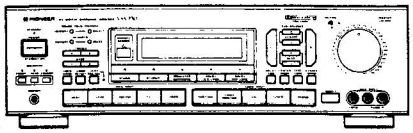
Service Manual



ORDER NO.
ARP2012

AV DIGITAL SURROUND AMPLIFIER

VSA-730

VSA – 730 HAS FOLLOWING VERSIONS :

Type	Power requirement	Export destination
HE	AC220V, 240V (switchable) *	European continent
YPW	AC240V only	Australia
SD	AC110V, 120 – 127V, 220V, 240V (switchable)	Kingdom of Saudi Arabia and General market

* Change the primary wiring of the power transformer.

●This manual is applicable to the VSA – 730/HE, YPW and SD types.
●As to the YPW and SD types, refer to page 69.
●Ce manuel pour le service comprend les explications de réglage en français.
● Este manual de servicio trata del método ajuste escrito en español.

SA-730

1. SPECIFICATIONS

Audio Section

Power output (DIN)
- SURROUND (Center OFF)
  - Front (1 kHz, 1%, 8 Ω) ..... 95 W + 95 W
- SURROUND (Center ON)
  - Front (1 kHz, 1%, 8 Ω) ..... 60 W + 60 W
  - Center (1 kHz, 1%, 8 Ω) ..... 60 W
- Rear (1 kHz, 1%, 8Ω) ..... 15 W + 15 W

Music power (1 kHz, 1%, 8 Ω)
- SURROUND (Center OFF)
  - Front ..... 160 W + 160 W
- SURROUND (Center ON)
  - Front ..... 130 W + 130 W
  - Center ..... 130 W
- Rear ..... 40 W + 40 W

Dynamic power output
- 4 Ω/8 Ω ..... 180 W/110 W

Continuous power output
- STEREO
  - Front (20 Hz to 20 kHz, 0.04%, 8 Ω) ..... 80 W + 80 W
- SURROUND (Center OFF)
  - Front (20 Hz to 20 kHz, 0.04%, 8 Ω) ..... 75 W + 75 W
- SURROUND (Center ON)
  - Front (20 Hz to 20 kHz, 0.04%, 8 Ω) ..... 50 W + 50 W
  - Center (20 Hz to 20 kHz, 0.04%, 8 Ω) ..... 50 W
- Rear (1 kHz, 5%, 8 Ω) ..... 23 W + 23 W

Signal-to-noise ratio (IHF, A network, shorted) DIRECT ON
- PHONO MM 72dB
- CD, TUNER, TAPE 1/DAT, TAPE 2, VDP/CDV, TV, VIDEO, VCR 1, VCR 2 ..... 96dB

Frequency response (DIRECT ON)
- PHONO MM, 20Hz to 20kHz ..... ± 0.3dB
- CD, TUNER, TAPE 1/DAT, TAPE 2, VDP/CDV, TV, VIDEO, VCR 1, VCR 2, 5Hz to 100kHz ..... $^{+0}_{-3}$ dB

Phono overload level
- PHONO MM 1kHz, 0.1% ..... 110 mV

Damping factor (1kHz, 6 Ω) ..... Over 100

Input (sensitivity/impedance)
- PHONO MM ..... 2.5 mV/50 kΩ
- CD, TUNER, TAPE 1/DAT, TAPE 2, VDP/CDV, TV, VIDEO, VCR 1, VCR 2 ..... 150 mV/30 kΩ
- POWER IN (Front, rear, center) ..... 1.0 V/47 kΩ

Output (level/impedance)
- TAPE 1/DAT, TAPE 2 REC OUT ..... 150 mV/2.2 kΩ
- VCR 1, VCR 2 AUDIO REC OUT ..... 150 mV/2.2 kΩ
- PRE OUT (Front, rear, center) ..... 1.0 V/2.2 kΩ

Tone control
- BASS ..... ± 8dB (100 Hz)
- TREBLE ..... ± 8dB (10 kHz)

Loudness contour ..... +6dB/+3dB (100 Hz/10 kHz)

Surround Section

Surround mode
DOLBY PRO LOGIC (NORMAL, WIDE, PHANTOM)
DOLBY 3CH LOGIC (NORMAL, WIDE, PHANTOM)
SIMULATED
STADIUM
STUDIO

Delay time
- For STADIUM, SIMULATED.. 5 mS to 35 mS (Seven 5 mS steps)
- For DOLBY PRO LOGIC ..... 15 mS to 30 mS (Four 5 mS steps)

Composite Video section

Input jacks (Sensitivity/impedance)
- VDP/CDV, TV, VIDEO, VCR 1, VCR 2 ..... 1 Vp-p/75 Ω

Output jacks (Output level/impedance)
- VCR1, VCR 2, MONITOR TV out ..... 1 Vp-p/75 Ω

Frequency response
- VDP/CDV, TV, VIDEO, VCR 1, VCR 2, 10 Hz to 10 MHz .. $^{+0}_{-3}$ dB

Signal-to-noise ratio 60dB

DG/DP ..... 3%/2 degrees

Miscellaneous

Power requirements ..... a.c. 220 Volts~, 50/60 Hz
Power consumption ..... 530 W
Dimensions ..... 420 (W) x 126 (H) x 351 (D) mm
Weight (without package) ..... 10 kg

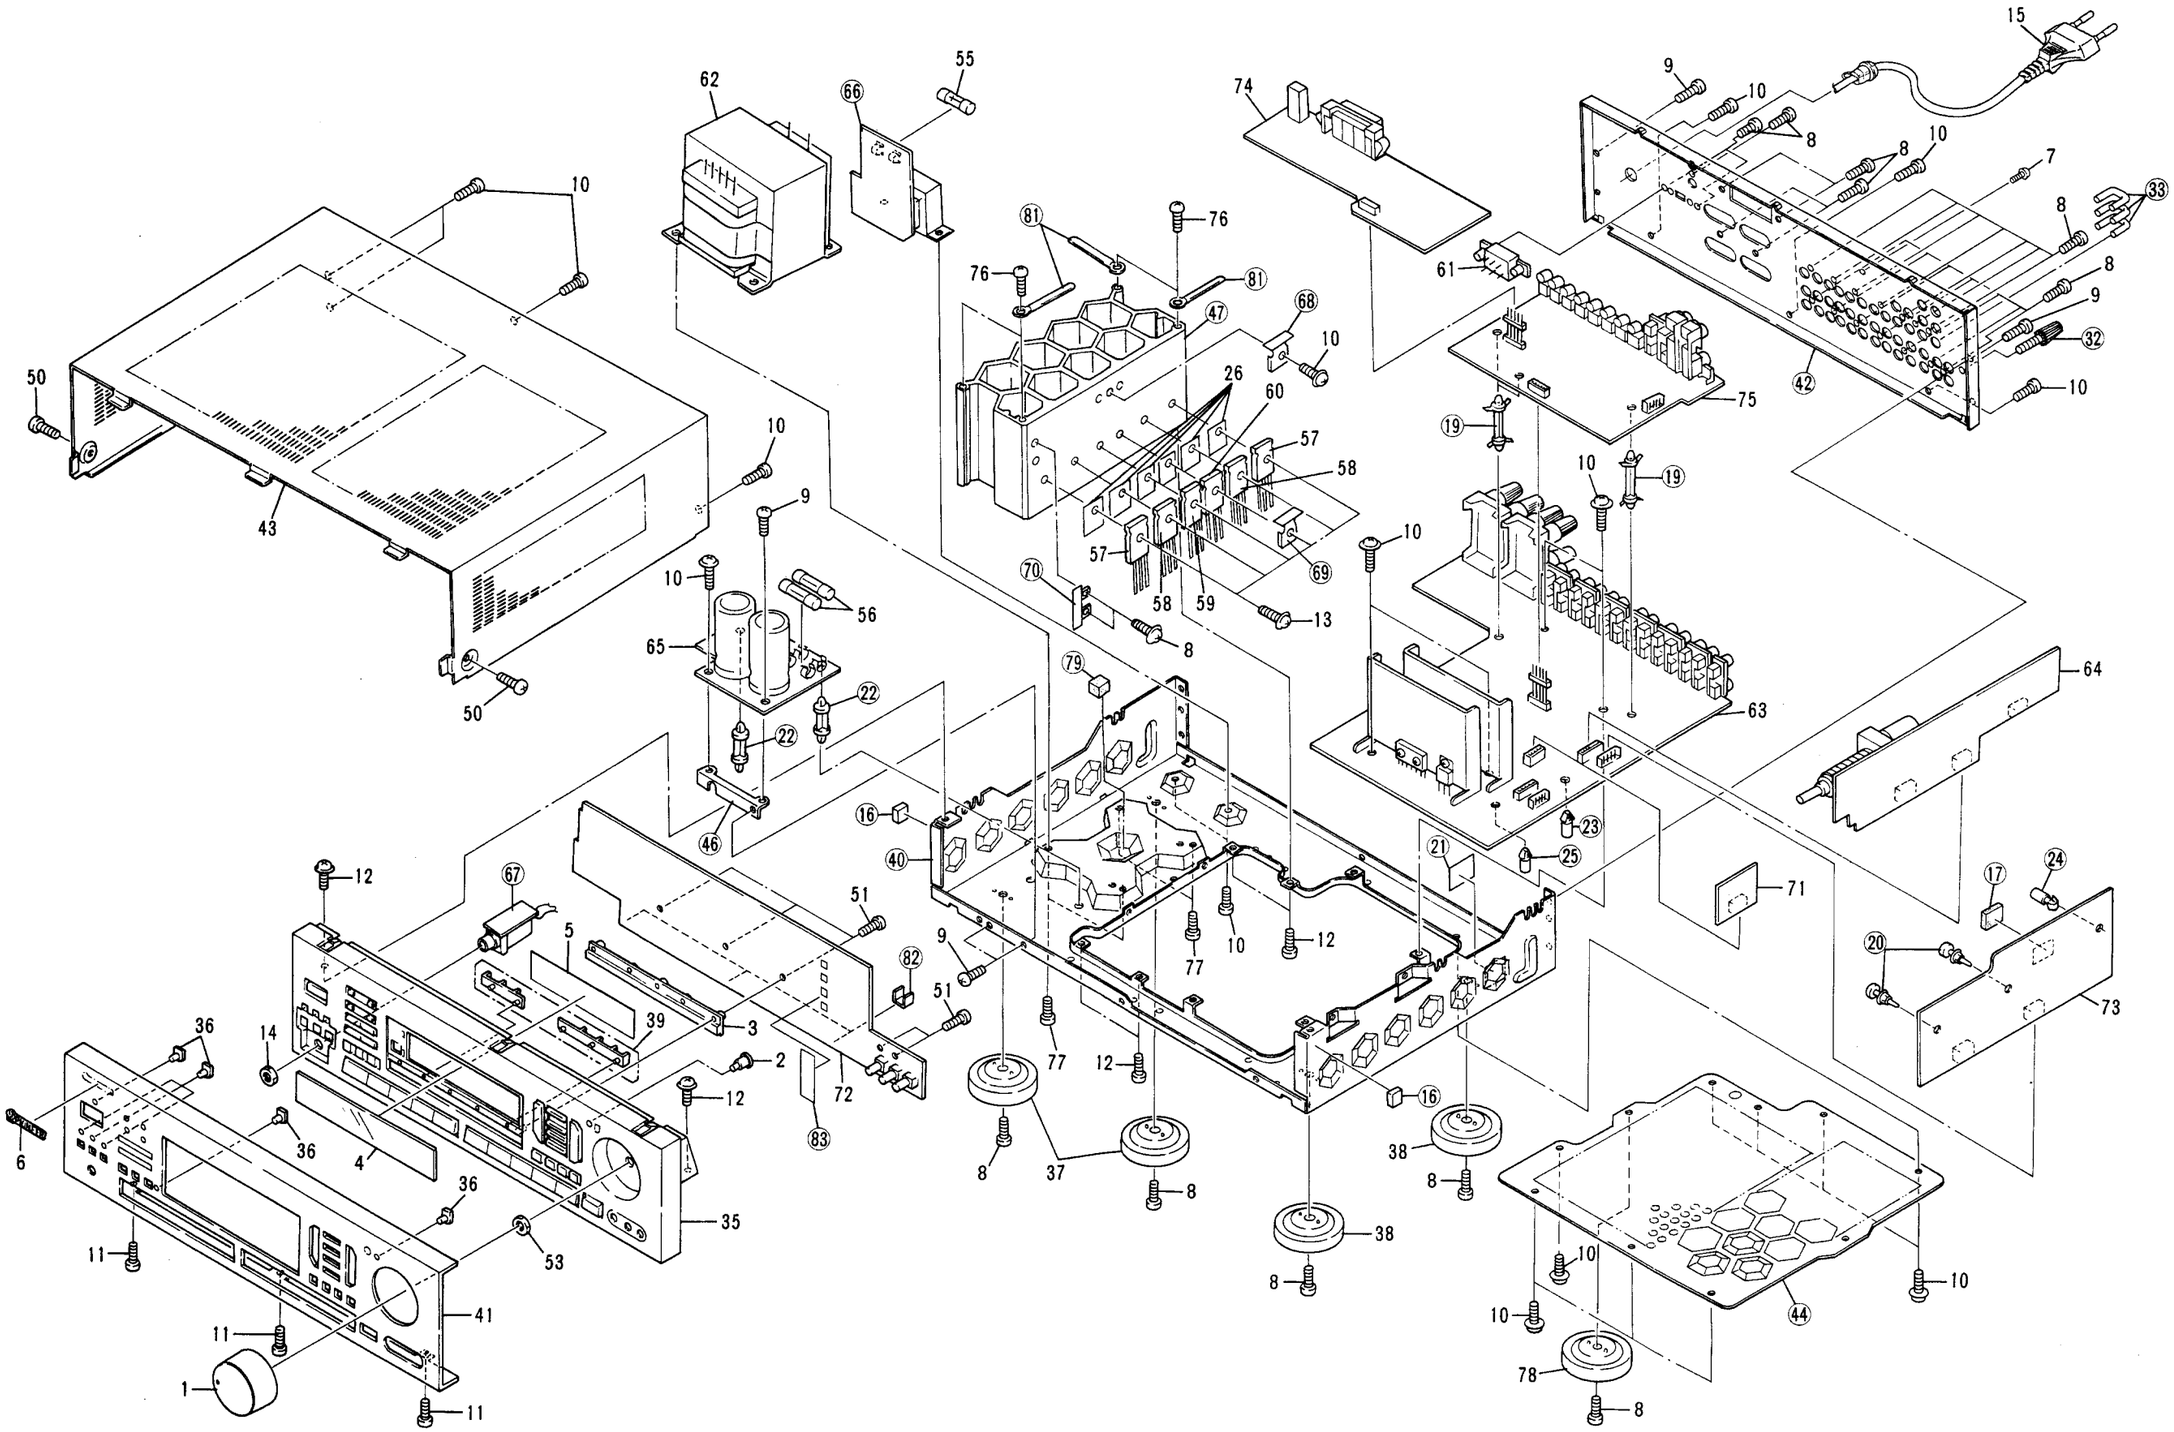
Accessories

Operating instructions 1
Remote control unit 1
Alkaline dry batteries (LR6/AM-3) 2
Templates 2
Cushion spacers (large) 2
Cushion spacers (small) 2

NOTE:
Specifications and design are subject to change without notice due to improvements.

2. EXPLODED VIEW, PACKING AND PARTS LIST

2.1 EXTERIOR



NOTES :
- Parts without part number cannot be supplied.
- The ⚠ mark found on some component parts indicates the impotance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- Parts marked by "⊙" are not always kept in stock. Their delivery time may be longer than usual or they may be unavailable.

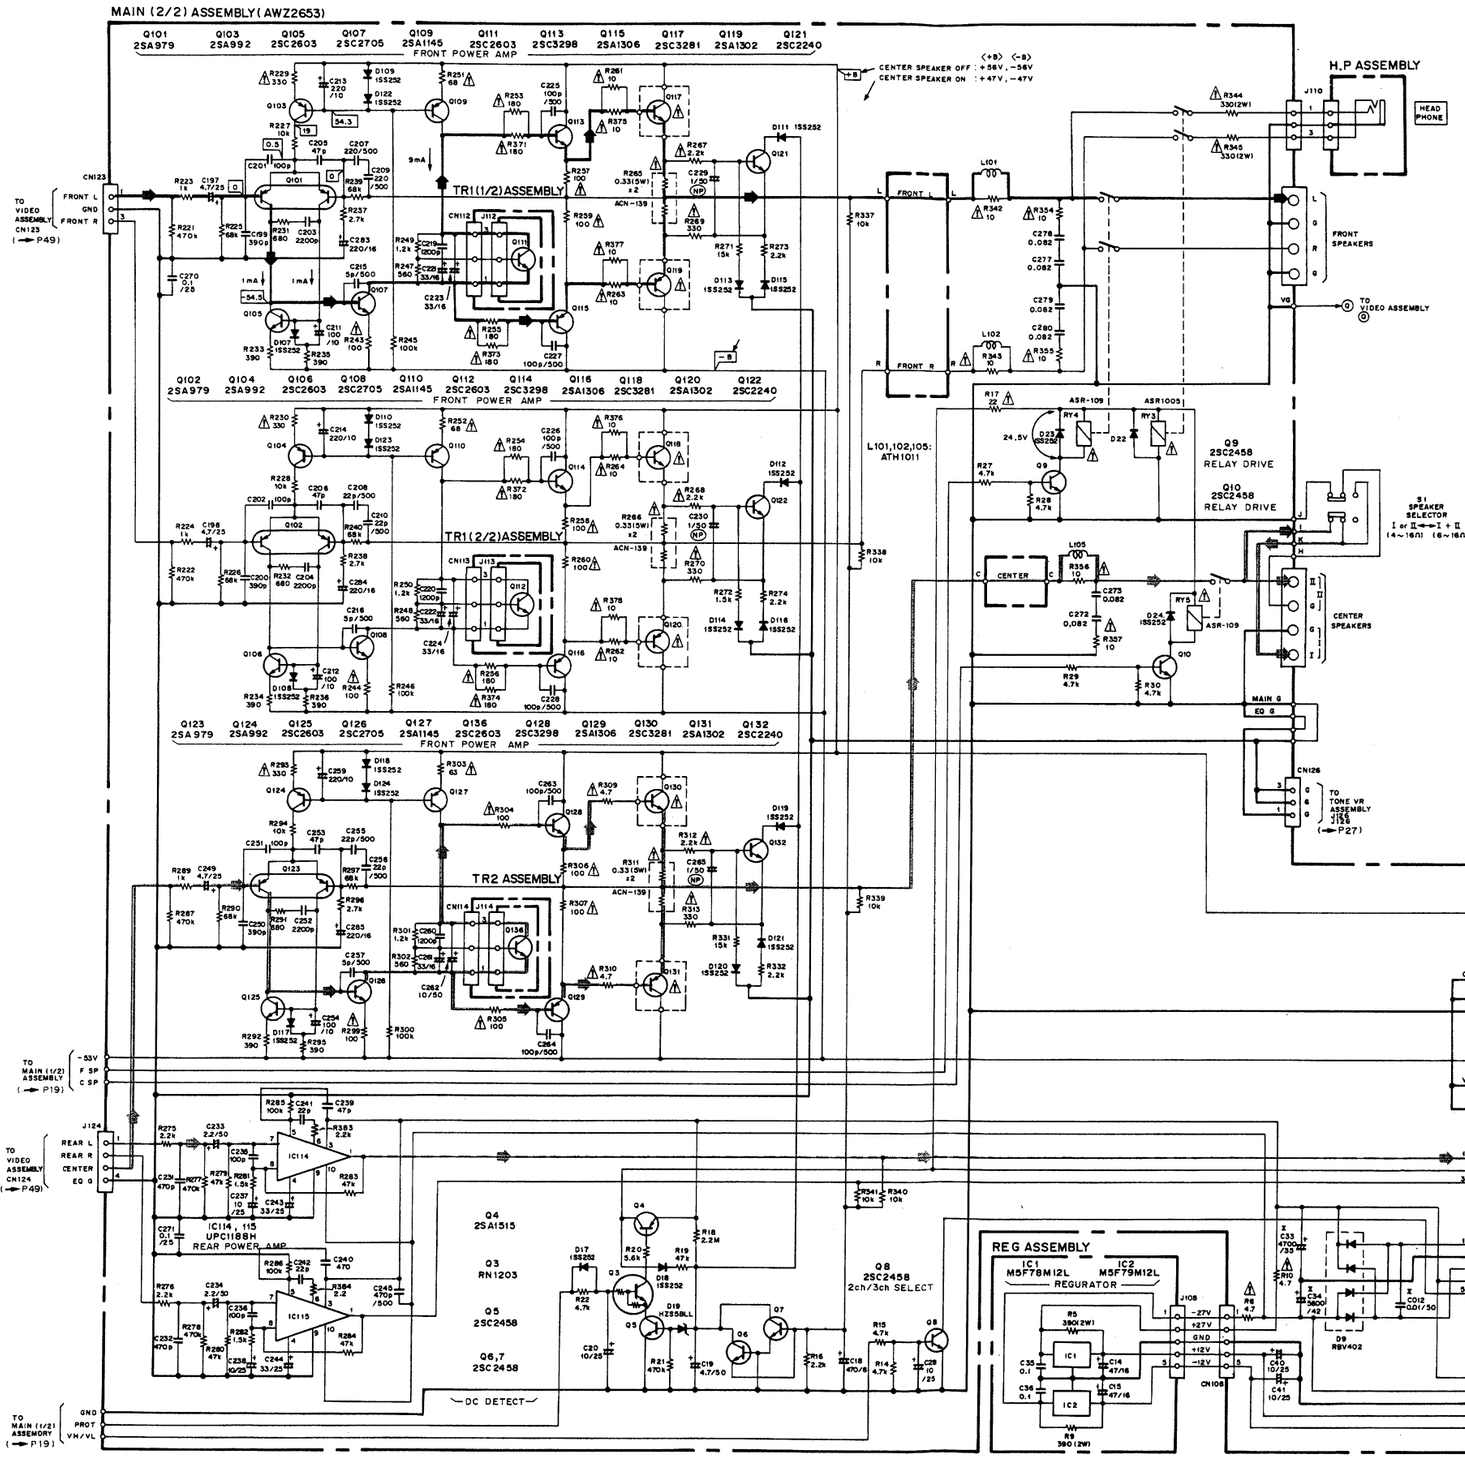
3.4 SCHEMATIC DIAGRAMS OF MAIN(2/2), P.S, S.TRANS, HP, REG, TR1 AND TR2 ASSEMBLIES



1. RESISTORS :
Indicated in Ω, 1/4W, 1/6W, 1/8W, ±5% tolerance unless otherwise noted k;kΩ, M;MΩ, (F):±1%, (G):±2%, (K):±10%, (M):±20% tolerance.
2. CAPACITORS :
Indicated in capacity (μF)/voltage (V) unless otherwise noted p;pF.
Indication without voltage is 50V except electrolytic capacitor.
3. VOLTAGE CURRENT :
V: Signal voltage at (110W+110W, 6Ω) output (1kHz).
DC voltage (V) at no input signal.
Value in ( ) is DC voltage at rated power.
⇦mA; DC current at no input signal.
4. OTHERS :
➡: Signal route.
⊘: Adjusting point.
The △ mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
※ marked capacitors and resistors have parts numbers.

Line Voltage Selection (For HE type)

Line voltage can be changed with following steps.
1. Disconnect the AC power cord.
2. Remove the Bonnet case.
3. Change the connection of the power transformer lead wire.
4. Stick the line voltage label on the rear panel.

4. P.C.B's PARTS LIST

NOTES:

- Parts without part number cannot be supplied.
- Parts marked by "⊙" are not always kept in stock. Their delivery time may be longer than usual or they may be unavailable.
- The ⚠ mark found on some component parts indicates the impotance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- When ordering resistors, first convert resistance values into code form as shown in the following examples.

Ex.1 When there are 2 effective digits (any digit apart from 0), such as 560 ohm and 47k ohm (tolerance is shown by J=5%, and K=10%)

560 Ω → 56 × 10¹ → 561 ····· RD1/4PS 5 6 1 J
47k Ω → 47 × 10³ → 473 ····· RD1/4PS 4 7 3 J
0.5 Ω → 0R5 ····· RN2H 0 R 5 K
1 Ω → 010 ····· RS1P 0 1 0 K

Ex.2 When there are 3 effective digits (such as in high precision metal film resistors).

5.62k Ω → 562 × 10¹ → 5621 ····· RN1/4SR 5 6 2 1 F

5. ADJUSTMENTS

● Preparations

1. Input the 1 kHz, 150 mV phase signal into the VDP input terminal, then set to VDP function.
2. Set the unit to the DOLBY PRO LOGIC SURROUND mode.
3. Short TP1 and TP2 inside the PRO LOGIC assembly. (Remove the short after the adjustment.)
4. Set the master control and the rear control to maximum during adjustment.

● Adjustment procedure

1. Adjust VR801 so that the REAR AMP PRE OUT left and right voltages become minimum.
2. Adjust VR802 so that the DC voltages at both sides of R860 become approx. ± 0 mV (0 ± 50 mV).
3. Repeat procedures 1 and 2 above until optimum is obtained.

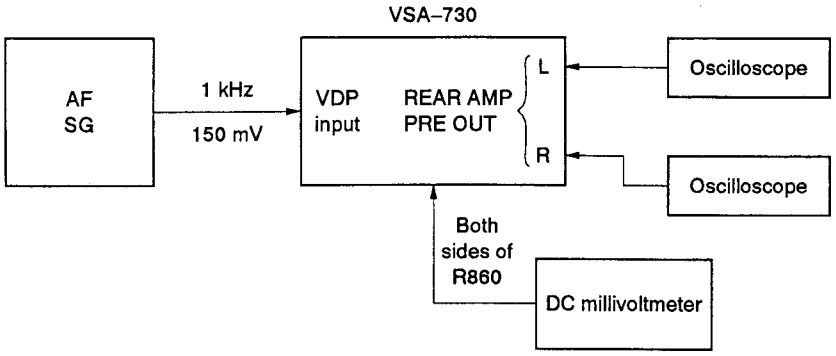

Fig. 5-1. Connections

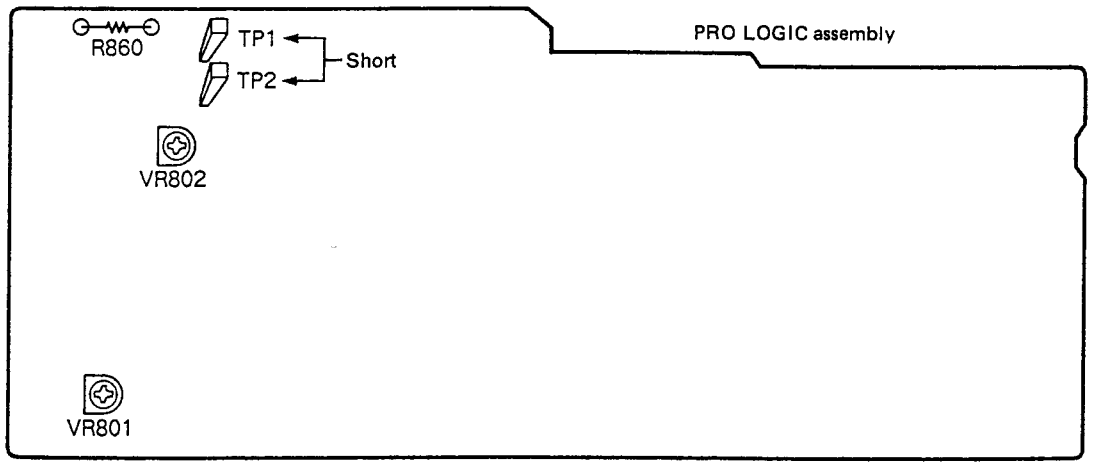

Fig. 5-2. Adjustment

5. RÉGLAGES

● Préparations

1. Entrer le signal de phase de 1 kHz, 150 mV dans la borne d'entrée du lecteur de vidéo disc VD, puis régler sur la fonction VDP.
2. Régler l'unité sur le mode DOLBY PRO LOGIC SURROUND.
3. Court-circuiter TP1 et TP2 à l'ensemble PRO LOGIC. (Décourt-circuiter apres le réglage).
4. Durant le réglage, mettre le volume principal et le volume arrière au maximum.

● Procédure de réglage

1. Régler VR801 afin que les tensions gauche et droite de sortie du préamplificateur arrière REAR AMP PRE OUT viennent au minimum.
2. Régler VR802 afin que les tensions CC aux deux cotes de R860 deviennent approx. ± 0 mV (0 ± 50 mV).
3. Répéter les procédures 1 et 2 ci-dessus jusqu'a l'obtention du réglage optimal.

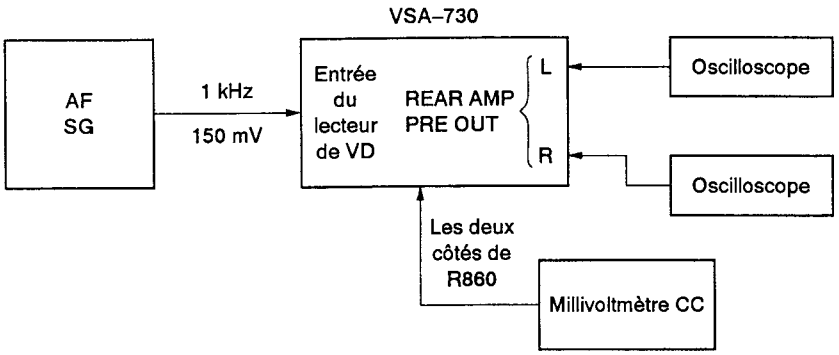

Fig. 5-1. Connexions

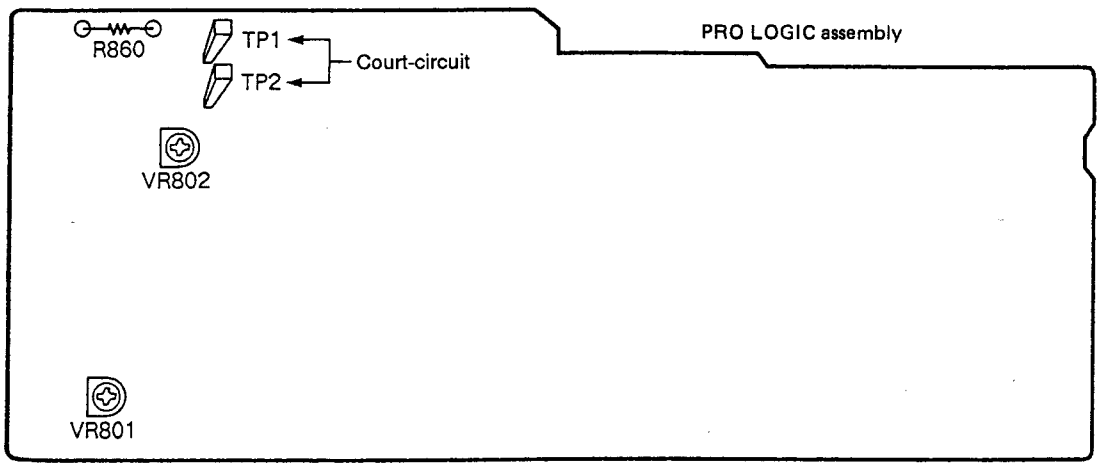

Fig. 5-2. Réglage

5. AJUSTES

● Preparaciones

1. Ingrese la señal de fase de 1 kHz y 150 mV por el terminal de entrada de VDP, y active la función VDP.
2. Ponga la unidad en el modo DOLBY PRO LOGIC SURROUND.
3. Ponga TP1 y TP2 en cortocircuito dentro del conjunto PRO LOGIC (desconéctelos después del ajuste).
4. Antes de comenzar el ajuste, coloque el control principal de volumen y el control trasero en màximo.

● Procedimiento de ajuste

1. Ajuste VR801 de modo que las tensiones en los terminales REAR AMP PRE OUT derecho e izquierdo sean mínimas.
2. Ajuste VR802 de modo que la tensión de DC a ambos lados de R860 sea 0 mV ± 50 mV.
3. Repita los pasos 1 y 2 hasta obtener el ajuste óptimo.

7.4 ELECTRICAL PARTS LIST

NOTES :

- Parts without part number cannot be supplied.
- Parts marked by "⊙" are not always kept in stock. Their delivery time may be longer than usual or they may be unavailable.
- The ⚠ mark found on some component parts indicates the impotance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- When ordering resistors, first convert resistance values into code form as shown in the following examples.

Ex.1 When there are 2 effective digits (any digit apart from 0), such as 560 ohm and 47k ohm (tolerance is shown by J=5%, and K=10%).

560 Ω	56×10^{1}	561	RD1/4PS 5 6 1 J
47k Ω	47×10^{3}	473	RD1/4PS 4 7 3 J
0.5 Ω	0R5		RN2H 0 R 5 K
1 Ω	010		RS1P 0 1 0 K

Ex.2 When there are 3 effective digits (such as in high precision metal film resistors).

5.62k Ω	562×10^{1}	5621	RN1/4SR 5 6 2 1 F

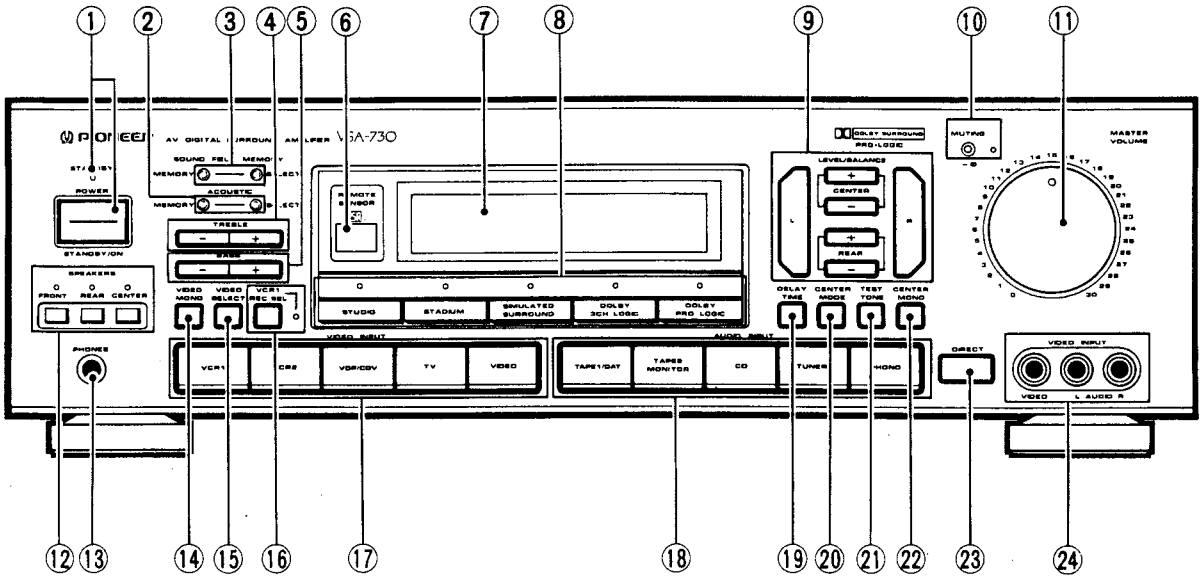
	Operating instructions (English)	.....	ARB1243	ARB1243	

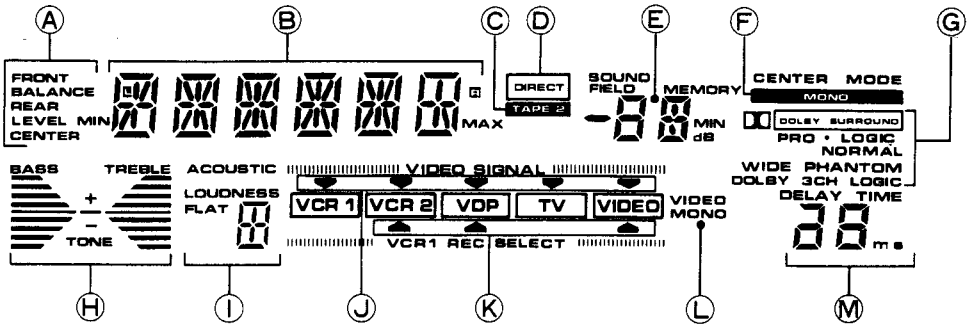
*1 ; S. TRANS assembly (SD type) and S. TRANS assembly (HE type) are different in jumper wires, fuse holders and terminals only. All the supplied parts for servicing are the same.
And S. TRANS assembly (HE type) and S. TRANS assembly (YPW type) are the same.

9. PANEL FACILITIES

FRONT PANEL FACILITIES



Display section



① POWER STANDBY/ON switch/indicator

This is the switch for electric power.

ON: When set to the ON position, power is supplied and the unit becomes operational.
The STANDBY indicator is off.

STANDBY: When set to the STANDBY position, the main power flow is cut and the unit is no longer fully operational. A minute flow of power feeds the unit to maintain operation readiness.
When the STANDBY indicator lights, the unit is in STANDBY.

② ACOUSTIC switches (MEMORY, SELECT)

Five types of tone (bass and treble) control settings can be preset.

MEMORY:
Press this switch to store in memory.

SELECT:
Tone setting changes as follows when pressing this switch repeatedly:

FLAT:
Flat tone characteristics.

LOUDNESS:
Low and high frequencies are emphasized. Use this setting to obtain a full-bodied sound when listening.

Presetting the acoustic memory

1. **Adjust the sound quality as desired using the BASS and TREBLE control switches.**
2. **Press the MEMORY switch.**
3. **Press the SELECT switch and select the sign to which you wish to assign the setting (A – E) while the indicator flashes.**
   - When the indicator lights after flashing, it indicates that the command has been stored in memory. If you don't select memory positions (A – E) while the ACOUSTIC indicator is flashing, nothing will be stored in memory.
   - In this way, the desired tone will be preset in one of the five acoustic memory positions. To preset four other desired tone settings, perform the same operations.
   - To recall the memorized tone settings, press the SELECT switch to select the desired memory position.

NOTE:
- *Even if the power switch is in the STANDBY position, provided the power cord is plugged into an AC wall socket, memory will not be erased. Even if the power cord is disconnected, memory will remain for about 2 weeks.*
- *If the memory is erased, program the presets once more.*

③ SOUND FIELD MEMORY switches (MEMORY, SELECT)

In the SOUND FIELD MEMORY:
- SURROUND MODE
- CENTER MODE (In the case of DOLBY PRO LOGIC SURROUND and DOLBY 3 CH LOGIC. In other cases the center mono out ON/OFF)
- FRONT balance
- CENTER volume level
- REAR balance
- DELAY TIME
- REAR volume level
- ACOUSTIC MEMORY

Up to five of these positions can be stored in memory. It is also possible to select positions previously stored in the memory ("P" is displayed)

[Contents of "P"]
- SURROUND MODE: DOLBY PRO LOGIC SURROUND
- CENTER MODE: NORMAL
- DELAY TIME: 20 ms
- FRONT, REAR balance: CENTER
- REAR, CENTER volume level: both −12 dB
- ACOUSTIC: FLAT

How to use the sound field memory

1. **Select ACOUSTIC MEMORY, SURROUND MODE, and adjust the DELAY TIME, balance and volume level.**
2. **Press the MEMORY switch.**
3. **While the SOUND FIELD MEMORY indicator is flashing, use the SELECT switch to select the position (A—E) to be memorized.**
   - A position is memorized when the SOUND FIELD MEMORY indicator stops flashing and lights. If the position to be memorized (A—E) is not selected while the indicator is flashing, it will not be memorized.
   - TONE settings not stored in ACOUSTIC MEMORY will not be memorized.
   - One of the five possible positions has now been stored in memory. The four remaining positions can be stored in memory using the same procedure.
   - When recalling the contents of the memory, select the memorized position with the SELECT switch.
   - In "P" nothing can be memorized.

④ TREBLE control switches

Use to adjust the high-frequency level. Press the + switch to increase high-frequency level, and the − switch to decrease it.
When both sides (+, −) of the TREBLE control are pressed simultaneously, the treble response will be set to the flat (normal) condition.

⑤ BASS control switches

Use to adjust the low-frequency level. Press the + switch to increase low-frequency level, and the − switch to decrease it.
When both sides (+, −) of the BASS control are pressed simultaneously, the base response will be set to the flat (normal) condition.

NOTE:
- *Sound quality adjustment can only be performed on the front channels. There is no change on the center channel and rear channels.*
- *Adjustment of treble and bass is not possible when the DIRECT switch is ON.*

⑥ REMOTE SENSOR

⑦ Display section

Ⓐ This lights when the front and rear balance and the rear and center volume levels are being adjusted.
During volume adjustment, Ⓑ and Ⓔ display the level, and during balance adjustment, Ⓑ displays the balance.
Ⓑ This gives alphanumeric display of the component selected by the INPUT SELECTOR.
When adjusting front and rear balance and volume or center volume, this displays balance and volume level.
It also gives alphanumeric display of SLEEP when the sleep timer is operating, and alphanumeric display of TEST when the test tone is ON.
Ⓒ This lights when the TAPE 2 MONITOR is ON.
Ⓓ This lights when the DIRECT switch is ON.

Ⓔ Displays the SOUND FIELD MEMORY selection.
During center or rear volume level adjustment, the volume level is displayed.
The time remaining when the SLEEP TIMER is operating is also displayed.
Ⓕ In any mode other than DOLBY PRO LOGIC SURROUND and DOLBY 3 CH LOGIC, if the CENTER MONO switch is pressed, this lights.
Ⓖ Displays the CENTER MODE of the DOLBY PRO LOGIC SURROUND and DOLBY 3 CH LOGIC.
Ⓗ Displays the TREBLE and BASS adjustment settings.
Ⓘ Displays the selected ACOUSTIC MEMORY.
Ⓙ Displays the currently selected video signal.
It also displays the video functions. If the VIDEO SELECT switch is pressed it changes.
Ⓚ Displays the component selected by the VCR 1 REC SEL (A component that can record to VCR 1).
Ⓛ This lights when the VIDEO MONO switch is ON.
Ⓜ Displays the selected DELAY TIME.

⑧ SURROUND MODE switches

Select surround mode to match program source.
STUDIO:
Enjoy the atmosphere of listening to music in a recording studio.
STADIUM:
Ideal for sports broadcasts, etc.
SIMULATED SURROUND:
Gives concert-hall presence to monaural sound (AM, TV, etc.).
DOLBY 3 CH LOGIC:
For playback from a stereo source, or when playing video or audio software bearing the DOLBY SURROUND mark without rear speakers connected, you can enjoy spacious sound field through the front L, front R, and center speakers.

DOLBY PRO LOGIC SURROUND:
Select this setting when watching video tapes or video disc player bearing the DOLBY SURROUND mark.
Press the mode switch that corresponds to the lit indicator once more to switch the surround mode OFF.

⑨ LEVEL/BALANCE adjustment switch

Use this to adjust the center and rear levels when you are in the surround mode, and the center level when center mono out is ON. Press the + side to raise the level, and the − side to decrease the level.
If you press both the + and − side at once, you will return to the initial level setting of −12dB. Rear level adjustment is not possible when the surround mode is OFF.
Adjust the front left and right balance with the L and R switches.

L ..... Press to adjust the left level.
R ..... Press to adjust the right level.
L, R ..... Press both at the same time to return to the center.

⑩ MUTING switch

Press to stop sound temporarily, and the indicator flashes. Press again to return to previous volume level.

⑪ MASTER VOLUME control knob

Use this adjust volume level.
Front and rear volume levels change at the same time.

⑫ SPEAKERS switches/indicators

ON/OFF switches for the speaker systems. An indicator lights when any of these switches is set to ON.
FRONT:
Switches and indicates for the front speaker systems.
REAR:
Switches and indicates for the rear speaker systems.
CENTER:
Switches and indicates for the front center channel speaker system.

⑬ PHONES jack

Connect the plug on your headphones to this jack. To listen to a program through the headphones, set all SPEAKERS switches to the OFF position.

⑭ VIDEO MONO switch

If you set this switch to ON, the sound from a video source connected to the VIDEO INPUT jack on the front panel ㉔ will be monaural. (VIDEO MONO on the display will light). If you connect a component with a monaural output to the L or R input jack, the sound will be the same from both left and right speakers when this switch is set to ON.

⑮ VIDEO SELECT switch

Press this to switch VIDEO OUT (TO MONITOR TV) and VCR OUT in the following sequence: (Audio doesn't change)
The recording selector has priority for VCR 1 video recording.

The display indicator (▼) lights to show the selected item.

⑯ VCR 1 REC SEL switch/indicator

Press this switch to change the source from which the VCR 1 will record in the following order.

The display indicator (▲) lights to show this.
OFF: The output signal is the same as the monitor output.

⑰ VIDEO INPUT selector switches

VCR 1:
Press this switch when playing back a tape in the video cassette recorder connected to the VCR 1 jacks.
VCR 2:
Press this switch when playing back a tape in the video cassette recorder connected to the VCR 2 jacks.
VDP/CDV:
Press to watch a program from a video disc player, CD CDV LD player connected to the VDP/CDV jacks.
TV:
Press to watch TV programs (reception with a TV tuner connected to the TV jacks).
VIDEO:
Press this when playing from equipment (video camera etc.) connected to VIDEO INPUT jack on the front panel.

⑱ AUDIO INPUT selector switches

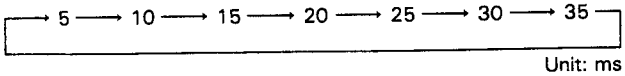
TAPE 1/DAT:
Press to listen to the device connected to the TAPE 1/DAT input.
TAPE 2 MONITOR:
Press to listen to playback sound of cassette deck connected to TAPE 2 input.
CD:
Press to listen to compact discs played on CD player connected to the CD input.

TUNER:
Press to listen to FM or AM broadcasts from tuner connected to TUNER input.
PHONO:
Press to listen to records played on turntable connected to the PHONO input.

NOTE:
If the TAPE 2 MONITOR switch is ON, sound will only be heard from components connected to TAPE 2 jacks.

⑲ DELAY TIME switch

• STADIUM, SIMULATED SURROUND:
Switched the surround delay time in seven steps.



Unit: ms

• DOLBY PRO LOGIC SURROUND:
Switches the surround delay time in four steps.

Unit: ms

This does not operate when the surround mode is off or when STUDIO or DOLBY 3 CH LOGIC is used.

⑳ CENTER MODE switch

Selects the DOLBY PRO LOGIC SURROUND and DOLBY 3 CH LOGIC CENTER MODE (OFF, NORMAL, WIDE, PHANTOM) setting. This can only be performed when the DOLBY PRO LOGIC SURROUND or DOLBY 3 CH LOGIC is ON.

㉑ TEST TONE switch

This only operates when DOLBY PRO LOGIC SURROUND or DOLBY 3 CH LOGIC is used.
This switches the TEST TONE output ON/OFF to adjust the surround balance.
In the ON position the TEST TONE passes from the front left → center → front right → rear (L, R) (DOLBY PRO LOGIC) in that order, and can be heard for approximately 2 seconds from each speaker.

㉒ CENTER MONO OUT switch

This switches monaural (L + R) center speaker output on and off. (This switch cannot be used with DOLBY PRO LOGIC SURROUND and DOLBY 3 CH LOGIC)

NOTE:
Tone control doesn't operate with center speaker output.

㉓ DIRECT switch

Press this to listen to source sound without passing the audio signal through sound quality or balance adjusting circuitry.
To provide a better sound from the front speakers, the surround mode, center mono, and rear and center speakers are automatically switched OFF.
When DIRECT is ON, if you press the surround operation buttons ⑲, ⑳, ㉑, acoustic operation buttons ②, ④, ⑤, sound field memory operation buttons ③, ⑨, ㉒, or rear and center speaker switches, the DIRECT indicator flashes to warn you that they will not operate.

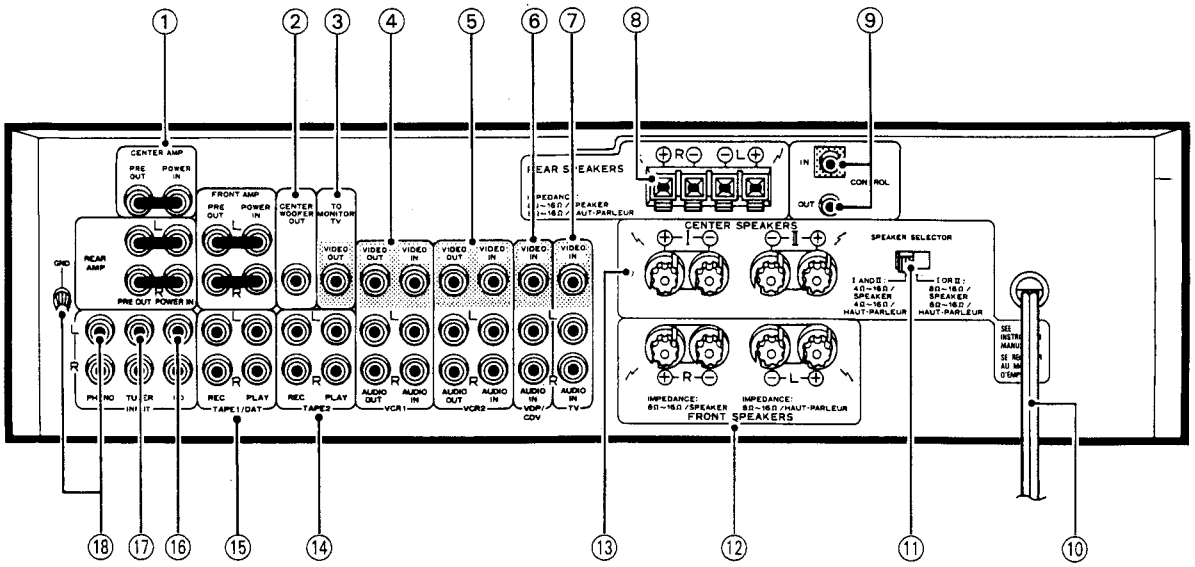
㉔ VIDEO INPUT jacks

Video components such as a video camera can be connected here.

• Last Memory Function

If you press the POWER switch after power has been cut, all settings other than MASTER VOLUME will be the same as before the power was cut.

REAR PANEL FACILITIES



① PRE OUT, POWER IN jacks

REAR AMP PRE OUT
CENTER AMP PRE OUT
FRONT AMP PRE OUT
When using a power amplifier to boost the volume of front, rear or center speakers, connect here.

REAR AMP POWER IN
CENTER AMP POWER IN
FRONT AMP POWER IN
When a preamplifier (optional) is used with the VSA-730 power amplifier to drive the front, rear or center speakers, use these jacks.
First switch the preamplifier power ON, and then switch the VSA-730 power ON.

NOTE:
When not using, be sure to connect the PRE OUT and the POWER IN with a connector bar.

② CENTER WOOFER OUT jack

If you want to boost the surround center channel low frequencies, or you want to use the unit in a 3D system, connect to a center woofer power amp.
Frequencies above about 200Hz are cut at 6dB/oct.

③ TO MONITOR TV jack

Connect to monitor TV or to TV set with video input jack.

④ VCR 1 IN/OUT jacks

For connection of first VCR.
VIDEO OUT:
Connect to VCR video input jack.
VIDEO IN:
Connect to VCR video output jack.
AUDIO OUT:
Connect to VCR audio input jacks.
AUDIO IN:
Connect to VCR audio output jacks.

⑤ VCR 2 IN/OUT jacks

⑥ VDP/CDV input jacks

Connect to videodisc (LD) player or CD CDV LD player output jacks (audio and video).

⑦ TV jacks

Use these jacks if wish to connect a TV tuner having both video and audio outputs.

⑧ REAR SPEAKERS terminals

Connect the surround rear speakers to these terminals.
Speaker impedance
Connect speaker systems with a nominal impedance of between 8 Ω and 16 Ω.

⑨ CONTROL IN/OUT jacks

These jacks for input/output of control signals when operating other components with the attached remote control unit.

⑩ Power cord

Connect this to the AC wall socket.

⑪ SPEAKER SELECTOR (CENTER) switch

This lets you switch speaker impedance to the correct setting for one center speaker or two.
With just one speaker connected:
Be sure to set the switch to "I OR II" (right side), and use an 8 to 16 Ω speaker.
With two speakers connected:
Be sure to set the switch to "I AND II" (left side), and use 4 to 16 Ω speakers.

NOTE:
Select the impedance switch setting when the main unit's power is in standby. Don't switch impedance when the power is ON.

If you connect a speaker to either I or II, and set the speaker selector switch to the "I AND II" position, there will be no sound.

⑫ FRONT SPEAKERS terminals

Connect the front speakers to these terminals.
Speaker impedance:
Connect speaker systems with a nominal impedance of between 8 Ω and 16 Ω.

⑬ CENTER SPEAKERS terminals

Connecting the surround center channel speaker system(s).
You can connect two speakers for dual center, so you can locate speakers on both sides of the TV.
When the speaker selector is in the "I OR II" position, use a speaker with an impedance of 8 to 16 Ω. If the speaker selector is in the "I AND II" position, use speakers with an impedance of 4 to 16 Ω.

⑭ TAPE 2 REC/PLAY jacks

REC:
Connect to recording input jacks of second cassette deck.
PLAY:
Connect to playback jacks of second cassette deck.

⑮ TAPE 1/DAT REC/PLAY jacks

REC:
Connect to recording input jacks of cassette deck or digital audio tape deck.
PLAY:
Connect to playback jacks of cassette deck or digital audio tape deck.

NOTE:
When using digital audio tape deck, connect its analog input/output terminals.

⑯ CD input jacks

Connect to the output jacks of a compact disc player.

⑰ TUNER input jacks

Connect to the output jacks of an FM/AM tuner.

⑱ PHONO input jacks/GND terminal

Connect here the output of a turntable. Connect the ground cable to the GND terminal.
Use a moving magnetic (MM) cartridge for the turntable.
