## ⚠ WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

## IMPORTANT SAFETY NOTICE

There are special components used in this equipment which are important for safety. These parts are marked by  $\triangle$  in the Schematic Diagrams, Circuit Board Diagrams, Exploded Views and Replacement Parts List. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire or other hazards. Do not modify the original design without permission of manufacturer.

# 1 Safety Precautions

## 1.1. General Guidelines

### 1. IMPORTANT SAFETY NOTICE

There are special components used in this equipment which are important for safety. These parts are marked by  $\Delta$  in the Schematic Diagrams, Circuit Board Layout, Exploded Views and Replacement Parts List. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent X-RADIATION, shock, fire, or other hazards. Do not modify the original design without permission of manufacturer.

2. An Isolation Transformer should always be used during the servicing of AC Adaptor whose chassis is not isolated from the AC power line. Use a transformer of adequate power rating as this protects the technician from accidents resulting in personal injury from electrical shocks. It will also protect AC Adaptor from being damaged by accidental shorting that may occur during servicing.
3. When servicing, observe the original lead dress. If a short circuit is found, replace all parts which have been overheated or damaged by the short circuit.
4. After servicing, see to it that all the protective devices such as insulation barriers, insulation papers shields are properly installed.
5. After servicing, make the following leakage current checks to prevent the customer from being exposed to shock hazards.

### 1.1.1. Leakage Current Cold Check

1. Unplug the AC cord and connect a jumper between the two prongs on the plug.
2. Using an ohmmeter measure the resistance value, between the jumpered AC plug and each exposed metallic cabinet part on the equipment such as screwheads, connectors, control shafts, etc. When the exposed metallic part has a return path to the chassis, the reading should be between  $1M\Omega$  and  $5.2\Omega$ . When the exposed metal does not have a return path to the chassis, the reading must be  $\infty$ .

### 1.1.2. Leakage Current Hot Check

1. Plug the AC cord directly into the AC outlet. Do not use an isolation transformer for this check.
2. Connect a  $1.5k\Omega$ , 10 watts resistor, in parallel with a  $0.15\mu F$  capacitors, between each exposed metallic part on the set and a good earth ground such as a water pipe, as shown in Figure 1-1.
3. Use an AC voltmeter, with 1000 ohms/volt or more sensitivity, to measure the potential across the resistor.
4. Check each exposed metallic part, and measure the voltage at each point.
5. Reverse the AC plug in the AC outlet and repeat each of the above measurements.
6. The potential at any point should not exceed 0.75 volts RMS. A leakage current tester (Simpson Model 229 or equivalent) may be used to make the hot checks, leakage current must not exceed 1/2 milliamp. Should the measurement is outside of the limits specified, there is a possibility of a shock hazard, and the equipment should be repaired and re-checked before it is returned to the customer.

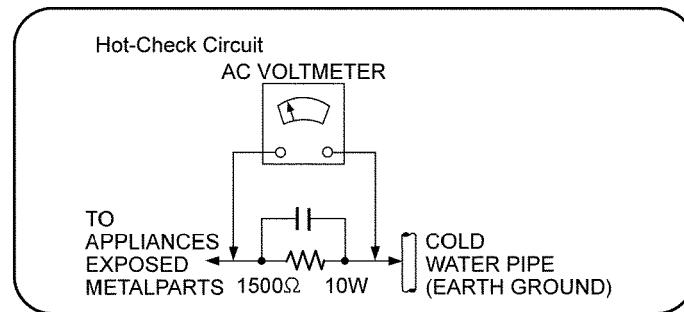

Figure 1-1

## 1.2. Before Repair and Adjustment

### Main Unit (SU-HTB770)

Disconnect AC power, discharge unit AC Capacitors (C5700, C5701, C5702, C5703, C5704 and C5705) through a 10W, 1W resistor to ground.

Caution : DO NOT SHORT-CIRCUIT DIRECTLY (with a screwdriver blade, for instance), as this may destroy solid state devices.  
After repairs are completed, restore power gradually using a variac, to avoid overcurrent.

- Current consumption at AC 120 V, 60 Hz during power on at no signal with volume minimum, (Selector : CD mode) should be ~150 mA.

### Active Subwoofer (SB-HWA770)

Disconnect AC power, discharge unit AC Capacitors (C5700, C5701, C5702, C5703, C5704 and C5705) through a 10W, 1W resistor to ground.

Caution : DO NOT SHORT-CIRCUIT DIRECTLY (with a screwdriver blade, for instance), as this may destroy solid state devices.  
After repairs are completed, restore power gradually using a variac, to avoid overcurrent.

- Current consumption at AC 120 V, 60 Hz during power on at link with volume minimum, (Selector : BD/DVD mode) should be ~200 mA.

## 1.3. Protection Circuitry

The protection circuitry may have operated if either of the following conditions are noticed:

- No sound is heard when the power is turned on.
- Sound stops during a performance.

The function of this circuitry is to prevent circuitry damage if, for example, the positive and negative speaker connection wires are "shorted", or if speaker systems with an impedance less than the indicated rated impedance of the amplifier are used.

If this occurs, follow the procedure outlines below:

1. Turn off the power.
2. Determine the cause of the problem and correct it.
3. Turn on the power once again after one minute.

Note:

When the protection circuitry functions, the unit will not operate unless the power is first turned off and then on again.

## 1.4. Caution For Fuse Replacement

### 1.4.1. SU-HTB770/SB-HWA770

#### CAUTION:

Replace with the same type fuse:  
(Manufacturer: SKYGATE, Type: SG SCT, F1, T3.15A 250V)

#### ATTENTION:

Utiliser un fusible de recharge de même type:  
(Fabricant: SKYGATE, Type: SG SCT, F1, T3.15A 250V)

## 1.5. Safety Part Information

### Safety Parts List:

There are special components used in this equipment which are important for safety.

These parts are marked by  in the Schematic Diagrams & Replacement Parts List. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire or other hazards. Do not modify the original design without permission of manufacturer.

### 1.5.1. Main Unit (SU-HTB770)

Safety	Ref. No.	Part No.	Part Name & Description	Remarks

## 1.6. Safety Installation Instructions

Professional installation is required.

The installation should never be done by any other than a qualified installation specialist.

PANASONIC DISCLAIMS ANY PROPERTY DAMAGE AND/OR SERIOUS INJURY, INCLUDING DEATH RESULTING FROM IMPROPER INSTALLATION OR INCORRECT HANDLING.

- Be sure to install this unit as indicated within this Owner's manual.

### **WARNING**

Ensure that the installation location is strong enough to support long-term use.

- If its strength becomes insufficient over the course of long-term use, the unit may drop, possibly causing injury.

The installation work should be done by a qualified installation specialist.

- Incorrect installation may cause equipment to fall, and personal injury may result.

Include a safety factor when considering the strength of the proposed installation location.

- If strength is not sufficient the equipment may fall, and personal injury may result.

Do not install in a location that cannot bear the load.

- If the installation location lacks sufficient strength, the equipment may fall.

Do not modify the wall mount brackets.

- Otherwise the unit may fall and become damaged, and personal injury may result.

Install the unit by taking only the steps which are specified in these instructions: Do not install it in any other way.

- Otherwise the unit may drop and become damaged, and personal injury may result.

Do not install on a location other than a vertical wall.

- Otherwise the unit may drop and become damaged, and personal injury may result.

### **CAUTION**

Do not install in any locations subject to humidity, dust, smoke, steam or heat or under an air conditioner where water may drip onto the unit.

- This may have an adverse effect on the unit and cause fire or electric shock.

Leave a clearance between the rear panel and the wall.

- The unit has air ventilation holes at the front and rear. Covering these may result in a fire.

Install the mounting screws and power cable in such a way that they will not make contact with metal objects or wiring inside the wall.

- Electric shocks may result from contact with any metal objects inside the wall.

For installation, use the special-purpose constituent parts.

- Otherwise, the unit may fall off the wall, and personal injury may result.

When removing this unit, remove the wall mounting screws as well.

- Otherwise the mounting screws may get caught and personal injury may result.

To operate this unit safely, install it at an appropriate height.

- Otherwise the unit may fall, and personal injury may result.

Figure 1-2

## 2 Warning

### 2.1. Prevention of Electrostatic Discharge (ESD) to Electrostatically Sensitive (ES) Devices

Some semiconductor (solid state) devices can be damaged easily by static electricity. Such components commonly are called Electrostatically Sensitive (ES) Devices.

Examples of typical ES devices are IC (integrated circuits) and some field-effect transistors and semiconductor "chip" components.

The following techniques should be used to help reduce the incidence of component damage caused by electrostatic discharge (ESD).

1. Immediately before handling any semiconductor component or semiconductor-equipped assembly, drain off any ESD on your body by touching a known earth ground. Alternatively, obtain and wear a commercially available discharging ESD wrist strap, which should be removed for potential shock reasons prior to applying power to the unit under test.
2. After removing an electrical assembly equipped with ES devices, place the assembly on a conductive surface such as aluminum foil, to prevent electrostatic charge buildup or exposure of the assembly.
3. Use only a grounded-tip soldering iron to solder or unsolder ES devices.
4. Use only an anti-static solder removal device. Some solder removal devices not classified as "anti-static (ESD protected)" can generate electrical charge sufficient to damage ES devices.
5. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ES devices.
6. Do not remove a replacement ES device from its protective package until immediately before you are ready to install it. (Most replacement ES devices are packaged with leads electrically shorted together by conductive foam, aluminum foil or comparable conductive material).
7. Immediately before removing the protective material from the leads of a replacement ES device, touch the protective material to the chassis or circuit assembly into which the device will be installed.

**CAUTION:**

Be sure no power is applied to the chassis or circuit, and observe all other safety precautions.

8. Minimize bodily motions when handling unpackaged replacement ES devices. (Otherwise harmless motion such as the brushing together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity (ESD) sufficient to damage an ES device).

#### IMPORTANT SAFETY NOTICE

There are special components used in this equipment which are important for safety. These parts are marked by  in the Schematic Diagrams, Circuit Board Diagrams, Exploded Views and Replacement Parts List. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire or other hazards. Do not modify the original design without permission of manufacturer.

## **2.2. Service caution based on Legal restrictions (Lead Free Solder, (PbF))**

The lead free solder has been used in the mounting process of all electrical components on the printed circuit boards used for this equipment in considering the globally environmental conservation.

The normal solder is the alloy of tin (Sn) and lead (Pb). On the other hand, the lead free solder is the alloy mainly consists of tin (Sn), silver (Ag) and Copper (Cu), and the melting point of the lead free solder is higher approx.30 degrees C (86°F) more than that of the normal solder.

### **Definition of PCB Lead Free Solder being used**

The letter of "PbF" is printed either foil side or components side on the PCB using the lead free solder. (See right figure)	PbF
---	-----

### **Service caution for repair work using Lead Free Solder (PbF)**

- The lead free solder has to be used when repairing the equipment for which the lead free solder is used.  
(Definition: The letter of "PbF" is printed on the PCB using the lead free solder.)
- To put lead free solder, it should be well molten and mixed with the original lead free solder.
- Remove the remaining lead free solder on the PCB cleanly for soldering of the new IC.
- Since the melting point of the lead free solder is higher than that of the normal lead solder, it takes the longer time to melt the lead free solder.
- Use the soldering iron (more than 70W) equipped with the temperature control after setting the temperature at  $350\pm30$  degrees C ( $662\pm86$ °F).

### **Recommended Lead Free Solder (Service Parts Route.)**

- The following 3 types of lead free solder are available through the service parts route.  
RFKZ03D01K-----(0.3mm 100g Reel)  
RFKZ06D01K-----(0.6mm 100g Reel)  
RFKZ10D01K-----(1.0mm 100g Reel)

### **Note**

\* Ingredient: Tin (Sn), 96.5%, Silver (Ag) 3.0%, Copper (Cu) 0.5%, Cobalt (Co) / Germanium (Ge) 0.1 to 0.3%

# 3 Service Navigation

## 3.1. Service Information

This service manual contains technical information which will allow service personnel's to understand and service this model. Please place orders using the parts list and not the drawing reference numbers.

If the circuit is changed or modified, this information will be followed by supplement service manual to be filed with original service manual.

- **Microprocessor :**

The following components are supplied as an assembled part.

- Flash IC, IC2001 (RFKWEHTB770M).

# 4 Specifications

<b>■ Amplifier Section</b>		35 Hz to 160 Hz (-10 dB)
<b>RMS Output Power</b>		Main Unit: 37 W Active subwoofer: 20 W
<b>Front ch (L, R ch)</b>	60 W per channel (6 Ω), 1 kHz, 10% THD	
<b>Center ch (C ch)</b>	60 W per channel (6 Ω), 1 kHz, 10% THD	
<b>Subwoofer ch</b>	120 W per channel (8 Ω), 100 Hz, 10% THD	
<b>Front ch (L, R ch)</b>	60 W per channel (1 kHz, 6 Ω)	
<b>Total RMS Dolby Digital mode power</b>	300 W	
<b>FTC output power</b>		
<b>Front ch (L, R ch)</b>	25 W per channel (6 Ω), 120 Hz to 20 kHz, 1.0% THD	
<b>Center ch (C ch)</b>	25 W per channel (6 Ω), 120 Hz to 20 kHz, 1.0% THD	
<b>Subwoofer ch</b>	40 W per channel (8 Ω), 60 Hz to 120 Hz, 1.0% THD	
<b>Total FTC Dolby Digital mode power</b>	115 W	
<b>■ Wireless section</b>		
<b>Wireless module</b>		
<b>Frequency Range</b>	2.40335 GHz to 2.47735 GHz	
<b>Number of channels</b>	38	
<b>■ Terminal Section</b>		
<b>HDAVI Control</b>	This unit supports "HDAVI Control 5" function.	
<b>HDMI AV input (BD/DVD, AUX1, AUX2)</b>	3	
<b>Input connector</b>	Type A (19 pin)	
<b>HDMI AV output (TV (ARC))</b>	1	
<b>Output connector</b>	Type A (19 pin)	
<b>Digital audio input</b>		
<b>Optical digital input (TV, AUX3)</b>	2	
<b>Sampling frequency</b>	32 kHz, 44.1 kHz, 48 kHz 88.2 kHz, 96 kHz (only LPCM)	
<b>Audio format</b>	LPCM, Dolby Digital, DTS Sound Surround	
<b>USB Port</b>	For service use only.	
<b>■ Speaker Section</b>		
<b>Front speakers</b>		
<b>3 way, 3 speaker system (Bass reflex type)</b>		
<b>Speaker unit(s)</b>	Impedance 6 Ω	
<b>Woofer</b>	5.7 cm (2 1/4") cone type	
<b>Tweeter</b>	2.5 cm (1") semi-dome type	
<b>Super tweeter</b>	Piezo type	
<b>Output sound pressure</b>	78 dB/W (1 m)	
<b>Frequency range</b>	90 Hz to 32 kHz (-16 dB) 100 Hz to 23 kHz (-10 dB)	
<b>Center speaker</b>		
<b>2 way, 2 speaker system (Bass reflex type)</b>		
<b>Speaker unit(s)</b>	Impedance 6 Ω	
<b>Woofer</b>	5.7 cm (2 1/4") cone type	
<b>Super tweeter</b>	Piezo type	
<b>Output sound pressure</b>	78 dB/W (1 m)	
<b>Frequency range</b>	110 Hz to 20 kHz (-16 dB) 150 Hz to 16 kHz (-10 dB)	
<b>Active subwoofer</b>		
<b>1 way, 1 speaker system (Bass reflex type)</b>		
<b>Woofer</b>	16 cm (6 1/2") cone type	
<b>Output sound pressure</b>	80 dB/W (1 m)	
<b>Frequency range</b>	30 Hz to 180 Hz (-16 dB)	
<b>■ General</b>		
<b>Power consumption</b>	Main Unit: 37 W Active subwoofer: 20 W	
<b>In standby condition</b>	Main Unit (When the other connected devices are turned off): Approx. 0.25 W	
	Active subwoofer (Power switch release): Approx. 0.2 W	
<b>Power supply</b>	AC 120 V, 60 Hz	
<b>Dimensions (W x H x D)</b>		
<b>Main Unit</b>	310 mm x 45 mm x 188 mm (12 3/16" x 1 12/16" x 7 6/16")	
<b>Active subwoofer</b>	180 mm x 408 mm x 306 mm (7 3/32" x 16 1/16" x 12 1/16")	
<b>Mass (Weight)</b>		
<b>Main Unit</b>	Approx. 1.15 kg (2.54 lbs)	
<b>Active subwoofer</b>	4.76 kg (10.5 lbs)	
<b>Operating temperature range</b>	0°C to +40°C (+32°F to +104°F)	
<b>Operating humidity range</b>	20% to 80 % RH (no condensation)	
<b>■ Speaker general</b>		
<b>- For wall mounting layout</b>		
<b>Horizontal placement (for wall mount)</b>		
<b>Dimensions (W x H x D)</b>	1230 mm x 68 mm x 41 mm (48 7/16" x 2 11/16" x 1 10/16")

# 5 General/Introduction

## 5.1. About Bluetooth and Operation

### About Bluetooth®

Panasonic bears no responsibility for data and/or information that is compromised during a wireless transmission.

#### ■ Frequency band used

This system uses the 2.4 GHz frequency band.

#### ■ Certification of this device

- This system conforms to frequency restrictions and has received certification based on frequency laws. Thus, a wireless permit is not necessary.
- The action below are punishable by law in some countries:
  - Taking apart or modifying the unit.
  - Removing specification indications.

#### ■ Restrictions of use

- Wireless transmission and/or usage with all Bluetooth® equipped devices is not guaranteed.
- All devices must conform to standards set by Bluetooth SIG, Inc.
- Depending on the specifications and settings of a device, it can fail to connect or some operations can be different.
- This system supports Bluetooth® security features. But depending on the operating environment and/or settings, this security is possibly not sufficient. Transmit data wirelessly to this system with caution.
- This system cannot transmit data to a Bluetooth® device.

#### ■ Range of use

Use this device at a maximum range of 10 m (33 ft). The range can decrease depending on the environment, obstacles or interference.

#### ■ Interference from other devices

- This system may not function properly and troubles such as noise and sound jumps may arise due to radio wave interference if the main unit is located too close to other Bluetooth® devices or the devices that use the 2.4 GHz band.
- This system may not function properly if radio waves from a nearby broadcasting station, etc. are too strong.

#### ■ Intended usage

- This system is for normal, general use only.
- Do not use this system near equipment or in an environment that is sensitive to radio frequency interference (example: airports, hospitals, laboratories, etc.).

### Bluetooth® connection

By using the Bluetooth® connection, you can listen to the sound from the Bluetooth® audio device from this system wirelessly.

#### Preparation

- Turn on the Bluetooth® feature of the device and place the device near the main unit.

### Bluetooth® pairing

#### 1 Press [ $\text{Bluetooth}$ ] to select “ $\text{Bluetooth}$ ”.

- If the “ $\text{Bluetooth}$ ” indicator flashes quickly, go to step 3.

#### 2 Press and hold [ $\text{Bluetooth}$ ] until the “ $\text{Bluetooth}$ ” indicator flashes quickly.

- If the “ $\text{Bluetooth}$ ” indicator flashes slowly, repeat step 2.

#### 3 Select “SC-HTB770” from the Bluetooth® device’s Bluetooth® menu.

- If prompted for the passkey on the Bluetooth® device, enter “0000”.
- Once the Bluetooth® device is connected, the “ $\text{Bluetooth}$ ” indicator stops flashing and lights up.

### Connecting a Bluetooth® device

#### 1 Press [ $\text{Bluetooth}$ ] to select “ $\text{Bluetooth}$ ”.

- If the “ $\text{Bluetooth}$ ” indicator lights, a Bluetooth® device is already connected with this system. Disconnect it. (⇒ below)

#### 2 Select “SC-HTB770” from the Bluetooth® device’s Bluetooth® menu.

#### ■ Disconnecting a Bluetooth® device

Press and hold [ $\text{Bluetooth}$ ] until the “ $\text{Bluetooth}$ ” indicator flashes slowly.

- When “ $\text{Bluetooth}$ ” is selected as the source, this system will automatically try and connect to the last connected Bluetooth® device.
- The Bluetooth® device will be disconnected if a different audio source (e.g. “TV”) is selected.
- Refer to the operating instructions of the Bluetooth® device for further instruction on how to connect a Bluetooth® device.
- This system can only be connected to one device at a time.
- You can register up to 8 devices with this system. If a 9th device is paired, the device that has not been used for the longest time will be replaced.
- To change the sound quality, refer to “Bluetooth® communication mode”.

## 5.2. About VIERA Link

### Linked operations with the TV (VIERA Link™ “HDAVI Control™”)

#### What is VIERA Link “HDAVI Control”?

VIERA Link™ is a new name for EZ Sync™.  
VIERA Link “HDAVI Control” is a convenient function that offers linked operations of this system, and a Panasonic TV (VIERA) under “HDAVI Control”.

You can use this function by connecting the equipment with an HDMI cable. See the operating instructions for connected equipment for operational details.

#### Preparation

- ① Confirm that the HDMI connection has been made.
- ② Set the “HDAVI Control” operations on the connected equipment (e.g., TV).
- ③ For the optimal “HDAVI Control” operations change the following settings on the connected TV.\*<sup>1</sup>
  - Set the default speaker settings to this system.\*<sup>2</sup>
  - Set the speaker selection settings to this system.
- ④ Turn on all “HDAVI Control” compatible equipment and select the TV’s input for this system so that the “HDAVI Control” function works properly.
- ⑤ If a device is connected to the HDMI IN terminal, start play to check that the picture is displayed on the TV correctly.

#### When the connection or settings are changed, repeat this procedure.

- \*1 The availability and function of the settings may vary depending on the TV. Refer to the operating instructions for the TV for details.  
\*2 If the TV has a default speaker setting within the VIERA Link setting items, choosing this system as the default speaker will automatically change the speaker selection to this system.

- VIERA Link “HDAVI Control”, based on the control functions provided by HDMI which is an industry standard known as HDMI CEC (Consumer Electronics Control), is a unique function that we have developed and added. As such, its operation with other manufacturers’ equipment that supports HDMI CEC cannot be guaranteed.
- This unit supports “HDAVI Control 5” function.  
“HDAVI Control 5” is the standard for Panasonic’s HDAVI Control compatible equipment. This standard is compatible with Panasonic’s conventional HDAVI equipment.
- Please refer to individual manuals for other manufacturers’ equipment supporting VIERA Link function.

#### What you can do with VIERA Link “HDAVI Control”

To make sure that the audio is output from this system, turn the main unit on by using the TV’s remote control and selecting home theater from the speaker menu of VIERA Link menu. The availability and function of the settings may vary depending on the TV. Refer to the operating instructions for the TV for details.

##### ■ Speaker control

You can select whether audio output is from this system or the TV speakers by using the TV menu settings.

##### Home theater

This system is active.

- When the main unit is in standby mode, changing the TV speakers to this system in the VIERA Link menu will automatically turn the main unit on and select TV as the source.
- You can control the volume setting of this system using the volume or mute button on the TV remote control.
- If you turn off the main unit, the TV speakers will be automatically activated.
- Audio will automatically be output from this system if the TV is compatible to VIERA Link “HDAVI Control 4” or later.

##### TV

TV speakers are active.

- The volume of this system is set to its minimum.

##### ■ Automatic input switching

When the following operations are performed, the main unit will automatically change the input to the corresponding source.

- When play starts on an HDMI connected device.\*<sup>3</sup>
- When the TV input or the TV channel is changed.

\*3 If the speaker output setting on the TV is set to this system, the TV and the main unit turn on automatically (Power on link).

##### ■ Power off link

When the TV is turned off, the main unit also turns off automatically. (This function does not work when Bluetooth® is the source.)

##### ■ Automatic lip-sync function (for HDAVI Control 3 or later)

Delay between audio and video is automatically adjusted by adding time-lag to the audio output, enabling you to enjoy smooth audio for the picture.

The delay information is automatically set if the TV is compatible to VIERA Link “HDAVI Control 3” or later and the VIERA Link is set to on.

## 5.3. Others (Licenses)

Manufactured under license from Dolby Laboratories. Dolby, Pro Logic, and the double-D symbol are trademarks of Dolby Laboratories.

used in place of the word "Partner".

# 6 Location of Controls and Components

## 6.1. Main Unit & Active Subwoofer Key Button Operations

### 6.1.1. Front View

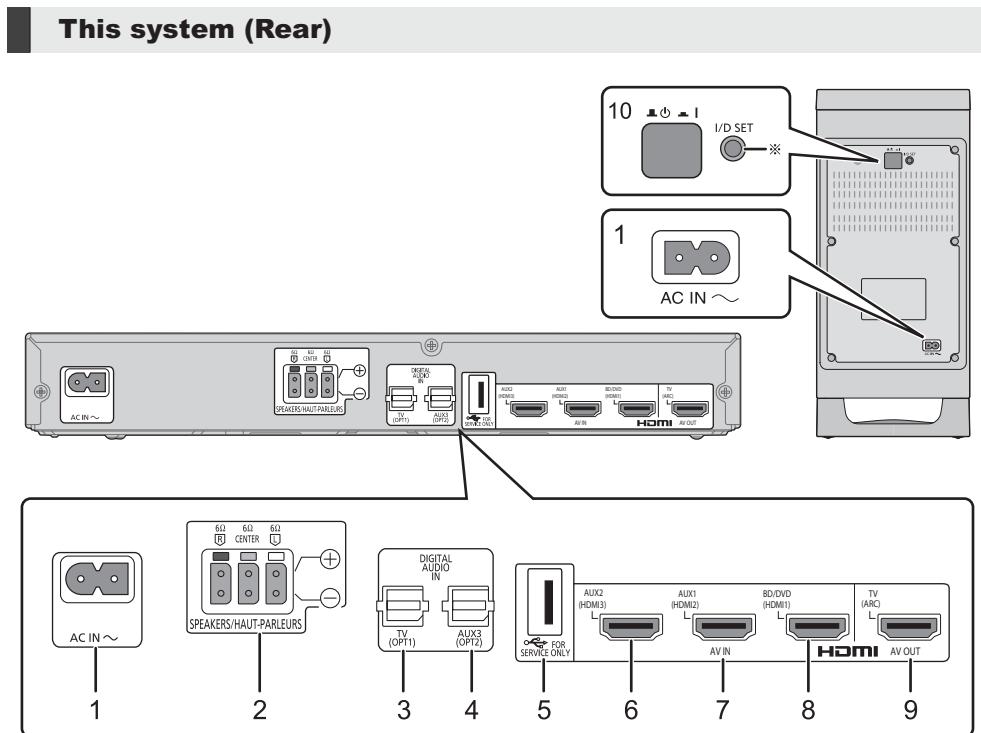

\*1 The indicators will also blink in various conditions.

\*2 The indicator blinks for 5 sec when the main unit detects an audio format.

To manually verify the current audio format and the corresponding indicators, refer to O/I Book on (Audio format indicator).

## 6.1.2. Rear View

- |                                   |                                      |
|-----------------------------------|--------------------------------------|
| 1 AC IN terminal                  | 6 AUX2 terminal                      |
| 2 Speaker terminals               | 7 AUX1 terminal                      |
| 3 TV terminal                     | 8 BD/DVD terminal                    |
| 4 AUX3 terminal                   | 9 HDMI OUT terminal (ARC compatible) |
| 5 USB port (for service use only) | 10 Active subwoofer on/off button    |

\* The I/D SET button is only used when the main unit is not paired with the active subwoofer.

## 6.2. Indicator illumination

The indicators display the condition of this system by flashing. The indicator patterns illustrated below are displayed during normal operational conditions. They do not refer to the indications of a problem.

Indicator	Description
	<b>The BD/DVD indicator blinks<sup>※2</sup> and sound mode indicators light up in sequence for 1 minute.</b> • When the main unit is in wireless pairing mode with the active subwoofer
	<b>The indicator blinks for 10 sec.</b> • When the Bluetooth® communication is mode 1
	<b>The indicator blinks for 20 sec.</b> • When 3D surround effect and clear-mode dialog effect are on • When the dual audio setting is Main • When the auto gain control is on
	<b>The indicator blinks for 5 sec.</b> • When the audio format is Dolby Digital
	<b>The indicator blinks for 5 sec.</b> • When the audio format is DTS
	<b>The indicator blinks for 5 sec.</b> • When the audio format is PCM <sup>※3</sup>
	<b>The indicator blinks for 10 sec.</b> • When the Bluetooth® communication is mode 2
	<b>The indicator blinks for 20 sec.</b> • When 3D surround effect and clear-mode dialog effect are off • When the dual audio setting is Secondary (SAP: Secondary Audio Program) • When the auto gain control is off
	<b>The indicators blink for 20 sec.</b> • When the dual audio setting is Main and Secondary
	<b>The indicators blink for 10 sec.</b> • When the remote control code is changed
	<b>The indicators blink once.</b> • When changing the setting ("To reduce the clear-mode dialog effect", "To turn off VIERA Link "HDAVI Control""), and "To turn off the volume limitation")
	<b>The indicators blink twice.</b> • When the main unit is reset
	<b>Bluetooth® indicator blinks quickly.</b> • When the main unit is ready for pairing
	<b>Bluetooth® indicator blinks slowly.</b> • When the main unit is waiting to connect
	<b>Bluetooth® indicator turns on.</b> • When the main unit is connected with a Bluetooth® device

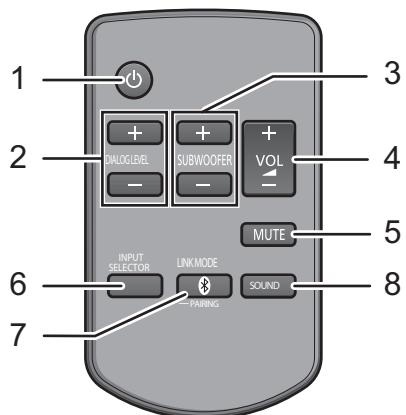

※1 The indicator for the current status remains lit.

※2 The BD/DVD indicator stops blinking and lights once the wireless pairing is successful.

※3 The indicator blinks only when [SOUND] is pressed for more than 4 sec and the audio format is PCM.

## 6.3. Remote Control Key Button Operations

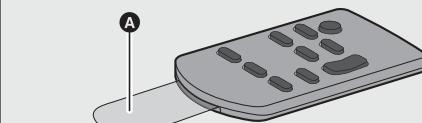

### Remote control

- 1 Turn the main unit on or off
- 2 Adjust the dialog effect level
- 3 Adjust the output level of the active subwoofer (bass sound)
- 4 Adjust the volume of this system
- 5 Mute the sound
- 6 Select the input source  
"TV" → "BD/DVD" → "AUX1"  
↑ "Bluetooth" ← "AUX3" ← "AUX2" ←
- 7 Select the Bluetooth® device as the source
- 8 Select the sound mode  
"STANDARD" → "STADIUM" → "MUSIC"  
↑ "STEREO" ← "NEWS" ← "CINEMA" ←

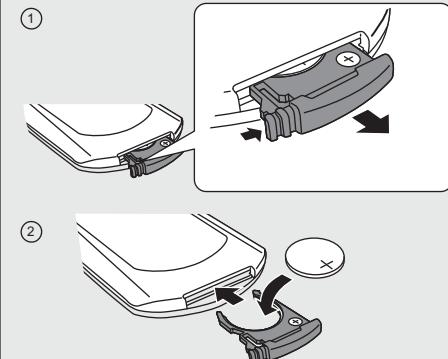

#### ■ Before using for the first time

Remove the insulation sheet **A**.

#### ■ To replace a button-type battery

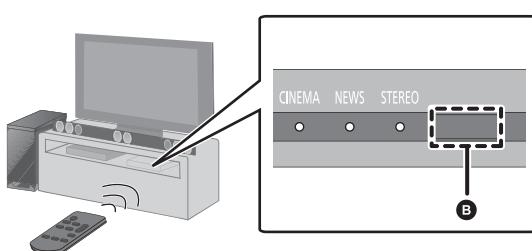

Battery type: CR2025 (Lithium battery)

### ■ Remote control operation range

The remote control signal sensor is located on the main unit.

- Use the remote control within the correct operation range.

#### ■ B Remote control signal sensor

##### • Operation range

Distance: Within approx. 7 m (23 ft) directly in front

Angle: Approx. 30° left and right

# 7 Installation Instructions

## 7.1. Connections

- Turn off all equipment before connection and read the appropriate operating instructions.  
**Do not connect the AC power supply cord until all other connections are completed.**

### ■ HDMI

- The HDMI connection supports VIERA Link "HDAVI Control" when used with a compatible Panasonic TV.
- Use the ARC compatible High Speed HDMI cables. Non-HDMI-compliant cables cannot be utilized.
- It is recommended that you use Panasonic's HDMI cable.

### 7.1.1. Connection with the TV

#### 1 Verify if the TV's HDMI terminal is labeled "HDMI (ARC)".

Connection differs depending on the label printed next to the HDMI terminal.

Labeled "HDMI (ARC)": Connection **A**

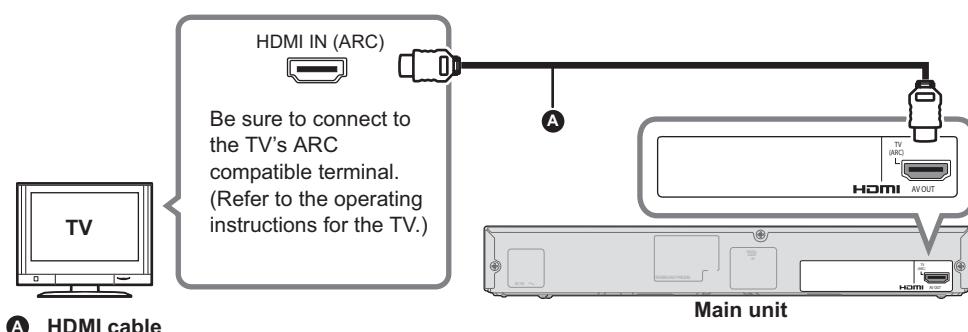

Not Labeled "HDMI (ARC)": Connection **B**

#### ■ What is ARC?

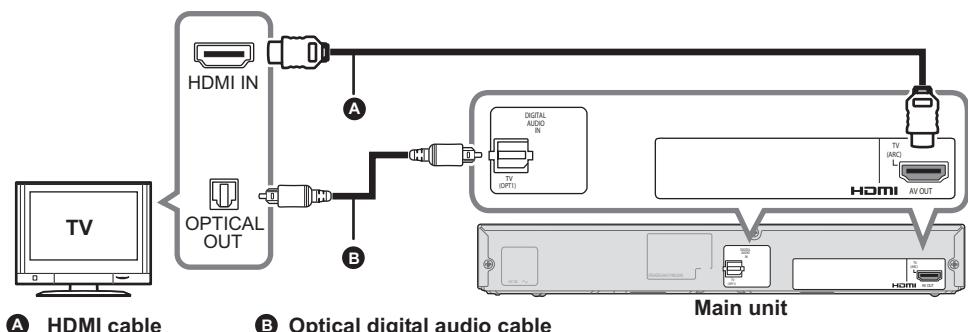

ARC is an abbreviation of Audio Return Channel, also known as HDMI ARC. It refers to one of the HDMI functions. When you connect the main unit to the terminal labeled "HDMI (ARC)" on the TV, the optical digital audio cable that is usually required in order to listen to sound from a TV is no longer required, and TV pictures and sound can be enjoyed with a single HDMI cable.

#### 2 Make the connection.

##### A Labeled "HDMI (ARC)"

##### B Not labeled "HDMI (ARC)"

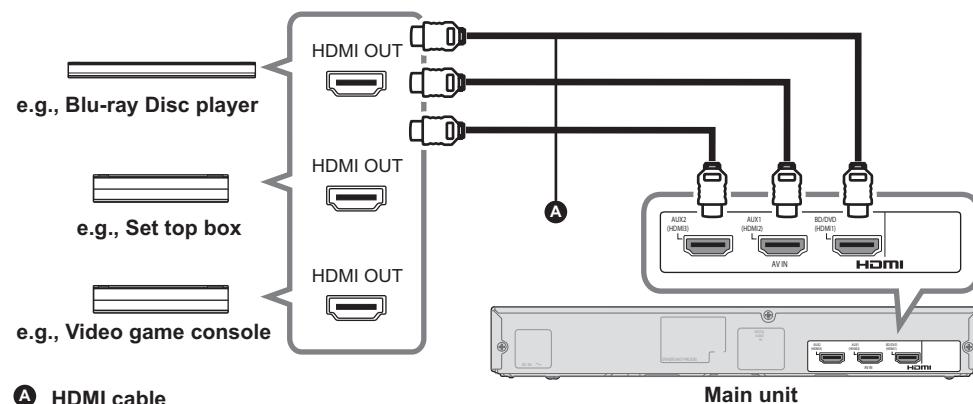

## 7.1.2. Connection with other devices

You can direct the audio signal from the connected Blu-ray Disc player, DVD player, Set Top Box, etc. to this system.

### When the device has an HDMI terminal

#### Preparation

- Connect the main unit to the TV

**A** HDMI cable

#### HDMI standby pass-through

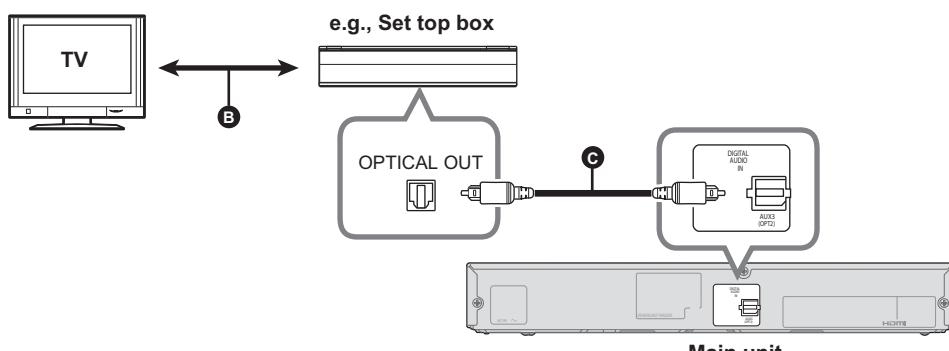

Even if the main unit is in standby mode, the audio and/or video signal from the device connected to the BD/DVD, AUX1 or AUX2 terminal will be sent to the TV connected to the HDMI OUT terminal (the sound will not be output from this system). When devices are connected to all BD/DVD, AUX1 and AUX2 terminals, audio and/or video signal of the device whose input is lastly selected is output.

#### 3D compatibility

Compatible with FULL HD 3D TV and Blu-ray Disc player.

- The main unit can pass-through the 3D video signal from a 3D compatible Blu-ray Disc player to a FULL HD 3D TV.

### When the device has an optical digital audio output terminal

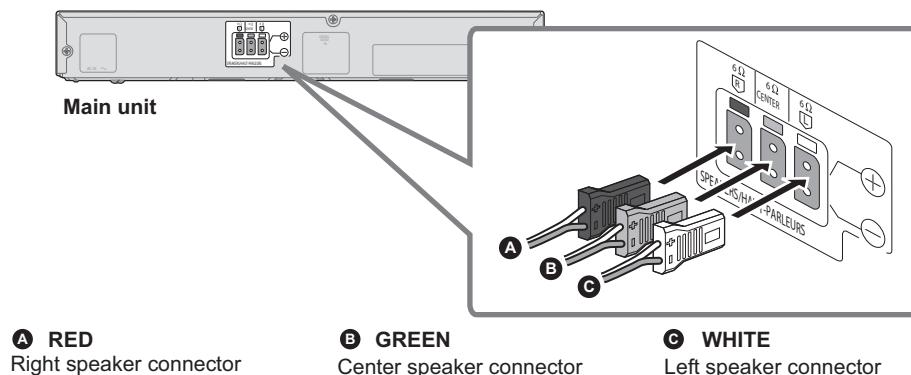

**B** Refer to the operating instructions of the respective devices for the optimal connection.

**C** Optical digital audio cable

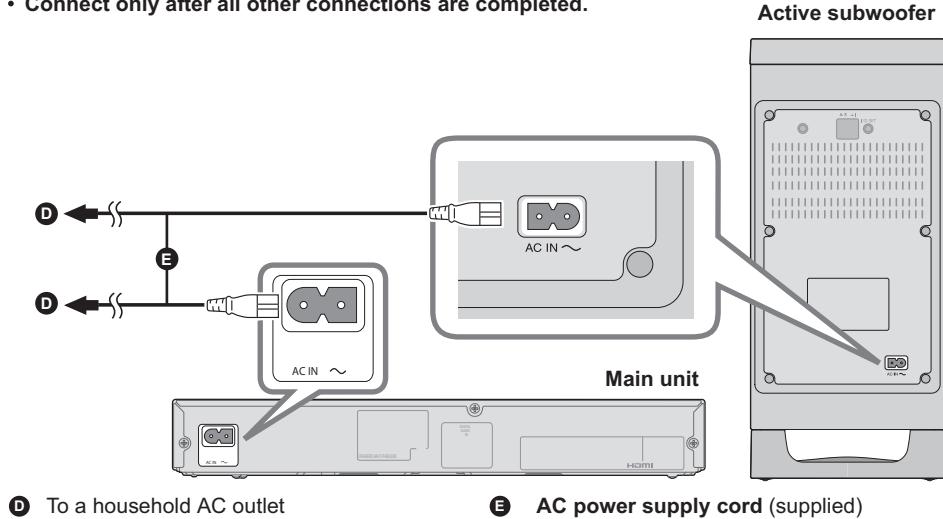

### 7.1.3. Speaker cable connection

Match the connector shape and connect to the terminals of the same color.

### 7.1.4. AC power supply cord connection

- Connect only after all other connections are completed.

- This system consumes a small amount of AC power even when it is turned off. In the interest of power conservation, if you will not be using this system for a long time, unplug it from the household AC outlet.

#### Saving energy

The main unit is designed to conserve its power consumption and save energy.

- **The main unit will automatically switch to standby mode** when no signal is input and no operation is performed for approx. 30 minutes.

## 8 Service Mode

This unit is equipped with features of self-diagnostic & special mode setting for checking the functions & reliability of the unit.

**Special Note :** Checking of the reliability (ageing) & operation must be carry out to ensure good working condition in unit.

### 8.1. Method to enter into Service Mode

Here are the procedures to enter into service mode:

**Step 1 :** Power up the unit.

**Step 2 :** Press & hold [VOL-] on the unit, follow by [SUB-] & [SUB+] on the remote control.

**Note :** All LEDs will blink 4 times followed by all LEDs off.

**Step 3 :** It enters into service mode.

### 8.2. Model Display Details by LED Blinking Indicators

After entering into service mode, the following keys on the remote control can be pressed to determine:-

1. Microprocessor firmware version number
2. Model No.
3. Region setting
4. Wireless pairing

**Note :** The LED blinking process will stop when the unit is power off completely.

LED Indication Key Buttons	LED 1 (BT)	LED 2 (TV)	LED 3 (BD/DVD)	LED 4 (AUX1)	LED 5 (AUX2)	LED 6 (AUX3)	LED 7 (STANDARD)	LED 8 (DOLBY D STADIUM)	LED 9 (DTS MUSIC)	LED 10 (AAC or PCM CINEMA)	LED 11 (NEWS)	LED 12 (STEREO)	Mode Description

<b>Link Status</b>			
"O" means LED on "X" means LED off			

Table 8-4

### 8.3. Error Codes Display

This unit does not have a FL/LCD display unit hence error code (when a fault condition occurs) is represented by the LED status indicators. Refer to Figure 8-1

Here is the description of the LED status indicators:

LED No.	Description
LED 1	BLUETOOTH input selector indicator
LED 2	TV input selector indicator (OPTICAL INPUT 1 or ARC/HDMI OUT)
LED 3	BD/DVD input selector indicator (HDMI INPUT 1)
LED 4	AUX 1 input selector indicator (HDMI INPUT 2)
LED 5	AUX 2 input selector indicator (HDMI 3)
LED 6	AUX 3 input selector indicator (OPTICAL IN 2)
LED 7	STANDARD decorder/audio format indicator
LED 8	DOLBY D/STADIUM decorder/audio format indicator
LED 9	DTS/MUSIC decorder/audio format indicator
LED 10	AAC decorder/audio format indicator (Japan region)
LED 10	PCM/CINEMA decorder/audio format indicator (Non Japan region)
LED 11	NEWS decorder/audio format indicator
LED 12	STEREO decorder/audio format indicator

Table 8-5

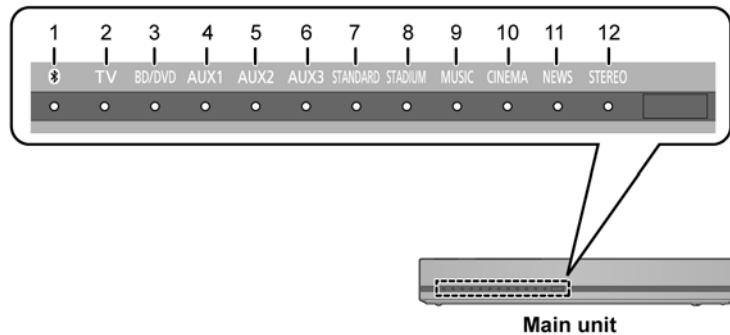

Figure 8-1

### 8.3.1. Error Code Display Details by LED Blinking Indicators

This section describes the LED status indicators by its blinking to represent the error codes.

**Caution: The LED blinking process will stop only when the unit is power off completely.**

Error Code	LED 1 (BT)	LED 2 (TV)	LED 3 (BD/DVD)	LED 4 (AUX 1 or AUX)	LED 5 (AUX 2)	LED 6 (AUX 3)	LED 7 (STA/NDA/RD)	LED 8 (STA-DIUM/DOLBY D)	LED 9 (MUSIC/DTS)	LED 10 (CINEMA/AAC or PCM)	LED 11 (NEW-S)	LED 12 (STEREO)	Cause and Problem
OVERLOAD (F61) If this error occurs, main set will automatically power off.	X	*	*	X	X	X	X	X	X	X	X	X	Speaker protection, DAMP IC abnormality. Check for faulty parts and replace with new parts if necessary.
F76 If this error occurs, main set will automatically power off.	X	*	X	X	X	X	X	X	X	X	X	X	DC Power/Voltage Supply abnormality. Check for faulty parts and replace with new parts if necessary.
F70 DAP	X	*	*	X	X	X	X	*	*	X	X	X	DAP - Main Micro-P IC communication failure /abnormality. Check for faulty parts and replace with new parts if necessary.
F70 HDMI	X	*	*	X	X	X	X	*	*	*	X	X	HDMI Micro-P to Main Micro-P IC communication error. Check for faulty parts and replace with new parts if necessary.
F70 BT	*	*	*	X	X	X	X	X	X	X	X	X	Bluetooth communication error. Check for faulty parts and replace with new parts if necessary.
U701 / U703 / U704	X	X	*	X	X	X	X	X	X	X	X	X	<ul style="list-style-type: none"> <li>Connected devices error (HDCP non-compliance). Check for faulty parts and replace with new parts if necessary.</li> <li>HDMI connection abnormality (cable damage, HDCP non-compliance etc). Check for faulty parts and replace with new parts if necessary.</li> <li>HDMI image format incompatibility. Check for faulty parts and replace with new parts if necessary.</li> </ul>
USB Update Fail	X	X	X	X	X	X	X	X	X	X	X	*	USB communication error. Check for faulty parts and replace with new parts if necessary.
USB Overcurrent	*	*	*	X	*	*	*	*	*	*	*	*	USB communication error. Check for faulty parts and replace with new parts if necessary.

"X" means LED off.

"\*" means LED blink

Table 8-6

## 8.4. Cold start (For SU-HTB770)

Step 1 : Power up the unit.

Step 2 : Press & hold [POWER] button on the unit for 4s or more.

All LED will light-up and blink for 2 times (at frequency of 4Hz)

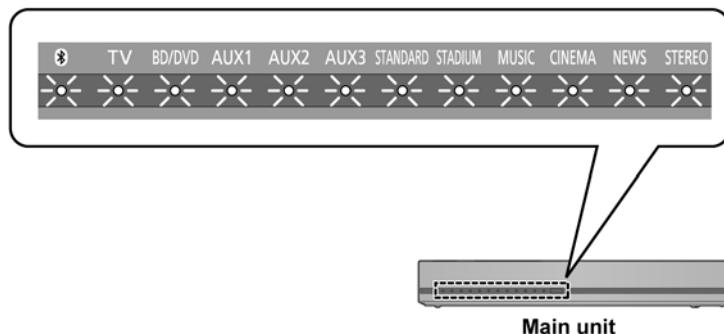

Figure 8-2

## 8.5. Pairing mode between Main Unit (SU) with Active Subwoofer (SB-HWA)

Here are the procedures to do pairing between Main Unit (SU-HTB770) with Active Subwoofer (SB-HWA770)

**Step 1 :** Power up the Main Unit & Active Subwoofer.

**Note :** Please check the connections in Main Unit and Active Subwoofer when either fails to power up.

(WIRELESS LINK indicator on Active Subwoofer should turn RED if it is not linked)

**Step 2 :** Press [ID SET] on the rear of Active Subwoofer for more than 3 sec. (The WIRELESS LINK indicator will blink in red)

WIRELESS LINK indicator on Active Subwoofer shall blinking for up to 1 minutes to indicate it is in ready for pairing mode.

**Step 3 :** During WIRELESS LINK indicator on Active Subwoofer blinking, press [INPUT SELECTOR] or [AUX] on remote control followed by [VOL +] on Main Unit for more than 4 sec. (Pairing begins)

This step also can be carried out under Service Mode by press [SUB-] on remote control followed by [VOL+] on Main Unit for 2 secs. (Pairing begins)

**Note :**

1. Under Pairing Mode, [BD/DVD] LED blinking and 6 indicators LEDs (STANDARD, STADIUM(Dolby D), MUSIC(DTS), CINEMA(AAC/PCM), NEWS and STEREO) will run one by one (shifting) for every 1 sec from left to right to indicate it is searching for the receiver to be linked and repeated the cycle after reached the [STEREO] LED.
2. When pairing is completed. [BD/DVD] LED on Main Unit will light up and WIRELESS LINK indicator on Active Subwoofer turns GREEN if pairing is successful.
3. Wireless pairing automatically exit after 1 minute.

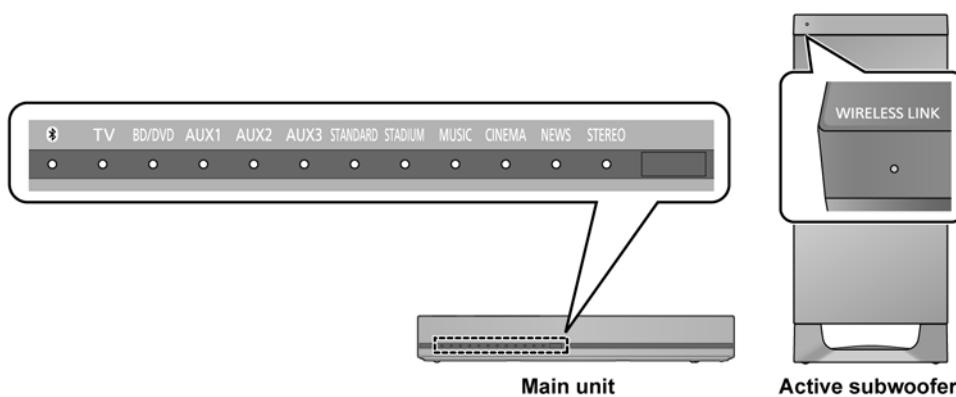

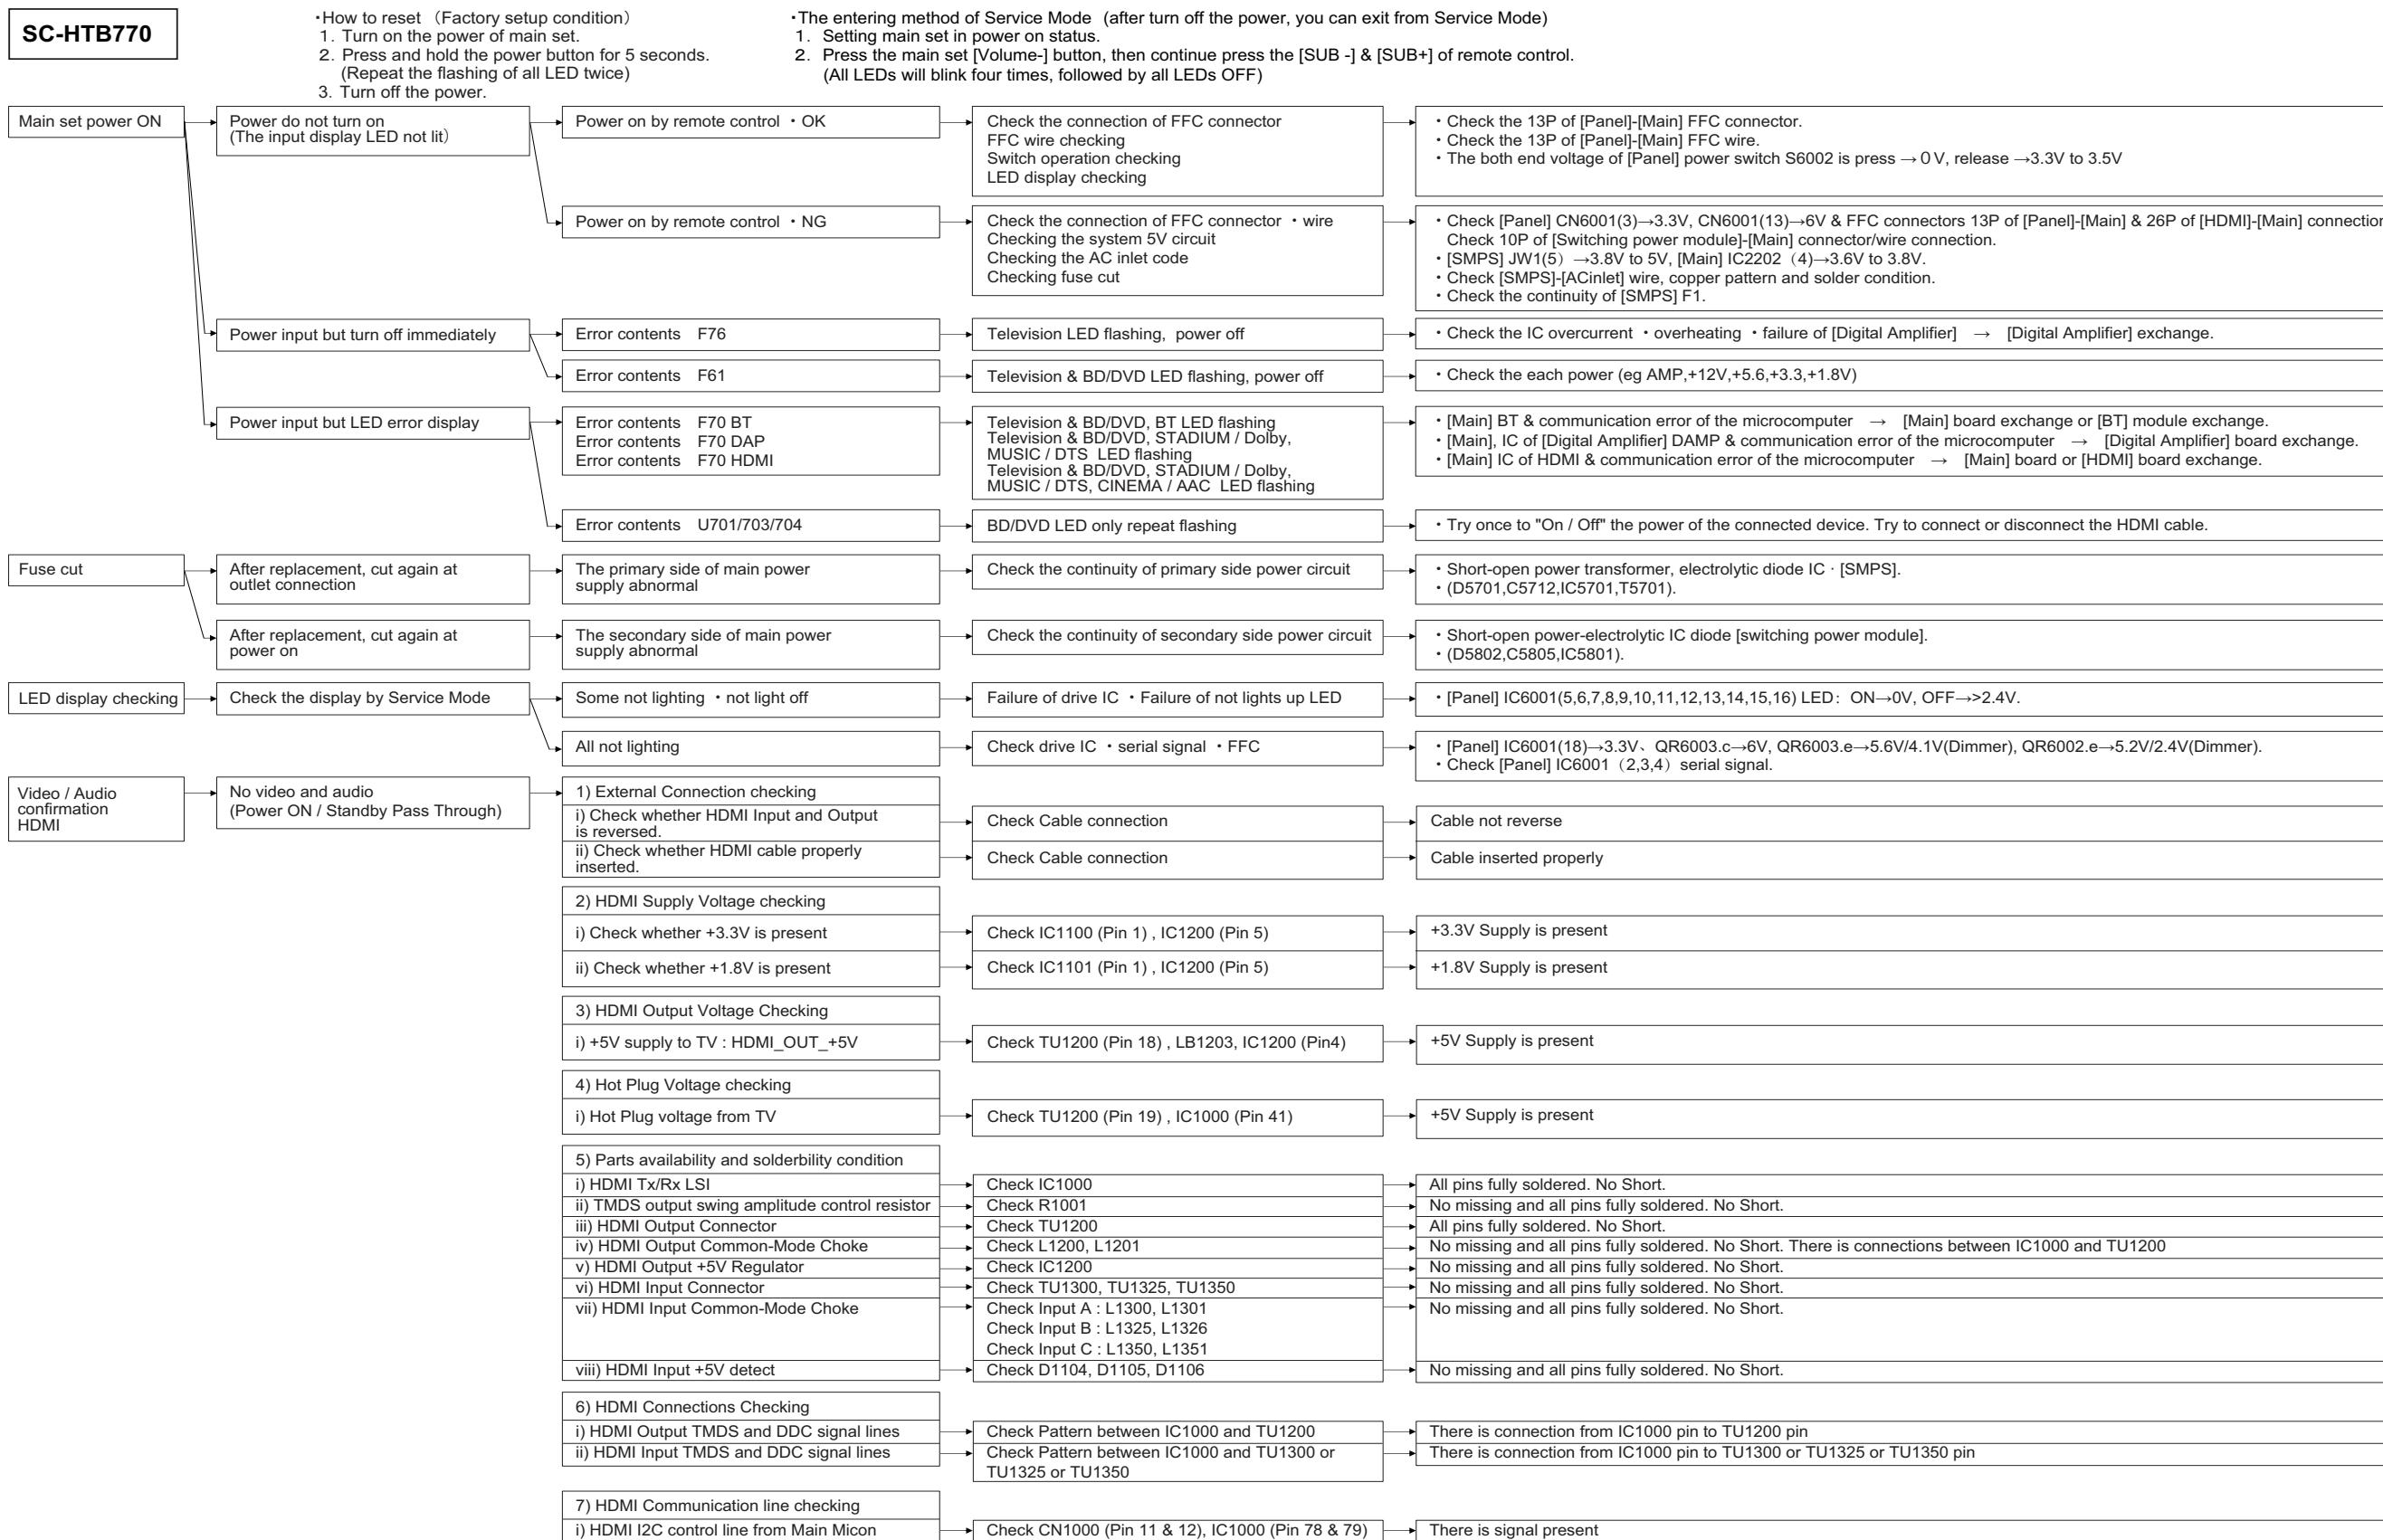

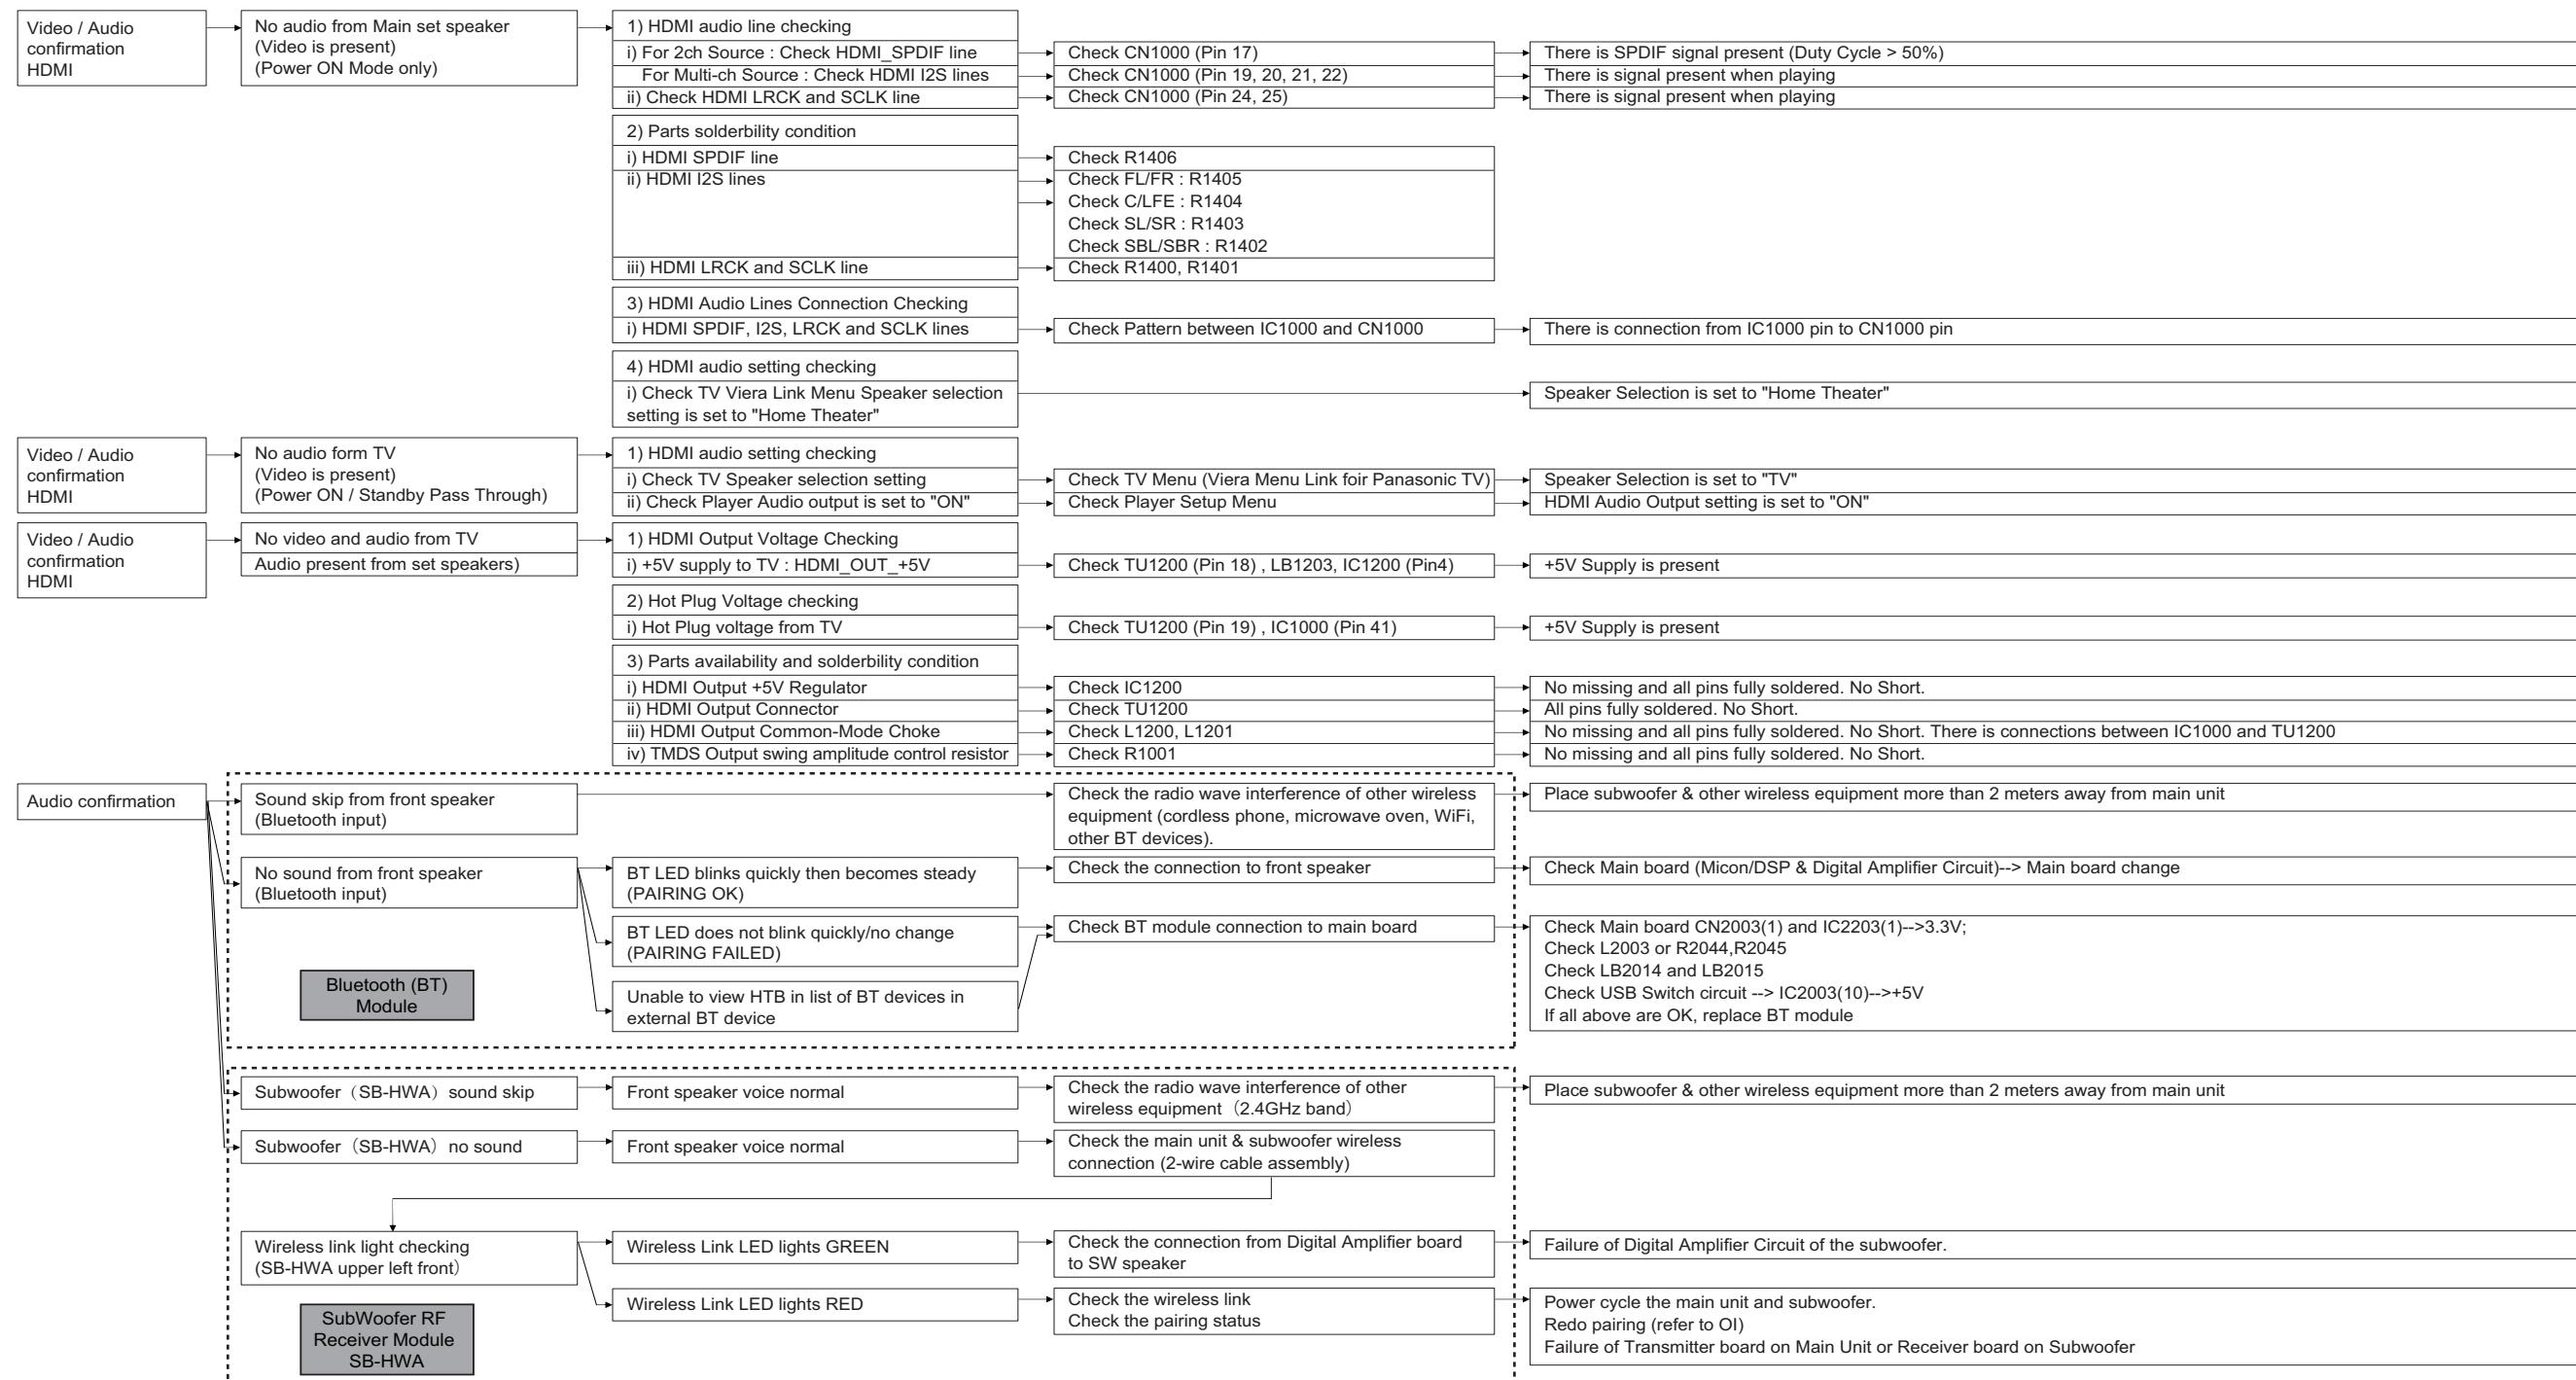

Figure 8-3

## 9 Troubleshooting Guide

## 10 Service Fixture & Tools

Prepare service tools before process service position.

Ref. No.	Part No.	Description	Remarks
SFT1	REXX1194	2P WIRE (SPK-SW DAMP)	SB-HWA770

# 11 Disassembly and Assembly Instructions

## Caution Note:

- This section describes the disassembly and/or assembly procedures for all major printed circuit boards & main components for the unit. (You may refer to the section of “Main Components and P.C.B Locations” as described in this service manual)
- Before carrying out the disassembly process, please ensure all the safety precautions & procedures are followed.
- During the disassembly and/or assembly process, please handle with care as there may be chassis components with sharp edges.
- Avoid touching heatsinks due to its high temperature after prolong use. (See caution as described below)

**CAUTION: HOT!!  
PLEASE DO NOT  
TOUCH THE HEAT SINK**

- During disassembly and assembly, please ensure proper service tools, equipments or jigs is being used.
- During replacement of component parts, please refer to the section of “Replacement Parts List” as described in the service manual.
- Select items from the following indexes when disassembly or replacement are required.

## Disassembly of Main Unit (SU-HTB770)

- Disassembly of Top Cabinet
- Disassembly of SMPS and AC Inlet P.C.B.
- Replacement of Switching Regulator IC (IC5701)
- Replacement of Rectifier Diode (D5802)
- Disassembly of Main P.C.B.
- Disassembly of HDMI P.C.B.
- Disassembly of Rear Panel
- Disassembly of Front Panel Block
- Disassembly of Bluetooth Module P.C.B.
- Disassembly of Panel P.C.B.
- Disassembly of Digital Transmitter Module P.C.B.

## Disassembly of Front and Center Speaker Units Position

- Disassembly of Front and Center Speaker Units in Bar position
- Disassembly of Front Speaker Unit in Standing position
- Disassembly of Center Speaker Unit in Standing position

## Disassembly of Front Speaker (L/R) (SB-HTB570)

- Disassembly of Rear Cabinet Assembly
- Disassembly of Tweeter Speaker (SP1)
- Disassembly of Woofer Speaker (SP2)
- Replacement of the Speaker Wire Assembly

## Disassembly of Center Speakers (SB-HTB770)

- Disassembly of Rear Cabinet Assembly
- Disassembly of Woofer Speaker (SP3)
- Replacement of Speaker Wire Assembly

## Disassembly of Active Subwoofer (SB-HWA770)

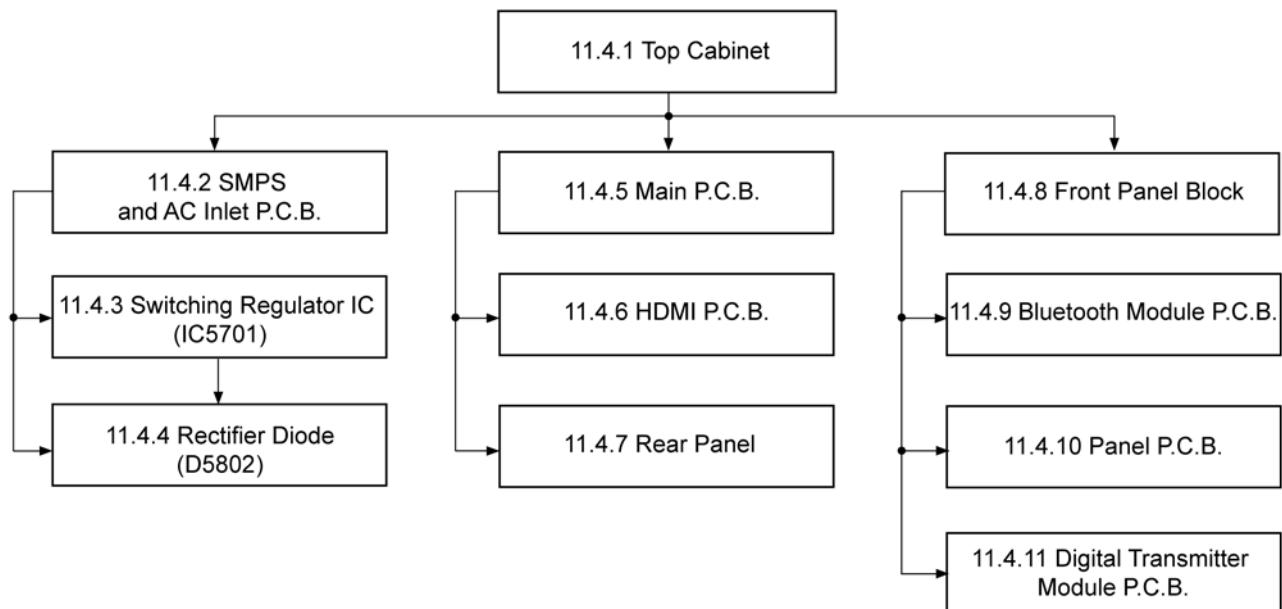

- Disassembly of Rear Panel Block
- Disassembly of Digital Receiver Module P.C.B.
- Disassembly of SW DAMP P.C.B.
- Replacement of Digital Amplifier IC (IC5200)
- Disassembly of Power Button P.C.B.
- Disassembly of SW SMPS and SW AC Inlet P.C.B.
- Replacement of Switching Regulator IC (IC5701)
- Replacement of Rectifier Diode (D5802)
- Disassembly of Bottom Panel Assembly
- Disassembly of Woofer Speaker (SP61)

## 11.1. Disassembly flow chart

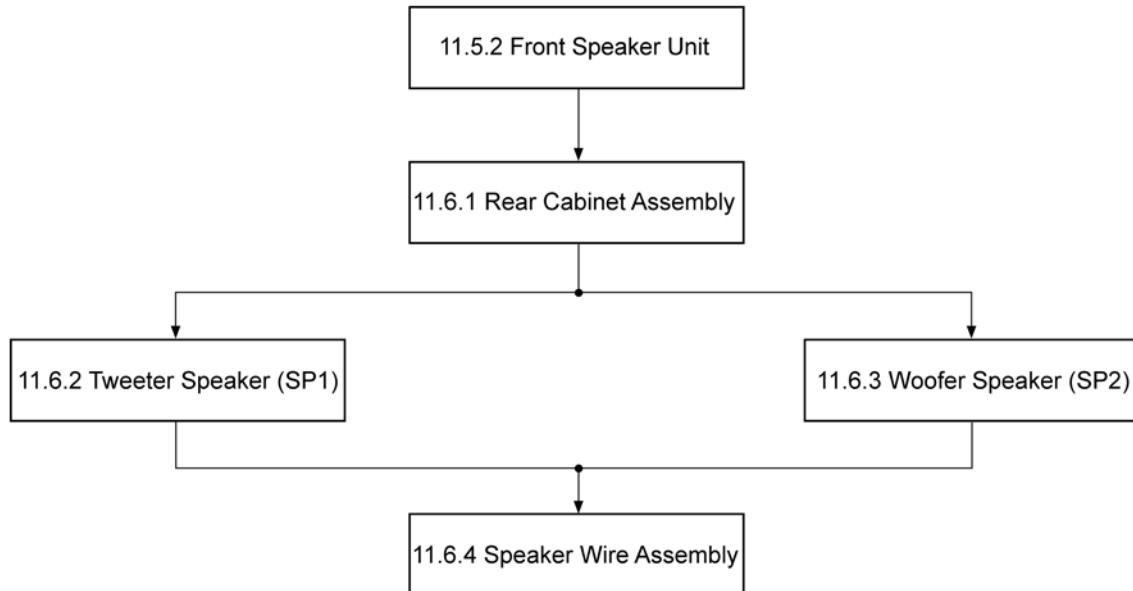

The following chart is the procedure for disassembling the casing and inside parts for internal inspection when carrying out the servicing.

To assemble the unit, reverse the steps shown in the chart below.

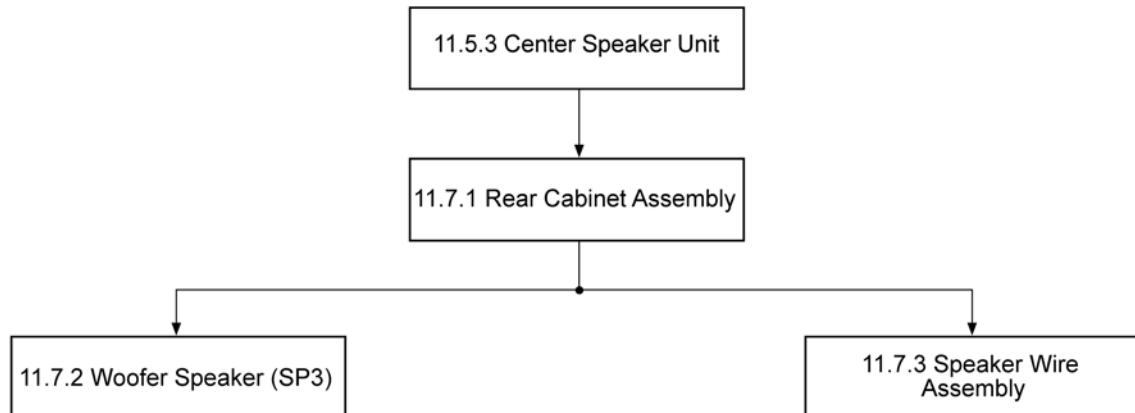

### 11.1.1. Main Unit (SU-HTB770)

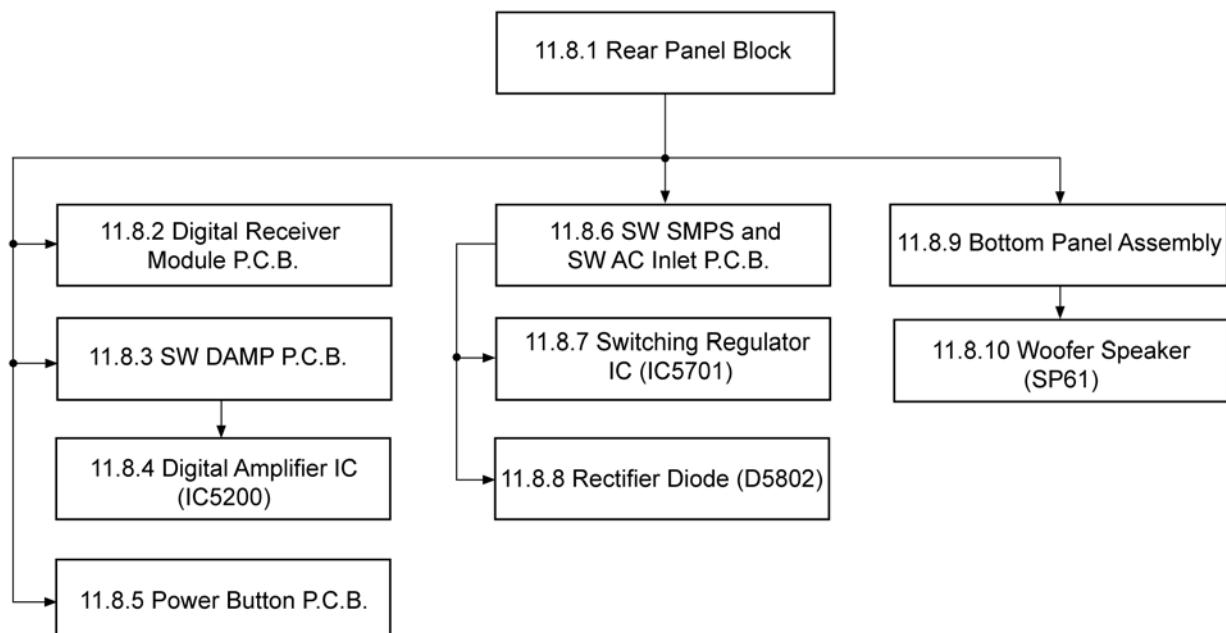

### 11.1.2. Front Speakers (SB-HTB570)

### 11.1.3. Center Speaker (SB-HTB770)

### 11.1.4. Active Subwoofer (SB-HWA770)

## 11.2. Types of Screws

### 11.2.1. Main Unit (SU-HTB770)

#### **CAUTION NOTE:**

Please use original screw and at correct locations.

Below shown is part no. of different screw types used:

- **a** : RHD30007-1SJ (S), RHD30007-K2J (K)
- **b** : RHD30119-S
- **c** : RHD30172
- **d** : RHD30102-1
- **e** : RHD26046
- **f** : RHD14129
- **g** : RHDX261002

### 11.2.2. Front Speakers (SB-HTB570)

#### **CAUTION NOTE:**

Please use original screw and at correct locations.

Below shown is part no. of different screw types used:

- **a** : XYN5+J14FJK
- **b** : XTB3+10JFJK

### 11.2.3. Center Speaker (SB-HTB770)

#### **CAUTION NOTE:**

Please use original screw and at correct locations.

Below shown is part no. of different screw types used:

- **a** : XYN5+J14FJK
- **b** : XTB3+10JFJK

### 11.2.4. Active Subwoofer (SB-HWA770)

#### **CAUTION NOTE:**

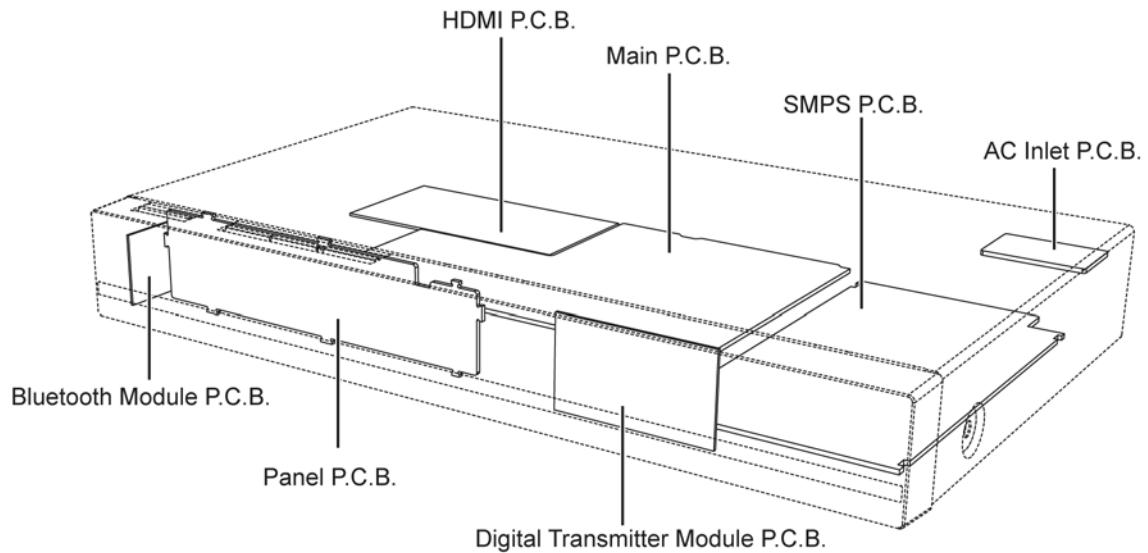

Please use original screw and at correct locations.

Below shown is part no. of different screw types used:

- **a** : XTB4x16AFJ (S), XTB4x16AFJK (K)
- **b** : RHDX301002
- **c** : RHD30102-1
- **d** : XTB3+10JFJ (S), XTB3+10JFJK (K)

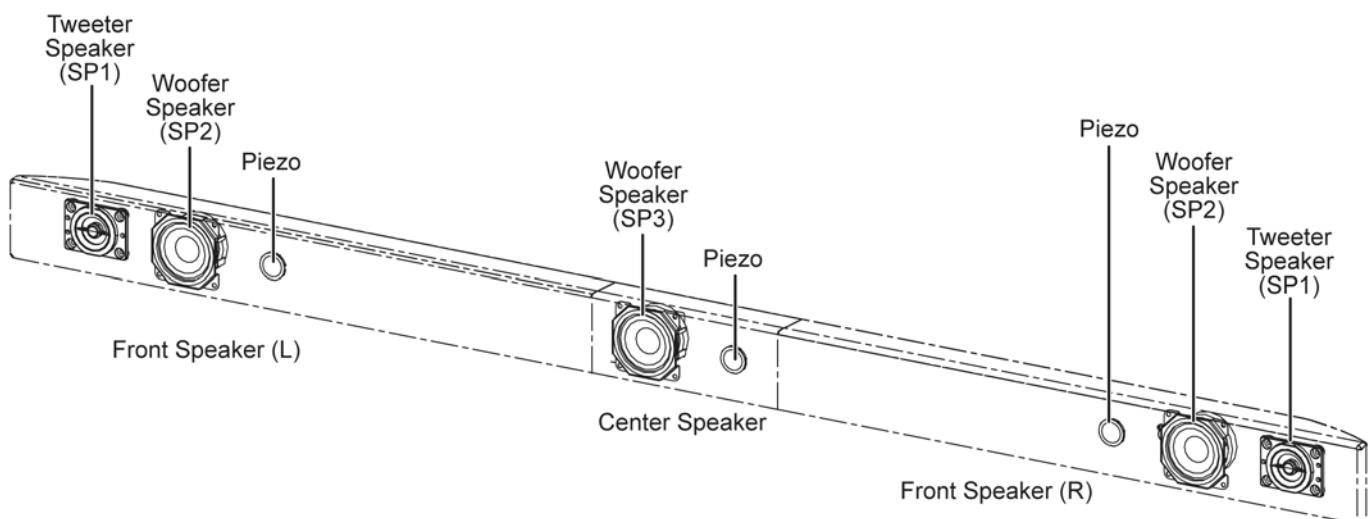

## 11.3. Main Parts Location Diagram

### 11.3.1. Main Unit (SU-HTB770)

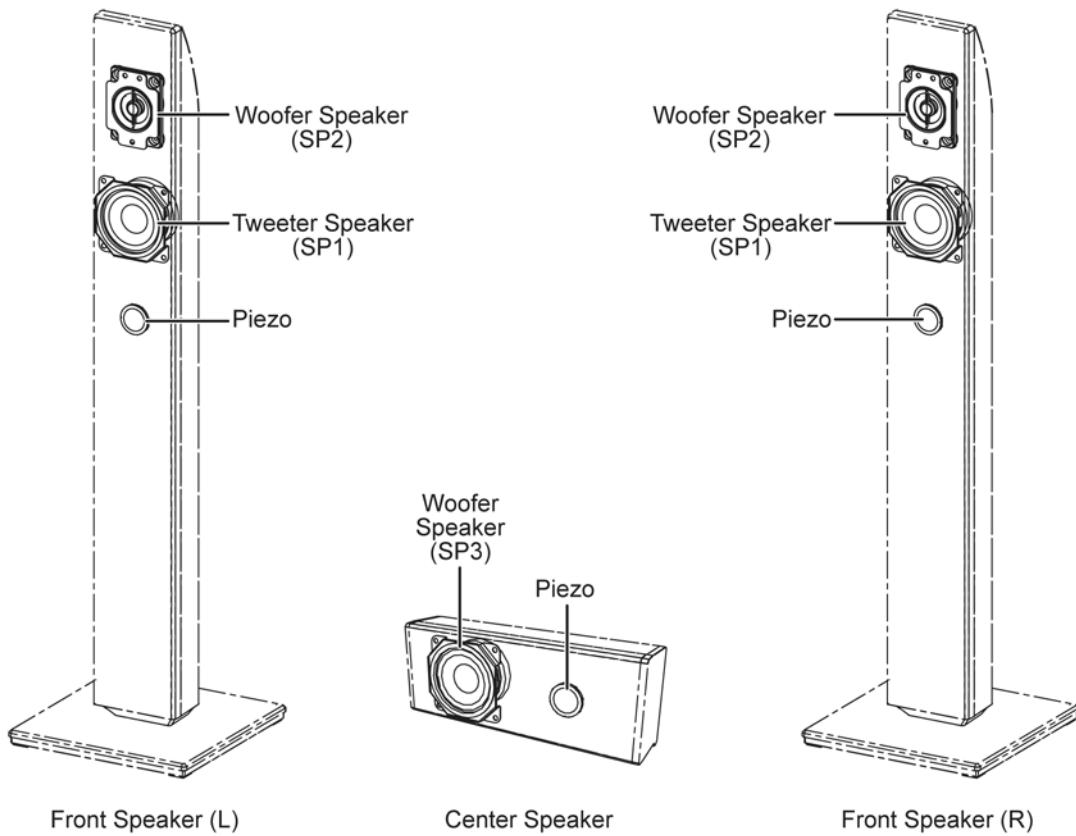

### 11.3.2. Front Speakers (SB-HTB570) / Center Speaker (SB-HTB770)

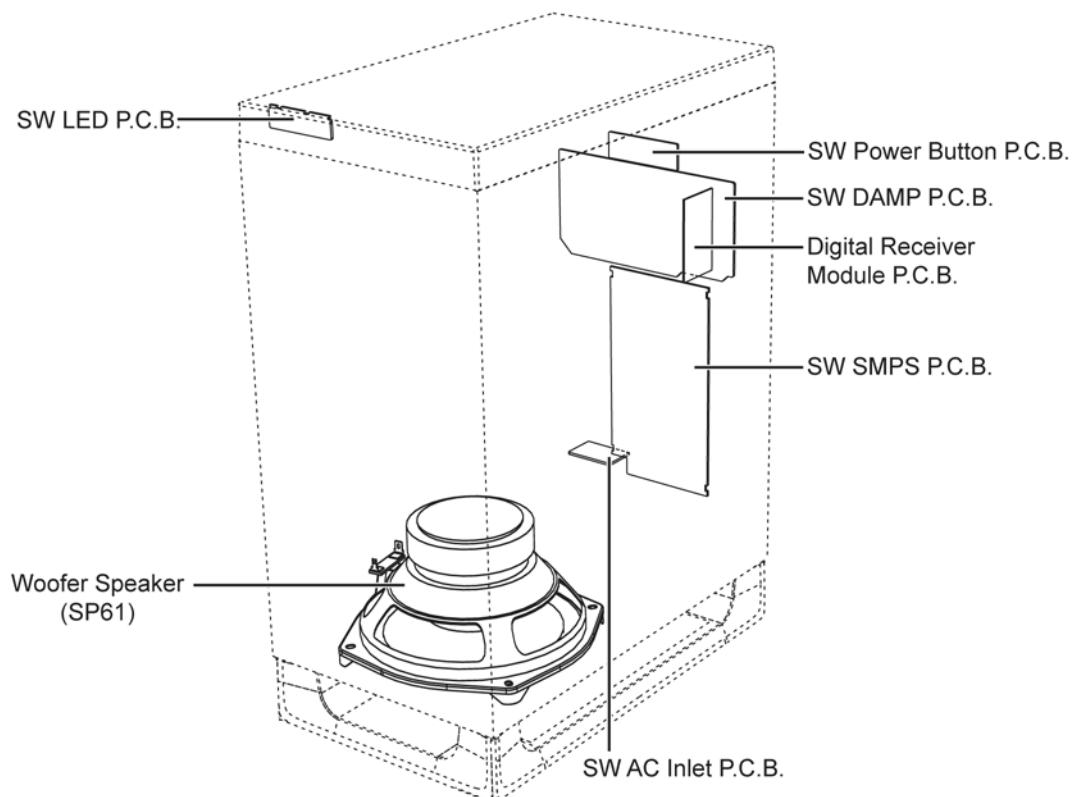

#### 11.3.2.1. Bar Position

### 11.3.2.2. Standing Position

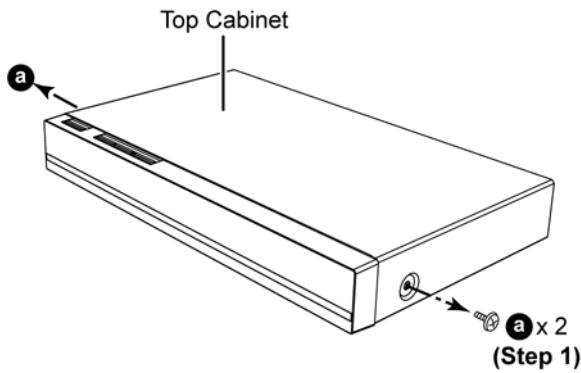

### 11.3.3. Active Subwoofer (SB-HWA770)

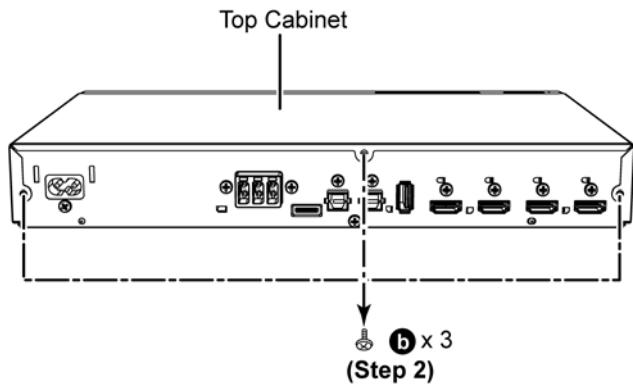

## 11.4. Disassembly of Main Unit (SU-HTB770)

### 11.4.1. Disassembly of Top Cabinet

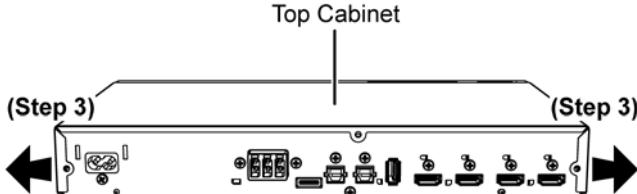

**Step 1 :** Remove 2 screws.

**Step 2 :** Remove 3 screws.

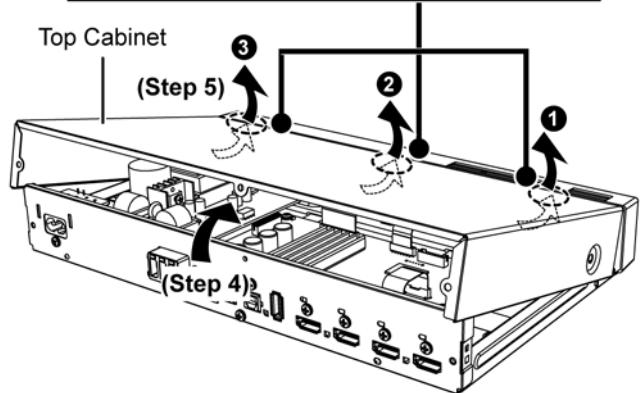

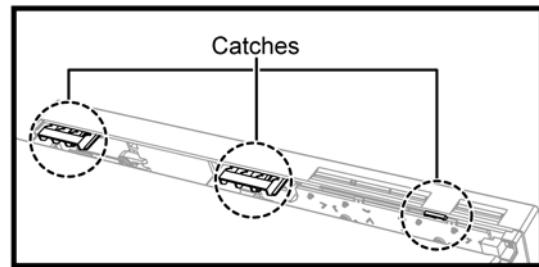

**Step 3 :** Slightly pull outwards the Top Cabinet for both sides.

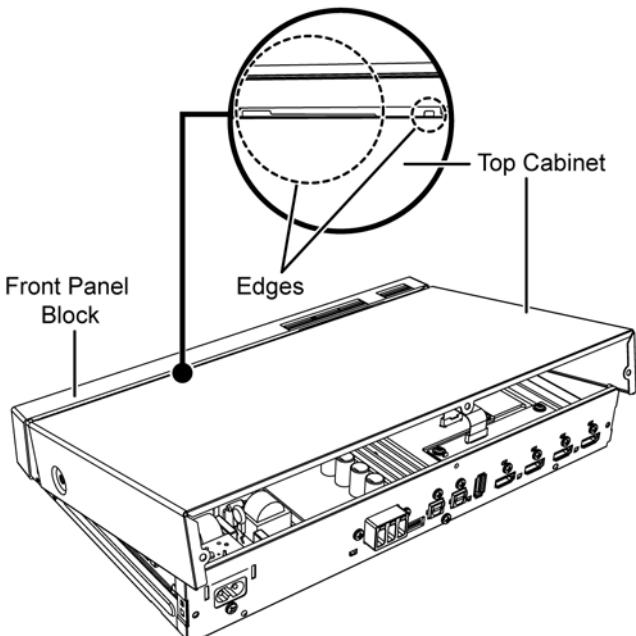

**Step 4 :** Slightly lift up the Top Cabinet as shown.

**Step 5 :** From within the Top Cabinet, gently push upwards to release the catches in sequence as shown.

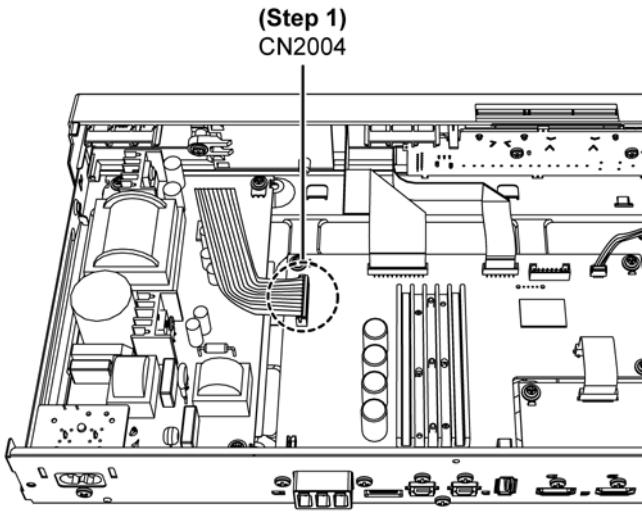

**Caution:** During assembling, ensure that the edges of Top Cabinet is inserted properly into the Front Panel Block.

### 11.4.2. Disassembly of SMPS and AC Inlet P.C.B.

- Refer to "Disassembly of Top Cabinet".

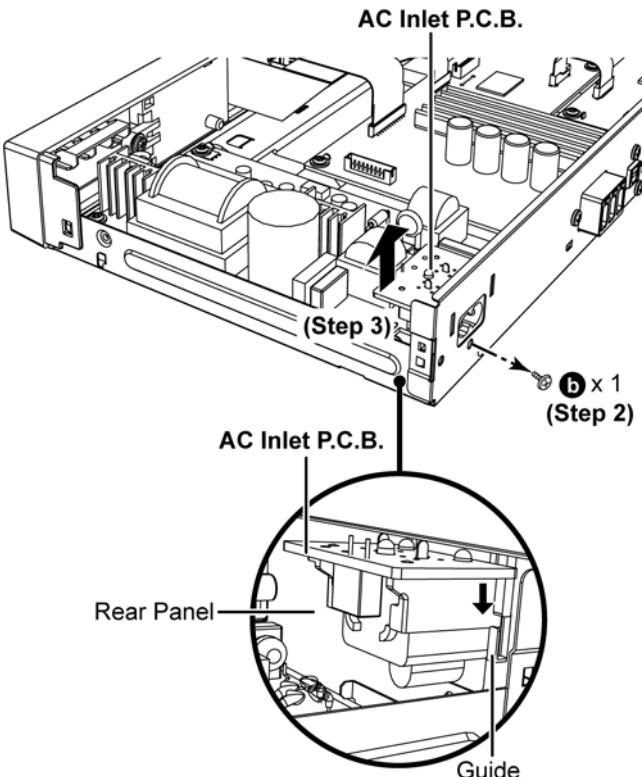

**Step 1 :** Detach 10P Cable Wire at the connector (CN2004) on the Main P.C.B..

**Step 2 :** Remove 1 screw.

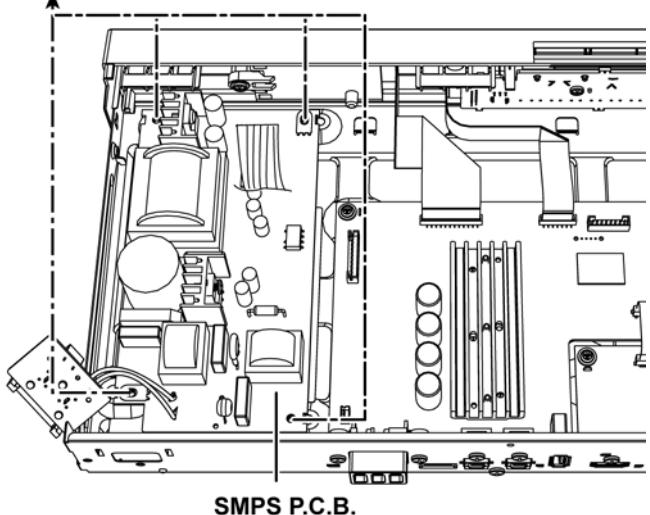

**Step 3 :** Lift up the AC Inlet P.C.B..

**Caution:** During assembling, ensure that the AC Inlet P.C.B. is inserted properly into the guides at the Rear Panel.

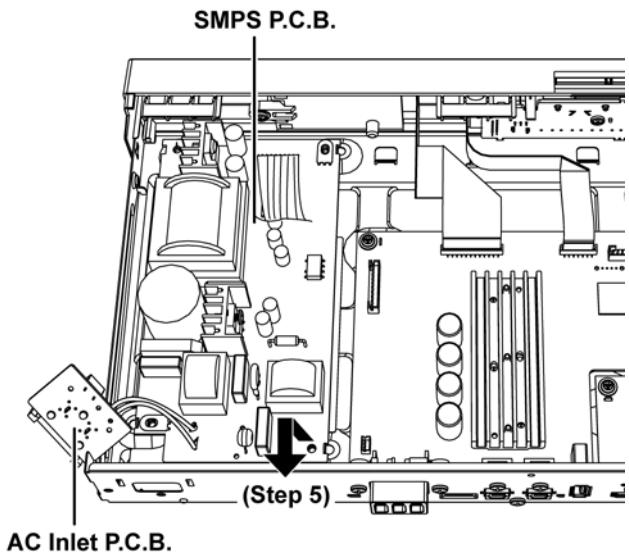

**Step 4 :** Remove 4 screws.

**(Step 4)**  
C x 4

**Step 5 :** Slightly lift up to remove the SMPS and AC Inlet P.C.B..

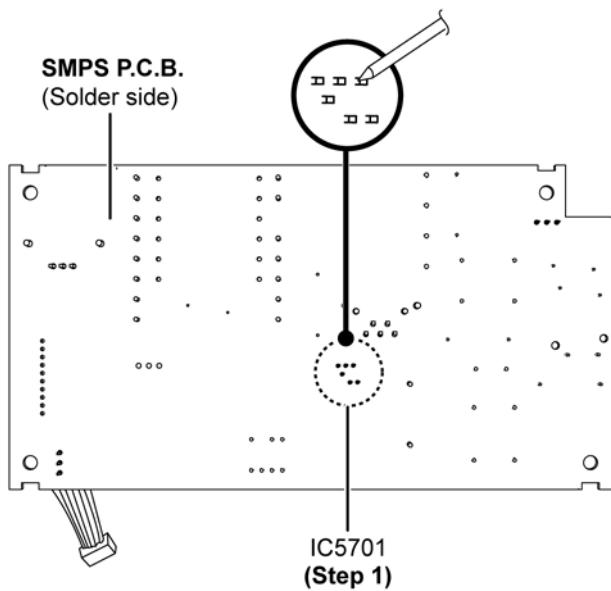

### 11.4.3. Replacement of Switching Regulator IC (IC5701)

- Refer to "Disassembly of SMPS and AC Inlet P.C.B.".

#### 11.4.3.1. Disassembly of Switching Regulator IC (IC5701)

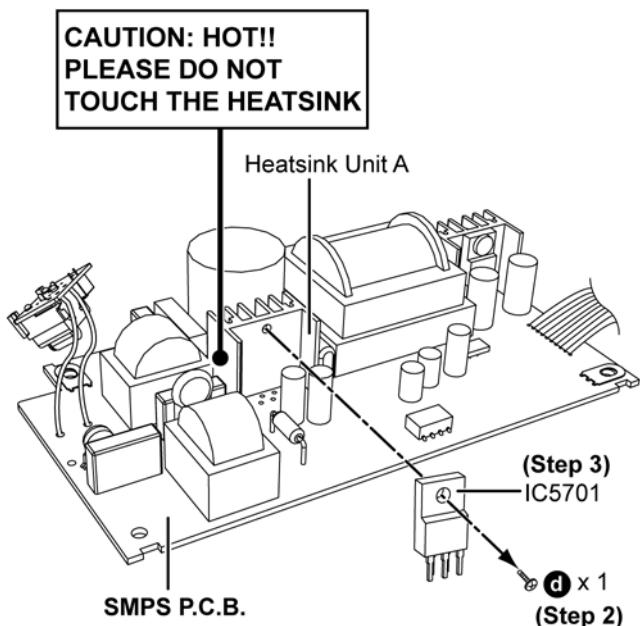

**Caution:** Handle the SMPS P.C.B. with caution. Avoid touching the Heatsink Unit A due to its high temperature after prolonged use. Touching it may lead to injuries.

**Step 1 :** Desolder the pins of Switching Regulator IC (IC5701) on the solder side of SMPS P.C.B..

**Step 2 :** Remove 1 screw.

**Step 3 :** Remove the Switching Regulator IC (IC5701) from the Heatsink Unit A.

#### 11.4.3.2. Assembly of Switching Regulator IC (IC5701)

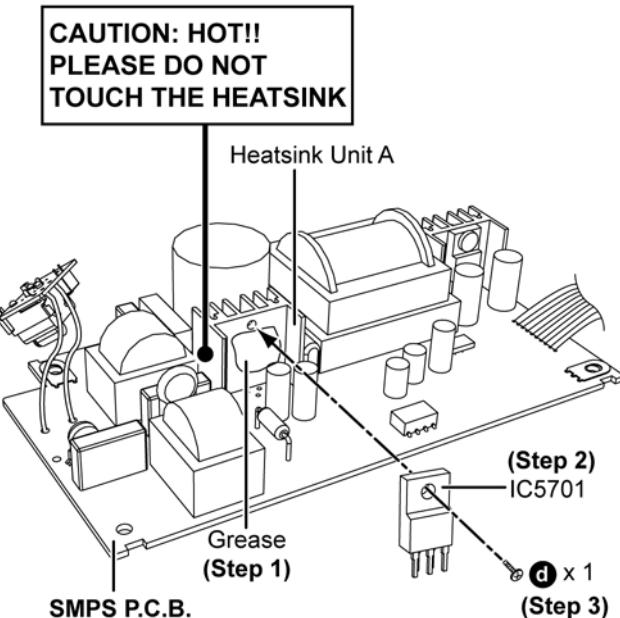

**Step 1 :** Apply grease on the Heatsink Unit A.

**Step 2 :** Fix the Switching Regulator IC (IC5701) to the SMPS P.C.B..

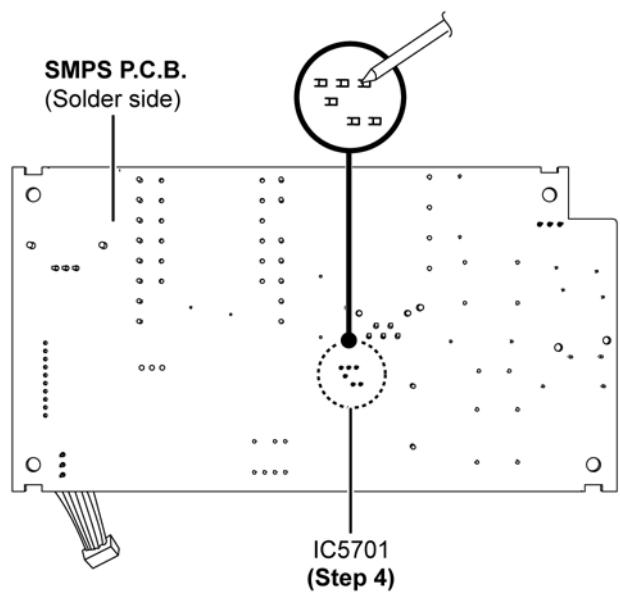

**Caution:** Ensure the pins of Switching Regulator IC (IC5701) are inserted and seated properly on the SMPS P.C.B..

**Step 3 :** Fix the Switching Regulator IC (IC5701) onto the Heatsink Unit A with a screw.

**Caution:** Ensure the Switching Regulator IC (IC5701) is tightly screwed to the Heatsink Unit A.

**Step 4 :** Solder the pins of Switching Regulator IC(IC5701) on the solder side of SMPS P.C.B..

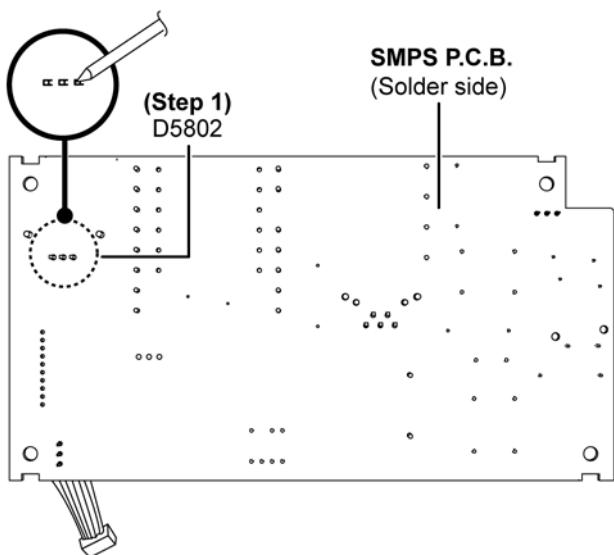

#### 11.4.4. Replacement of Rectifier Diode (D5802)

- Refer to "Disassembly of SMPS and AC Inlet P.C.B.".

##### 11.4.4.1. Disassembly of Rectifier Diode (D5802)

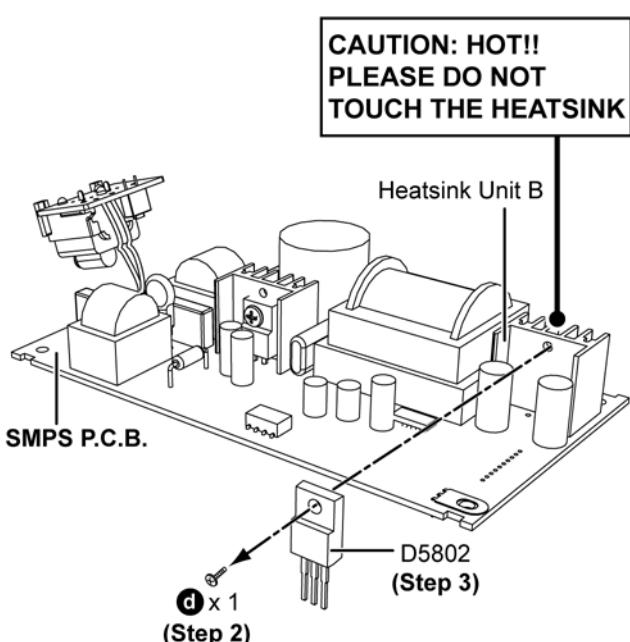

**Caution:** Handle the SMPS P.C.B. with caution. Avoid touching the Heatsink Unit B due to its high temperature after prolonged use. Touching it may lead to injuries.

**Step 1 :** Desolder the pins of the Rectifier Diode (D5802) on the solder side of SMPS P.C.B..

**Step 2 :** Remove 1 screw.

**Step 3 :** Remove the Rectifier Diode (D5802) from the Heatsink Unit B.

#### 11.4.4.2. Assembly of Rectifier Diode (D5802)

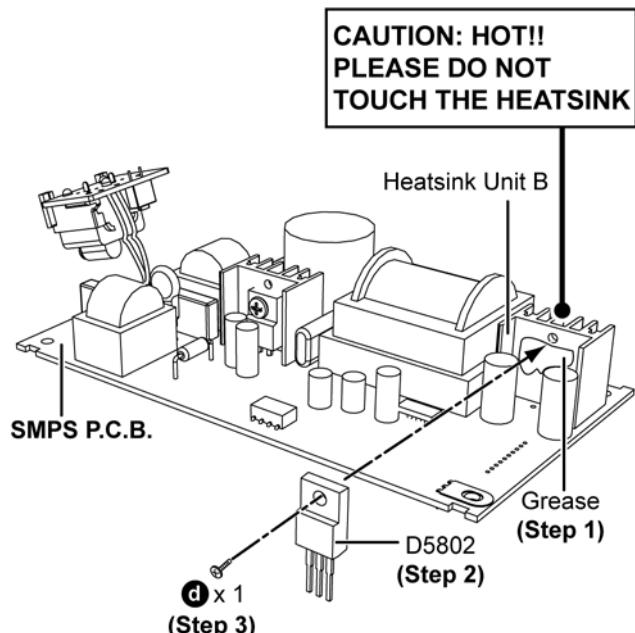

**Step 1 :** Apply grease on the Heatsink Unit B.

**Step 2 :** Fix the Rectifier Diode (D5802) onto the SMPS P.C.B..

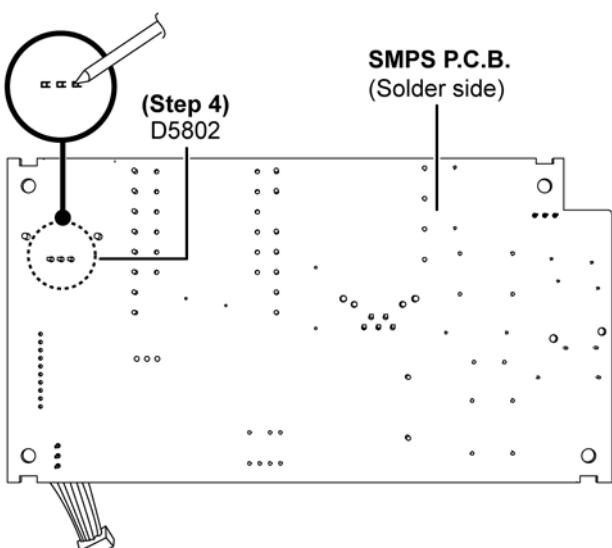

**Caution:** Ensure the pins of Rectifier Diode (D5802) are inserted and seated properly on the SMPS P.C.B..

**Step 3 :** Fix the Rectifier Diode (D5802) onto the Heatsink Unit B with a screw.

**Caution:** Ensure the Rectifier Diode (D5802) is tightly screwed to Heatsink Unit B.

**Step 4 :** Solder the pins of the Rectifier Diode (D5802) on the solder side of SMPS P.C.B..

### 11.4.5. Disassembly of Main P.C.B.

- Refer to "Disassembly of Top Cabinet".

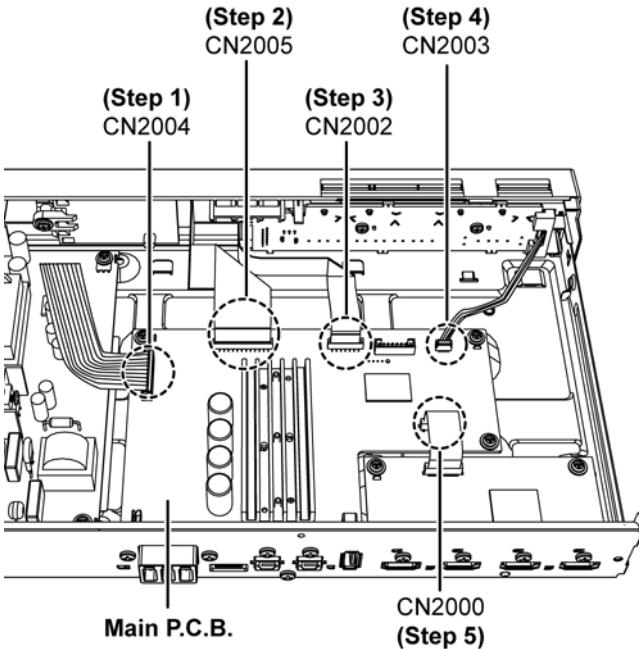

**Step 1** : Detach 10P Cable Wire at the connector (CN2004) on the Main P.C.B..

**Step 2** : Detach 24P FFC at the connector (CN2005) on the Main P.C.B..

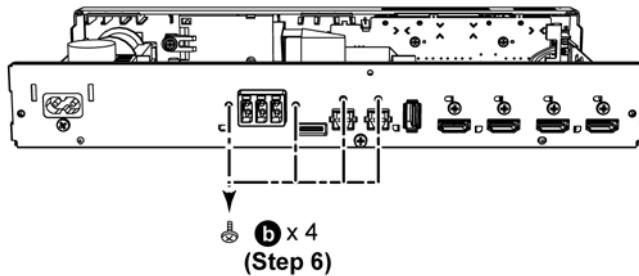

**Step 3** : Detach 13P FFC at the connector (CN2002) on the Main P.C.B..

**Step 4** : Detach 5P Wire at the connector (CN2003) on the Main P.C.B..

**Step 5** : Detach 26P FFC at the connector (CN2000) on the Main P.C.B..

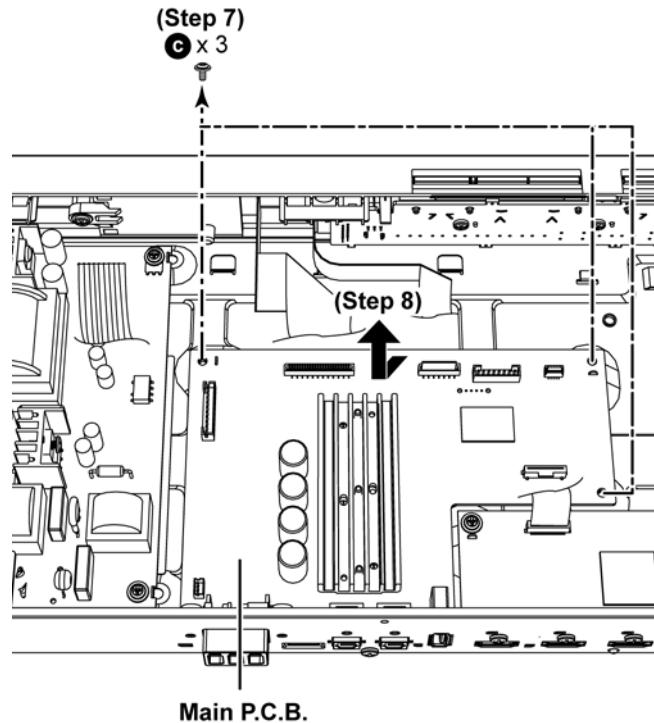

**Step 6** : Remove 4 screws.

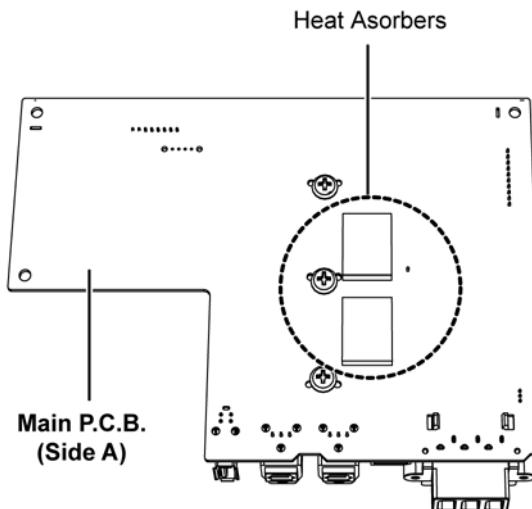

**Step 7** : Remove 3 screws.

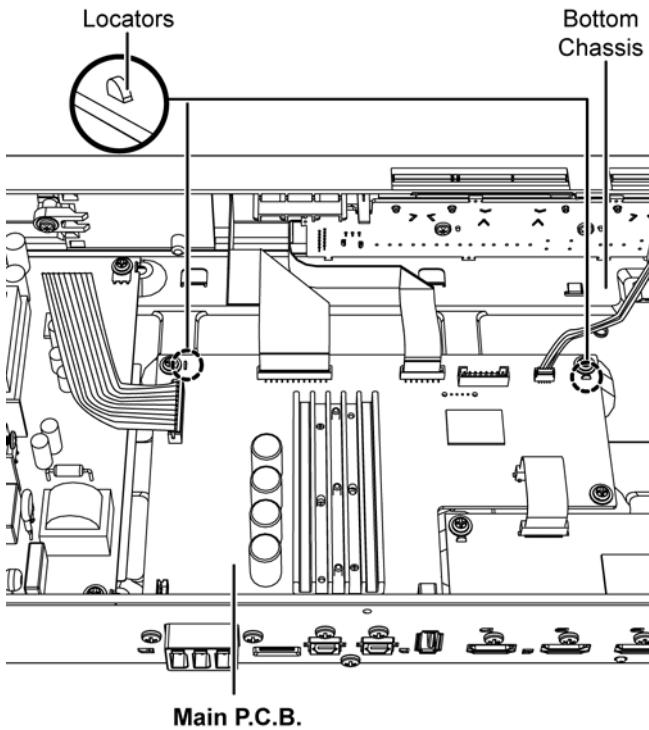

**Step 8** : Slightly lift up to remove the Main P.C.B..

**Caution 1:** During assembling, ensure that the 2 Heat Asorbers are placed properly onto the the Main P.C.B. (Side A).

**Caution 2: During assembling, ensure that the Main P.C.B. is inserted and seated properly onto the 2 locators of the Bottom Chassis.**

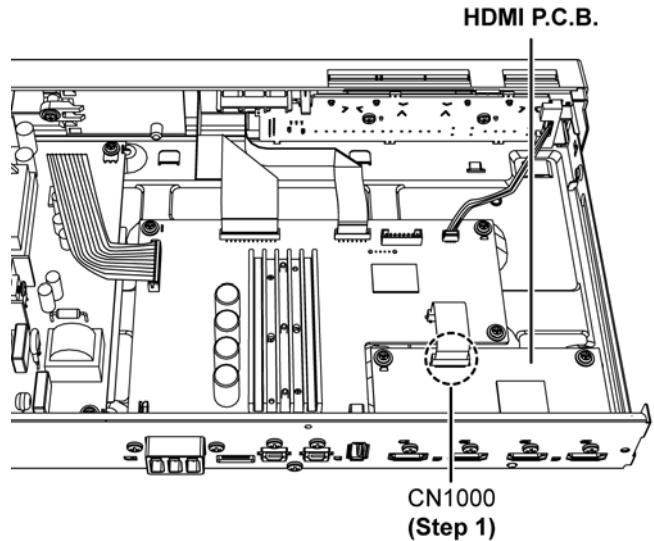

Main P.C.B.

#### 11.4.6. Disassembly of HDMI P.C.B.

- Refer to "Disassembly of Top Cabinet".

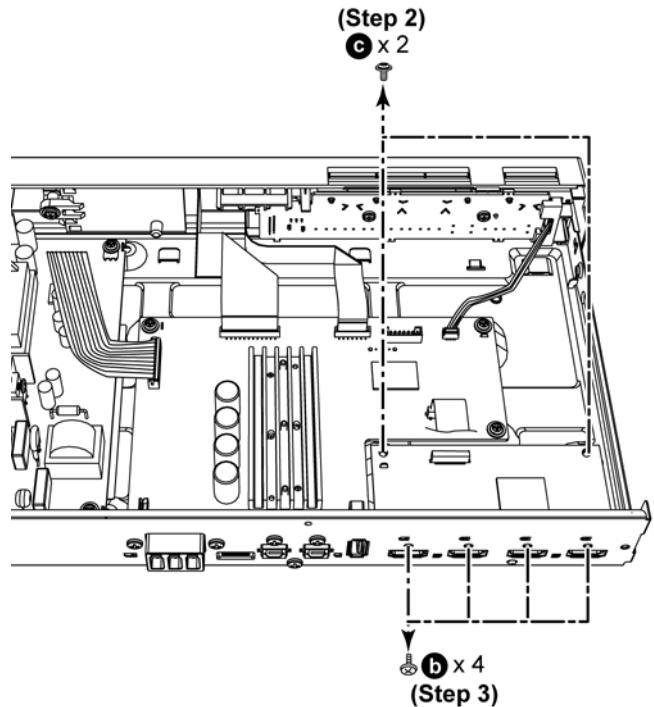

**Step 1 :** Detach 26P FFC at the connector (CN1000) on the HDMI P.C.B..

CN1000  
(Step 1)

**Step 2 :** Remove 2 screws.

**Step 3 :** Remove 4 screws.

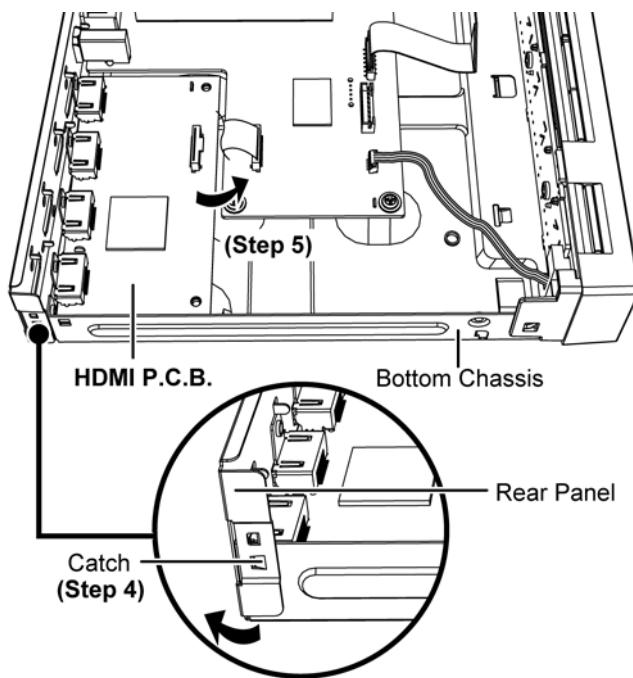

b x 4  
(Step 3)

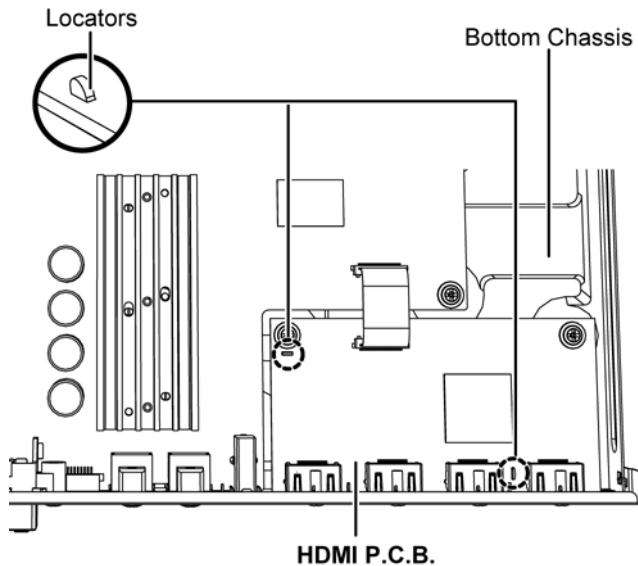

**Step 4 :** Release the catch on the right side of the Rear Panel.

**Caution:** During assembling, ensure that the Rear Panel is caughted properly onto the Bottom Chassis.

**Step 5 :** Remove the HDMI P.C.B..

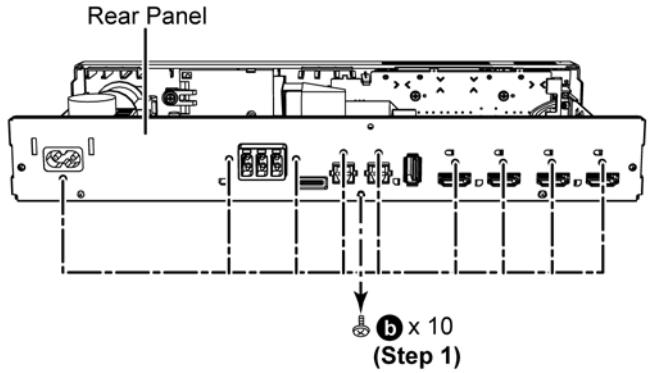

**Caution:** During assembling, ensure that the HDMI P.C.B. is inserted and seated properly onto the 2 locators of the Bottom Chassis.

#### 11.4.7. Disassembly of Rear Panel

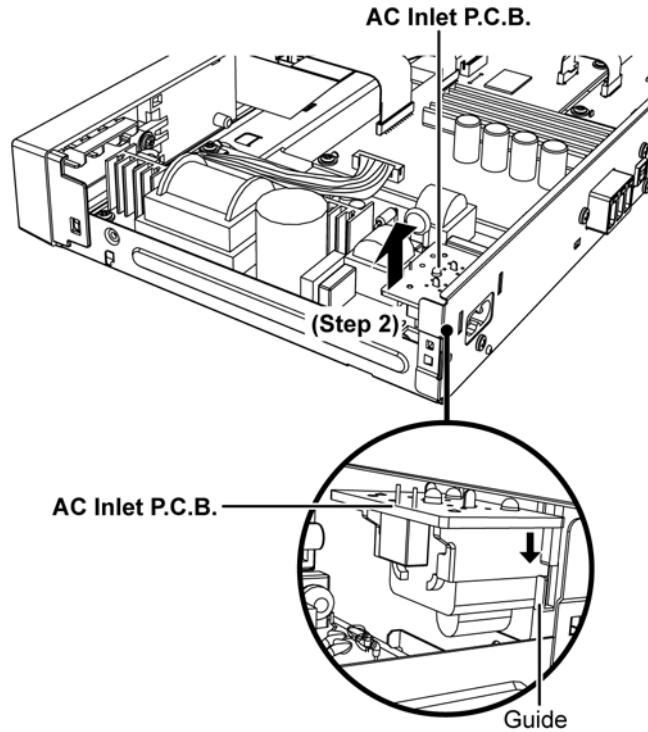

- Refer to "Disassembly of Top Cabinet".

**Step 1 :** Remove 10 screws.

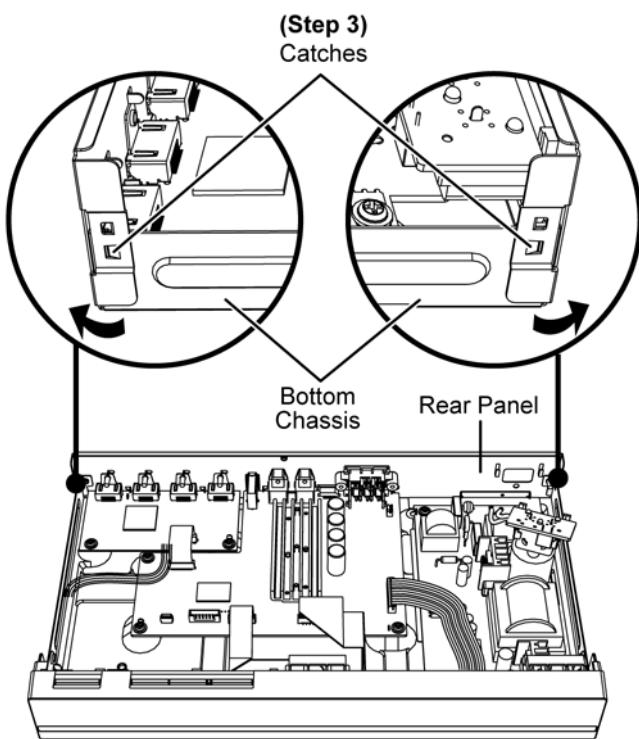

**Step 2 :** Lift up the AC Inlet P.C.B..

**Caution:** During assembling, ensure that the AC Inlet P.C.B. is inserted properly into the guide.

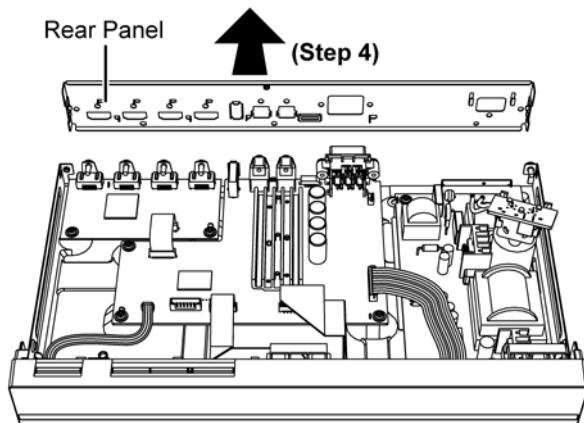

**Step 3 :** Release the catches on the both side of the Rear Panel.

**Caution:** During assembling, ensure that the Rear Panel is caughted properly onto the Bottom Chassis.

**Step 4 : Remove the Rear Panel.**

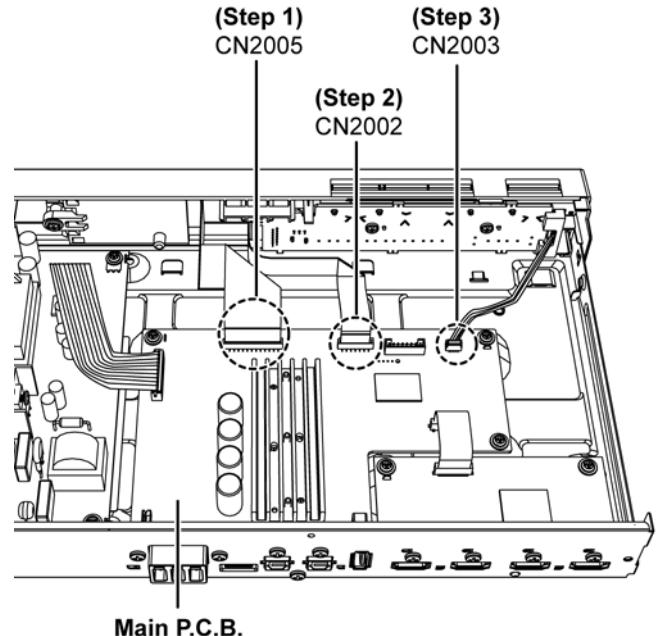

#### 11.4.8. Disassembly of Front Panel Block

- Refer to "Disassembly of Top Cabinet".

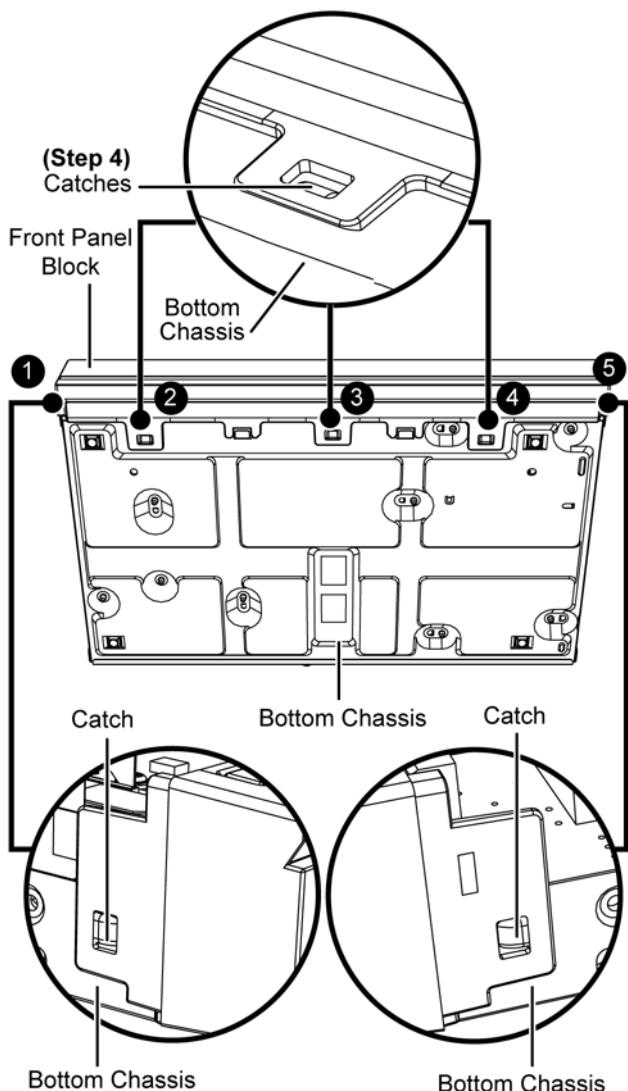

**Step 1 :** Detach 24P FFC at the connector (CN2005) on the Main P.C.B..

**Step 2 :** Detach 13P FFC at the connector (CN2002) on the Main P.C.B..

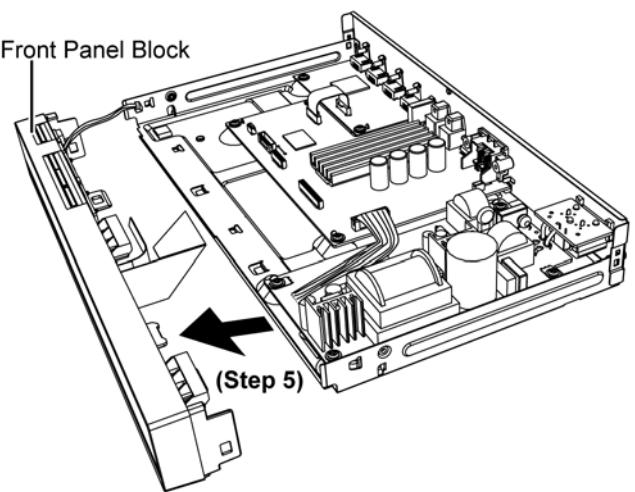

**Step 3 :** Detach 5P Wire at the connector (CN2003) on the Main P.C.B..

**Step 4 :** Release the catches in sequence (1-5) as shown.  
**Caution:** During assembling, ensure that the Front Panel Block is caught and inserted properly onto the Bottom Chassis.

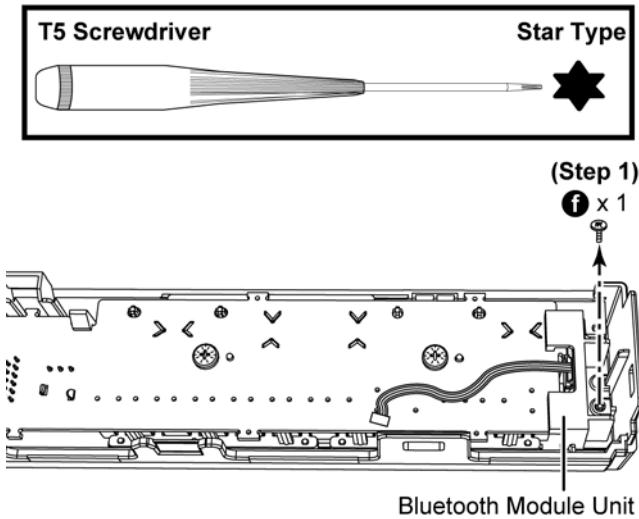

**Step 5 :** Remove the Front Panel Block.

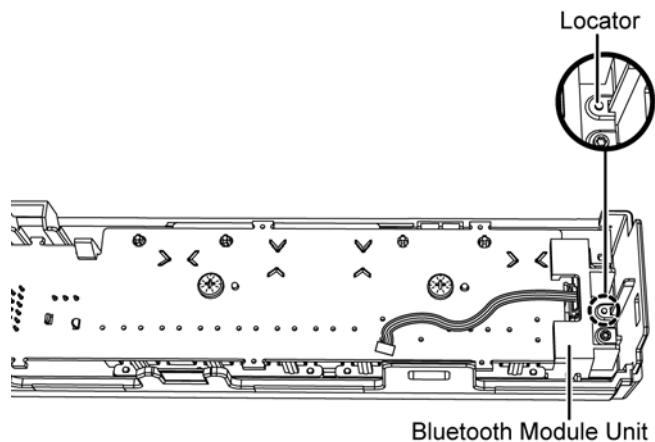

### 11.4.9. Disassembly of Bluetooth Module P.C.B.

- Refer to "Disassembly of Top Cabinet".
- Refer to "Disassembly of Front Panel Block".

**Step 1 :** Remove 1 screw by using T5 Screwdriver.

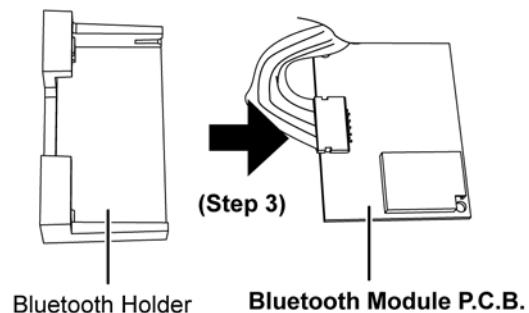

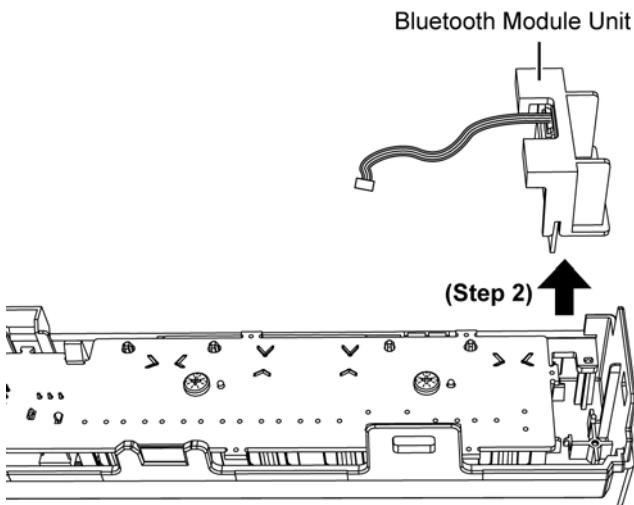

**Caution :** During assembling, ensure that the Bluetooth Module Unit is seated properly onto the locator.

**Step 3 :** Remove the Bluetooth Module P.C.B. from the Bluetooth Holder.

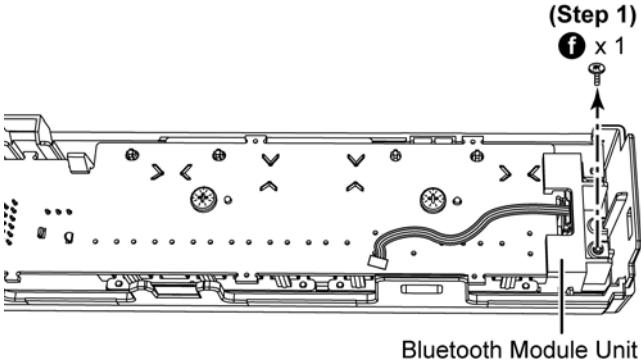

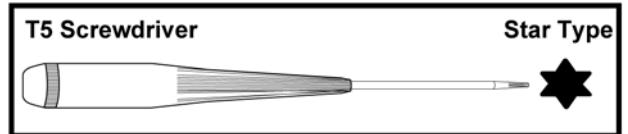

**Step 2 :** Remove the Bluetooth Module Unit.

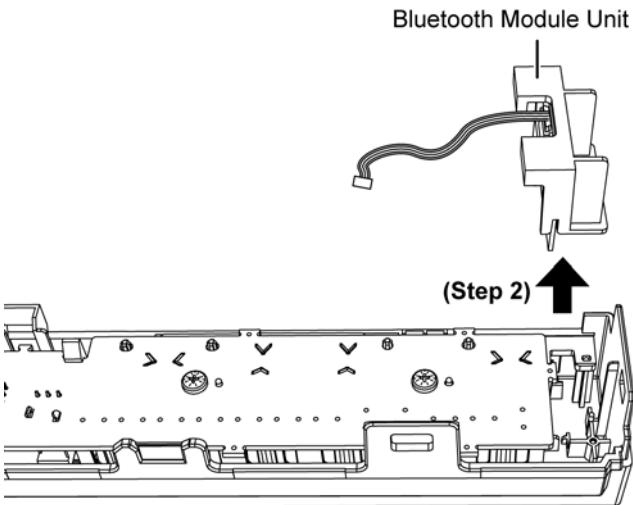

### 11.4.10. Disassembly of Panel P.C.B.

- Refer to "Disassembly of Top Cabinet".
- Refer to "Disassembly of Front Panel Block".

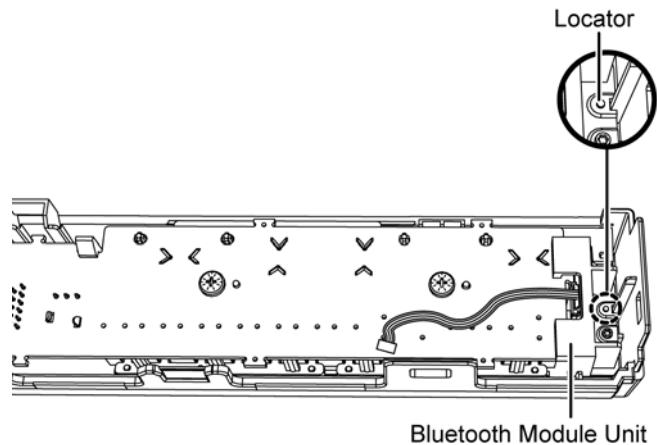

**Step 1 :** Remove 1 screw by using T5 Screwdriver.

**Step 2 :** Remove the Bluetooth Module Unit.

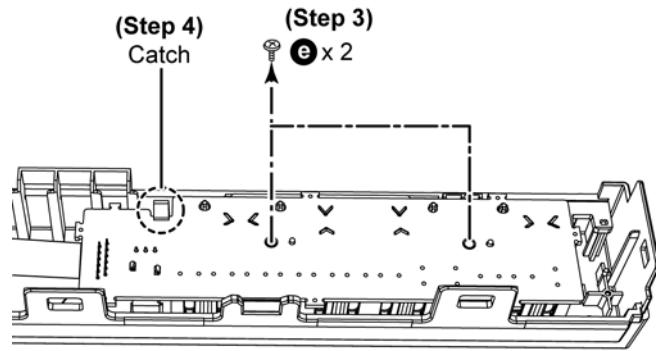

**Caution:** During assembling, ensure that the Bluetooth Module Unit is seated properly onto the locator.

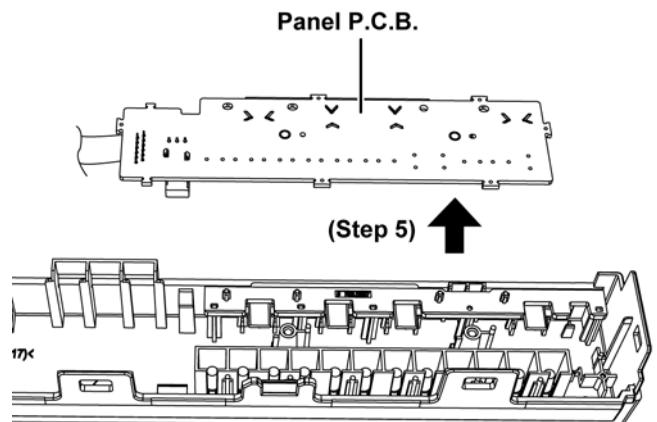

**Step 3 :** Remove 2 screws.

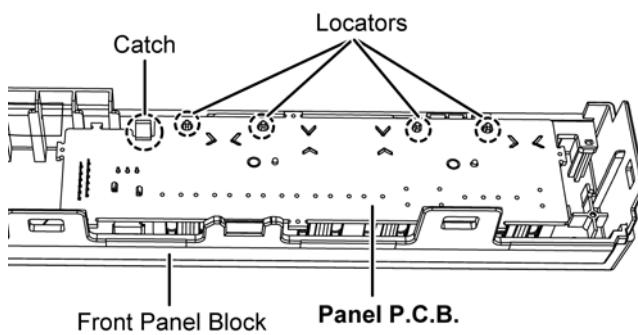

**Step 4 :** Release the catch.

**Step 5 :** Remove the Panel P.C.B..

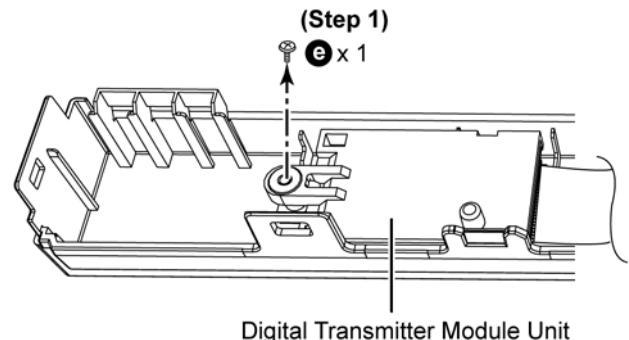

**Caution:** During assembling, ensure that the Panel P.C.B. is caught and seated properly onto the locators of the Front Panel Block.

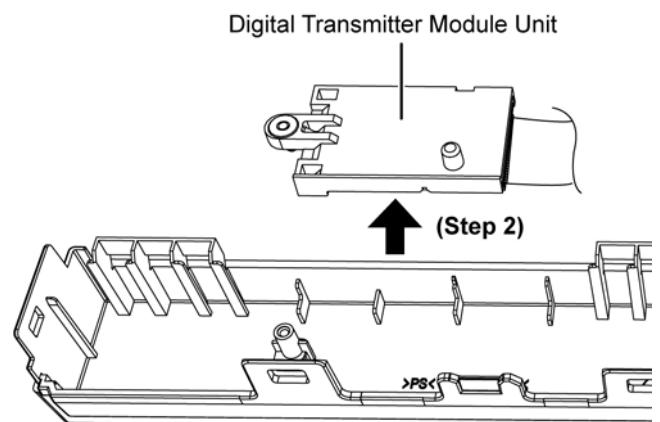

#### 11.4.11. Disassembly of Digital Transmitter Module P.C.B.

- Refer to "Disassembly of Top Cabinet".
- Refer to "Disassembly of Front Panel Block".

**Step 1 :** Remove 1 screw.

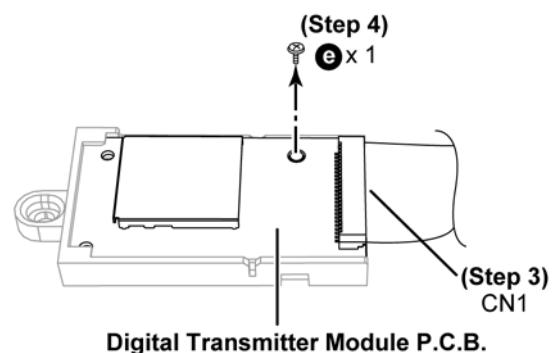

**Step 2 :** Remove the Digital Transmitter Module Unit.

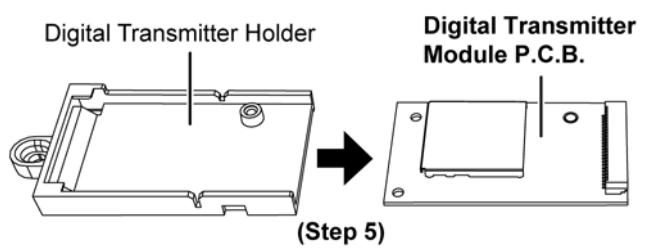

**Step 3 :** Detach 24P FFC at the connector (CN1) on the Digital Transmitter Module P.C.B..

**Step 4 :** Remove 1 screw.

**Step 5 :** Remove the Digital Transmitter Module P.C.B. from the Digital Transmitter Holder.

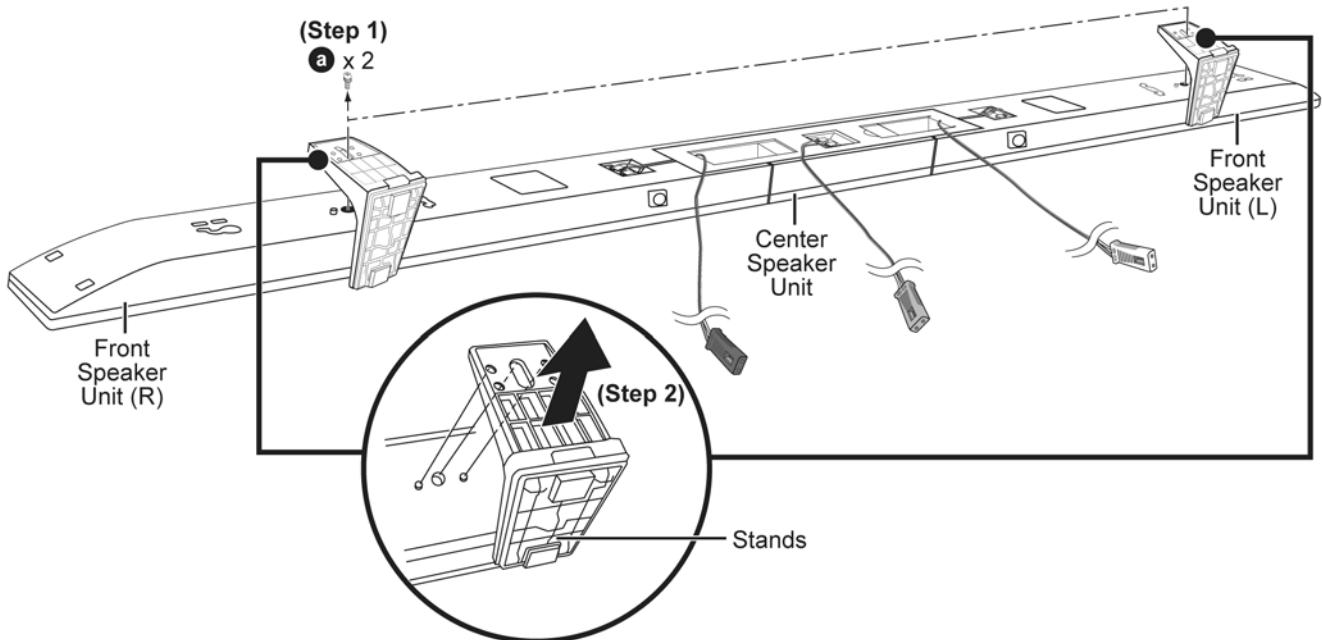

## 11.5. Disassembly of Front and Center Speaker Units Position

### 11.5.1. Disassembly of Front and Center Speaker Units in Bar position

- Front Speaker Unit with Stands

Step 1 : Remove 2 screws.

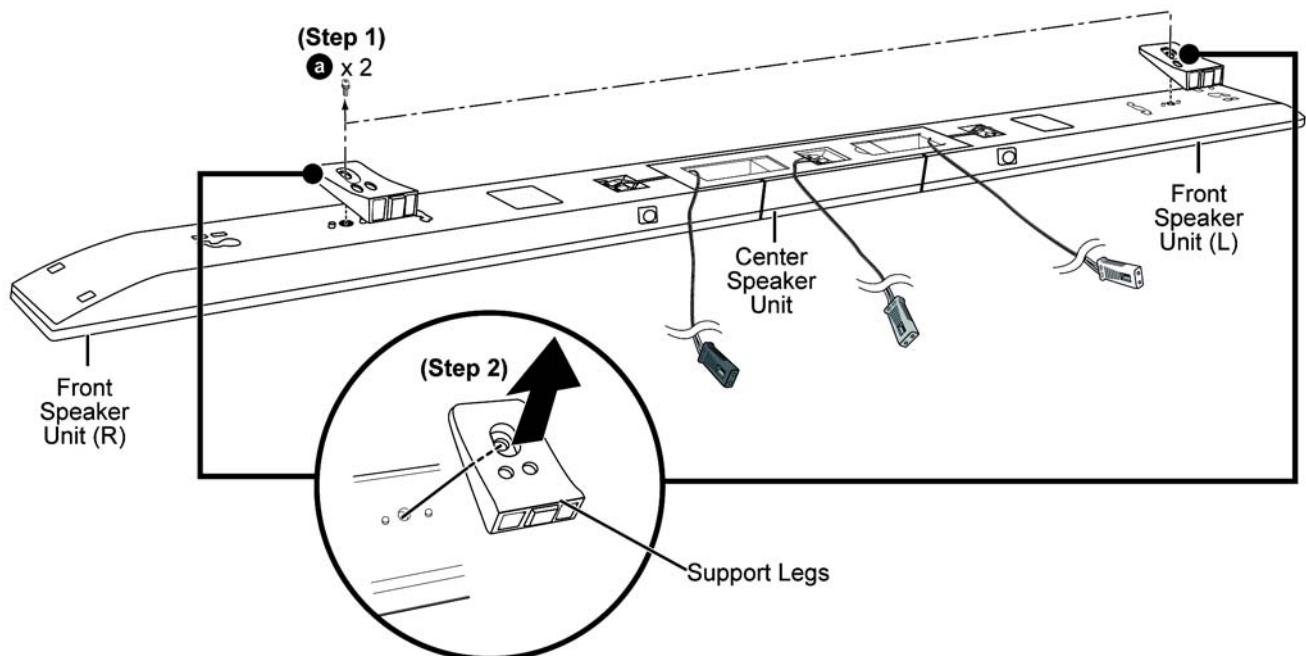

Step 2 : Remove 2 Stands.

- Front Speaker Unit with Support Legs

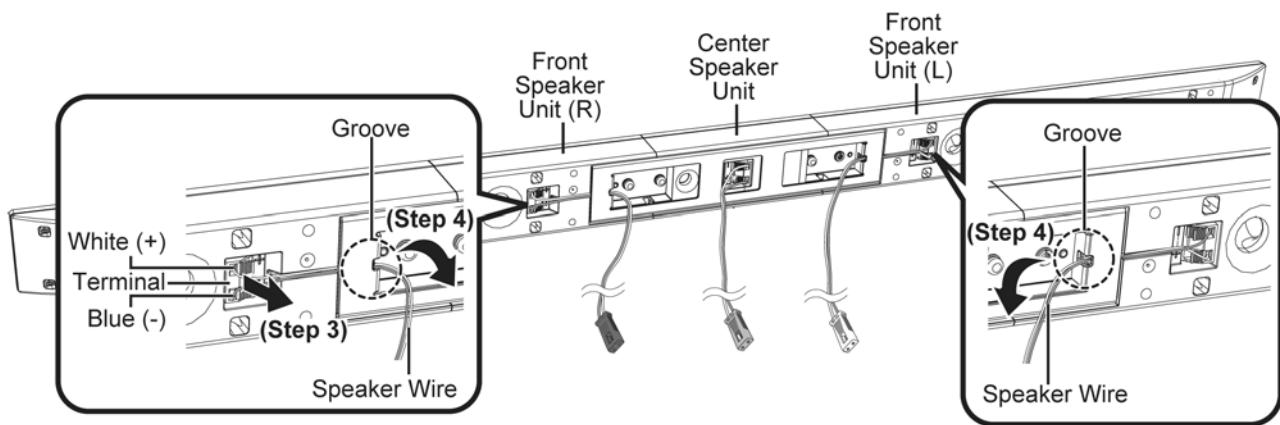

Step 1 : Remove 2 screws.

Step 2 : Remove 2 Support Legs.

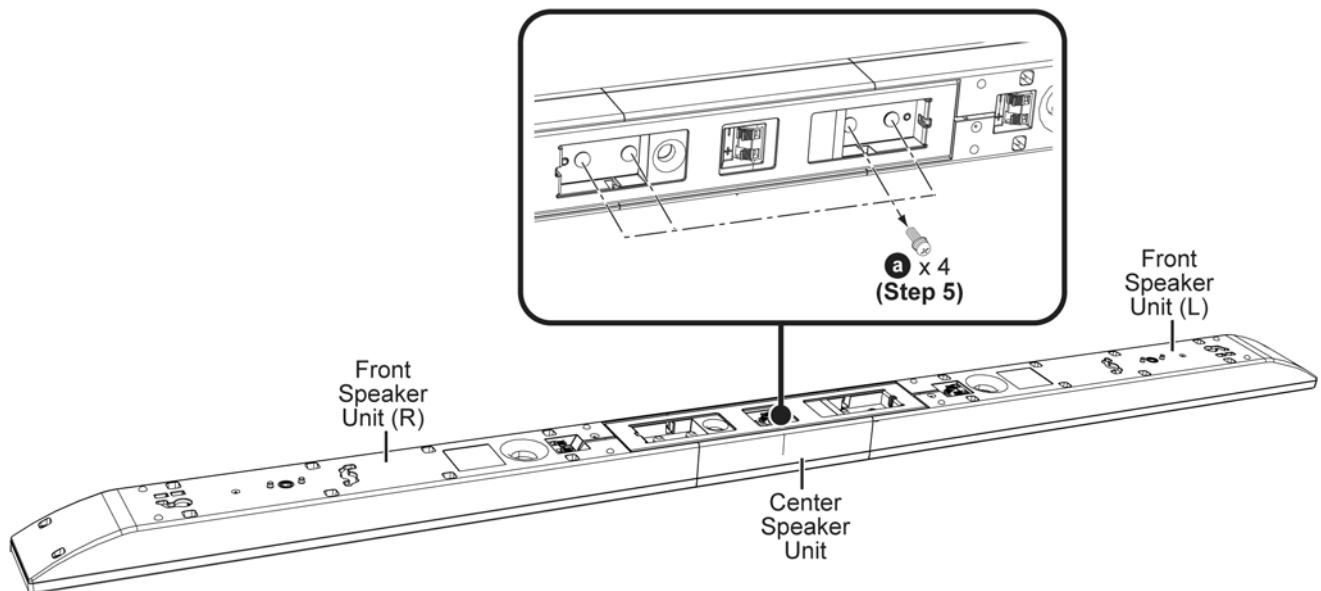

**Step 3** : Release the White (+) and Blue (-) Speaker Wire from the Terminal.

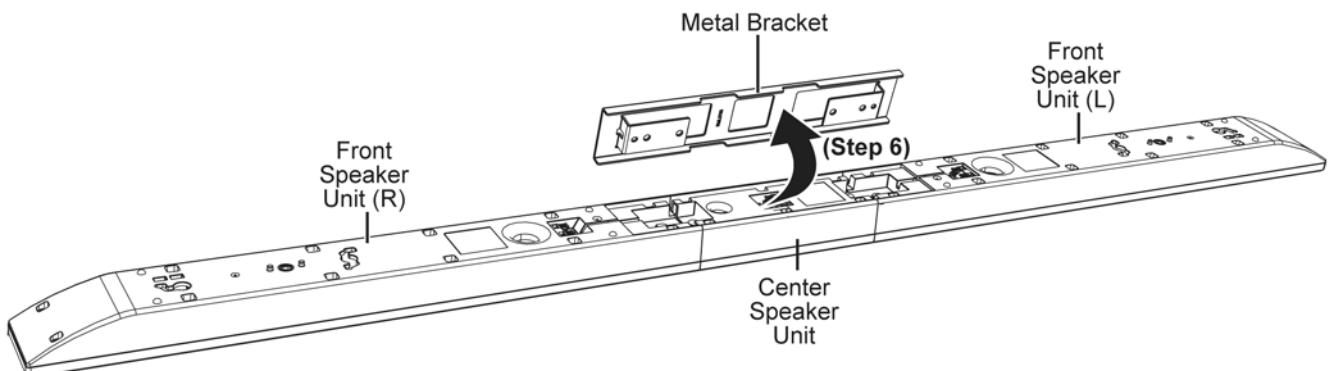

**Step 4** : Release the Speaker Wire through the groove.

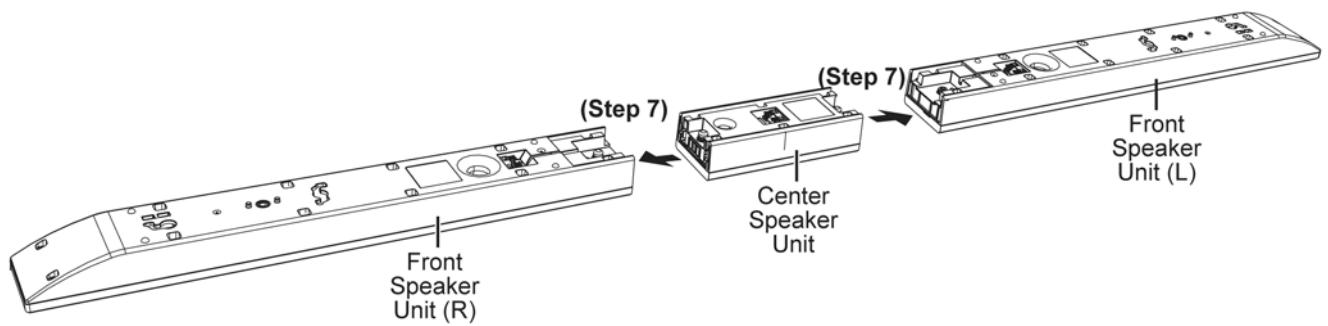

**Step 5** : Remove 4 screws.

**Step 6** : Lift up and remove the Metal Bracket.

**Step 7 : Detach the Front Speaker Unit (L) and (R) from the Center Speaker Unit.**

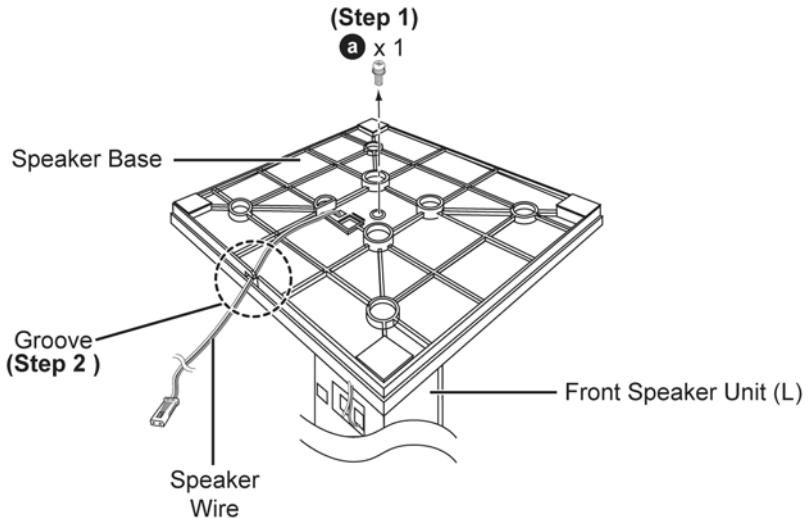

## 11.5.2. Disassembly of Front Speaker Unit in Standing position

Note : Front Speaker Unit (L) and (R) have the same mechanical structure. Therefore only the disassembly method for Front Speaker Unit (L) will be described in this section.

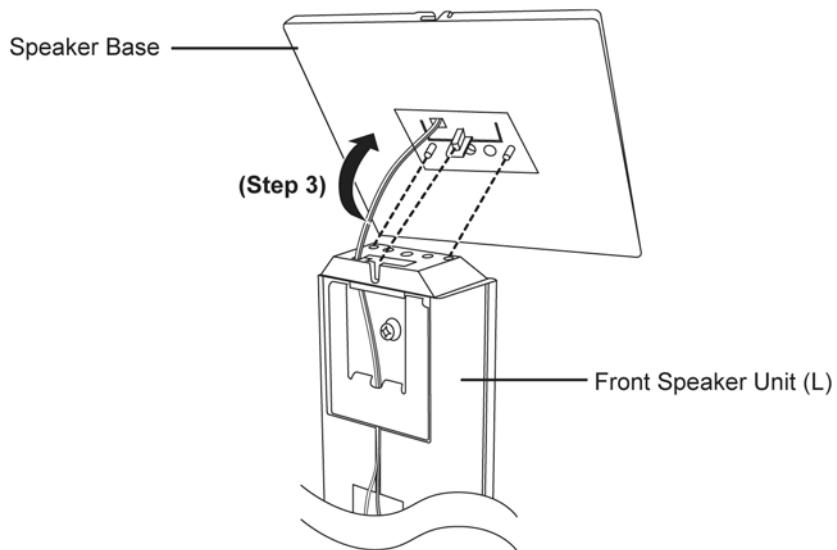

**Step 1** : Remove 1 screw.

**Step 2** : Release the Speaker Wire from the groove.

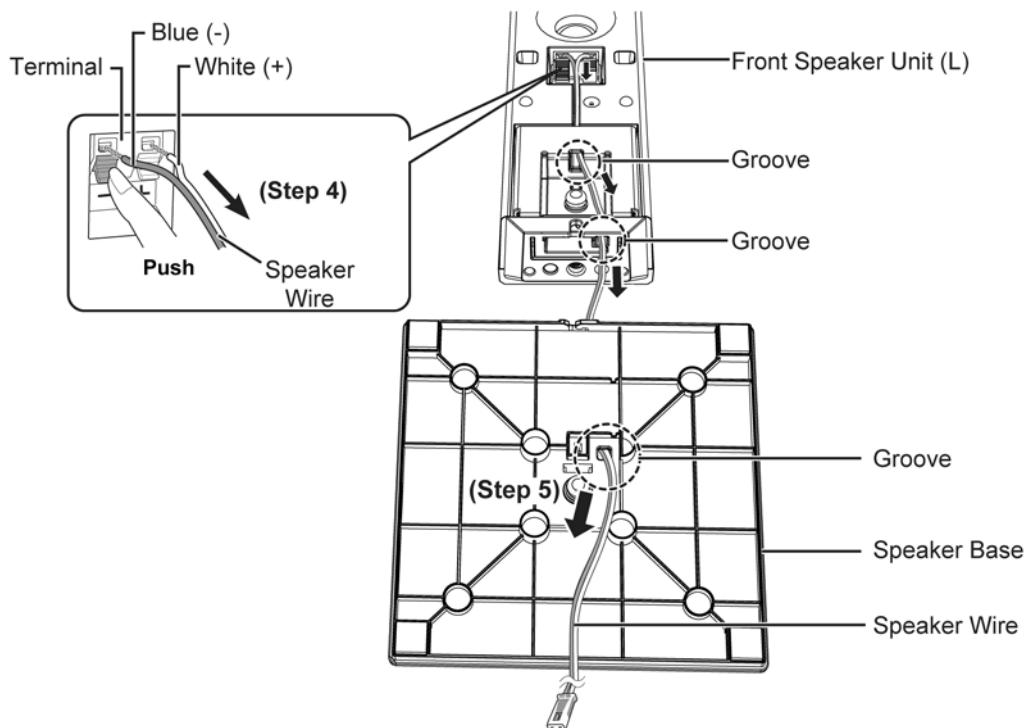

**Step 3** : Slightly lift up the Speaker Base.

**Caution:** Do not remove the Speaker Base entirely.

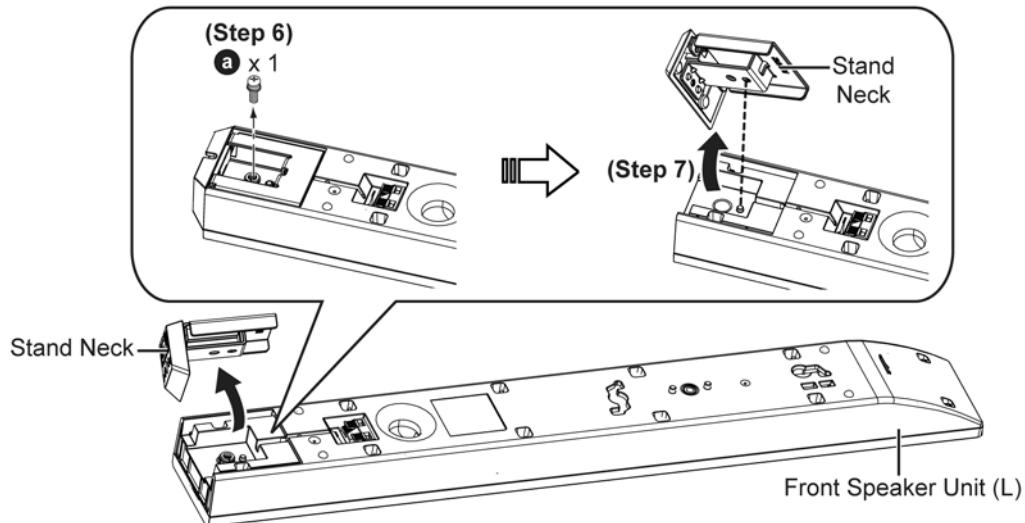

**Step 4 :** Release the White (+) and Blue (-) Speaker Wire from the Terminal.

**Step 5 :** Remove the Speaker Wire through the grooves.

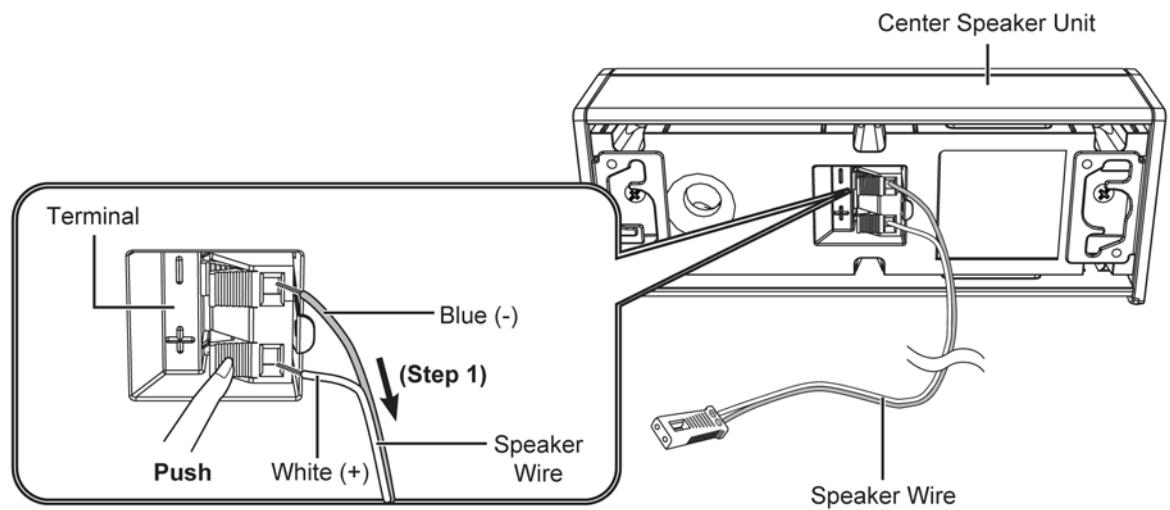

**Step 6 :** Remove 1 screw.

**Step 7 :** Remove the Stand Neck.

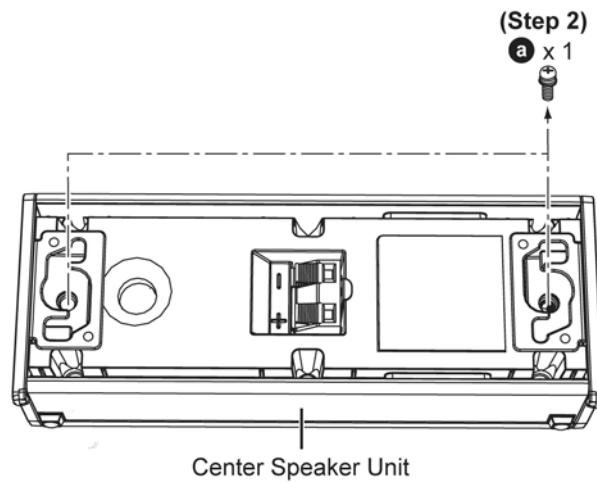

### 11.5.3. Disassembly of Center Speaker Unit in Standing position

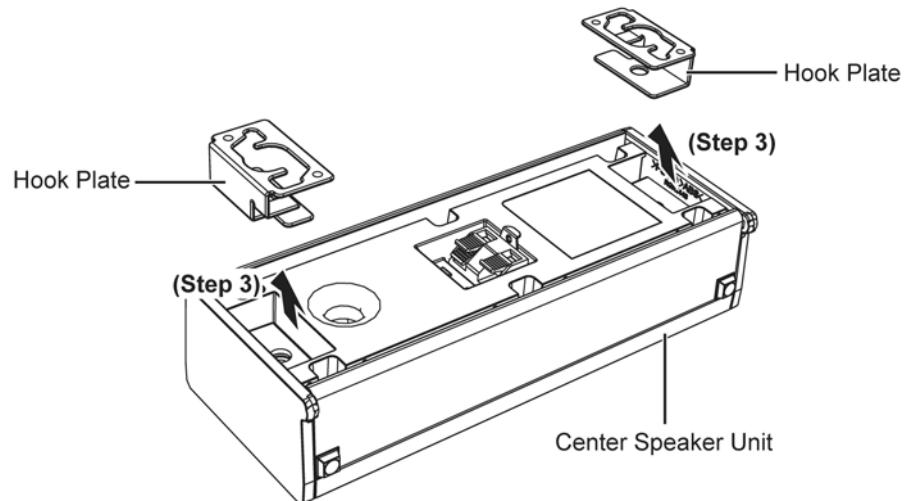

**Step 1 :** Release the White (+) and Blue (-) Speaker wire from the Terminal.

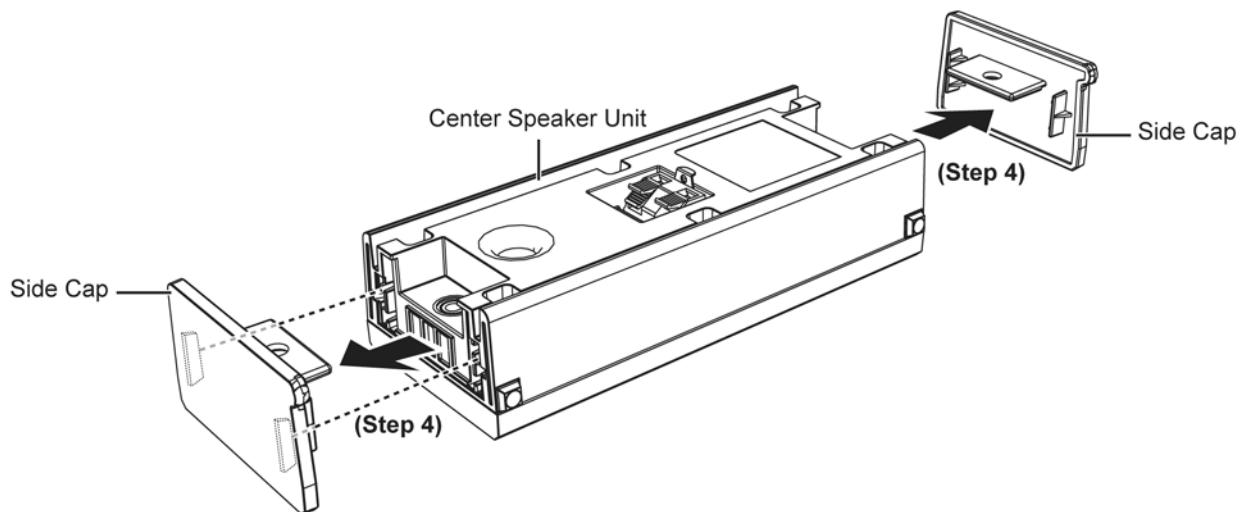

**Step 2 :** Remove 2 screws.

**Step 3 : Remove the Hook Plates.**

**Step 4 : Remove the Side Caps.**

## 11.6. Disassembly of Front Speaker (L&R) (SB-HTB570)

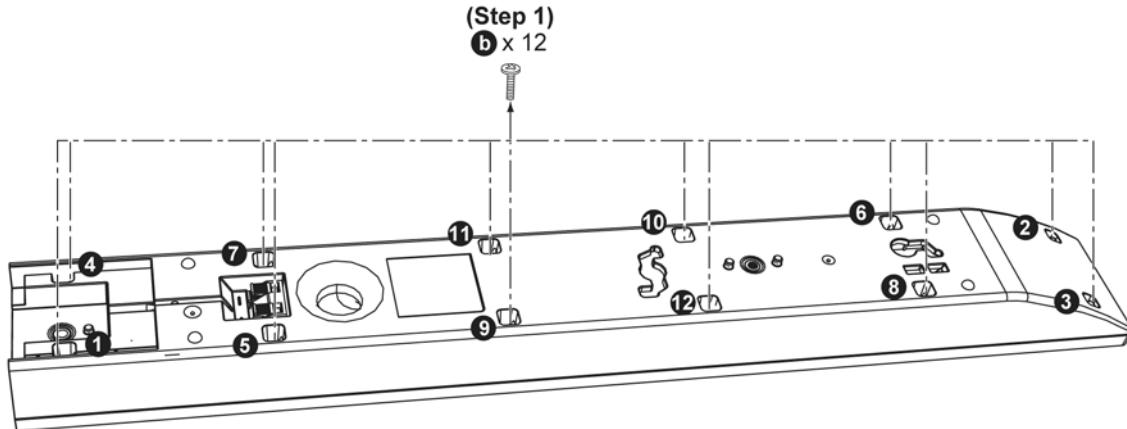

Note : Front Speaker Unit (L) and (R) have the same mechanical structure. Therefore only the disassembly method for Front Speaker Unit (L) will be described in this section.

### 11.6.1. Disassembly of Rear Cabinet Assembly

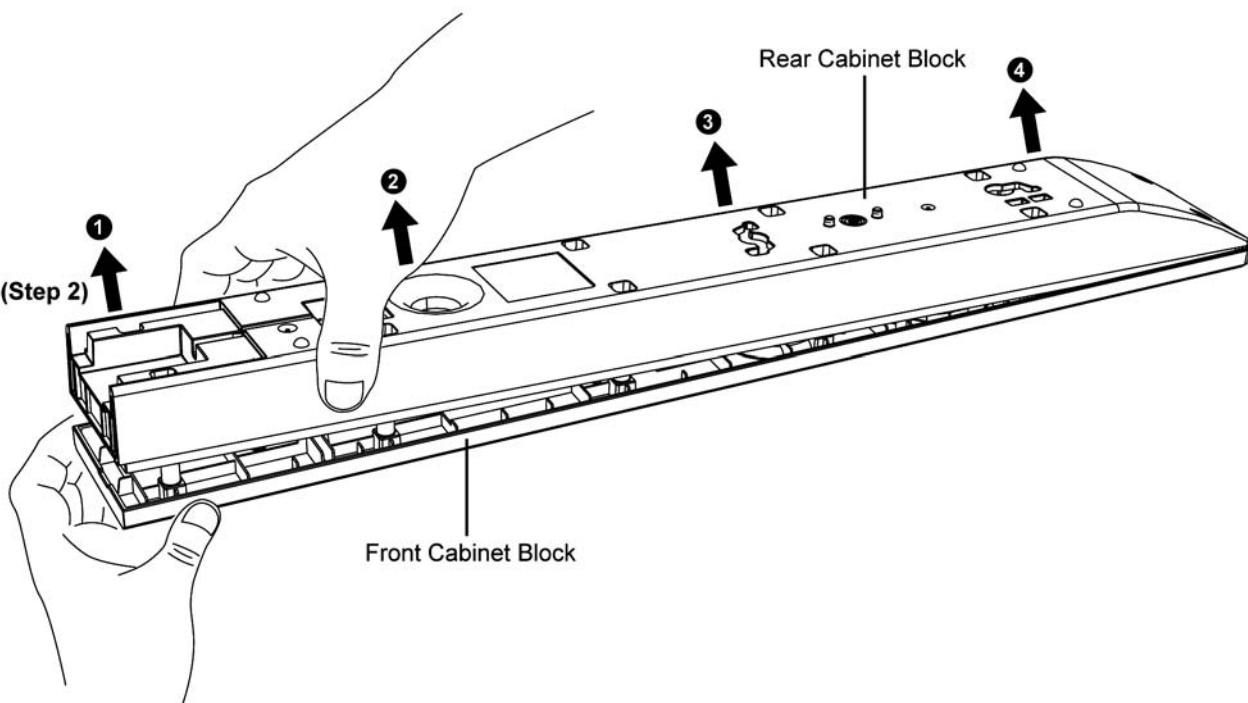

- Refer to "Disassembly of Front Speaker Unit".

**Step 1 :** Remove 12 screws.

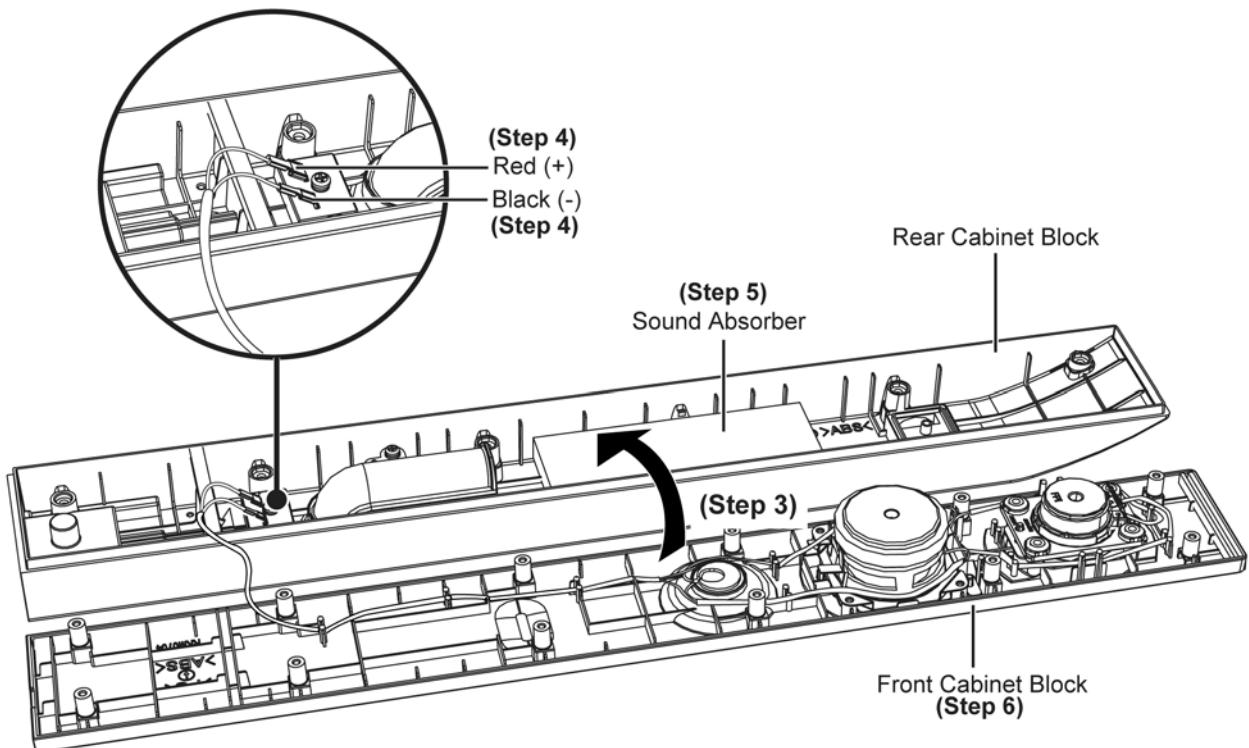

**Caution:** During assembling, fixed the screws in sequence of 1 to 12 as shown.

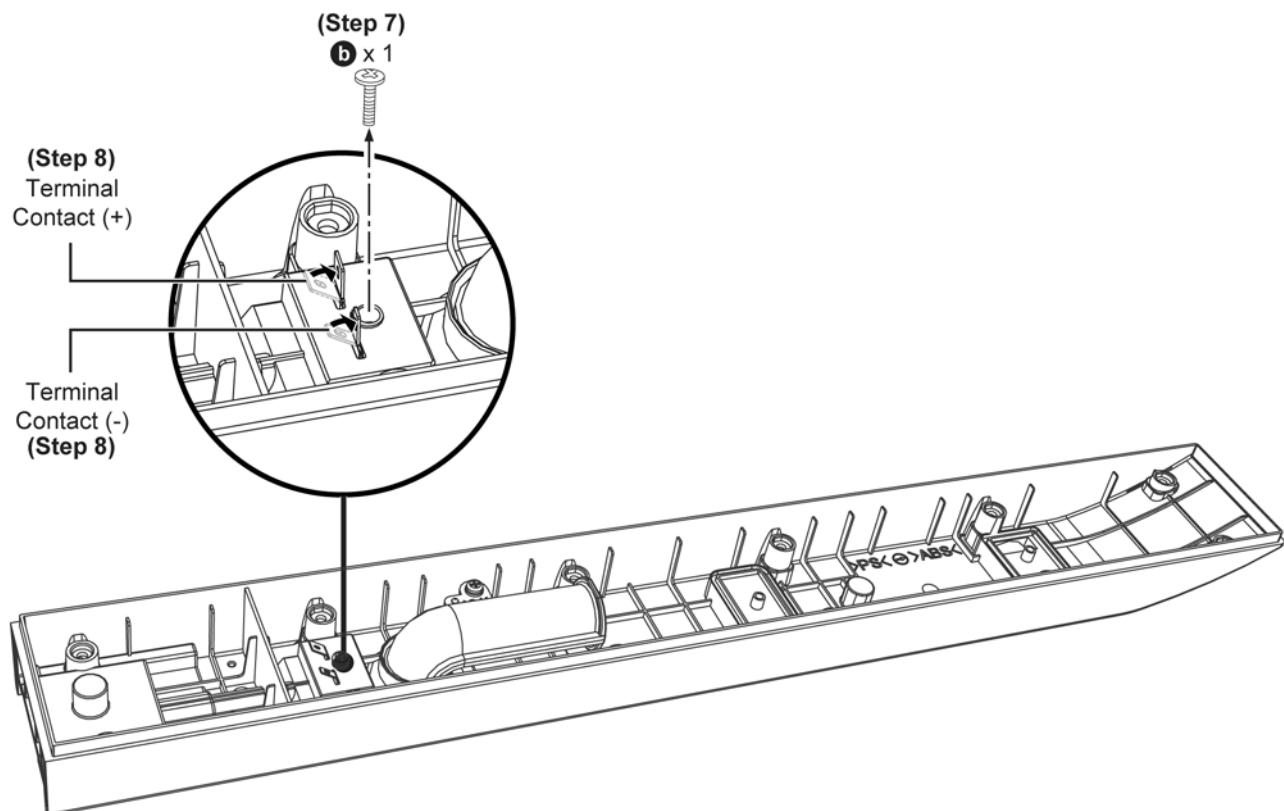

**Step 2 :** Detach the Rear Cabinet Block from the Front Cabinet Block in sequence (1-4) as shown.

- Step 3** : Upset the Rear Cabinet Block by the side of the Front Cabinet Block.  
**Step 4** : Detach the Red (+) and Black (-) wire from the Terminal.  
**Step 5** : Remove the Sound Absorber.  
**Caution:** Safe keep the Sound Absorber and place them back during assembling.  
**Step 6** : Remove the Front Cabinet Block.

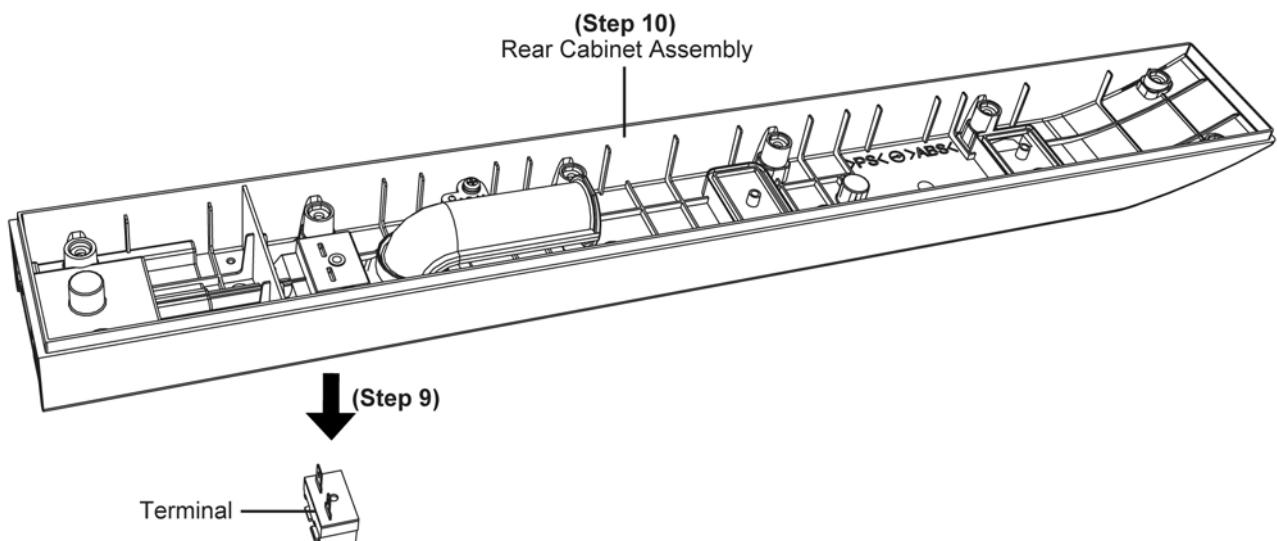

- Step 7** : Remove 1 screw.  
**Step 8** : Unbend the Terminal Contacts (+) and (-).  
**Caution:** Do not exert too much force as it may damage the Terminal Contacts.

**Step 9** : Remove the Terminal.

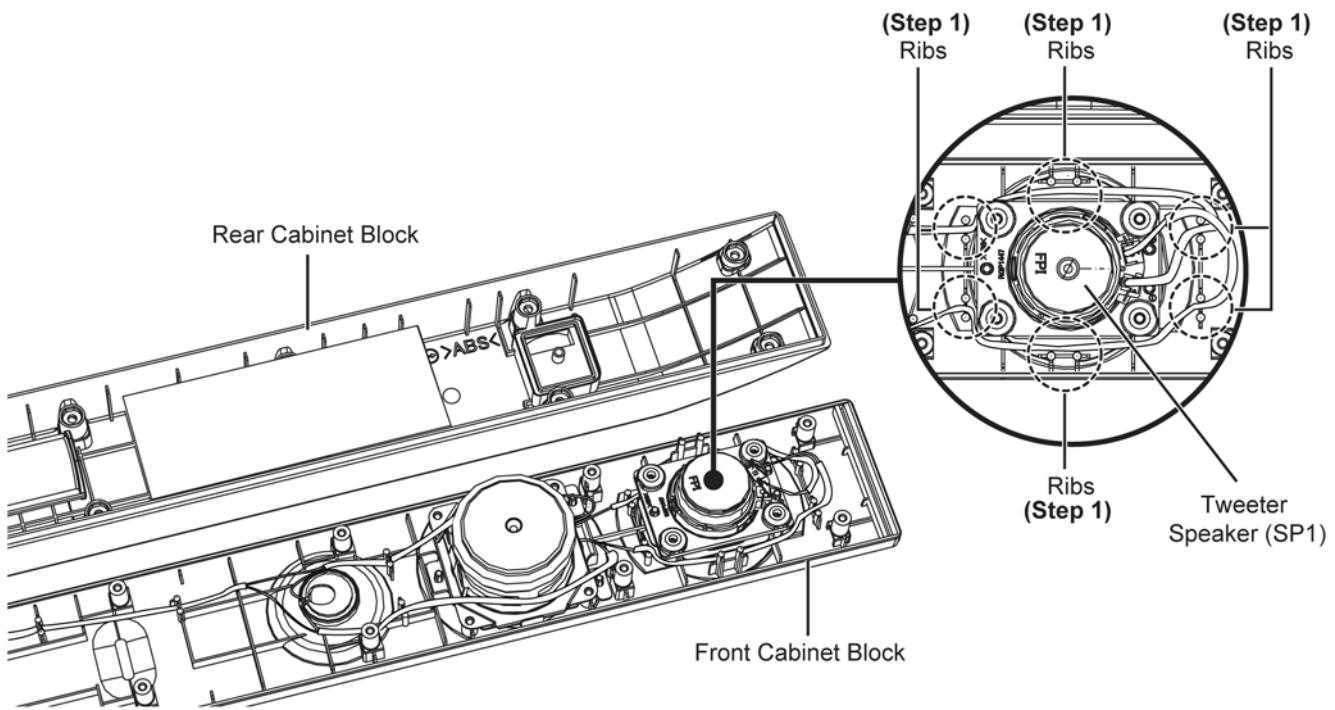

**Step 10** : Remove the Rear Cabinet Assembly.

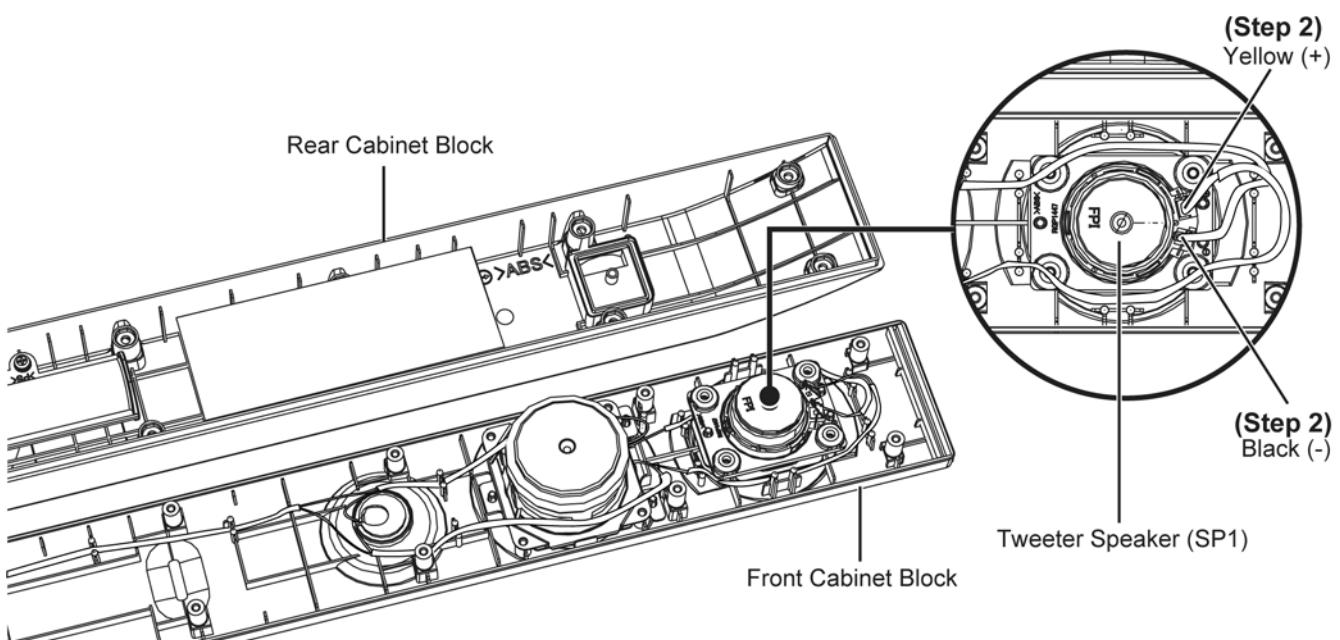

### 11.6.2. Disassembly of Tweeter Speaker (SP1)

- Refer to "Disassembly of Front Speaker Unit".
- Refer to "Disassembly of Rear Cabinet Assembly" (Step 1) to (Step 3).

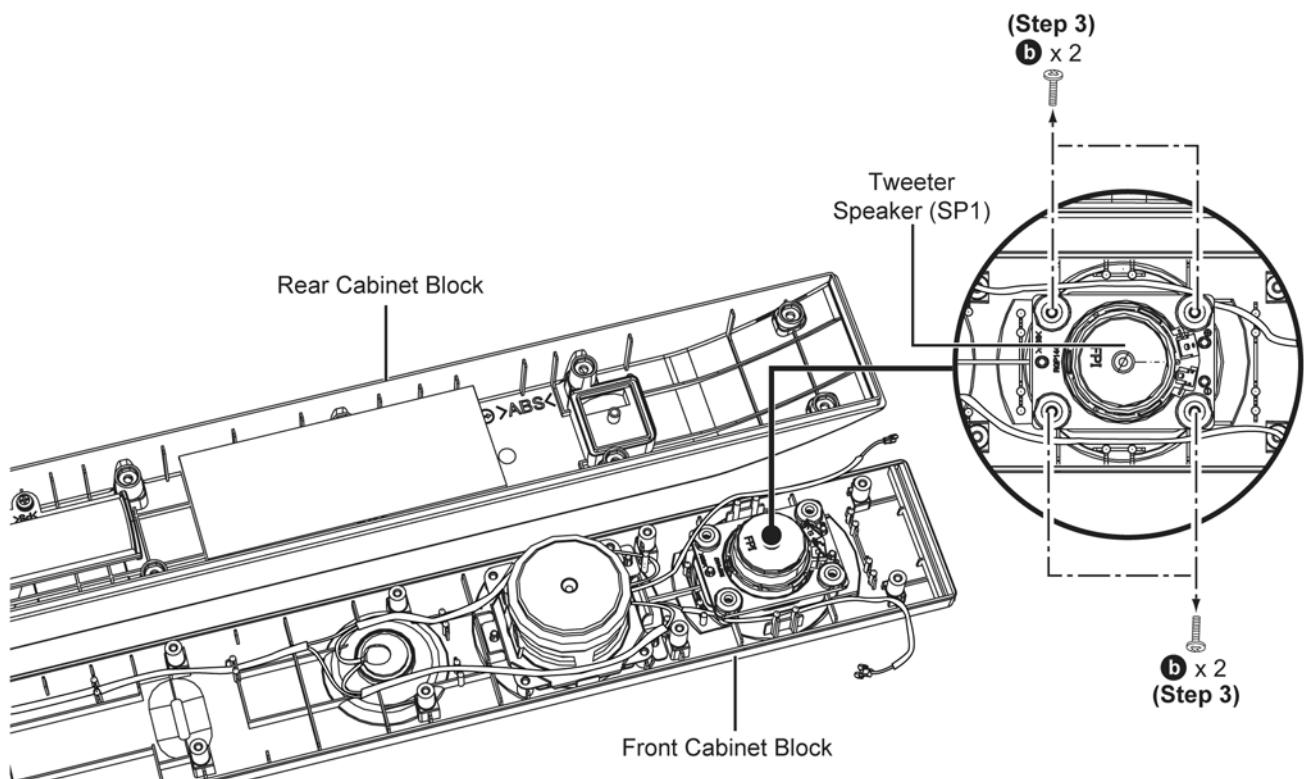

**Step 1 :** Release the Speaker Wire Assembly from the ribs of the Front Cabinet Block.

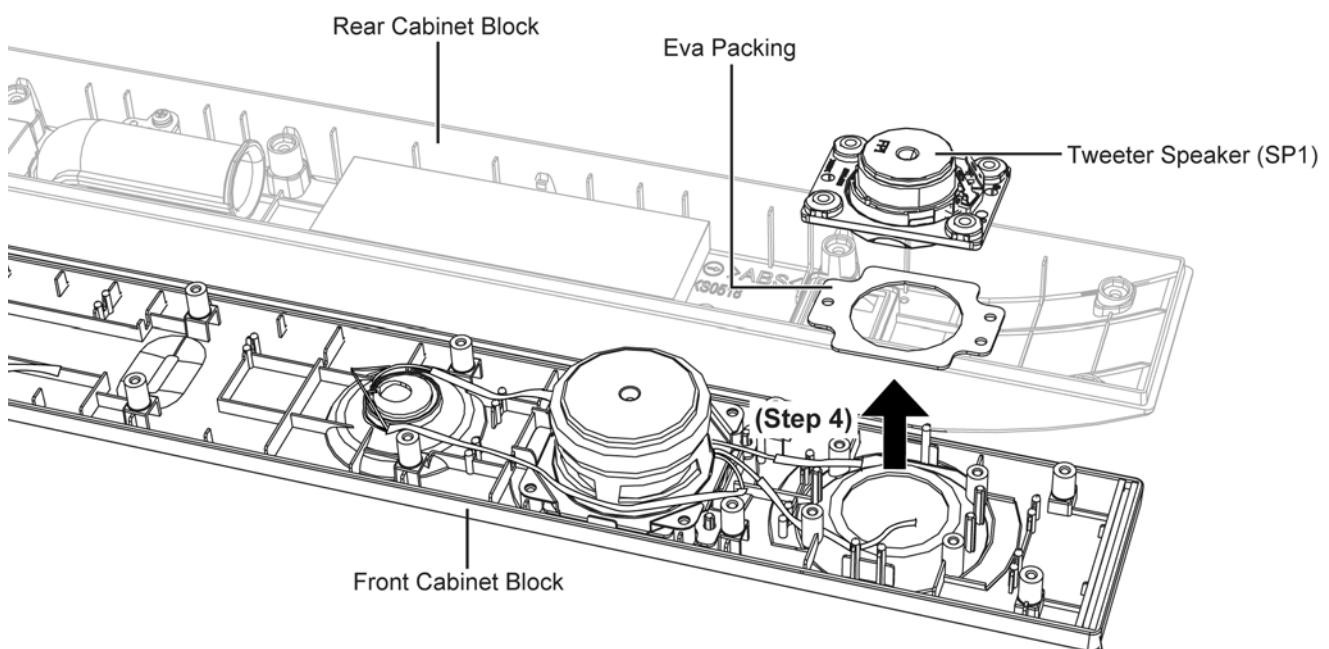

**Step 2 :** Detach the Yellow (+) and Black (-) wire from the terminal of the Tweeter Speaker (SP1).

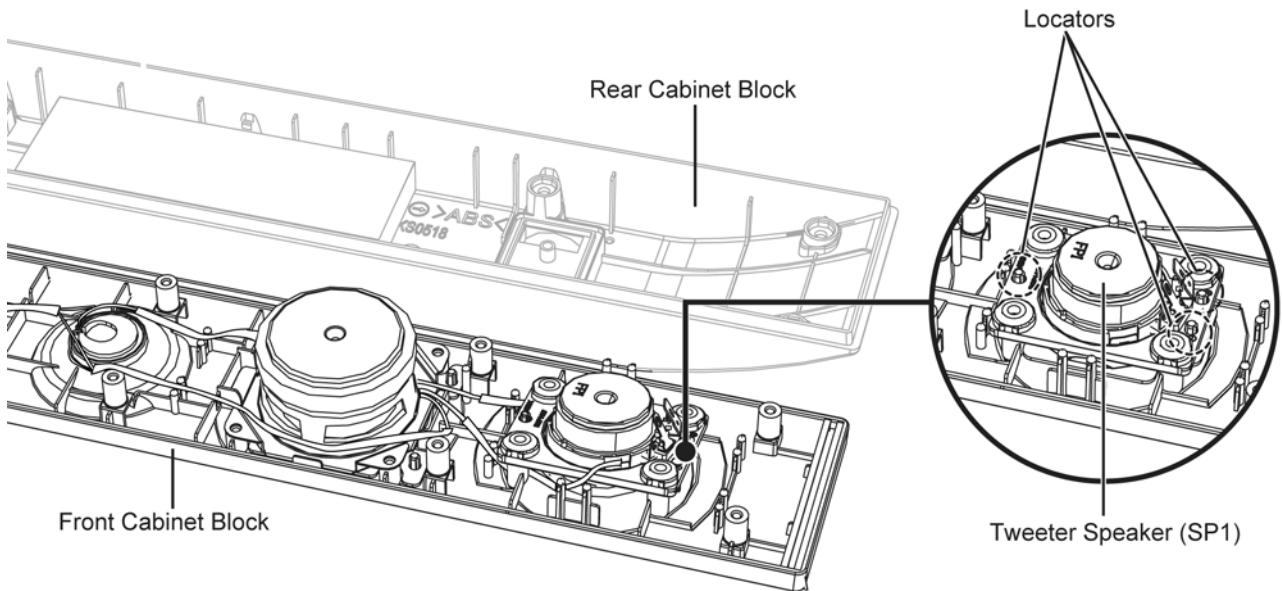

**Step 3 :** Remove 4 screws.

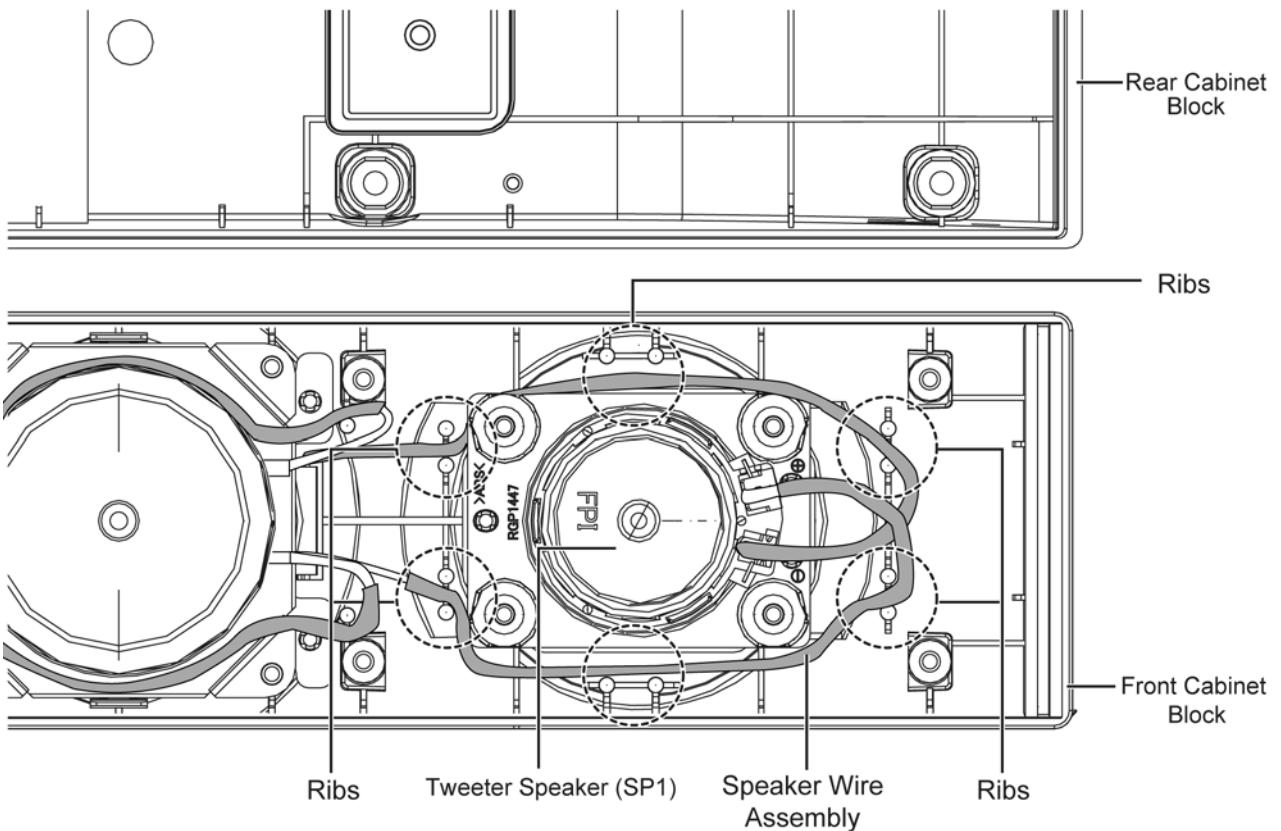

**Step 4 :** Remove the Tweeter Speaker (SP1) and the Eva Packing.

**Caution 1:** During assembling, ensure that the Tweeter Speaker (SP1) and the Eva Packing is seated properly onto the 3 locators of the Front Cabinet Block.

**Caution 2:** During assembling, ensure that the Speaker Wire Assembly is dressed properly between the ribs of the Front Cabinet Block as shown.

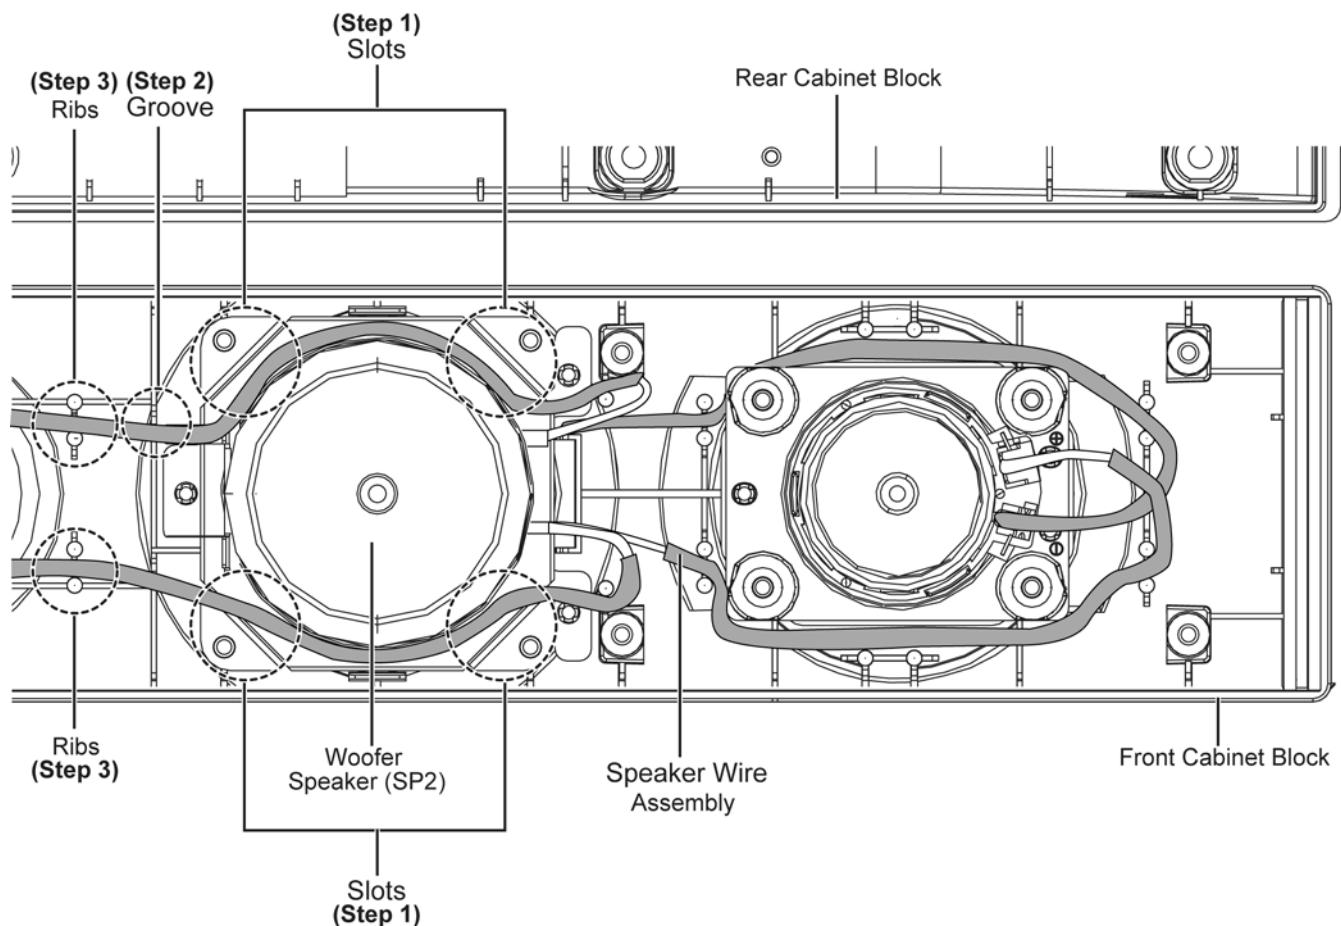

### 11.6.3. Disassembly of Woofer Speaker (SP2)

- Refer to "Disassembly of Front Speaker Unit".
- Refer to "Disassembly of Rear Cabinet Assembly" (Step 1) to (Step 3).

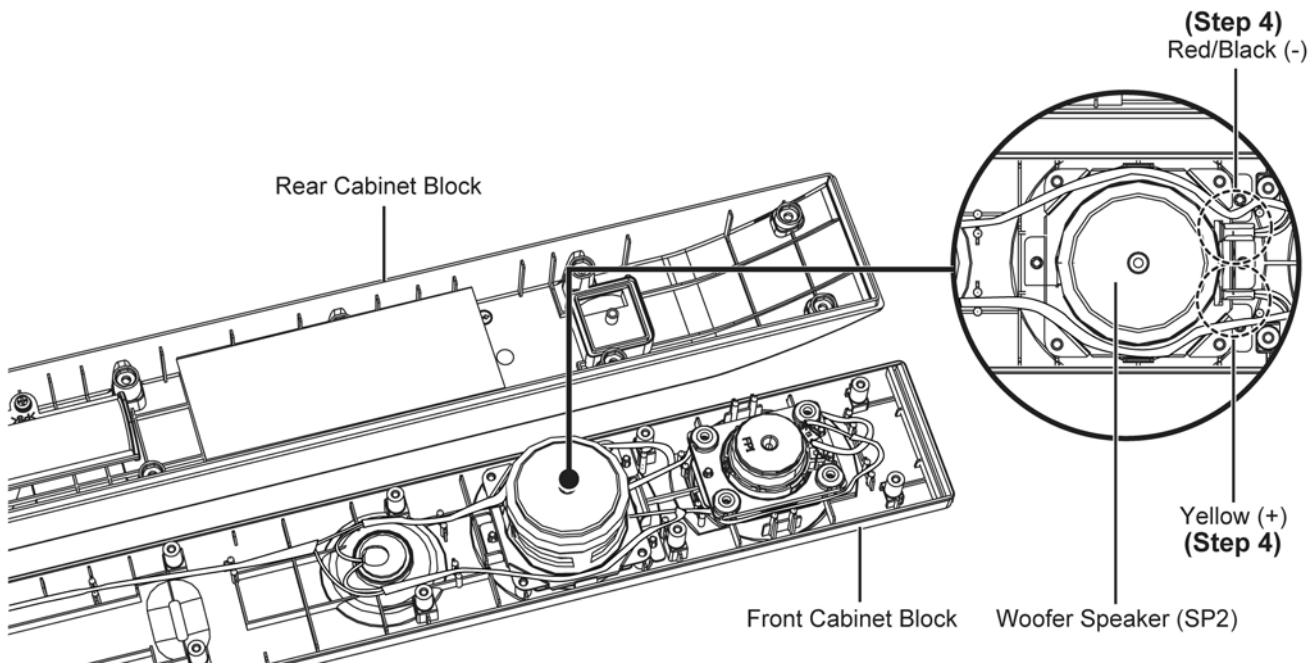

**Step 1 :** Release the Speaker Wire Assembly from the slots of the Woofer Speaker (SP2).

**Step 2 :** Release the Speaker Wire Assembly from the groove of the Front Cabinet Block.

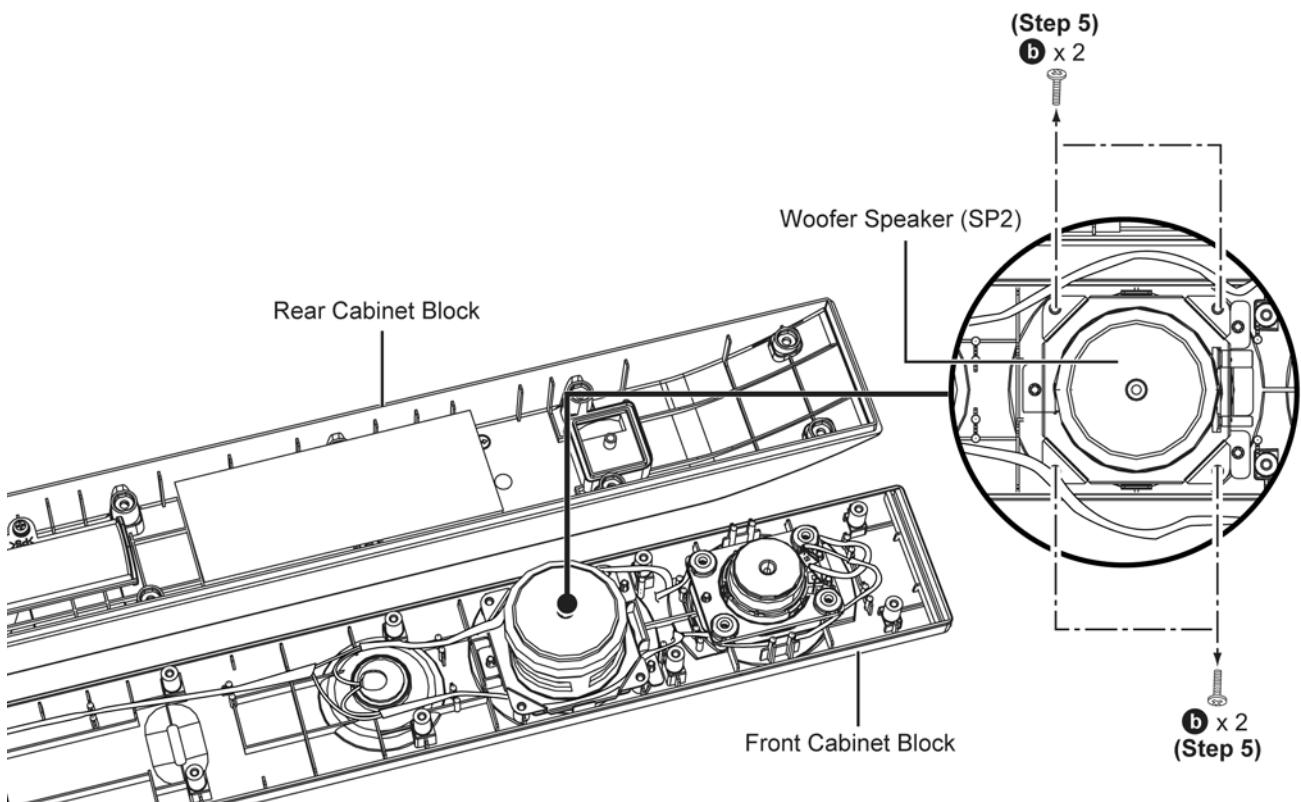

**Step 3 :** Release the Speaker Wire Assembly from the ribs of the Front Cabinet Block.

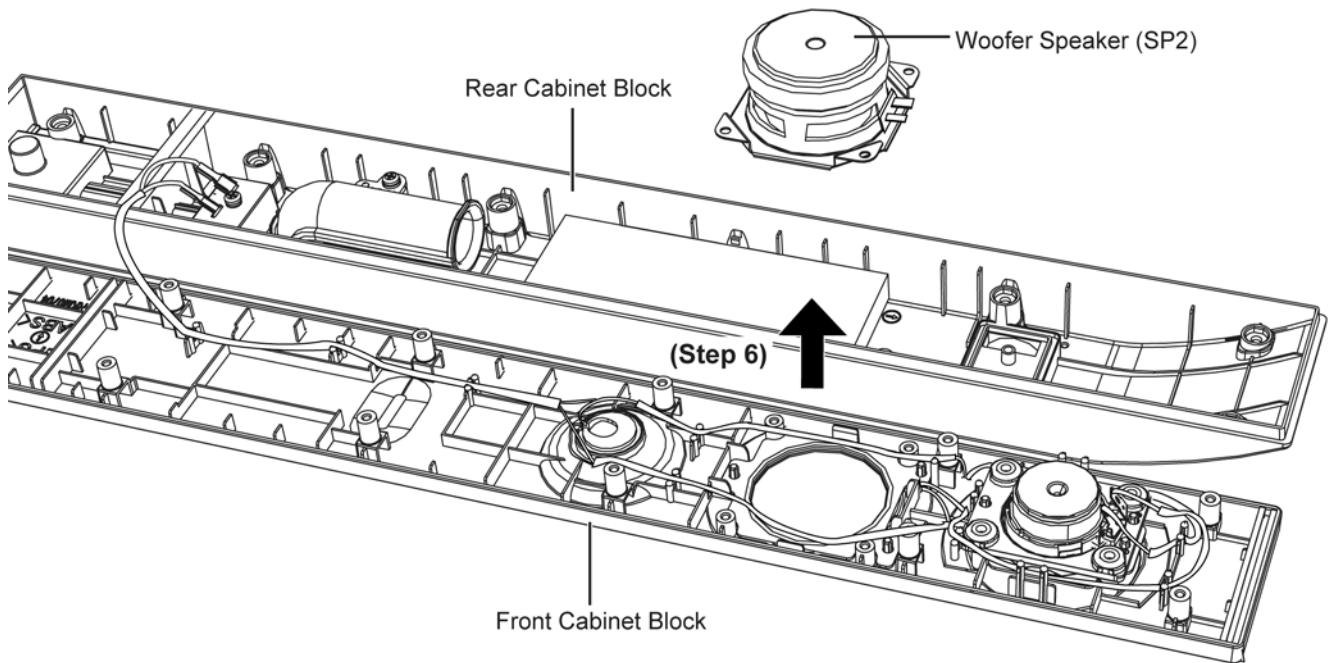

**Step 4** : Detach the Yellow (+) and Red/Black (-) wire from the terminal of the Woofer Speaker (SP2).

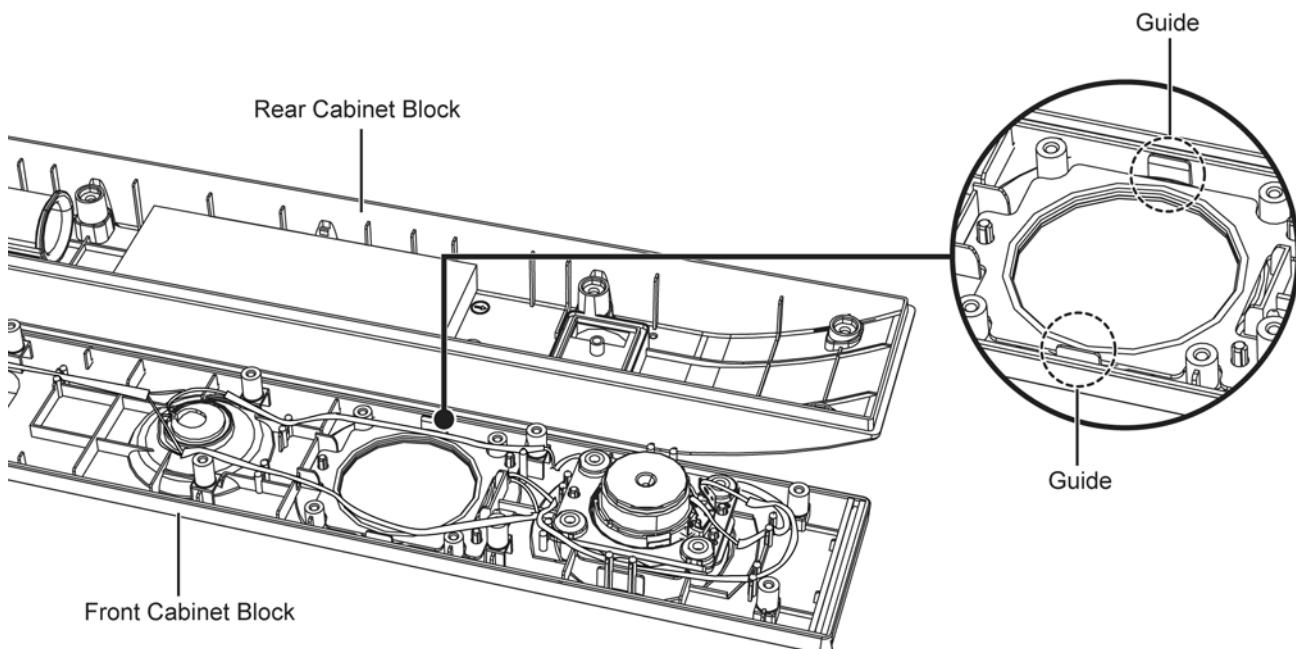

**Step 5** : Remove 4 screws.

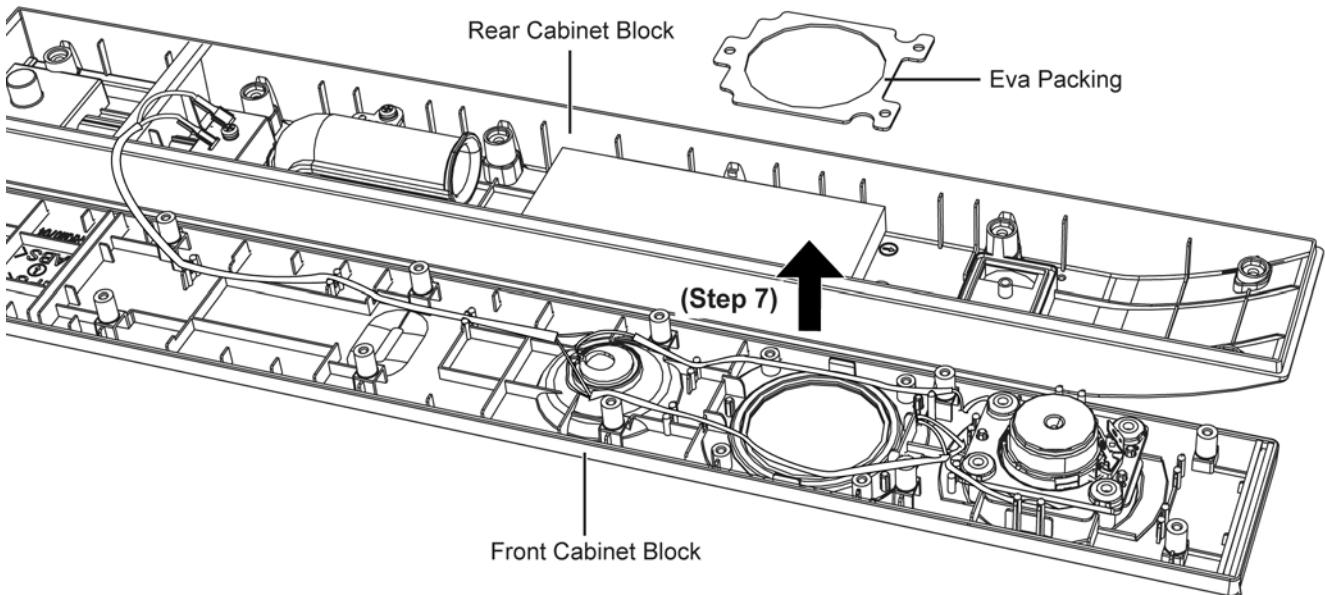

**Step 6 : Remove the Woofer Speaker (SP2).**

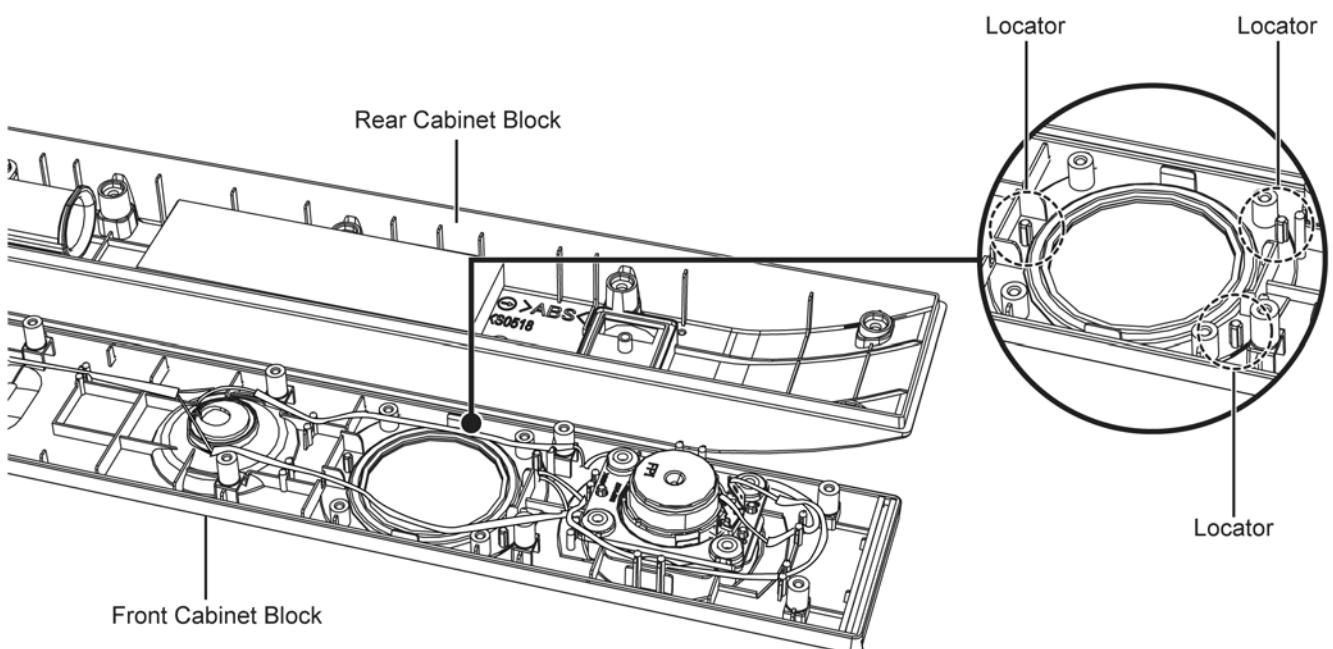

**Caution:** During assembling, ensure that the Woofer Speaker (SP2) is seated properly within the 2 guides of the Front Cabinet Block.

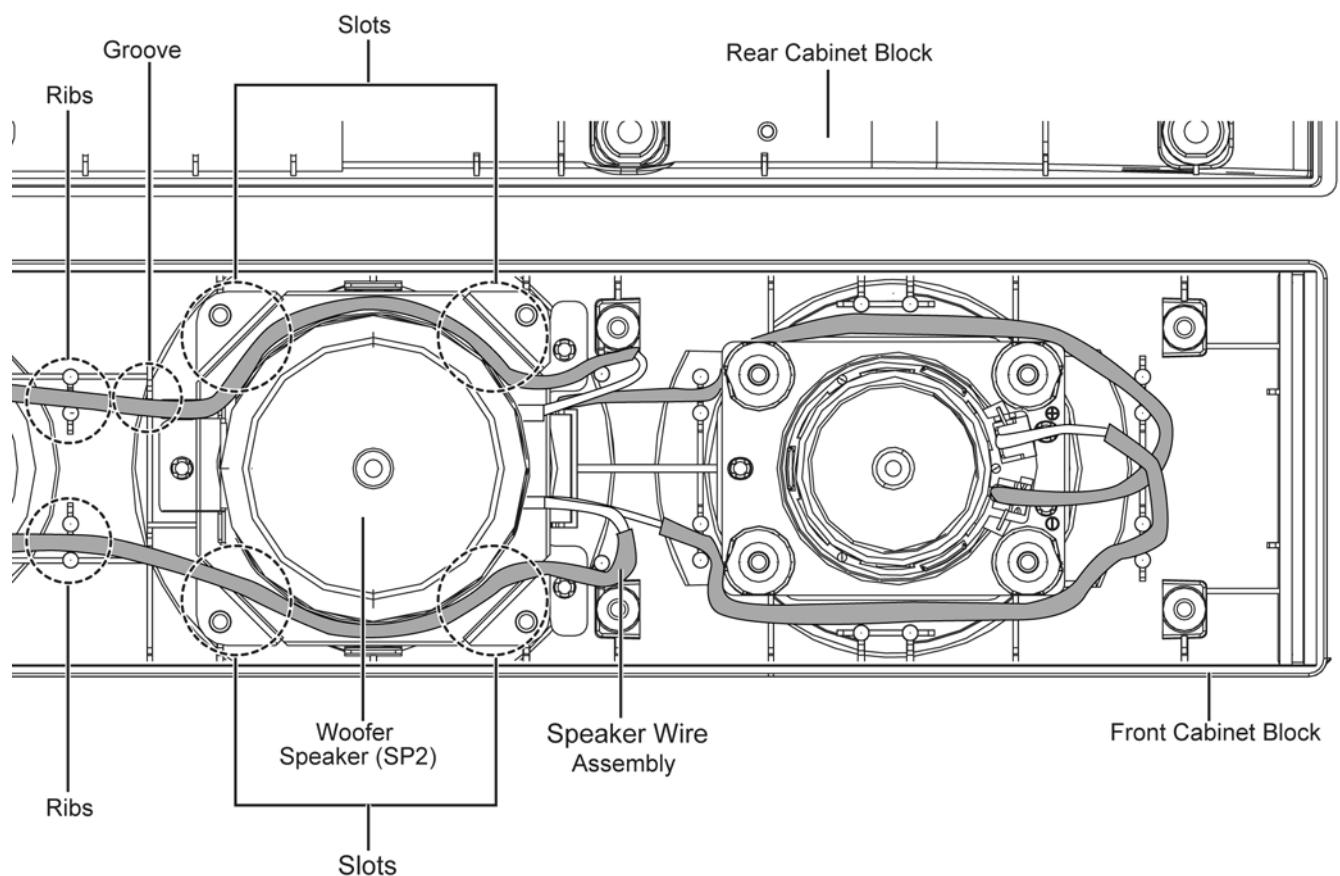

**Step 7 : Remove the EVA Packing.**

**Caution:** During assembling, ensure that the EVA Packing is seated properly onto the 3 locators of the Front Cabinet Block.

**Caution: During assembling, ensure that the Speaker Wire Assembly is dressed properly between the 2 slots of the Woofer Speaker (SP2), the groove of the Front Cabinet Block and the ribs of the Front Cabinet Block as shown.**

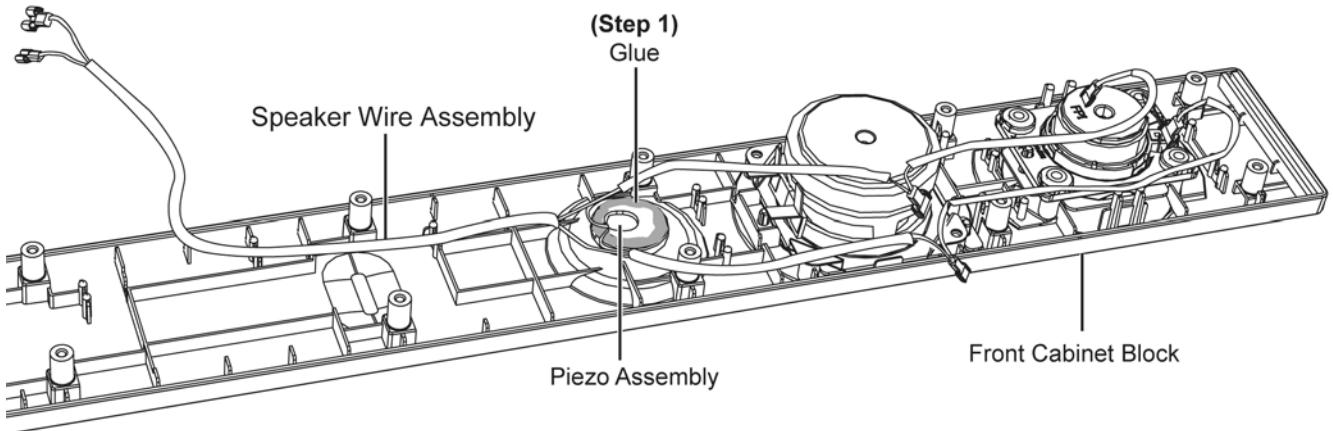

## 11.6.4. Replacement of the Speaker Wire Assembly

### 11.6.4.1. Disassembly of the Speaker Wire Assembly

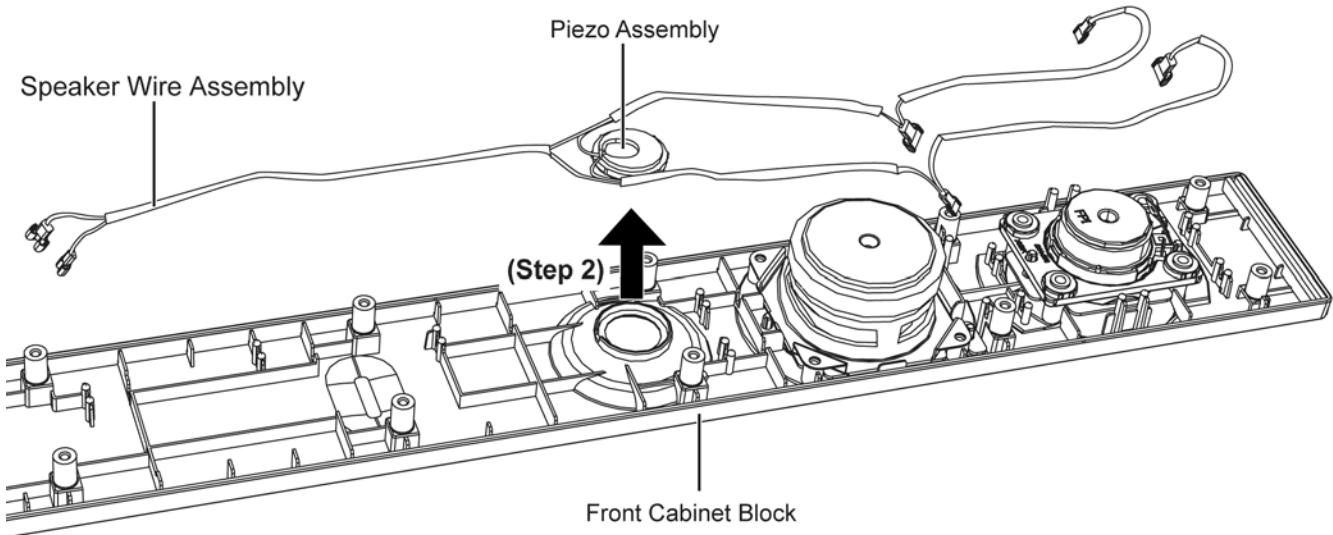

**Note: Speaker Wire Assembly is inclusive of Piezo**

- Refer to "Disassembly of Front Speaker Unit".
- Refer to "Disassembly of Rear Cabinet Assembly" (Step 1) to (Step 4).
- Refer to "Disassembly of Tweeter Speaker (SP1)" (Step 1) to (Step 3).
- Refer to "Disassembly of Woofer Speaker (SP2)" (Step 1) to (Step 4).

**Step 1 :** Remove the Glue.

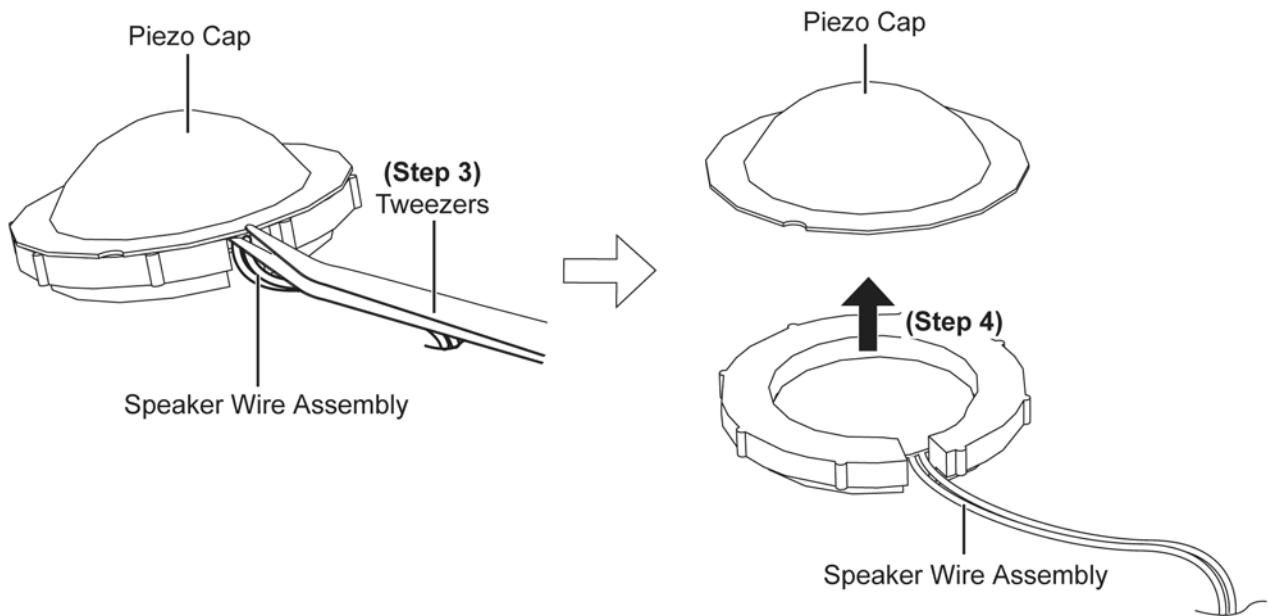

**Step 2 :** Remove the Speaker Wire Assembly together with Piezo Assembly.

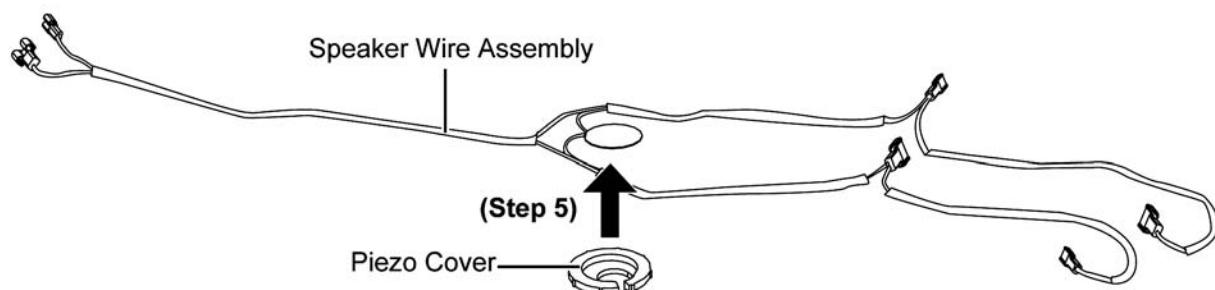

**Step 3 :** Use a pair of Tweezers to remove the Piezo Cap from Speaker Wire Assembly.

**Step 4 :** Remove the Piezo Cap.

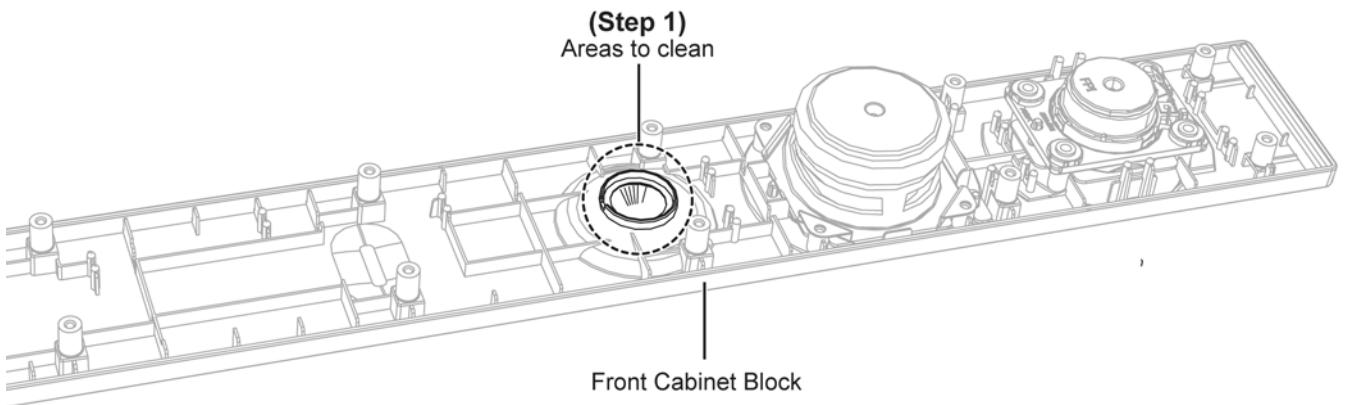

**Step 5 :** Remove the Speaker Wire Assembly from the Piezo Cover.

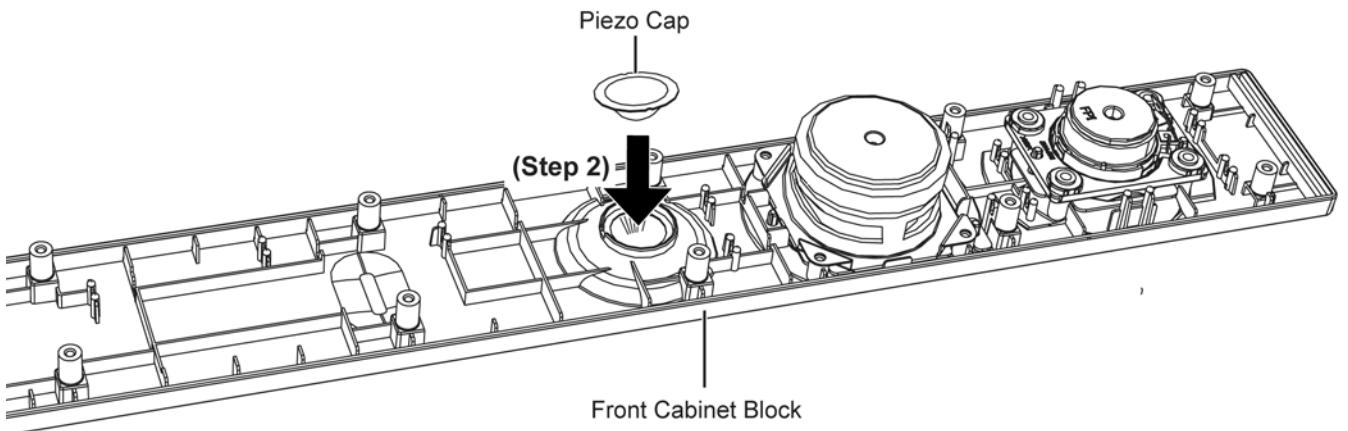

#### 11.6.4.2. Assembly of the Speaker Wire Assembly

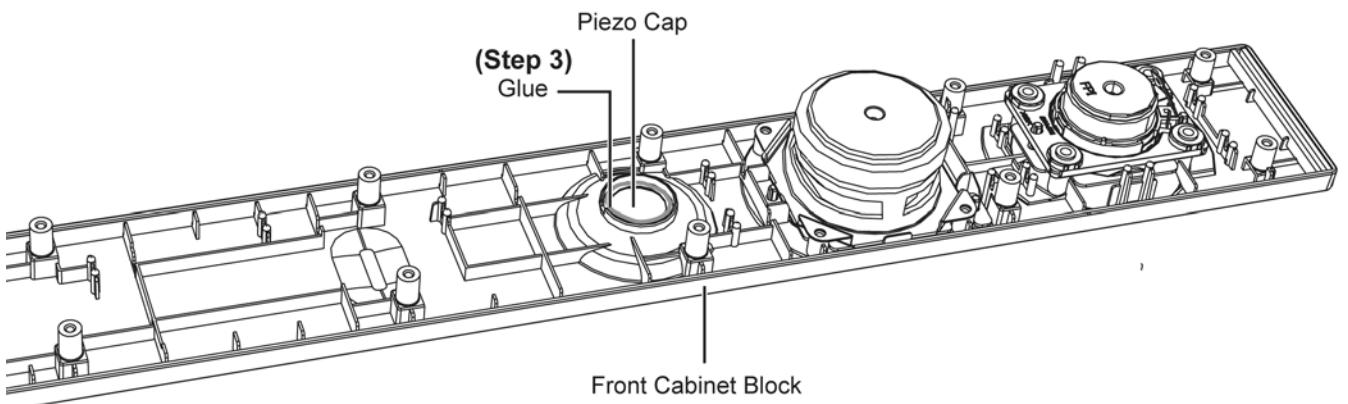

**Step 1 :** Clean the surface of Front Cabinet Block.

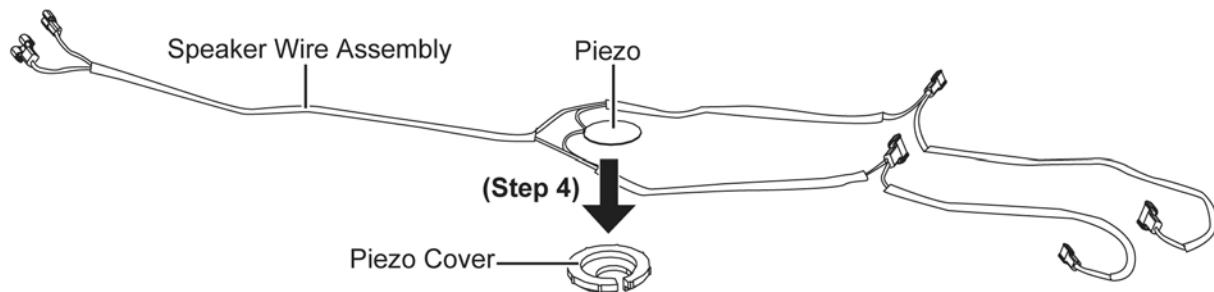

**Step 2 :** Place the Piezo Cap onto the Front Cabinet Block.

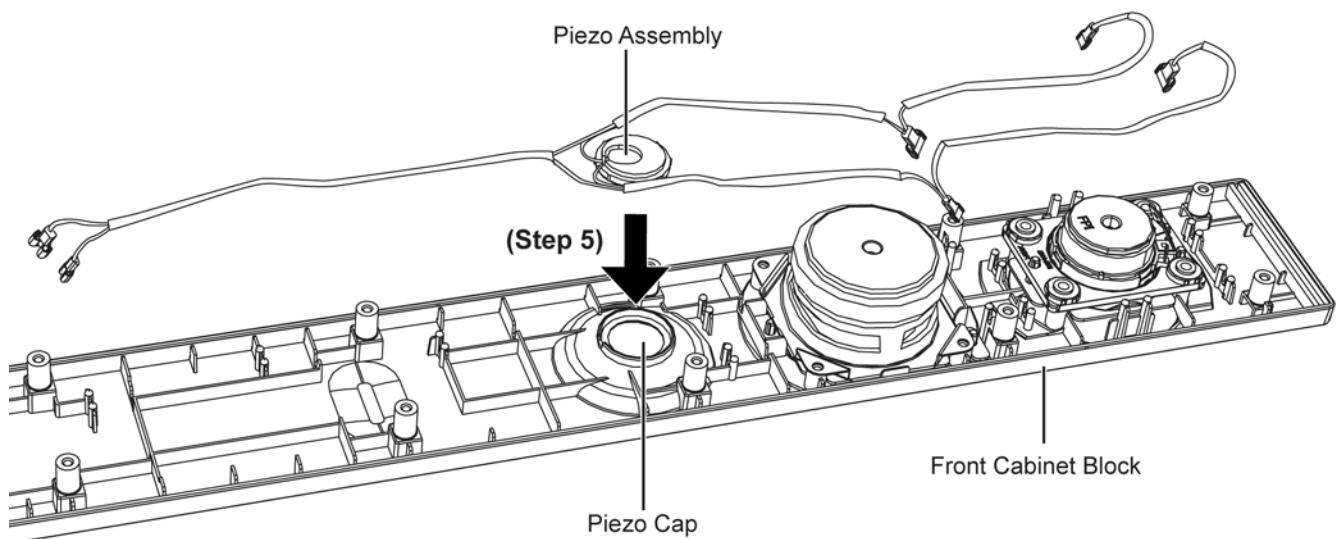

**Step 3 :** Apply Glue to the Piezo Cap.

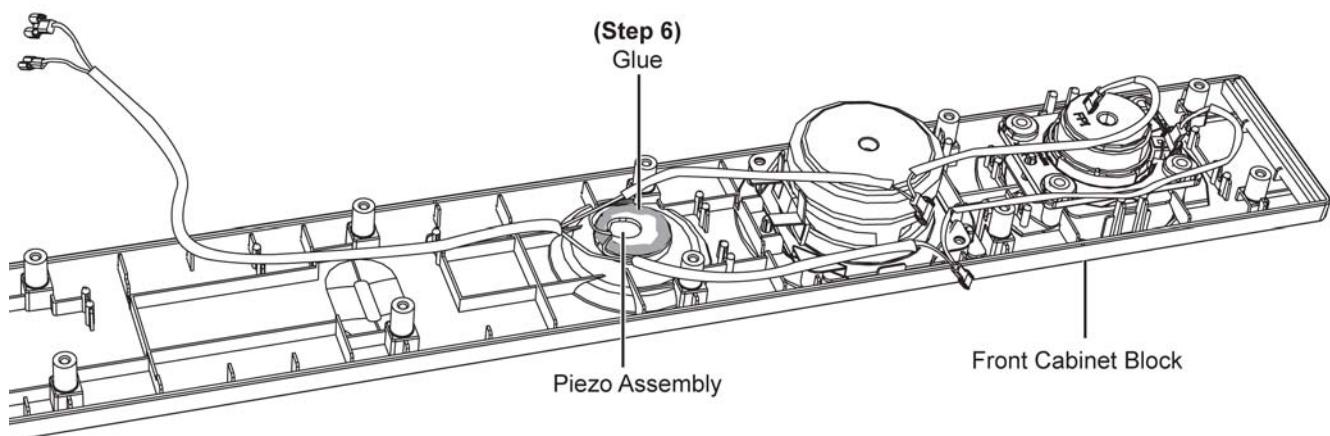

**Step 4 :** Place the Piezo onto the Piezo Cover.

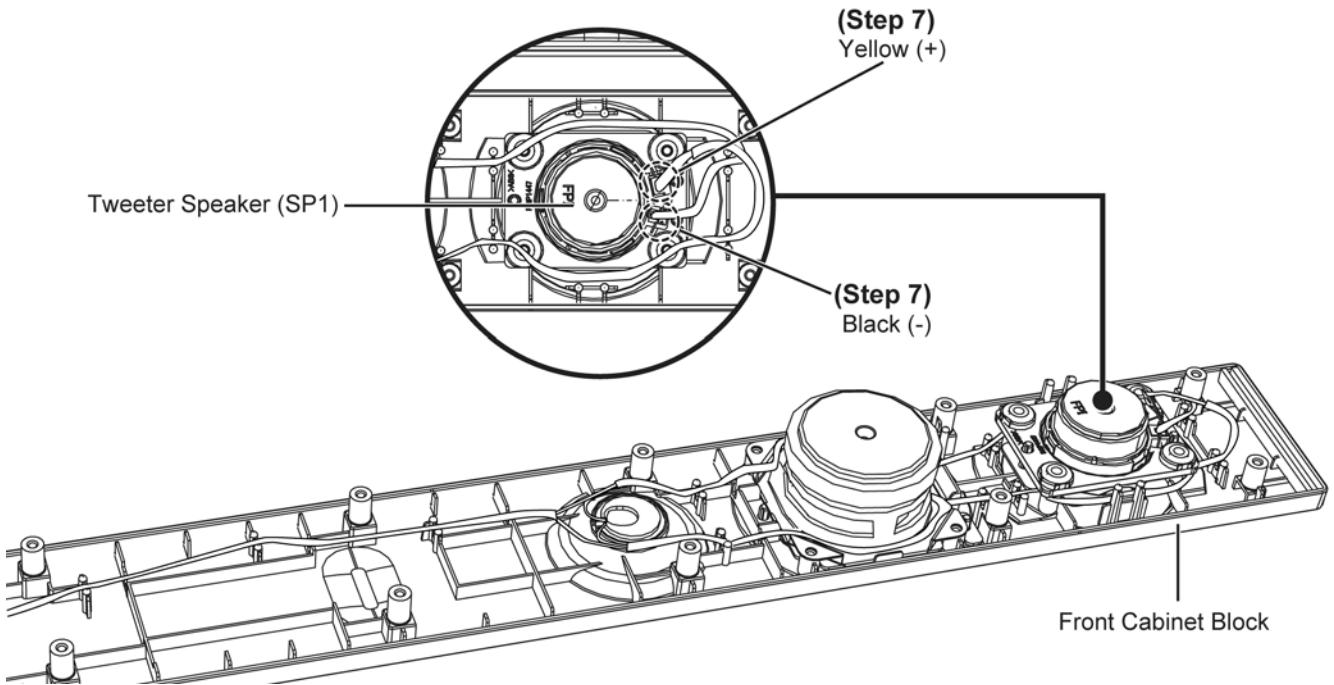

**Step 5 :** Place the Piezo Assembly onto the Piezo Cap.

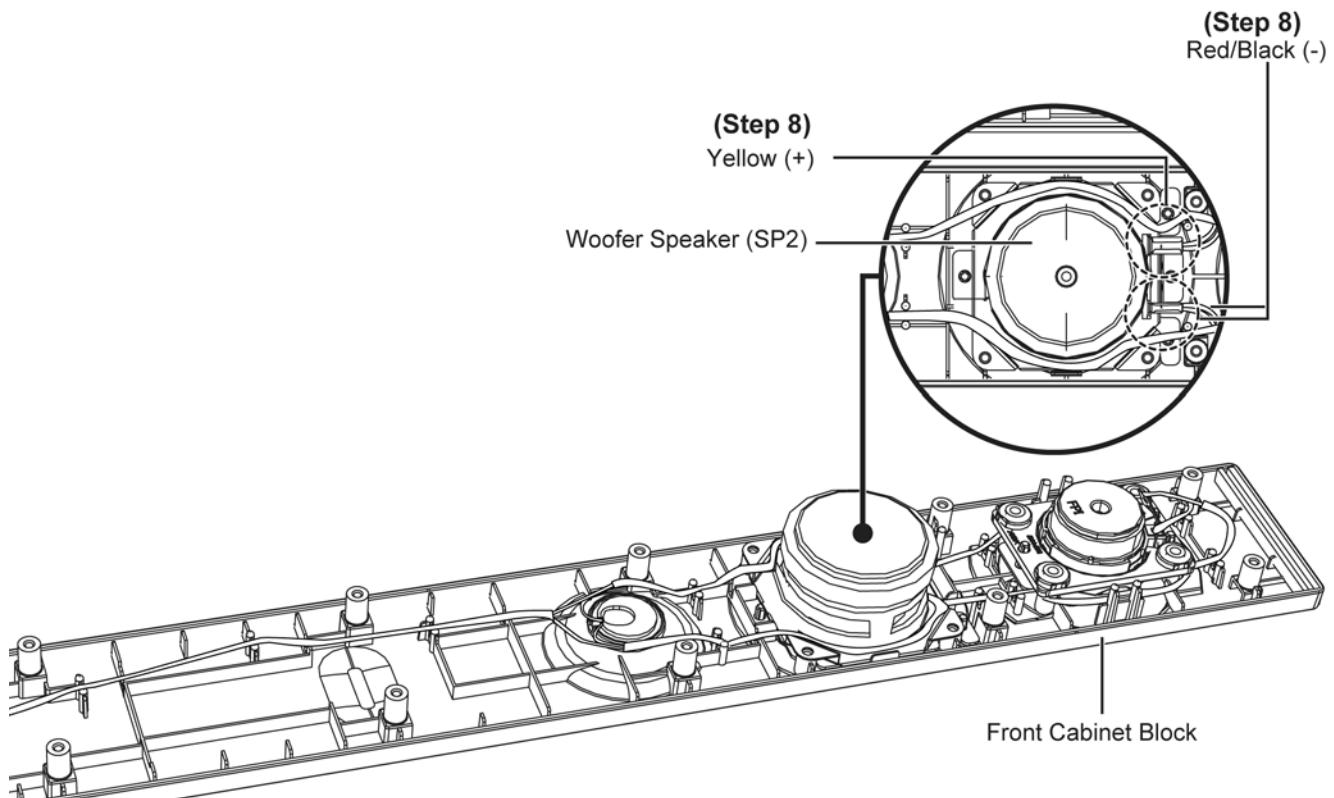

**Step 6 :** Apply the Glue to the Piezo Assembly.

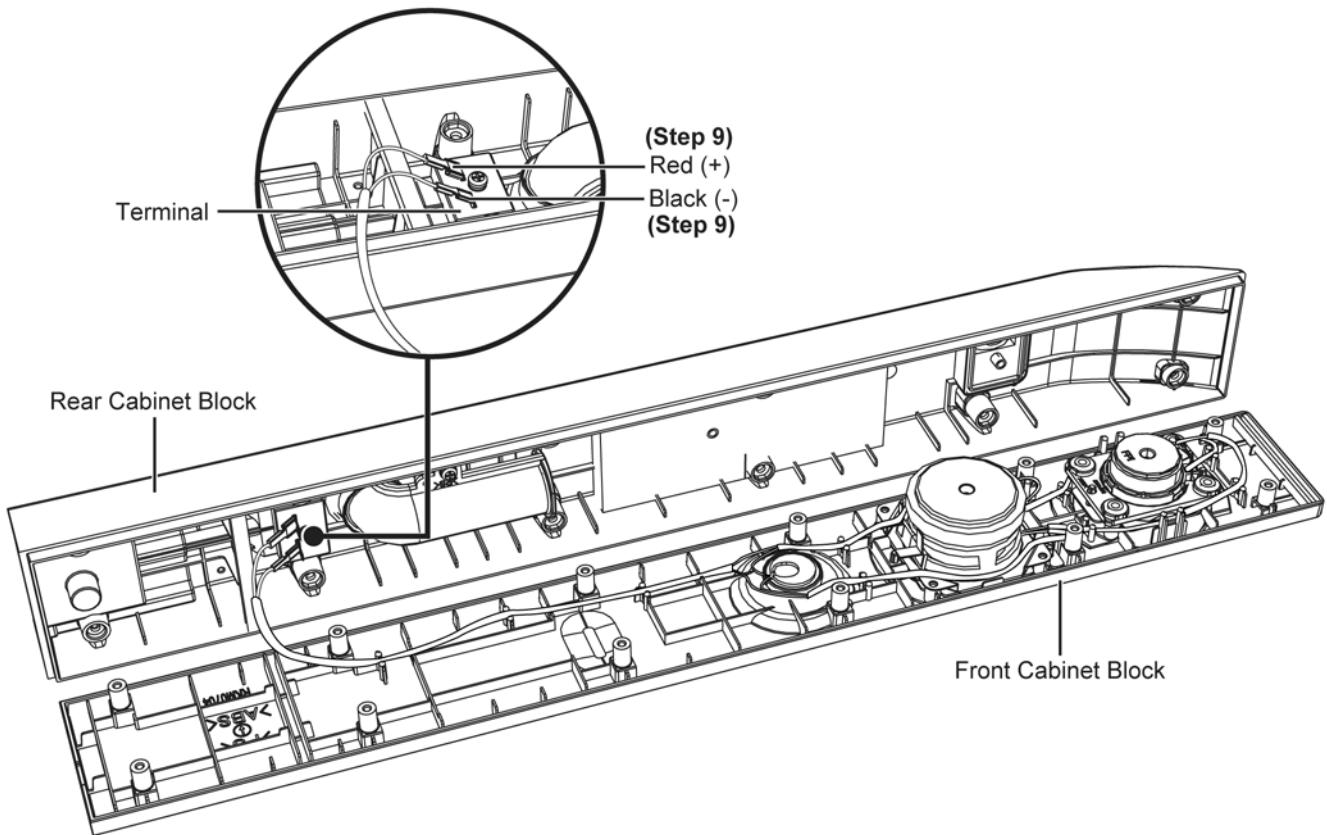

**Step 7 :** Attach the Yellow (+) and Black (-) wire to the terminal of Tweeter Speaker (SP1).

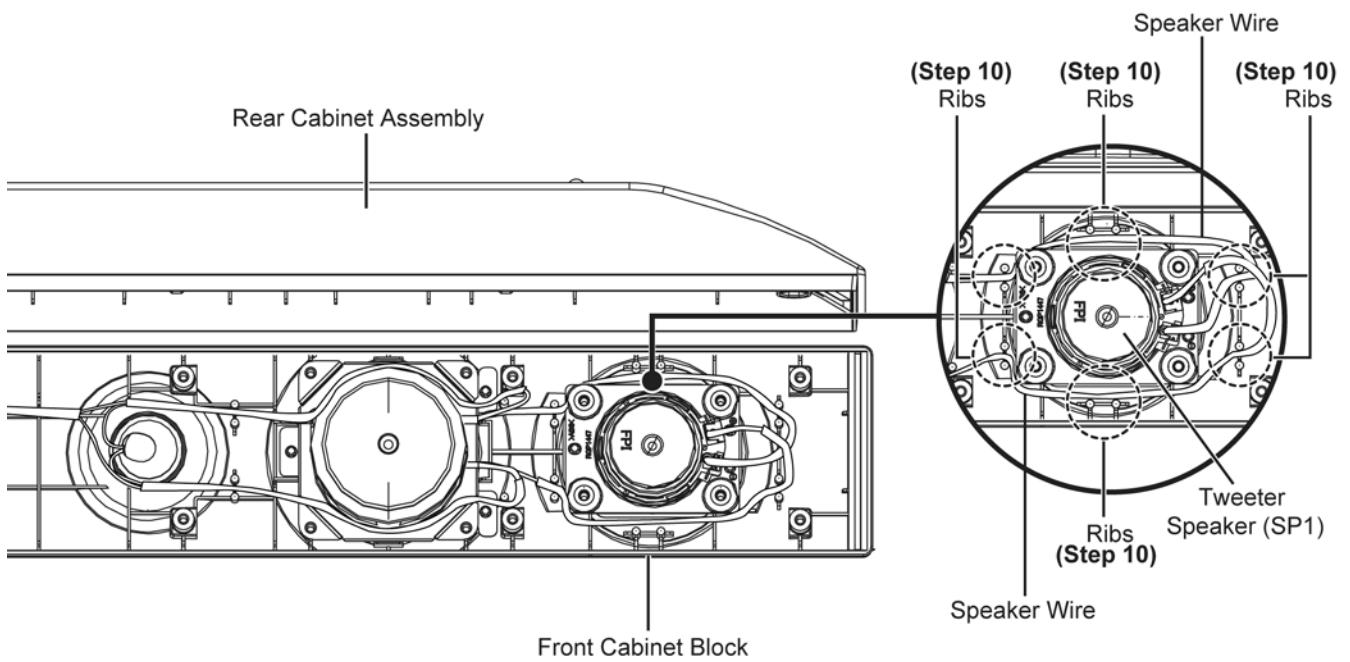

**Step 8 :** Attach the Yellow (+) and Red/Black (-) wire to the terminal of Woofer Speaker (SP2).

**Step 9 :** Attach the Black (-) and Red (+) wire to the Terminal.

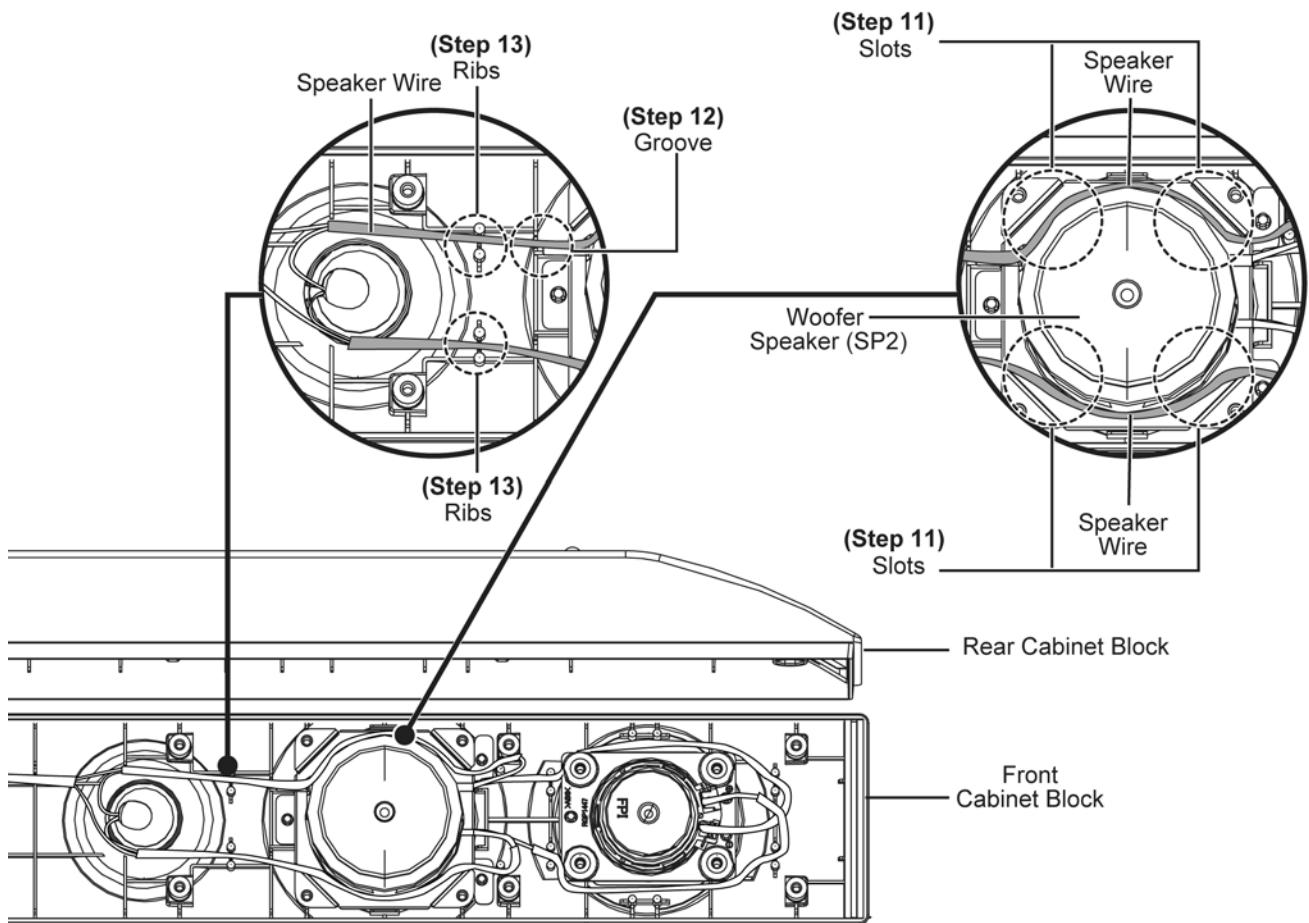

**Step 10 :** Dressed the Speaker Wire Assembly between the ribs of the Front Cabinet Block.

**Step 11 :** Dressed the Speaker Wire Assembly into the slots of the Woofer Speaker (SP2)..

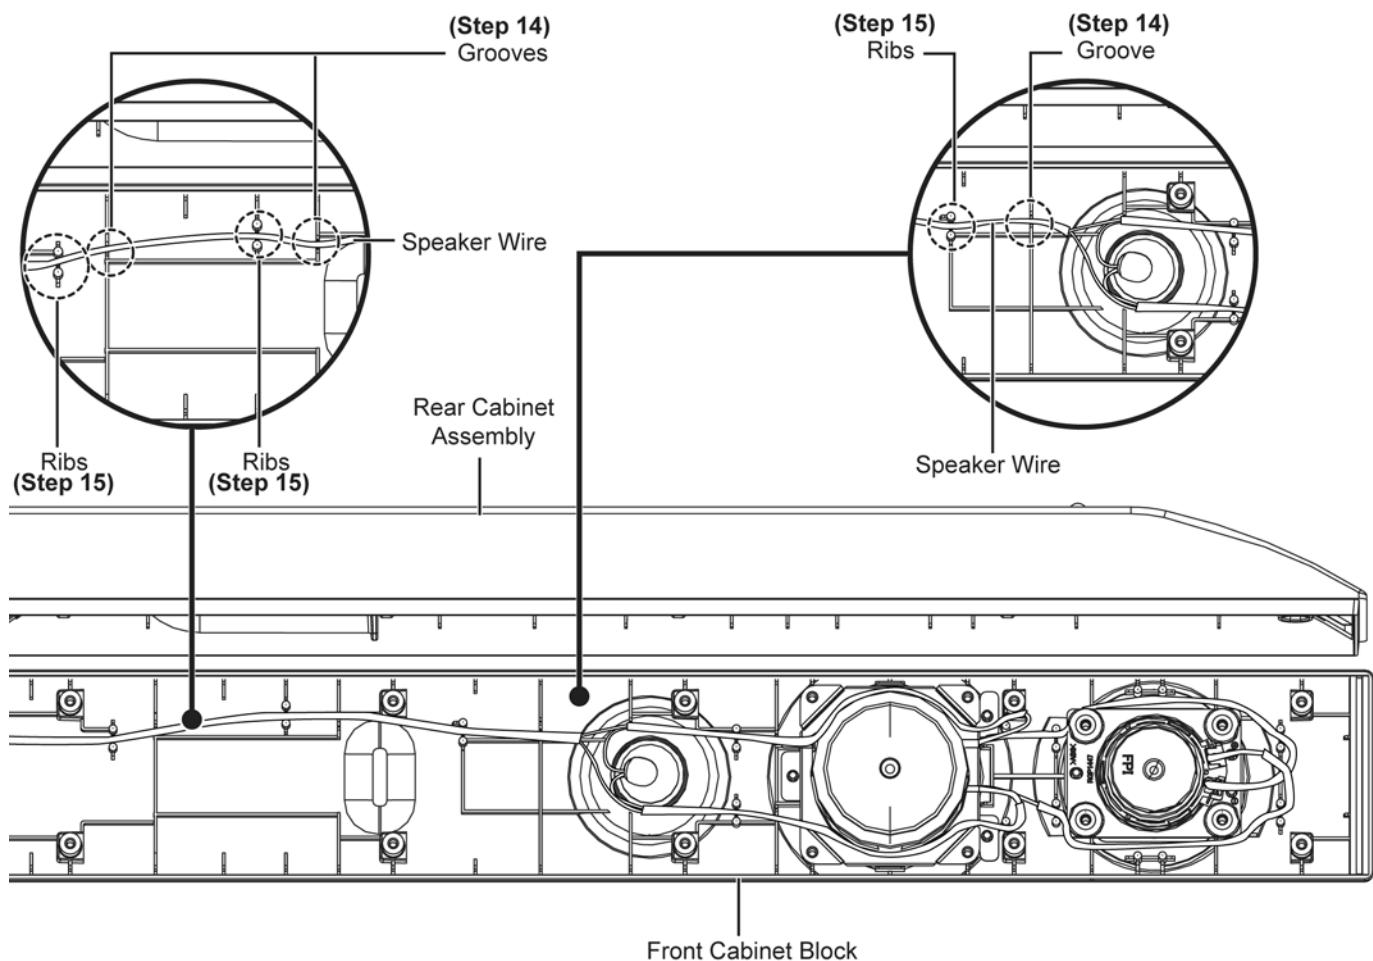

**Step 12 :** Dressed the Speaker Wire Assembly into the groove of the Front Cabinet Block.

**Step 13 :** Dressed the Speaker Wire Assembly between the ribs of the Front Cabinet Block.

**Step 14 :** Dressed the Speaker Wire Assembly into the grooves of the Front Cabinet Block.

**Step 15 :** Dressed the Speaker Wire Assembly into the ribs of the Front Cabinet Block.

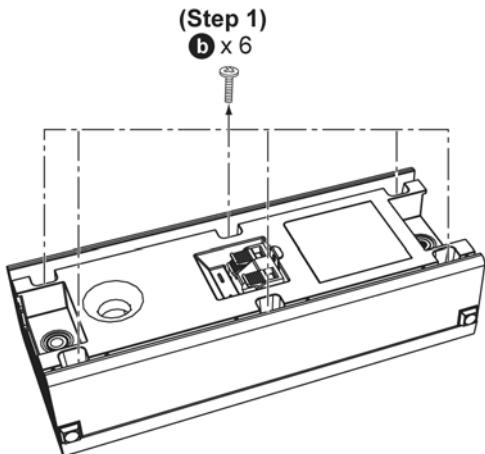

## 11.7. Disassembly of Center Speakers (SB-HTB770)

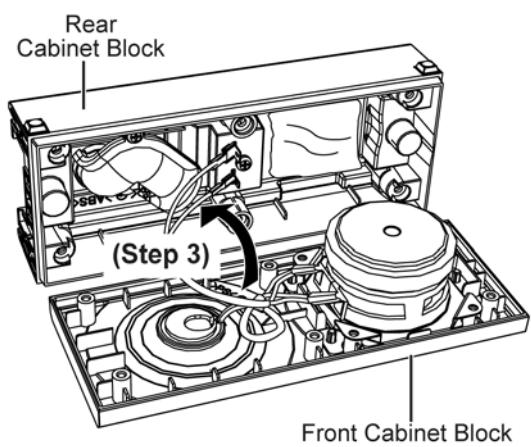

### 11.7.1. Disassembly of Rear Cabinet Assembly

- Refer to "Disassembly of Center Speaker Unit".

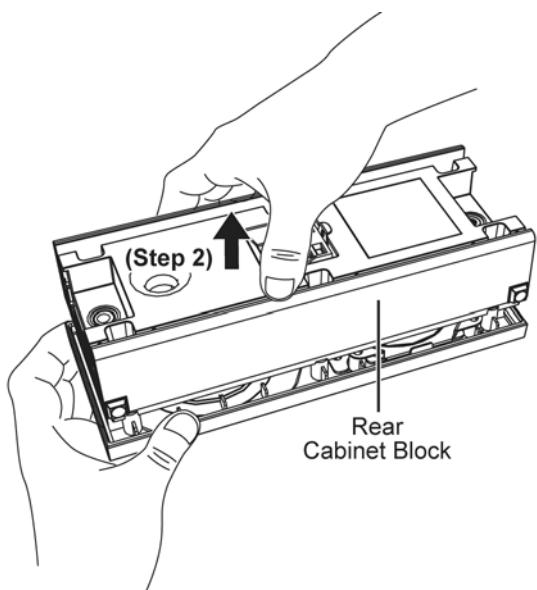

Step 1 : Remove 6 screws.

Step 3 : Upset the Rear Cabinet Block.

Step 2 : Slightly lift up the Rear Cabinet Block as shown.

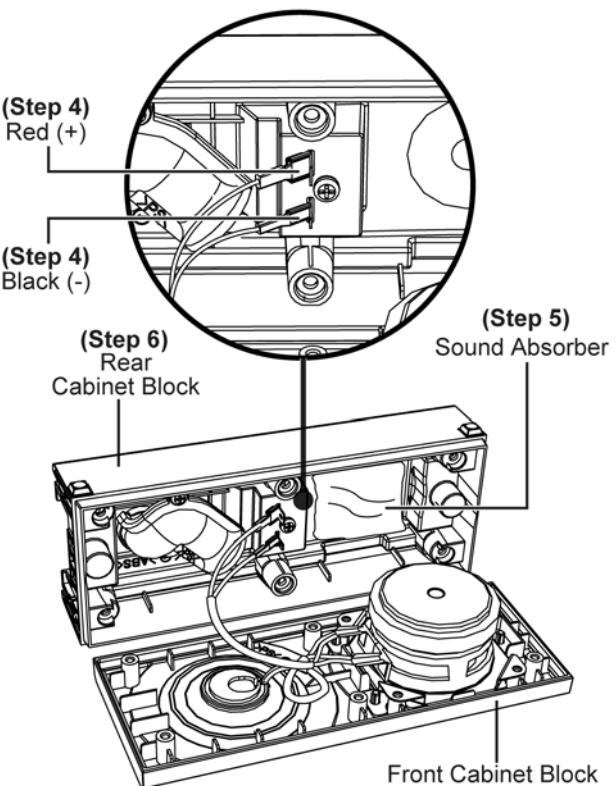

Step 4 : Detach the Red(+) and Black(-) wire from the Terminal.

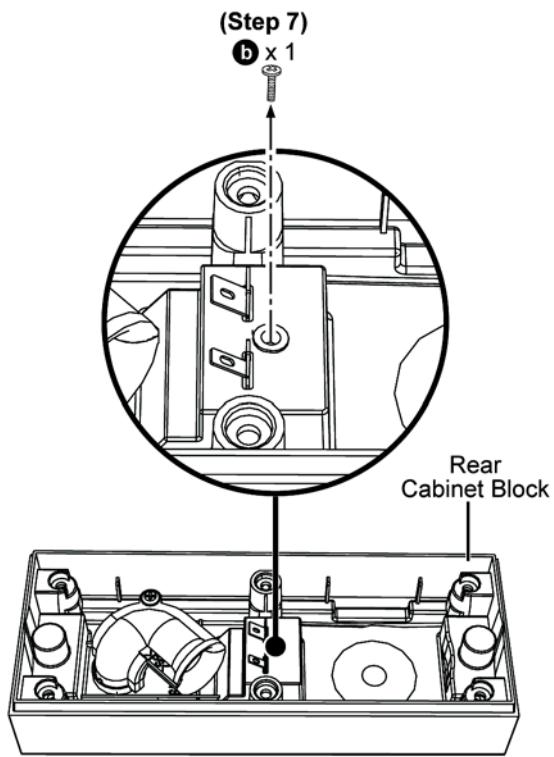

Step 5 : Remove the Sound Absorber.

**Caution: Safe keep the Sound Absorber and place them back during assembling.**

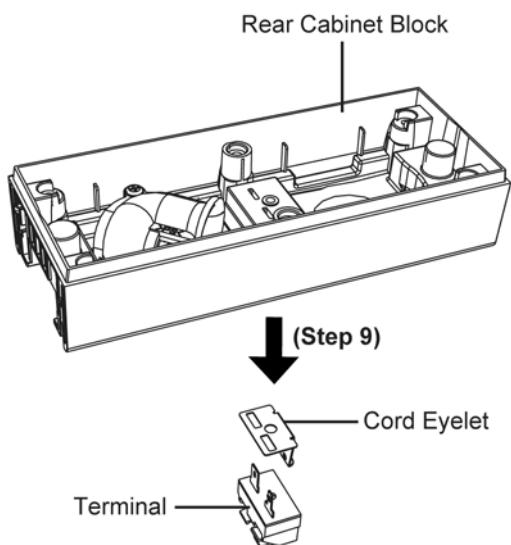

Step 6 : Remove the Rear Cabinet Block.

**Step 7 :** Remove 1 screw.

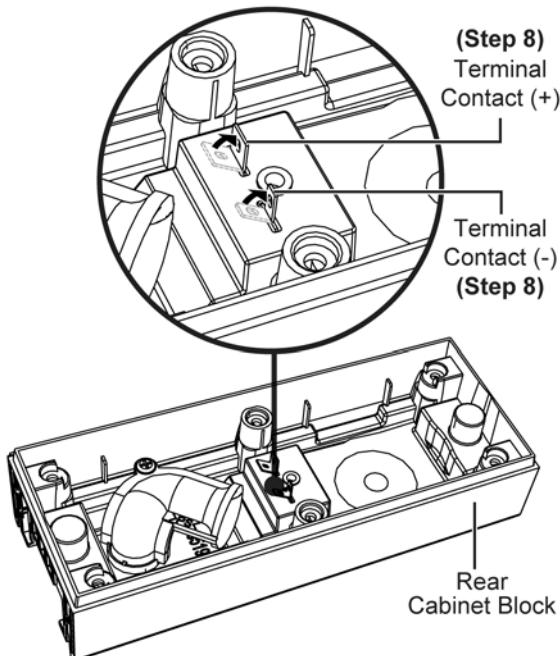

**Step 9 : Remove the Terminal and Cord Eyelet.**

**Step 8 : Unbend the Terminal Contacts (+) and (-).**

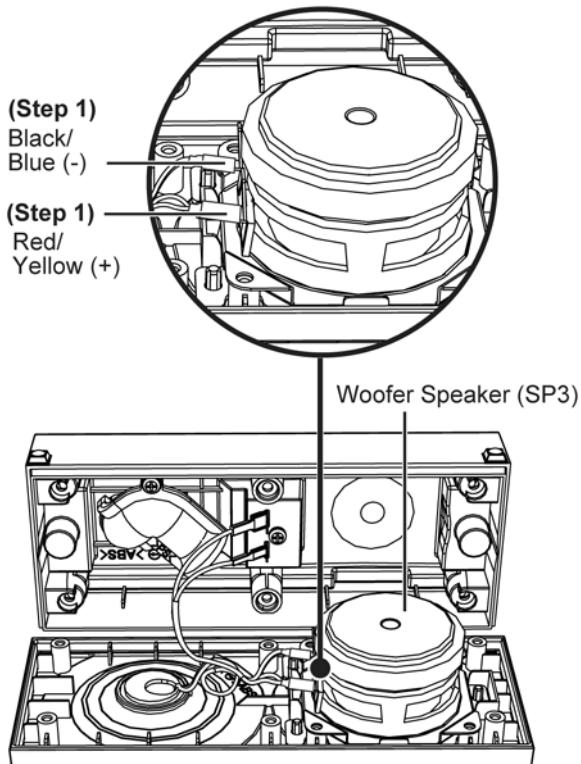

**Caution:** Do not exert too much force as it may damage the Terminal Contacts.

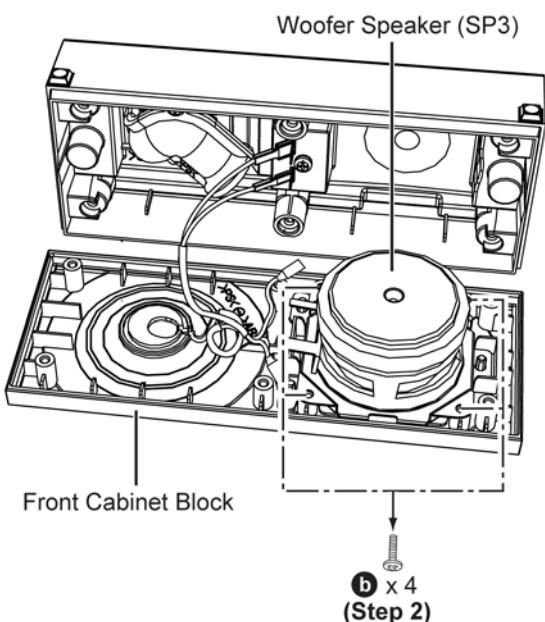

### 11.7.2. Disassembly of Woofer Speaker (SP3)

- Refer to "Disassembly of Center Speaker Unit".
- Refer to "Disassembly of Rear Cabinet Assembly" (Step 1) to (Step 3).

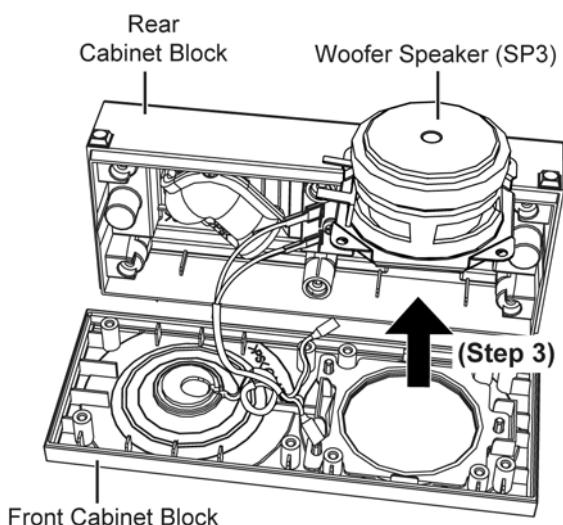

**Step 1 :** Detach the Red/Yellow (+) and Black/Blue (-) wire from the terminal of the Woofer Speaker (SP3).

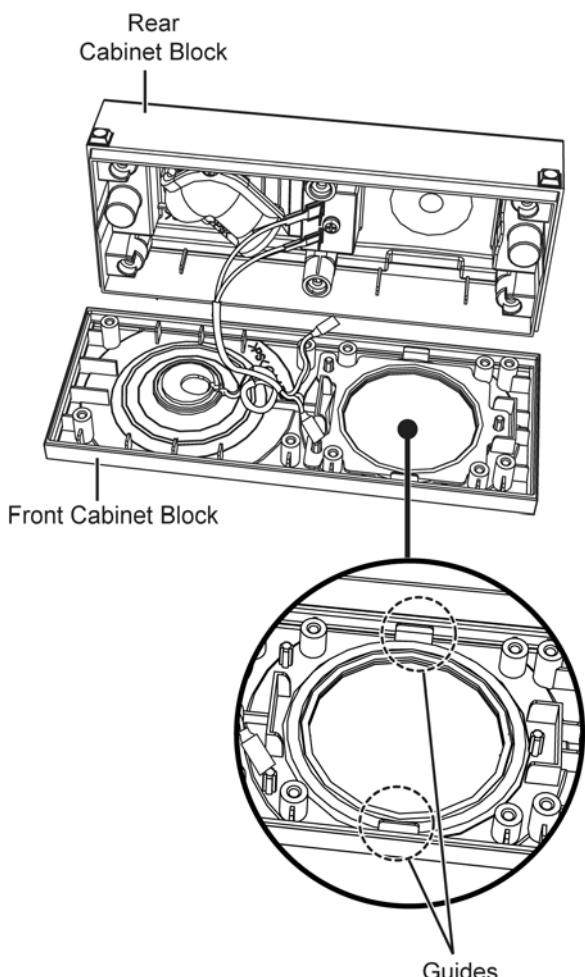

**Step 2 :** Remove 4 screws.

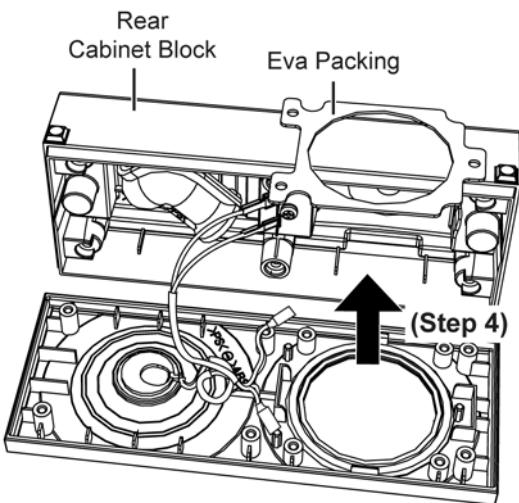

**Step 3 : Remove the Woofer Speaker (SP3).**

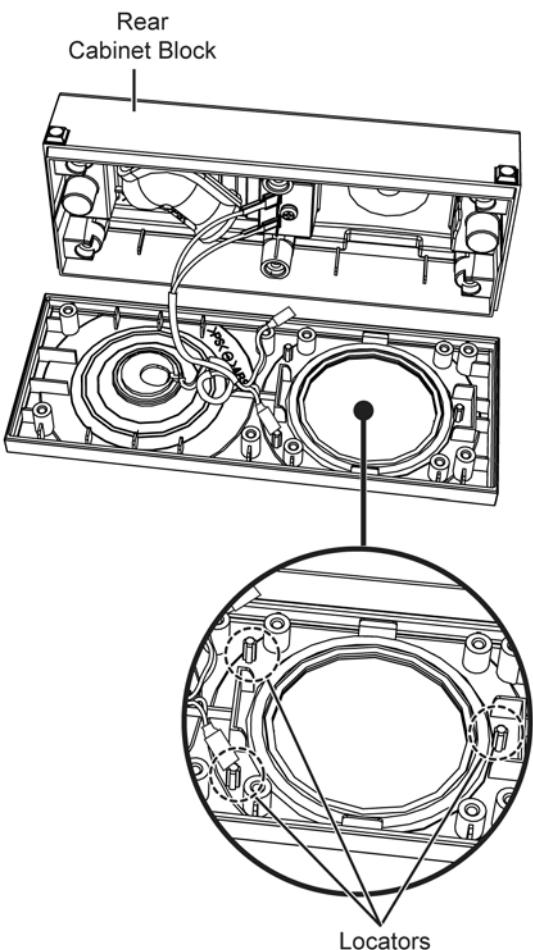

**Caution:** During assembling, ensure that the Woofer Speaker (SP3) is seated properly within the 2 guides of the Front Cabinet Block.

**Step 4 : Remove the Eva Packing.**

**Caution:** During assembling, ensure that the Eva Packing is seated properly onto the 3 locators of the Front Cabinet Block.

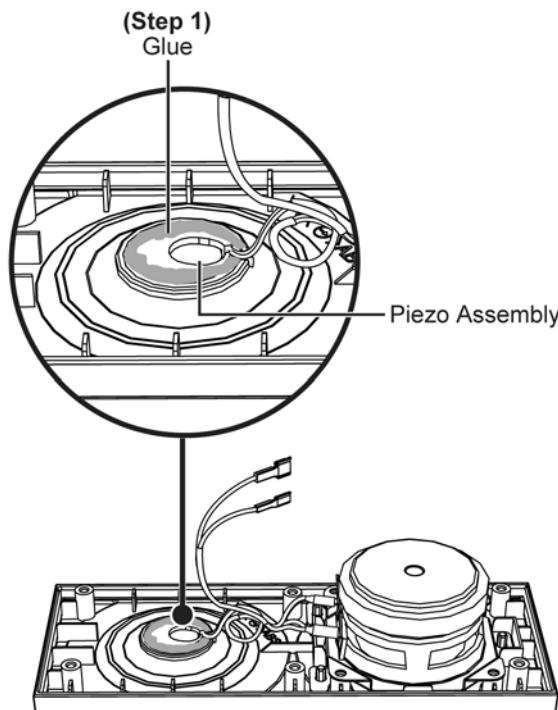

### 11.7.3. Replacement of Speaker Wire Assembly

**Note :** Speaker Wire Assembly is inclusive of Piezo.

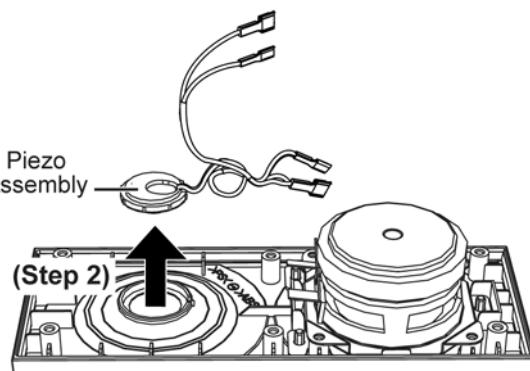

- Refer to "Disassembly of Center Speaker Unit".
- Refer to "Disassembly of Rear Cabinet Assembly" (Step 1) to (Step 4).

#### 11.7.3.1. Disassembly of Speaker Wire Assembly

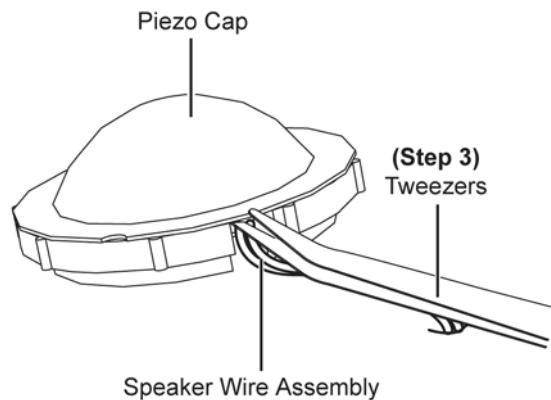

**Step 1 : Remove the Glue.**

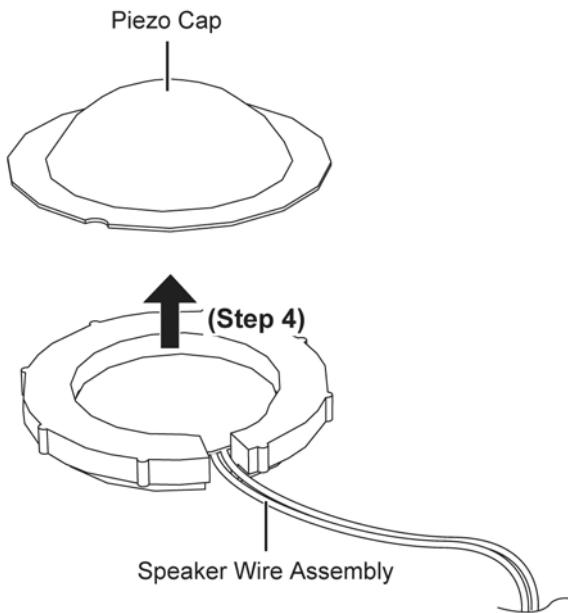

**Step 2 : Remove the Speaker Wire Assembly together with Piezo Assembly.**

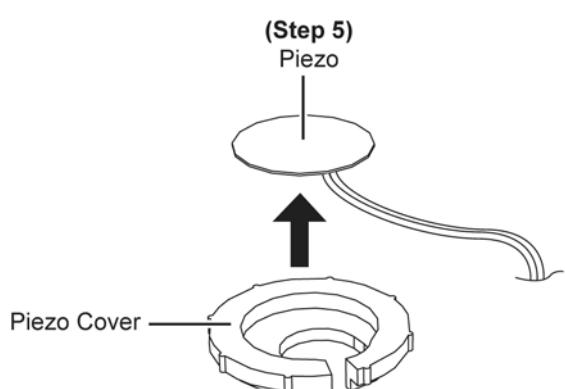

**Step 3 :** Use a pair of Tweezers to remove the Piezo Cap from the Speaker Wire Assembly.

**Step 4 :** Remove the Piezo Cap.

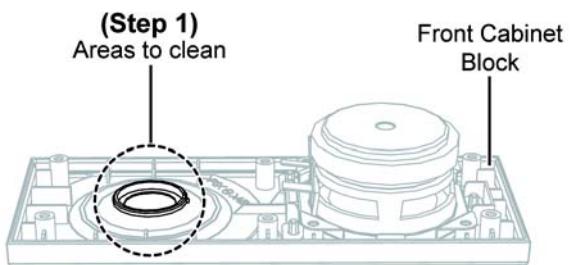

**Step 5 : Remove the Piezo from the Piezo Cover.**

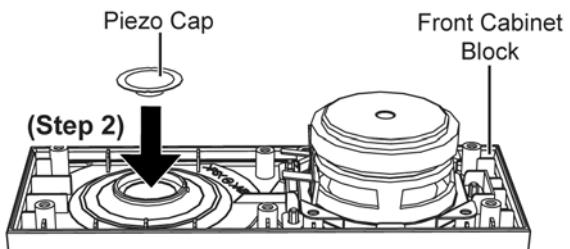

### 11.7.3.2. Assembly of Speaker Wire Assembly

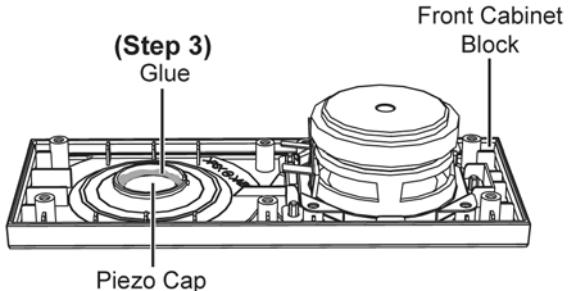

**Step 1 :** Clean the surface of the Front Cabinet Block.

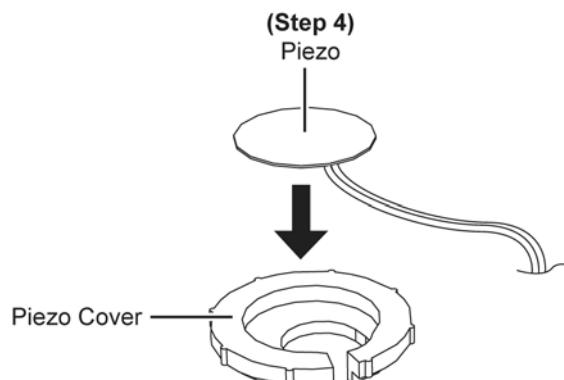

**Step 2 :** Place the Piezo Cap onto the Front Cabinet Block.

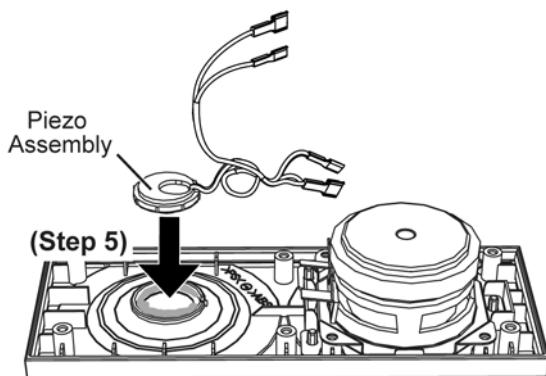

**Step 3 :** Apply Glue to the Piezo Cap.

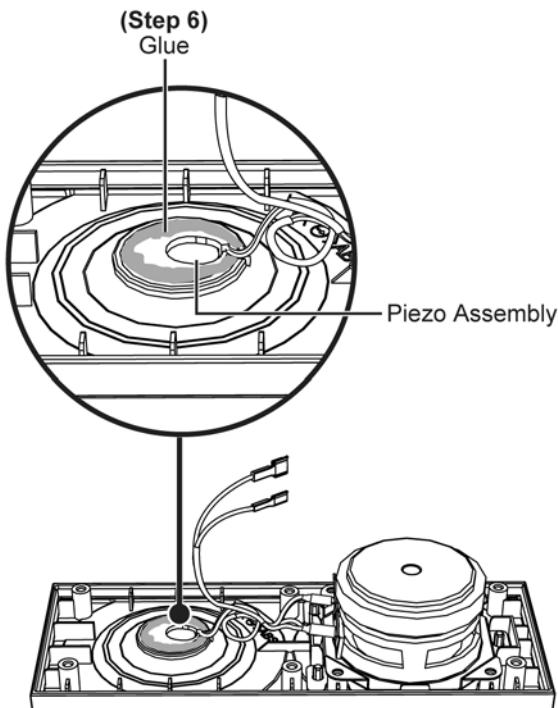

**Step 4 :** Place the Piezo onto the Piezo Cover.

**Step 5 :** Place the Piezo Assembly onto the Piezo Cap.

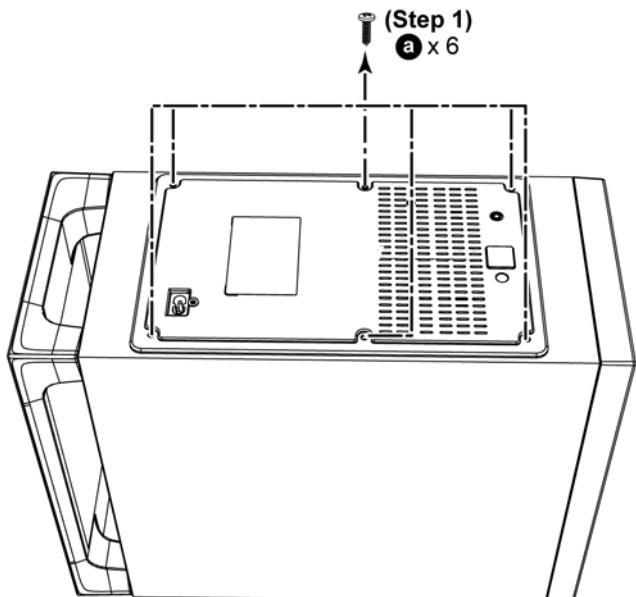

**Step 6 :** Apply Glue to the Piezo Assembly.

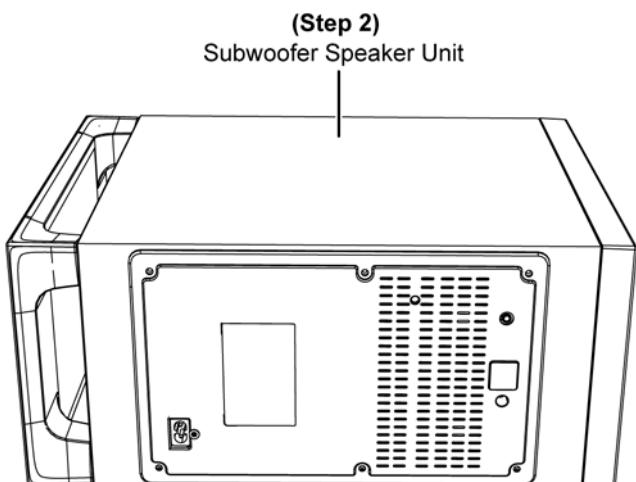

## 11.8. Disassembly of Active Subwoofer (SB-HWA770)

### 11.8.1. Disassembly of Rear Panel Block

**Step 1 :** Remove 6 screws.

**Step 2 :** Upset the Subwoofer Speaker Unit.

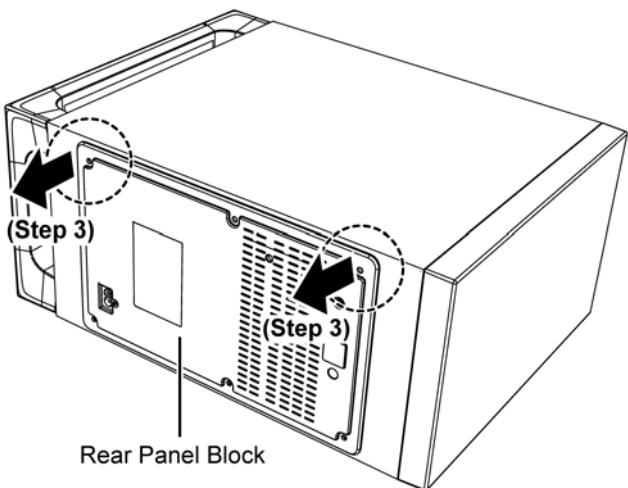

**Step 3 :** Slightly detach the Rear Panel Block.

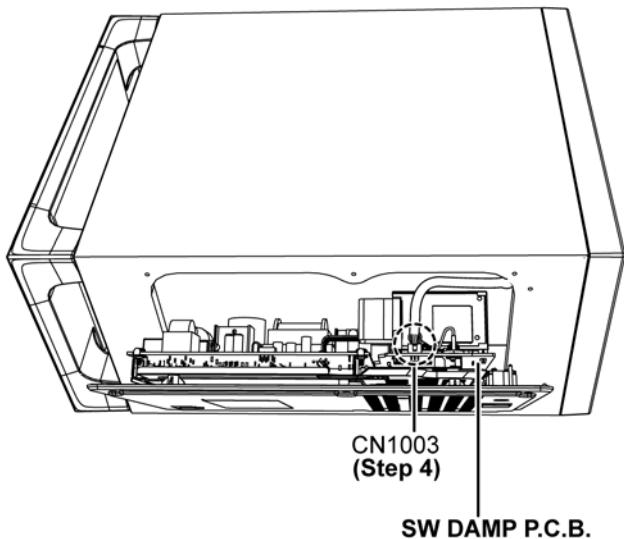

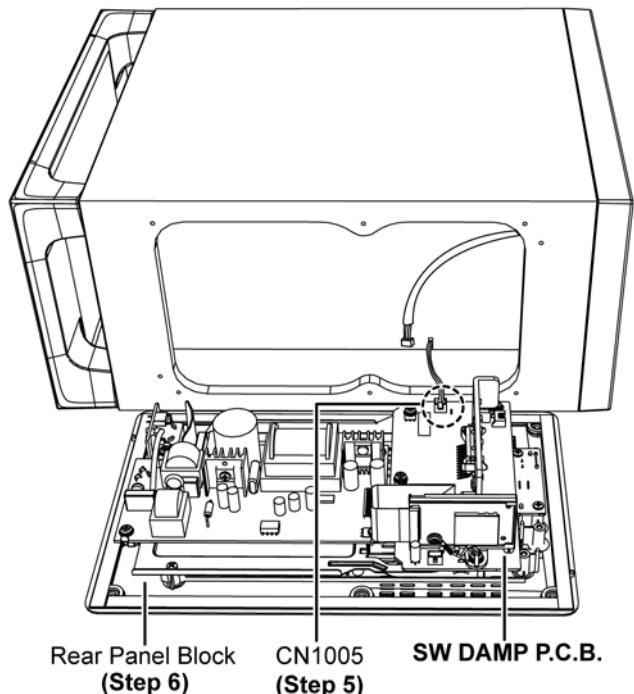

**Caution : Do not exert too much force as it may damage the wiring inside.**

**Step 5 :** Detach 2P Cable Wire at the connector (CN1005) on the SW DAMP P.C.B..

**Step 6 :** Remove the Rear Panel Block.

**Step 4 :** Detach 3P Cable Wire at the connector (CN1003) on the SW DAMP P.C.B..

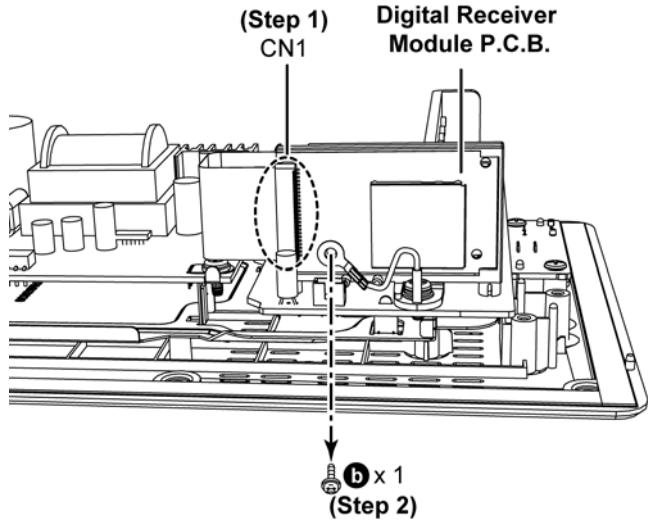

## 11.8.2. Disassembly of Digital Receiver Module P.C.B.

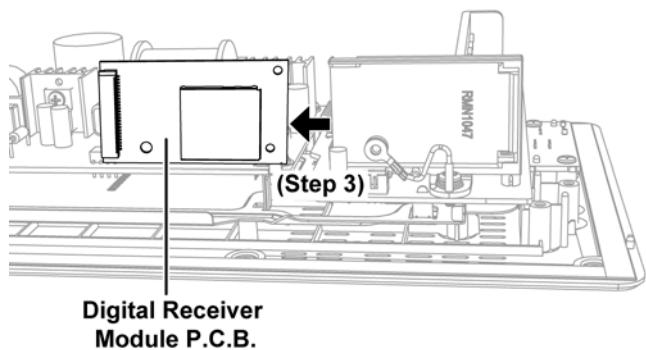

- Refer to "Disassembly of Rear Panel Block".

**Step 1** : Detach 24P FFC at the connector (CN1) on the Digital Receiver Module P.C.B..

**Step 2** : Remove 1 screw.

**Step 3** : Remove the Digital Receiver Module P.C.B..

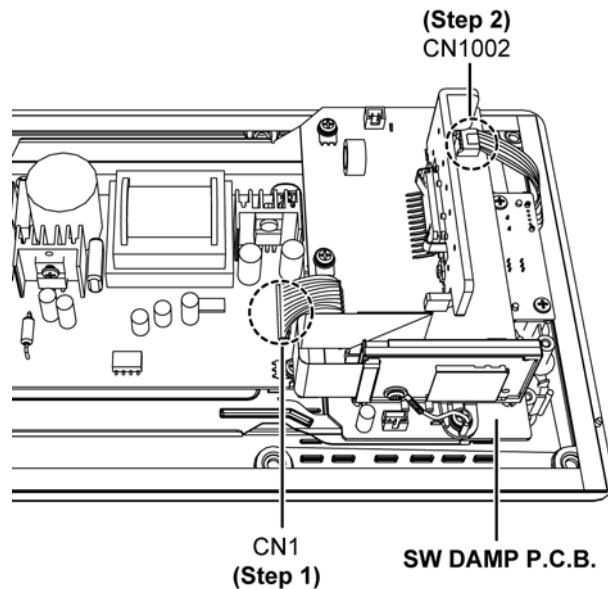

## 11.8.3. Disassembly of SW DAMP P.C.B.

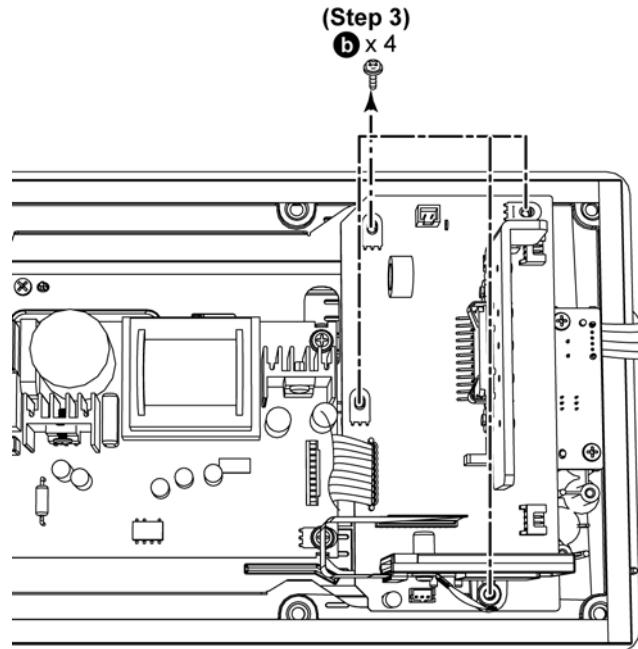

- Refer to "Disassembly of Rear Panel Block".

**Step 1** : Detach 10P Cable Wire at the connector (CN1) on the SMPS P.C.B..

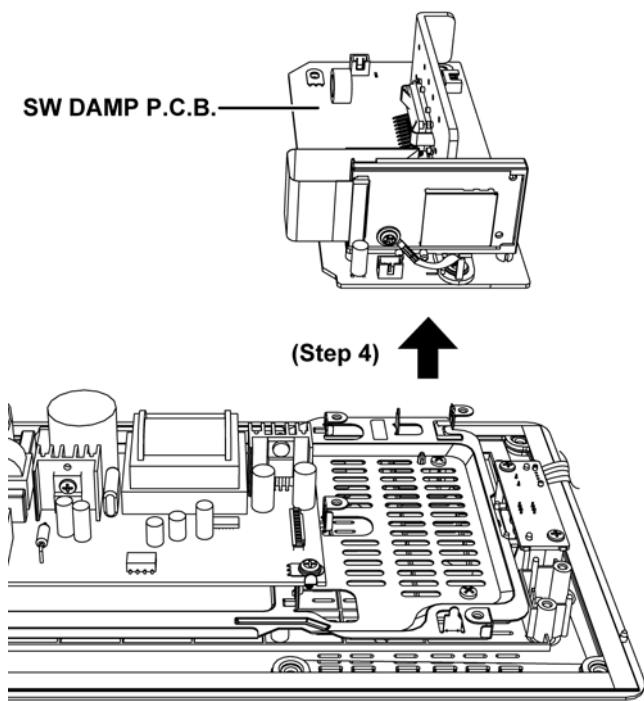

**Step 2** : Detach 4P Cable Wire at the connector (CN1002) on the SW DAMP P.C.B..

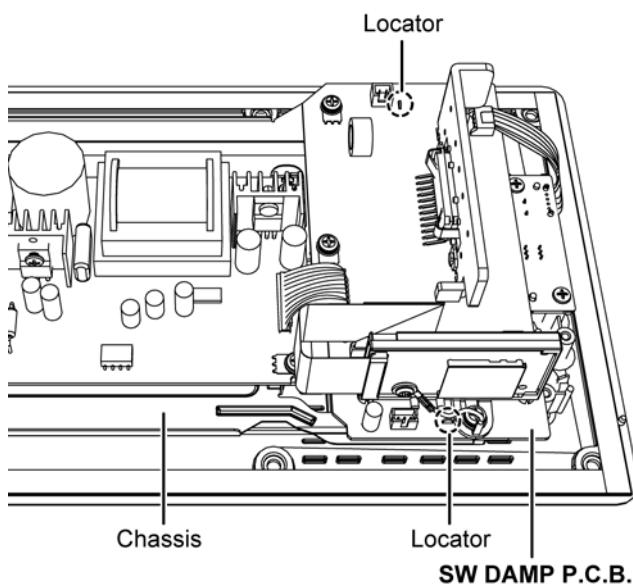

**Step 3** : Remove 4 screws.

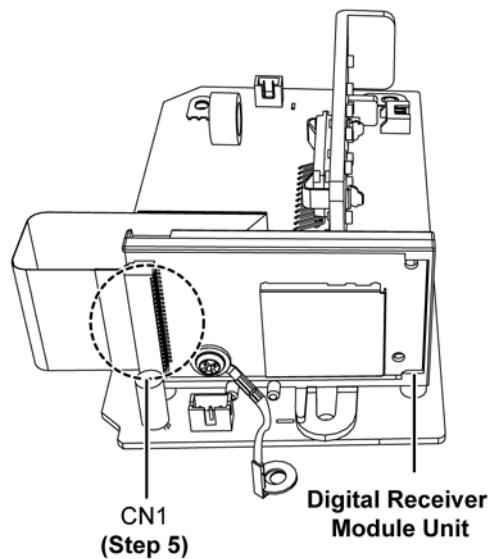

**Step 4 : Remove the SW DAMP P.C.B..**

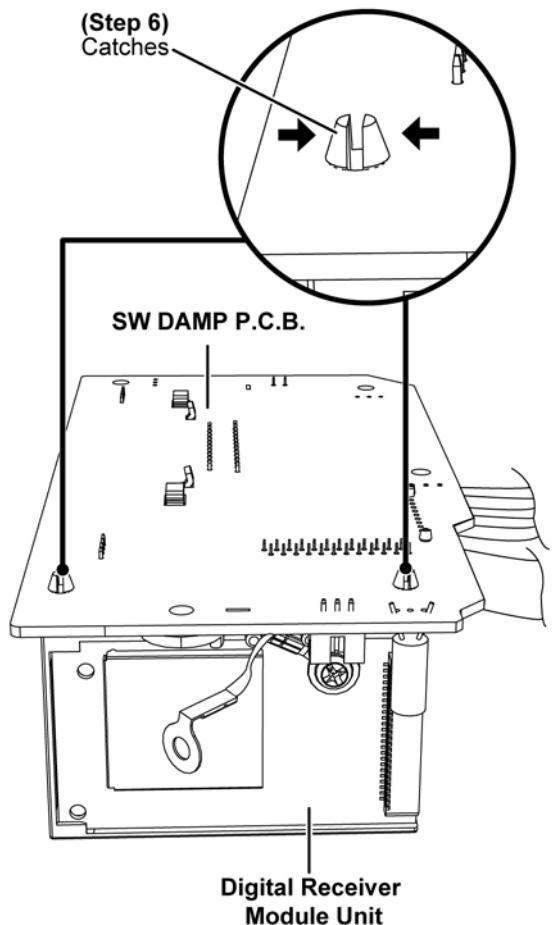

**Caution:** During assembling, ensure that the SW DAMP P.C.B. is seated properly onto the 2 locators of the chassis.

**Step 5 : Detach 24P FFC at the connector (CN1) on the Digital Receiver Module P.C.B..**

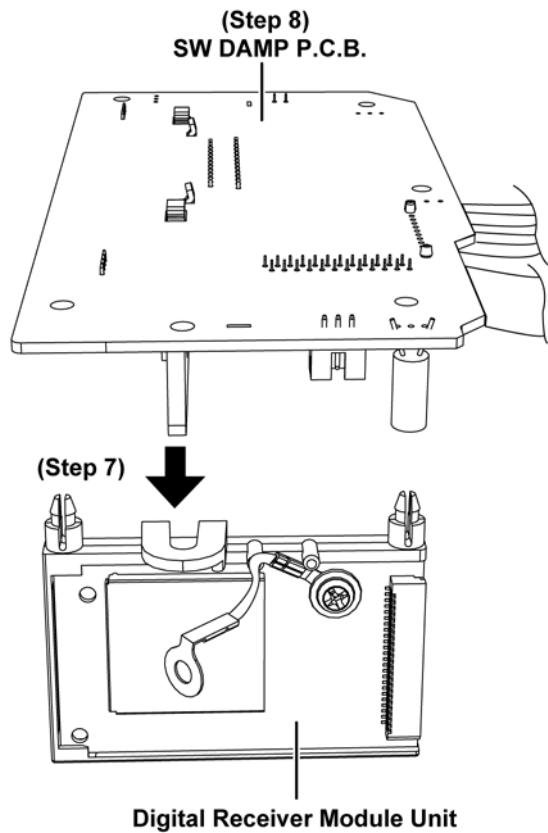

**Step 6 : Upset the SW DAMP P.C.B. to release the catches.**

**Step 7** : Remove the Digital Receiver Module Unit.

**Step 8** : Remove the SW DAMP P.C.B..

## 11.8.4. Replacement of Digital Amplifier IC (IC5200)

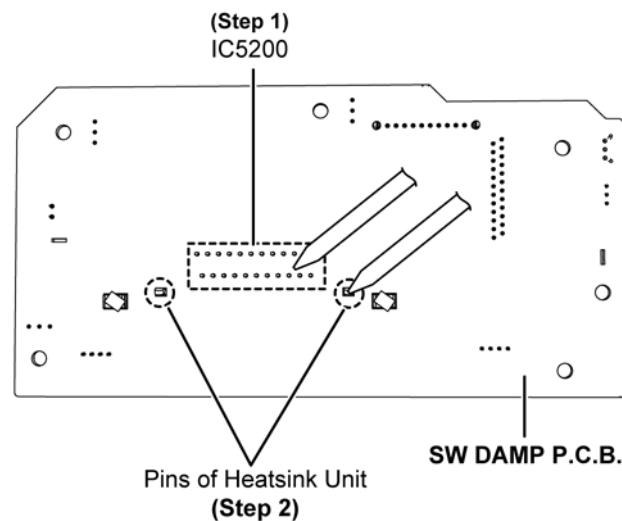

- Refer to "Disassembly of SW DAMP P.C.B.".

### 11.8.4.1. Disassembly of Digital Amplifier IC (IC5200)

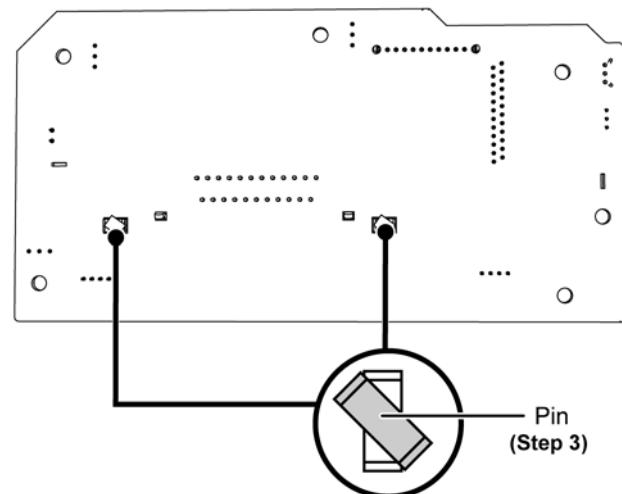

**Caution:** Handle the SW DAMP P.C.B. with caution. Avoid touching the Heatsink unit due to its high temperature after prolonged use. Touching is may lead to injuries

**Step 1** : Desolder the pins of Digital Amplifier IC (IC5200) on the solder side of SW DAMP P.C.B..

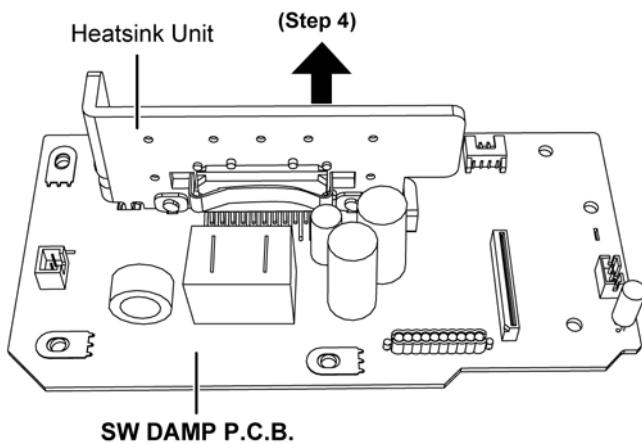

**Step 2** : Desolder the pins of Heatsink Unit on the solder side of SW DAMP P.C.B..

**Step 3** : Twist the pins of heatsink unit by  $45^{\circ}$  in an anti-clockwise or clockwise direction.

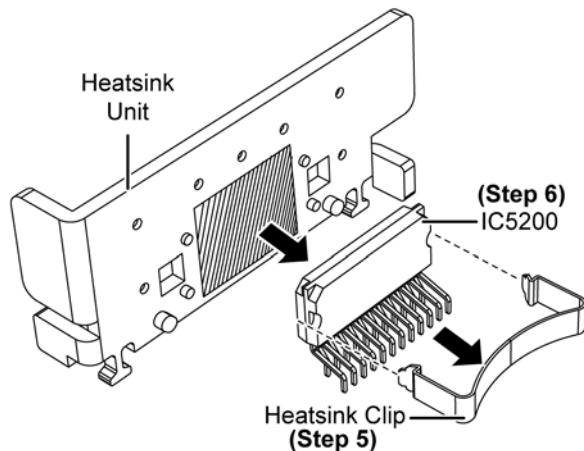

**Step 4 :** Remove the Heatsink Unit and the Digital Amplifier IC (IC5200).

**Step 5 :** Remove the Heatsink Clip.

**Step 6 :** Remove the Digital Amplifier IC (IC5200).

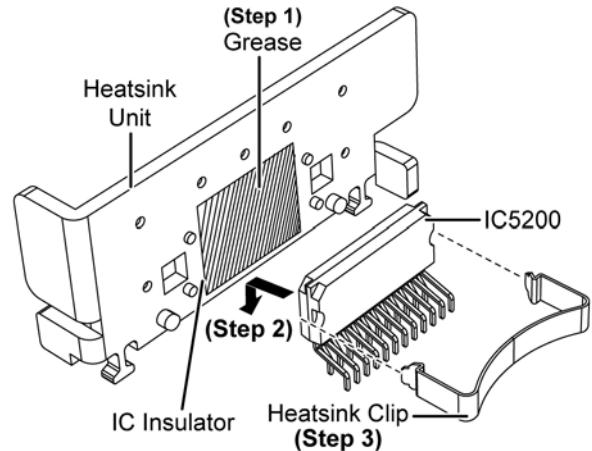

#### 11.8.4.2. Assembly of Digital Amplifier IC (IC5200)

**Step 1 :** Apply grease on the IC Insulator at the Heatsink Unit.

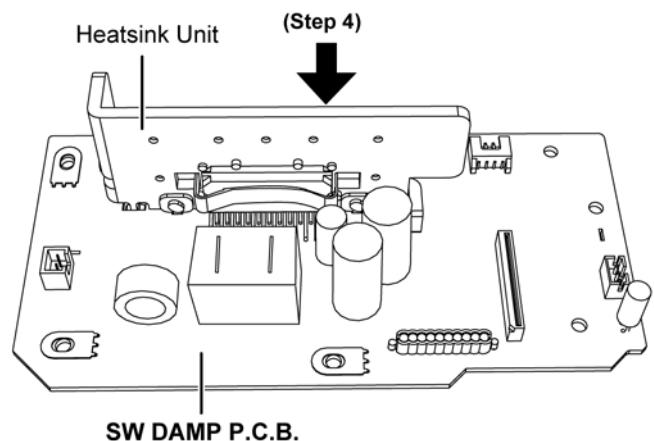

**Step 2 :** Fix the Digital Amplifier IC (IC5200) onto the SW DAMP P.C.B..

**Step 3 :** Fix the Heatsink Clip onto the Heatsink Unit.

**Caution :** Ensure that the Heatsink Clip is caught properly onto the Heatsink Unit.

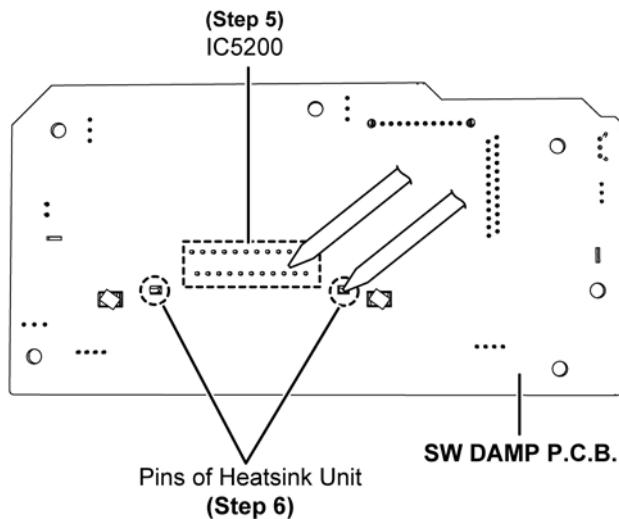

**Step 4 :** Fix the Heatsink Unit together with Digital Amplifier IC (IC5200) onto the SW DAMP P.C.B..

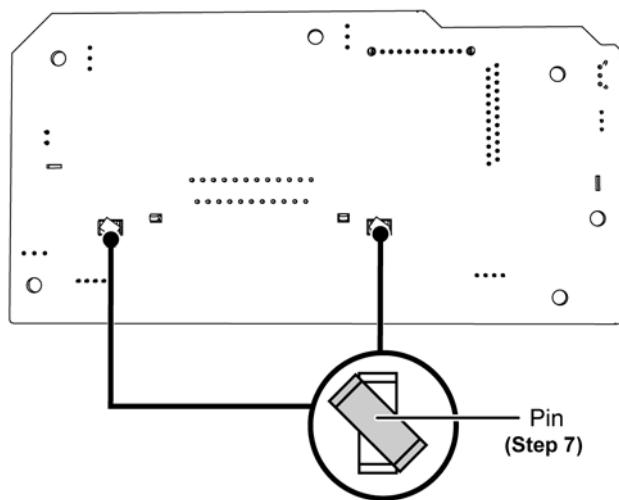

**Step 5** : Solder the pins of the Digital Amplifier IC (IC5200).

**Step 6** : Solder the pins of Heatsink Unit.

**Step 7** : Twist the pins of the Heatsink Unit by 45° in an anti-clockwise or clockwise direction.

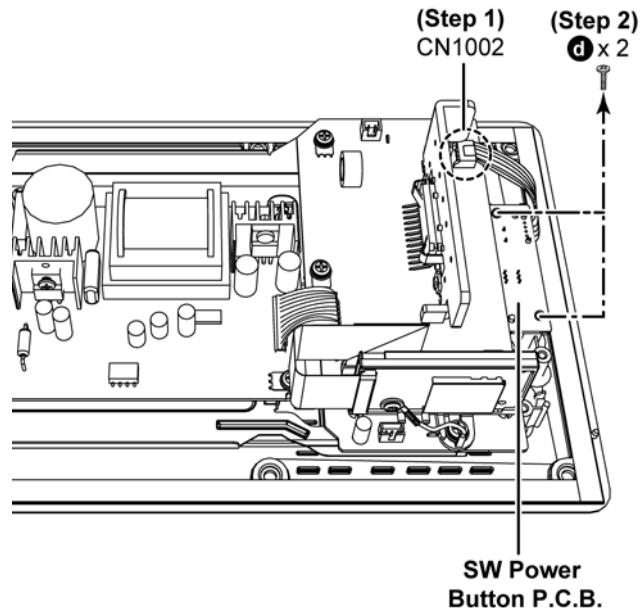

### 11.8.5. Disassembly of Power Button P.C.B.

- Refer to "Disassembly of Rear Panel Block".

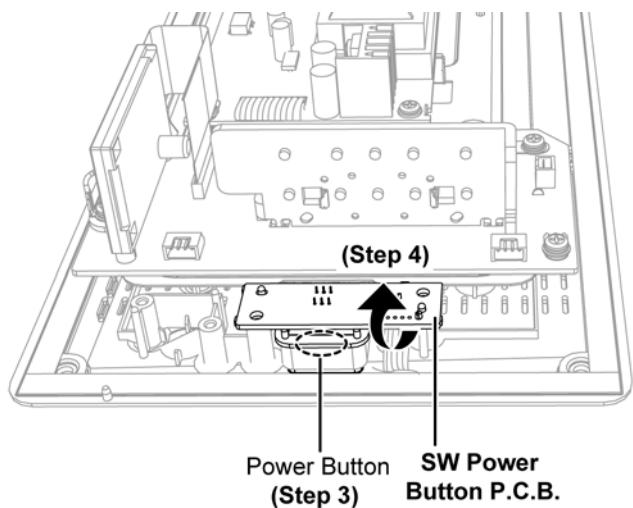

**Step 1** : Detach 4P Cable Wire at the connector (CN1002) on the SW DAMP P.C.B..

**Step 2** : Remove 2 screws.

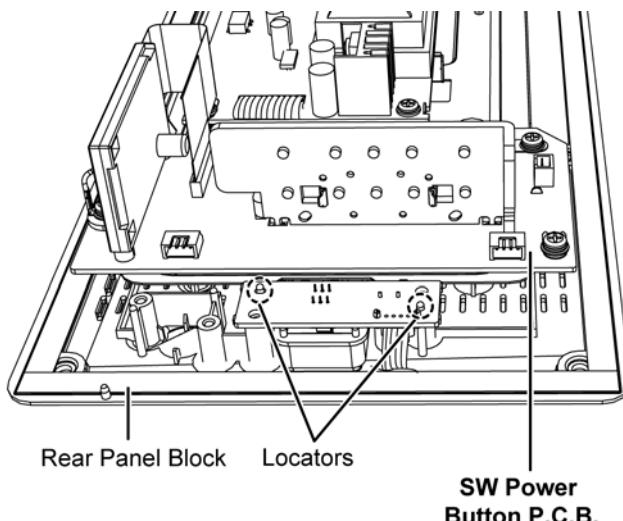

**Step 3** : Press to hold down the Power Button.

**Step 4** : Slightly lift up and slide out to remove the SW Power Button P.C.B..

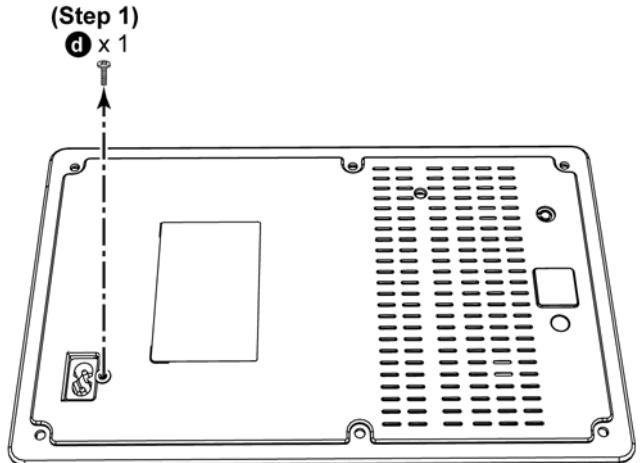

**Caution : During assembling, ensure that the SW Power Button P.C.B. is seated properly onto the 2 locators of the Rear Panel Block.**

### 11.8.6. Disassembly of SW SMPS and SW AC Inlet P.C.B.

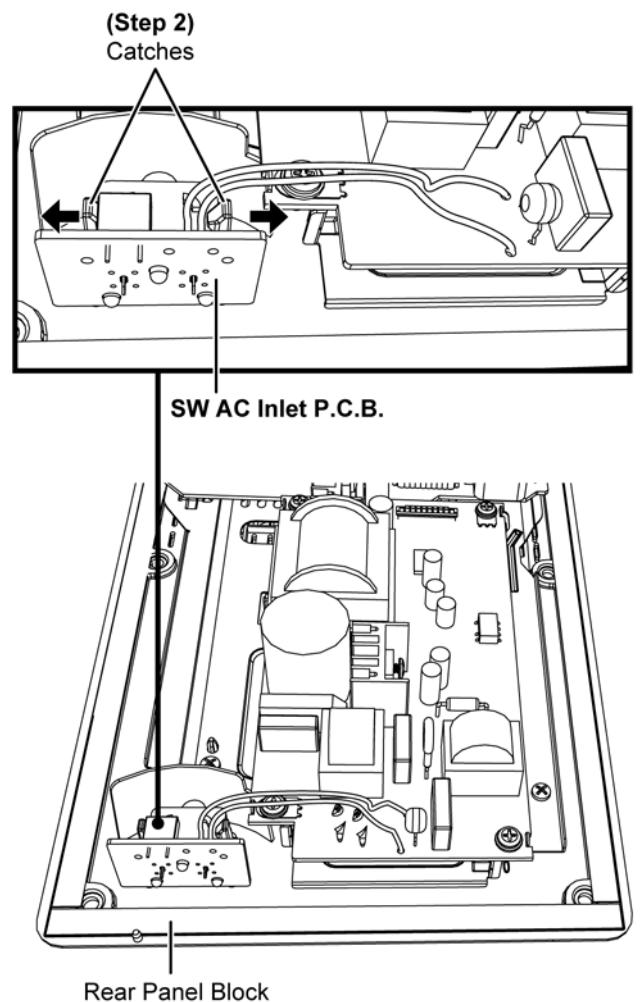

- Refer to "Disassembly of Rear Panel Block".

**Step 1 : Remove 1 screw.**

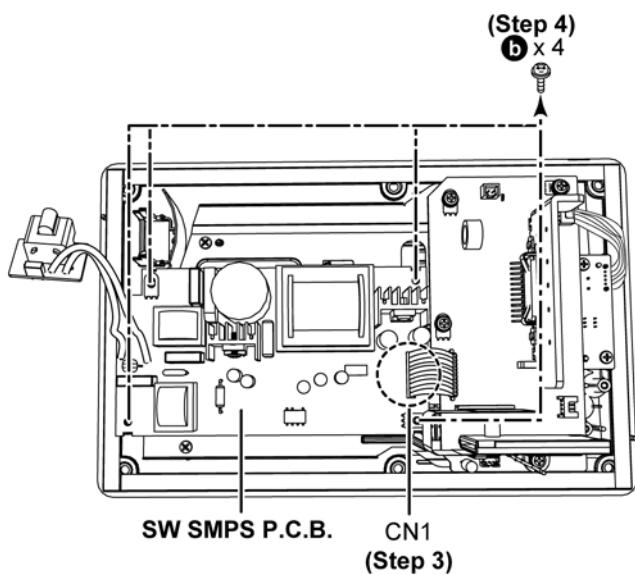

**Step 2 : Release 2 catches.**

**Caution : During assembling, ensure that the SW AC Inlet P.C.B. is caughted properly onto the Rear Panel Block.**

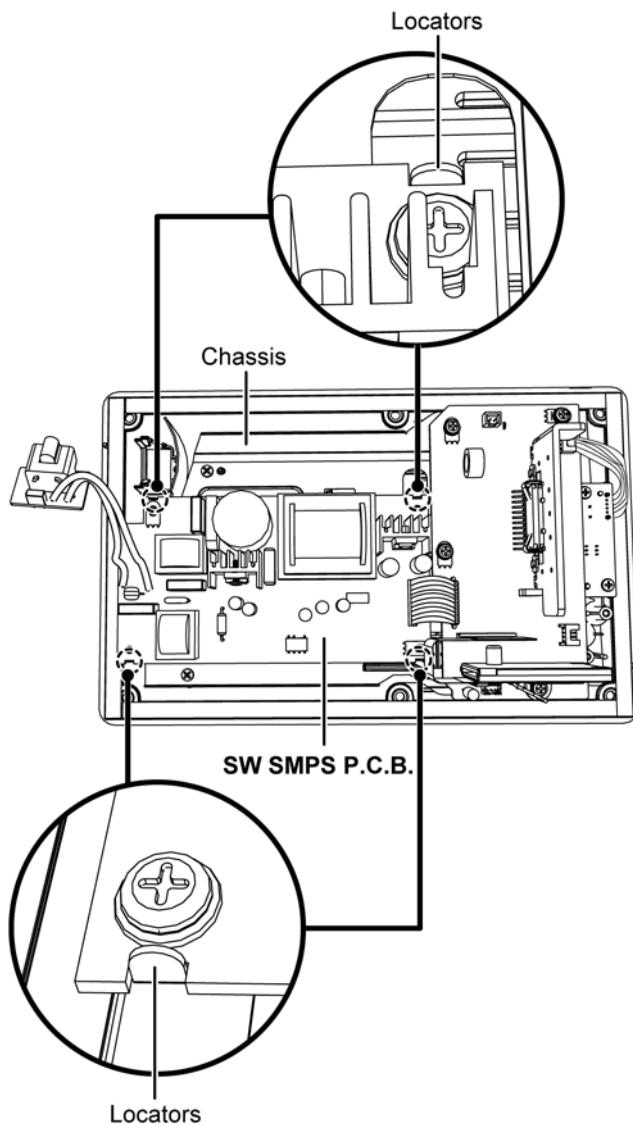

**Step 3 :** Detach 10P Cable Wire at the connector (CN1) on the SW SMPS P.C.B..

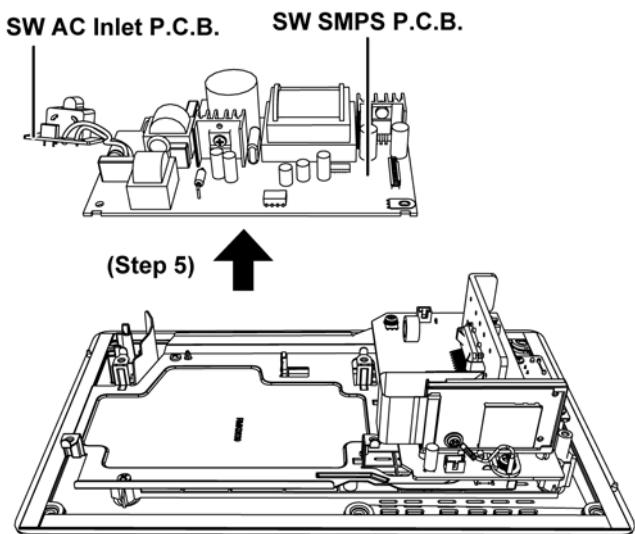

**Step 4 :** Remove 4 screws.

**Caution : During assembling, ensure that the SW SMPS P.C.B. is seated properly onto the locators of the chassis.**

**Step 5 :** Remove the SW SMPS and SW AC Inlet P.C.B..

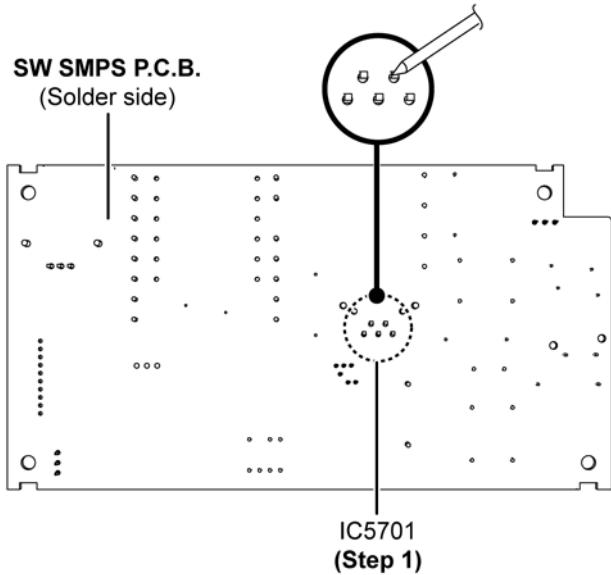

## 11.8.7. Replacement of Switching Regulator IC (IC5701)

- Refer to "Disassembly of SW SMPS and SW AC Inlet P.C.B.".

### 11.8.7.1. Disassembly of Switching Regulator IC (IC5701)

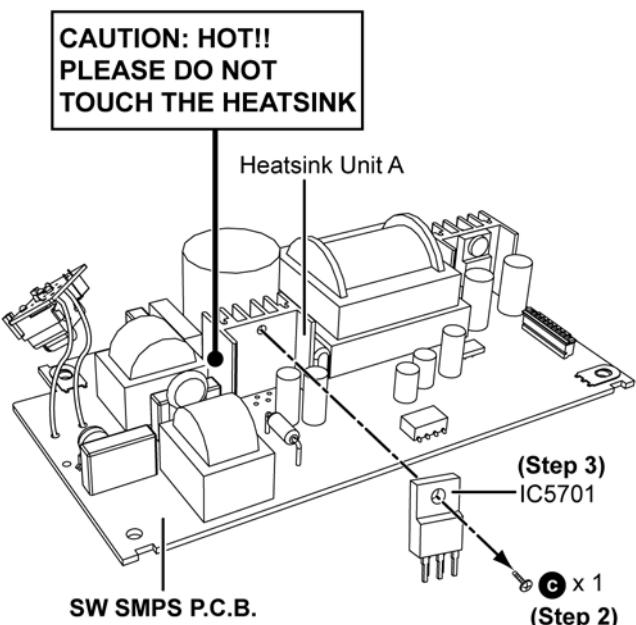

**Caution:** Handle the SW SMPS P.C.B. with caution. Avoid touching the Heatsink Unit A due to its high temperature after prolonged use. Touching it may lead to injuries.

**Step 1 :** Desolder the pins of Switching Regulator IC (IC5701) on the solder side of SW SMPS P.C.B..

**Step 2 :** Remove 1 screw.

**Step 3 :** Remove the Switching Regulator IC (IC5701) from the Heatsink Unit A.

### 11.8.7.2. Assembly of Switching Regulator IC (IC5701)

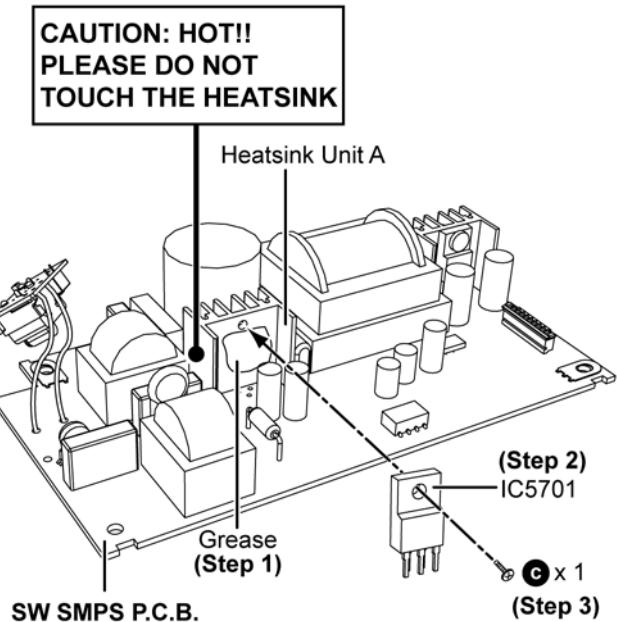

**Step 1 :** Apply grease on the Heatsink Unit A.

**Step 2 :** Fix the Switching Regulator IC (IC5701) to the SW SMPS P.C.B..

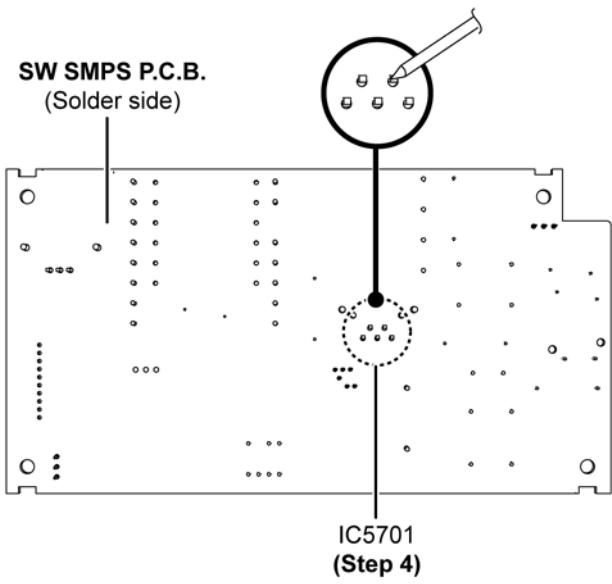

**Caution :** Ensure the pins of Switching Regulator IC (IC5701) is inserted and seated properly on the SW SMPS P.C.B..

**Step 3 :** Fix the Switching Regulator IC (IC5701) onto the Heatsink Unit A with a screw.

**Caution :** Ensure the Switching Regulator IC (IC5701) is tightly screwed to the Heatsink Unit A.

**Step 4 :** Solder the pins of Switching Regulator IC(IC5701) on the solder side of the SW SMPS P.C.B..

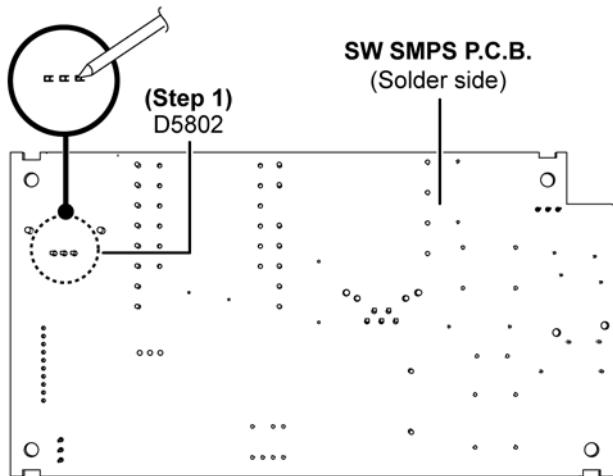

## 11.8.8. Replacement of Rectifier Diode (D5802)

• Refer to "Disassembly of SW SMPS and SW AC Inlet P.C.B.".

### 11.8.8.1. Disassembly of Rectifier Diode (D5802)

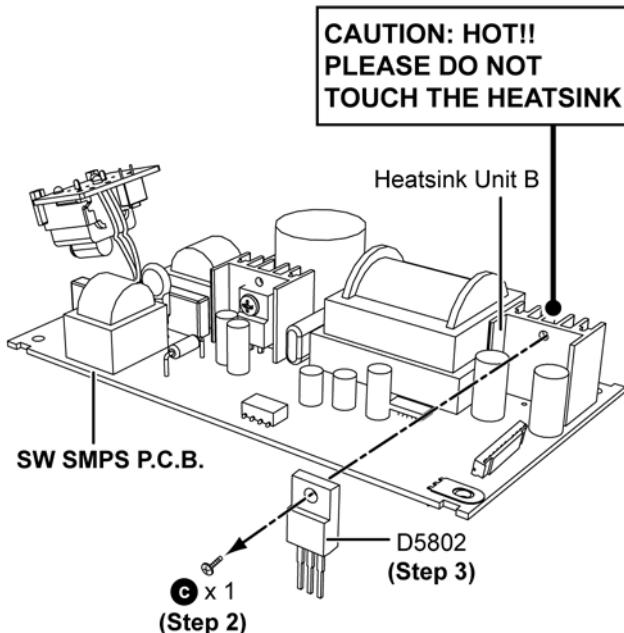

**Caution:** Handle the SW SMPS P.C.B. with caution. Avoid touching the Heatsink Unit B due to its high temperature after prolonged use. Touching it may lead to injuries.

**Step 1 :** Desolder the pins of the Rectifier Diode (D5802) on the solder side of the SW SMPS P.C.B..

**Step 2 :** Remove 1 screw.

**Step 3 :** Remove the Rectifier Diode (D5802) from the Heatsink Unit B.

### 11.8.8.2. Assembly of Rectifier Diode (D5802)

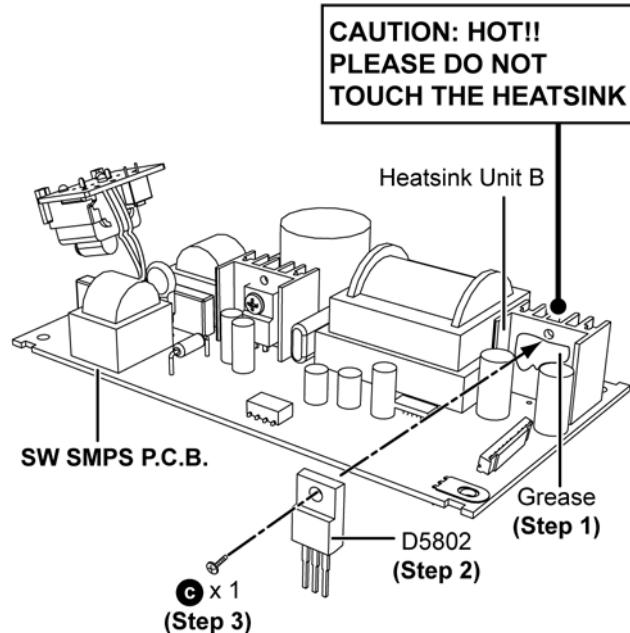

**Step 1 :** Apply grease on the Heatsink Unit B.

**Step 2 :** Fix the Rectifier Diode (D5802) to the SW SMPS P.C.B..

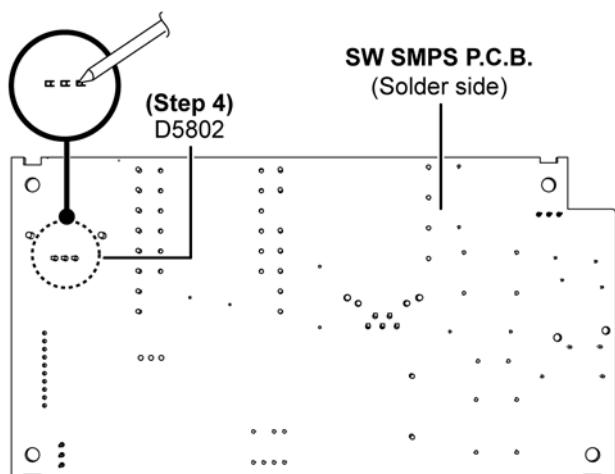

**Caution :** Ensure the pins of Rectifier Diode (D5802) is inserted and seated properly on the SW SMPS P.C.B..

**Step 3 :** Fix the Rectifier Diode (D5802) onto the Heatsink Unit B with a screw.

**Caution :** Ensure the Rectifier Diode (D5802) is tightly screwed to the Heatsink Unit B.

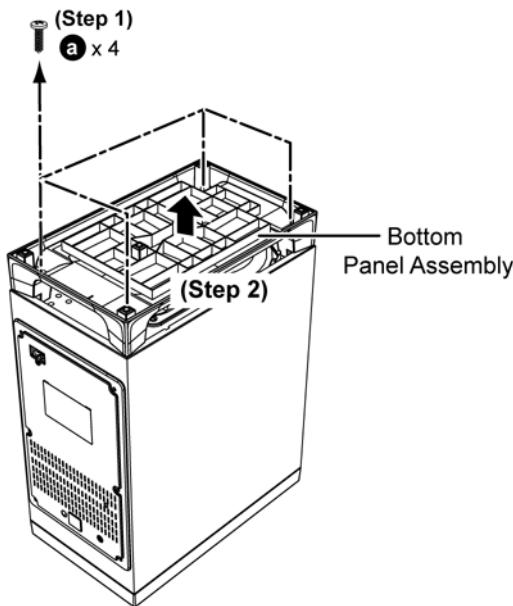

**Step 4 :** Solder the pins of the Rectifier Diode (D5802) on the solder side of the SW SMPS P.C.B..

### 11.8.9. Disassembly of Bottom Panel Assembly

**Step 1 :** Remove 4 screws.

**Step 2 :** Remove the Bottom Panel Assembly.

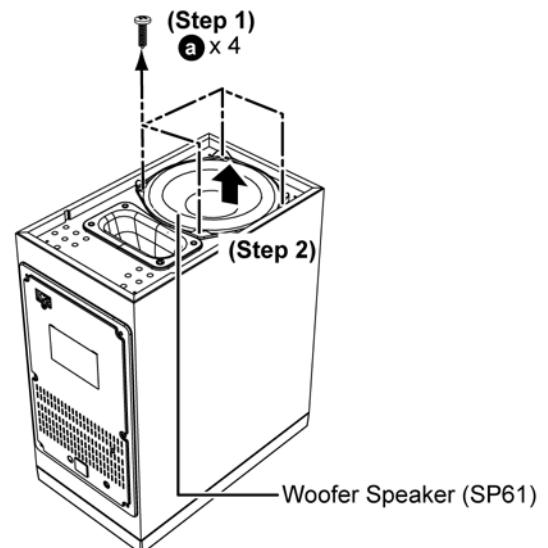

### 11.8.10. Disassembly of Woofer Speaker (SP61)

- Refer to "Disassembly of Bottom Panel Assembly".

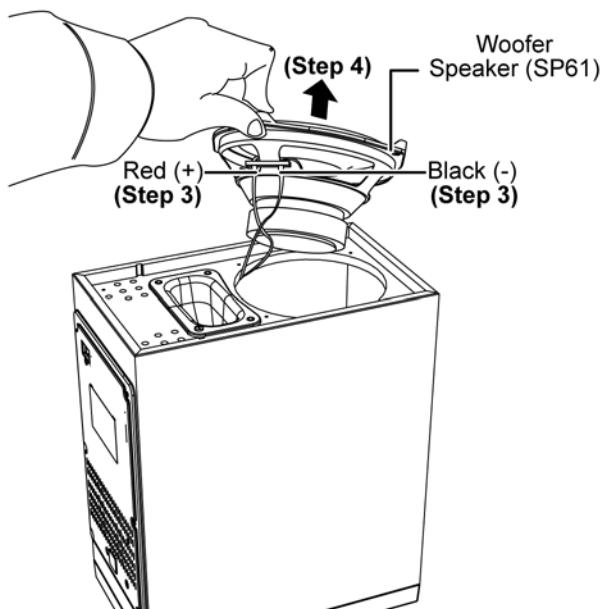

**Step 1 :** Remove 4 screws.

**Step 2 :** Slightly lift up the Woofer Speaker (SP61).

**Step 3 :** Detach the Red (+) wire and Black (-) wire from the terminal of the Woofer Speaker (SP61).

**Step 4 :** Remove the Woofer Speaker (SP61).

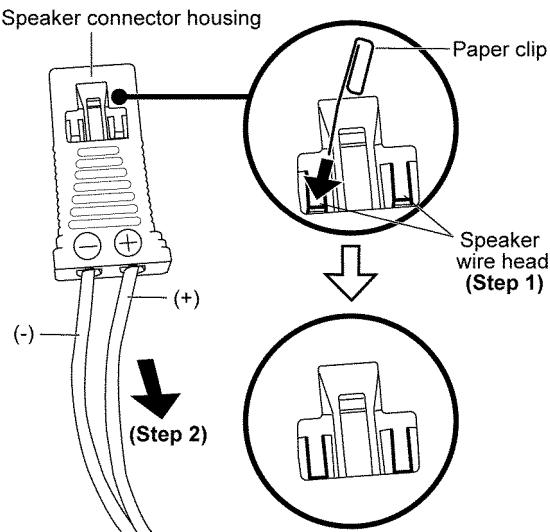

## 11.8.11. Replacement of Speaker Connector Housing

### 11.8.11.1. Disassembly of Speaker Connector Housing

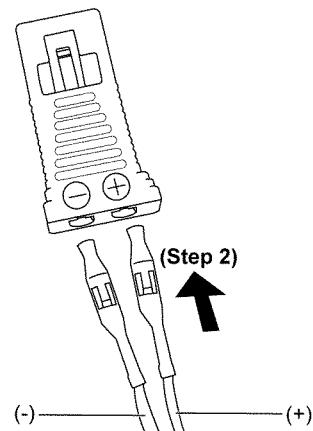

**Step 1:** Use a paper clip push the Speaker Wire head until it hide inside the Speaker Connector Housing.

**Step 2:** Pull out the (+) and (-) speaker wires.

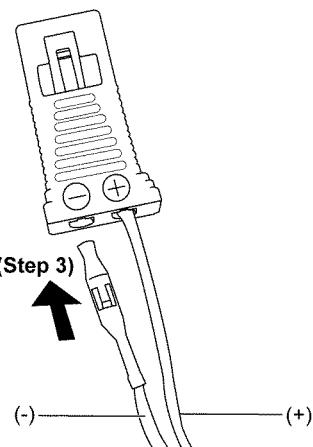

**Step 2:** Insert the (+) speaker wire into the (+) hole of the Speaker Connector Housing.

**Note:** Push in the speaker wire until hear the "click" sound.

**Step 3:** Insert the (-) speaker wire into the (-) hole of the speaker connector housing.

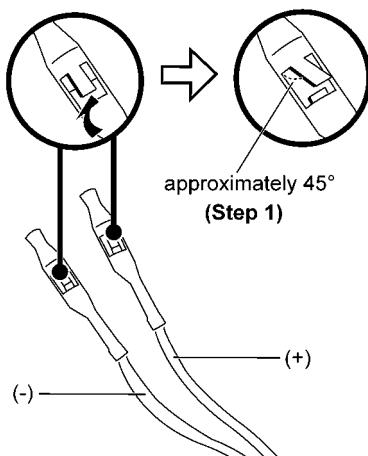

**Note:** A "click" will be heard when the Speaker Wire is fully inserted.

### 11.8.11.2. Assembly of Speaker Connector Housing

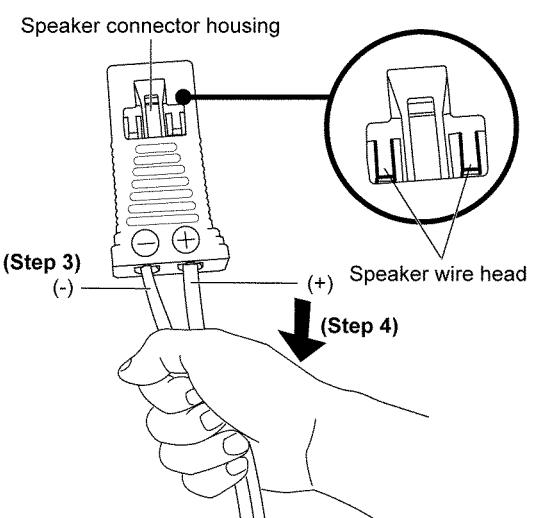

#### Housing

**Step 1:** Slightly push up the speaker wire head approximately 45° as shown.

**Step 4:** Pull both speaker wires gently to ensure they lock-in firmly.

**Note:** Repeat step1 to 3 if the speaker wires come out.

# 12 Service Position

## 12.1. Main Unit (SU-HTB770)

Note: For description of the disassembly procedures, see the Section 11

### 12.1.1. Checking and Repairing of HDMI P.C.B. (Side A)

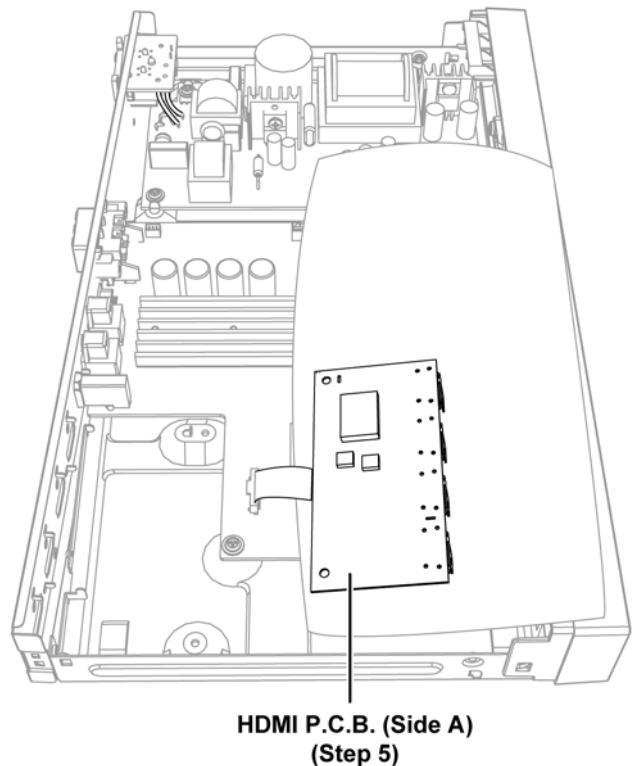

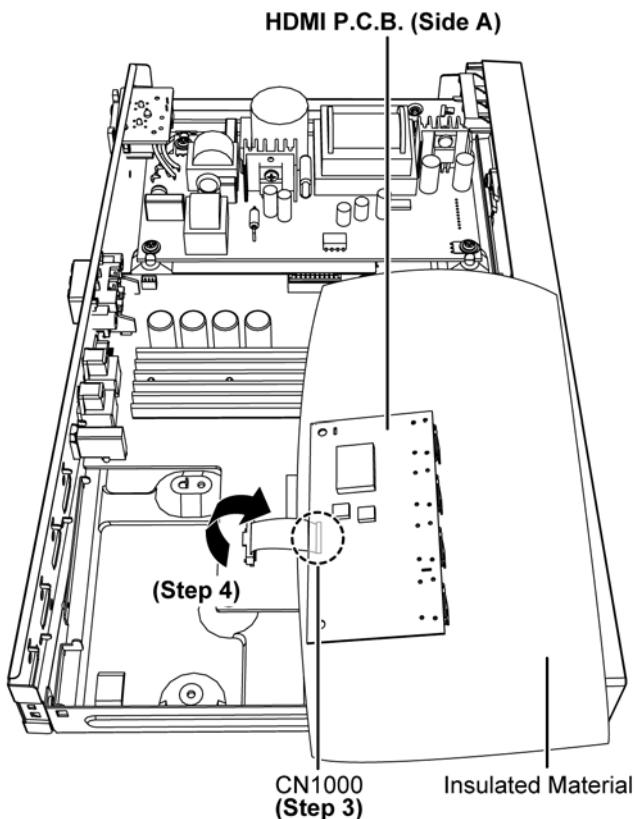

Step 5 : HDMI P.C.B. (Side A) can be checked as diagram shown.

Step 1 : Remove Top Cabinet.

Step 2 : Remove HDMI P.C.B..

Step 3 : Attach 26P FFC at the connector (CN1000) on the HDMI P.C.B..

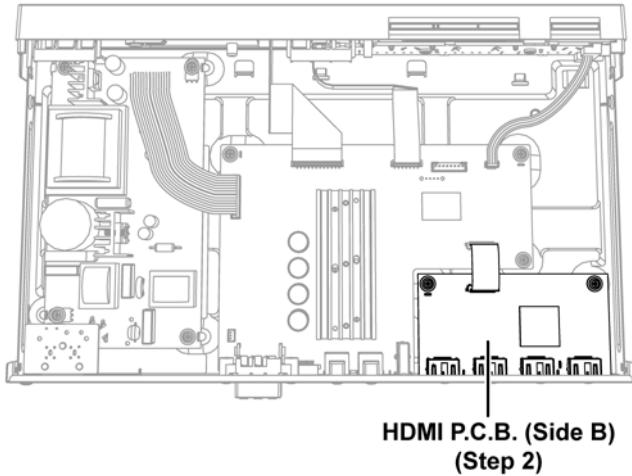

Step 4 : Upset and place the HDMI P.C.B. on an insulated material.

## 12.1.2. Checking and Repairing of HDMI P.C.B. (Side B)

**Step 1** : Remove Top Cabinet.

**Step 2** : HDMI P.C.B. (Side B) can be checked as diagram shown.

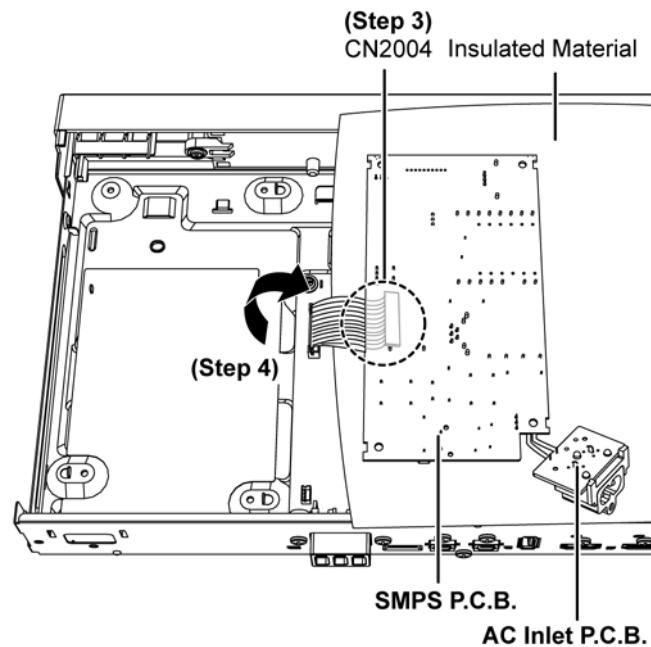

## 12.1.3. Checking and Repairing of SMPS and AC Inlet P.C.B.

**Step 1** : Remove Top Cabinet.

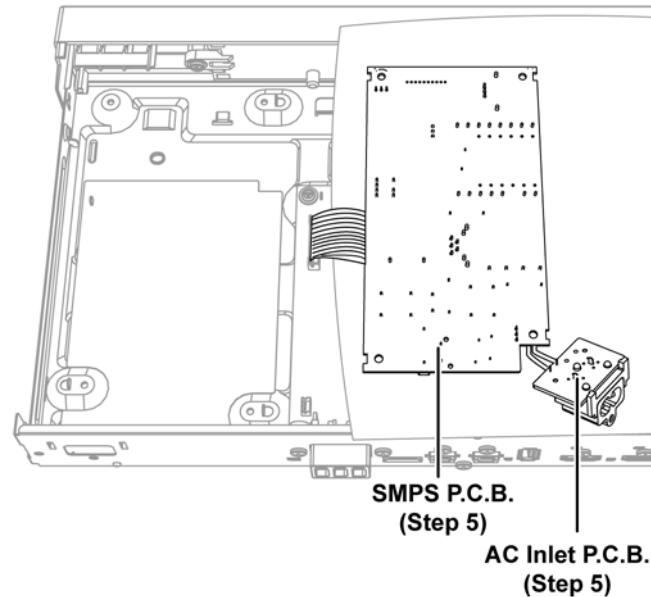

**Step 2** : Remove SMPS and AC Inlet P.C.B..

**Step 3** : Attach 10P Cable Wire at the connector (CN2004) on the Main P.C.B..

**Step 4** : Place the SMPS and AC Inlet P.C.B. on an insulated material.

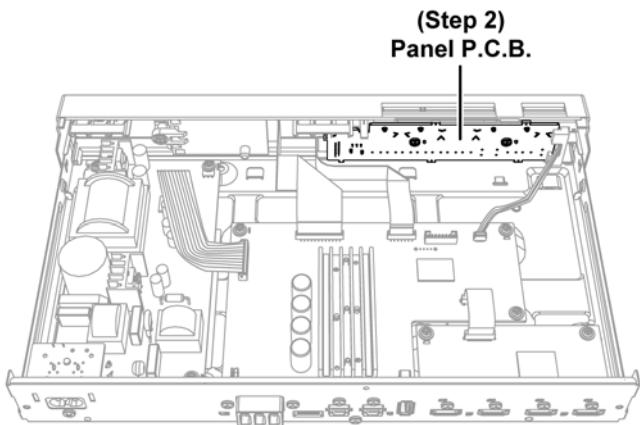

**Step 5** : SMPS and AC Inlet P.C.B. can be checked as diagram shown.

#### 12.1.4. Checking and Repairing of Panel P.C.B.

Step 1 : Remove Top Cabinet.

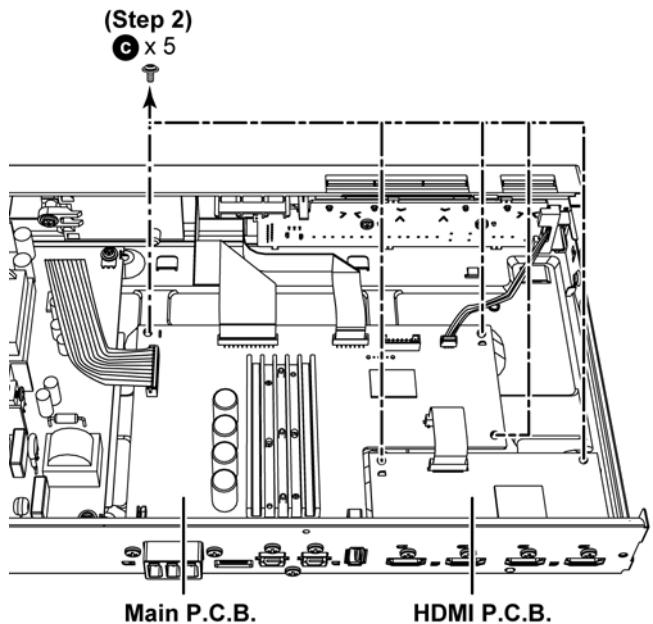

Step 2 : Panel P.C.B. can be checked as diagram shown.

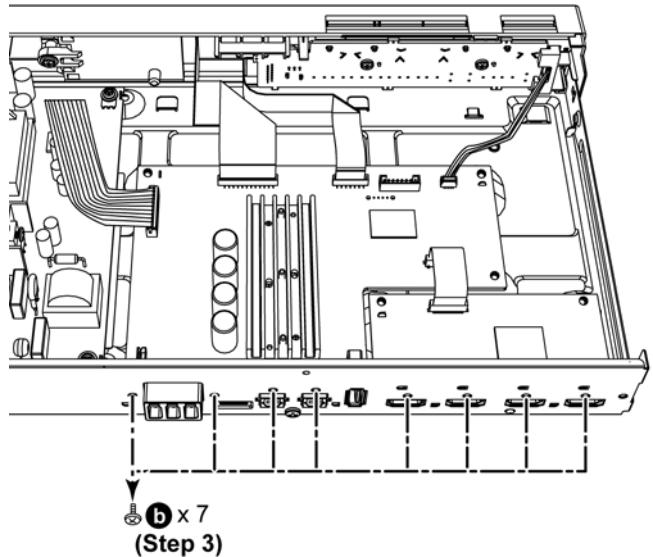

#### 12.1.5. Checking and Repairing of Main P.C.B. (Side A)

Step 1 : Remove Top Cabinet.

Step 2 : Remove 5 screws.

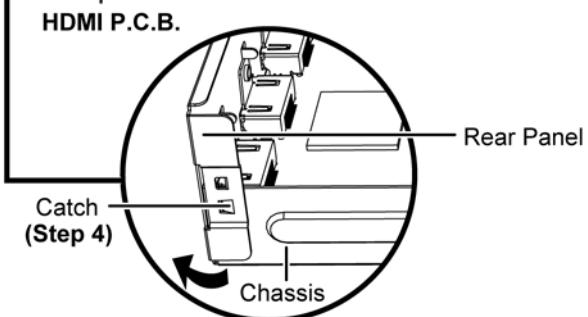

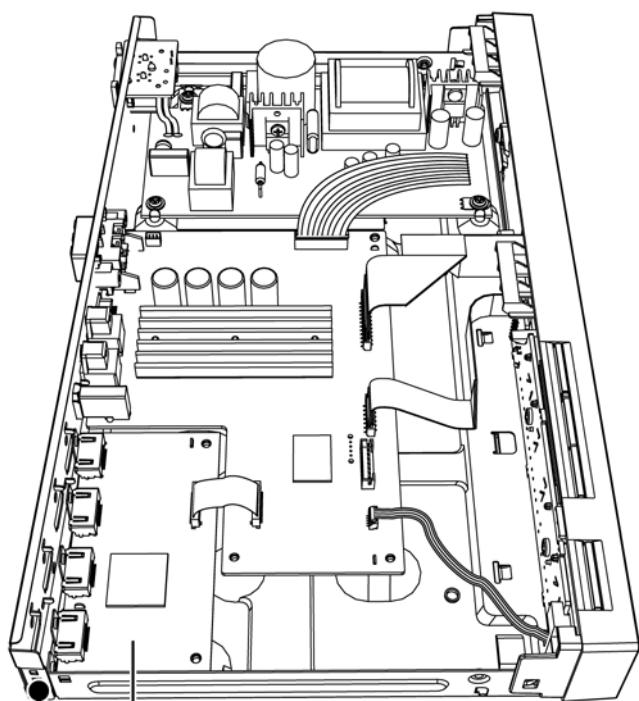

Step 3 : Remove 7 screws.

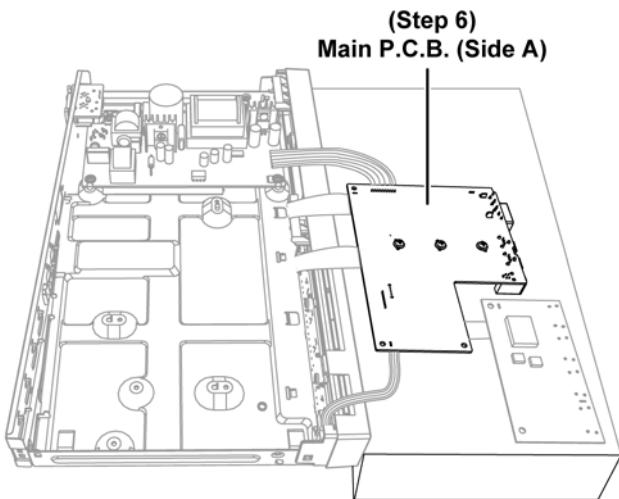

**Step 4 :** Release the catch on the right side of the Rear Panel slightly.

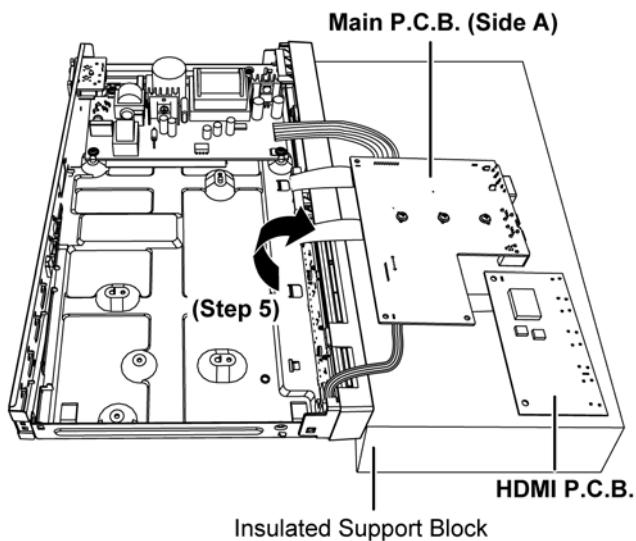

**Caution:** During assembling, ensure that the Rear Panel is caught properly onto the chassis.

**Step 6 :** Main P.C.B. (Side A) can be checked as diagram shown..

**Step 5 :** Upset and place the Main P.C.B. and HDMI P.C.B. on an Insulated Support Block as shown.

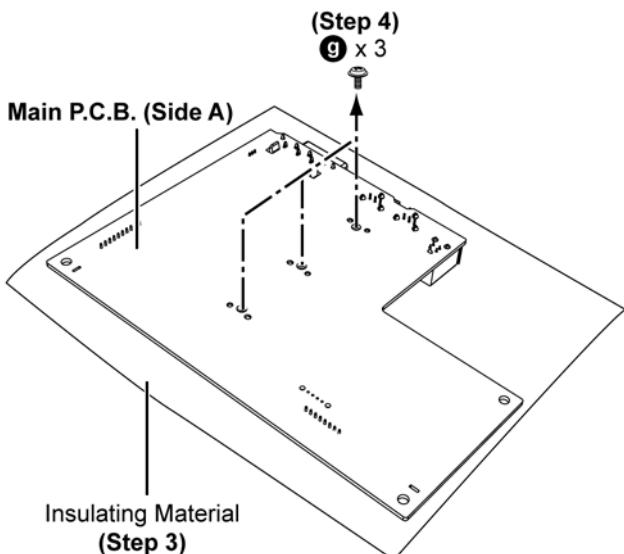

## 12.1.6. Checking and Repairing of Main P.C.B. (Side B)

**Step 1 :** Remove Top Cabinet.

**Step 2 :** Remove Main P.C.B..

**Step 3 :** Place the Main P.C.B. on an insulated material.

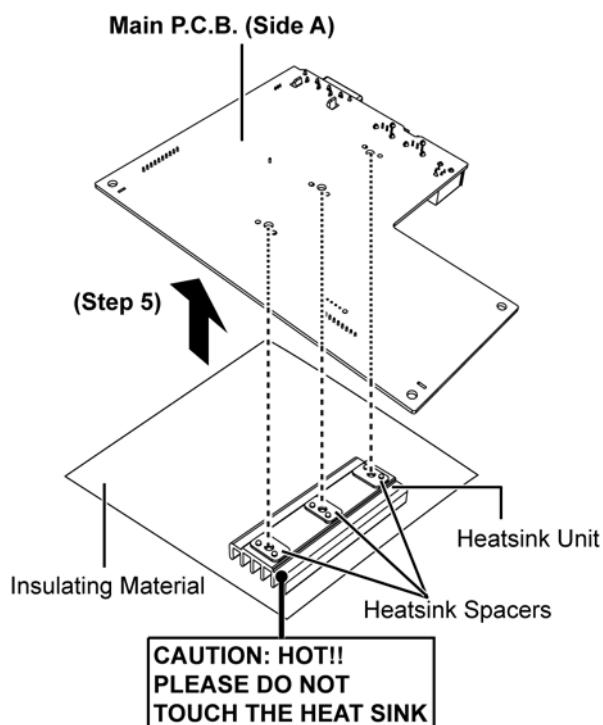

**Step 4 :** Remove 3 screws.

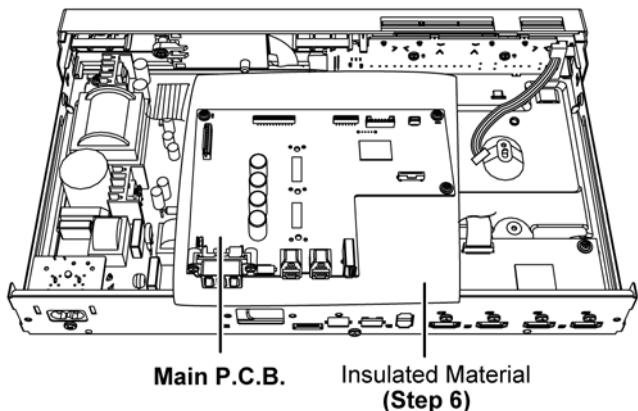

**Step 5 :** Lift up the Main P.C.B..

**Caution:** Safe keep the Heatsink Spacer. Avoid denting it, place it back during assembling.

**Caution:** Handle the Main P.C.B. with caution. Avoid touching the Heatsink Unit due to it's high temperature after prolonged use. Touching it may lead to injuries.

**Step 6 :** Place the Main P.C.B. on an insulated material.

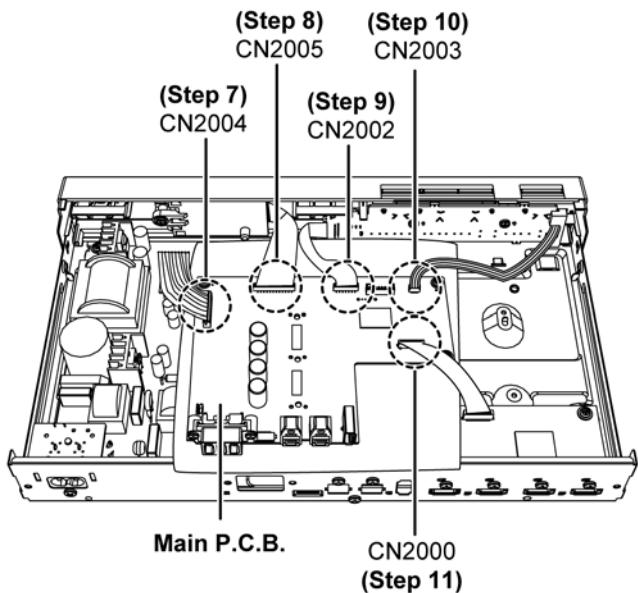

**Step 7 :** Attach 10P Cable Wire at the connector (CN2004) on the Main P.C.B..

**Step 8 :** Attach 24P FFC at the connector (CN2005) on the Main P.C.B..

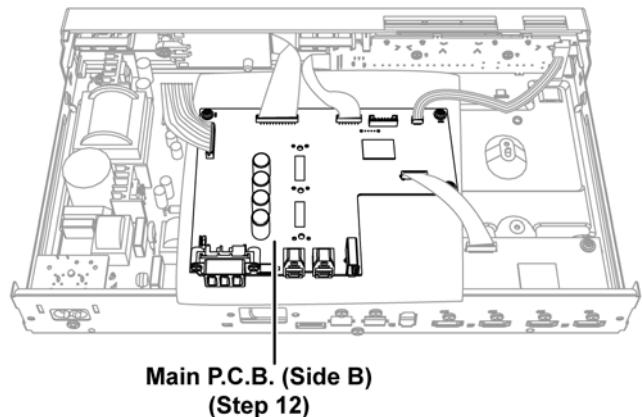

**Step 9 :** Attach 13P FFC at the connector (CN2002) on the Main P.C.B..

**Step 10 :** Attach 5P wire at the connector (CN2003) on the Main P.C.B..

**Step 11 :** Attach 26P FFC at the connector (CN2000) on the Main P.C.B..

**Step 12 :** Main P.C.B. (Side B) can be checked as diagram shown.

## 12.2. Active Subwoofer (SB-HWA770)

Note: For description of the disassembly procedures, see the Section 11

### 12.2.1. Checking and Repairing of SW SMPS and SW DAMP P.C.B.

**Step 1** : Remove SW DAMP P.C.B..

**Step 2** : Remove SW Power Button P.C.B..

**Step 3** : Remove SW SMPS and SW AC Inlet P.C.B..

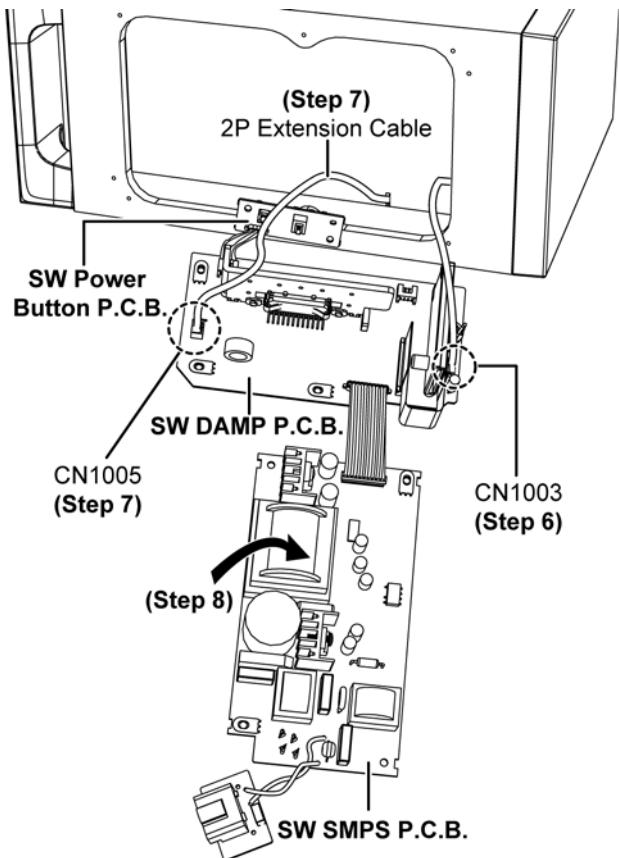

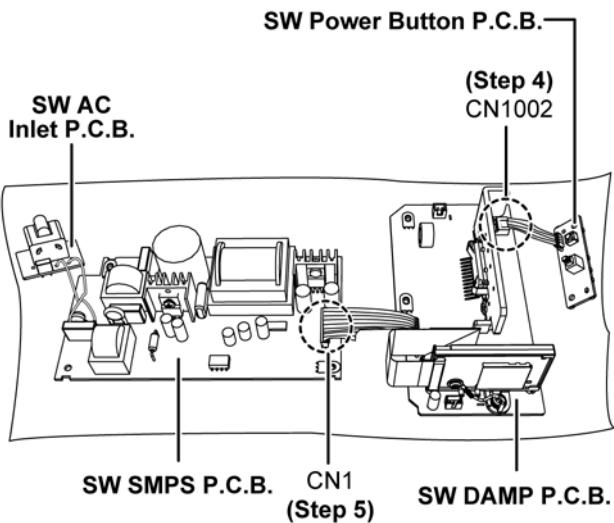

**Step 4** : Attach 4P Cable Wire at the connector (CN1002) on the SW DAMP P.C.B..

**Step 5** : Attach 10P Cable Wire at the connector (CN1) on the SW SMPS P.C.B..

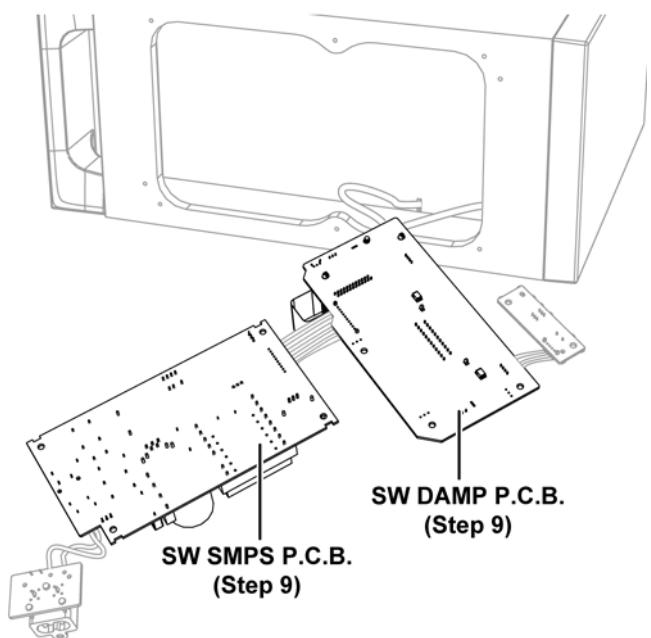

**Step 6** : Attach 3P Cable Wire at the connector (CN1003) on the SW DAMP P.C.B..

**Step 7** : Attach 2P Extension Cable (REXX1194) from the Speaker Cable to the connector (CN1005) on the SW DAMP P.C.B..

**Step 8** : Upset the SW SMPS P.C.B., SW DAMP P.C.B and SW Power Button P.C.B. as shown.

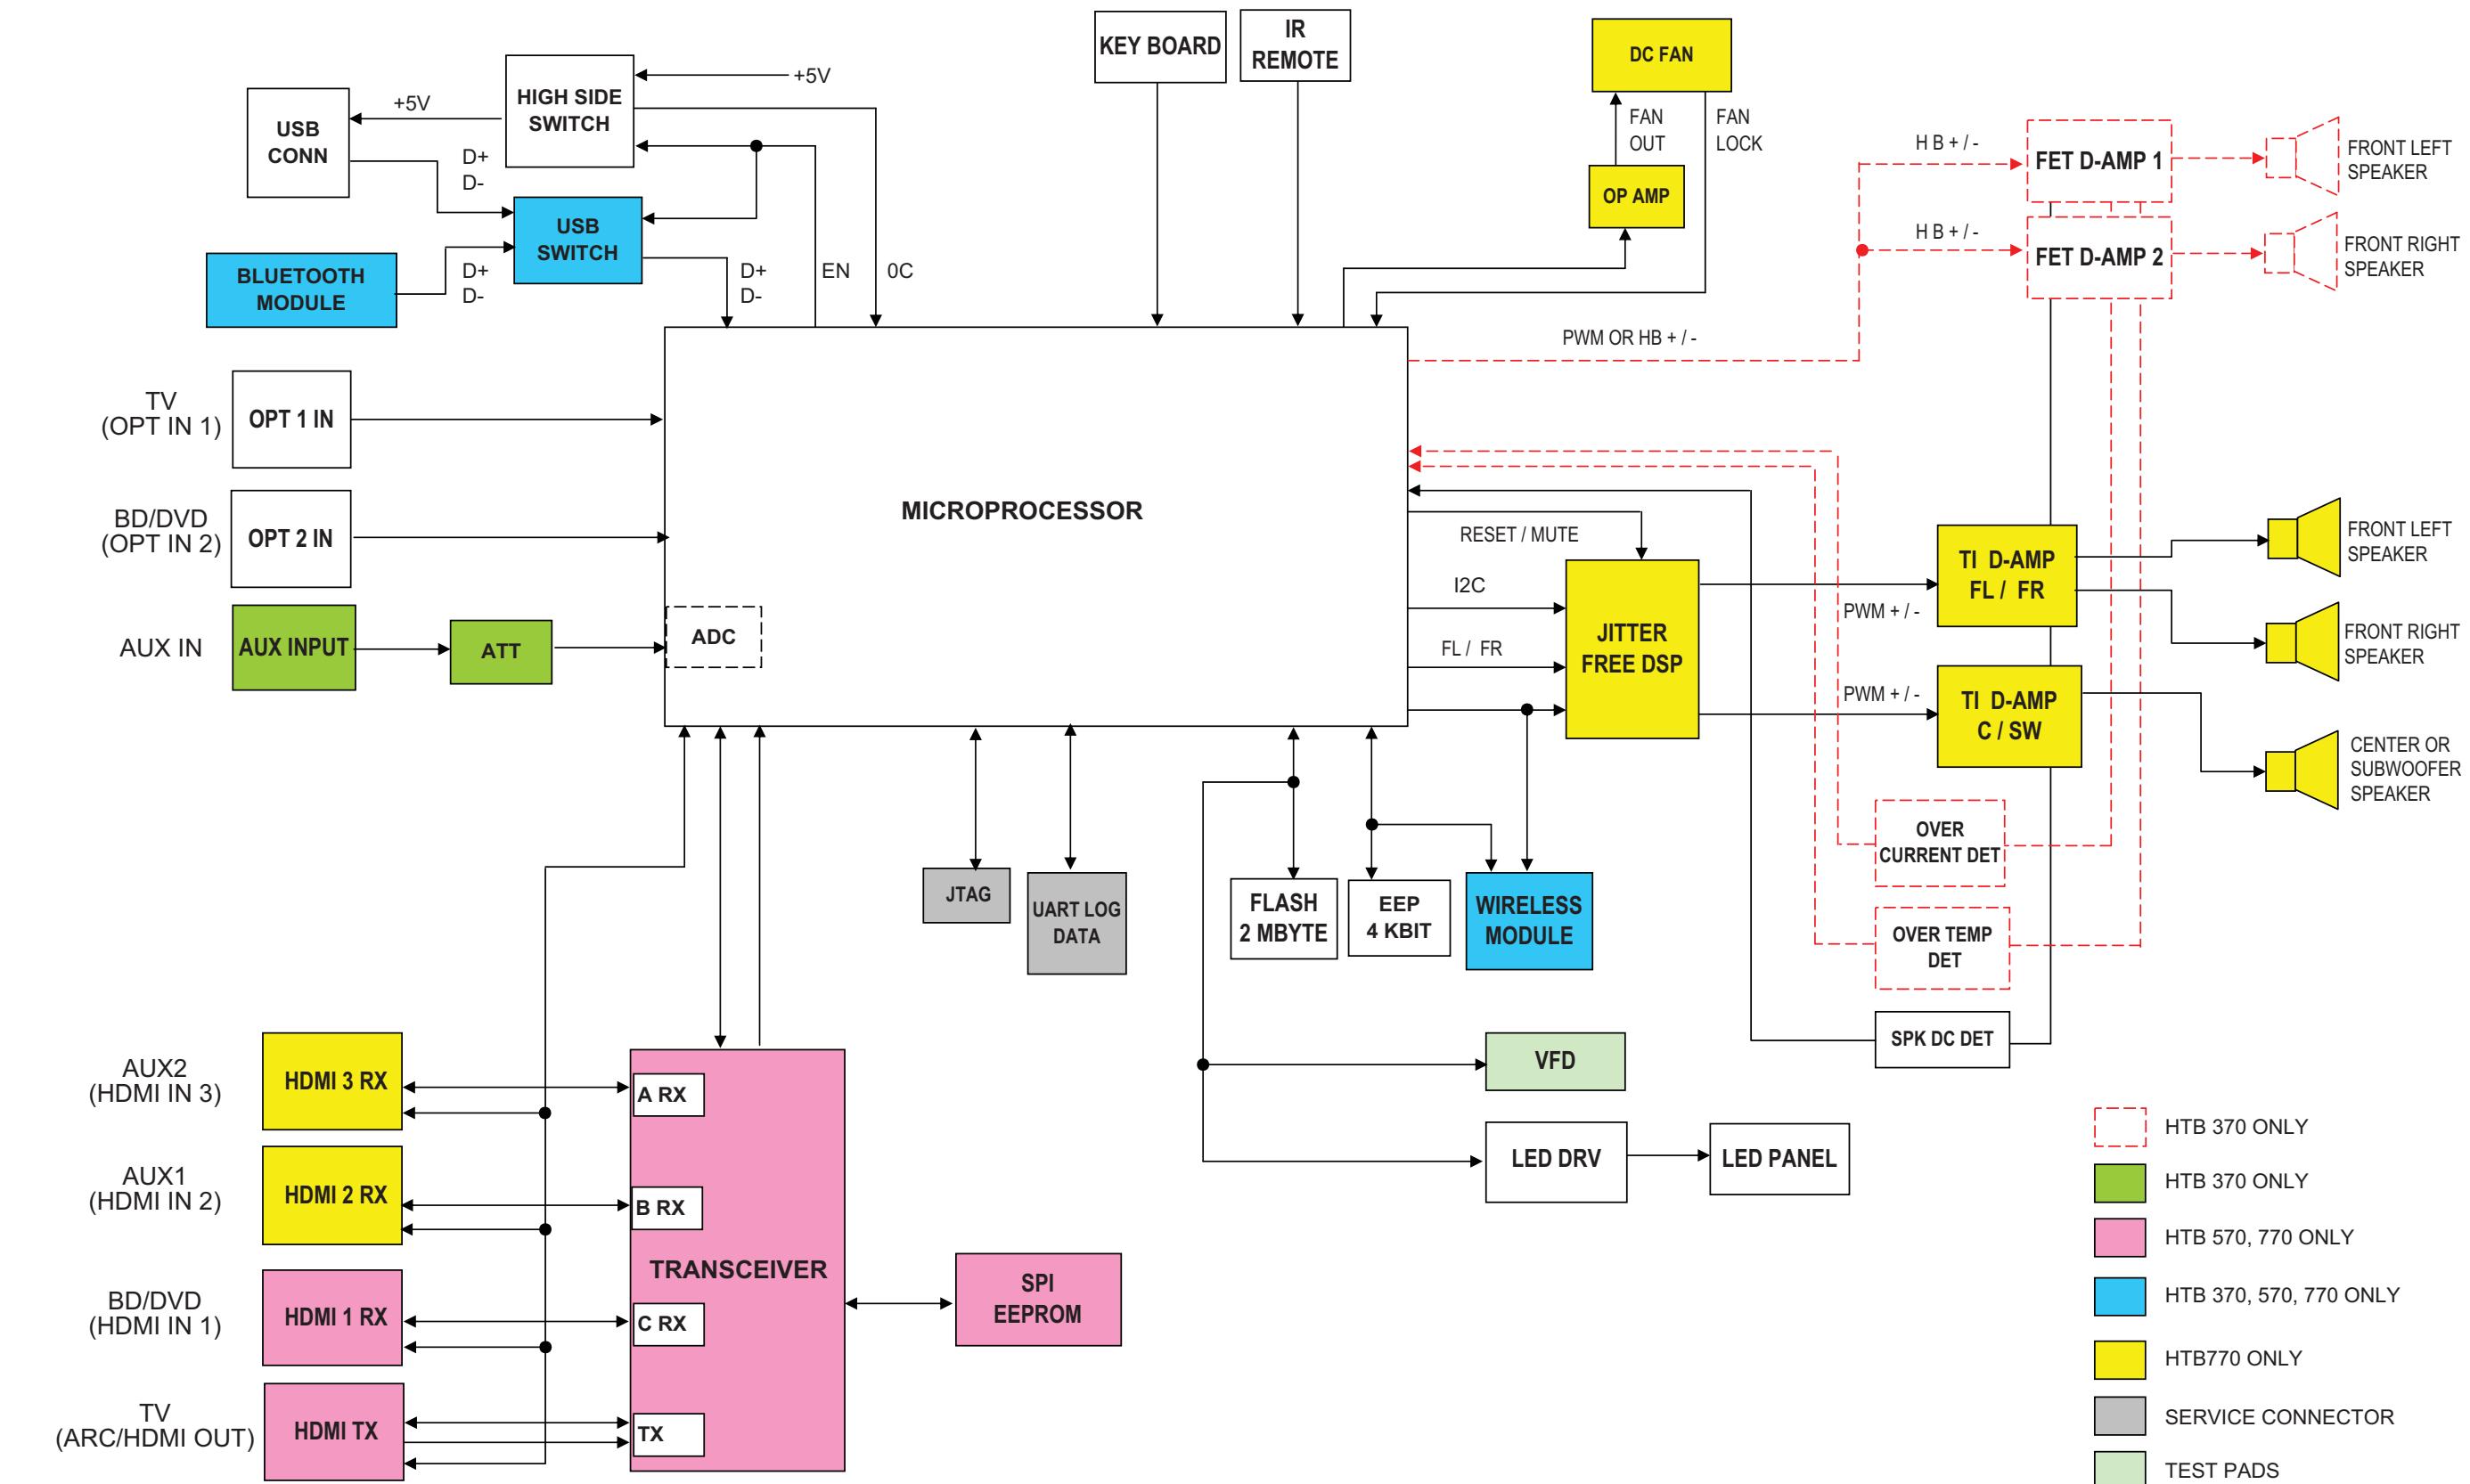

**Step 9 :** SW DAMP P.C.B. and SW SMPS P.C.B. can be checked as diagram shown.

## 16.1. Schematic Diagram Notes

(All schematic diagrams may be modified at any time with the development of new technology)

### Notes:

#### Main Unit (SU-HTB770)

- S6001: VOLUME DOWN switch.  
S6002: POWER switch.  
S6003: SELECTOR switch.  
S6004: VOLUME UP switch.

#### Active Subwoofer (SB-HWA770)

- S1000: I/D SET switch.  
S1001: POWER switch.

- Important safety notice:

Components identified by  mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high quality sound (capacitors), low-noise (resistors), etc are used.

When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

- In case of AC rated voltage Capacitors, the part no. and values will be indicated in the Schematic Diagram.

AC rated voltage capacitors:

C5700, C5701, C5702, C5703, C5704, C5705

- Resistor

Unit of resistance is OHM [ $\Omega$ ] (K=1,000, M=1,000,000).

- Capacitor

Unit of capacitance is  $\mu\text{F}$ , unless otherwise noted. F=Farads, pF=pico-Farad.

- Coil

Unit of inductance is H, unless otherwise noted.

- \*

REF IS FOR INDICATION ONLY.

**CAUTION:** FOR CONTINUED PROTECTION AGAINST FIRE HAZARD, REPLACE ONLY WITH SAME TYPE F1 T3.15A, 250V FUSE

RISK OF FIRE-REPLACE FUSE AS MARKED.

### FUSE CAUTION

These symbols located near the fuse indicates that the fuse used is a fast operating type. For continued protection against fire hazard, replace with the same type fuse. For fuse rating, refer to the marking adjacent to the symbol.

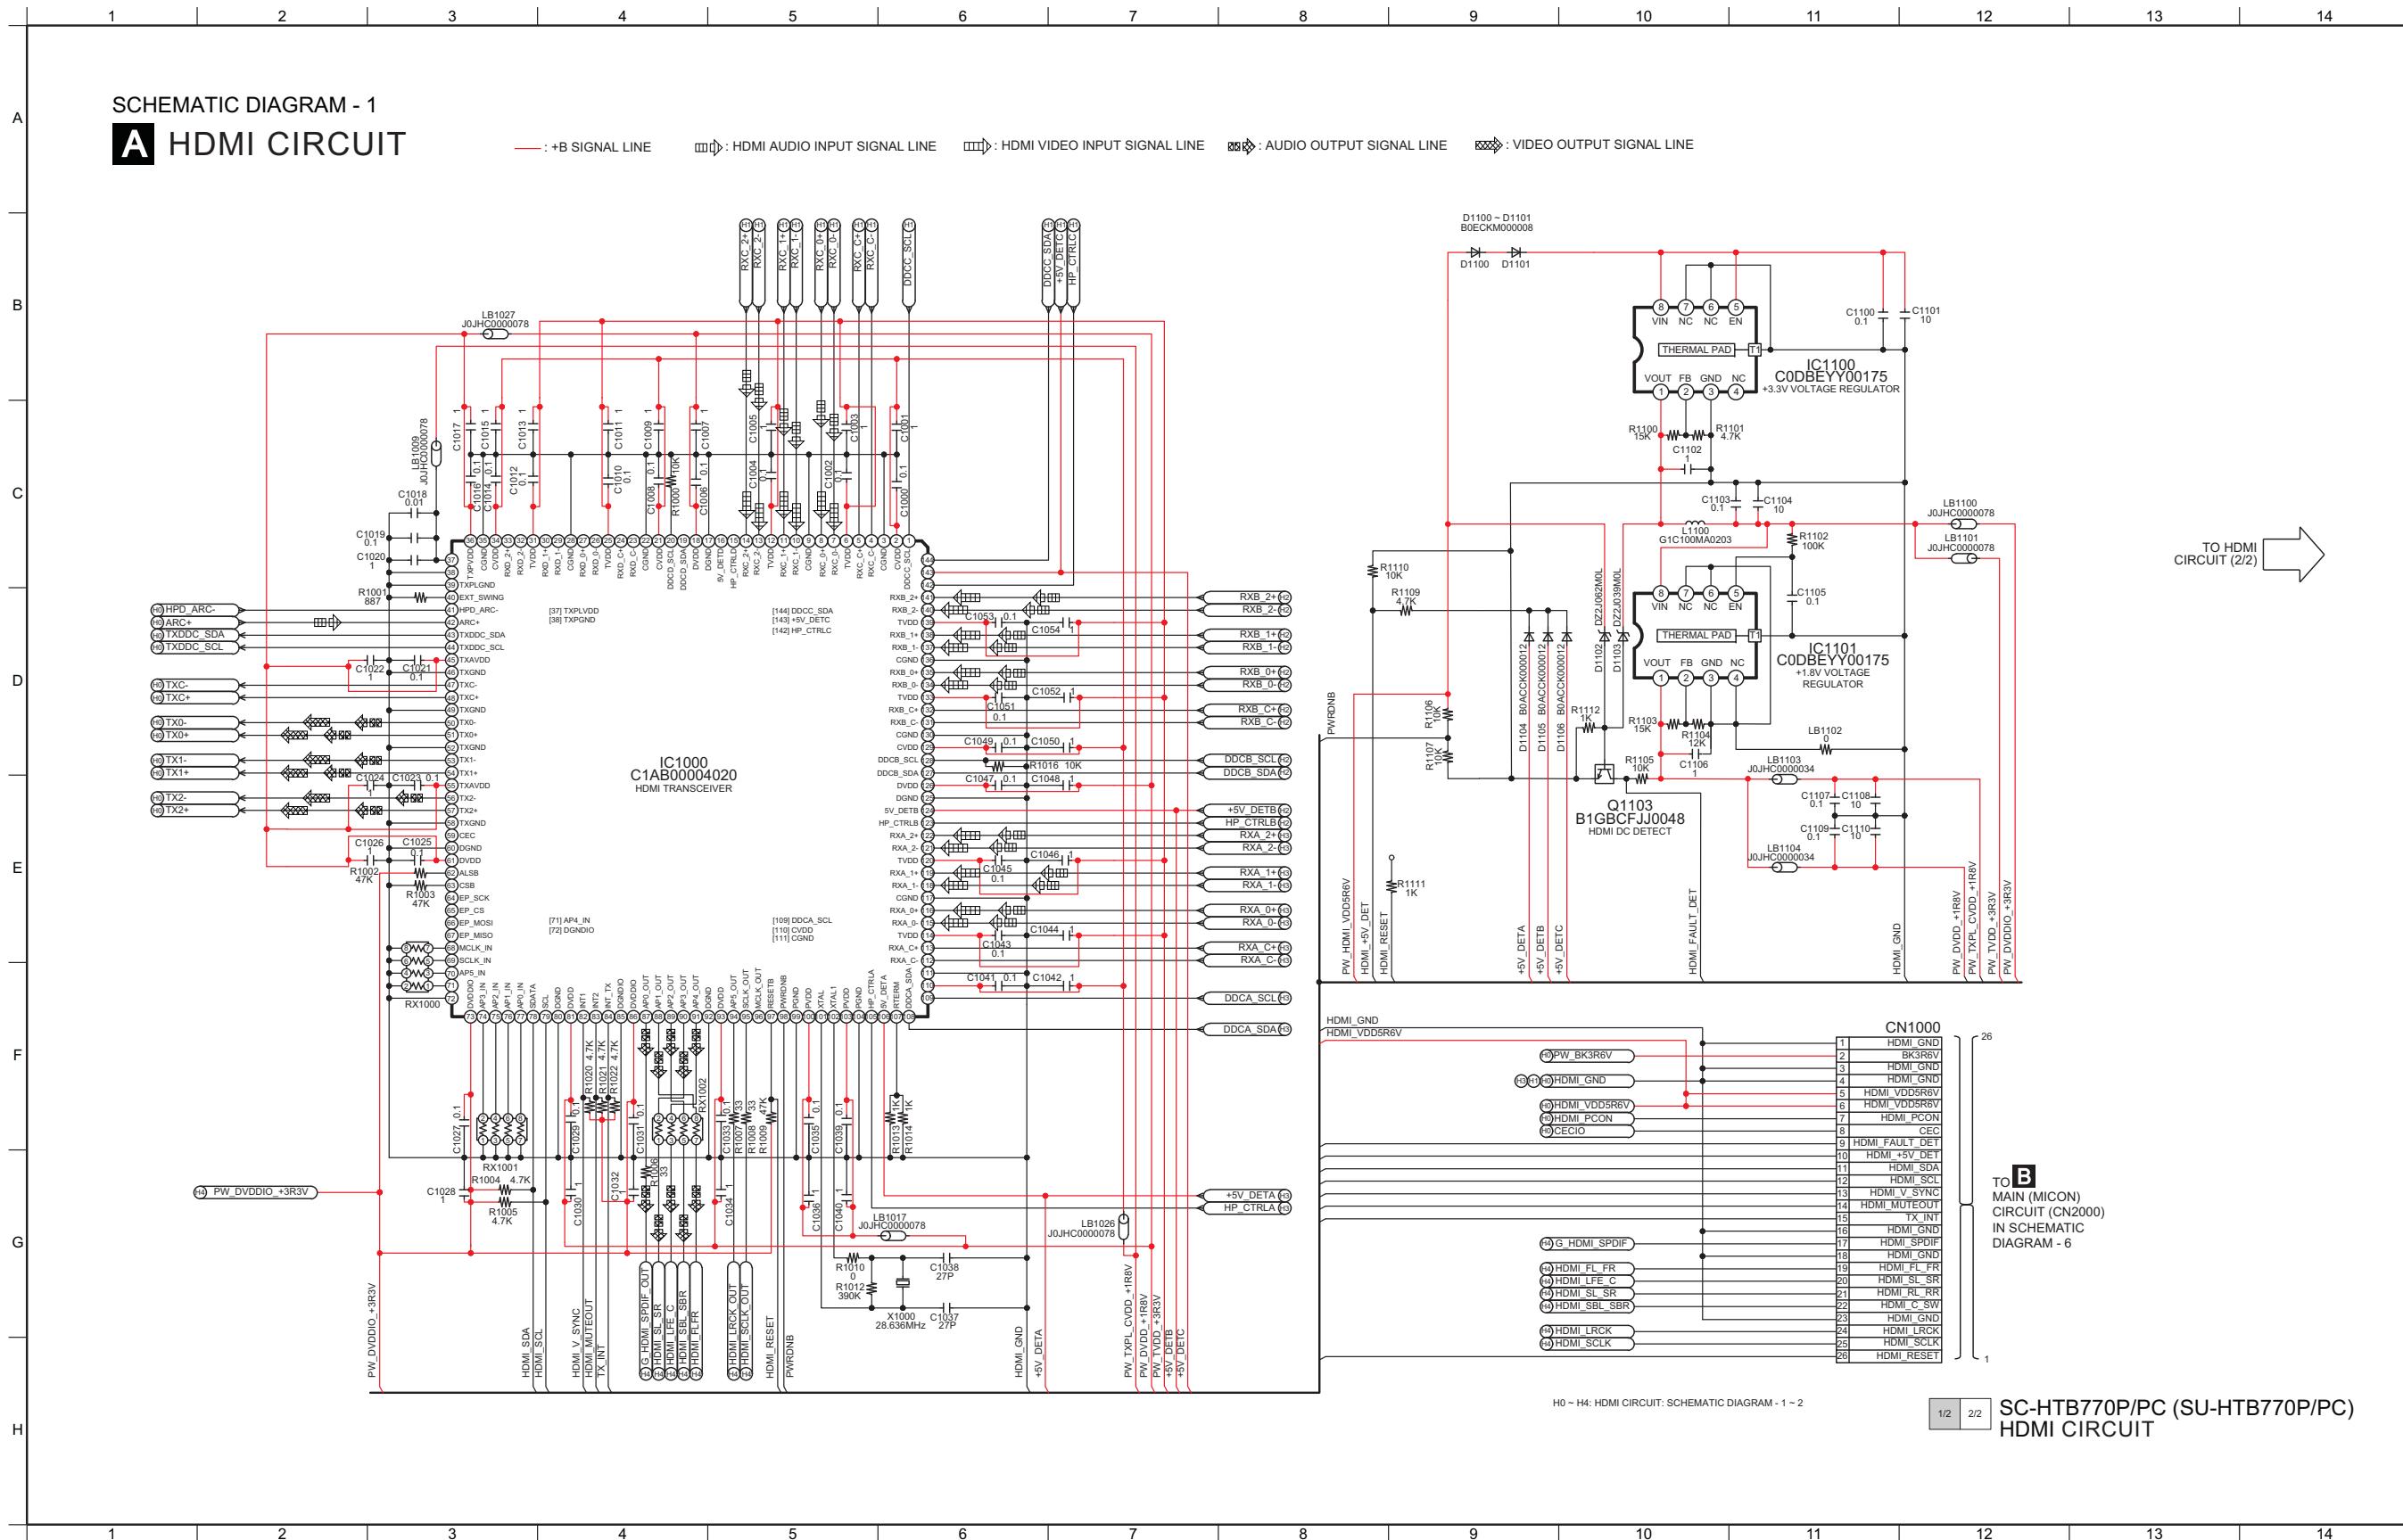

Ce symbole indique que le fusible utilisé est à rapide. Pour une protection permanente, n'utiliser que des fusibles de même type. Ce dernier est indiqué là où le présent symbole est apposé.

# 18 Appendix Information of Schematic Diagram

## 18.1. Voltage Measurement & Waveform Chart

### Note:

- Indicated voltage values are the standard values for the unit measured by the DC electronic circuit tester (high-impedance) with the chassis taken as standard.

Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester.

- Circuit voltage and waveform described herein shall be regarded as reference information when probing defect point because it may differ from actual measuring value due to difference of Measuring instrument and its measuring condition and product itself.

## 18.3. Terminal Function of IC's

### 18.3.1. IC2000 (C1AB00004019) MICROPROCESSOR IC

Pin No.	Terminal Name	I/O	Function
1	RESET_N	-	For on board programming
2	JTAG TDO	JTAG	For debugging
3	JTAG TCK	JTAG	For debugging
4	JTAG TDI	JTAG	For debugging
5	JTAG TMS	JTAG	For debugging
6	PCONT	O	Power control
7	S_DET	I	DCDC/LDO Short circuit and OV detection
8	SPDIF IN / ARC	I	SPDIF input
9	HDMI_PCON	O	HDMI power control
10	USB_EN(5V) / USB_SW	O	Bluetooth / Flash
11	USB_OC	I	Bluetooth / Flash
12	WL_SDA / EEP_SDA	I2C	Wireless control
13	WL_SCL / EEP_SCL	I2C	Wireless control
14	IR	I	Remote control input
15	ECO_PCONT	O	ECO mode control
16	SD_OUT	O	Protection on shut down output
17	DC_DET	I	DAMP & SMPS abnormal detection
18	AC_SYNC	I	Detection of AC Power fail
19	VDDIO3P3	-	3.3V Digital logic I/O supply
20	USB_DM	I/O	Bluetooth / Flash update
21	USB_DP	I/O	Bluetooth / Flash update
22	VDDIG1P2	-	1.2V Digital core supply
23	AUX_L1	I	AUX input
24	AUX_COM	I	AUX input
25	AUX_R1	I	AUX input
26	BT_L	I	Backup Bluetooth analog input.
27	BT_C	I	Backup Bluetooth analog input.
28	BT_R	I	Backup Bluetooth analog input.
29	AGND	-	Analog ground
30	HP_VCM	-	Common voltage for analog
31	SW_OUT	O	Subwoofer
32	FAN_CTRL	O	Fan control
33	FBP_1	-	Positive feedback for Subwoofer
34	FBN_1	-	Negative feedback for Subwoofer
35	HB_LN_1	-	Amplifier output for Subwoofer
36	HB_HN_1	-	Amplifier output for Subwoofer
37	HB_LP_1	-	Amplifier output for Subwoofer
38	HB_HP_1	-	Amplifier output for Subwoofer
39	AGND	-	Analog ground
40	OTW	I	DAMP Over Temperature
41	PHALF1	-	PVDD 1/2 voltage bias bypass
42	HB_LN_2	-	Amplifier output for Front Speaker Left
43	HB_HN_2	-	Amplifier output for Front Speaker Left
44	HB_LP_2	-	Amplifier output for Front Speaker Left
45	HB_HP_2	-	Amplifier output for Front Speaker Left
46	FBN_2	-	Negative feedback for Front Speaker Left
47	FBP_2	-	Positive feedback for Front Speaker Left
48	PVDD 6V	-	6V Supply voltage for power FET drive stage
49	AGND	-	Analog ground
50	AGND	-	Analog ground
51	BYP_BG	-	Bypass capacitor for band gap

Pin No.	Terminal Name	I/O	Function
52	BYP_AN	-	Regulated supply voltage bypass: Analog circuit blocks
53	AGND	-	Analog ground
54	AVDD 3.6 V	-	3.6V DC voltage input to analog regulators
55	PVDD 6V	-	6V Supply voltage for power FET drive stage
56	FBP_3	-	Positive feedback for Front Speaker Right
57	FBN_3	-	Negative feedback for Front Speaker Right
58	HB_HP_3	-	Amplifier output for Front Speaker Right
59	HB_LP_3	-	Amplifier output for Front Speaker Right
60	HB_HN_3	-	Amplifier output for Front Speaker Right
61	HB_LN_3	-	Amplifier output for Front Speaker Right
62	PHALF2	-	Amplifier output for Front Speaker Right
63	SD_IN	I	DAMP Overload or Overtemp
64	AGND	-	Analog ground
65	HB_HP_4	-	No Connection
66	HB_LP_4	-	No Connection
67	HB_HN_4	-	No Connection
68	HB_LN_4	-	No Connection
69	FBP_4	-	No Connection
70	FBN_4	-	No Connection
71	AGND	-	Analog ground
72	XTALP	-	12.288MHz external crystal connection.
73	XTALN	-	12.288MHz external crystal connection.
74	SWREG_PHALF	-	Switching regulator bias
75	SWREG_PVDD	-	Switching regulator power
76	SWREG_GND	-	Switching regulator ground
77	SWREG_OUT	-	Switching regulator output
78	VDDIG1P2	-	1.2V Digital core supply
79	HDMI_MCLK_IN	-	No Connection
80	HDMI_MCLK_O_UT	-	No Connection
81	POWER DOWN	-	No Connection
82	VDD COMP	O	Clock for OCP comparator
83	VALID	I	VALID info of DAMP/Temp detect
84	DAP_SCL	O	RX0
85	DAP_SDA	O	RX0
86	SPDIF IN (TV)	I	Direct input
87	DAP_RESET	O	DAMP reset
88	DAP_MUTE	O	Mute control for DAMP
89	VDDIO3P3	-	3.3V Digital logic I/O supply
90	DAP_CT/SW & WL_SW	O	DAP and wireless subwoofer split output to wireless and DAP
91	DAP_FL/FR	O	Direct to DAP
92	DAP_SCLK & WL_SCLK	O	Bit input clock
93	DAP_LRCK & WL_LRCK	O	Word input clock
94	SPDIF IN (AUX 2)	I	Direct input
95	CEC	I/O	CEC IN/OUT
96	HDMI_SCL	I/O	HDMI RX/TX control
97	HDMI_SDA	I/O	HDMI RX/TX control
98	HDMI_INT TX	I	Interrupt from HDMI TX

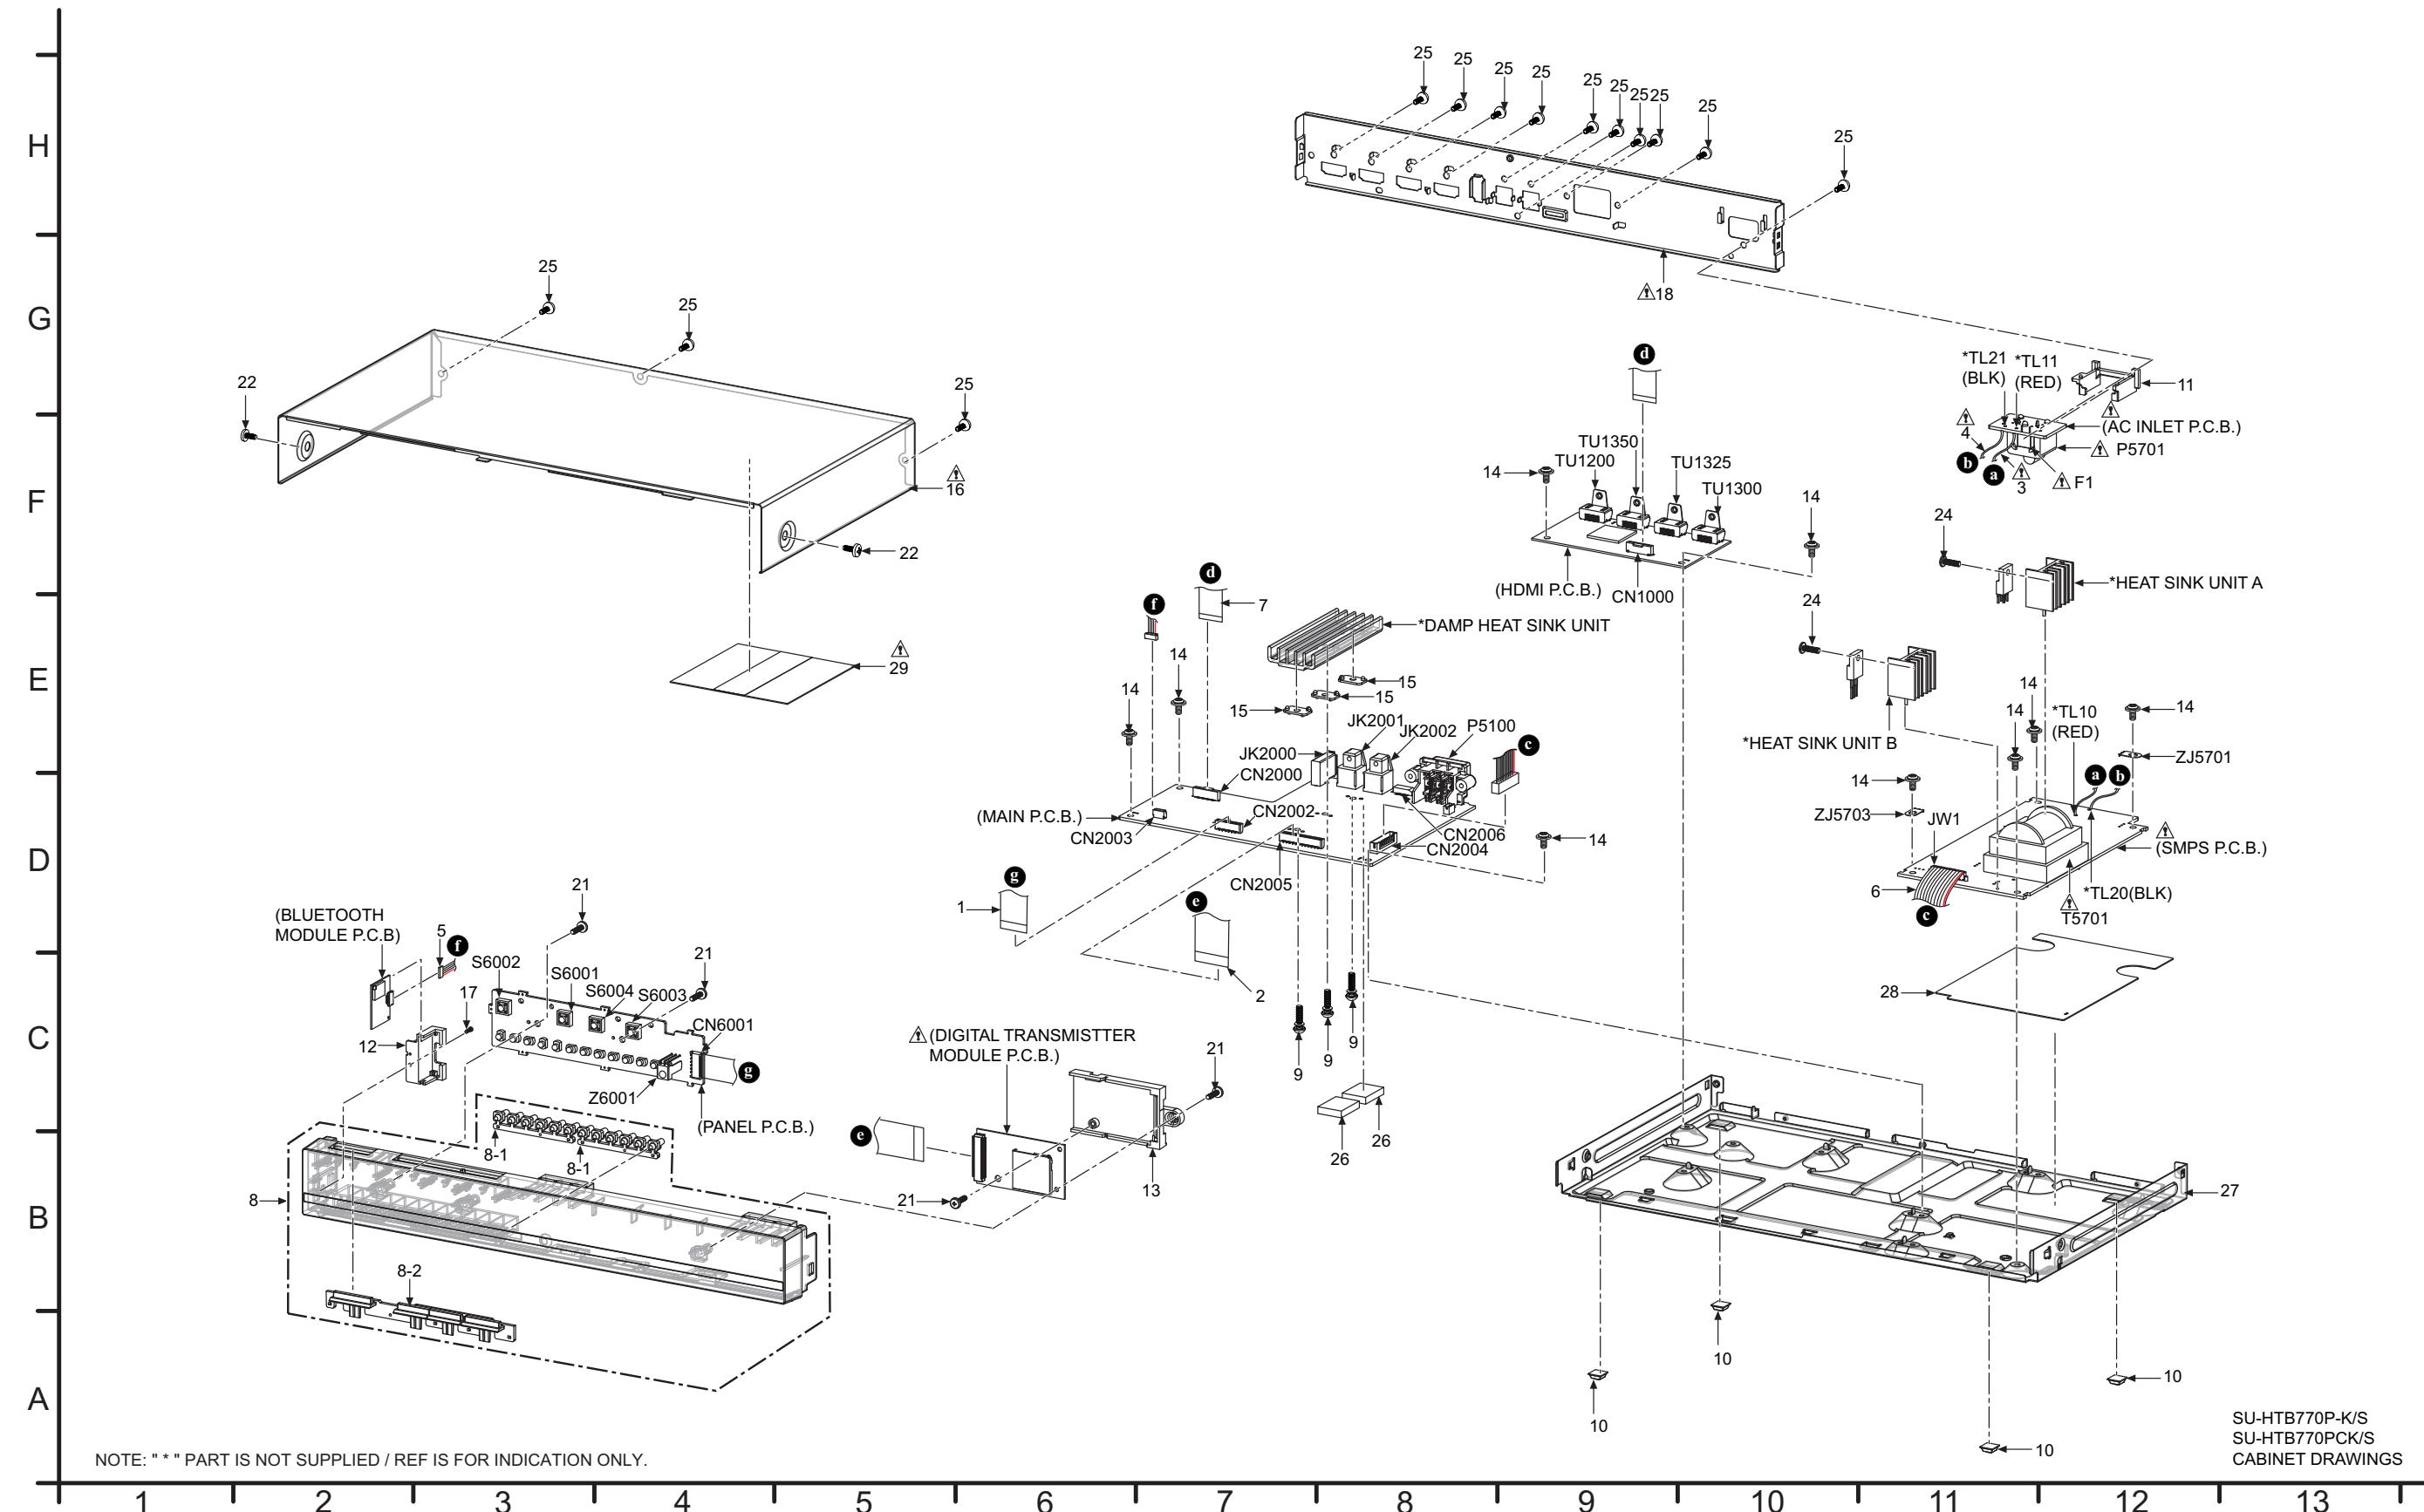

Pin No.	Terminal Name	I/O	Function
99	HDMI_MUTE_D ET	I	Interrupt from HDMI. Mute from HDMI RX.
100	HDMI_VSYNC	I	Interrupt from HDMI. VSYNC Monitor for Source.
101	HDMI_RESET_ DET	O	Reset of HDMI
102	V_CHECK	I	ADC (IN)
103	HDMI_MUTE_DI S	O	HDMI_MUTE_Disable
104	ECO_LEVEL	I	ECO LEVEL detection
105	REGION	I	Region setting
106	MODEL	I	Model setting
107	DIM_CTRL	O	Dimmer on/off
108	VFD_STB	I	ESD reset
109	LOG_UART_TX	O	For on board programming & Log monitor
110	LOG_UART_RX	I	For on board programming & Log monitor
111	HDMI_SCLK	I	Bit input clock
112	HDMI_LRCK	I	Word input clock
113	VDDIO3P3	-	3.3V Digital logic I/O supply
114	VDDDIG1P2	-	1.2V Digital core supply
115	HDMI_SBL/SBR	I	HDMI subwoofer L and R input
116	HDMI_SL/SR	I	HDMI surround L and R input
117	HDMI_LFE_C	I	HDMI center input
118	HDMI_FL/FR	I	HDMI front L and R input
119	HDMI 5V DETECT	I	HDMI voltage detection
120	KEY 1	I	ADC (IN)
121	KEY 2	I	ADC (IN)
122	LED_OE	O	LED control
123	LED_LCK	O	LED control
124	M_SSB	O	Flash control
125	M_CLK / LED_CLK	O	Flash control / LED control
126	M_MISO / LED_MISO	I	MISO_DSP / DT_OUT_CODEC
127	M莫斯 / LED_DATA	O	Flash control / LED control
128	VDDIO3P3	-	3.3V Digital logic I/O supply

## 19.1.6. Mechanical Replacement Parts List

### Important Safety Notice

*Components identified by **⚠** mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.*

#### RTL (Retention Time Limited)

**Note:** The marking (RTL) indicates that the Retention Time is Limited for this item.

After the discontinuation of this assembly in production, the item will continue to be available for a specific period of time. The retention period of availability is dependant on the type of assembly, and in accordance with the laws governing part and product retention. After the end of this period, the assembly will no longer be available.

**Note:**

- When replacing any of these components, be sure to use only manufacturer's specified parts shown in the replacement part list.
- The parenthesized indications on the Remarks column specify the destination & product color (Refer to the cover page for the information).
- Parts without these indications shall be used for all areas.
- This product uses a laser diode. Refer to "Precaution of Laser Diode".
- All parts mentioned are supplied by PAVCJM unless indicated likewise.
- Reference for O/I book languages are as follows:

## 19.2. Electrical Replacement Parts List

### Important Safety Notice

*Components identified by  mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.*

#### RTL (Retention Time Limited)

**Note:** The marking (RTL) indicates that the Retention Time is Limited for this item.

After the discontinuation of this assembly in production, the item will continue to be available for a specific period of time. The retention period of availability is dependant on the type of assembly, and in accordance with the laws governing part and product retention.

After the end of this period, the assembly will no longer be available.

**Note:**

- When replacing any of these components, be sure to use only manufacturer's specified parts shown in the replacement part list.
- The parenthesized indications on the Remarks column specify the destination & product color (Refer to the cover page for the information).
- Parts without these indications shall be used for all areas.
- This product uses a laser diode. Refer to "Precaution of Laser Diode".
- Capacitor value are in microfarads (uF) unless specified otherwise, P=Pico-farads (pF), F=Farads.
- Resistance values are in ohms, unless specified otherwise, 1K=1000 (OHM).
- All parts mentioned are supplied by PAVCJM unless indicated likewise.

**E.S.D. standards for Electrostatically Sensitive Devices, refer to "PREVENTION OF ELECTROSTATIC DISCHARGE (ESD) TO ELECTROSTATIC SENSITIVE (ES) DEVICES" section.**
