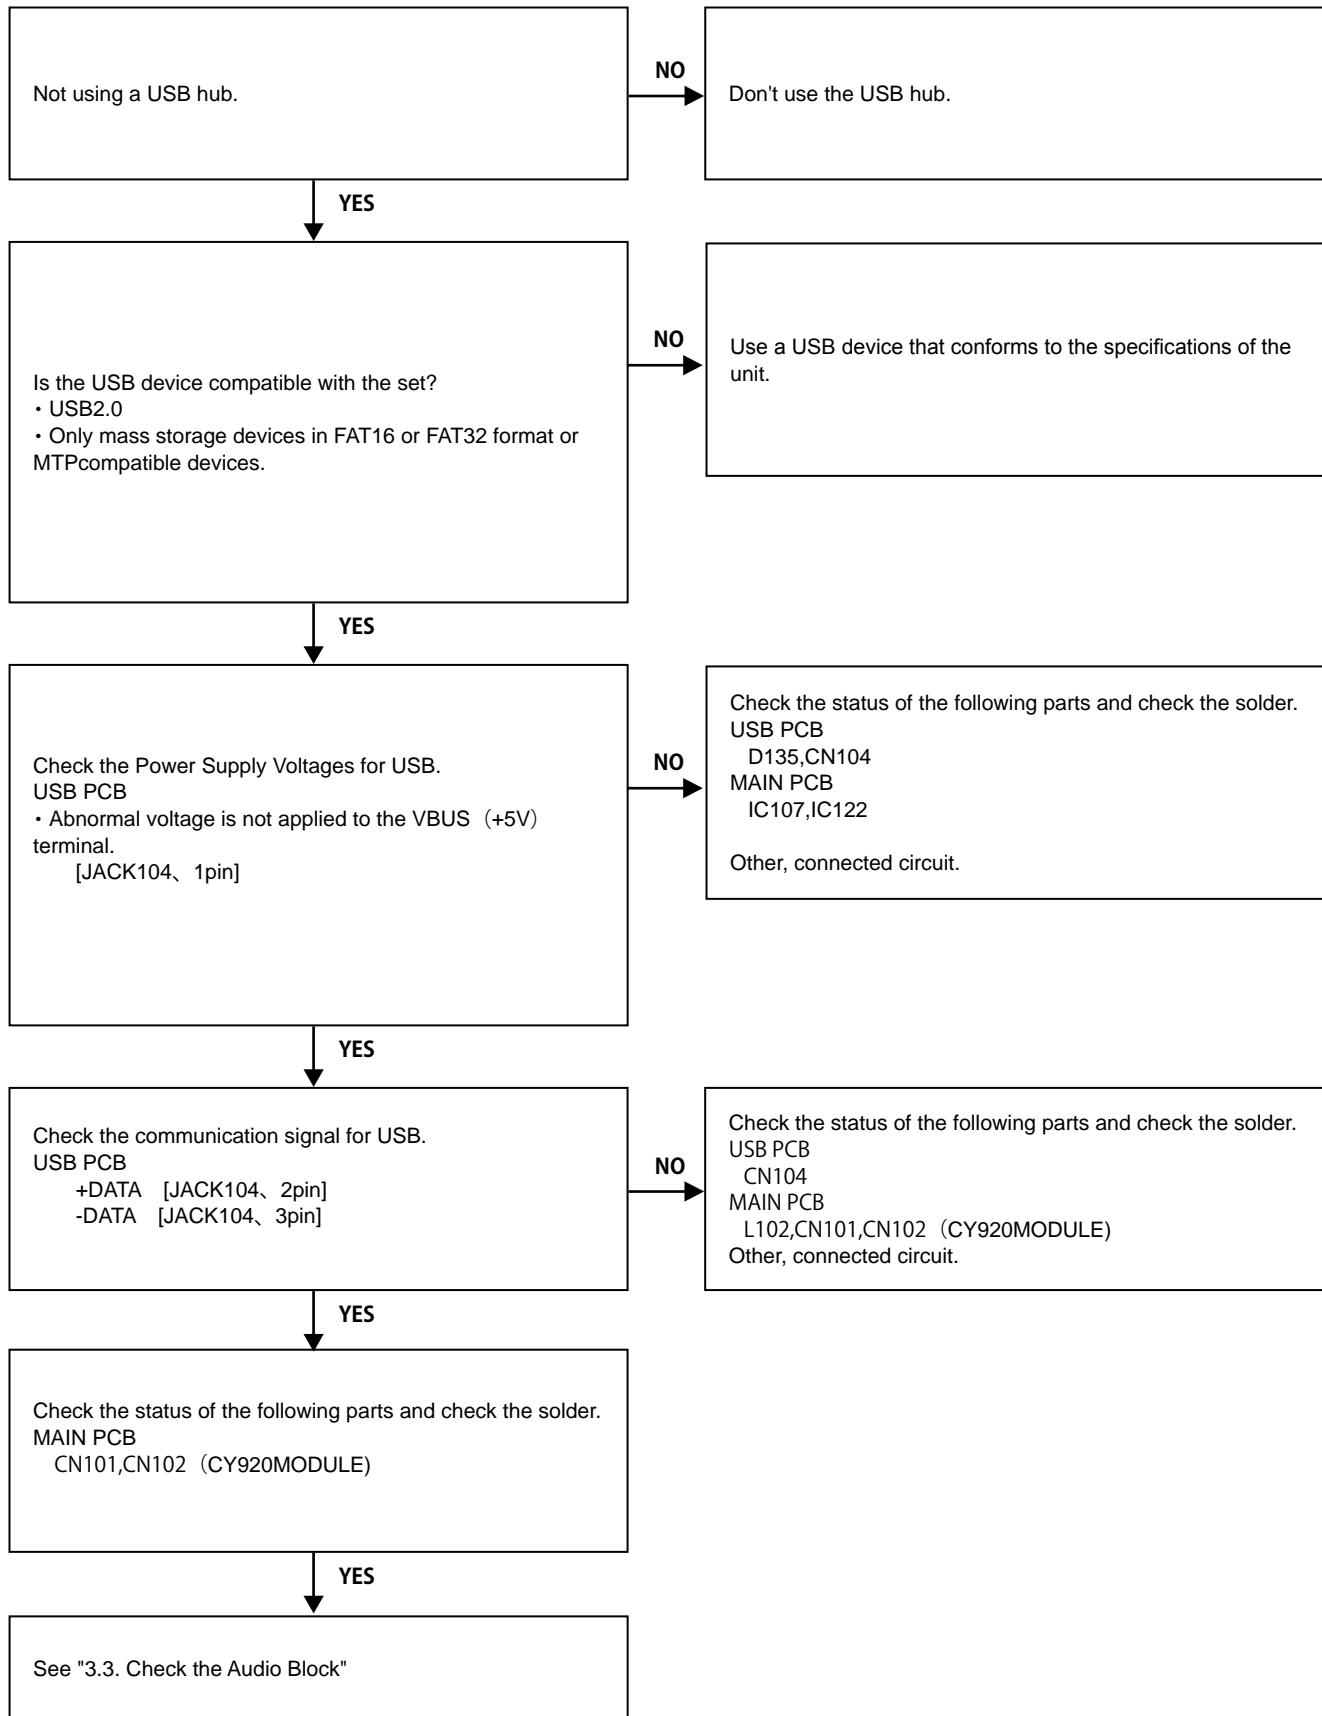

2.2. Cannot connect to network

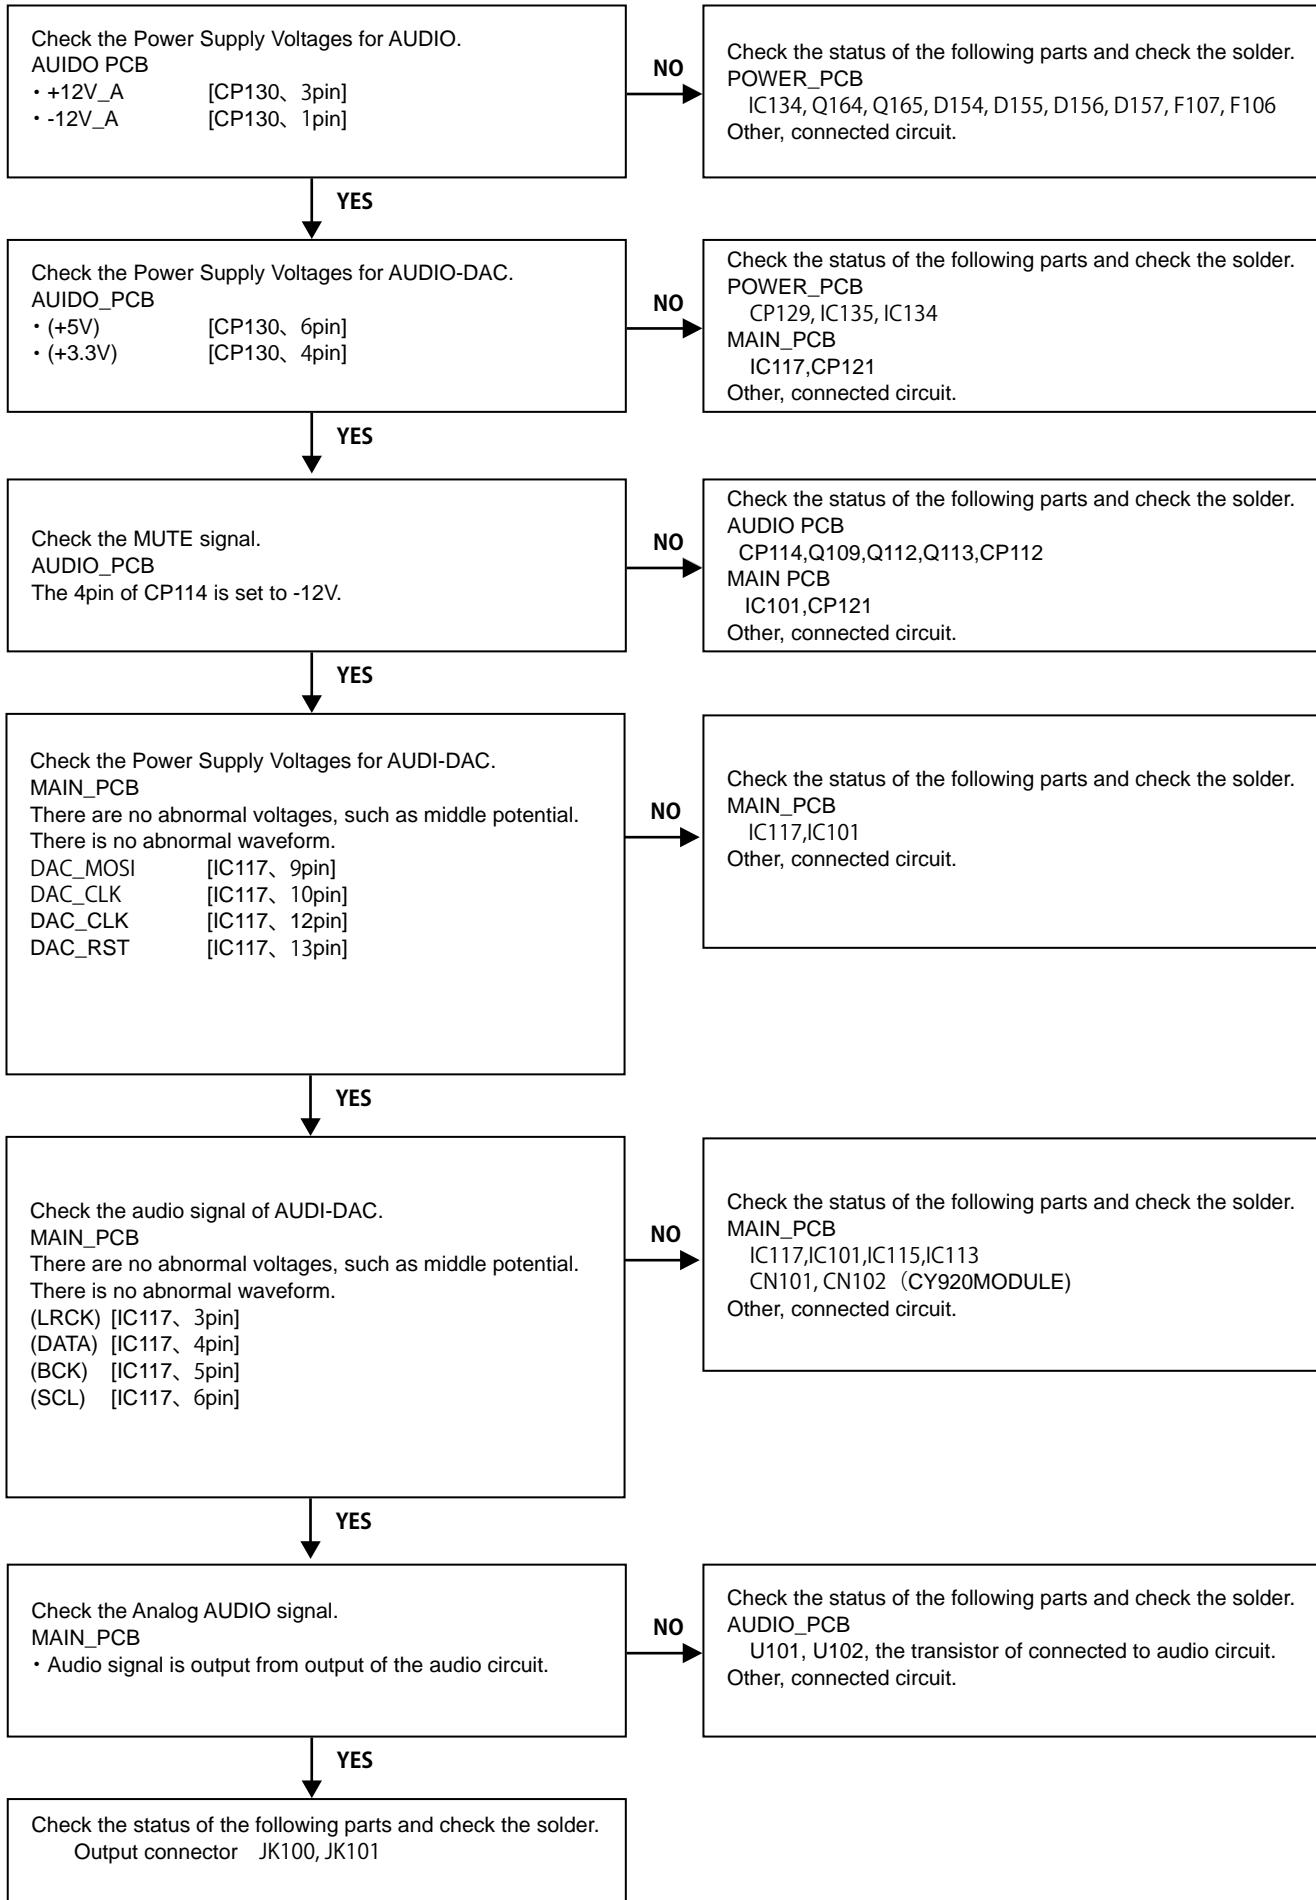

3.1. Optical Output

3.2. USB doesn't playback

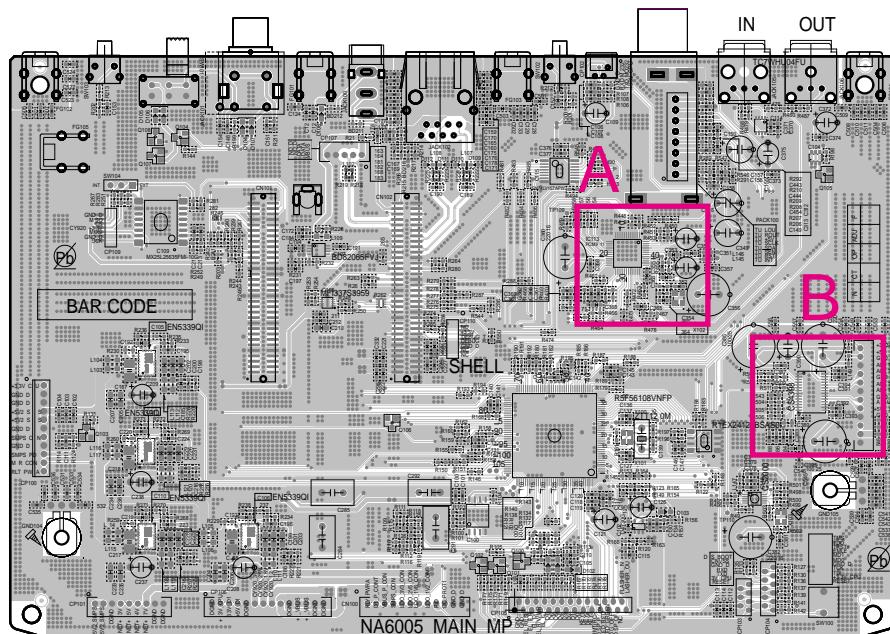

3.3. Check the Audio Block

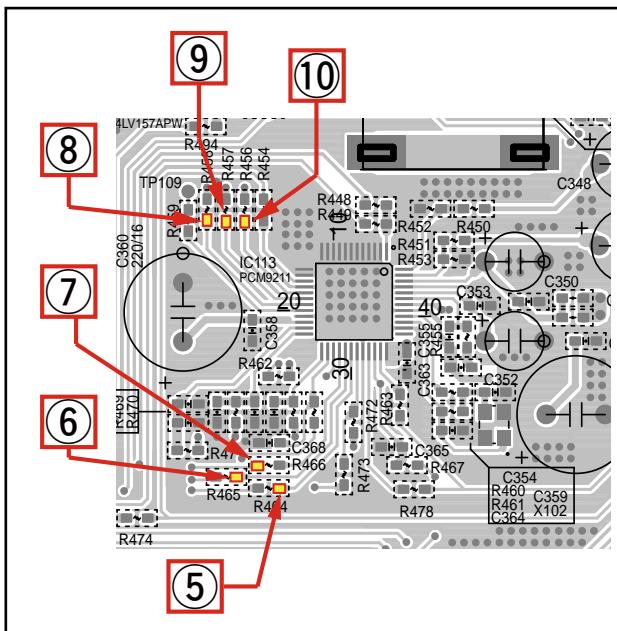

MEASURING METHOD AND WAVEFORMS

(It is better to use wires for extending between the probe and test points.)

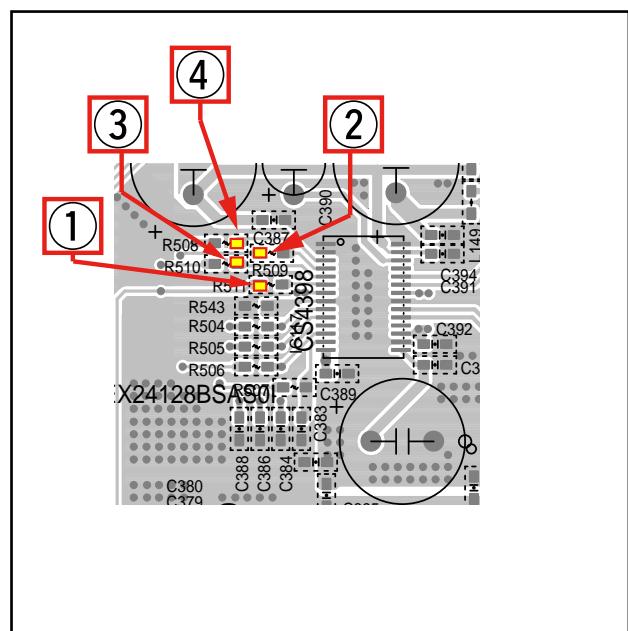

MAIN PCB: TEST POINT

EXPLODED VIEW

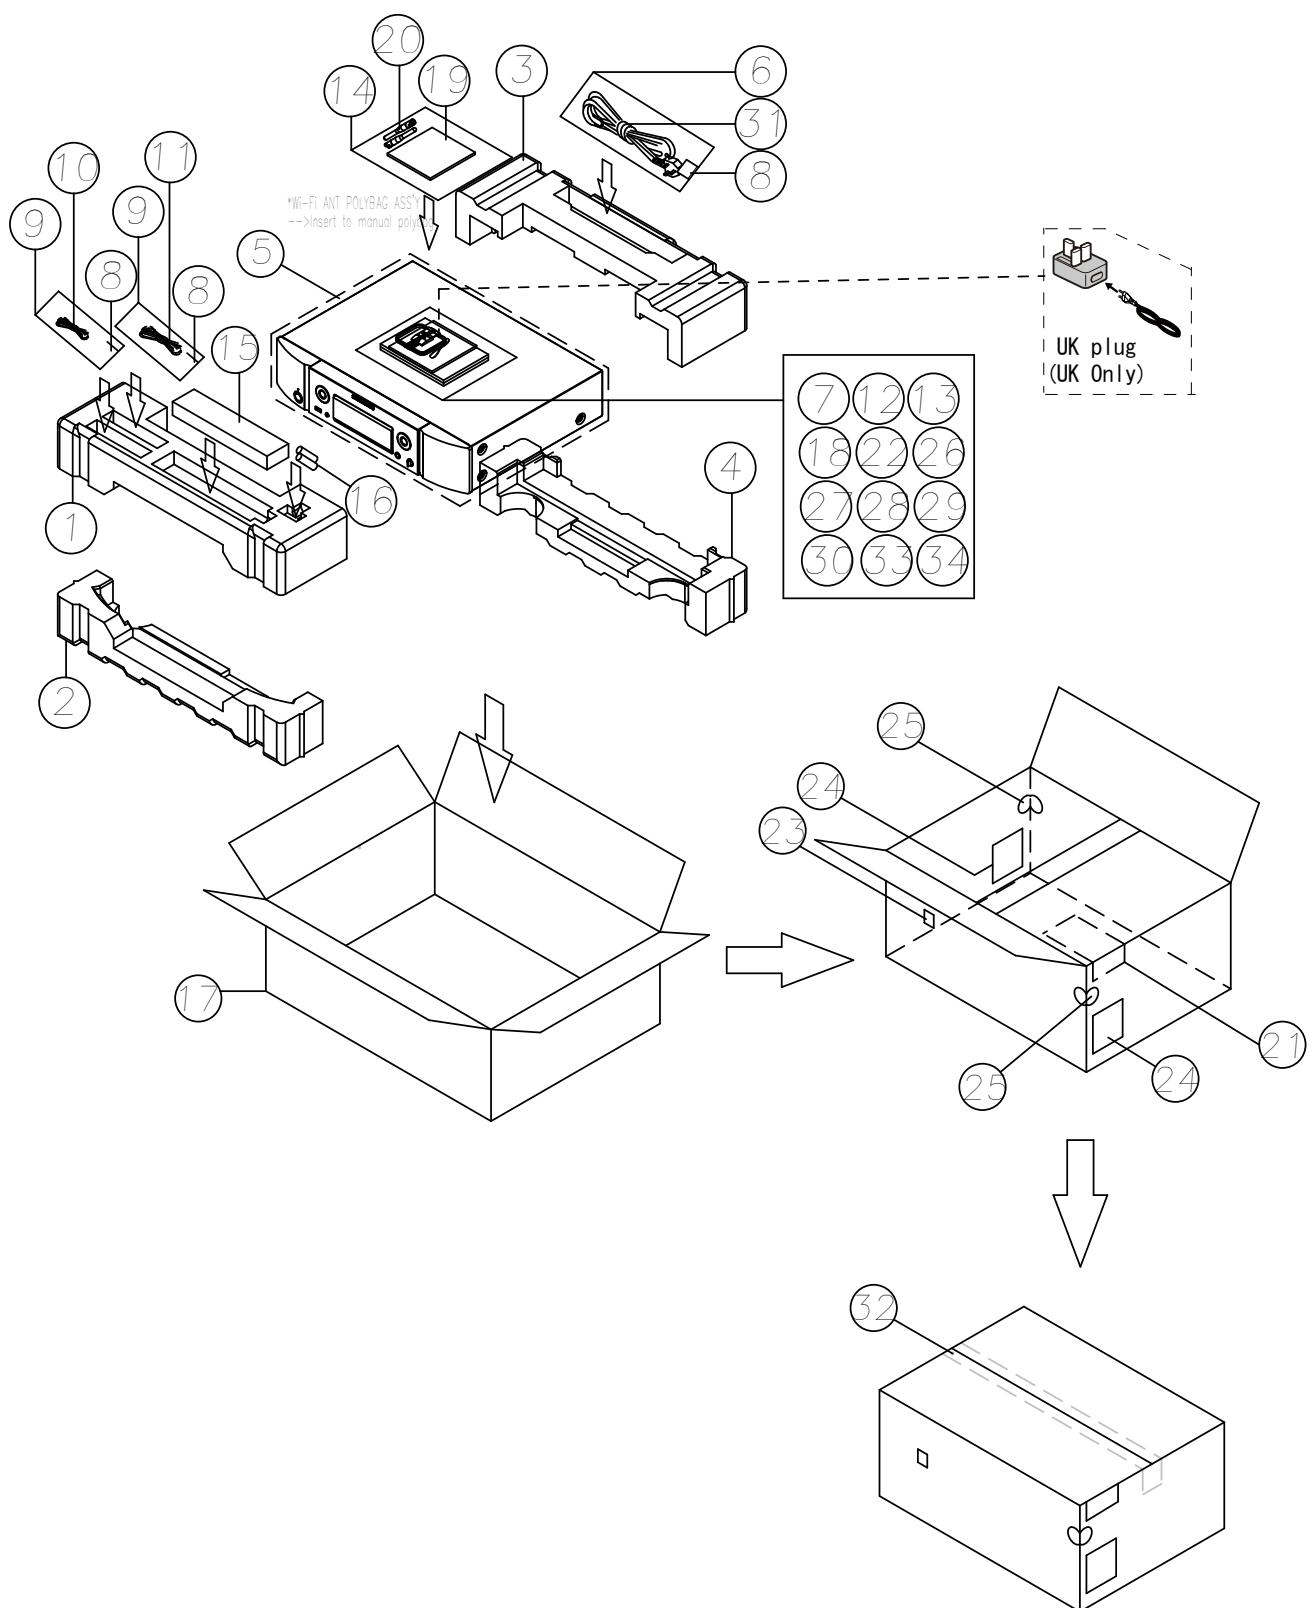

Please refer to the last chapter for the part list.

WARNING:
Parts marked with this symbol have critical characteristics.
Use ONLY replacement parts recommended by the manufacturer.

PACKING VIEW

Please see the last chapter for the part list.

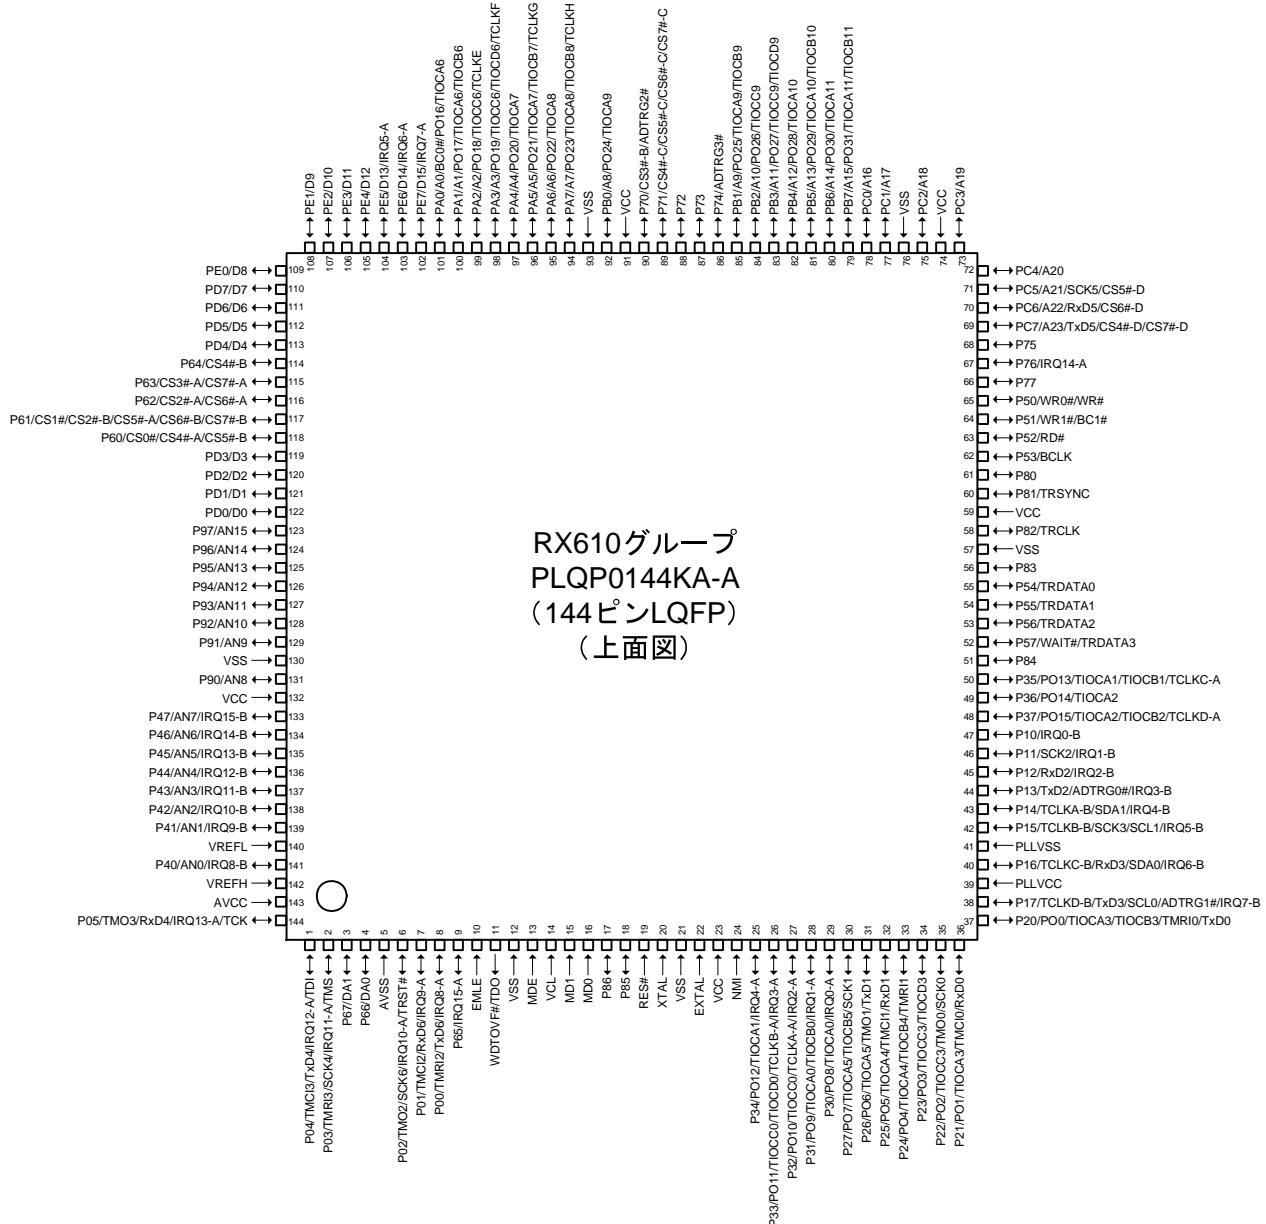

SEMICONDUCTORS

Only major semiconductors are shown, general semiconductors etc. are omitted to list.

The semiconductor which described a detailed drawing in a schematic diagram are omitted to list.

CS4398 (AUDIO : IC117)

CS4398 Terminal Functions

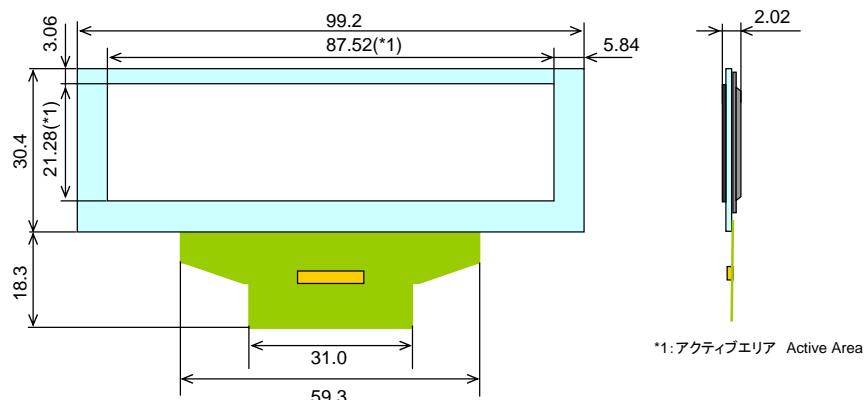

Pin Name	Pin #	Pin Description
DSD_A	28	Direct Stream Digital Input (<i>Input</i>) - Input for Direct Stream Digital serial audio data.
DSD_B	1	
DSD_SCLK	2	DSD Serial Clock (<i>Input</i>) - Serial clock for the Direct Stream Digital audio interface.
SDIN	3	Serial Audio Data Input (<i>Input</i>) - Input for two's complement serial audio data.
SCLK	4	Serial Clock (<i>Input</i>) - Serial clock for the serial audio interface.
LRCK	5	Left Right Clock (<i>Input</i>) - Determines which channel, Left or Right, is currently active on the serial audio data line.
MCLK	6	Master Clock (<i>Input</i>) - Clock source for the delta-sigma modulator and digital filters.
VD	7	Digital Power (<i>Input</i>) - Positive power for the digital section.
DGND	8	Digital Ground (<i>Input</i>) - Ground reference for the digital section.
RST	13	Reset (<i>Input</i>) - The device enters system reset when enabled.
VLC	14	Control Port Power (<i>Input</i>) - Positive power for Control Port I/O.
FILT+	15	Positive Voltage Reference (<i>Output</i>) - Positive reference voltage for the internal sampling circuits.
REF_GND	16	Reference Ground (<i>Input</i>) - Ground reference for the internal sampling circuits.
VREF	17	Voltage Reference (<i>Input</i>) - Positive voltage reference for the internal sampling circuits.
BMUTEC	18	Mute Control (<i>Output</i>) - The Mute Control pin is active during power-up initialization, muting, power-down or if the master clock to left/right clock frequency ratio is incorrect. During reset, these outputs are set to a high impedance.
AMUTEC	25	
AOUTB+	20	Differential Right Channel Analog Output (<i>Output</i>) - The full-scale differential analog output level is specified in the Analog Characteristics specification table.
AOUTB-	19	
AGND	21	Analog Ground (<i>Input</i>) - Ground reference for the analog section.
VA	22	Analog Power (<i>Input</i>) - Positive power for the analog section.
AOUTA+	23	Differential Left Channel Analog Output (<i>Output</i>) - The full-scale differential analog output level is specified in the Analog Characteristics specification table.
AOUTA-	24	
VQ	26	Quiescent Voltage (<i>Output</i>) - Filter connection for internal quiescent voltage.
VLS	27	Serial Audio Interface Power (<i>Input</i>) - Positive power for serial audio interface I/O.
Stand-Alone Mode Definitions		
M3	9	
M2	10	Mode Selection (<i>Input</i>) - Determines the operational mode of the device.
M1	11	
M0	12	
Control Port Mode Definitions		
AD1/CDIN	9	Address Bit 1 (I ² C) / Control Data Input (SPI) (<i>Input</i>) - AD1 is a chip address pin in I ² C mode; CDIN is the input data line for the Control Port interface in SPI mode.
SCL/CCLK	10	Serial Control Port Clock (<i>Input</i>) - Serial clock for the serial Control Port.
SDA/CDOUT	11	Serial Control Data (I ² C) / Control Data Output (SPI) (<i>Input/Output</i>) - SDA is a data I/O line in I ² C mode. CDOUT is the output data line for the Control Port interface in SPI mode.
AD0/CS	12	Address Bit 0 (I ² C) / Control Port Chip Select (SPI) (<i>Input</i>) - AD0 is a chip address pin in I ² C mode; CS is the chip select signal for SPI format.

MAIN PCB ASS'Y

※Parts indicated by "nsp" on this table cannot be supplied.

※The parts listed below are only for maintenance. Therefore they might differ from the parts used in the unit in appearances or dimensions.

NOTE:The symbols in the column Remarks indicate the following destinations.

U : North America model N : Europe model K : China model F : Japan model

B : Black model SG : Silver Gold model

AUDIO PCB ASS'Y

※Parts indicated by "nsp" on this table cannot be supplied.

※The parts listed below are only for maintenance. Therefore they might differ from the parts used in the unit in appearances or dimensions.

NOTE: The symbols in the column Remarks indicate the following destinations.

U : North America model N : Europe model K : China model F : Japan model

B : Black model SG : Silver Gold model

POWER PCB ASS'Y

※Parts indicated by "nsp" on this table cannot be supplied.

※The parts listed below are only for maintenance. Therefore they might differ from the parts used in the unit in appearances or dimensions.

NOTE:The symbols in the column Remarks indicate the following destinations.

U : North America model N : Europe model K : China model F : Japan model

B : Black model SG : Silver Gold model
