Service Manual

DVD/ Tuner unit

- SA-ST1PP
SA-ST1EB
SA-ST1EG

Colour

(S).....Silver Type

System	SC-ST1
DVD/Tuner unit	SA-ST1
Front and surround speakers*1	SB-FS901

Because of unique interconnecting cables, when a component

Because of unique interconnecting cables, when a component requires service, send or bring in the entire system.

Front and surround speakers*1	SB-FS901
Center speaker*1	SB-PC52
Active sub woofer*2	SB-WA330

*1 : Made in Singapore.

*2 : Made in Malaysia.

Specifications

Amplifier section

RMS Output Power (10 % total harmonic distortion):

1 kHz;	
Front	40 W per channel (6 Ω)
Surround	50 W per channel (6 Ω)
Center	120 W (6 Ω)

100 Hz;	
Sub woofer	200 W (4 Ω)

RMS Total Output Power 500 W

FTC Output Power (1.0 % total harmonic distortion)*3:

120 Hz - 20 kHz;	
Front	27 W per channel (6 Ω)
Surround	27 W per channel (6 Ω)
Center	62 W (6 Ω)

45 Hz - 120 Hz;	
Sub woofer	130 W (4 Ω)

FTC Total Output Power 300 W

DIN Output Power (1.0 % total harmonic distortion)*4:

1 kHz;	
Front	30 W per channel (6 Ω)
Surround	35 W per channel (6 Ω)
Center	90 W (6 Ω)

100 Hz;	
Sub woofer	130 W (4 Ω)

DIN Total Output Power 350 W

Input sensitivity/input impedance:

VCR/AUX;	350 mV, 10 kΩ
TV for SA-ST1PP;	350 mV, 10 kΩ
TV (RCA/AV terminal) except for SA-ST1PP;	350 mV, 10 kΩ

FM tuner section

Frequency range:

For SA-ST1PP; 87.9 – 107.9 MHz (200 kHz steps)

87.5 – 108.0 MHz (100 kHz steps)

Except for SA-ST1PP; 87.5 – 108.0 MHz (50 kHz steps)

Antenna terminal(s): 75 Ω (unbalanced)

Disc section

Disc played DVD-AUDIO, DVD-VIDEO, DVD-RAM/DVD-R (DVD-VIDEO formatted discs), CD (CD-DA), VIDEO-CD, CD-R/RW (CD-DA, VIDEO-CD, WMA, MP3 formatted discs)

Audio:

Number of channels; 5.1 (FL, FR, SL, SR, C, SW)

Video:

Signal system; NTSC

For SA-ST1PP;

Except for SA-ST1PP; PAL, PAL60/NTSC

Output terminal; RCA terminal (composite video) S terminal (Y, C)

Component video terminals (Y, P_B, P_R)

Except for SA-ST1PP only; AV terminal (composite, Y/C, RCB)

Pickup:

Beam source; Semiconductor Laser

Wavelength;

DVD; 658 nm

VCD/CD; 790 nm

General

Power supply:

SC-ST1PP; AC 120 V, 60 Hz

SC-ST1EB; AC 230 - 240 V, 50 Hz

SC-ST1EG; AC 230 V, 50 Hz

Power consumption for SC-ST1: 210 W

Dimensions (WxHxD): 250x1,063x250 mm

(9²⁷/₃₂" × 41⁷/₈" × 9²⁷/₃₂"

(including protrusions)

7.8 kg (17.2 lb.)

Mass:

Power consumption in standby mode:

For SC-ST1PP; 0.5 W

Except for SC-ST1PP; 0.7 W

Except for SA-ST1PP; 67.5 – 166.0 MHz (50 kHz steps)
75 Ω (unbalanced)

Antenna terminal(s):

AM tuner section

Frequency range:

For SA-ST1PP; 520 – 1710 kHz (10 kHz steps)

Except for SA-ST1PP; 522 – 1629 kHz (9 kHz steps)

WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

Panasonic

[TOP NEXT](#)

1 Before Repairs

[TOP](#) [PREVIOUS](#) [NEXT](#)

Note:

This item is indicated the contents of [SB-WA330](#) .

1. Turn off the power supply. Using a 10 Ω , 10 W resistor, connect both ends of power supply capacitors (C546, C547, C548, C549) in order to discharge the voltage.
2. Before turning the power supply on, after completion of repair, slowly apply the primary voltage by using a power supply voltage controller to make sure that the consumed current at 50/60 Hz in NO SIGNAL mode (VOL: MIN, SELECTOR: DVD/CD) should be shown below with respect to supply voltage 120/230/240 V.

Power supply voltage	AC 120 V, 60 Hz	AC 230 V, 50 Hz	AC 230-240 V, 50 Hz
Consumed current	Less than 1000 mA	Less than 400 mA	Less than 400 mA

[TOP](#) [PREVIOUS](#) [NEXT](#)

2 Protection Circuitry

[TOP](#) [PREVIOUS](#) [NEXT](#)

Note:

This item is indicated the contents of [SB-WA330](#) .

The protection circuitry may have operated if either of the following conditions is noticed:

- No sound is heard when the power is switched ON.
- Sound stops during a performance.

The functions of this circuitry is to prevent circuitry damage if, for example, the positive and negative speaker connection wires are shorted, or if speaker systems with an impedance less than the indicated rated impedance of this unit are used.

If this occurs, follow the procedures outlined below.

1. Switch OFF the power.
2. Determine the cause of the problem and correct it.
3. Switch ON the power once again.

Note:

When the protection circuitry functions, the unit will not operate unless the power is first switched OFF and then ON again.

[TOP](#) [PREVIOUS](#) [NEXT](#)

3 Disc information

[TOP](#) [PREVIOUS](#) [NEXT](#)

■ CD-R and CD-RW discs

This unit can play CD-R/RW (audio recording disc) recorded with CD-DA, video CD, WMA or MP3. Finalize* the disc after recording.

■ DVD-R discs

Panasonic DVD-R recorded and finalized* on a Panasonic DVD video recorder are played as DVD-Video on this unit.

*A process that allows play on compatible equipment.

■ DVD-RAM discs

DVD-RAM discs must meet the following conditions for this unit to be able to play them.

Type	<ul style="list-style-type: none">● Non-cartridge discs● Discs that can be removed from their cartridges (TYPE 2 and 4)
Capacity	<ul style="list-style-type: none">● 12 cm (5") 9.4 GB (double-sided) and 4.7 GB (single-sided)● 8 cm (3") 2.8 GB (double-sided)
Recording format	Discs recorded with DVD video recorders, DVD video cameras, personal computers, etc., using Version 1.1 of the Video Recording Format (a unified video recording standard).

- Remove TYPE 2 and 4 discs from their cartridges before use, then return them when you are finished. Read the instructions for the disc carefully.
- Do not allow the disc to become dirty or scratched. Store discs in their cartridges and ensure the disc label and cartridge label face the same way.
- Some parts of the disc, for example where one program ends and another begins, may not play smoothly.

Note

It may not be possible to play CD-R, CD-RW, DVD-R and DVD-RAM in all cases due to the type of disc or condition of the recording.

[TOP](#) [PREVIOUS](#) [NEXT](#)

4 Safety Precaution

[TOP](#) [PREVIOUS](#) [NEXT](#)

Note:

This item is indicated the contents of [SB-WA330](#) .

(This “Safety Precaution” is applied only in U.S.A.)

1. Before servicing, unplug the power cord to prevent an electric shock.
2. When replacing parts, use only manufacture’s recommended components for safety.
3. Check the condition of the power cord. Replace if wear or damage is evident.
4. After servicing, be sure to restore the lead dress, insulation barriers, insulation papers, shields etc..
5. Before returning the serviced equipment to the customer, be sure to make the following insulation resistance test to prevent the customer from being exposed to a shock hazard.

[4.1 Insulation resistance test](#)

[TOP](#) [PREVIOUS](#) [NEXT](#)

4.1 Insulation resistance test

[TOP](#) [PREVIOUS](#) [NEXT](#)

1. Unplug the power cord and short the two prongs of the plug with a jumper wire.
2. Turn on the power switch.
3. Measure the resistance value with ohmmeter between the jumpered AC plug and each exposed metal cabinet parts, such as screw heads antenna, control shafts, handle brackets, etc.. Equipment with antenna terminals should read between $3\text{ M}\Omega$ - $5.2\text{ M}\Omega$ to all exposed parts. Refer to [Fig. 4-1](#). Equipment without antenna terminals should read approximately infinity to all exposed parts. Refer to [Fig. 4-2](#).

Note:

Some exposed parts may be isolated from the chassis by design. These will read infinity.

4. If the measurement is outside the specified limits, there is a possibility of a shock hazard. The equipment should be repaired and rechecked before it is returned to the customer.

Fig. 4-1.

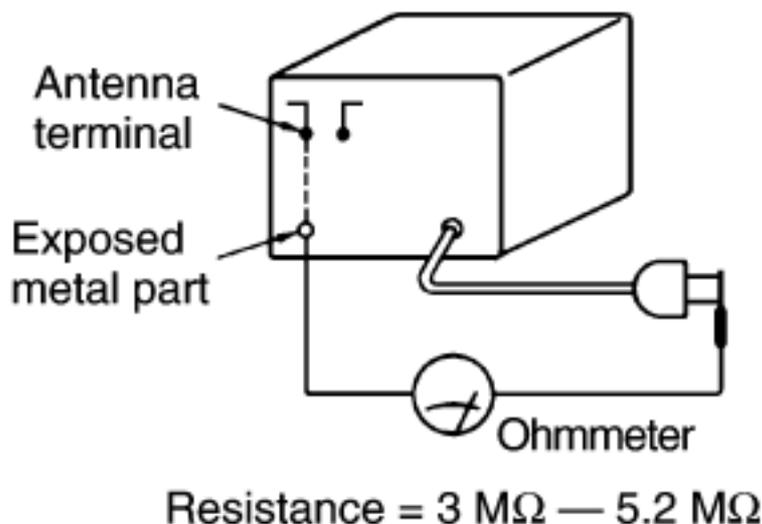

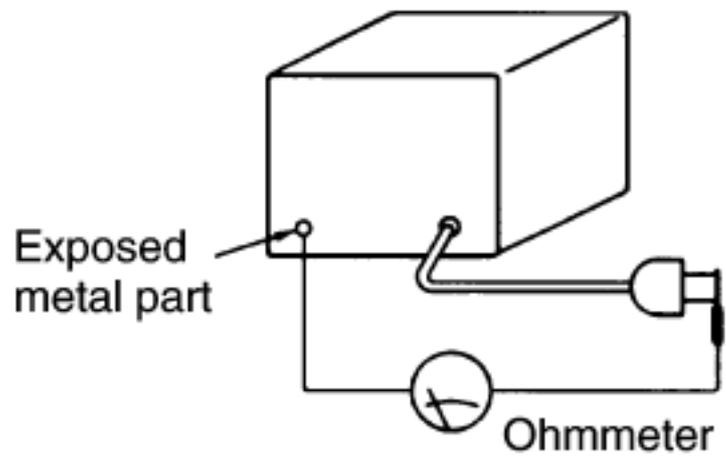

Fig. 4-2.

Resistance = Approx. ∞

[TOP](#) [PREVIOUS](#) [NEXT](#)

5 Precaution of Laser Diode

[TOP](#) [PREVIOUS](#) [NEXT](#)

- [For SA-ST1PP](#)

Caution:

This unit utilizes a class 1 laser. Invisible laser radiation is emitted from the optical pick-up lens when the unit is turn on:

1. Do not look directly into the pick-up lens.
 2. Do not use optical instruments to look at pick-up lens.
 3. Do not adjust the preset variable resistor on the optical pick-up.
 4. Do not disassemble the optical pick-up unit.
 5. If the optical pick-up is replaced, use the manufacture's specified replacement pick-up only.
 6. Use of control or adjustment or performance of procedures other than those specified herein may result in hazardous radiation exposure.
- [For SA-ST1EB, SA-ST1EG](#)

CAUTION:

THIS PRODUCT UTILIZES A LASER.

USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

CAUTION: This product utilizes a laser diode with the unit turned "on", invisible laser radiation is emitted from the pick-up lens.
Wave length: 658/790 nm
Maximum output radiation power from pick-up: 100 µW/VDE

Laser radiation from the pick-up unit is safety level, but be sure the followings:

1. Do not disassemble the pick-up unit, since radiation from exposed laser diode is dangerous.
2. Do not adjust the variable resistor on the pick-up unit. It was already adjusted.
3. Do not look at the focus lens using optical instruments.
4. Recommend not to look at pick-up lens for a long time.

ACHTUNG: Dieses Produkt enthält eine Laserdiode. Im eingeschalteten Zustand wird unsichtbare Laserstrahlung von der Lasereinheit abgestrahlt.

Wellenlänge: 658/790 nm

Maximale Strahlungsleistung der Lasereinheit: 100 µW/VDE

Die strahlungen der Lasereinheit ist ungefährlich, wenn folgende Punkte beachtet werden:

1. Die Lasereinheit nicht zerlegen, da die Strahlung an der freigelegten Laserdiode gefährlich ist.
2. Den werkseitig justierten Einstellregler der Lasereinheit nicht verstellen.
3. Nicht mit optischen Instrumenten in die Fokussierlinse blicken.
4. Nicht über längere Zeit in die Fokussierlinse blicken.

CAUTION - LASER RADIATION WHEN OPEN. DO NOT STARE INTO BEAM.	FSAL1 CFR / Class I
CAUTION - OPEN AND ADJUST LASER RADIATION WHEN OPEN. DO NOT STARE INTO BEAM.	CLASS I (Type II)
ATTENTION - NE PAS OUVRIER LE LASER RADIATION WHEN OPEN. NE PAS REGARDER EN FACE DU LASER.	
ADVARSEL - SPALG OG USTYR LASERSTRÅLING VED ÅBNING. UNDELA UDSÆTTTELSE FOR STRÅLING.	
VARO! - AVARTUOKA OLET AVTTINA NÄRVALU JA NÄRVALOK LASERSTRÅLUNTA. ÄLÄ KATSO SUUPESSÄ.	
WARNING - SPALG OG OUVRIER LASERSTRÅLING NAR DENNE DEL ER ÖPPNAD. BEHÅRSTA ÅU STRÅLING.	
ADVARSEL - SPALG OG USTYR LASERSTRÅLING NAR DENNE DEL ER ÅPNED. FØRSØRINGS FOR STRÅLING.	
VORSICHT - ÖFFNEN UND JUSTIEREN LASERSTRÄHLUNG, NICH ANSCHAUEN DIREKT IN DIE STRÄHLUNG ANSCHAUEN.	
注意 - 打开时有可能不可见激光辐射。请勿直视激光束。	
注意 - 打开时有可能不可见激光辐射。请勿直视激光束。	90J50285

6 Handling Precautions for Traverse Deck

[TOP](#) [PREVIOUS](#) [NEXT](#)

The laser diode in the optical pick-up may break down due to potential difference caused by static electricity of clothes or human body.

So be careful of electrostatic breakdown during repair of the optical pick-up.

[6.1 Handling of optical pick-up](#)

[6.2 Grounding for electrostatic breakdown prevention](#)

[6.2.1 Human body grounding](#)

[6.2.2 Work table grounding](#)

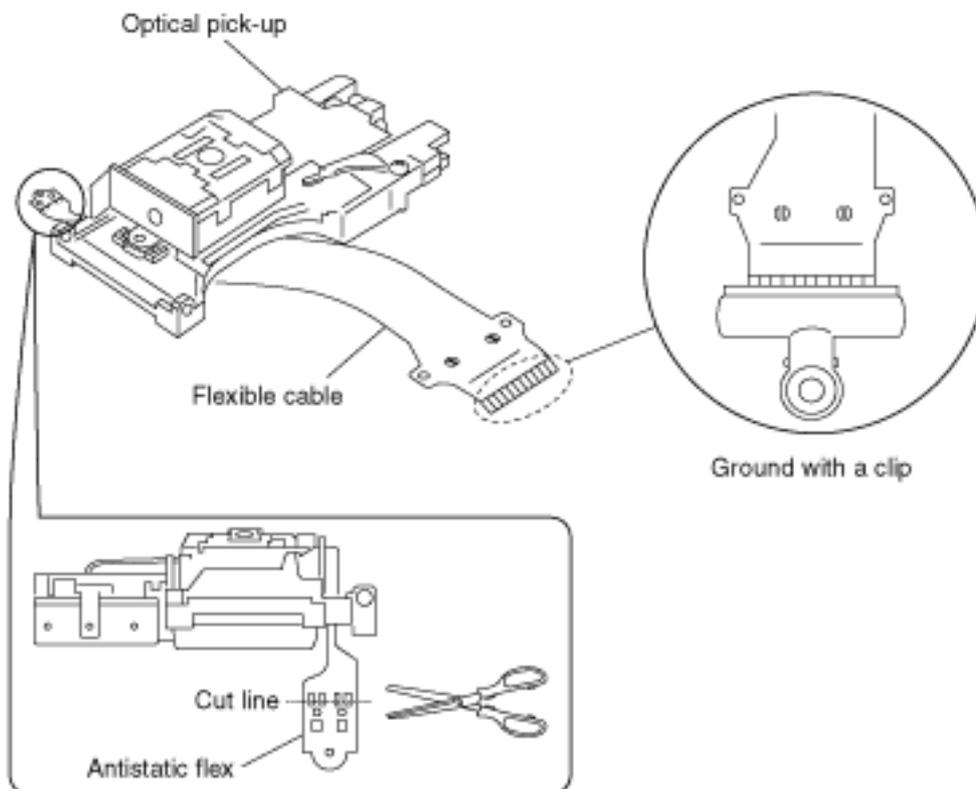

[TOP](#) [PREVIOUS](#) [NEXT](#)

6.1 Handling of optical pick-up

[TOP](#) [PREVIOUS](#) [NEXT](#)

1. Do not subject the optical pick-up to static electricity as it is extremely sensitive to electrical shock.
2. To prevent the breakdown of the laser diode, an antistatic shorting pin or similar object is inserted into the flexible board (FFC board). Refer to [Fig. 6-1](#).
When removing or connecting the shortpin, finish the job in as short time as possible.
3. Be careful not to apply excessive stress to the flexible board (FFC board).
4. A new optical pick-up has an antistatic flex. When the optical pick-up is replaced, connect the flexible cable (FFC) to the connector first, and then cut the antistatic flex. Refer to [Fig. 6-1](#).
5. Do not turn the variable resistor (Laser power adjustment).

Fig. 6-1.

[TOP](#) [PREVIOUS](#) [NEXT](#)

6.2 Grounding for electrostatic breakdown prevention

[TOP](#) [PREVIOUS](#) [NEXT](#)

[6.2.1 Human body grounding](#)

[6.2.2 Work table grounding](#)

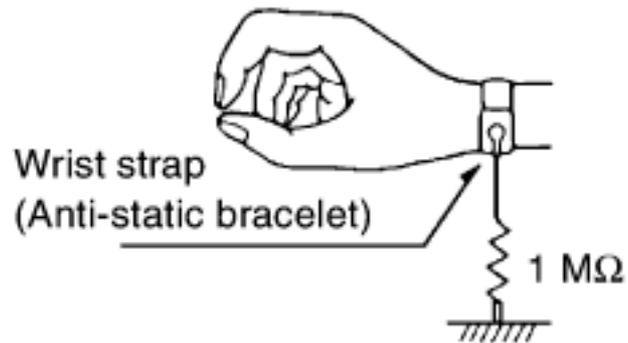

[TOP](#) [PREVIOUS](#) [NEXT](#)

6.2.1 Human body grounding

[TOP](#) [PREVIOUS](#) [NEXT](#)

Use the antistatic wrist strap to discharge the static electricity from your body. Refer to [Fig. 6-2](#).

Fig. 6-2.

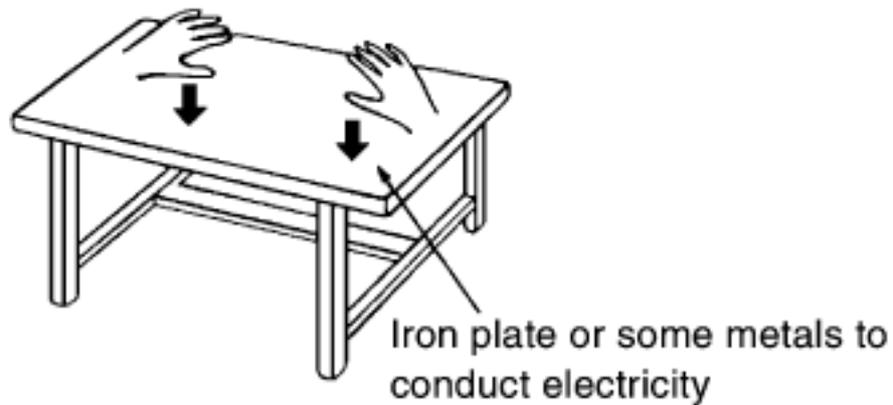

[TOP](#) [PREVIOUS](#) [NEXT](#)

6.2.2 Work table grounding

[TOP](#) [PREVIOUS](#) [NEXT](#)

Put a conductive material (sheet) or steel sheet on the area where the optical pick-up is placed and ground the sheet. Refer to [Fig. 6-3](#).

Fig. 6-3.

Caution:

The static electricity of your clothes will not be grounded through the wrist strap. So take care not to let your clothes touch the optical pick-up.

8 Caution for AC Mains Lead

[TOP](#) [PREVIOUS](#) [NEXT](#)

Note:

This item is indicated the contents of [SB-WA330](#) .

(For United Kingdom)

("EB" area code model only)

For your safety, please read the following text carefully.

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.

A 5-ampere fuse is fitted in this plug.

Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5-ampere and that it is approved by ASTA or BSI to BS1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local dealer.

CAUTION!

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY.

THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13-AMPERE SOCKET.

If a new plug is to be fitted please observe the wiring code as shown below.

If in any doubt please consult a qualified electrician.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral, Brown: Live.

As these colours may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured Blue must be connected to the terminal which is marked with the letter N or coloured Black or Blue.

The wire which is coloured Brown must be connected to the terminal which is marked with the letter L or coloured Brown or Red.

WARNING: DO NOT CONNECT EITHER WIRE TO THE EARTH TERMINAL WHICH IS MARKED WITH THE LETTER E, BY THE EARTH SYMBOL  OR COLOURED GREEN OR GREEN/YELLOW.

THIS PLUG IS NOT WATERPROOF—KEEP DRY.

Before use

Remove the connector cover.

How to replace the fuse

The location of the fuse differ according to the type of AC mains plug (figures A and B). Confirm the AC mains plug fitted and follow the instructions below.

Illustrations may differ from actual AC mains plug.

1. Open the fuse cover with a screwdriver.

Figure A

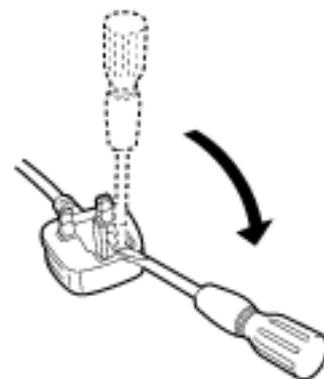

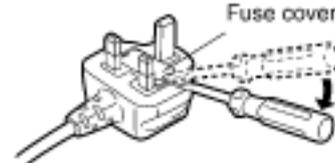

Figure B

2. Replace the fuse and close or attach the fuse cover.

Figure A

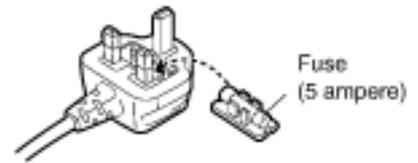

Figure B

the terminal which is marked with the letter N or coloured Black or Blue.

The wire which is coloured Brown must be connected to the terminal which is marked with the letter L or coloured Brown or Red.

11 DVD Optical Pick-up Self-Diagnosis and Replacement Procedure

[TOP](#) [PREVIOUS](#) [NEXT](#)

[11.1 Self-diagnosis](#)

[11.2 Caution to be used before replacing the optical pick-up and spindle motor assembly](#)

[11.2.1 Caution to be taken when replacing the optical pick-up](#)

[TOP](#) [PREVIOUS](#) [NEXT](#)

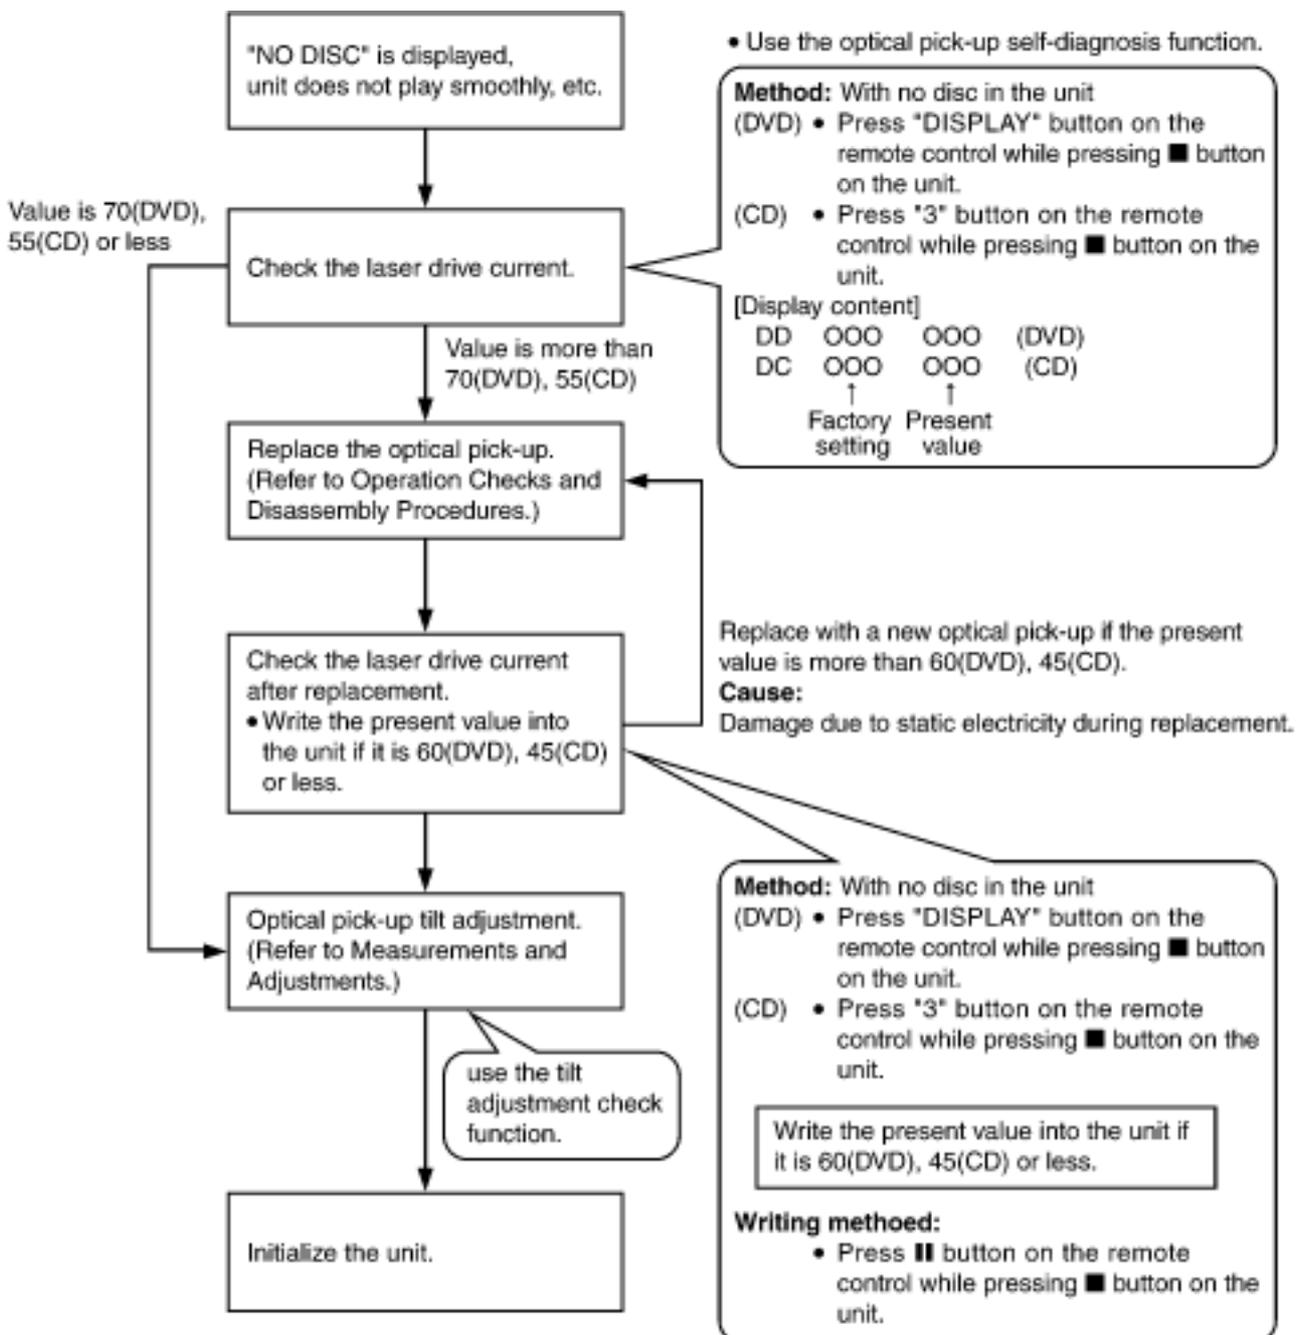

11.1 Self-diagnosis

[TOP](#) [PREVIOUS](#) [NEXT](#)

The optical pick-up self-diagnosis function and tilt adjustment check function have been included in this unit. When repairing, use the following procedure for effective self-diagnosis and tilt adjustment. Be sure to use the self-diagnosis function before replacing the optical pick-up when "NO DISC" is displayed. As a guideline, you should replace the optical pick-up when the value of the laser drive current is more than 70(DVD), 55(CD).

Note:

Press the Standby/on button to turn on the power, and check the value within 3 minutes before the unit warms up.
(Otherwise, the unit will be incorrect.)

Initialize the unit.

Writing method:

- Press **II** button on the remote control while pressing **■** button on the unit.

[TOP](#) [PREVIOUS](#) [NEXT](#)

11.2 Caution to be used before replacing the optical pick-up and spindle motor assembly

[TOP](#) [PREVIOUS](#) [NEXT](#)

Before replacing the optical pick-up and spindle motor assembly, check the total using hours for each of them. The checking method is as follows:

Item	Play mode and button combination	Display
Using hours of DVD and CD laser	In STOP mode (no disc), while pressing <ul style="list-style-type: none"> ■ button on the unit, press ▲ button on the remotecontrol. 	0xxxx0yyyy xxxx(DVD), yyyy(CD): Time is shown in 4 digits of decimal notation in a unit of an hours. Note: 1-digit and 6-digit of "0" is not changed.
Using hours of spindle motor	In STOP mode (no disc), while pressing <ul style="list-style-type: none"> ■ button on the unit, press ▶ button on the remotecontrol. 	T2-xxxx-- (- indicates a space.) xxxx: Time is shown in 4 digits of decimal notation in a unit of 10 hours.
Resetting using hours of DVD and CD laser	When displaying the using hours of DVD and CD laser, while pressing <ul style="list-style-type: none"> ■ button on the unit, press ▼ button on the remote control. 	0000000000
Resetting using hours of spindle motor	When displaying using hours of spindle motor, while pressing <ul style="list-style-type: none"> ■ button on the unit, press ◀ buttonon the remote control. 	T2-0000--

11.2.1 Caution to be taken when replacing the optical pick-up

[TOP](#) [PREVIOUS](#) [NEXT](#)

11.2.1 Caution to be taken when replacing the optical pick-up

[TOP](#) [PREVIOUS](#) [NEXT](#)

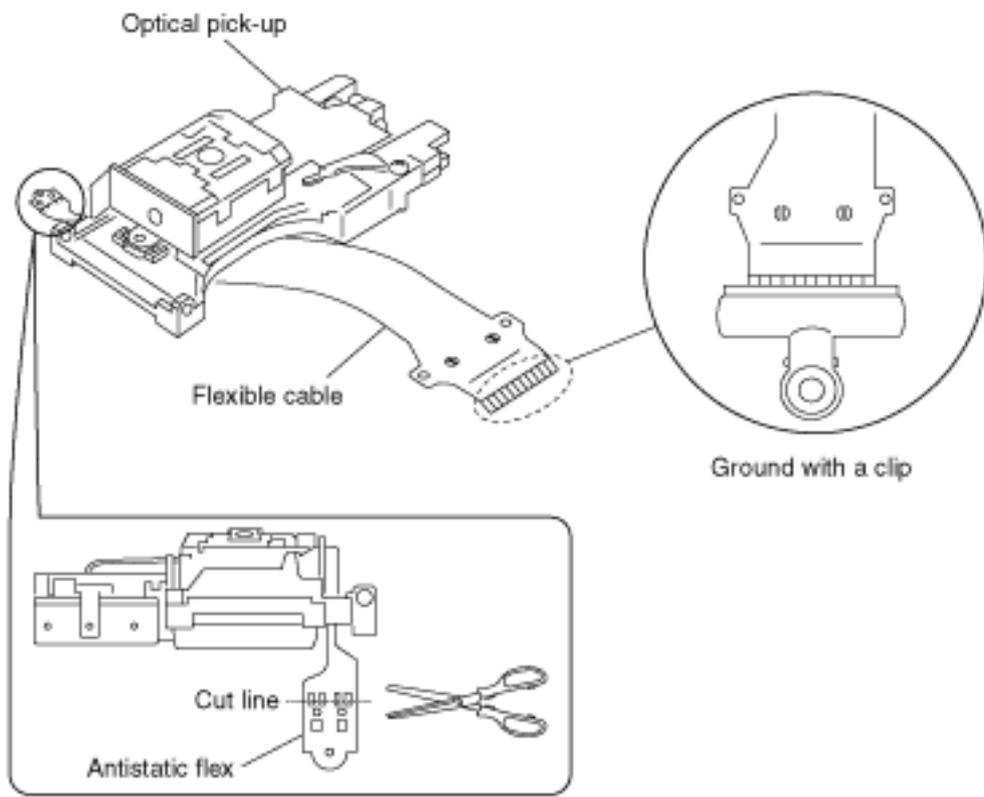

The optical pick-up may break down due to the static electricity of human body. Take proper protection measures against static electricity before repairing the parts around the optical pick-up. Refer to “Handling Precaution for TraverseDeck”.

- Do not touch the area around the laser diode and actuator.
- Do not judge the laser diode with a tester.
- It is recommended to use an antistatic soldering iron for short-circuit or removing the laser diode.
(Recommended soldering iron) HAKKO ESD Product
- Solder the land of the flexible cable in the optical pick-up.

Note:

When using a soldering iron which is not antistatic, short-circuit the terminal of the flexible cable first. After that, short the land.

- An antistatic flex is connected with the new optical pick-up. Cut the antistatic flex after the optical pick-up is replaced.

12.1.1 Automatically display function

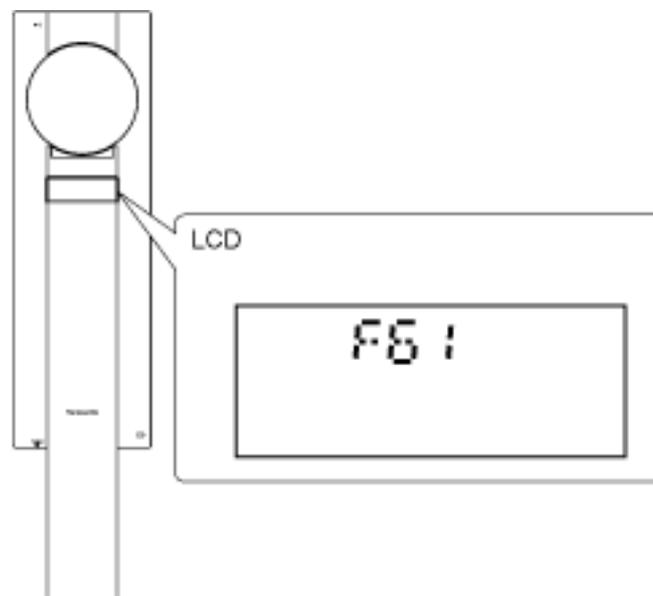

[TOP](#) [PREVIOUS](#) [NEXT](#)

Automatically display when the unit detects the malfunction of power supply.

- F61:

Automatically displays on the LCD when a malfunction occurs. Refer to [Fig. 12-1](#).

Fig. 12-1.

[TOP](#) [PREVIOUS](#) [NEXT](#)

12.1.2 To redisplay the malfunction code

[TOP](#) [PREVIOUS](#) [NEXT](#)

- For F61
 - If F61 is displayed, the power will automatically be switched off and the standby indicator will light up.
 - F61 will be displayed for 3 seconds, and then the clock will be displayed.
 - To redisplay the code, switch the power on. F61 will be redisplayed, and then after 3 seconds the clock will be displayed and the power will automatically switch off.

[TOP](#) [PREVIOUS](#) [NEXT](#)

12.1.3 Automatically display contents

[TOP](#) [PREVIOUS](#) [NEXT](#)

12.1.3.1 F61

- [Problem or condition](#)

When the “Standby/on” switch is switched on, it automatically switches back off, making it impossible to switch power on.

- [Correction procedure](#)

Faulty power supply signal line or when a DC voltage is applied to speaker terminals. (Check and replace the malfunction parts.)

[TOP](#) [PREVIOUS](#) [NEXT](#)

[TOP](#) [PREVIOUS](#) [NEXT](#)

[12.2.1 How to enter the mode and display](#)

[12.2.2 To redisplay the malfunction code](#)

[12.2.3 Clearing self-diagnostic function](#)

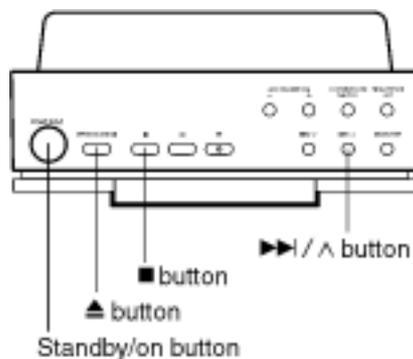

[TOP](#) [PREVIOUS](#) [NEXT](#)

12.2.1 How to enter the mode and display

[TOP](#) [PREVIOUS](#) [NEXT](#)

1. Turn on the power.
2. Press “SELECTOR” button to select DVD/CD. With no disc on the unit, hold down
 - button for at least 2 seconds, and then press
 - ▶▶/▲ button for at least 2 seconds. Refer to [Fig. 12-2](#). The LCD is displayed “T-----”
3. Press “OPEN/CLOSE
- ▲” button. Refer to [Fig. 12-2](#). (The loading tray is opened automatically, and after a second, close it automatically.)
4. Press
 - button. Refer to [Fig. 12-2](#). Malfunction code stored in memory is displayed if any. Refer to Table 12-1. If there are multiple error,they can be successively by pressing
 - button.

Fig. 12-2.

[TOP](#) [PREVIOUS](#) [NEXT](#)

12.2.2 To redisplay the malfunction code

[TOP](#) [PREVIOUS](#) [NEXT](#)

- Press the “Standby/on” button to turn off. And then press the “Standby/on” button again to turn it on again.
- The contents of self-diagnostic function are stored in memory. To redisplay, perform the procedures “How to enter the mode and display”.

[TOP](#) [PREVIOUS](#) [NEXT](#)

12.2.3 Clearing self-diagnostic function

[TOP](#) [PREVIOUS](#) [NEXT](#)

- After repairing, continue to press
 - button for at least 5 seconds. And then “T-----” is displayed on the LCD.
(- indicates a space.)
(Clearing the contents of self-diagnostic function.)
- Always be sure to clear memories after completing repair.

Table 12-1

Display code	Symptom	Cause
H15	When the loading tray opens, it closes by itself.	Loading tray open detect switch (S913) fault. (Check and replace)
H16	When the loading tray closes, it opens by itself.	Loading tray close detect switch (S914) fault. (Check and replace)

12.6 Service mode table 2

[TOP](#) [PREVIOUS](#) [NEXT](#)

Pressing various button combinations on the unit and remote control can activate the service modes.

Item	Unit mode and button combination	Function	Display	Cancellation method
Jitter check	<p>In STOP mode (no disc), press</p> <p>■ button on the unit and “5” button on the remote control.</p>	<p>Jitter check</p> <p>Jitter rate is measured and displayed. Measurement is repeatedly done in the cycle of one second. Read error counter starts from zero upon mode setting. When target block data failed to be readout, the counter advances by one increment. When the failure is caused by minor error, it may be corrected when retried to enable successful reading. In this case, the counter advances by one. When the error persists even after retry, the counter may jump by two or more.</p>	<p>xxx*1-yyy*2-zz*3 (- indicates a space.)</p> <p>*1: Jitter rate</p> <p>*2: Read error counter</p> <p>*3: Focus drive value</p> <p>Jitter rate is shown in decimal notation to one place of decimal. Focus drive value is shown in hexadecimal notation.</p>	<p>Press</p> <p>■ button or open the loading tray.</p>
Error code check	<p>In STOP mode (no disc), press</p> <p>■ button on the unit and “0” button on the remote control.</p> <p>*With displaying error code, panel controller switches serial number of history and sends out the command accordingly by pressing</p> <p>▲ and</p> <p>▼ button.</p>	<p>Error code check</p> <p>The latest error code stored in EEPROM is displayed.</p>	<p>Error code (play_err) is expressed in the following convention.</p> <p>Error code=0xDAXX is expressed→DVD nn-UXX-</p> <p>Error code=0xDBXX is expressed→DVD nn-HXX-</p> <p>Errorcode=0DXXX is expressed→DVD nn-FXXX</p> <p>Error code=0x0000 is expressed→ DVD nn-F---</p> <p>Error code except above→DVDnn-XXXX</p> <p>*nn denotes the serial number of history.</p>	<p>Cancelled automatically 5 seconds later.</p>

Initial setting of laser drive current	<p>In STOP mode (no disc), press</p> <p>■ button on the unit and</p> <p> button on the remote control.</p>	<p>Initial setting of laser drive current</p> <p>Initial current value for each of DVD and CD laser is separately saved in EEPROM.</p>	<p>D0*1-034*2-028*3</p> <p>*1: Laser current measurement mode</p> <p>*2: DVD laser current measurement</p> <p>*3:CD laser current measurement</p> <p>The value denotes the current in decimal notation. The above example shows the initial current is 34 mA and 28 mA for DVD and CD laser.</p>	Cancelled automatically 5 seconds later.
DVD laser drive current measurement	<p>In STOP mode (no disc), press</p> <p>■ button on the unit and “DISPLAY” button on the remote control.</p>	<p>DVD laser drive current measurement</p> <p>DVD laser drive current is measured and the result is displayed together with the initial value stored in EEPROM. After the measurement, DVD laser emission is kept on. It is turned off when Standby/on key is switched off. (It is also turned off when the primary power is switched off.)</p>	<p>DD*1-034*2-032*3</p> <p>*1: DVD laser current measurement mode</p> <p>*2: Initial current stored in EEPROM</p> <p>*3:Measured current</p> <p>The value denotes the current in decimal notation.</p> <p>The above example shows the initial current is 34 mA and the measured value is 32 mA.</p>	Cancelled automatically 5 seconds later.
ADSC internal RAM data check	<p>In STOP mode (no disc), press</p> <p>■ button on the unit and “1” or “2” button on the remote control.</p>	<p>ADSC internal RAM data check</p> <p>ADSC internal RAM data is read out and displayed.</p> <p>Change the address with “CANCEL” key operation to show the data for 16 addresses.</p>	<p>A*1-0FA*2-6901*3</p> <p>*1: ADSC internal RAM data check mode</p> <p>*2: Address</p> <p>*3: RAMdata for specified address</p> <p>The value is shown in hexadecimal notation. The above example shows the data in ADSC address 0FAh is 6901h.</p>	<p>Press</p> <p>■ button or open the loading tray.</p>
CD laser drive current measurement	<p>In STOP mode (no disc), press</p> <p>■ button on the unit and “3” button on the remote control.</p>	<p>CD laser drive current measurement</p> <p>CD laser drive current is measured and the result is displayed together with the initial value stored in EEPROM. After the measurement, CD laser emission is kept on. It is turned off when Standby/on key is switched off. (It is also turned off when the primary power is switched off.)</p>	<p>DC*1-028*2-026*3</p> <p>*1: CD laser current measurement mode</p> <p>*2: Initial current stored in EEPROM</p> <p>*3:Measured current</p> <p>The value denotes the current in decimal notation.</p> <p>The above example shows the initial current is 28 mA and the measured value is 26 mA.</p>	Cancelled automatically 5 seconds later.

User initialization	In STOP mode (no disc), press ■ button on the unit and “ ≡10” button on the remote control.	User initialization User setting are cancelled and unit is initialized to factory preset settings.	“INITIALIZE”	
Region display	In STOP mode (no disc), press ■ button on the unit and “6” button on the remote control.	Region display	-w*1-x*2y*3-zzz*4- *1: Region No. *2: N; no PAL/P;PAL *3: N; NTSC/6; PAL60 *4: Panel controller jumper information	Cancelled automatically 5 seconds later.
Firmware version display	In STOP mode (no disc), press ■ button on the unit and “7” button on the remote control.	Firmware version display	rrr*1-xx*2y*3zzz*4 *1: Panel controller release number *2: System controller generation *3: System controller model number *4: System controller release number	Cancelled automatically 5 seconds later.
Region & firmware version display	In STOP mode (no disc), press ■ button on the unit and “8” button on the remote control.	Region & firmware version display	-r*1--xx*2y*3zzz*4 *1: Region No. *2: System controller generation *3: System controller model number *4: System controller release number	Cancelled automatically 5 seconds later.
Timer 1 check	In STOP mode (no disc), press ■ button on the unit and ▲ button on the remote control.	Timer 1 check Laser operation timer. Operation time is measured separately for DVD and CD laser.	0123405678 Shown to the left (from 1 to 5-digit) is DVD laser time, and to the right (6 to 10-digit) is CD laser time. Time is shown in 4 digits of decimal notation in a unit of an hour. “0000” will follow “9999”. Note: 1-digit and 6-digit of “0” is not changed.	Cancelled automatically 5 seconds later.
Timer 1 reset	While displaying Timer 1 data, press ■ button on the unit and ▼ button on the remote control.	Timer 1 reset Laser operation timer. Operation time is reset all at once for DVD and CD laser.	0000000000	Cancelled automatically 5 seconds later.

Timer 2 check	In STOP mode (no disc), press ■ button on the unit and ▶ button on the remote control.	Timer 2 check Spindle motor operation timer.	T2-1234--- Time is shown in 4 digits of decimal notation in a unit of 10 hours. “0000” will follow “9999”.	Cancelled automatically 5 seconds later.
Timer 2 reset	While displaying Timer 2 data, press ■ button on the unit and ◀ button on the remotecontrol.	Timer 2 reset Spindle motor operation timer.	T2-0000---	Cancelled automatically 5 seconds later.
Communi- cation error display	In STOP mode (no disc), press ■ button on the unit and “MENU” button on the remote control.	Communication error display Displaying the number of communication error times between IC6201 and IC801.	ERR-02*1-/30*2 *1: Number of error times *2: Number of communication times(Fixed)	Cancelled automatically 5 seconds later.

12.7 Sales demonstration lock function

[TOP](#) [PREVIOUS](#) [NEXT](#)

This function prevents discs from being lost when the unit is used for sales demonstration, disable to eject the disc and some operations for disc. When the unit is operated in this mode, “---LOCKED--” is displayed on the LCD and prohibited operation is disabled.

[12.7.1 Setting](#)

[12.7.2 Cancellation](#)

[TOP](#) [PREVIOUS](#) [NEXT](#)

12.7.1 Setting

[TOP](#) [PREVIOUS](#) [NEXT](#)

- [Setting for eject operation](#)

1. Press “SELECTOR” button to select DVD/CD.
2. Hold down
 - button on the unit, and then press “Standby/on” button on the remote control for at least 3 seconds.
 - “ ---LOCKED--” is displayed on the LCD for 3 seconds, and then start to play the disc on the unit. (This indicates the unit enters into sales demonstration lock function.)

[Note:](#)

When “OPEN/CLOSE

▲” is pressed, “ ---LOCKED--” is displayed and disabled to open/close the loading tray.

- [Setting for selector and some operations for disc](#)

1. Press “SELECTOR” button to select DVD/CD.
2. Hold down
 - ▶ button on the unit, and then press “Standby/on” button on the remote control for at least 3 seconds.
 - “ ---LOCKED--” is displayed on the LCD for 3 seconds, and then start to play the disc on the unit. (This indicates the unit enters into sales demonstration lock function.)

[Note:](#)

When buttons as shown below are pressed, “ ---LOCKED--” is displayed and disabled to operate.

Unit	<p>OPEN/CLOSE</p> <p>,</p> <p>, SELECTOR,</p> <p>,</p> <p>/V,</p> <p>, RDS(Except for SA-ST1PP)</p>
Remote control	<p>SLEEP, REPEAT, GROUP, FM MODE/SET UP, CH SELECT,</p> <p>, TEST, FL DISPLAY,</p> <p>, DIMMER,</p> <p>, MIX 2CH, TV, VCR/AUX, TUNNER/BAND, 0-9,</p> <p>, 10,</p> <p>,</p> <p>,</p> <p>,</p> <p>,</p> <p>,</p> <p>, DISPLAY, RETURN, POSITION MEMORY, MUTING,</p>

12.7.2 Cancellation

[TOP](#) [PREVIOUS](#) [NEXT](#)

This function can be cancelled by the same procedures shown above. (“-UNLOCKED-” is displayed for about 3 seconds and cancels the sales demonstration lock function.)

[TOP](#) [PREVIOUS](#) [NEXT](#)

12.8 Handling after completing repairs

[TOP](#) [PREVIOUS](#) [NEXT](#)

Perform the following procedures after completing repairs.

1. Close the loading tray to press “OPEN/CLOSE
▲” button.
2. Turn off the power to press “Standby/on” button.
3. Disconnect an AC power supply cord from the outlet.

Note:

Do not disconnect an AC power supply cord from the outlet with the loading tray is still opens, then close the loading tray manually.

13 Service Precautions

[TOP](#) [PREVIOUS](#) [NEXT](#)

[13.1 Recovery after the DVD player is repaired](#)

[13.2 Firmware version-up of the DVD player](#)

[13.3 Cumulative operation time display function](#)

[TOP](#) [PREVIOUS](#) [NEXT](#)

13.1 Recovery after the DVD player is repaired

[TOP](#) [PREVIOUS](#) [NEXT](#)

- When a FROM or module P.C.B. is replaced, carry out the recovery processing to optimize the drive.

Playback the recovery disc to process the recovery automatically.

- Recovery disc (Product number: [RFKZD5TR006](#) or [RFKZD03R004](#))
- Performing recovery
 1. Load the recovery disc ([RFKZD5TR006](#) or [RFKZD03R004](#)) on to the unit and run it.
 2. Recovery is performed automatically. When it is finished, a message appears on the screen.
 3. Remove the recovery disc.
 4. Turn off the power.

Note:

This unit requires no initialization process carried out after the traditional DVD players were repaired.

When the recovery measure are taken, the customer setting will return to the factory preset settings as same as the procedure described in item of “User initialization” in 12.6. is carried out. Write down the contents of the setting before recovery processing, and reset the unit.

[TOP](#) [PREVIOUS](#) [NEXT](#)

13.2 Firmware version-up of the DVD player

[TOP](#) [PREVIOUS](#) [NEXT](#)

- The firmware of the DVD player may be renewed to improve the quality including operability and playback ability to the substandard discs processing to optimize the drive.

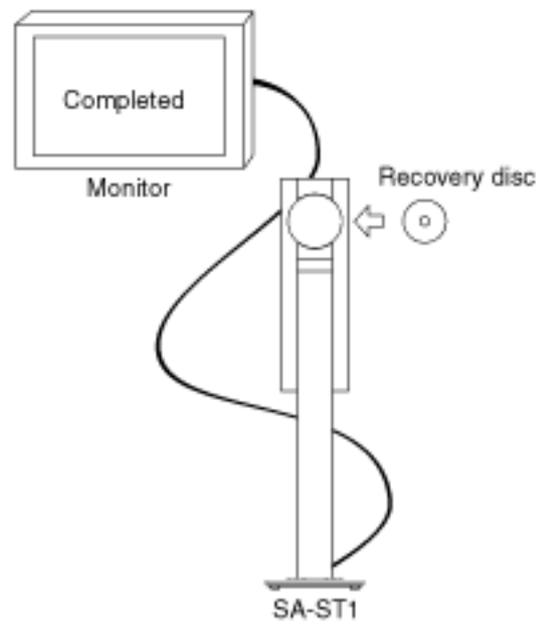

The recovery disc has also firmware version-up.

- After version-up, recovery processing is executed automatically.
- Part number of the recovery disc for version-up will be noticed when it is supplied.
- Updating firmware
 1. Load the recovery disc that is supplied to the unit and run it.
 2. Firmware version of the unit is automatically checked. Appropriate message appears whenever necessary.
 3. Using remote control cursor key, select whether version updating is to be done or not. (Selection of Yes/No)
 4.
 - a. If Yes is selected, version updating is performed.
 - b. If No is selected, only recovery is performed.
 5.
 - a. When updating is finished, remove the disc according to the message appearing on the screen.
 - b. Remove the disc according to the message appearing on the screen.
 6. Turn off the power.

Note:

If the AC power supply is shut down during version-up due to a power failure, the version-up is improperly carried out.

In such a case, replace the FROM and carry out the version-up again.

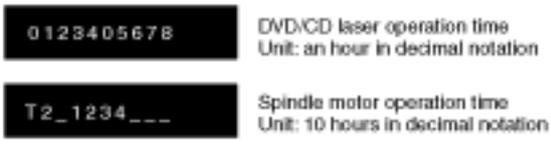

[TOP](#) [PREVIOUS](#) [NEXT](#)

13.3 Cumulative operation time display function

[TOP](#) [PREVIOUS](#) [NEXT](#)

1. Operation/display

Key operations are as follows.

- Laser operation time.....

In STOP mode (no disc), while pressing

- button on the unit, press
- ▲ button on the remote control

- Spindle motor operation time.....

In STOP mode (no disc), while pressing

- button on the unit, press
- ▶ button on the remote control.

To reset the timer, perform the following while displaying the time with above key operation.

- Laser operation time.....

While pressing

- button on the unit, press
- ▼ button on the remote control.

- Spindle motor operation time.....

While pressing

■ button on the unit, press

◀ button on the remote control.

2. How to utilize

Reference information in fault diagnosis of laser or spindle motor system.

Review of faulty point in repeated repair.

[TOP](#) [PREVIOUS](#) [NEXT](#)

[14.2.1 Important points in optical adjustments](#)

[TOP](#) [PREVIOUS](#) [NEXT](#)

14.2.1 Important points in optical adjustments

[TOP](#) [PREVIOUS](#) [NEXT](#)

- Before starting optical adjustment, be sure to take an antistatic measures.
- Optical pick-up tilt adjustment is needed after replacement of the following components.
 1. Optical pick-up
 2. Spindle motor unit
 3. Optical pick-up peripheral parts (such as rail)

Remarks:

Adjustment is generally unnecessary after replacing other parts of traverse unit. However, make an adjustment if there is noticeable degradation in picture quality. Optical adjustments cannot be made inside the optical pick-up. Adjustment is generally unnecessary after replacing the traverse unit.

[TOP](#) [PREVIOUS](#) [NEXT](#)

14.3 Storing and handling test discs

[TOP](#) [PREVIOUS](#) [NEXT](#)

Surface precision is vital for DVD test discs. Be sure to store and handling them carefully.

- Do not place discs directly onto the workbench etc., after use.
- Handle discs carefully in order to maintain their flatness. Place them into their case after use and store them vertically. Store discs in cool place where they are not exposed to direct sunlight or air from air conditioners.
- Accurate adjustment will not be possible if the disc is warped when placed on a surface made of glass etc.. If it is warped, use a new test disc to make optical adjustments.
- If adjustment is performed with a warped disc, the adjustment will be incorrect and some discs will not be playable.

[TOP](#) [PREVIOUS](#) [NEXT](#)

14.4 Optical pick-up adjustment

[TOP](#) [PREVIOUS](#) [NEXT](#)

[14.4.1 Optical pick-up tilt adjustment](#)

[TOP](#) [PREVIOUS](#) [NEXT](#)

14.4.1 Optical pick-up tilt adjustment

[TOP](#) [PREVIOUS](#) [NEXT](#)

Measurement point	Adjustment point	Mode	Disc
	Tangential adjustment screw Tilt adjustment screw	T1 (inner periphery) play T43 (outer periphery) play	DVDT-S15 or DVDT-S01
Measurement equipment		Adjustment value	
None (Use the LCD indication on the unit.)		Adjust the jitter value to the minimum level.	

14.4.1.1 Preparation for adjustment

Follow the (Step 1) - (Step 7) of item 15.1. in “Operation Checks and Disassembly Procedures”.

1. Remove the rear panel and stand ass’y.
2. Connect the system cable to jack (JK700), and then to supply the power.

14.4.1.2 Adjustment procedures

1. In STOP mode (no disc), while pressing
 - button on the unit, press “5” button on the remote control.
2. Confirm that “xxx-yyy-zz” is shown on the display of the unit.

For your reference:

“yyy” and “zz” shown to the right have nothing to do with jitter value. “yyy” is the error counter, while “zz” is the focus drive value.

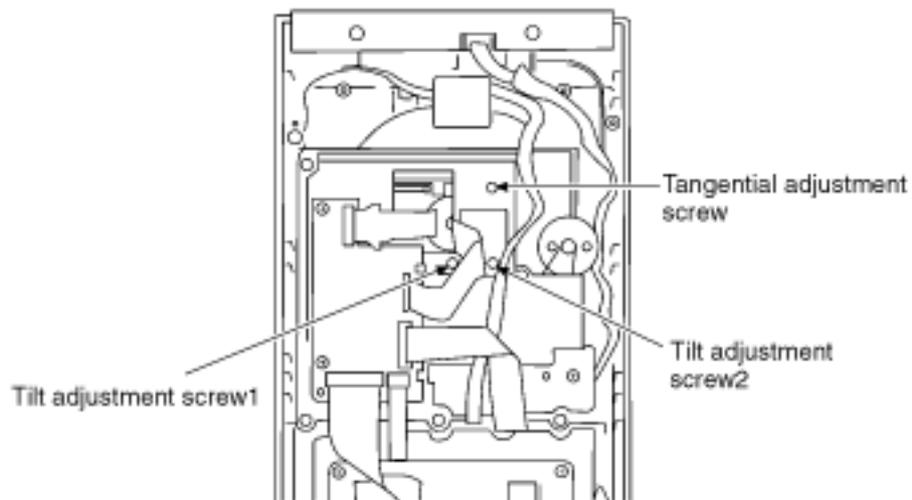

Note:

Jitter value appears on the display of the unit.

3. Play test disc T1 (inner periphery).
4. Adjust tangential adjustment screw so that the jitter value is minimized. Refer to [Fig. 14-1](#).
5. Play test disc T43 (outer periphery).

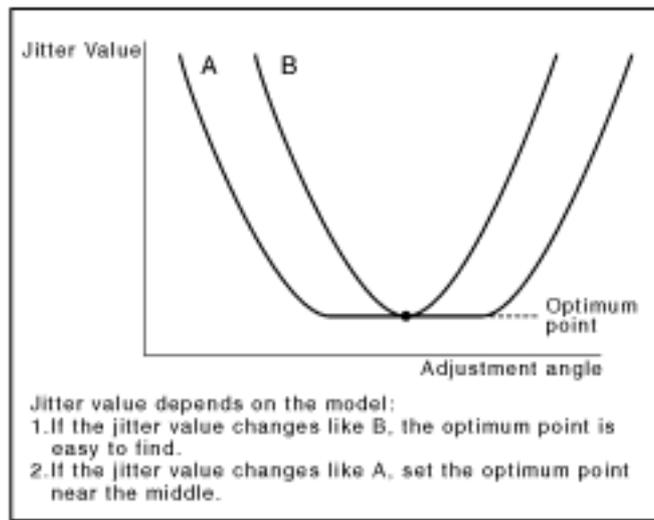

6. Adjust tilt adjustment screw1 so that the jitter value is minimized. Refer to [Fig. 14-1](#).
7. Play test disc T43 (outer periphery).
8. Adjust tilt adjustment screw2 so that the jitter value is minimized. Refer to [Fig. 14-1](#).
9. Repeat adjusting tilt adjustment screw1 and 2 alternately until the jitter value is minimized.

Fig. 14-1.

14.4.1.3 Important point

1. Make tangential adjustment first, and then make tilt adjustment.
2. Repeat adjusting two or three times to find the optimum point.
3. Finish the procedure with tilt adjustment.

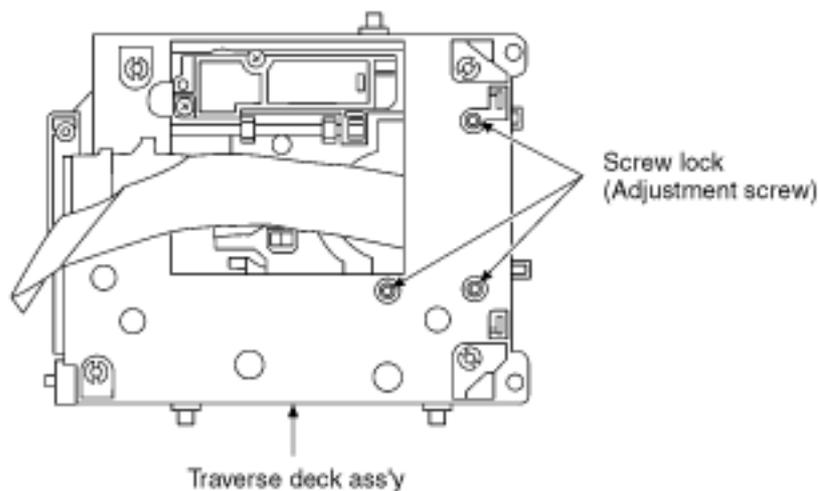

14.4.1.4 Check after adjustment

Play test disc or any other disc to make sure there is no picture degradation in the inner, middle and outer peripheries, and no audio skipping. After adjustment is finished, lock each adjustment screws in position using screw lock.

14.4.1.5 Procedure for screw lock

After the adjustment is performed, fix each adjustment screws with screw lock. Refer to [Fig. 14-2](#).

Fig. 14-2.

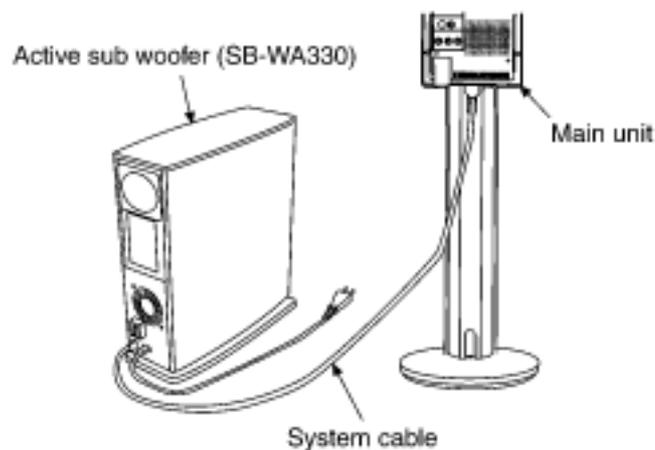

15 Operation Checks and Disassembly Procedures

[TOP](#) [PREVIOUS](#) [NEXT](#)

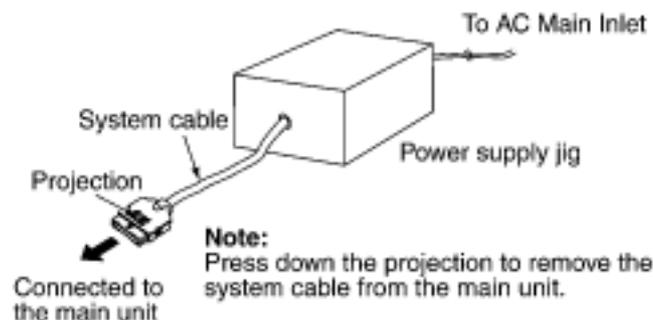

- This section describes procedures for checking the operation of the major printed circuit boards and replacing the main components.
- For reassembly after operation checks or replacement, reverse the respective procedures. Special reassembly procedures are described only when required.

[To supply power source to main unit]

This unit is received power supply from Active sub woofer (SB-WA330). When this unit is performed the operation checks (or checking the P.C.B.), this unit has to connect to Active sub woofer.

When Active sub woofer is not prepared, use the power supply jig to check this unit as shown below.

[15.5 Disassembly for loading unit](#)

[15.6 Replacement for the motor](#)

[15.7 Replacement for the interface P.C.B., detecting SW P.C.B., motor pulley, intermediate gear, gear \(A\) and drive rack](#)

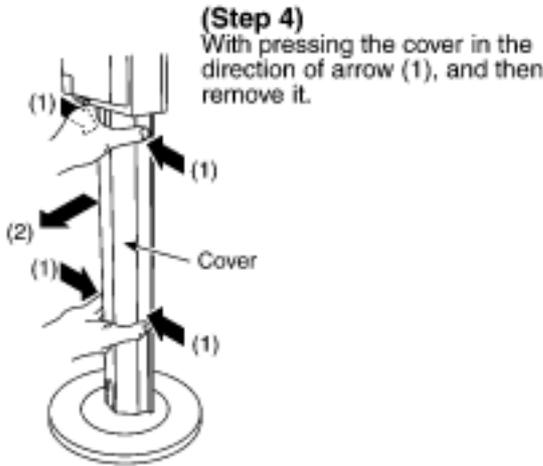

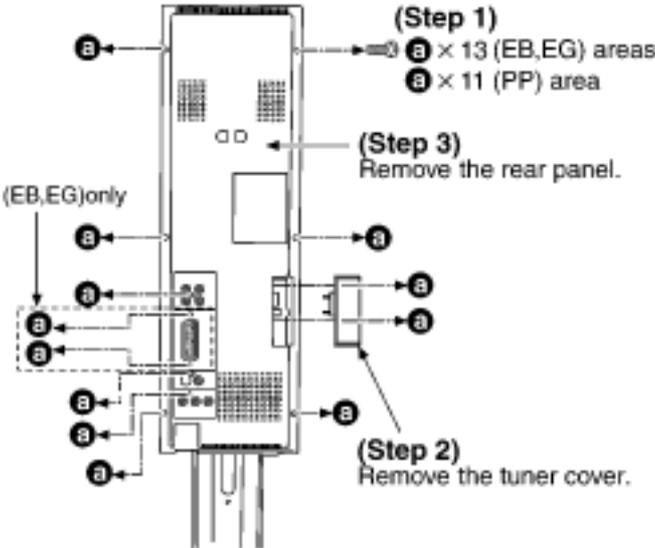

[15.8 Replacement for the lid ass'y](#)

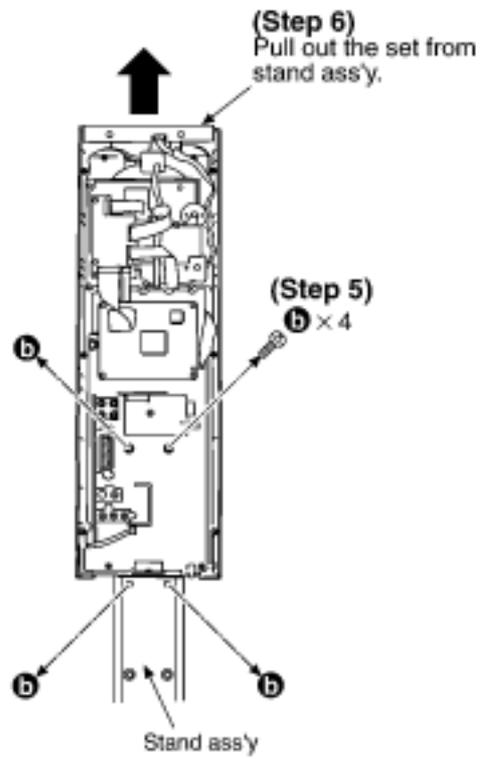

[15.9 Replacement for the 8cm holder, lid cover, metal, magnet and magnet holder](#)

[TOP](#) [PREVIOUS](#) [NEXT](#)

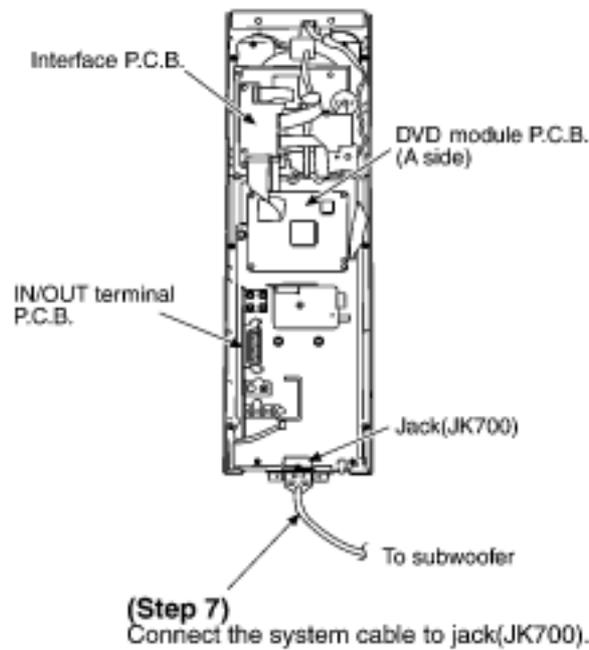

15.1 Checking for the DVD module P.C.B., IN/OUT terminal P.C.B., Interface P.C.B., FL P.C.B. and main P.C.B.

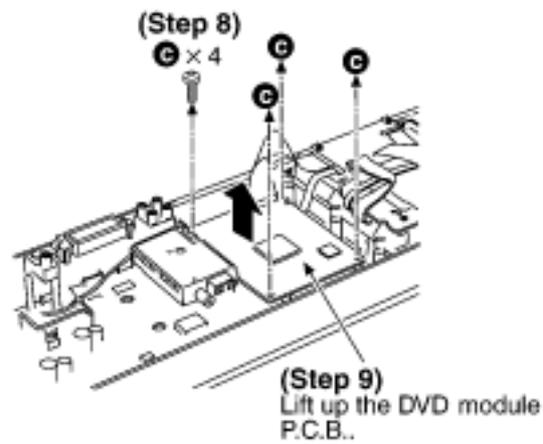

[TOP](#) [PREVIOUS](#) [NEXT](#)

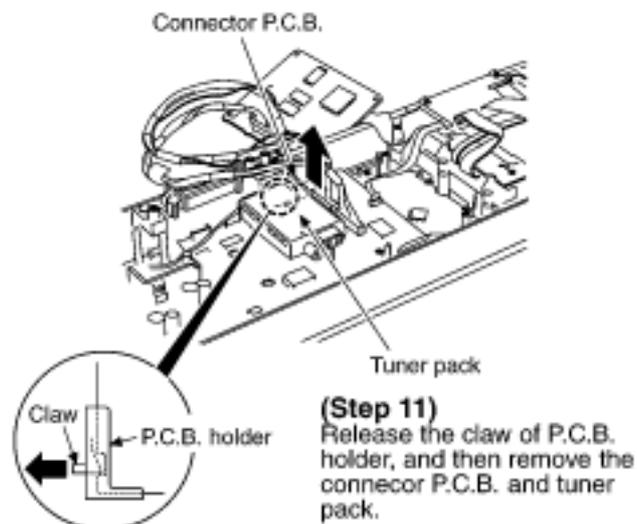

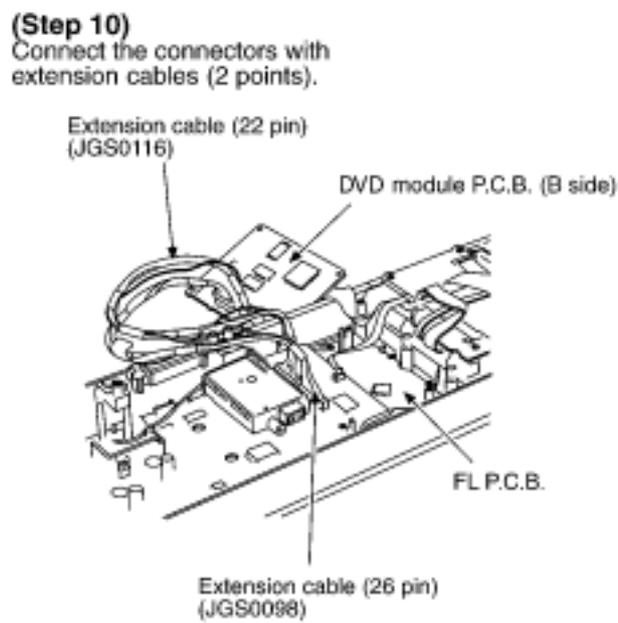

- Check the DVD module P.C.B. (A side), IN/OUT terminal P.C.B. and interface P.C.B. as shown below.

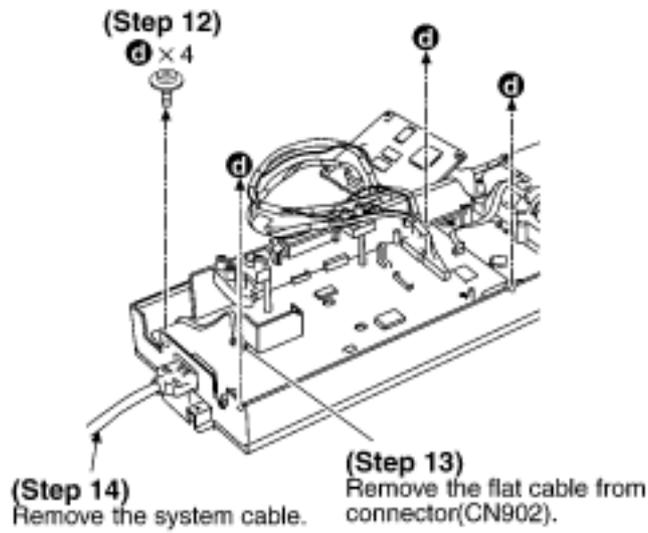

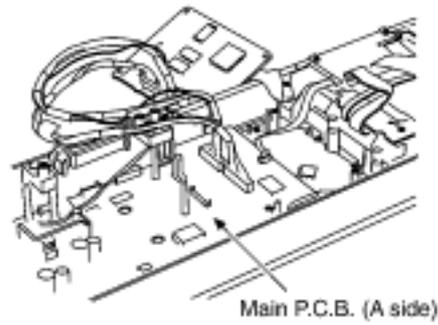

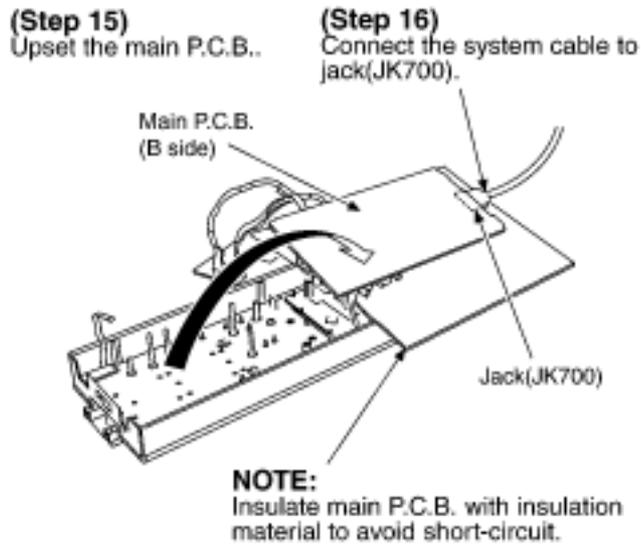

- Check the DVD module P.C.B. (B side) and FL P.C.B. as shown below.

- Check the main P.C.B. (A side) as shown below.

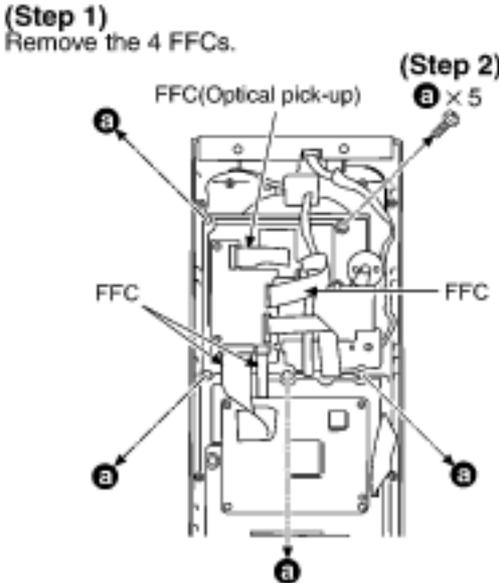

- Check the main P.C.B. (B side) as shown below.

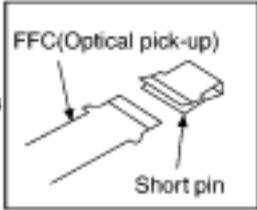

15.2 Replacement for the traverse unit

[TOP](#) [PREVIOUS](#) [NEXT](#)

- Follow the (Step 1) - (Step 6) of item 15.1.

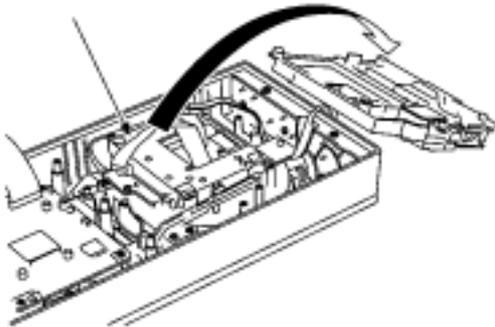

Caution:
Insert short pin into the traverse unit FFC.
(Refer to "Handling Precautions for Traverse Deck".)

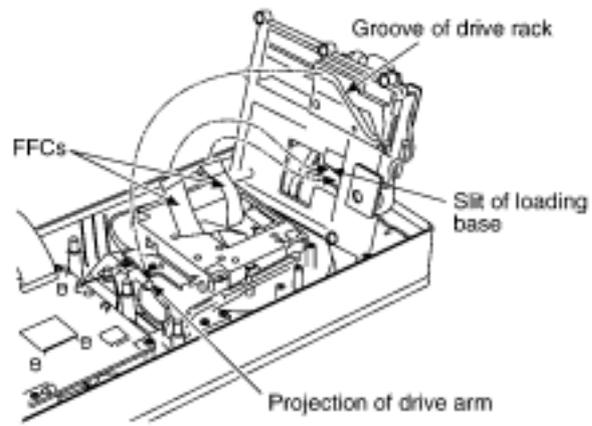

(Step 3)
Move the loading unit in the direction of arrow.

(Step 4)
Remove the traverse unit.

Notice for loading unit installation

1. Align the groove of drive rack with the projection of drive arm.
2. Pass the 2 FFCs through the slit of loading base.

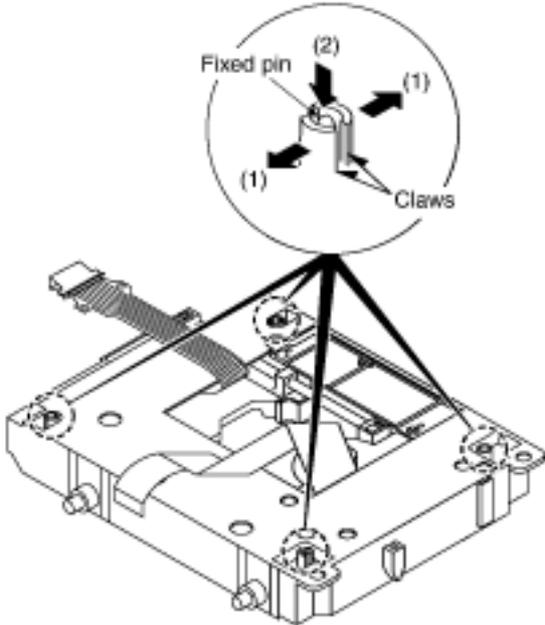

[TOP](#) [PREVIOUS](#) [NEXT](#)

15.3 Replacement for the optical pick-up

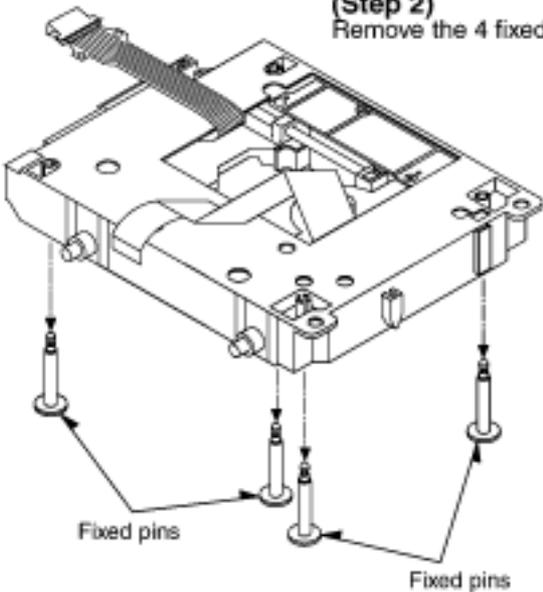

[TOP](#) [PREVIOUS](#) [NEXT](#)

- Follow the (Step 1) - (Step 6) of item 15.1.
- Follow the (Step 1) - (Step 4) of item 15.2.

(Step 1)
Release the 2 claws, and then push the fixed pin in the direction of arrow.

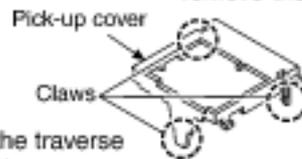

(Step 2)
Remove the 4 fixed pins.

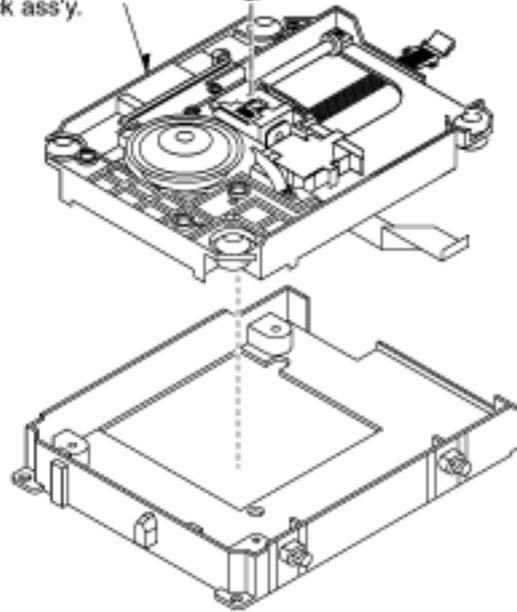

(Step 4)

Release the 3 claws, and then remove the pick-up cover.

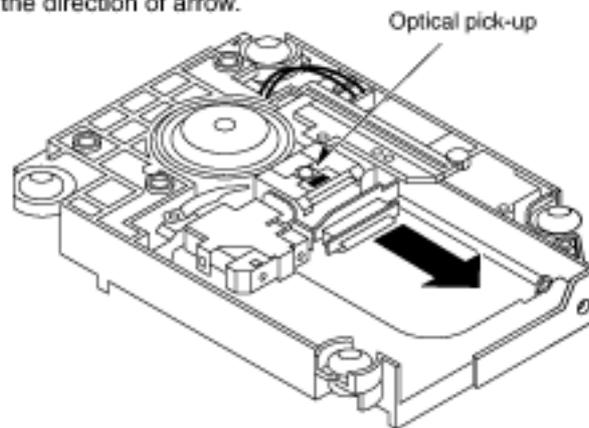

(Step 3)

Remove the traverse deck ass'y.

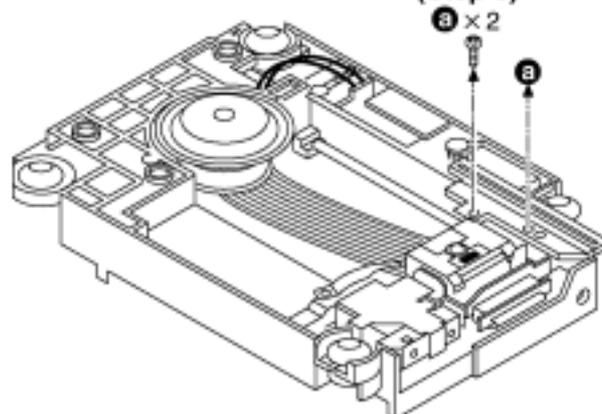

(Step 5)

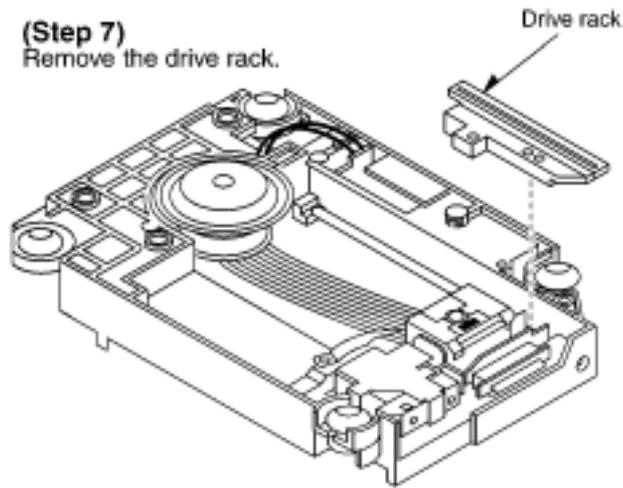

Move the optical pick-up in the direction of arrow.

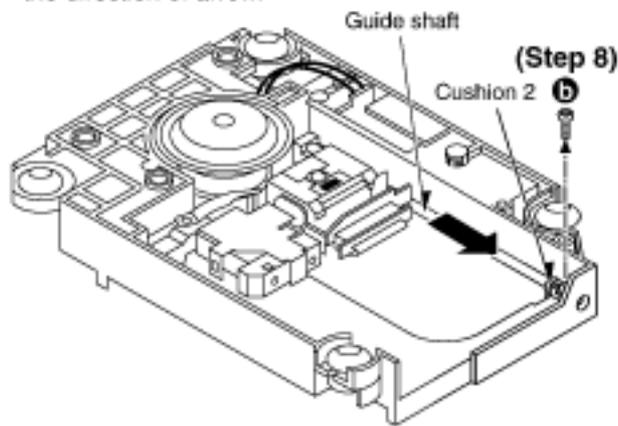

(Step 6)

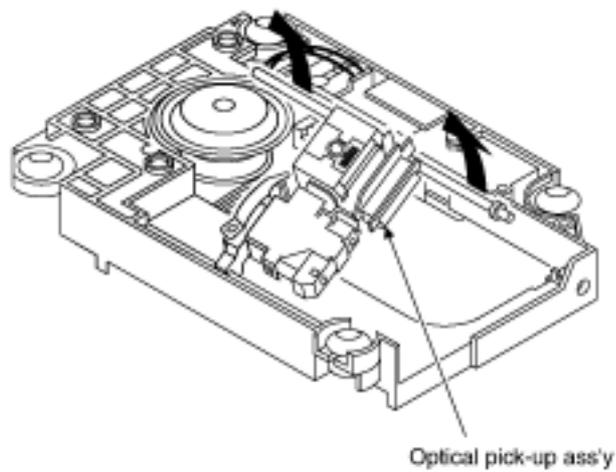

(Step 7)
Remove the drive rack.

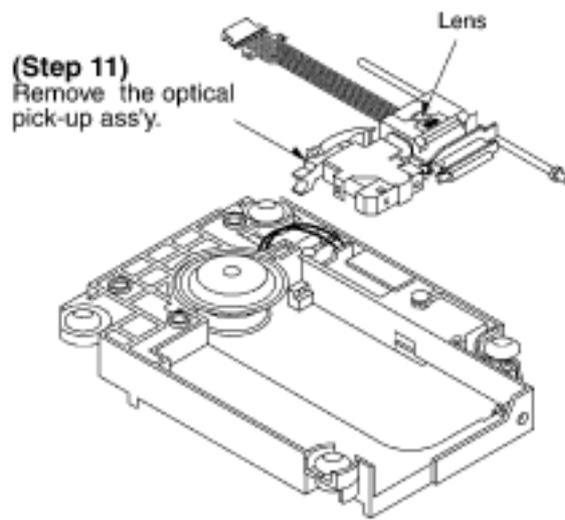

(Step 9)
Move the guide shaft in the direction of arrow.

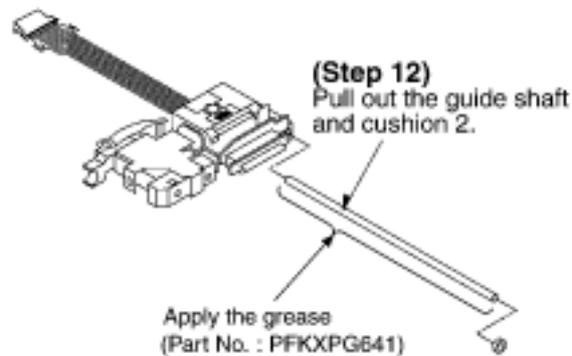

(Step 10)
Lift up the optical pick-up ass'y.

NOTE:

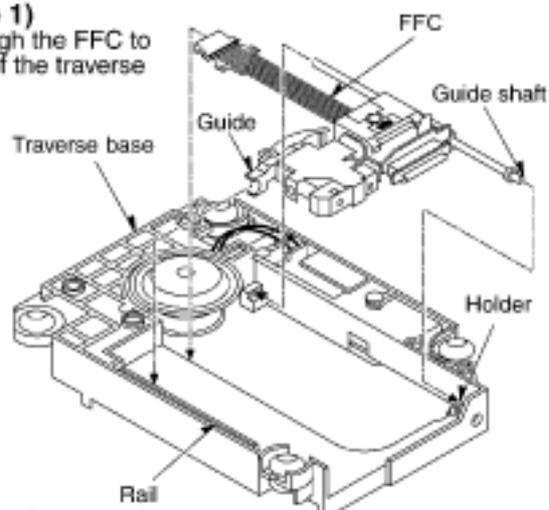

1. Use care to prevent damage the optical pick-up, due to the precision construction.
2. Do not touch the lens of the optical pick-up.

Installation of the optical pick-up ass'y

(Step 1)

Through the FFC to hole of the traverse base.

(Step 2)

Put on the guide of optical pick-up to the rail.

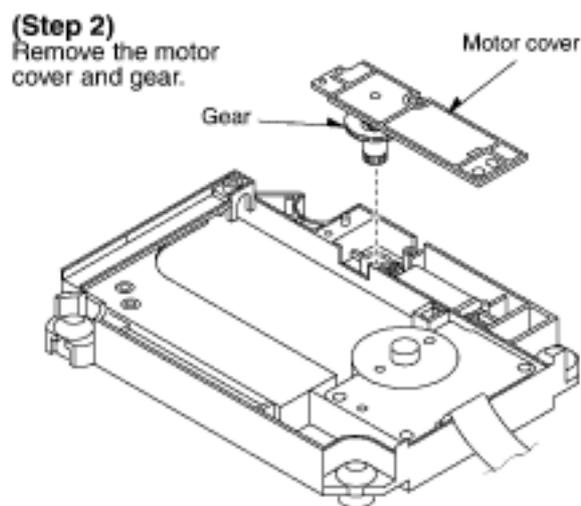

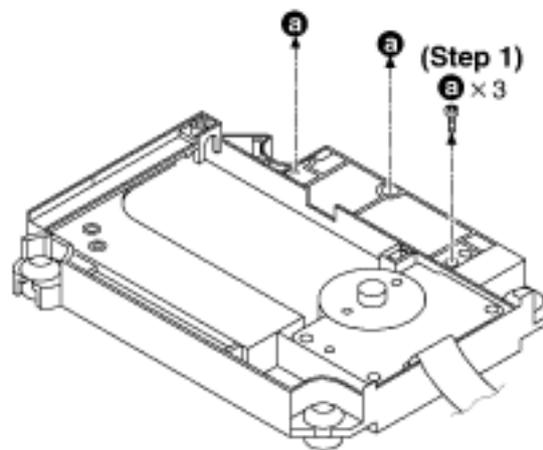

(Step 3)

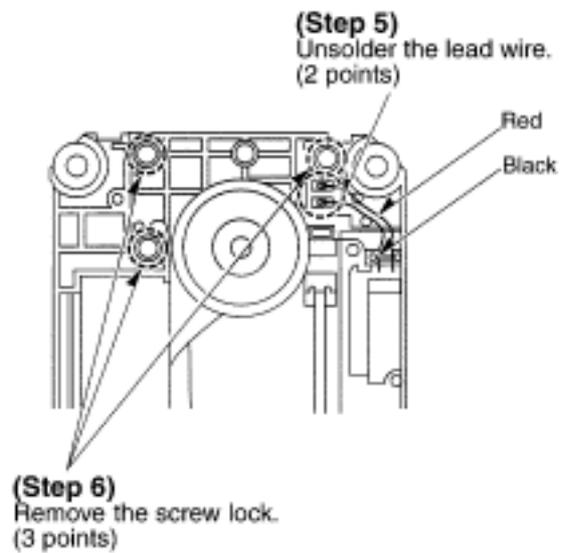

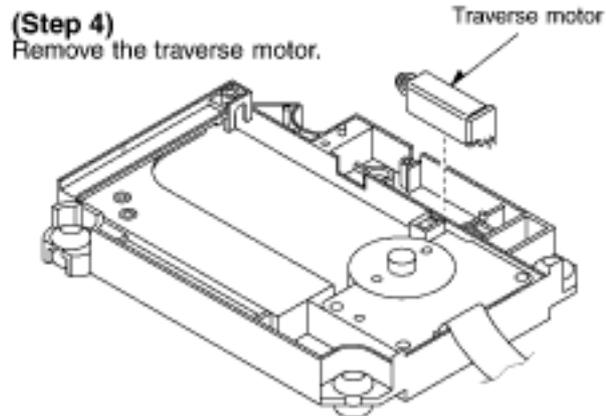

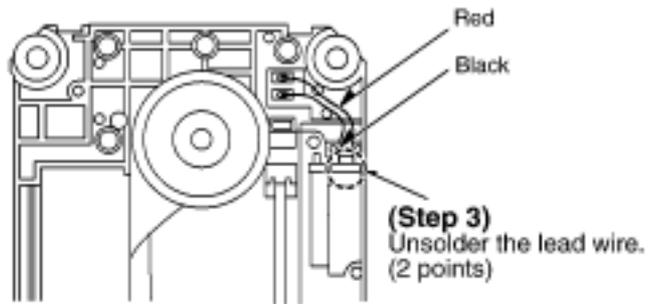

Install the guide shaft to the holder.

15.4 Replacement for the traverse motor and spindle motor

[TOP](#) [PREVIOUS](#) [NEXT](#)

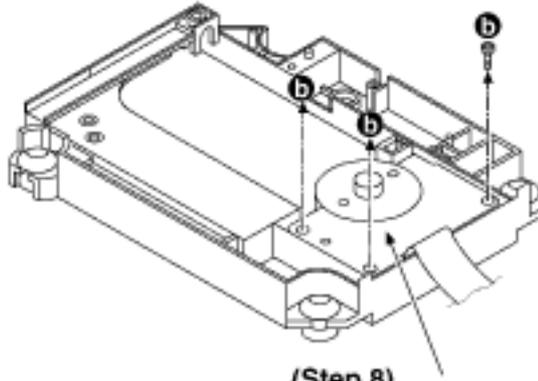

- Follow the (Step 1) - (Step 6) of item 15.1.
- Follow the (Step 1) - (Step 4) of item 15.2.
- Follow the (Step 1) - (Step 11) of item 15.3.

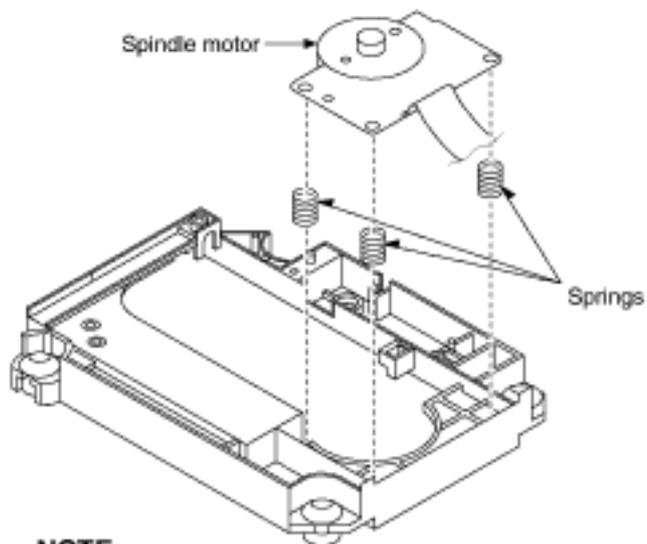

(Step 7)

Remove the screws (b) × 3 with minus screwdriver (1.8 mm).

(Step 8)

Remove the spindle motor.

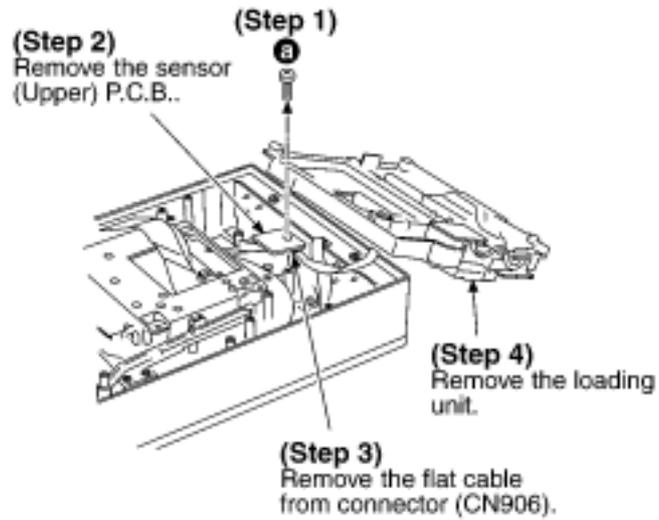

NOTE:

Be careful not to lose the 3 springs because those will also be removed on removal of the spindle motor.

15.5 Disassembly for loading unit

[TOP](#) [PREVIOUS](#) [NEXT](#)

- Follow the (Step 1) - (Step 6) of item 15.1.
- Follow the (Step 1) - (Step 3) of item 15.2.

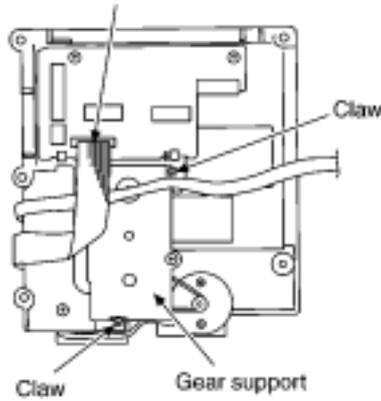

[TOP](#) [PREVIOUS](#) [NEXT](#)

15.6 Replacement for the motor

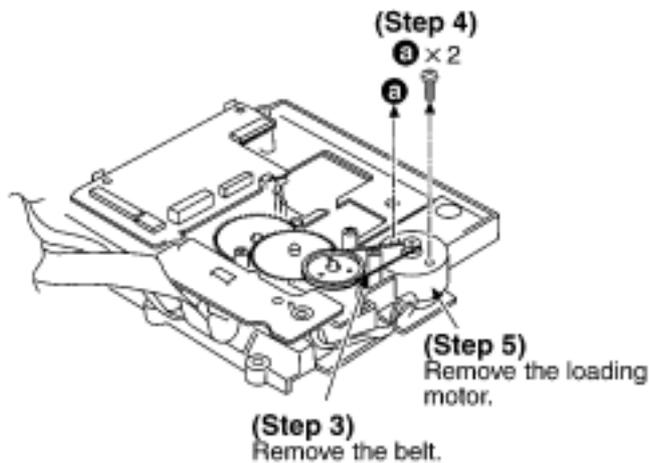

[TOP](#) [PREVIOUS](#) [NEXT](#)

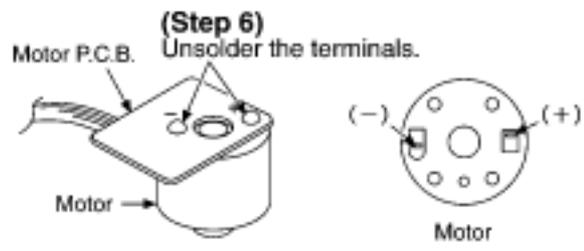

- Follow the (Step 1) - (Step 6) of item 15.1.
- Follow the (Step 1) - (Step 3) of item 15.2.
- Follow the (Step 1) - (Step 4) of item 15.5.

(Step 1)
Remove the flat cable from connector (CN2501).

(Step 2)
Remove the 2 claws, and then remove the gear support.

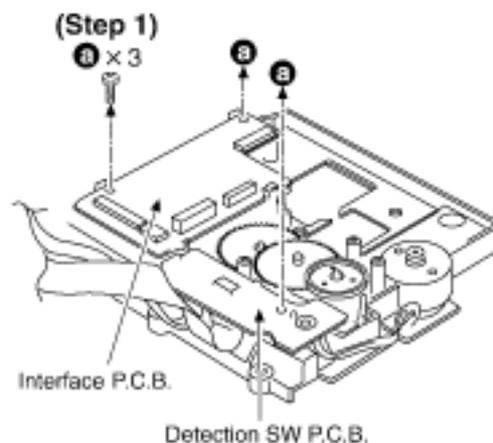

[TOP](#) [PREVIOUS](#) [NEXT](#)

15.7 Replacement for the interface P.C.B., detecting SW P.C.B., motor pulley, intermediate gear, gear (A) and drive rack

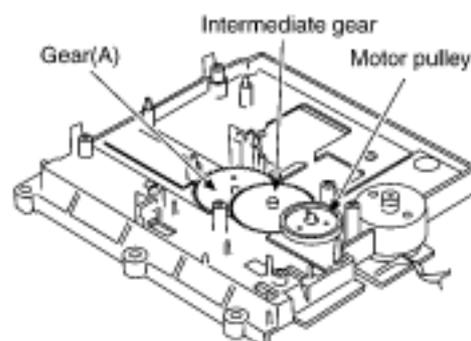

[TOP](#) [PREVIOUS](#) [NEXT](#)

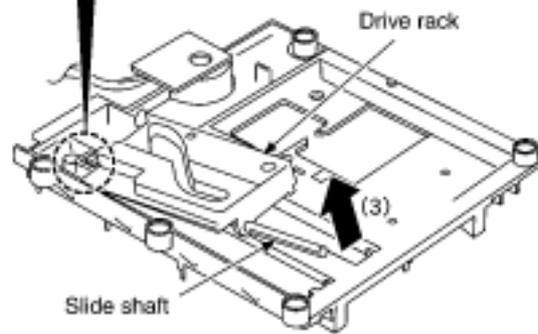

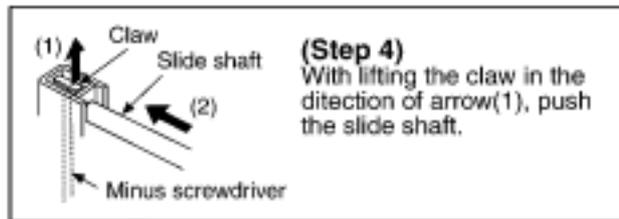

- Follow the (Step 1) - (Step 6) of item 15.1.
- Follow the (Step 1) - (Step 3) of item 15.2.
- Follow the (Step 1) - (Step 4) of item 15.5.
- Follow the (Step 1) - (Step 3) of item 15.6.

(Step 2)
Remove the interface P.C.B. and detection SW P.C.B..

(Step 3)
Remove the motor pulley, intermediate gear and gear(A).

(Step 5)
Lift up the slide shaft, and then remove the drive rack and slide shaft.

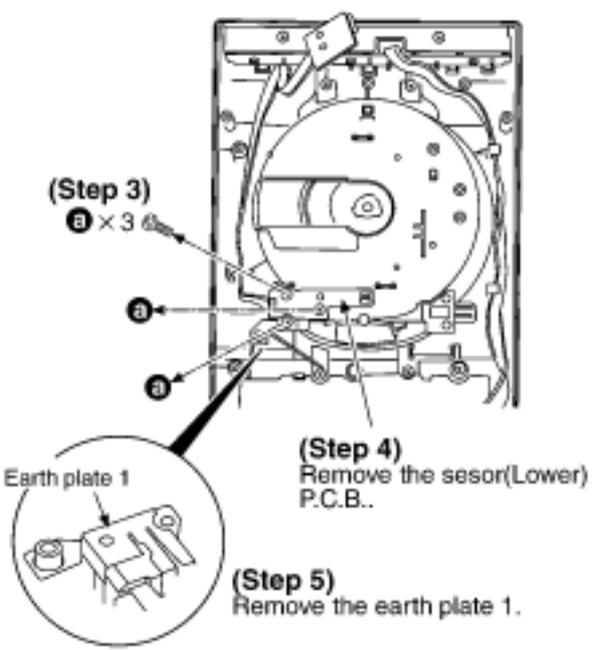

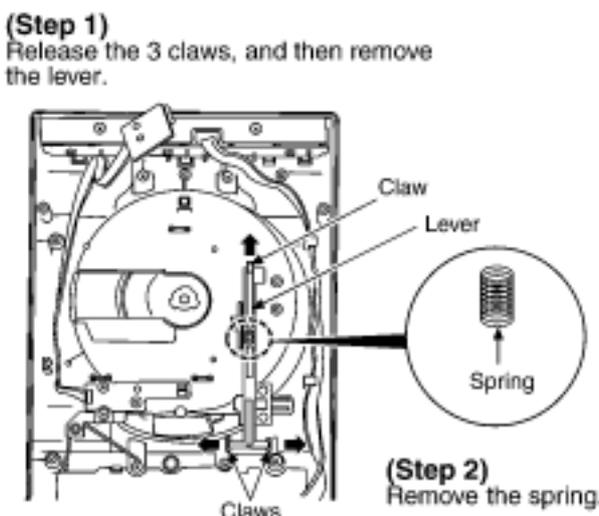

NOTE:
Be careful not to break it that push the claw strongly.

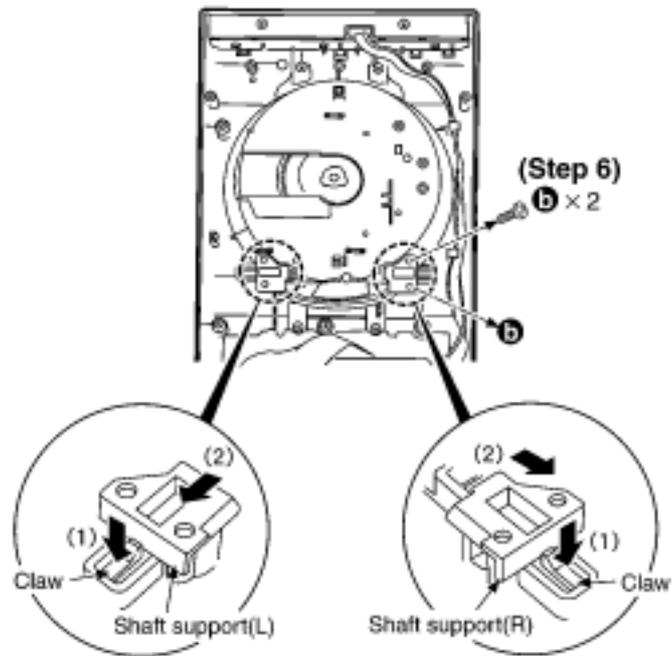

[TOP](#) [PREVIOUS](#) [NEXT](#)

15.8 Replacement for the lid ass'y

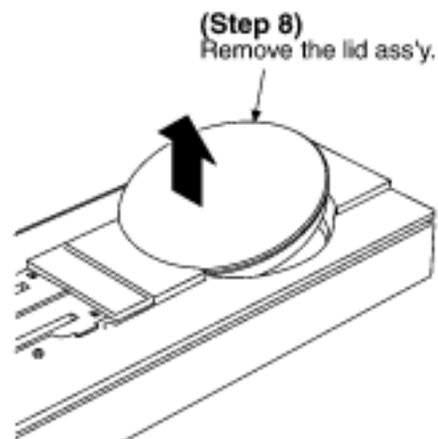

[TOP](#) [PREVIOUS](#) [NEXT](#)

- Follow the (Step 1) - (Step 6) of item 15.1.
- Follow the (Step 1) - (Step 4) of item 15.2.

(Step 7)
With pressing the claw in the direction of arrow (1), slide the shaft support (L),(R) in the direction of arrow (2).

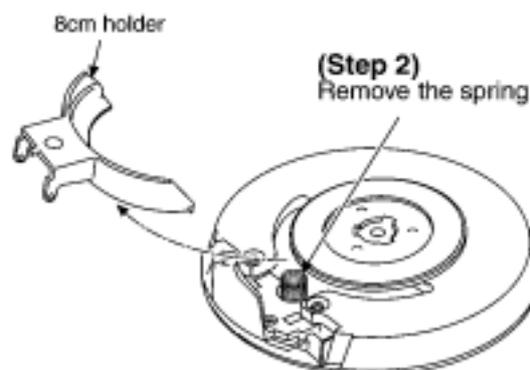

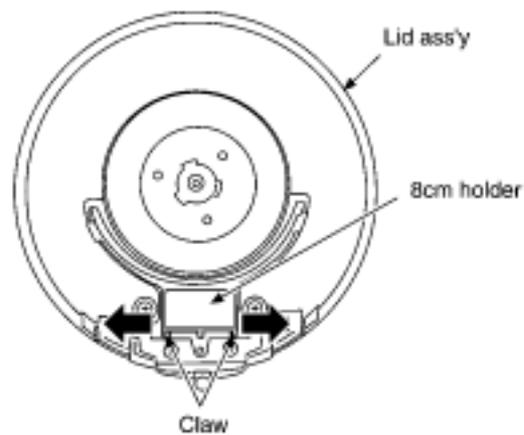

15.9 Replacement for the 8cm holder, lid cover, metal, magnet and magnet holder

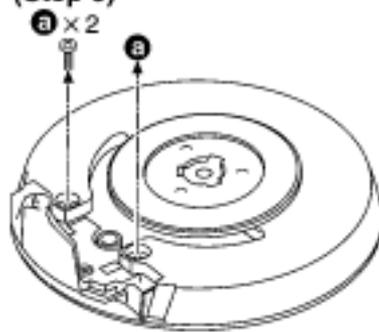

[TOP](#) [PREVIOUS](#) [NEXT](#)

- Follow the (Step 1) - (Step 6) of item 15.1.
- Follow the (Step 1) - (Step 4) of item 15.2.
- Follow the (Step 1) - (Step 8) of item 15.8.

(Step 1)
Release the 2 claws, and then remove the 8cm holder.

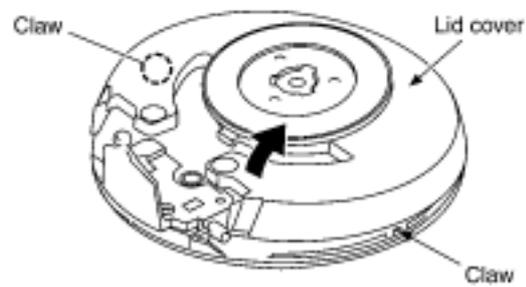

(Step 3)

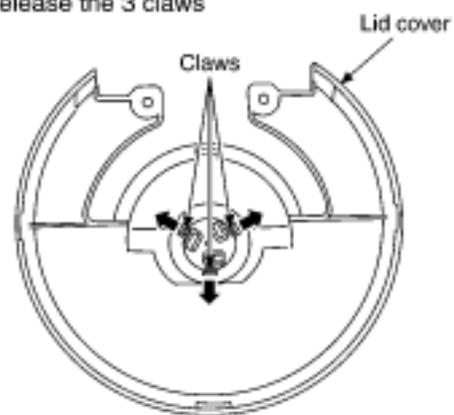

(Step 4)

Release the 2 claws, and then remove the lid cover.

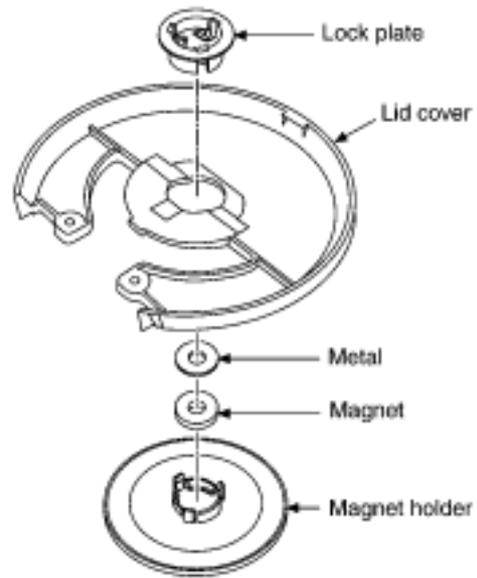

(Step 5)

Release the 3 claws

(Step 6)
The parts illustrated
below will be free.

- Indicated voltage values are the standard values for the unit measured by the DC electronic circuit tester (high-impedance) with the chassis taken as standard. Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester.

- No mark

: DVD/CD stop

- ()

: DVD/CD play

- Important safety notice:

Components identified by  mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

- The supply part number is described alone in the replacement parts list.

Caution!

IC and LSI are sensitive to static electricity.

Secondary trouble can be prevented by taking care during repair.

Cover the parts boxes made of plastics with aluminum foil.

Ground the soldering iron.

Put a conductive mat on the work table.

Do not touch the legs of IC or LSI with the fingers directly.

24 Replacement Parts List

[TOP](#) [PREVIOUS](#) [NEXT](#)

Notes:

- Important safety notice:

Components identified by  mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacture's specified parts shown in the parts list.

- The parenthesized indications in Remarks columns specify the areas.

(PP): SA-ST1PP

(EB): SA-ST1EB

(EG): SA-ST1EG

- The marking [RTL] indicates the retention time is limited for this item. After the discontinuation of this assembly in production, it will no longer be available.
- All parts are supplied by SPC.

1 Speakers

Subwoofer

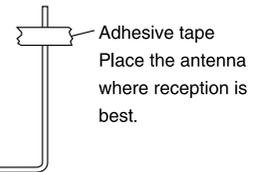

3 AM loop antenna

Stand the antenna up on its base.
Keep loose antenna cord away from other wires and cords.

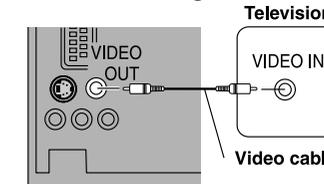

4 FM indoor antenna

Adhesive tape
Place the antenna where reception is best.

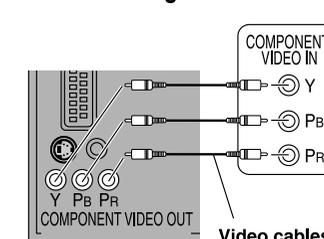

5 Connection to your television

■ Connecting a television using the VIDEO IN terminal

Connect directly to your television.
Do not connect the unit through a video cassette recorder, because the picture may not be played correctly due to the copy guard.

■ Connecting a television using the COMPONENT VIDEO IN terminals

COMPONENT VIDEO OUT terminals
These terminals can be used for either interlace or progressive output and provide a purer picture than the S VIDEO OUT terminal and SCART (AV) terminal. Connection using these terminals outputs the color difference signals (Pb/Pr) and luminance signal (Y) separately in order to achieve high fidelity in reproducing colors.

- The description of the component video input terminals depends on the television or monitor (e.g. Y/Pb/Pr, Y/B-Y/R-Y, Y/Cb/CR). Connect to terminals of the same color.

For SA-ST1PP only

- After making this connection, change the black level for a better picture.

To enjoy progressive video

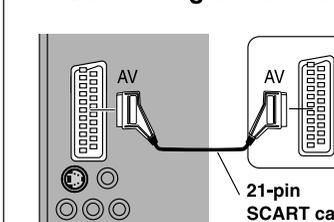

- Connect to the component video (480P) input terminals on a television compatible with this unit's copy guard system. (Video will not be displayed correctly if connected to an incompatible television.)

For SA-ST1PP only

- Press [PROGRESSIVE OUT] on the main unit so "PROGRESSIVE" appears on the display.
- All televisions manufactured by Panasonic and that have 480P input connectors are compatible. Consult the manufacturer if you have another brand of television.

Except for SA-ST1PP

■ Connecting a television using the SCART (AV) terminal

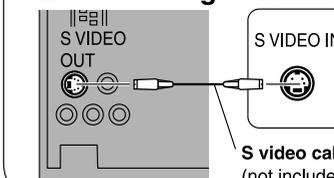

SCART (AV) terminal
To improve picture quality, you can change the video signal output from the SCART (AV) terminal from "Video" to either "S-Video" or "RGB" to suit the type of television you are using.

- An audio cable connection from the main unit to the television is not necessary as the television's audio signal is also transmitted when connected with a SCART (AV) cable.

Note

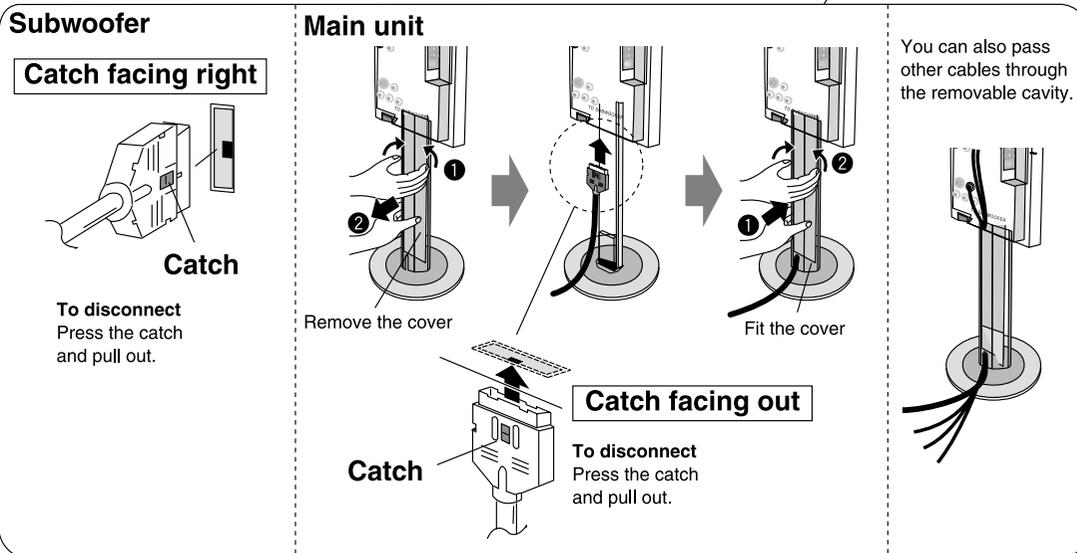

The SCART (AV) cable connector may not fit into place as intended because the video cables or S VIDEO cable are in the way.
Remove either the video cable or S VIDEO cable if there is a problem with video quality because of problems connecting to the terminals properly.

■ Connecting a television using the S VIDEO IN terminal

S VIDEO OUT terminal
The S VIDEO OUT terminal achieves a more vivid picture than the VIDEO OUT terminal by separating the chrominance (C) and luminance (Y) signals. (Actual results depend on the television.)

2 System cable

SC-ST1EB only

BE SURE TO READ THE CAUTION FOR THE AC MAINS LEAD BEFORE CONNECTION.

6 AC mains lead

Connect the AC mains lead after all other connections are complete.

Conserving power

The unit consumes power (approx. 0.5 W <SC-ST1PP>/ 0.7 W <Except for SC-ST1PP>) even when it is turned off with [POWER OFF] (SA-ST1PP)/ [OFF] (Except for SA-ST1PP). To save power when the unit is not to be used for long time, unplug it from the household mains socket. Remember to reset the radio stations and any other memory items before using the unit again.
Information you enter into the unit's memory remains intact for up to 2 weeks after the AC mains lead is disconnected.

To household mains socket

Optional antenna connections

Use outdoor antennas if radio reception is poor.

Note

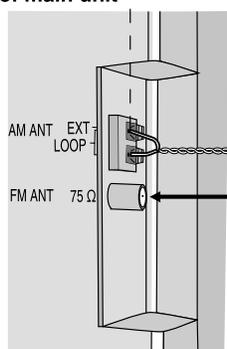

Disconnect the antenna when the unit is not in use.
Do not use the outdoor antenna during an electrical storm.

AM outdoor antenna (Using a vinyl wire)

Run a piece of vinyl wire horizontally across a window or other convenient location.

5–12 m (16–39 feet)

Rear of main unit

Leave the loop antenna connected.

FM outdoor antenna

- Disconnect the FM indoor antenna.
- The antenna should be installed by a competent technician. Rework your outdoor antenna's 75 Ω coaxial cable as follows.

Except for SA-ST1PP

To antenna

For SA-ST1EB only

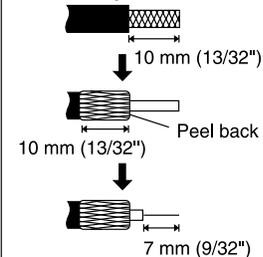

Connect the antenna plug adaptor (included)

For SA-ST1PP

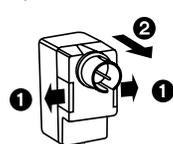

Antenna plug (included)

75 Ω coaxial cable (not included)

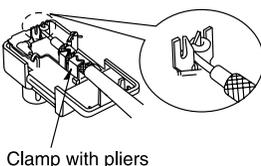

① Remove a piece of the outer vinyl insulator.

② Carefully pull the tabs apart to remove the cover.

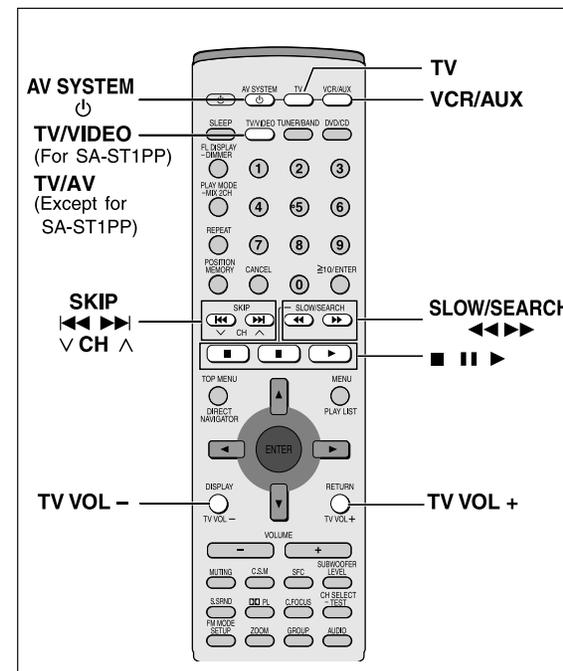

③ Install the coaxial cable. Clamp the cable conductor, and wind it on so that it does not contact anything else.

④ Attach the cover.

Operating a television or video cassette recorder

You can use the remote control to operate a Panasonic television or a video cassette recorder. (Some models cannot be operated by this remote control.)

Operating a television

Preparation

- Face the remote control at this unit and press [TV]. The button lights and "TV" appears on the unit's display. You can now operate the television.
- Face the remote control at the television for the following operations.

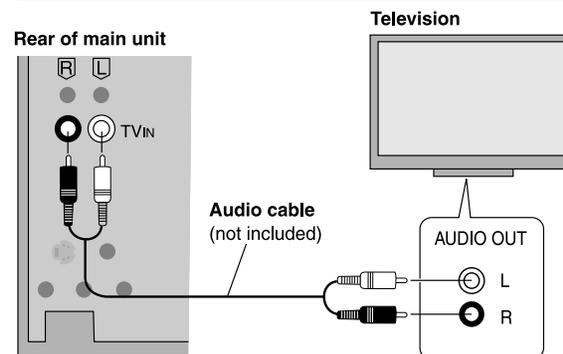

■ **Turning the television on/off**
Press [⏻, AV SYSTEM].

■ **Switching the television's video input mode**
Press [TV/VIDEO] (For SA-ST1PP)
Press [TV/AV] (Except for SA-ST1PP).

■ **Changing channels**
Press [◀◀, √ CH] or [▶▶, CH ▲].

■ **Adjusting the volume**
Press [TV VOL -] or [TV VOL +].

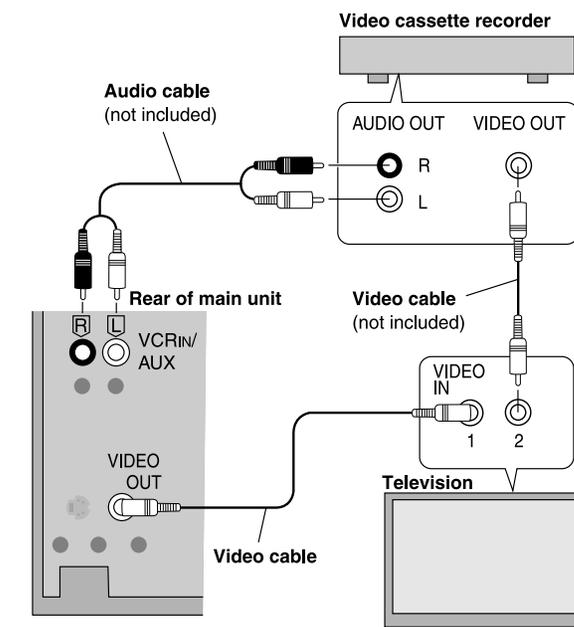

Playing the television through this unit's speakers

Reduce the volume on the television to minimum and control the volume on this unit.

Operating a video cassette recorder

Connection example

Preparation

- Face the remote control at this unit and press [VCR/AUX]. The button lights and "VCR/AUX" appears on the unit's display. You can operate the video cassette recorder.
- Change the video input mode on the television ("VIDEO 2" in the example).
- Face the remote control at the video cassette recorder for the following operations.

■ **Turning the video cassette recorder on/off**
Press [⏻, AV SYSTEM].

■ **Play, pause and stop**
Press [▶], [⏸] or [■].

■ **Fast forward and rewind**
Press [◀◀] or [▶▶].

You can connect a laser disc or record player instead of a video cassette recorder.

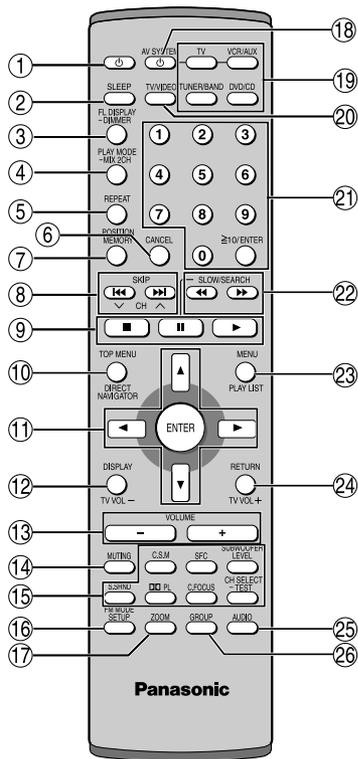

Connect as shown above and select "VCR/AUX" as the source.

When connecting a record player

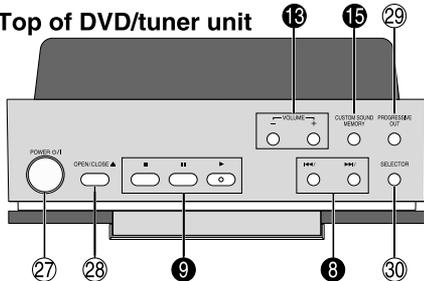

We recommend using a record player with a built-in phono equalizer.

If your player doesn't have a built-in equalizer, connect it first to a separate equalizer and then connect that to this unit.

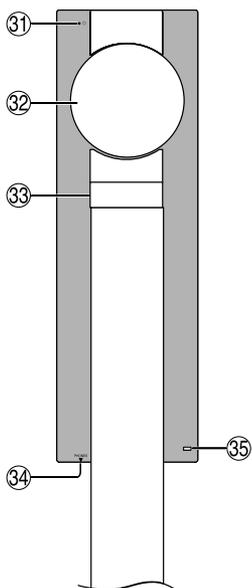

• The illustration shows SA-ST1PP.
