# SA-750

MODEL SA-750 COMES IN SIX VERSIONS DISTINGUISHED AS FOLLOWS:

Type	Voltage	Remarks
KU	AC120V only	U.S.A. model
KC	AC120V only	Canada model
HE	AC220V, 240V (switchable)	European continent model
S	AC110V, 120V, 220V, 240V (switchable)	General export model
YP	AC240V only	Australia model
HEZ	AC220V, 240V (switchable)	West Germany model

- This service manual is applicable to the KU type.  
For servicing of the KC, HE, HEZ, S, and YP types, please refer to pp. 24~28.
- Ce manuel d'instruction se réfère au mode de réglage, in français.
- Este manual de servicio trata del método de ajuste escrito en español.

Cher Monsieur,

Merci pour votre coopération à propos du service après-vente des produits PIONEER.

Ce questionnaire a pour but l'amélioration de notre service d'entretien et des manuels de nos produits. Nous vous prions d'évaluer dans ce questionnaire les éléments de nos manuels de service. Vos conseils seront précieux et pris en considération dans la réalisation de nos produits dans l'avenir. En vous remerciant d'avance, agréez, cher monsieur, l'expression de nos sentiments distingués.

## 2. FRONT PANEL FACILITIES

### 1 POWER SWITCH

When this switch is pushed, the power is supplied (the function indicators light). When it is pushed again, the power is switched off.

### 2 LOUDNESS SWITCH

Push this switch to the "ON" position for low-volume sound listening. The bass and treble are emphasized and you can sit back and listen to a dynamic sound even under low-volume conditions.

### 3 ADAPTOR/TAPE 2 SWITCH

This is used when operating an adaptor (such as a tape creating amplifier) or when playing back a tape in a tape deck connected to the rear panel ADAPTOR/TAPE 2 terminals.

### 4 ADAPTOR/TAPE 2 INDICATOR

This lights when the ADAPTOR/TAPE 2 switch is set to ON.

### 5 FUNCTION INDICATORS

The indicator corresponding to the function switch which has been pushed lights. Each indicator has a symbol: "⊙" for PHONO, "⊞" for TUNER, "⊕" for CD/VIDEO and "⊚" for TAPE 1.

### 6 FUNCTION SWITCHES

**PHONO:** Used when playing records on a turntable connected to the rear panel PHONO terminals.

**TUNER:** Used when listening to broadcasts on the tuner connected to the rear panel TUNER terminals.

**CD/VIDEO:** Used when operating a TV tuner or compact disc player etc. connected to the rear panel CD/VIDEO terminals.

**TAPE 1:** Used when playing back tapes in the tape deck connected to the rear panel TAPE 1 terminals.

### 7 SPEAKER SELECTOR SWITCHES

Select the switch that corresponds to the speaker systems through which the sound is to be heard. When the switch is pressed, the sound is heard through the speaker systems selected.

**A:** The sound is heard from the speakers connected to the speaker A terminals on the rear panel.

**B:** The sound is heard from the speakers connected to the speaker B terminals on the rear panel.

No sound will be heard when SPEAKERS A and B switches are both released. This is the position at which the sound can be heard through the headphones.

#### NOTE:

No sound will be heard through the speakers when both the A and B switches are depressed if only one set of speakers has been connected to either the A or B SPEAKERS terminals.

### 8 PHONES JACK

Plug the headphones into this jack securely for private listening.

#### NOTE:

Make it a rule to turn down the volume before plugging in the headphones. A loud sound can hurt your ears.

### 9 BASS CONTROL

This is used to adjust the bass sound.

When rotated clockwise from the center "FLAT" position, the bass is emphasized; when rotated counterclockwise, the bass is attenuated.

### 10 TREBLE CONTROL

This is used to adjust the treble sound.

When rotated clockwise from the center "FLAT" position, the treble is emphasized; when rotated counterclockwise, the treble is attenuated.

### 11 BALANCE CONTROL

This is normally kept at the "CENTER" position. It should be adjusted when the left/right stereo balance has become lopsided. Rotate the control to the left when the right channel sound is too loud; rotate it to the right when the left channel sound is too loud.

### 12 VOLUME CONTROL

This is used to adjust the sound volume of the speakers and headphone. No sound will be heard when the control has been set to the "0" position. Rotate the control clockwise to increase the sound level.

### 3. PARTS LOCATION

**NOTES:**

- Parts without part number cannot be supplied.
- The  $\Delta$  mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- For your Parts Stock Control, the fast moving items are indicated with the marks **★★** and **★**.  
**★★ GENERALLY MOVES FASTER THAN ★.**  
 This classification shall be adjusted by each distributor because it depends on model number, temperature, humidity, etc.

- The underlined indicates the switch position.

## 8. ELECTRICAL PARTS LIST

**NOTES:**

- When ordering resistors, first convert resistance values into code form as shown in the following examples.

Ex. 1 When there are 2 effective digits (any digit apart from 0), such as 560 ohm and 47k ohm (tolerance is shown by J = 5%, and K = 10%).

560Ω 56 × 10<sup>1</sup> 561 ..... RD¼PS 561J  
 47kΩ 47 × 10<sup>3</sup> 473 ..... RD¼PS 473J  
 0.5Ω 0R5 ..... RN2H 0R5K  
 1Ω 010 ..... RS1P 010K

Ex. 2 When there are 3 effective digits (such as in high precision metal film resistors).

5.62kΩ 562 × 10<sup>1</sup> 5621 ..... RN¼SR 5621F

- The  $\Delta$  mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- For your Parts Stock Control, the fast moving items are indicated with the marks **★★** and **★**.  
**★★ GENERALLY MOVES FASTER THAN ★.**  
 This classification shall be adjusted by each distributor because it depends on model number, temperature, humidity, etc.

★★	SEAGV2B4S	S2 Push switch (ADAPTOR/TAPE2, LOUDNESS)

## 9. PACKING

Mark	No.	Part No.	Description
	1.	ARB-596	Operating instructions
	2.	AHE-315	Packing case
	3.	AHA-340	Front rear pad

## 10. ADJUSTMENTS

### Idle Current Adjustment

1. Turn the VOLUME control down to minimum level, turn the power on, and wait about 10 minutes.
2. Connect a DC voltmeter to the TP terminals (L ch; TP1  $\oplus$  and TP2  $\ominus$ , R ch; TP4  $\ominus$  and TP3  $\oplus$ ) of the AF assembly.
3. Check that the voltage between TP1 and TP2 (L ch) lies within the DC 0.2mV~22mV range. Then make a similar check for the R ch (between TP3 and TP4). If the voltage is less than 0.2mV, cut jumper wire A (L ch), and jumper wire B (R ch). If the voltage exceeds 22mV, check for circuit failure.

## 10. RÉGLAGE

### Réglage du courant déwatté

1. Tourner la commande de volume sur la position minimum, mettre l'appareil sous tension et attendre environ 10 minutes.
2. Connecter un voltmètre CC aux bornes TP (voie droite: TP1 ⊕ et TP2 ⊖ , voie gauche: TP4 ⊖ et TP3 ⊕ ) d'ensemble AF.
3. Vérifier que la tension entre TP1 et TP2 (voie droite) soit entre 0,2mV et 22mV CC. Vérifier de la même manière la voie gauche (entre TP3 et TP4). Couper l'interconnexion A (voie gauche) et l'interconnexion B (voie droite) si la tension est inférieure a 0,2mV. Lorsque la tension est supérieure a 22mV, s'assurer de l'absence de panne de circuit.

## 10. AJUSTE

### Ajuste de la corriente devatiada

1. Poner el control de volumen (VOLUME) en su posición de nivel mínimo, conectar la alimentación y esperar unos 10 minutos.
2. Conectar un voltímetro de CC a los terminales TP (canal Der.; TP1  $\oplus$  y TP2  $\ominus$  , canal Izq.; TP4  $\ominus$  y TP3  $\oplus$  ) del conjunto A.F.
3. Comprobar que la tensión entre TP1 y TP2 (canal Der.) esté dentro del margen de 0,2mV ~ 110mV CC. Luego realizar una comprobación similar para el canal Izq. (entre TP3 y TP4). Si la tensión es menor de 0,2mV, cortar la conexión provisional A (canal Izq.), y conectar provisionalmente B (canal Der.). Si la tensión excede de 22mV, comprobar que no haya ninguna avería en el circuito.

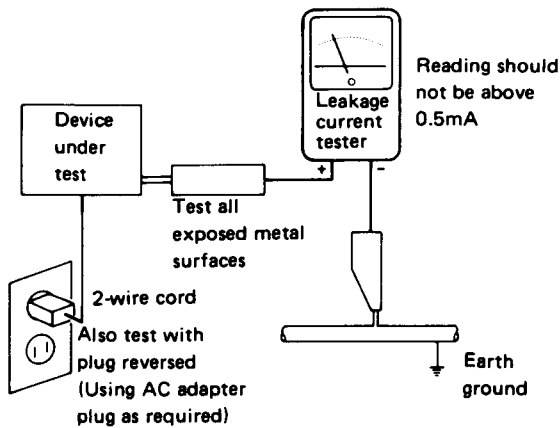

# 11. SAFETY INFORMATION

## 1. SAFETY PRECAUTIONS

The following check should be performed for the continued protection of the customer and service technician.

### LEAKAGE CURRENT CHECK

Measure leakage current to a known earth ground (water pipe, conduit, etc.) by connecting a leakage current tester such as Simpson Model 229-2 or equivalent between the earth ground and all exposed metal parts of the appliance (input/output terminals, screwheads, metal overlays, control shaft, etc.). Plug the AC line cord of the appliance directly into a 120V AC 60Hz outlet and turn the AC power switch on. Any current measured must not exceed 0.5mA.

AC Leakage Test

ANY MEASUREMENTS NOT WITHIN THE LIMITS OUTLINED ABOVE ARE INDICATIVE OF A POTENTIAL SHOCK HAZARD AND MUST BE CORRECTED BEFORE RETURNING THE APPLIANCE TO THE CUSTOMER.

## 2. PRODUCT SAFETY NOTICE

Many electrical and mechanical parts in the appliance have special safety related characteristics. These are often not evident from visual inspection nor the protection afforded by them necessarily can be obtained by using replacement components rated for voltage, wattage, etc. Replacement parts which have these special safety characteristics are identified in this Service Manual.

Electrical components having such features are identified by marking with a  $\Delta$  on the schematics and on the parts list in this Service Manual.

The use of a substitute replacement component which does not have the same safety characteristics as the PIONEER recommended replacement one, shown in the parts list in this Service Manual, may create shock, fire, or other hazards.

Product Safety is continuously under review and new instructions are issued from time to time. For the latest information, always consult the current PIONEER Service Manual. A subscription to, or additional copies of, PIONEER Service Manual may be obtained at a nominal charge from PIONEER.

# 12. FOR KC TYPE

The KC type is the same as the KU type with the exception of the following section.

### Contrast of Miscellaneous Parts

Mark	Symbol & Description	Parts No.		Remarks
		KU type	KC type	
$\Delta$ ★ $\Delta$ $\Delta$	T1 Power transformer (120V)	ATS-090	ATS-091	
	AC Power cord	ADG-073	ADG-077	
	AC socket	AKP-501	AKP-504	
	AC cord stopper	.....	AEC-327	
	Packing case	AHE-315	AHE-316	

## 14. FOR HEZ TYPE

The HEZ type is the same as the KU type with the exception of the following sections.

### Contrast of Miscellaneous Parts

Mark	Symbol & Description	Part No.		Remarks
		KU type	HB type	
⚠ ★	T1 Power transformer (120V) (220V, 240V)	ATS-090	..... ATS-092	
⚠ ★★	FU1 Fuse (4A) (T1.25A)	AEK-125	..... AEK-018

	R509 ~ R516	.....	RD1/8PM222J	
	Packing case	AHE-315	AHE-316	

### Line Voltage Selection

Line voltage can be changed with following steps.

1. Disconnect the AC power cord.
2. Remove the top cover.
3. Take out the fuse (AEK-018) from the fuse assembly.
4. Re-install the fuse in the correct voltage indication (see Fig. 1).
5. Stick the line voltage label on the rear panel.

Part No.	Description
AAX-193	220V label
AAX-192	240V label
