## 1. SAFETY INFORMATION

This service manual is intended for qualified service technicians; it is not meant for the casual do-it-yourselfer. Qualified technicians have the necessary test equipment and tools, and have been trained to properly and safely repair complex products such as those covered by this manual. Improperly performed repairs can adversely affect the safety and reliability of the product and may void the warranty. If you are not qualified to perform the repair of this product properly and safely, you should not risk trying to do so and refer the repair to a qualified service technician.

### WARNING

Lead in solder used in this product is listed by the California Health and Welfare agency as a known reproductive toxicant which may cause birth defects or other reproductive harm (California Health & Safety Code, Section 25249.5). When servicing or handling circuit boards and other components which contain lead in solder, avoid unprotected skin contact with the solder. Also, when soldering do not inhale any smoke or fumes produced.

### NOTICE

(FOR CANADIAN MODEL ONLY)

Fuse symbols  (fast operating fuse) and/or  (slow operating fuse) on PCB indicate that replacement parts must be of identical designation.

### REMARQUE

(POUR MODÈLE CANADIEN SEULEMENT)

Les symboles de fusible  (fusible de type rapide) et/ou  (fusible de type lent) sur CCI indiquent que les pièces de remplacement doivent avoir la même désignation.

(FOR USA MODEL ONLY)

### 1. SAFETY PRECAUTIONS

The following check should be performed for the continued protection of the customer and service technician.

#### LEAKAGE CURRENT CHECK

Measure leakage current to a known earth ground (water pipe, conduit, etc.) by connecting a leakage current tester such as Simpson Model 229-2 or equivalent between the earth ground and all exposed metal parts of the appliance (input/output terminals, screwheads, metal overlays, control shaft, etc.). Plug the AC line cord of the appliance directly into a 120V AC 60 Hz outlet and turn the AC power switch on. Any current measured must not exceed 0.5 mA.

AC Leakage Test

**ANY MEASUREMENTS NOT WITHIN THE LIMITS OUTLINED ABOVE ARE INDICATIVE OF A POTENTIAL SHOCK HAZARD AND MUST BE CORRECTED BEFORE RETURNING THE APPLIANCE TO THE CUSTOMER.**

### 2. PRODUCT SAFETY NOTICE

Many electrical and mechanical parts in the appliance have special safety related characteristics. These are often not evident from visual inspection nor the protection afforded by them necessarily can be obtained by using replacement components rated for voltage, wattage, etc. Replacement parts which have these special safety characteristics are identified in this Service Manual.

Electrical components having such features are identified by marking with a  on the schematics and on the parts list in this Service Manual.

The use of a substitute replacement component which does not have the same safety characteristics as the PIONEER recommended replacement one, shown in the parts list in this Service Manual, may create shock, fire, or other hazards.

Product Safety is continuously under review and new instructions are issued from time to time. For the latest information, always consult the current PIONEER Service Manual. A subscription to, or additional copies of, PIONEER Service Manual may be obtained at a nominal charge from PIONEER.

## 2. CHECKING FOR PCB PATTERN OF MOTHER ASSY

1. Remove lower set screw ① at the center of the Chassis and Rear Panel.
2. Cut binder ② and remove.
3. Remove the three screws ③ fastening the MOTHER Assy, and the two screws ④ fastening the Radiator.
4. Grip the Radiator and Rear Panel, and lift up about 3 cm. Then, lift up the MOTHER Assy as shown in Fig. 2 so that it can be checked.

Fig. 1

Fig. 2

# SX-255R, SX-205

## 3. EXPLODED VIEWS, PACKING AND PARTS LIST

### NOTES :

- Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.
- The  $\triangle$  mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- Parts marked by "⊙" are not always kept in stock. Their delivery time may be longer than usual or they may be unavailable.

**5.1 OVERALL SCHEMATIC DIAGRAM**

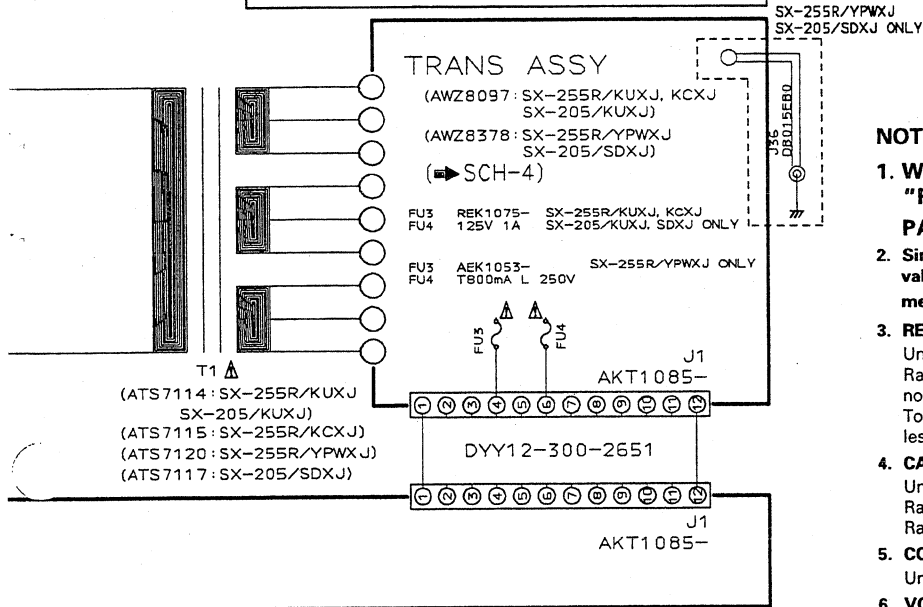

**SCH-1** OVERALL SCHEMATIC DIAGRAM

# SX-255R, SX-205

● NOTE FOR FUSE REPLACEMENT

CAUTION - FOR CONTINUED PROTECTION AGAINST RISK OF FIRE, REPLACE ONLY WITH SAME TYPE AND RATINGS ONLY.

SCH-1

**NOTE FOR SCHEMATIC DIAGRAMS** (TYPE 1A)

1. When ordering service parts, be sure to refer to "PARTS LIST of EXPLODED VIEWS" or "PCB PARTS LIST".

2. Since these are basic circuits, some parts of them or the values of some components may be changed for improvement.

3. **RESISTORS:**  
 Unit: k:Ω, M:MΩ, or Ω unless otherwise noted.  
 Rated power: 1/4W, 1/6W, 1/8W, 1/10W unless otherwise noted.  
 Tolerance: (F): ±1%, (G): ±2%, (K): ±10%, (M): ±20% or ±5% unless otherwise noted.

4. **CAPACITORS:**  
 Unit: p:pF or μF unless otherwise noted.  
 Ratings: capacitor (μF) / voltage (V) unless otherwise noted.  
 Rated voltage: 50V except for electrolytic capacitors.

5. **COILS:**  
 Unit: m:mH or μH unless otherwise noted.

6. **VOLTAGE AND CURRENT:**  
 : SIGNAL voltage at rated output.  
 or :  
 DC voltage (V) at no input signal unless otherwise noted.  
 Value in ( ) is DC voltage at rated power.  
 mA or mA :  
 DC current at no input signal unless otherwise noted.

7. **OTHERS:**  
 ● ⊕ or ⊙ : Adjusting point.  
 ● ◀ : Measurement point.  
 ● The Δ mark found on some components parts indicates the importance of the safety factor of the parts. Therefore, when replacing, be sure to use parts of identical designation.

8. **SCH-□ ON THE SCHEMATIC DIAGRAM:**  
 ● SCH-□ indicates the drawing number of the schematic diagram. (SCH stands for schematic diagram.)

9. **SWITCHES** (Underline indicates switch position):  
 Voltage Selector (SX-205/SDXJ only)  
 AC110V/120-127V/230V/240V

MOTHER Assy

## 5.2 MOTHER ASSY, FM/AM TUNER FE MODULE, SP SW. AND HP. ASSY, TRANS ASSY, REG ASSY AND POWER SW. ASSY (for SX-205)

### ● FM/AM TUNER FE MODULE

NOTE: VOLTAGE AND CURRENT

$\square$  mV : Signal voltage at FM 1kHz, 100% MOD.

$\square$  or  $\leftarrow$  V: DC voltage (V) at no input signal unless otherwise noted.

Value in ( ) is DC voltage at rated power.

$\leftarrow$  mA or  $\leftarrow$  mA: DC current at no input signal unless otherwise noted.

$\leftarrow$  mA or  $\leftarrow$  mA: DC current at no input signal unless otherwise noted.

SIGNAL ROUTE

$\leftarrow$  (FM) : FM SIGNAL ROUTE

Noted

1. Resistors

Indicated in ohm 1/10W, +5% tolerance unless otherwise noted K:K ohm.

2. Capacitors

Indicated in uF, 50V unless otherwise noted P:PF.

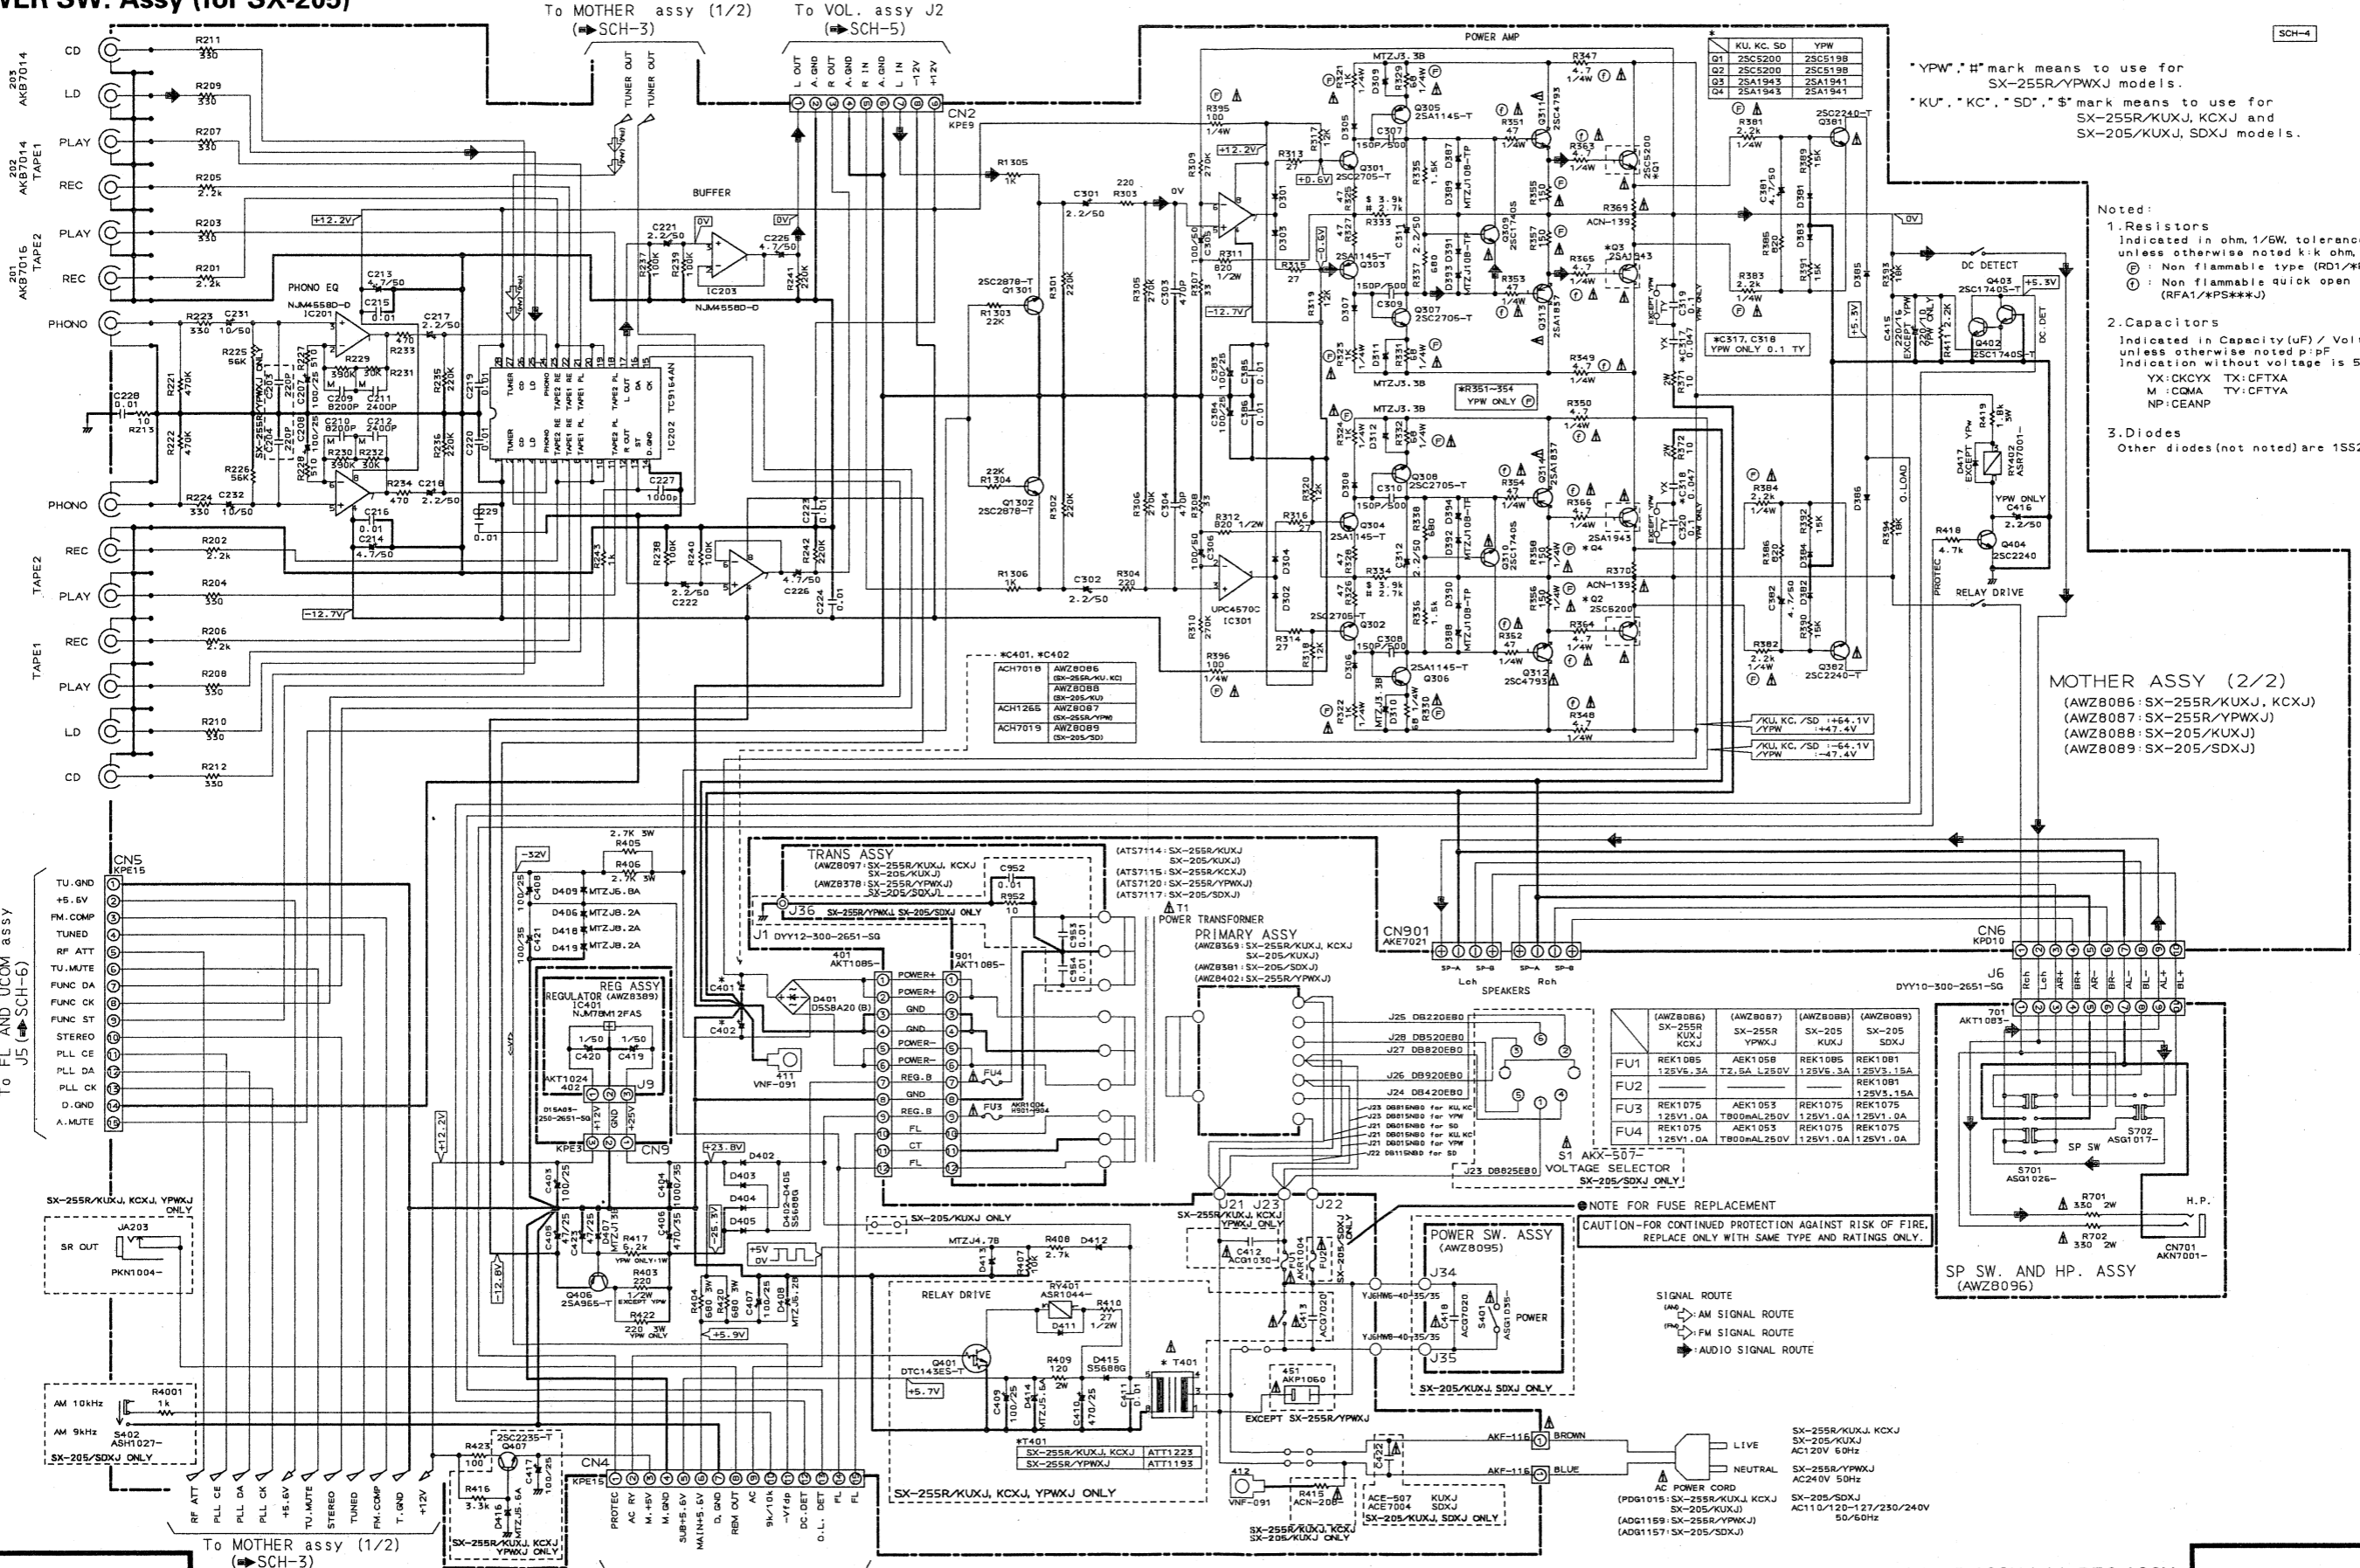

**SCH-2**

BARRIER Assy has no service part.

# SX-255R, SX-205

## 7. ADJUSTMENTS

### ADJUSTMENT OF FM TUNER SECTION

- Set the FM/AM selector to FM BAND.
- Connect the wiring as shown in Fig. 1-1.

Step No.	Adjustment Title	FM SG (1kHz, $\pm 75$ kHz dev.)		Reception Frequency Display	Adjustment Location	Specifications
		Frequency (MHz)	Level (dB $\mu$ V)			
1	Center Adjustment	98	60	98.0 MHz	L151	Adjust so that the DC voltage of R151's both ends becomes $0V \pm 50mV$ . 
2	Front End Sencitivity Check	98	Less than 10	98.0 MHz	—	Less than 10 dB $\mu$ V
3	Stereo Distortion Check	89	60	89.0 MHz	T101	Less than 2%. Check that it becomes within the standard by turning the IFT T101 in the FM/AM TUNER MODULE less than $\pm 90^\circ$ in case out of standard.
4	Stereo Separation Check	89	60	89.0 MHz	—	Less than 23 dB. In case out of standard, cut the R157.
5	TUNED IND. Lighting Level	98	18 ( $\pm 3$ dB)	98.0 MHz	VR151	18 dB $\mu$ V $\pm 3$ dB. Adjust so that the indicator of TUNED IND. starts to light up.

Note: Make indicator adjustments in order of AM  $\rightarrow$  FM.

### ADJUSTMENT OF AM (MW) TUNER SECTION

- Set the FM/AM selector to AM (MW) BAND.
- Connect the wiring as shown in Fig. 1-1.

Step No.	Adjustment Title	AM SG (400Hz, 30% Mod.)		Reception Frequency Display	Adjustment Location	Specifications
		Frequency (kHz)	Level (dB $\mu$ V/m)			
1	TUNED IND. Lighting Level Check	999 <sup>*1</sup>	Less than 65	999kHz <sup>*1</sup>	—	Less than 65dB $\mu$ V/m. In case out of standard, cut the R164.

\*1 : For the area using 10 kHz step, frequencies should be 1000 kHz.

10. FOR SX-255R/KCXJ, YPWXJ, SX-205/KUXJ AND SDXJ

NOTES :

- Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.
- The  $\Delta$  mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- Parts marked by "⊙" are not always kept in stock. Their delivery time may be longer than usual or they may be unavailable.
- When ordering resistors, first convert resistance values into code form as shown in the following examples.

Ex. 1 When there are 2 effective digits (any digit apart from 0), such as 560 ohm and 47k ohm (tolerance is shown by J = 5%, and K = 10%).

$560 \Omega \rightarrow 56 \times 10^1 = 561$  ..... RD1/4PU  $\boxed{5} \boxed{6} \boxed{1} J$

$47k \Omega \rightarrow 47 \times 10^3 = 473$  ..... RD1/4PU  $\boxed{4} \boxed{7} \boxed{3} J$

$0.5 \Omega \rightarrow 0R5$  ..... RN2H  $\boxed{0} \boxed{R} \boxed{5} K$

$1 \Omega \rightarrow 1R0$  ..... RSIP  $\boxed{1} \boxed{R} \boxed{0} K$

Ex. 2 When there are 3 effective digits (such as in high precision metal film resistors).

$5.62k \Omega \rightarrow 562 \times 10^1 = 5621$  ..... RN1/4PC  $\boxed{5} \boxed{6} \boxed{2} \boxed{1} F$

## 11. SPECIFICATIONS

### Amplifier Section

**Continuous Average Power Output is 100 watts\* per channel, min., at 8 ohms from 40 Hertz to 20,000 Hertz with no more than 0.9%\*\* total harmonic distortion.**

#### [Multi-voltage model only]

Continuous Power Output (DIN)	
1 kHz, T.H.D. 1%, 8 Ω	115 W+115 W
Dynamic Power (2 Ω/4 Ω/8 Ω)	260 W/ 220 W/ 150 W
Input (Sensitivity/Impedance)	200 mV/47 kΩ
Output (Level/Impedance)	
TAPE 2 REC, TAPE 1/VCR REC	200mV/2.2 kΩ
Frequency Response	10 Hz to 100 kHz $\pm 3$ dB
BASS	100 Hz, $\pm 10$ dB
TREBLE	10 kHz, $\pm 10$ dB
SUPER BASS	80 Hz, +8 dB
Signal-to-Noise Ratio (IHF, shortcircuited, A network)	
PHONO MM	72 dB
CD, TAPE 1/VCR, TAPE 2, LD/DVD	96 dB

### FM Tuner Section

Frequency range	87.5 MHz to 108 MHz
Usable Sensitivity	11.2 dBf, IHF (1.0 μV/ 75 Ω)
50 dB Quieting Sensitivity	
MONO	16.8 dBf (1.9 μV/ 75 Ω)
STEREO	38.6 dBf (23.3 μV/ 75 Ω)
Signal-to-Noise Ratio	
MONO	76 dB (at 85 dBf)
STEREO	72 dB (at 85 dBf)
Distortion	
MONO	0.5% (1 kHz)
STEREO	0.5% (1 kHz)
Alternate Channel Selectivity	60dB (400 kHz)
Stereo Separation	40dB (1 kHz)
Frequency Response	30 Hz to 15 kHz ( $\pm 1$ dB)
Antenna Input	75 unbalanced

### AM Tuner Section

Frequency range	
When 10 kHz step	530 kHz to 1,700 kHz
When 9 kHz step	531 kHz to 1,602 kHz
Sensitivity	
IHF, Loop antenna	350 μV/m
Selectivity	25 dB
Signal-to-Noise Ratio	50 dB
Antenna	AM Loop Antenna

### Miscellaneous

Power Requirements	
U.S. and Canadian models	AC 120 Volts, 60 Hz
Multi-voltage model	AC 110V/120V - 127V /220V/240V (switchable), 50/60 Hz
Power Consumption	
U.S. and Canadian models	190 W (UL), 330 VA (CSA)
Multi-voltage model	520 W
AC Outlet	SWITCHED x 1 : 100W MAX
Dimensions	420 (W) x 140 (H) x 298 (D) mm
	16-9/16 (W) x 5-8/16 (H) x 11-12/16 (D) in
Weight (without package)	
U.S. and Canadian models	6.6 kg (14 lb 9 oz)
Multi-voltage model	6.8 kg

### Furnished Parts

FM Antenna	1
AM Loop Antenna	1
Operating Instructions [SX-255R]	1
Remote control unit	1
Dry cell batteries (size "AA" (R6P))	2

\* Measured pursuant to the Federal Trade Commission's Trade Regulation rule on Power Output Claims for Amplifiers.

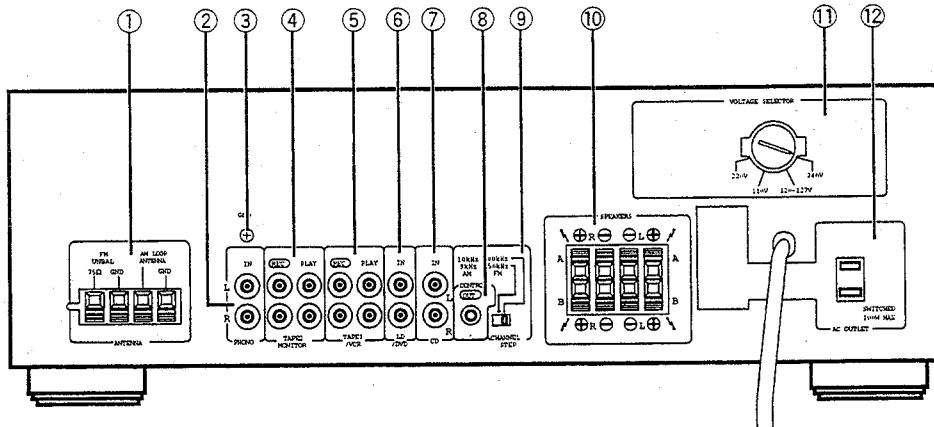

\*\* Measured By Audio Spectrum Analyzer.

#### NOTE:

Specifications and design subject to possible modification without notice due to improvements.

## 12. PANEL FACILITIES

• The illustration shows SX-255R/SX-205 multi-voltage model.

### ① FM/AM ANTENNA terminals

Use these antenna terminals for receiving FM and AM broadcasts.

### ② PHONO jacks

Connect to the output cables from a turntable.

### ③ GND terminal

Connect to the ground lead of a turntable.  
Use a screwdriver to connect with the ground terminal.

### ④ TAPE 2 MONITOR jacks

Connect these jacks to a cassette deck.

### ⑤ TAPE 1/VCR jacks

Connect these jacks to a cassette deck or video cassette recorder.

### ⑥ LD/DVD jacks

Connect to the output jacks of an LD player, DVD player or another unit.

### ⑦ CD jacks

Connect to the output jacks of a compact disc player.

### ⑧ CONTROL OUT jacks (SX-255R only)

Connect this jack to other Pioneer components bearing the  mark when using the remote control of this unit to control the other components.

### ⑨ CHANNEL STEP switch (multi-voltage model only)

### ⑩ SPEAKERS terminals

A : Connect to a first set of speakers.  
B : Connect to a second set of speakers.

#### NOTE:

No sound will be heard through the speakers when both A and B buttons are depressed if only one set of speakers has been connected to either A or B SPEAKERS terminals.

### ⑪ VOLTAGE SELECTOR (multi-voltage model only)

### ⑫ AC OUTLET

#### AC OUTLET

##### [U.S. and Canadian models] SWITCHED 100 W (0.8 A) MAX

Power supplied through this outlet is turned on and off by the receiver's POWER switch. Electrical power consumption of the connected equipment should not exceed 100 W (0.8 A MAX). The equipment should be disconnected by removing the mains plug from the wall socket when not in regular use, e.g. when on vacation.

##### [Multi-voltage model] SWITCHED 100 W MAX

Power supplied through this outlet is turned on and off by the receiver's POWER switch. Electrical power consumption of the connected equipment should not exceed 100 W. The equipment should be disconnected by removing the mains plug from the wall socket when not in regular use, e.g. when on vacation.

**CAUTION**  
DO NOT CONNECT MONITOR OR TV SET.

#### NOTE:

Do not connect appliances with high power consumption such as heaters, irons, or television sets to the AC OUTLET, in order to avoid overheating or fire risk.  
This can cause the receiver to malfunction.

# SX-255R, SX-205

• The illustration shows the SX-255R.

## ① POWER STANDBY/ON switch/STANDBY indicator (SX-255R)

This is the switch for electric power.

**ON:** When set to the ON position, power is supplied and the unit becomes operational.

**STANDBY:** When set to the STANDBY position, the main power flow is cut and the unit is no longer fully operational. A minute flow of power feeds the unit to maintain operation readiness. The STANDBY indicator is illuminated during standby mode.

• The accessory remote control unit can also be used to operate STANDBY/ON.

### NOTE:

When the power is initially turned ON, muting will be applied to prevent sound from being output for approx. 5 seconds.

## ① POWER switch/POWER indicator (SX-205)

When this switch is pressed, power is supplied to the unit and the indicator lights up.

Press the switch again to turn power OFF.

[Timer ON/OFF possible]

When the unit is switched ON, ON/OFF control can be performed by means of the optional timer.

### NOTE:

When the power is initially turned ON, muting will be applied to prevent sound from being output for approx. 5 seconds.

## ② SUPER BASS button

When this button is pressed, the bass sound will be emphasized.

## ③ Function buttons

Use to select playback source.

### [PHONO]

Press when listening to record playback on a turntable.

### [TUNER]

Press when listening to AM or FM broadcasts with a tuner.

### [LD/DVD]

Press when listening to programs from a component connected to the LD/DVD jacks.

### [CD]

Press when listening to compact disc playback with a CD player.

### [TAPE 1/VCR]

Press when listening to tape playback on cassette deck 1 or on a video cassette recorder.

## ④ TAPE 2 MONITOR button

Press when listening to tape playback and monitor the recording sound with the cassette deck 2.

## ⑤ VOLUME control

Use to adjust volume level.

## ⑥ PHONES jack

Connect the plug on your headphones to this jack. To listen to a program through the headphones, set both SPEAKERS A and B switches to the OFF position.

## ⑦ SPEAKERS ( OFF, ON) buttons

These are used to select the speaker through which you wish to listen.

**A:** When the speakers connected to the A terminals are in use.

**B:** When the speakers connected to the B terminals are in use.

• Turn both A and B speakers to the OFF position when only the headphones are in use.

### NOTE:

No sound will be heard through the speakers when both A and B buttons are pressed if only one set of speakers has been connected to either A or B SPEAKERS terminals.

## ⑧ MEMORY button

When the unit is in the frequency display mode, pressing this button will result in the memorization of the current broadcast band, reception frequency, CLASS and FM MPX mode.

## ⑨ MPX MODE selector button

Use to select the auto stereo mode or monaural mode when listening to FM broadcasts. The monaural mode has been selected when the MONO indicator is lighted.

### Auto stereo mode:

Normally leave in this mode for reception. When a stereo FM broadcast is received, it will be automatically reproduced in stereo sound.

### Monaural mode:

When receiving distant stations or stations with weak broadcast signals, the input signal may be weak, thus resulting in increased noise during FM stereo broadcasts. In this event, setting the receiver to the monaural mode will reduce the noise. In this case, however, FM stereo broadcasts will be reproduced in monaural sound.

### NOTE:

*This button has no effect on reception of AM broadcasts.*

## ⑩ Remote sensor window (SX-255R)

## ⑪ CLASS button

Use to switch between preset memory classes 1 to 3. In each class, one station can be memorized in each of the 1 to 10 stations, enabling a total of 30 stations to be memorized.

## ⑫ FM/AM selector button

This button is used to select either AM or FM reception.

## ⑬ TUNING buttons (-,+)

+: The FM or AM band is scanned in the direction of increasing frequency.

-: The opposite operation to that of the + button takes place.

## ⑭ STATION buttons (-,+)

+: Stations change in order in the upward direction.

-: Stations change in order in the downward direction.

## ⑮ BASS tone control

Use to adjust low-frequency tone. The center position is the flat (normal) position. When turned to the right, low-frequency tones are emphasized.

## ⑯ TREBLE tone control

Use to adjust high-frequency tone. The center position is the flat (normal) position. When turned to the right, high-frequency tones are emphasized.

## ⑰ BALANCE control

Should normally be left in the center position. Adjust balance if the sound is louder from one of the speakers. If the right side is louder, turn toward the L position and if the left side is louder, turn toward the R position.

## DISPLAY section
