TERMINAL DESCRIPTION

Pin Name	Description
CLK	Active on the positive going edge to sample all inputs.
\overline{CS}	Disables or enables device operation by masking or enabling all inputs except CLK , CKE and L(U)DQM.
CKE	Masks system clock to freeze operation from the next clock cycle. CKE should be enabled at least one cycle prior new command. Disable input buffers for power down in standby.
A0 ~ A11	Row / column address are multiplexed on the same pins. Row address : RA0~RA11, column address : CA0~CA7.
A12 , A13	Selects bank to be activated during row address latch time. Selects bank for read / write during column address latch time.
\overline{RAS}	Latches row addresses on the positive going edge of the CLK with \overline{RAS} low. Enables row access & precharge.
\overline{CAS}	Latches column address on the positive going edge of the CLK with CAS low. Enables column access.
\overline{WE}	Enables write operation and row precharge. Latches data in starting from \overline{CAS} , \overline{WE} active.
L(U)DQM	Makes data output Hi-Z, tSHZ after the clock and masks the output. Blocks data input when L(U)DQM active.
DQ0 ~ DQ15	Data inputs / outputs are multiplexed on the same pins.
VDD / VSS	Power and ground for the input buffers and the core logic.
VDDQ / VSSQ	Isolated power supply and ground for the output buffers to provide improved noise immunity.
NC	This pin is recommended to be left No Connection on the device.

MUTECL	38	Mute Control (Output) - The Mute Control pin outputs high impedance following an initial power -on condition or whenever the PDN bit is set to a "1", forcing the codec into power -down mode. The signal will remain in a high impedance state as long as the part is in power-down mode. The Mute Control pin goes to the selected "active" state during reset, muting, or if the master clock to left/right clock frequency ratio is incorrect. This pin is intended to be used as a control for external mute circuits to prevent the clicks and pops that can occur in any single supply system. The use of external mute circuits are not mandatory but may be desired for designs requiring the absolute minimum in extraneous clicks and pops.
LPFLT	39	PLL Loop Filter (Output) - An RC network should be connected between this pin and ground.
RXP7/GPO7 RXP6/GPO6 RXP5/GPO5 RXP4/GPO4 RXP3/GPO3 RXP2/GPO2 RXP1/GPO1	42 43 44 45 46 47 48	S/PDIF Receiver Input/ General Purpose Output (Input/ Output) - Receiver inputs for S/PDIF encoded data. The CS42518 has an internal 8:2 multiplexer to select the active receiver port, according to the Receiver Mode Control 2 register. These pins can also be configured as general purpose output pins, ADC Overflow indicators or Mute Control outputs according to the RXP/General Purpose Pin Control registers.
RXP0	49	S/PDIF Receiver Input (Input) - Dedicated receiver input for S/PDIF encoded data.
TXP	50	S/PDIF Transmitter Output (Output) - S/PDIF encoded data output, mapped directly from one of the receiver inputs as indicated by the Receiver Mode Control 2 register.
VLP	53	Serial Port Interface Power (Input) - Determines the required signal level for the serial port interfaces.
SAI_SDOOUT	54	Serial Audio Interface Serial Data Output (Output) - Output for two's complement serial audio PCM data from the S/PDIF incoming stream. This pin can also be configured to transmit the output of the internal and external ADCs.
RMCK	55	Recovered Master Clock (Output) - Recovered master clock output from the External Clock Reference

2. Safety check out

(U.S.A. model only)

After correcting the original service problem, perform the following safety check before releasing the unit to the customer.

Leakage current Check

Measure the leakage current to a known earth ground (water pipe or conduct etc.) by connecting a leakage current tester between the earth ground and exposed metal parts of the unit (input/output ground terminals, screw heads or metal overlays etc.).

Plug the power supply cord directly into a 120Vac 60Hz wall socket and turn ON/STANDBY button on.

Any current measured must not exceed 0.5mA.

3. Memory Backup

This model uses a EE-PROM IC in order to retain radio presets and other settings. So, memory contents will be kept eternally with no care.

4. To initialize the unit

1. Press and hold down VCR/DVR button, then press ON/STANDBY button when the unit is powered on.
2. After " *Clear* " is displayed, the preset memory and each mode stored in the memory, are initialized and will return to the factory settings.

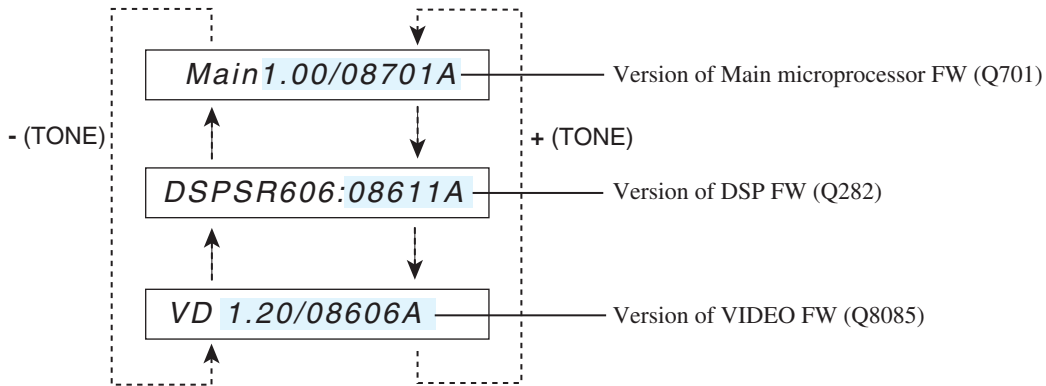

SERVICE PROCEDURE-2

ADJUSTMENT PROCEDURE-1

IDLING CURRENT ADJUSTMENT

[When]

1. Exchange Power transistor (Q6050 - Q6056, Q6060 - Q6066).
2. Amplifier PC board (NAAF-9419).

[Procedure]

Refer to "ADJUSTMENT PROCEDURE-2 " for the adjustment points and the test points.

<Note> No load and No signal

1. Before idling adjustment, turn the trimming resistors fully to counter clockwise.
2. Connect the dc voltmeter to test points, using two 100 ohm resistors between the poles of the jig terminal and the dc voltmeter terminals.

3. Connect the ac power cord to a wall outlet. And press ON/STANDBY button to turn the power on.
4. Adjust the trimming resistors as the following procedure immediately after power on.

Channel	Adjustment point	Test point	Adjustment value
Front Left	R6041	P6081	2.5 mV
Front Right	R6042	P6082	
Center	R6040	P6080	
Surround Left	R6043	P6083	1.5 mV
Surround Right	R6044	P6084	
Surround Back Left	R6045	P6085	
Surround Back Right	R6046	P6086	

5. Wait for 4 - 6 minutes. (Heat running)
6. Re-adjust the trimming resistors as the following procedure.

Channel	Measured value	Adjustment value	Specifications
Front Left, Front Right and Center	In below 9 mV →	9 mV	12 +/- 3 mV
	In case 9 - 11 mV →	Leave it as it is	
	In case over 11 mV →	11 mV	
Surround Left Surround Right Surround Back Left Surround Back Right	In case below 6 mV →	6 mV	9 +/- 3 mV
	In case 6 - 8 mV →	Leave it as it is	
	In case over 8 mV →	8 mV	

<Notes>

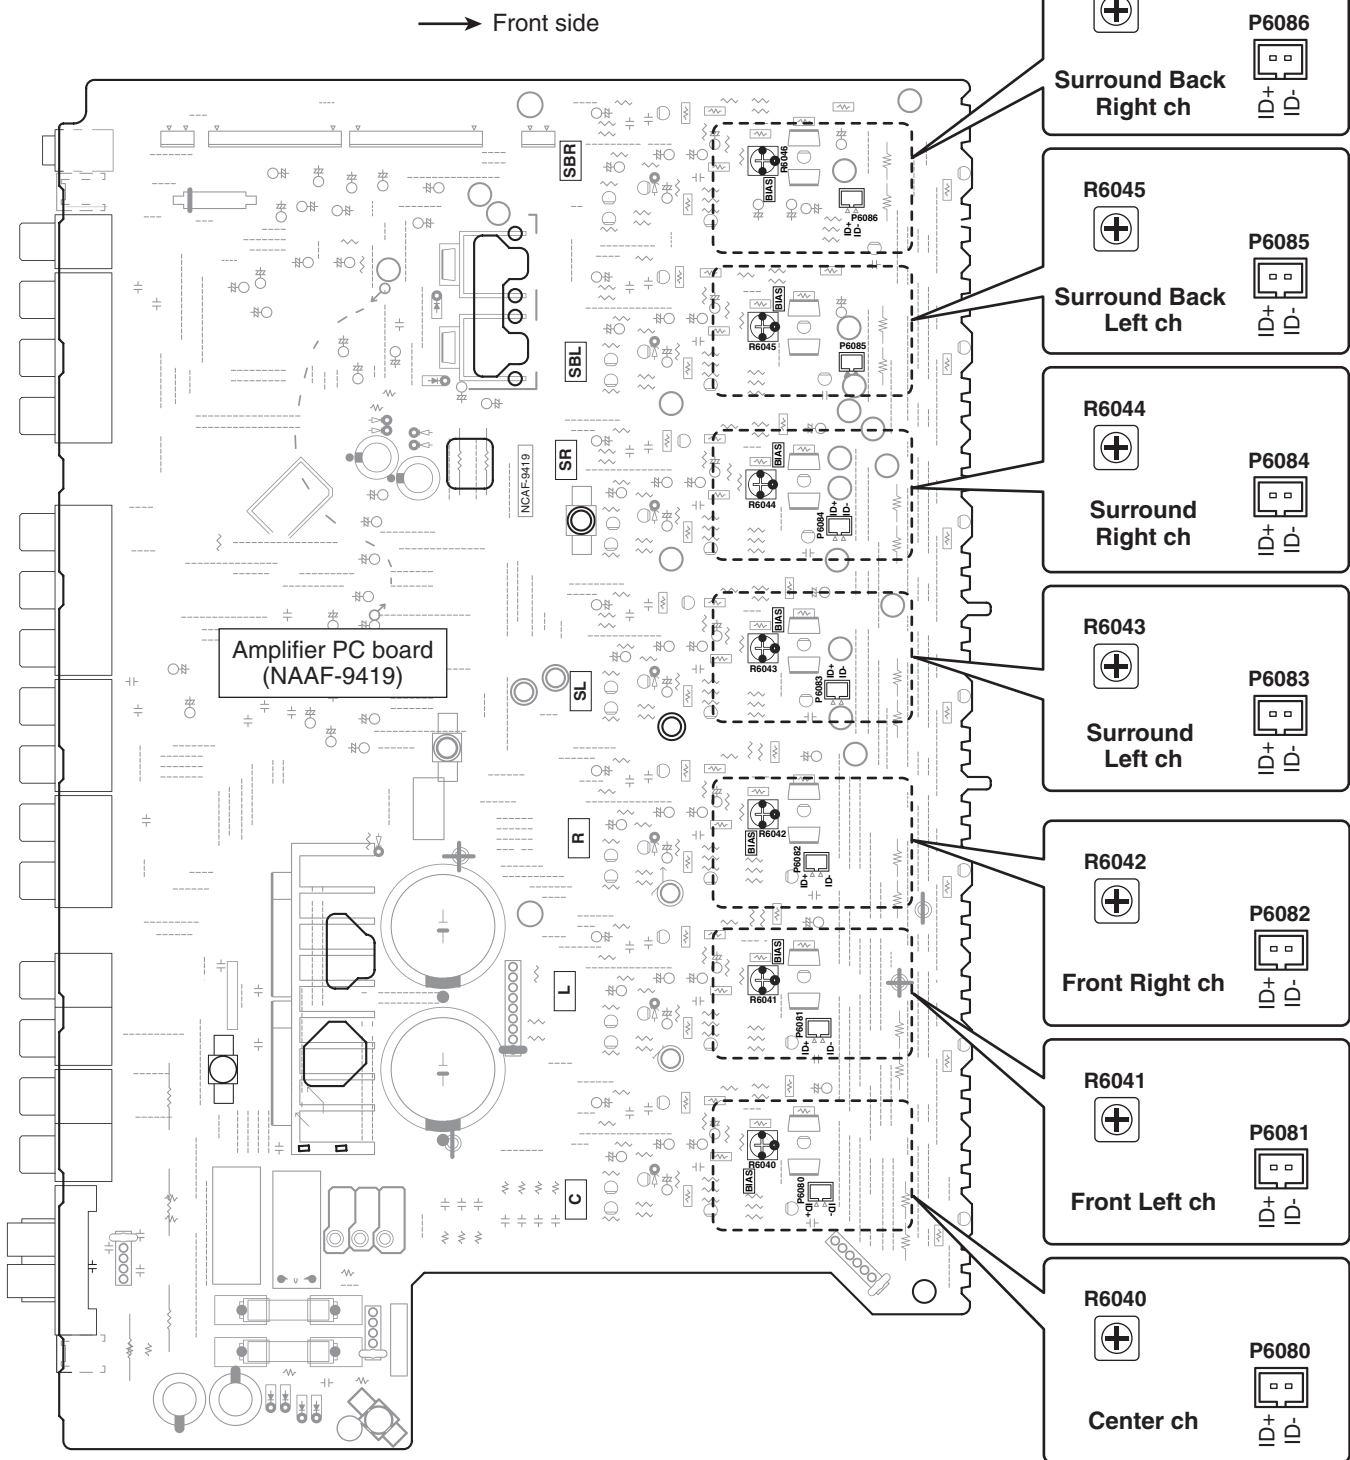

Idling currents are stabilized in about 10 minutes after power on.

7. Disconnect the dc voltmeter.
8. Press ON/STANDBY button to turn the power off. And disconnect the ac power cord.
