

Service Bulletin

No. : MZ09-136

Date: January 4, 2010

Model: SR6004, SR5004

Subject: The unit might be turning on the "protection-mode (Standby LED is flashing at high speed)".

Countermeasure is applicable upon claim from the customer and upon repair.

Symptom: Standby LED flashes at high speed.

Cause: If customer connects the specific HDMI cable or extra HDMI repeater to the unit, current of grounding circuit will be increased, and the grounding level is not stable. Therefore balance of voltage of power supply (+/-12Volts) is not stable, and then the unit might be turning on the "protection-mode".

Solution: Please short the both end of R211 (10 ohms).

- 1) Remove the "REG PWB (REG2 PWB)" ASSY from the unit.

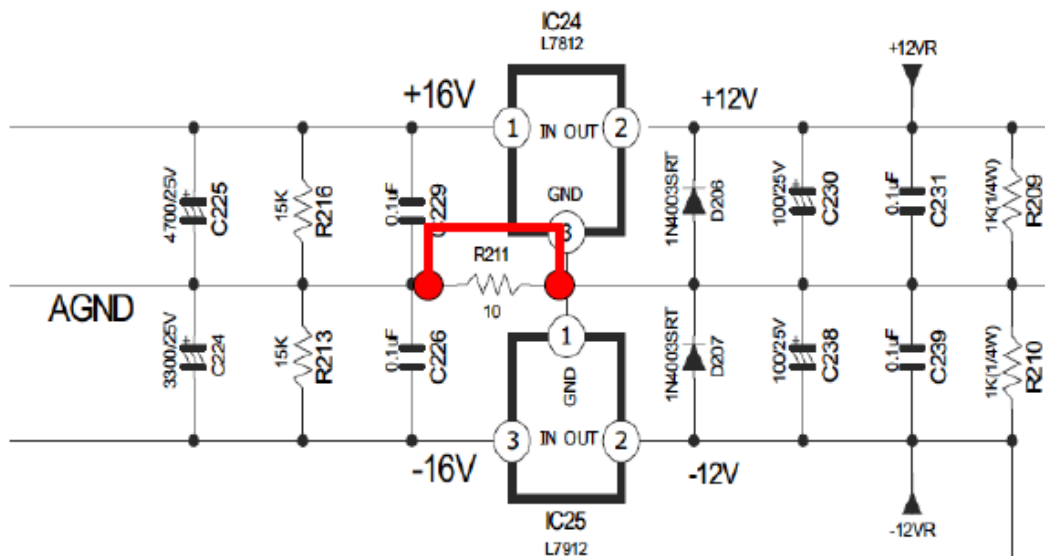

- 2) Short between both lands of pattern side of the R211 by thin copper wire.
(Please do not cut the R211 10 ohms.)
