

Service Manual

DDJ-WEGO4-K

ORDER NO.
RRV4663

DJ Controller

DDJ-WEGO4-K

DDJ-WEGO4-W

This unit is designed based on the DDJ-WEGO3 model. The major difference is as follows.

- The connecting terminal to the iOS device is changed from 13 pin to USB A.
The connecting cable to use is changed from the exclusive cable of unit accessory to the cable of iOS device accessory.
- The surface treatment of Aluminum panel and JOG plate is changed. JOG dial painting color is changed.
- EQ knob is changed from HI/MID/LOW 3 band to HI/LOW 2 band and Color FX Filter.
- The signal processing of the MIC is changed from Analog MIX to Digital MIX.

This service manual contains the difference between this model and DDJ-WEGO3 about each item separately.

Refer to the service manual of DDJ-WEGO3 about the contents that is not described in this service manual.

THIS MANUAL IS APPLICABLE TO THE FOLLOWING MODEL(S) AND TYPE(S).

| Model | Type | Power Requirement | Remarks |
|----------------|--------|-------------------|---------|
| DDJ-WEGO4-K, W | SYXJ | AC 220 V to 240 V | |
| DDJ-WEGO4-K, W | UXJCB | AC 120 V | |
| DDJ-WEGO4-K, W | LWPWXJ | AC 110 V to 240 V | |
| DDJ-WEGO4-K, W | AXJ | AC 220 V | |

THIS SERVICE MANUAL SHOULD BE USED TOGETHER WITH THE FOLLOWING MANUAL(S).

| Model | Order No. | Remarks |
|-------------------|-----------|---------|
| DDJ-WEGO3-K, W, R | RRV4567 | |

Pioneer DJ Corporation

6F, Yokohama i-Mark Place, 4-4-5 Minatomirai, Nishi-ku, Yokohama, Kanagawa 220-0012 JAPAN

SAFETY INFORMATION

A

This service manual is intended for qualified service technicians; it is not meant for the casual do-it-yourselfer. Qualified technicians have the necessary test equipment and tools, and have been trained to properly and safely repair complex products such as those covered by this manual.

Improperly performed repairs can adversely affect the safety and reliability of the product and may void the warranty. If you are not qualified to perform the repair of this product properly and safely, you should not risk trying to do so and refer the repair to a qualified service technician.

1. SERVICE PRECAUTIONS

1.1 NOTES ON SOLDERING

- A • For environmental protection, lead-free solder is used on the printed circuit boards mounted in this unit.
Be sure to use lead-free solder and a soldering iron that can meet specifications for use with lead-free solders for repairs accompanied by reworking of soldering.
Do NOT use a soldering iron whose tip temperature cannot be controlled.

1.2 NOTES ON REPLACING

The part listed below is difficult to replace as a discrete component part.
When the part listed in the table is defective, replace whole Assy.

| Assy Name | Parts that is Difficult to Replace | | | |
|-------------|------------------------------------|-----------------|-------------|---------|
| | Ref No. | Function | Part No. | Remarks |
| B MAIN Assy | IC405 | USB multiplexer | TS3USB30RSW | QFN |

1.3 SERVICE NOTICE

About the protectors

- Locations and functions of the protectors
Besides the voltage-monitoring circuit that monitors the voltages of the main power-supply ICs, this unit is also provided with protectors (elements for protection against excess current) on the power lines. If any power failure occurs, a protector will be activated to protect the unit's parts and circuits from excess current.
P101 (DEK1123) (LITTELFUSE INC. 04371.25WR): For protection of V+VBUS from excess current
P102 (DEK1103) (LITTELFUSE INC. 466003): For protection of V+12_AD P from excess current
C P203 (DEK1095) (LITTELFUSE INC. 466.500): For protection of V+12_D from excess current

Diagnostic procedure for failure when the unit is used with an iPhone/iPad

If a user complains about a failure of the unit when it is used with an iPhone/iPad, follow the diagnostic procedure described below.

1. Check that the iOS device recognizes the DDJ-WEGO4.
(See "Before confirmation in this mode" in [C-1: Connection Confirmation mode with the iPhone/iPad] in "6.1 TEST MODE.")
 2. Check if iPhone/iPad connecting cable is okay, referring to [C-1: Connection Confirmation mode with the iPhone/iPad].
 3. Check if the DDJ-WEGO4 is okay. To do so, check operation of each operating element or LED in Service mode and check the output signals and operations on the PC (with rekordbox installed).
- D Basically, if both the iPhone/iPad connecting cable and the DDJ-WEGO4 are okay, the problem is on the connected iOS device side.

[iOS devices usable with this unit]

[The iOS devices able to use in combination this unit with WeDJ]

- iOS : iOS 8 and 9
- Corresponding models for iPhone/iPad connecting cable (Lightning) :
iPad Pro (9.7-inch), iPad Air 2, iPad Air,
iPad mini 4, iPad mini 3, iPad mini 2

[The iOS devices able to use in combination this unit with dJAY 2 or vJAY]

- iOS : iOS 8 and 9
- Corresponding models for iPhone/iPad connecting cable (Lightning) :
iPad Pro (9.7-inch), iPad Air 2, iPad Air, iPad (Fourth generation)
iPad mini 4, iPad mini 3, iPad mini 2, iPad mini,
iPhone SE, iPhone 6s plus, iPhone 6s, iPhone 6 plus,
iPhone 6, iPhone 5s, iPhone 5c, iPhone 5,
iPod touch (Sixth generation), iPod touch (Fifth generation)
- Models that the Dock connector is mounted :
iPad (Third generation), iPad 2, iPhone 4s
<http://pioneerdj.com/support/>

FLASH ROM (IC402) ON THE MAIN Assy

The writing of the unit serial No. is necessary when replacing the MAIN Assy or FLASH ROM (IC402) on the MAIN Assy.
Refer to "8.3 WRITING THE SERIAL NUMBER OF THE UNIT".

3. BASIC ITEMS FOR SERVICE

[3.3 PCB LOCATIONS], refer to Service Manual for DDJ-WEGO3.

3.1 CHECK POINTS AFTER SERVICING

Items to be checked after servicing

To keep the product quality after servicing, confirm recommended check points shown below.

| No. | Procedures | Check points |
|-----|--|--|
| 1 | Check the firmware version. | The firmware version must be the latest one. If it is not the latest one, be sure to update it. |
| 2 | Confirm that the customer complaint has been resolved. If the problem pointed out by the customer occurs with a specific source or operation, such as PC connection, MIC input, Fader, or Volume, input that specific source then perform that specific operation for checking. | The customer complain must not be reappeared. Audio and operations must be normal. |
| 3 | Confirmation of operation of operating elements (except each VRs) and LEDs. | Each confirmation items work with service mode normally. |
| 4 | Check the analog audio output and each VRs. Connect this unit with a PC with the DJ application (rekordbox dj) installed, via USB, then operate the DJ application (rekordbox dj). | There must be no errors, such as noise, in audio signals and operations of the MASTER/HEADPHONES outputs. |
| 5 | Check the analog audio input. Input an audio signal via MIC. | Audio and operations must be normal. If you want to confirm the MIC sound in a state of connecting rekordbox dj, you should display [MIXER/MIC] panel in rekordbox dj, and confirm that [MIC ON] button is turned on. |
| 6 | Check whether the connection with the iOS device (iPhone or iPad) does not have a problem. | Confirmation work with service mode normally. That you can confirm charge for iOS device from a product. If you want to confirm the operation of the charge, you need to power on of the unit. |
| 7 | Check the appearance of the product. | No scratches or dirt on its appearance after receiving it for service. |

See the table below for the items to be checked regarding audio.

| Item to be checked regarding audio | |
|------------------------------------|--------------------|
| Distortion | Volume too high |
| Noise | Volume fluctuating |
| Volume too low | Sound interrupted |

3.2 JIGS LIST

Jigs List

| Jig Name | Part No. | Purpose of use / Remarks |
|--|------------------------|---|
| Software for writing the serial number | GGG1186 | For writing the serial number of the unit to the MAIN Assy after replacement. |
| USB cable | GGP1188 | for PC connection, accessory (Part No.: DDE1140) |
| iPhone/iPad connection cable | ----- | for iOS device connection |
| iOS device | iPad/iPhone/iPod touch | The version of an iOS device must be iOS8 or 9. |

Lubricants and Glues List

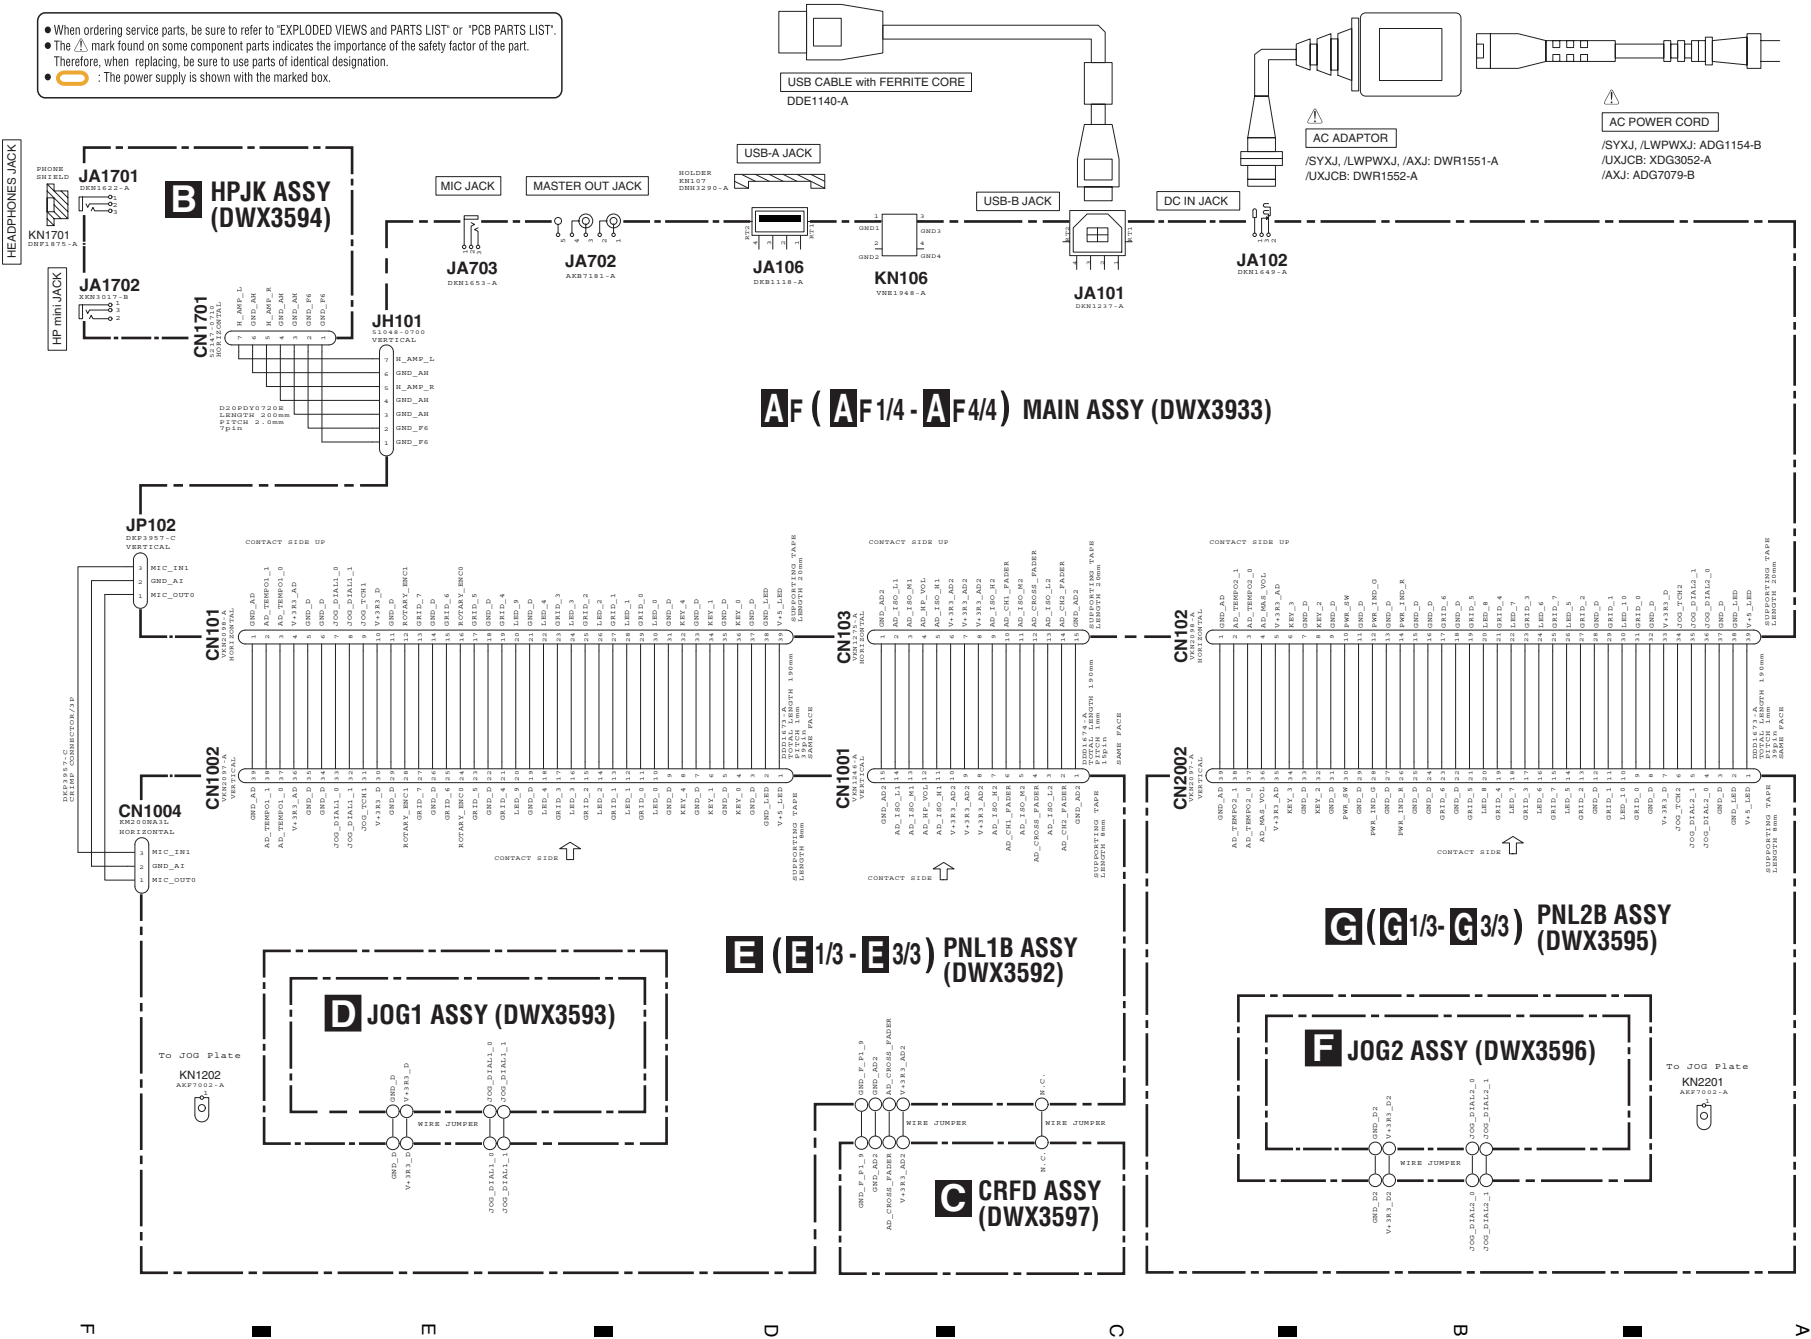

| Name | Part No. | Remarks |
|--------|----------|----------------------------|
| Grease | GEM1100 | Refer to "7. DISASSEMBLY". |

4.1 OVERALL WIRING DIAGRAM

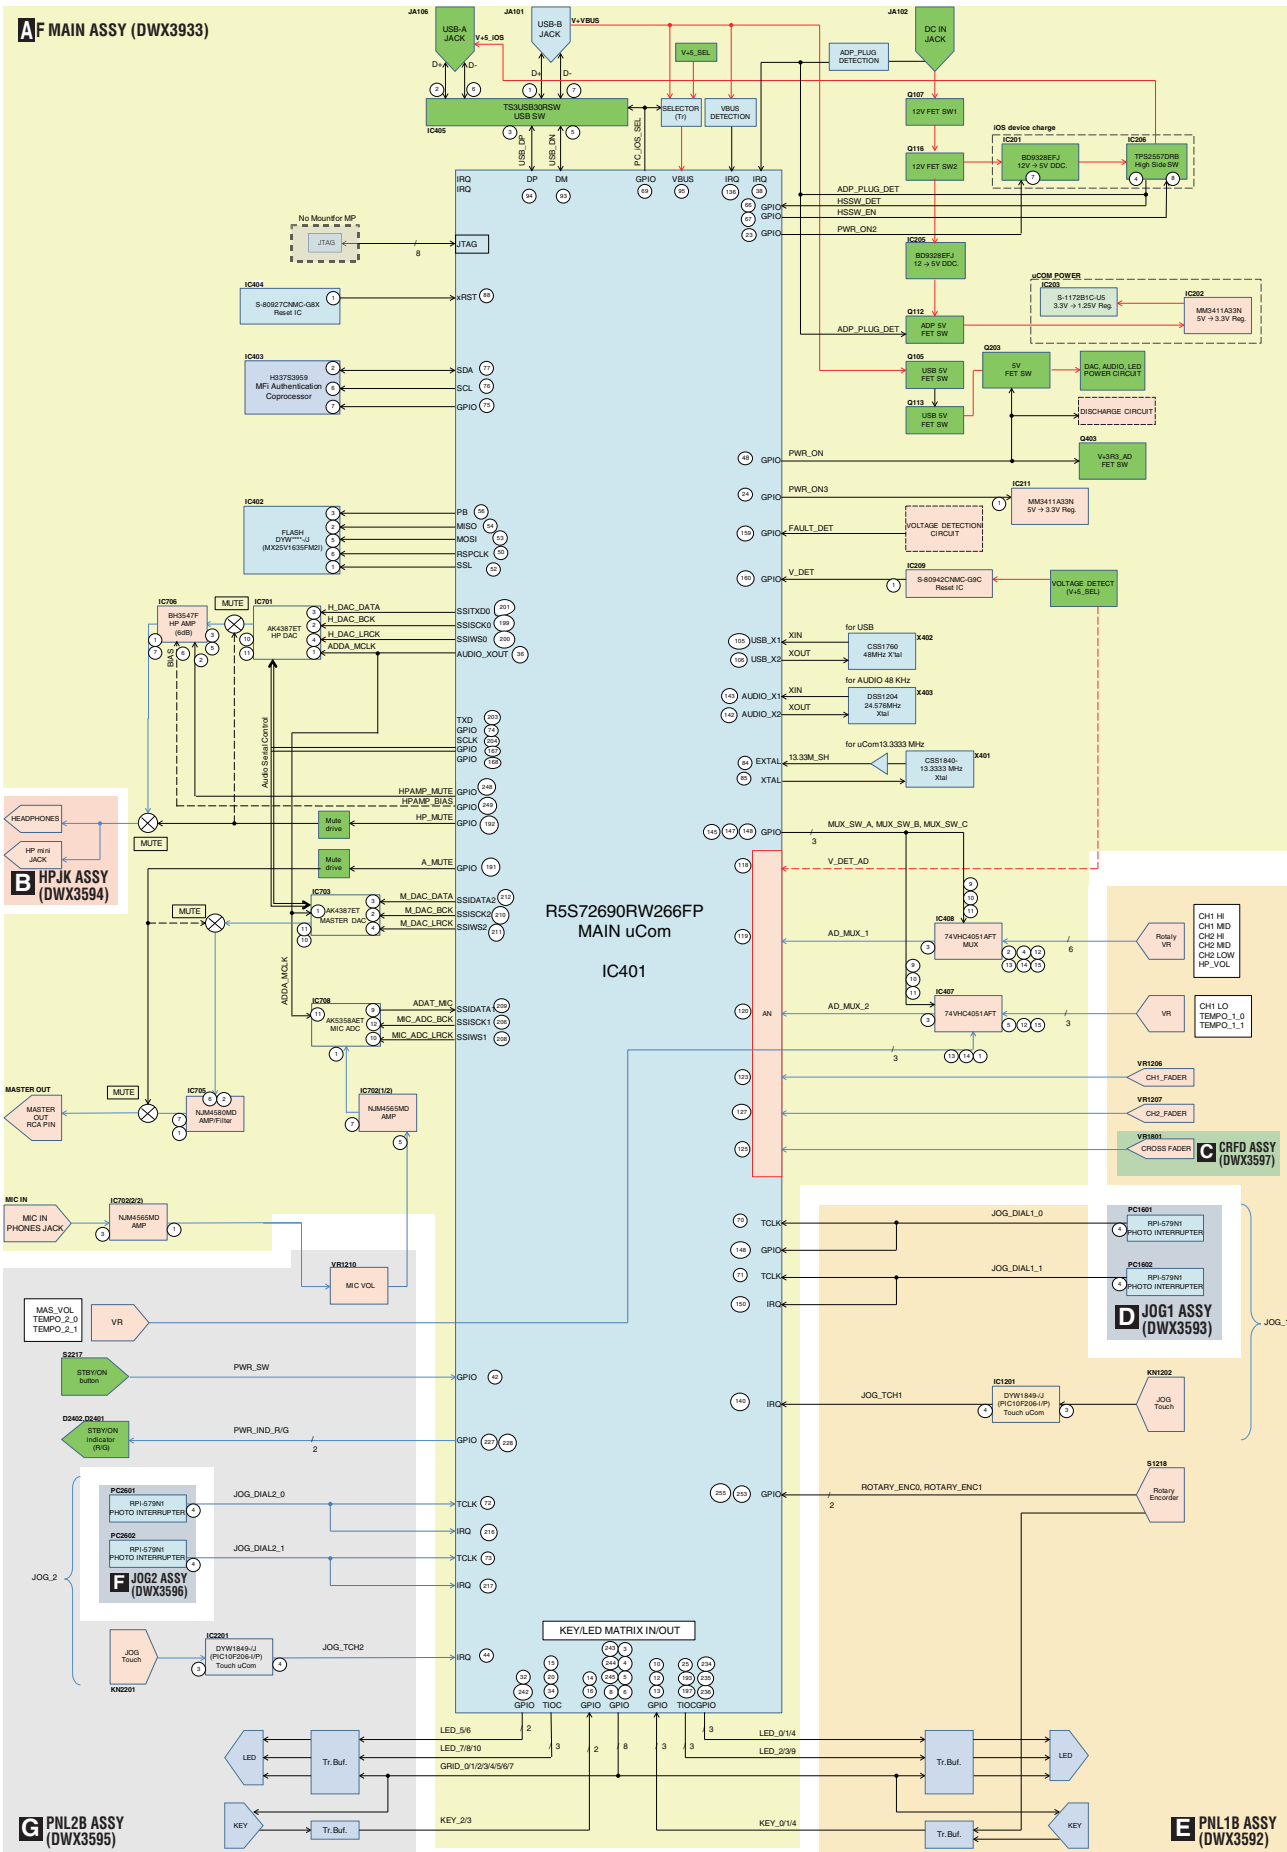

4. BLOCK DIAGRAM

- When ordering service parts, be sure to refer to 'EXPLODED VIEWS and PARTS LIST' or 'PCB PARTS LIST'.
- The Δ mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
-  : The power supply is shown with the marked box.

Power-Related Problems

Audio-Related Problems

5.3 DETECTION OF ABNORMAL POWER-SUPPLY VOLTAGES

This unit do not have the circuit for detecting an abnormality of the power-supply voltages about UCOM. So, it does not apply to ③ in Service Manual about DDJ-WEGO3. Refer to the service manual of DDJ-WEGO3 about the detection of abnormal power-supply voltages of DDJ-WEGO4 except the following list.

Reading table of the contrast description of detection of abnormal power-supply voltages

| DDJ-WEGO3 | DDJ-WEGO4 |
|---|---|
| IC406 (MAIN UCOM_pin108) (V_DET terminal) | IC401 (MAIN UCOM_pin160) (V_DET terminal) |
| IC406 (MAIN UCOM_pin107) (FAULT_DET input terminal) | IC401 (MAIN UCOM_pin159) (FAULT_DET input terminal) |

5.4 OPERATION CHECK WITH rekordbox

[Installation of rekordbox]

A brief explanation of how to install rekordbox on a PC is given below. For details, refer to the operating instructions of the software.

Install the driver software that enables audio output from the computer beforehand.

The operating environment of the PC required for installation of rekordbox is shown below.

Minimum operating environment

| Supported operating systems | CPU and required memory | Others | |
|--|---|---------------------|---|
| Mac OS X: 10.11/10.10/10.9 (latest update) | Intel® processor Core™ i3/i5/i7, Intel® processor Core™ 2 Duo 4 GB or more of RAM | USB port | A USB 2.0 port is required to connect the computer with this unit. |
| Windows: 32-bit version or 64-bit version of Windows 10/Windows 8.1/Windows 7 (latest service pack) | Intel® processor Core™ i3/i5/i7, Intel® processor Core™ 2 Duo 4 GB or more of RAM | Display resolution | Resolution of 1280 x 768 or greater |
| | | Internet connection | An Internet connection is required for registering the rekordbox user account and downloading the software. |

- For information on the latest system requirements, compatibility, and supported operating systems of rekordbox, see **[System Requirements]** on the rekordbox.com site below.
<http://rekordbox.com/>
- Operating System support assumes you are using the latest point release for that version.

For the latest version of the rekordbox software, access rekordbox.com and download the software from there.

For downloading, registration of a user account at rekordbox is required.

Unzip the downloaded file, then double-click the unzipped file to launch the installer.

Read the terms of the license agreement carefully, and if you agree, select **[Agree]**, then click **[Next]**(Mac OS X: Continue).

After installation is completed, the Installation Completed screen will be displayed. Click on **[Finish]**(Mac OS X: Close) to quit the rekordbox installer.

- Be sure to use rekordbox Version 4.2.2 or later, because the prior versions of rekordbox do not support the DDJ-WEGO4.
- Activation using a license key is required to use PERFORMANCE mode for enabling the DJ performance function of rekordbox.

[Connections]

[Operating procedures]

- 1 Connect such devices as a amplifier built-in speaker, powered amp, etc., to the **[MASTER]** output terminals.
- 2 Connect headphones to one of the **[HEADPHONES]** output terminals.
- 3 Connect this unit to your computer via a **USB cable**.
- 4 Connect DC plug of the AC adapter (supplied), and insert power cord in an outlet last.
- 5 Turn on the computer's power.
- 6 Press the **[STANDBY/ON]** button on this unit's to turn this unit's power on.
- 7 Turn on the power of the **devices** connected to the output terminals (**amplifier built-in speaker, powered amp, etc.**).

Side panel

A Launching rekordbox

Adding music files to [Collection]

[Collection] is a screen for displaying a list of the music files managed by rekordbox.

Registering the music files on the computer as the music collection of rekordbox and then analyzing them enables those tracks to be used with rekordbox.

1 Click [Collection] in the tree view.

A list of the tracks registered in [Collection] is displayed.

2 Open Finder or Windows explorer, then drag and drop music files or folders including music files to the track list.

The music files are added to the collection, and the waveform information analysis of the music files starts. Wait until the analysis of all the music files are finished.

C Loading tracks into a deck

The following describes the procedure for loading tracks into deck 1 (left side) as an example.

Turn the rotary selector to select a track in [Collection] and then press the [LOAD] button of deck 1 (left side).

The track is loaded into the deck.

Playing a music file

The following describes the procedure for outputting the sound of deck 1 (left side) as an example.

1 Set the positions of the controls, etc., as shown below.

| Names of controls, etc. | Position |
|-------------------------|-------------------------------|
| EQ (HI, LOW) controls | Center |
| FILTER control | Center |
| Channel fader | Moved forward |
| MASTER LEVEL control | Turned fully counterclockwise |
| Crossfader | Center |

2 Press the [PLAY/PAUSE] button to play the track.

3 Move the channel fader away from you.

4 Turn the [MASTER LEVEL] control to adjust the audio level of the speakers.

Adjust the audio level output from the [MASTER] output terminals to an appropriate level.

- Sound is output from the speakers according to your audio environment.

6. SERVICE MODE

6.1 TEST MODE

This unit terminal for iOS DEVICE has been changed from Lightning terminal (pin 13) of DDJ-WEGO3 to USB A terminal. So, it has been changed item of test mode from [C-1: Connection Confirmation mode with the Lightning/30-pin Cable] to [C-1: Connection Confirmation mode with the iPhone/iPad]. And changed item of <user settable items> of [A-5: Factory Reset mode] from {Auto Standby setting} to {Charging mode setting}. The factory default setting of {Charging mode setting} is "Able to charge only at power-on and enables auto standby". Refer to the service manual of DDJ-WEGO3 about the test mode of DDJ-WEGO4 except the following list.

Reading table of the contrast description of test mode

| DDJ-WEGO3 | DDJ-WEGO4 |
|-----------|--------------------------|
| DECK A | DECK 1 |
| DECK B | DECK 2 |
| HOT CUE 1 | PERFORMANCE 1 |
| HOT CUE 2 | PERFORMANCE 2 |
| HOT CUE 3 | PERFORMANCE 3 |
| HOT CUE 4 | PERFORMANCE 4 |
| MASTER | HEADPHONES SELECT MASTER |
| A | HEADPHONES SELECT 1 |
| B | HEADPHONES SELECT 2 |

[C-1: Connection Confirmation mode with the iPhone/iPad]

• **Before confirmation in this mode**

- ① Properly connect the iPhone/iPad supplied cable to the DDJ-WEGO4.
- ② Turn the DDJ-WEGO4 ON.
- ③ Turn the iOS device ON.
- ④ Connect the iPhone/iPad supplied cable to the iOS device (iPhone/iPad/iPod touch).
- ⑤ On the iOS device, select Settings, General, About, then DJ Controller.
If "DDJ-WEGO4" is displayed along with the version and serial number, the DDJ-WEGO4 is properly recognized.

• **Overview**

This mode is for confirming that communications between an iOS device and this unit can be performed properly.

• **How to Confirm**

When the unit is transited to the mode for confirming connection to the iPhone/ iPad, the [HEADPHONES SELECT MASTER] button, [HEADPHONES SELECT 1] button and [HEADPHONES SELECT 2] button is lit. When the iPhone and iPad is connected to the USB-A terminal of this unit using the charging cable (cable provided with the iPhone and iPad), this unit displays the connection state with the iPhone and iPad by the LED of the figure below.

LEDs lit to indicate that the unit is in this mode

The meanings of the LEDs indicated in the figure above are as follows:

| LED number | Meaning |
|------------|---|
| L_1 | Lights when connection of an iOS device is detected. |
| L_2 | Lit when this unit is transited to the device mode by the role SW. |
| L_3 | Lit when this unit is transited to the power feeding state after recognizing process with the iOS device is completed normally. |
| L_4 | Lit in the case that the certain error (HSSW_DET detection, etc) occurs. |

6.2 ABOUT DEVICE

| Device Name | Part No. | Function | Ref. No. | Assy |
|--------------------------------|------------------------------|--|----------|------------|
| MAIN UCOM | R5S72690RW266FP | Main microcomputer (Main control, USB control, Panel control) | IC401 | MAIN Assy |
| FLASH ROM | DYW**** (MX25V1635FM2I-K) | SPI FLASH ROM for Main microcomputer | IC402 | |
| MFi Authentication Coprocessor | H337S3959 | MFi Authentication IC | IC403 | |
| USB SW | TS3USB30RSW | iOS, USB differential signal select switch | IC405 | |
| HP DAC | AK4387ET | D/A converter for HP audio | IC701 | |
| MASTER DAC | AK4387ET | D/A converter for MASTER audio | IC703 | |
| MIC ADC | AK5358AET | D/A converter for MIC | IC708 | |
| TOUCH UCOM | DYW**** (PIC10F206-I/P) | Touch detection microcomputer for jog dial | IC1201 | PNL1B Assy |
| | | | IC2201 | PNL2B Assy |

Note on DYW****

The "****" part of the part number changes each time the firmware is updated.

7. DISASSEMBLY

[7. DISASSEMBLY], refer to Service Manual for DDJ-WEGO3.

8. EACH SETTING AND ADJUSTMENT

8.1 NECESSARY ITEMS TO BE NOTED

After repairing, be sure to check the version of the firmware, and if it is not the latest one, update to the latest version. Perform the each item when the following parts are replaced.

- IC and PCB Assy storing firmware and user settings
IC402, MAIN Assy→
 - Confirmation of the version of the firmware
 - Updating to the latest version of the firmware
 - Factory reset
(Be changed user setting to condition before the repair when be possible)
 - Writing the serial number of the unit

- JOG dial/ASW→
 - Confirmation of the specified value by "Mode for Measurements of Time Required for the Jog Dial to Slow Down"
* at the "NG" judgment execute habituation of the grease again.

- PC1601, PC1602 (JOG1 Assy)
PC2601, PC2602 (JOG2 Assy)→
 - Failure Judgment of Attachment of the Photointerrupters
* If the result of a failure judgment is "NG," reattach the photointerrupters, making sure they are properly placed, not slanted.
If the result of a failure judgment remains "NG" even after the photointerrupters have been reattached properly, replace them again.

8.2 UPDATING OF THE FIRMWARE

■ Items necessary for updating

- DDJWeGO4UpdateProgram.exe : Application program
- ddjwego4hid.dll : HID library
- ddjwego4__v***.bin : Firmware data

Create a folder in a desired location on your Windows PC then store the above-mentioned files in that folder.
(Example: In a case of Ver. 1.02)

| | | | |
|---|-------------------|-----------------------|----------|
|  ddjwego4_v102.bin | 6/30/2016 2:07 PM | BIN File | 2,048 KB |
|  ddjwego4hid.dll | 2/19/2016 2:10 PM | Application extension | 19 KB |
|  DDJWeGO4UpdateProgram.exe | 2/19/2016 4:43 PM | Application | 1,842 KB |

The subsequent procedures are based on DDJ-WEGO3.

8.3 WRITING THE SERIAL NUMBER OF THE UNIT

The following work is done by PC that is connecting unit by USB B terminal.

Preparations

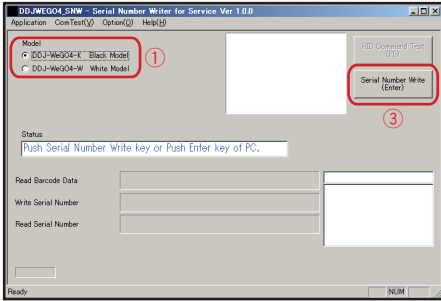

- ① Download the software for writing the serial number from Niis.
- ② The compressed files decompress and save to PC.

The generated folder is below.

- Ini folder
- Log folder
- DDJWEGO4_SNW.exe
- device.ini
- hidcom.dll
- UsbMidi.dll

A Procedure

① Turn on PC, and click “DDJWEGO4_SNW.exe” in the generated folder. To select the products that fall from the Model.

⑤ Turn on product dialog is displayed, and do it.

⑥ If update is finished correctly, display “OK” after a while.

This is completed about to write serial number for system. This unit is not able to confirm the serial number in the service mode. You can confirm the serial number on the procedure described in “6.1 TEST MODE [C-1: The mode for confirming connection to the iPhone/iPad] • Before confirmation in this mode”.

The procedure about checking serial number

The confirmation of the serial number, you must have iOS device. Connect the iOS device to this unit.

On the iOS device, select Settings, General, About, then DJ Controller. “DDJ-WEGO4” is displayed along with the version and serial number.

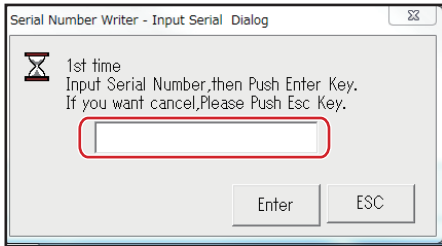

For details, refer to “6.1 TEST MODE [C-1: The mode for confirming connection to the iPhone/ iPad] • Before confirmation in this mode”.

B

② Connect the unit with a PC via a USB B cable.
③ Push [Serial Number Write] button, display serial input dialog (first time).

Enter serial number by handwork or barcode reader, and push “Enter”.
If enter by handwork, enter “ ” before serial number.
(If forgot, displayed error)
If enter by barcode reader, need to connect for PC in advance.

C

D

*Reference screen

④ Again display serial input dialog (secon time), enter serial number by handwork or barcode reader, and push “Enter”.

E

F

8.4 ITEMS FOR WHICH USER SETTINGS ARE AVAILABLE

This unit is provided with user settable items, as shown below.

Although no serious operational problems occur even if data for such user settable items are cleared during repair, it is recommended that you take note of those settings before starting repair.

Use the Check Sheet, to which you can transcribe the settings.

If the corresponding part or board Assy is replaced for repair, change the user resettable settings to those noted on the Check Sheet before starting repair. If resetting is not possible, when returning the repaired product, be sure to tell the customer that the Utility settings have been cleared and will have to be reset, as required.

| Item for Which User's Setting is Available | Setting Value (The factory default settings are indicated in bold.) / Indication method | Part Name | Content to be Stored |
|--|--|----------------------|----------------------|
| Demo mode setting | Time to demo mode start: 10 min / 5 min / 1 min / OFF DECK 1 [1] button lit / [2]button lit / [3]button lit / [CUE] button lit | IC402 (MAIN Assy) | Utility setting |
| Charging mode setting | Able to charge only at power-on and enables auto standby / Able to charge only at power-on and disables auto standby / Always enable to charge DECK 2 [1]button lit / [2]button lit / [3]button lit | | |
| Pulse mode (illuminations) setting | Normal (Standard LED lighting / blinking pattern) / Moderate (The lighting / blinking pattern that controlled light quantity of the LED) HEADPHONES SELECT 1 button lit / HEADPHONES SELECT 2 button lit | | |

Each of the above items can be set in Utilities modes.

To enter Utilities mode,

while pressing two LOAD buttons on the DECKs 1 and 2, press the STANDBY/ON button.

(The SYNC buttons lit on the DECKs 1 and 2).

Then, can set each item when you press either HOT CUE/SAMPLER button on the DECK 1, HOT CUE/SAMPLER button on the DECK 2, HEADPHONES SELECT MASTER button.

(For details, refer to the operating instructions of the unit.)

Sheet for confirmation of the user setting

| Demo mode setting | | | |
|--|---|-------------------------|-----|
| 10 min | 5 min | 1 min | OFF |
| | | | |
| Charging mode setting | | | |
| Able to charge only at power-on and enables auto standby | Able to charge only at power-on and disables auto standby | Always enable to charge | |
| | | | |
| Pulse mode (illuminations) setting | | | |
| Normal | Moderate | | |
| | | | |

9. EXPLODED VIEWS AND PARTS LIST

NOTES: ● Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.

- The  mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- Screws adjacent to  mark on product are used for disassembly.
- For the applying amount of lubricants or glue, follow the instructions in this manual. (In the case of no amount instructions, apply as you think it appropriate.)

9.1 PACKING SECTION

DDJ-WEGO3-K/SYXJ5 and DDJ-WEGO4-K/SYXJ, UXJCB, LWPWXJ and AXJ are constructed the same except for the following:

12. PCB PARTS LIST

NOTES: ● Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.

● The Δ mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.

● When ordering resistors, first convert resistance values into code form as shown in the following examples.

Ex.1 When there are 2 effective digits (any digit apart from 0), such as 560 ohm and 47 k ohm (tolerance is shown by J = 5%, and K = 10%).

560 Ω → 56 × 10¹ → 561 RD1/APU $\boxed{5}$ $\boxed{6}$ $\boxed{7}$ J

47 k Ω → 47 × 10³ → 473 RD1/APU $\boxed{4}$ $\boxed{7}$ $\boxed{3}$ J

0.5 Ω → R50 RN2H \boxed{R} $\boxed{5}$ $\boxed{0}$ K

1 Ω → 1R0 RSIP $\boxed{7}$ \boxed{R} $\boxed{0}$ K

Ex.2 When there are 3 effective digits (such as in high precision metal film resistors).

5.62 k Ω → 562 × 10¹ → 5621 RN1/4PC $\boxed{5}$ $\boxed{6}$ $\boxed{2}$ $\boxed{1}$ F

| | 2..HPJK ASSY | DWX3594 | | | |
| | 2..CRFD ASSY | DWX3597 | | | |

*1: As the PNL1B Assy and JOG1 Assy are wired with jumper leads.

If a DWX3592 (PNL1B Assy) is ordered, the PNL1B Assy and JOG1 Assy wired with jumper leads will be delivered. The part supply is impossible in JOG1 Assy alone (NSP: non-service part).

*2: As the PNL2B Assy and JOG2 Assy are wired with jumper leads.

If a DWX3595 (PNL2B Assy) is ordered, the PNL2B Assy and JOG2 Assy wired with jumper leads will be delivered. The part supply is impossible in JOG2 Assy alone (NSP: non-service part).
