DIGITAL AUDIO

Product Color: (K)...Black Type

Notes: Please refer to the Original Service Manual for :
 ● CD Mechanism Unit (DLS6C), Order No. MD0803034CE
 ● Speaker system SB-PM48EG-K, Order No. PSG0902008CE

WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

IMPORTANT SAFETY NOTICE

There are special components used in this equipment which are important for safety. These parts are marked by in the Schematic Diagrams, Circuit Board Diagrams, Exploded Views and Replacement Parts List. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire or other hazards. Do not modify the original design without permission of manufacturer.

1 Safety Precautions

1.1. General Guidelines

1. When servicing, observe the original lead dress. If a short circuit is found, replace all parts which have been overheated or damaged by the short circuit.
2. After servicing, see to it that all the protective devices such as insulation barriers, insulation papers shields are properly installed.
3. After servicing, carry out the following leakage current checks to prevent the customer from being exposed to shock hazards.

1.1.1. Leakage Current Cold Check

1. Unplug the AC cord and connect a jumper between the two prongs on the plug.
2. measure the resistance value, with an ohmmeter between the jumpered AC plug and each exposed metallic cabinet part on the equipment such as screwheads, connectors, control shafts, etc. When the exposed metallic part has a return path to the chassis, the reading should be between $1M\Omega$ and $5.2M\Omega$. When the exposed metal does not have a return path to the chassis, the reading must be ∞

1.1.2. Leakage Current Hot Check

1. Plug the AC cord directly into the AC outlet. Do not use an isolation transformer for this check.
2. Connect a $1.5k\Omega$, 10 watts resistor, in parallel with a $0.15\mu F$ capacitors, between each exposed metallic part on the set and a good earth ground such as a water pipe, as shown in Figure 1.
3. Use an AC voltmeter, with 1000 ohms/volt or more sensitivity, to measure the potential across the resistor.
4. Check each exposed metallic part, and measure the voltage at each point.
5. Reverse the AC plug in the AC outlet and repeat each of the above measurements.
6. The potential at any point should not exceed 0.75 volts RMS. A leakage current tester (Simpson Model 229 or equivalent) may be used to make the hot checks, leakage current must not exceed 1/2 milliamp. In case a measurement is outside of the limits specified, there is a possibility of a shock hazard, and the equipment should be be repaired and rechecked before it is returned to the customer.

Figure. 1

1.2. Before Repair and Adjustment

Caution : DO NOT SHORT-CIRCUIT DIRECTLY (with a screwdriver blade, for instance), as this may destroy solid state devices. After repairs are completed, restore power gradually using a variac, to avoid overcurrent.

- Current consumption at AC 220-240V, at 50Hz in NO SIGNAL mode (at volume min in FM Tuner mode) should be ~150 mA.

1.3. Protection Circuitry

The protection circuitry may have operated if either of the following conditions are noticed:

- No sound is heard when the power is turned on.
- Sound stops during a performance.

The function of this circuitry is to prevent circuitry damage if, for example, the positive and negative speaker connection wires are "shorted", or if speaker systems with an impedance less than the indicated rated impedance of the amplifier are used.

If this occurs, follow the procedure outlines below:

1. Turn off the power.
2. Determine the cause of the problem and correct it.
3. Turn on the power once again after one minute.

Note:

When the protection circuitry functions, the unit will not operate unless the power is first turned off and then on again.

1.4. Safety Part Information

Safety Parts List:

There are special components used in this equipment which are important for safety.

These parts are marked by Δ in the Schematic Diagrams, Exploded View & Replacement Parts List. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire or other hazards. Do not modify the original design without permission of manufacturer.

2 Warning

2.1. Prevention of Electro Static Discharge (ESD) to Electrostatically Sensitive (ES) Devices

Some semiconductor (solid state) devices can be damaged easily by static electricity. Such components commonly are called Electrostatically Sensitive (ES) Devices. Examples of typical ES devices are integrated circuits and some field-effect transistors and semiconductor “chip” components. The following techniques should be used to help reduce the incidence of component damage caused by electrostatic discharge (ESD).

1. Immediately before handling any semiconductor component or semiconductor-equipped assembly, drain off any ESD on your body by touching a known earth ground. Alternatively, obtain and wear a commercially available discharging ESD wrist strap, which should be removed for potential shock reasons prior to applying power to the unit under test.
2. After removing an electrical assembly equipped with ES devices, place the assembly on a conductive surface such as aluminium foil, to prevent electrostatic charge build up or exposure of the assembly.
3. Use only a grounded-tip soldering iron to solder or unsolder ES devices.
4. Use only an anti-static solder remover device. Some solder removal devices not classified as “anti-static (ESD protected)” can generate electrical charge sufficient to damage ES devices.
5. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ES devices.
6. Do not remove a replacement ES device from its protective package until immediately before you are ready to install it. (Most replacement ES devices are packaged with leads electrically shorted together by conductive foam, aluminium foil or comparable conductive material).
7. Immediately before removing the protective material from the leads of a replacement ES device, touch the protective material to the chassis or circuit assembly into which the device will be installed.

Caution :

Be sure no power is applied to the chassis or circuit, and observe all other safety precautions.

8. Minimize bodily motions when handling unpackaged replacement ES devices. (Otherwise harmless motion such as the brushing together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity (ESD) sufficient to damage an ES device).

2.2. Precaution of Laser Diode

CAUTION!

THIS PRODUCT UTILIZES A LASER.

USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

Caution:

This product utilizes a laser diode with the unit turned "on", invisible laser radiation is emitted from the pickup lens.

Wavelength: 785 nm (CD)

Maximum output radiation power from pickup: 100 μ W/VDE

Laser radiation from the pickup unit is safety level, but be sure the followings:

1. Do not disassemble the pickup unit, since radiation from exposed laser diode is dangerous.
2. Do not adjust the variable resistor on the pickup unit. It was already adjusted.
3. Do not look at the focus lens using optical instruments.
4. Recommend not to look at pickup lens for a long time.

ACHTUNG :

Dieses Produkt enthält eine Laserdiode. Im eingeschalteten Zustand wird unsichtbare Laserstrahlung von der Lasereinheit abgestrahlt.

Wellenlänge : 785 nm (CD)

Maximale Strahlungsleistung der Lasereinheit :100 μ W/VDE

Die Strahlung an der Lasereinheit ist ungefährlich, wenn folgende Punkte beachtet werden:

1. Die Lasereinheit nicht zerlegen, da die Strahlung an der freigelegten Laserdiode gefährlich ist.
2. Den werkseitig justierten Einstellregler der Lasereinheit nicht verstellen.
3. Nicht mit optischen Instrumenten in die Fokussierlinse blicken.
4. Nicht über längere Zeit in die Fokussierlinse blicken.

CAUTION	- CLASS 1B INVISIBLE LASER RADIATION WHEN OPEN. DO NOT VIEW DIRECTLY WITH OPTICAL INSTRUMENTS. (CLASS 1B) Class 1B
WARNING	- CLASS 1B INVISIBLE LASER RADIATION WHEN OPEN. DO NOT VIEW DIRECTLY WITH OPTICAL INSTRUMENTS. (CLASS 1B) Class 1B
FORSIGTIG	- INSYNLIQ LASERSTRÄHLUNG KLASSE 1B, NÄR LÄSSET ER ÅBENT. UNDÖLLÄT BE LÖSE PÅ MET OPTISKE INSTRUMENTER.
VARO!	- AVYTTÄSSÄ OLET ALTIIN LUKKAN 1B NÄNNÄYNNÖNÄ LASERSTRÄLÄÄ. ÄLÄ KATSO OPTISELLÄ LÄITTEELLÄ SUORAAVÄÄTÄSEEN.
VORSICHT	- UNDSICHTBARE LASERSTRÄHLUNG KLASSE 1B, WENN ABDECKUNG GEÖFFNET. NICHT DIREKT MIT OPTISCHEN INSTRUMENTEN BETRACHTEN.
ATTENTION	- RAYONNEMENT LASER INVISIBLE, CLASSE 1B, EN CAS D'OUVERTURE. NE PAS REGARDER DIRECTEMENT À L'ŒIL D'INSTRUMENTS D'OPTIQUE.
注意	- ここを開くと不可視レーザー光が出ます。 ピームを見たり、覗いたりしないでください。
注意	- 打开時不可見激光輻射。避免光束直射。

Inside of product

CD Mechanism Unit (DLS6C)

2.3. Service caution based on Legal restrictions

2.3.1. General description about Lead Free Solder (PbF)

The lead free solder has been used in the mounting process of all electrical components on the printed circuit boards used for this equipment in considering the globally environmental conservation.

The normal solder is the alloy of tin (Sn) and lead (Pb). On the other hand, the lead free solder is the alloy mainly consists of tin (Sn), silver (Ag) and Copper (Cu), and the melting point of the lead free solder is higher approx.30 degrees C (86°F) more than that of the normal solder.

Definition of PCB Lead Free Solder being used

The letter of "PbF" is printed either foil side or components side on the PCB using the lead free solder. (See right figure)

PbF

Service caution for repair work using Lead Free Solder (PbF)

- The lead free solder has to be used when repairing the equipment for which the lead free solder is used.
(Definition: The letter of "PbF" is printed on the PCB using the lead free solder.)
- To put lead free solder, it should be well molten and mixed with the original lead free solder.
- Remove the remaining lead free solder on the PCB cleanly for soldering of the new IC.
- Since the melting point of the lead free solder is higher than that of the normal lead solder, it takes the longer time to melt the lead free solder.
- Use the soldering iron (more than 70W) equipped with the temperature control after setting the temperature at 350±30 degrees C (662±86°F).

Recommended Lead Free Solder (Service Parts Route.)

- The following 3 types of lead free solder are available through the service parts route.
RFKZ03D01K----- (0.3mm 100g Reel)
RFKZ06D01K----- (0.6mm 100g Reel)
RFKZ10D01K----- (1.0mm 100g Reel)

Note

- * Ingredient: Tin (Sn), 96.5%, Silver (Ag) 3.0%, Copper (Cu) 0.5%, Cobalt (Co) / Germanium (Ge) 0.1 to 0.3%

2.4. Handling Precaution for Traverse Unit

The laser diode in the optical pickup unit may break down due to static electricity of clothes or human body. Special care must be taken avoid caution to electrostatic breakdown when servicing and handling the laser diode in the traverse unit.

2.4.1. Cautions to Be Taken in Handling the Optical Pickup Unit

The laser diode in the optical pickup unit may be damaged due to electrostatic discharge generating from clothes or human body. Special care must be taken avoid caution to electrostatic discharge damage when servicing the laser diode.

1. Do not give a considerable shock to the optical pickup unit as it has an extremely high-precise structure.
2. To prevent the laser diode from the electrostatic discharge damage, the flexible cable of the optical pickup unit removed should be short-circuited with a short pin or a clip.
3. The flexible cable may be cut off if an excessive force is applied to it. Use caution when handling the flexible cable.
4. The antistatic FPC is connected to the new optical pickup unit. After replacing the optical pickup unit and connecting the flexible cable, cut off the antistatic FPC.

Figure 1

2.4.2. Grounding for electrostatic breakdown prevention

Some devices such as the CD player use the optical pickup (laser diode) and the optical pickup will be damaged by static electricity in the working environment. Proceed servicing works under the working environment where grounding works is completed.

2.4.2.1. Worktable grounding

1. Put a conductive material (sheet) or iron sheet on the area where the optical pickup is placed, and ground the sheet.

2.4.2.2. Human body grounding

1. Use the anti-static wrist strap to discharge the static electricity form your body (Figure 2).

Figure 2

3 Service Navigation

3.1. Service Information

This service manual contains technical information which will allow service personnel's to understand and service this model. Please place orders using the parts list and not the drawing reference numbers.

If the circuit is changed or modified, this information will be followed by supplement service manual to be filed with original service manual.

- **CD Mechanism Unit :**

1. This model uses CD Mechanism Unit (DLS6C).

- **Micro-processor :**

1. The following components are supplied as an assembled part.
 - Micro-processor IC, IC800 is supplied as assembled part, (RFKWMPM38EG).

4 Specifications

■ Amplifier Section

RMS Output Power Stereo Mode

Front Ch (both channel driven) 20 W per channel (4 Ω),
1 kHz, 10% THD

Phone jack

Terminal Stereo, 3.5 mm

■ Tuner Section

Preset station

FM 30 stations

AM 15 stations

Frequency Modulation (FM)

Frequency range 87.50 MHz to 108.00 MHz
(50 kHz step)

Antenna terminals

75 Ω (unbalanced)

Amplitude Modulation (AM)

Frequency range 522 kHz to 1629 kHz (9 kHz step)

■ CD Section

Disc played [8 cm or 12 cm]

(1) CD-Audio (CD-DA)

(2) CD-R/RW (CD-DA, MP3)

(3) MP3

Pickup

Wavelength 785 nm

Laser power

CLASS 1 (CD)

Audio output (Disc)

Number of channels FL, FR, 2 channel

■ USB Section

Supported audio file format

MP3 (*.mp3)

Maximum port power

500 mA

■ General

Power supply

AC 220 to 240 V, 50 Hz

Power consumption

73 W

Dimensions (W x H x D)

153 mm x 226 mm x 292 mm

Mass

2.5 kg

Operating temperature range

0°C to +40°C

Operating humidity range

35% to 80 % RH (no condensation)

Power consumption in standby mode 0.8 W (approx)

Notes :

1. Specifications are subject to change without notices. Mass and dimensions are approximate.

2. Total harmonic distortion is measured by the digital spectrum analyzer.

5 Location of Controls and Components

5.1. Main Unit Key Button Operations

5.2. Remote Control Key Button Operations

5.3. Media Information

Note

This unit can play MP3 files and CD-DA format audio CD-R/RW that have been finalized.

CD

- This unit can access up to 99 tracks.
- It may not be able to play some CD-R/RW depending on the condition of the recording.
- Do not use irregularly shaped discs.
- Do not use discs with labels and stickers that are coming off or with adhesive exuding from under labels and stickers.
- Do not attach extra labels or stickers on the disc.
- Do not write anything on the disc.

Using DualDisc

The "CD" sides of DualDisc do not meet the CD-DA standard so it may not be possible to play them on this unit.

MP3

Files are treated as tracks and folders are treated as albums.

- This unit can access up to 999 tracks, 255 albums and 20 sessions.
- Files must have the extension: ".MP3" or ".mp3"
- Disc must conform to ISO9660 level 1 or 2 (except for extended formats).
- To play in a certain order, prefix the folder and file names with the 3-digit numbers in the order you want to play them.

USB compatible devices

Devices which are defined as USB mass storage class:

- USB devices that support bulk only transfer.
- USB devices that support USB 2.0 full speed.

USB supported format

Files must have the extension ".mp3" or ".MP3".

Note

- CBI (Control/Bulk/Interrupt) is not supported.
- A device using NTFS file system is not supported [Only FAT12/16/32 (File Allocation Table 12/16/32) file system is supported].
- Depending on the sector size, some files may not work.
- This unit can access up to 255 albums (including blank folders) and 2500 tracks.
- The maximum number of tracks in a folder are 999 tracks.
- Only one memory card will be selected when connecting a multiport USB card reader. Typically the first memory card inserted.
- Do not unplug the USB device during reading or playback.
- Disconnect the USB card reader from the unit when you remove the memory card. Failure to do so may cause malfunction to the device.
- When you connect a compatible digital audio player to the USB port, charging may be activated. It will not charge when the unit is switched to standby mode or iPod mode.

Charging the iPod

- iPod will start recharging regardless of whether this unit is in On or Standby condition.
- "IPOD ✱" will be shown on the main unit's display during iPod charging in main unit standby mode.
- Check iPod to see if the battery is fully recharged.
- If you are not using iPod for an extended period of time after recharging has completed, disconnect it from main unit, as the battery will be depleted naturally. (Once fully recharged, additional recharging will not occur.)
- iPod will not charge when the main unit is in USB mode.

Compatible iPod

Name	Memory size
iPod touch 2nd generation	8 GB, 16 GB, 32 GB
iPod nano 4th generation (video)	8 GB, 16 GB
iPod classic	120 GB
iPod touch 1st generation	8 GB, 16 GB, 32 GB
iPod nano 3rd generation (video)	4 GB, 8 GB
iPod classic	80 GB, 160 GB
iPod nano 2nd generation (aluminum)	2 GB, 4 GB, 8 GB
iPod 5th generation (video)	60 GB, 80 GB
iPod 5th generation (video)	30 GB
iPod nano 1st generation	1 GB, 2 GB, 4 GB
iPod 4th generation (colour display)	40 GB, 60 GB
iPod 4th generation (colour display)	20 GB, 30 GB
iPod 4th generation	40 GB
iPod 4th generation	20 GB
iPod mini	4 GB, 6 GB

- Compatibility depends on the software version of your iPod.

iPod is a trademark of Apple Inc., registered in the U.S. and other countries.

6 Self-diagnostic and special mode setting

This unit is equipped with features of self-diagnostic & special mode setting for checking the functions & reliability.

6.1. Entering into Self-diagnostic Mode

Here is the procedure to enter into self-diagnostic mode:

Step 1 : Switch to CD function

Step 2 : Press the [CD ▶/■] key of the main set for more than 2 seconds. While pressing this key, press the [▶▶/▶▶] key on the main set for another 2 seconds to enter into the Self-diagnostic mode. The FL shall display :-

TEST

To exit the Self-diagnostic mode

Press [⏻/I] button on main unit or remote control.

6.2. Self-diagnostic Function Error Code

Self-diagnostic Function provides information on any problems occurring for the unit and its respective components by displaying error codes. These error codes such as U**, H** and F** are stored in memory and held unless it is cleared.

The error code is automatically displayed after entering into self-diagnostic mode.

6.2.1. CD Mechanism Error Code Table

Error Code	Diagnosis Contents	Description of error	Automatic FL Display	Remarks
H15	CD Open SW Abnormal	During normal operation CD OPEN SW On fail to be detected with 4 sec. Error No. shall be clear by force or during cold start.	H 15	Press [■, -DEMO] on main unit for next error.
F15	CD REST SW Abnormal	CD traverse position initial setting operation failsafe counter (1000 ms) waiting for REST SW to turn on. Error No. shall be clear by force or during cold start.	F 15	Press [■, -DEMO] on main unit for next error.
F26	Communication between CD servo LSI and micro-p abnormal.	CD function DTMS command, after system setting, If SENSE = 'L' cannot be detected. Memory shall contain F26 code. After Power on, CD function shall continue, error display shall be "NODISC". Error No. shall be clear by force or cold start.	F 26	Press [■, -DEMO] on main unit for next error.

6.2.2. Power Supply Error Code Table

Error Code	Diagnosis Contents	Description of error	Automatic FL Display	Remarks
F76	Power Amp IC output abnormal	DCDET1 = L (NG)	F 76	Press [■, -DEMO] on main unit for next error.

6.3. Entering into Doctor Mode

Here is the procedure to enter into doctor mode :

Press [■, -DEMO] button on main unit follow by [4] and [7] on remote control. The FL shall display :-

To exit the Doctor mode

Press [⏻/I] button on main unit or remote control.

6.3.1. Doctor Mode Table 1

Item		FL Display	Key Operation
Mode Name	Description		Front Key
Doctor Mode	To enter into Doctor Mode for checking of various items and displaying EEPROM and firmware version. Note: The micro-processor version as shown is an example. It will be revise when there is an updates. FL Display sequence Display 1 → 2	(Display 1) Version Display (DEC) Check sum (HEX) Checksum : (Condition 1) Version Display (DEC) No Rom correction (a) If there is NO EEPROM header string OR (b) If there is no EEPROM (no data is received by micro-processor) [NO] is displayed. Checksum : (Condition 2) If the version of the EEPROM does not match or not working properly [NG] is display. Checksum : (Condition 3) If the EEPROM version matches, checksum [YYYY] is displayed. (Display 2) The Checksum of EEPROM and firmware version will be display for 2 sec.	In CD mode: Press [■, -DEMO] button on main unit follow by [4] and [7] on remote control. To exit Doctor Mode, press [⏻/I] button on main unit or remote control.

6.3.2. Doctor Mode Table 2

Item		FL Display	Key Operation
Mode Name	Description		Front Key
FL Display Test	To check the FL segments display (All segments will light up)		In Doctor Mode: 1. Press [DIMMER] button on remote control. To cancel, press [0] button on remote control. To exit Doctor Mode, press [⏻] button on main unit or remote control.
Volume Setting check	To check for volume setting during this mode, Bass & treble is set to 0dB & EQ is switch off.		In Doctor Mode: 1. Press [7] button on remote control. To exit Doctor Mode, press [⏻] button on main unit or remote control.
			In Doctor Mode: 2. Press [8] button on remote control. To exit Doctor Mode, press [⏻] button on main unit or remote control.
			In Doctor Mode: 3. Press [9] button on remote control. To exit Doctor Mode, press [⏻] button on main unit or remote control.
CD Loading Test (DLS6C)	To determine the reliability of CD Loading unit. To check for the Open/Close operation for the CD loading unit. It fails when there is abnormality in opening or closing.	 The counter will increment by 1 until reach 99999999 ↓ 	In Doctor Mode: 1. Press [≥10], [1], [1] button on remote control. To cancel, press [0] button on remote control. To exit Doctor Mode, press [⏻] button on main unit or remote control. (Refer to section 6.4.3 for more information)
CD Traverse Test (DLS6C)	To check for the traverse unit operation. In this mode, the first & last track is access & read. (TOC). It fails when TOC is not completed by IOS or the traverse is out of focus.	 The counter will increment by 1 until reach 99999999 ↓ 	In Doctor Mode: 1. Press [≥10], [1], [2] button on remote control. To cancel, press [0] button on remote control. To exit Doctor Mode, press [⏻] button on main unit or remote control. (Refer to section 6.4.4 for more information)
CD Combination Test (DLS6C)	A combination of CD loading & traverse unit test.	 The counter will increment by 1 until reach 99999999 ↓ 	In Doctor Mode: 1. Press [≥10], [1], [3] button on remote control. To cancel, press [0] button on remote control. To exit Doctor Mode, press [⏻] button on main unit or remote control. (Refer to section 6.4.5 for more information)
Cold Start	To activate cold start upon next AC power up. It will set to factory shipment condition.		In Doctor Mode: 1. Press [SLEEP] button on remote control. To exit Doctor Mode, press [⏻] button on main unit or remote control.

Item		FL Display	Key Operation
Mode Name	Description		Front Key
USB Test Mode	To check for USB operation.	 The display will appear after 3s,	In Doctor Mode: 1. Select to USB mode. 2. Press [2] button on remote control. To exit Doctor Mode, press [⏏/I] button on main unit or remote control.

6.3.3. DLS6 Loading Test

6.3.4. DLS6 Traverse Test

6.3.5. DLS6 Combination Test

7 Troubleshooting Guide

Symptom	Checking items	Repair Items	Remark
No display after power-up	• Check AC supply to unit. • Check fuse, F5901. • Check +3.3V supply to micro-processor, IC800 (Pin 17,89) • Check +Vref to micro-processor, IC800 (Pin 100) • Check -VP supply to FL display and VDD/-VP supply to FL Driver IC (Pin 43/30) • Check oscillator circuit at X801/X802	Change defective parts if found any abnormality: • F5901 • L801 • IC800 • L800 • IC800 • FL900 • IC900 • L900/D901 • X801/X802	Main / Transformer P.C.B
No CD operation	• Check +3.3V supply to Servo-Processor IC • Check Pin 56, 59 of Servo-Processor IC for output • Check +7.5V supply to IC7002 • Check Traverse & spindle motor operation. • Check output for traverse/spindle at Pin 21,23 of IC7001 • Check Pin 80, 81 of IC7001 for the oscillator clock circuit (X7201)	Change defective parts if found any abnormality: • IC7001 • IC7002 • Traverse assembly • X7201	CD Servo P.C.B
No audio sound output.	• Check speaker connection to main unit. • Check solderability at speaker jack, JK5101. • Check output of Power IC, IC5101 (Pin 2,4,10,12) • Check supply VCC to IC5101 • Check FP5901 for open circuit. • Check output of ASP IC, IC200 (Pin 17,22) • Check supply voltage +9V to ASPC IC, IC200 • Check pin 64 of IC800 (ASP_CLK) • Check pin 9 of Power IC (Muting always 'ON') • Check pin 90 of IC800 (Muting always 'ON')	Change defective parts if found any abnormality: • IC5101 • FP5901 • IC200 • IC800 • JK5101	Main / Power P.C.B
No headphone output	• Check solderability of JK950 • Check connection between Main P.C.B & Headphone P.C.B • Check Q761 & Q762 (Muting always 'ON') • Check Pin 5 of IC800 (Muting always 'ON') • Check Pin 1,7 of IC700 • Check output of ASP IC, IC200 (Pin 17,22) • Check supply voltage +9V to ASPC IC, IC200	Change defective parts if found any abnormality: • JK950 • L950,L952 • Q761 • IC700 • IC200	Main / Headphone P.C.B

8 Service Fixture & Tools

Prepare service tools before process service position.

Service Tools		Remarks
Main P.C.B. (CN901) - Panel P.C.B. (CN900)	REEX1022 (11P FFC)	

9 Disassembly and Assembly Instructions

Caution Note:

- This section describes the disassembly and/or assembly procedures for all major printed circuit boards & main components for the unit. (You may refer to the section of "Main components and P.C.B Locations" as described in the service manual)
- Before carrying out the disassembly process, please ensure all the safety precautions & procedures are followed.
- During the disassembly and/or assembly process, please handle with care as there may be chassis components with sharp edges.
- Avoid touching heatsinks due to its high temperature after prolong use. (See caution as described below)

**CAUTION: HOT!!
PLEASE DO NOT
TOUCH THE HEAT SINK**

- During disassembly and assembly, please ensure proper service tools, equipments or jigs is being used.
- During replacement of component parts, please refer to the section of "Replacement Parts List" as described in the service manual.
- Select items from the following indexes when disassembly or replacement are required.
- Disassembly of Top Cabinet Assembly
- Disassembly of Headphone P.C.B.
- Disassembly of iPod P.C.B.
- Disassembly of iPod Lid
- Disassembly of Front Panel Assembly
- Disassembly of USB P.C.B.
- Disassembly of Panel P.C.B.
- Disassembly of FL Window
- Disassembly of Centre Ornament
- Disassembly of CD Lid
- Disassembly of CD Mechanism Unit (DLS6C)
- Disassembly of Power P.C.B.
- Replacement of Power Amp IC (IC5101)
- Disassembly of Main P.C.B.
- Disassembly of Fan Unit
- Disassembly of Transformer P.C.B.
- Replacement of Transistor (Q5901)
- Disassembly of CD Servo P.C.B.

CAUTION NOTE:

Please use original screw and at correct locations.

Below shown is part no. of different screw types used:

- | | |
|------------------------|----------------------|
| a : XTB3+10JFJ | e : VHD1224-1 |
| b : XTW3+10SFJK | f : RHDC0023 |
| c : RHD26046-L | |
| d : RHDX03001 | |

9.1. Disassembly flow chart

The following chart is the procedure for disassembling the casing and inside parts for internal inspection when carrying out the servicing.

To assemble the unit, reverse the steps shown in the chart below.

9.2. Main Parts Location Diagram

9.3. Disassembly of Top Cabinet Assembly

Step 1 : Remove 3 screws.

Step 2 : Remove 3 screws.

Step 3 : Remove 3 screws.

Step 4 : Lift up the Top Cabinet Assembly and remove it.
Caution : During assembling, ensure the Top Cabinet Assembly is seated properly.

Step 5 : Upset the Top Cabinet Assembly as arrow shown.
Step 6 : Place a support block underneath the Top Cabinet Assembly.

Step 7 : Detach 5P cable at connector (CN902) on Main P.C.B..
Step 8 : Detach 14P FFC at connector (CN350) on Main P.C.B..
Step 9 : Remove Top Cabinet Assembly.

9.4. Disassembly of Headphone P.C.B.

• Refer to "Disassembly of Top Cabinet Assembly".

Step 1 : Remove 2 screws.

Step 2 : Release guide and remove Headphone P.C.B..

9.5. Disassembly of iPod P.C.B.

- Refer to "Disassembly of Top Cabinet Assembly".

Step 1 : Remove 2 screws.

Step 2 : Remove iPod P.C.B..

Caution : During assembling, ensure the iPod P.C.B. is seated properly.

9.6. Disassembly of iPod Lid

- Refer to "Disassembly of iPod P.C.B."

Step 1 : Remove 1 screw.

Step 2 : Using minus screwdriver slightly to release the iPod cover lid from the catch.

Caution : Do not exert strong force to the iPod cover lid during removal.

Step 3 : Slightly lift up the iPod cover lid as arrow shown.

Step 4 : Remove the iPod cover lid as arrow shown.

Caution 1 : During assembling, ensure the iPod cover lid is properly seated on the locators and slot into the hole of the top cabinet.

Caution 2 : During assembling, ensure the iPod cover lid is properly catch to the top cabinet and a “click” sound will be heard when fully caught.

Step 5 : Open the iPod lid by pressing as arrow shown.

Step 6 : Release the spring from the shaft of the top cabinet.

Step 7 : Release the spring from the shaft of the iPod lid.

Step 8 : Remove the spring as arrow shown.

Caution : Keep the spring in a safe place and place it back during assembling.

Step 9 : Using minus screwdriver to release the shaft (A) of the iPod lid.

Caution : Do not exert strong force to the iPod lid during removal.

Step 10 : Lift up one side of the iPod lid.

Step 12 : Lift up the iPod lid as arrow shown.

Step 11 : Using minus screwdriver to release the shaft (B).
Caution : Do not exert strong force to the iPod lid during removal.

Step 13 : Remove the iPod lid as arrow shown.

9.7. Disassembly of Front Panel Assembly

- Refer to “Disassembly of Top Cabinet Assembly”.

Step 1 : Detach 4P cable at connector (CN5902) on Transformer P.C.B..

Step 2 : Detach 11P FFC at connector (CN901) on Main P.C.B..

Step 3 : Detach 22P FFC at connector (CN380) on Main P.C.B..

Step 4 : Release both locators.

Step 5 : Release 3 catches from the bottom.

Step 6 : Detach the Front Panel Assembly.

Caution : Do not attempt to exert strong force when detaching the front panel assembly.

9.8. Disassembly of USB P.C.B.

- Refer to "Disassembly of Top Cabinet Assembly".
- Refer to "Disassembly of Front Panel Assembly".

Step 1 : Remove 2 screws.

Caution : During assembling, ensure that the USB P.C.B. is firmly caught and properly seated on the guides and locators.

Step 2 : Release both catches as arrows shown.

Step 3 : Detach the USB P.C.B as arrow shown to release from both guides.

9.9. Disassembly of Panel P.C.B.

- Refer to “Disassembly of Top Cabinet Assembly”.
- Refer to “Disassembly of Front Panel Assembly”.
- Refer to (Step 1) of Item 9.8.

Step 1 : Remove Volume Knob.

Step 2 : Remove 4 screws.

Step 3 : Release catch

Step 4 : Slightly lift up the Panel P.C.B..

Step 5 : Slot out and remove the Panel P.C.B. as arrow shown.

Caution 1 : During assembling, ensure the Panel P.C.B. are slot under the top guides. A 'click' sound will be heard when fully caught.

Caution 2 : During assembling, ensure Panel P.C.B. seated properly on the 4 locators.

9.10. Disassembly of FL Window

- Refer to "Disassembly of Top Cabinet Assembly".
- Refer to "Disassembly of Front Panel Assembly".
- Refer to (Step 1) of Item 9.8.
- Refer to "Disassembly of Panel P.C.B.".

Step 1 : Release catches by pushing the edge of the catches as arrows shown.

Caution : Do not apply strong force during the release of catches to avoid damage to the Front Panel Assembly & FL Window.

Step 2 : Remove FL Window.

9.11. Disassembly of Centre Ornament

- Refer to “Disassembly of Top Cabinet Assembly”.
- Refer to “Disassembly of Front Panel Assembly”.
- Refer to (Step 1) of Item 9.8.
- Refer to “Disassembly of Panel P.C.B.”.
- Refer to “Disassembly of FL Window”.

Step 1 : Release 4 catches as arrows shown.

Caution : During assembling, ensure that centre ornament are properly caught to the Front Panel Assembly.

Step 2 : Remove Centre Ornament.

9.12. Disassembly of CD Lid

- Refer to “Disassembly of Front Panel Assembly”

Step 1 : Lift the spring out of the hook.

Caution : Keep the spring in a safe place and place it back during assembling.

Step 2 : Move the shaft (L) of the CD Lid in the direction of arrow shown.

Step 4 : Remove the CD Lid in the direction of arrow shown.

Step 3 : Move the shaft (R) of the CD Lid in the direction of arrow shown.

Caution : Do not exert strong force to the shafts during removal and assembly of the CD Lid.

9.13. Disassembly of CD Mechanism Unit (DLS6C)

- Refer to "Disassembly of Top Cabinet Assembly".
- Refer to "Disassembly of Front Panel Assembly".

Step 1 : Detach 22P FFC at connector (CN370) on Main P.C.B..

Step 2 : Release 22P FFC at connector (CN370) from the hook.

Caution : During assembling, ensure the 22P FFC properly dressed into the hook of Main P.C.B..

Step 3 : Remove 2 screws.

Step 4 : Slightly tilt and remove the CD Mechanism Unit (DLS6C) as arrow shown.

9.14. Disassembly of Power P.C.B.

- Refer to "Disassembly of Top Cabinet Assembly".
- Refer to "Disassembly of Front Panel Assembly".

Step 1 : Remove 1 screw.

Step 2 : Detach 4P cable at connector (CN5101) on Power P.C.B..

Step 3 : Detach 6P cable at connector (CN200) on Main P.C.B..

Step 4 : Remove 2 screws.

Step 5 : Remove Power P.C.B. as arrow shown.

Caution 2 : Ensure the 4P wire is properly dressed into the hook of Power P.C.B. and prevent touching the heatsink unit.

Caution 1 : Ensure the heatsink supports are seat properly.

9.15. Replacement of Power Amp IC (IC5101)

- Refer to “Disassembly of Power P.C.B.”

Caution : Handle the heatsink unit P.C.B. with caution due to its high temperature after prolonged use. Touching it may lead to injuries.

Step 1 : Desolder pins of Power Amp IC (IC5101).

Step 3 : Remove Power Amp IC (IC5101).

Step 2 : Remove 2 screws.

• **Assembly of Power Amp IC (IC5101)**

Step 1 : Apply grease to the heatsink unit.

Step 2 : Install Power Amp IC onto Power P.C.B..

Caution : Ensure the pins are inserted & seated properly on the Power P.C.B..

Step 3 : Fix the Power Amp IC (IC5101) onto the heatsink unit with 2 screws.

Step 4 : Solder pins of the Power Amp IC (IC5101) on the solder side of Power P.C.B..

Caution : Check for solderability of the Power Amp IC.

9.16. Disassembly of Main P.C.B.

- Refer to “Disassembly of Top Cabinet Assembly”.
- Refer to “Disassembly of Front Panel Assembly”.
- Refer to “Disassembly of Power P.C.B.”.

Step 1 : Detach 2P cable at connector (CN100) on Main P.C.B..

Step 2 : Detach 22P FFC at connector (CN370) on Main P.C.B..

Step 3 : Release 22P FFC at connector (CN370) from the hook.

Caution : During assembling, ensure the 22P FFC properly dressed into the hook of Main P.C.B..

Step 4 : Detach 7P cable at connector (CN5903) on Transformer P.C.B..

Step 5 : Remove 1 screw.

Step 6 : Use a paper clip to release the catch.

Caution : Ensure the Main P.C.B. fix onto the catches.

Step 7 : Remove Main P.C.B..

9.17. Disassembly of Fan Unit

- Refer to “Disassembly of Top Cabinet Assembly”.
- Refer to “Disassembly of Front Panel Assembly”.
- Refer to “Disassembly of Power P.C.B.”.

Step 1 : Remove 2 screws.

Step 2 : Detach 2P cable at connector (CN100) on Main P.C.B..

Step 3 : Release 2 catches.

Step 4 : Remove 2P cable from the holder.

Step 5 : Remove Fan Unit.

Caution : Ensure the Fan Unit is seated properly onto the rear panel assembly.

Caution : Ensure the 2P wire inserted into the Holder.

9.18. Disassembly of Transformer P.C.B.

- Refer to "Disassembly of Top Cabinet Assembly".
- Refer to "Disassembly of Front Panel Assembly".

Step 1 : Detach 4P cable at connector (CN5101) on Power P.C.B..

Step 2 : Detach 7P cable at connector (CN5903) on Transformer P.C.B..

Step 3 : Remove 1 screw.

Step 4 : Place a support block to tilt the unit as shown.

Step 5 : Remove 4 screws.

Step 6 : Remove Transformer P.C.B..

Caution : Keep Transformer cover P.C.B. in safe place for assembling use.

Step 7 : Remove Transformer cover P.C.B. and Trans spacers.
Caution : Keep them in safe place for assembling use.

9.19. Replacement of Transistor (Q5901)

- Refer to "Disassembly of Transformer P.C.B."

Caution : Handle the heatsink unit and P.C.B. with caution due to its high temperature after prolonged use. Touching it may lead to injuries .

Step 1 : Desolder pins of Transistor (Q5901).

Step 2 : Remove 1 screw.

Step 3 : Remove Transistor (Q5901).

• **Assembly of Transistor (Q5901)**

Step 1 : Apply grease to the heatsink unit.

Step 2 : Install Transistor (Q5901) onto Transformer P.C.B..

Caution : Ensure the pins are inserted & seated properly on Transformer P.C.B..

Step 3 : Fix the Transistor (Q5901) onto the heatsink unit with 1 screw.

Step 4 : Solder pin of the Transistor (Q5901) on the solder side of Main P.C.B..

Caution : Check for solderability of the Transistor (Q5901).

9.20. Disassembly of CD Servo P.C.B.

- Refer to "Disassembly of CD Mechanism Unit (DLS6C)."

Step 1 : Remove 3 screws.

Step 2 : Unsolder 4 points.

Step 3 : Move up the CD Servo P.C.B.

Step 4 : Flip the CD Servo P.C.B.

Step 5 : Detach 16P FPC at the connector (CN7001) on CD Servo P.C.B.

10 Disassembly and Assembly of Traverse Unit

10.1. Disassembling Procedures

Step 1 : Release the guide.

Step 2 : Push the traverse slide plate (rib), ensure both grooves are opened.

Step 3 : Slide out the traverse unit as arrow shown.

Caution : Ensure the OPU is face upwards, avoid touching the surface of the traverse unit.

10.2. Assembling Procedure

Caution : Removal of the short pin is necessary for replacement of new traverse unit.

Step 1 : Release the guide.

Step 2 : Push the traverse slide plate (rib), ensure both grooves are opened.

Step 3 : Slot the traverse unit at approximately 45° into the mecha chassis as arrow shown.

Caution : Ensure the bosses fix exactly onto the guides.

Step 4 : Release the guide.

Step 5 : Push the traverse slide plate (rib) to lock the traverse unit in.

11 Service Position

Note: For description of the disassembly procedures, see the Section 9

11.1. Checking & Repairing USB P.C.B.

Step 1 : Remove Top Cabinet Assembly.

Step 2 : Detach 11P FFC at connector (CN901) on Main P.C.B..

Step 3 : Release both locators.

Step 4 : Release 3 catches.

Step 5 : Slightly detach Front Panel Assembly.

Step 6 : Remove 2 screws and remove USB Assembly.

Step 7 : Place a support block underneath the Top Cabinet Assembly.

Step 8 : Connect 14P FFC at connector (CN350) on Main P.C.B..

Step 9 : Connect 5P cable at connector (CN902) on Main P.C.B..

Step 11 : Place a support block underneath the USB P.C.B..

Step 12 : Check & repair USB P.C.B. according to the diagram shown.

Step 10 : Connect 11P FFC at connector (CN901) on Main P.C.B..

11.2. Checking & Repairing Panel P.C.B.

Step 1 : Remove Top Cabinet Assembly.

Step 2 : Remove Front Panel Assembly.

Step 3 : Remove USB P.C.B..

Step 4 : Remove Panel P.C.B..

Step 5 : Place a support block underneath the Top Cabinet Assembly.

Step 6 : Connect 14P FFC at connector (CN350) on Main P.C.B..

Step 7 : Connect 5P cable at connector (CN902) on Main P.C.B..

Step 8 : Lay an insulating material on Panel P.C.B..

Step 9 : Attach extension cable REEX1022 (11P FFC from CN901 on Main P.C.B. to CN900 on Panel P.C.B.).

Step 10 : Connect 4P cable at connector (CN5902) on Transformer P.C.B..

Step 11 : Connect 22P FFC at connector (CN380) on Main P.C.B..

Step 12 : Check & repair Panel P.C.B. according to the diagram shown.

11.3. Checking & Repairing CD Servo P.C.B.

Note : Insert CD before Checking CD Servo P.C.B.

Step 1 : Remove Top Cabinet Assembly.

Step 2 : Remove Front Panel Assembly.

Step 3 : Remove CD Mechanism Unit (DLS6C).

Step 4 : Place a support block underneath the Top Cabinet Assembly.

Step 5 : Connect 14P FFC at connector (CN350) on Main P.C.B..

Step 6 : Connect 5P cable at connector (CN902) on Main P.C.B..

Step 7 : Connect 11P FFC at connector (CN901) on Main P.C.B..

Step 8 : Connect 22P FFC at connector (CN380) on Main P.C.B..

Step 9 : Connect 22P FFC at connector (CN370) on Main P.C.B..

Step 10 : Upset CD Mechanism Unit (DLS6C).

Step 11 : Check & repair CD Servo P.C.B. according to the diagram shown.

11.4. Checking & Repairing Power P.C.B.

Step 1 : Remove Top Cabinet Assembly.

Step 2 : Remove Front Panel Assembly.

Step 3 : Remove 1 screw.

Step 4 : Remove 2 screws.

Step 5 : Detach Power P.C.B..

Step 6 : Flip over Power P.C.B. as arrow shown.

Step 7 : Put insulating material under Power P.C.B..

Step 8 : Place a support block underneath the Top Cabinet Assembly.

Step 9 : Connect 14P FFC at connector (CN350) on Main P.C.B..

Step 10 : Connect 5P cable at connector (CN902) on Main P.C.B..

Step 11 : Connect 11P FFC at connector (CN901) on Main P.C.B..

Step 12 : Connect 22P FFC at connector (CN380) on USB P.C.B..

Step 13 : Connect 4P cable at connector (CN5902) on Transformer P.C.B..

Step 14 : Check & repair Power P.C.B. according to the diagram shown.

11.5. Checking & Repairing Transformer P.C.B.

Step 1 : Remove Top Cabinet Assembly.

Step 2 : Remove Front Panel Assembly.

Step 3 : Remove USB P.C.B..

Step 4 : Remove Panel P.C.B..

Step 5 : Remove Power P.C.B..

Step 6 : Remove Main P.C.B..

Step 7 : Remove Transformer P.C.B..

Step 8 : Remove CD Mechanism Unit (DLS6C).

Step 9 : Remove Fan Unit.

Step 10 : Place a support block as diagram shown.

Step 11 : Connect 6P cable at connector (CN200) on Main P.C.B..

Step 12 : Connect 22P cable at connector (CN380) on Main P.C.B..

Step 13 : Connect 22P cable at connector (CN370) on Main P.C.B..

Step 14 : Connect 4P cable at connector (CN5101) on Power P.C.B..

Step 15 : Connect 7P cable at connector (CN5903) on Transformer P.C.B..

Step 16 : Place on insulating material under Panel P.C.B..

Step 17 : Connect 4P cable at connector (CN5902) on Transformer P.C.B..

Step 18 : Attach extension cable REEX1022 (11P FFC from CN901 on Main P.C.B. to CN900 on Panel P.C.B.).

Step 19 : Connect 2P cable (Fan Unit) at connector (CN100) on Main P.C.B..

Step 20 : Check & repair Transformer P.C.B. according to the diagram shown.

11.6. Checking & Repairing Main P.C.B.

- Refer to (Step 1 - Step 19) of item 11.5

Step 1 : Flip over Fan Unit.

Step 2 : Check & repair Main P.C.B. according to the diagram shown.

12 Voltage Measurement & Waveform Chart

Note:

- Indicated voltage values are the standard values for the unit measured by the DC electronic circuit tester (high-impedance) with the chassis taken as standard.
Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester.
- Circuit voltage and waveform described herein shall be regarded as reference information when probing defect point because it may differ from actual measuring value due to difference of Measuring instrument and its measuring condition and product itself.

17 Schematic Diagram Notes

(All schematic diagrams may be modified at any time with the development of new technology)

Notes:

S900:	STOP/-DEMO switch (■ / -DEMO).
S901:	CD PLAY/PAUSE switch (CD ►/).
S902:	USB PLAY/PAUSE switch (USB ►/).
S903:	FM/AM switch.
S904:	iPod PLAY/PAUSE switch (iPod ►/).
S906:	OPEN/CLOSE switch (OPEN/CLOSE ▲).
S907:	POWER switch (⏻/⏻).
S908:	REW switch (◀◀/◀◀).
S909:	FWD switch (▶▶/▶▶).
S910:	BASS/TREBLE switch.
S911:	D.BASS switch.
S7201:	REST switch.
S7202:	CD OPEN switch.
VR900:	Volume jog.

- “ * ” REF IS FOR INDICATION ONLY.

• Importance safety notice :

Components identified by (▲) mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

- Capacitor values are in microfarad(μ F) unless specified otherwise, F=Farad, pF=Pico-Farad
Resistance values are in ohm(Ω), unless specified otherwise, 1K=1,000 Ω , 1M=1,000K Ω

• Voltage and Signal lines:

	: +B Signal Line
	: -B Signal Line
	: CD Audio Input Signal Line
	: iPod Audio Input Signal Line
	: Audio Output Signal Line
	: AM/FM Signal Line
	: USB Signal Line

CAUTION: FOR CONTINUED PROTECTION AGAINST FIRE HAZARD, REPLACE ONLY WITH SAME TYPE F5901 T1AL, 250V FUSE

RISK OF FIRE-REPLACE FUSE AS MARKED.

FUSE CAUTION

These symbols located near the fuse indicates that the fuse used is a fast operating type. For continued protection against fire hazard, replace with the same type fuse. For fuse rating, refer to the marking adjacent to the symbol.

20.2. IC7002 (BA5948FPE2) IC 4CH Drive

Pin No.	Mark	I/O	Function
1	IN2	I	Motor Driver Input
2	PC2	I	Turntable Motor Drive Signal (L:ON)
3	IN1	I	Motor Drive (1) Input
4	PC1	-	Traverse Motor Drive Signal (L): ON)
5-8	N.C.	-	No Connection
9	PGND1	-	Ground Connection (1) for Drive
10	PVCC1	-	Power Supply (1) for Drive
11	D1-	O	Motor Drive (1) reverse - action output
12	D1+	O	Motor Drive (1) forward - action output
13	D2-	O	Motor Drive (2) reverse - action output

Pin No.	Mark	I/O	Function
14	D2+	O	Motor Drive (2) forward - action output
15	D3-	O	Motor Drive (3) reverse - action output
16	D3+	O	Motor Drive (3) forward - action output
17	D4-	O	Motor Drive (4) reverse - action output
18	D4+	O	Motor Drive (4) forward - action output
19	PVCC2	-	Power Supply (2) for Driver
20	PGND2	-	Ground Connection (2) for Driver
21-24	N.C.	-	No Connection
25	VCC	I	Power Supply terminal
26	VREF	I	Reference Voltage Input
27	IN4	I	Motor Driver (4) Input
28	IN3	I	Motor Driver (3) Input

20.3. IC800 (RFKWMPM38EG) IC MICRO-PROCESSOR

Pin No.	Mark	I/O	Function
1	PCONT1	O	"Power Control Output 1(Pwr Sply, Active HIGH)"
2	PCONT2	O	Power Control Output 2
3	FL_CS	O	Chip Select for FL Panel
4	FL_DATA / OCD_SDA	O	FL Data Output / On Chip Debugger Data
5	MUTE_HP	O	Analog MUTE Output (L : MUTE ON)
6	FL_CLK / OCD_SCL	O	FL CLK Output / On Chip Debugger Clock
7	HP_SW	I	Headphone detect switch input
8	N.C.	-	No Connection
9	N.C.	-	No Connection
10	TAPE_EJECT	-	Tape Eject sw input (L : sw on)
11	MMOD	I	Memory mode selection
12	OSC2 (8MHz)	O	Main Oscillator output (8MHz)
13	OSC1 (8MHz)	I	Main Oscillator input (8MHz)
14	VSS	-	Micom GND
15	XI (32kHz)	I	Slow Oscillator input (32KHz)
16	XO (32KHz)	O	Slow Oscillator output (32KHz)
17	3.3V	-	Voltage supply 3.3V
18	VDD1.8	-	Connect to pin 37
19	NRST	I	MICOM RESET PIN (L: reset)
20	USB_IRQ	I	USB Interrupt Request
21	MMOD0	O	Switching Mode
22	TERR	I	Time out error
23	VERR	O	Verify error
24	USB_RST	O	USB Reset Pin
25	RMT	I	Remote Control Input
26	HALT	I	AC Failure Detect Signal
27	DAB_DDOWFIC	-	No Connection
28	N.C.	-	No Connection
29	BLKCK	I	CD Subcode Block Clock Input
30	VSS	-	Micom GND
31	CD_MDATA	O	CD LSI Command Data
32	STAT	I	CD LSI Status Input
33	CD_MCLK	O	CD LSI Command Clock
34	USB_SDA	I/O	USB I2C Data Line
35	CD_MLD	O	CD LSI Command Load
36	USB_SCL	I	USB I2C Clock Line
37	1.8V	-	Power Supply (1.8V)
38	N.C.	-	No Connection

Pin No.	Mark	I/O	Function
39	VSS	-	Micom GND
40	CLOSE_L	O	CD Tray Close Control (Active L)
41	CLOSE_H	O	CD Tray Open Control (Active H)
42	CD_OPEN_SW	I	CD Open SW (H : Open; L : Close)
43	REST_SW	I	REST SW (L : Inner)
44	N.C.	-	No Connection
45	CD_RST	O	CD LSI Reset Output (L: reset)
46	N.C.	-	No Connection
47	DEMO_SETTING	I	Demo Mode Setting Input
48	MODEL_SELECT	-	No Connection
49	TU_STEREO	I/O	Tuner Stereo Signal
50	TU_SDA	O	IIC Serial Data for Tuner (PLL Data I/O)
51	TU_CLK	O	IIC Serial Clock for Tuner (PLL Clock Output)
52	TU_TUNED	I/O	Tuner Tuned Signal
53	N.C.	-	No Connection
54	N.C.	-	No Connection
55	N.C.	-	No Connection
56	iPod_PCONT	O	iPod regulator control
57	iPod_PDET	I	iPod regulator detection
58	iPod_Acc3.3	I	iPod Signal ready detection
59	iPod_DET	I	iPod detection (Output L if no iPod)
60	N.C.	-	No Connection
61	N.C.	-	No Connection
62	CRTIMER	I/O	CR TIMER
63	VSS	-	Micom GND
64	ASP_CLK	I/O	ASP Sound Processor Serial Clock Output
65	ASP_DATA	I/O	ASP Sound Processor Serial Data Output
66	N.C.	-	No Connection
67	DAB_RST	-	No Connection
68	DAB_TU_RST	-	No Connection
69	DAB_TU_SCL	-	No Connection
70	DAB_TU_SDA	-	No Connection
71	DAB_PCONT	-	No Connection
72	DAB_RX	-	No Connection
73	RDS_DATA	I	RDS Data Input
74	RDS_CLK	I	RDS Clock Input
75	DAB_MODE	-	No Connection
76	UART_IN	O	Serial UART Communication

Pin No.	Mark	I/O	Function
77	UART_OUT	I	Serial UART Communication
78	PHOTO	-	No Connection
79	MOTOR_H	-	No Connection
80	N.C.	-	No Connection
81	PL_H	-	No Connection
82	REC_H	-	No Connection
83	DMT	-	No Connection

85	N.C.	-	No Connection
86	N.C.	-	No Connection
87	N.C.	-	No Connection
88	FAN_SW	-	No Connection
89	VDD	-	Micom VDD +5V
90	AMP_MUTE	-	Amplifier mute output (H : MUTE ON)
91	GND	-	Ground Connection
92	KEY1	I	Key 1 Input
93	KEY2	I	Key 2 Input
94	MK-IN1	-	No Connection
95	MK-IN2	-	No Connection
96	DCDET	I	DC Level Detection Input
97	REGION	I	Region Setting Input
98	VOL_JOG	I	Jog Input
99	N.C.	-	No Connection
100	VREF +	-	A/D Converter reference voltage +3.3V

21.1.2. Packaging

21.1.3. Mechanical Repacement Parts List

Important Safety Notice

Components identified by  mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.

RTL (Retention Time Limited)

Note: The marking (RTL) indicates that the Retention Time is Limited for this item.

After the discontinuation of this assembly in production, the item will continue to be available for a specific period of time. The retention period of availability is dependant on the type of assembly, and in accordance with the laws governing part and product retention. After the end of this period, the assembly will no longer be available.

Note:

- When replacing any of these components, be sure to use only manufacturer's specified parts shown in the replacement part list.
- The parenthesized indications on the Remarks column specify the destination & product color (Refer to the cover page for the information).
- Parts without these indications shall be used for all areas.
- This product uses a laser diode. Refer to "Precaution of Laser Diode".
- All parts mentioned are supplied by PAVCSG unless indicated likewise.
- Parts mentioned [SPG] in the Remarks column are supplied by PAVC-CSG.
- Reference for O/I book languages are as follows:
