Service Bulletin

No. : MZ09-041rev.2

Date: November 17, 2009

Model: SR6003/5003

Subject: Software Update Information*

* This Service Bulletin is only for service information for the following minor improvement. This is not a call requiring a rework to be applied to stock units.

Symptom: When using a specific TV (EPSON EH-TW4000 or ProCinema7500UB) and A/V AMP connected via HDMI and the Analog Video signal "VIDEO/S-VIDEO/Component 480i/576i" is output by 1080p, the picture of TV might not be reproduced correctly.

Solution: The HDMI CPU SOFTWARE will be updated.
The new version number after the correction will be [HDMI Ver.h24].
The update software to be used is: **00M26DW499A01.zip**.
The write data file name: "**HDMI_REPV5x090310h24.mot**"
For the procedure, please refer to the service manual.

Serial Number Range:

SR6003 All models (Production has already finished.)

SR5003 All models (Production has already finished.)
