8. FL INFORMATION	44
9. DISASSEMBLY	45
10. PANEL FACILITIES	47
11. SPECIFICATIONS	51

1. SAFETY INFORMATION

This service manual is intended for qualified service technicians; it is not meant for the casual do-it-yourselfer. Qualified technicians have the necessary test equipment and tools, and have been trained to properly and safely repair complex products such as those covered by this manual. Improperly performed repairs can adversely affect the safety and reliability of the product and may void the warranty. If you are not qualified to perform the repair of this product properly and safely, you should not risk trying to do so and refer the repair to a qualified service technician.

WARNING

Lead in solder used in this product is listed by the California Health and Welfare agency as a known reproductive toxicant which may cause birth defects or other reproductive harm (California Health & Safety Code, Section 25249.5). When servicing or handling circuit boards and other components which contain lead in solder, avoid unprotected skin contact with the solder. Also, when soldering do not inhale any smoke or fumes produced.

NOTICE

(FOR CANADIAN MODEL ONLY)

Fuse symbols  (fast operating fuse) and/or  (slow operating fuse) on PCB indicate that replacement parts must be of identical designation.

REMARQUE

(POUR MODÈLE CANADIEN SEULEMENT)

Les symboles de fusible  (fusible de type rapide) et/ou  (fusible de type lent) sur CCI indiquent que les pièces de remplacement doivent avoir la même désignation.

(FOR USA MODEL ONLY)

1. SAFETY PRECAUTIONS

The following check should be performed for the continued protection of the customer and service technician.

LEAKAGE CURRENT CHECK

Measure leakage current to a known earth ground (water pipe, conduit, etc.) by connecting a leakage current tester such as Simpson Model 229-2 or equivalent between the earth ground and all exposed metal parts of the appliance (input/output terminals, screwheads, metal overlays, control shaft, etc.). Plug the AC line cord of the appliance directly into a 120V AC 60Hz outlet and turn the AC power switch on. Any current measured must not exceed 0.5mA.

AC Leakage Test

ANY MEASUREMENTS NOT WITHIN THE LIMITS OUTLINED ABOVE ARE INDICATIVE OF A POTENTIAL SHOCK HAZARD AND MUST BE CORRECTED BEFORE RETURNING THE APPLIANCE TO THE CUSTOMER.

2. PRODUCT SAFETY NOTICE

Many electrical and mechanical parts in the appliance have special safety related characteristics. These are often not evident from visual inspection nor the protection afforded by them necessarily can be obtained by using replacement components rated for voltage, wattage, etc. Replacement parts which have these special safety characteristics are identified in this Service Manual.

Electrical components having such features are identified by marking with a Δ on the schematics and on the parts list in this Service Manual. The use of a substitute replacement component which does not have the same safety characteristics as the PIONEER recommended replacement one, shown in the parts list in this Service Manual, may create shock, fire, or other hazards.

Product Safety is continuously under review and new instructions are issued from time to time. For the latest information, always consult the current PIONEER Service Manual. A subscription to, or additional copies of, PIONEER Service Manual may be obtained at a nominal charge from PIONEER.

2. EXPLODED VIEWS, PACKING AND PARTS LIST

NOTES:

- Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.
- The Δ mark found on some component parts indicates the importance of the safety factor of the parts. Therefore, when replacing, be sure to use parts of identical designation.
- Parts marked by "⊙" are not always kept in stock. Their delivery time may be longer than usual or they may be unavailable.

2.1 PACKING

■ CONTRAST OF VSX-405/KUXJ, KCXJ, VSX-305/KUXJ AND KCXJ

VSX-405/KUXJ, KCXJ, VSX-305/KUXJ and KCXJ have the same construction except for the following:

4. SCHEMATIC AND PCB CONNECTION DIAGRAMS

4.1 OVERALL SCHEMATIC DIAGRAM

SCH-1

NOTE FOR SCHEMATIC DIAGRAMS (Type 1A)

- When ordering service parts, be sure to refer to "PARTS LIST of EXPLODED VIEWS" or "PCB PARTS LIST".
- Since these are basic circuits, some parts of them or the values of some components may be changed for improvement.
- RESISTORS:**
Unit: k: kΩ, M: MΩ, or Ω unless otherwise noted.
Rated power: 1/4W, 1/6W, 1/8W, 1/10W unless otherwise noted.
Tolerance: (F): ±1%, (G): ±2%, (K): ±10%, (M): ±20% or ±5% unless otherwise noted.
- CAPACITORS:**
Unit: p: pF or μF unless otherwise noted.
Ratings: capacitor (μF)/ voltage (V) unless otherwise noted.
Rated voltage: 50V except for electrolytic capacitors.
- COILS:**
Unit: m: mH or μH unless otherwise noted.
- VOLTAGE AND CURRENT:**

	: Signal voltage at rated output
	or - V :
	DC voltage (V) at no input signal unless otherwise noted.
	Value in () is DC voltage at rated power.
	or - mA :
	DC current at no input signal unless otherwise noted
- OTHERS:**
 - ⊙ or ○ : Adjusting point.
 - : Measurement point.
 - △ : The mark found on some component parts indicates the importance of the safety factor of the parts. Therefore, when replacing, be sure to use parts of identical designation.
- SCH-□ ON THE SCHEMATIC DIAGRAM.**
 - SCH-□ indicates the drawing number of the schematic diagram. (SCH stands for schematic diagram.)
- SWITCHES (Underline indicates switch position):**

6. ADJUSTMENTS

ADJUSTMENT OF FM TUNER SECTION

- Set the FM/AM selector to FM BAND.
- Connect the wiring as shown in Fig. 1-1.

Step No.	Adjustment Title	FM SG (1kHz, ± 75 kHz dev.)		Reception Frequency Display	Adjustment Location	Specifications
		Frequency (MHz)	Level (dB μ V)			
1	Center Adjustment	98	60	98.0 MHz	L151	Adjust so that the DC voltage of R151's both ends becomes $0V \pm 50mV$. 
2	Front-end Sensitivity Check	98	Less than 10	98.0 MHz	—	Less than 10 dB μ V.
3	Stereo Distortion Check	89	60	89.0 MHz	T101	Less than 2%. Check that it becomes within the standard by turning the IFT T101 in the FM/AM TUNER FE MODULE less than $\pm 90^\circ$ in case out of standard.
4	Stereo Separation Check	89	60	89.0 MHz	—	Less than 23 dB. In case out of standard, cut the R157.
5	TUNED IND. Lighting Level	98	18 (± 3 dB)	98.0 MHz	VR151	18 dB μ V ± 3 dB. Adjust so that the indicator of TUNED IND. starts to light up.

Note:

- Make indicator adjustments in order of AM \rightarrow FM.

ADJUSTMENT OF MW TUNER SECTION

- Set the FM/AM selector to AM (MW) BAND.
- Connect the wiring as shown in Fig. 1-1.

Step No.	Adjustment Title	AM SG (400Hz, 30% Mod.)		Reception Frequency Display	Adjustment Location	Specifications
		Frequency (kHz)	Level (dB μ V/m)			
1	TUNED IND. Lighting Level Check	999*1	Less than 65	999 kHz*1	—	Less than 65 dB μ V/m. In case out of standard, cut the R164.

*1: For the area using 10 kHz step, frequencies should be 1000 kHz.

Fig. 1-1. AM and FM Adjustment Wiring Diagram

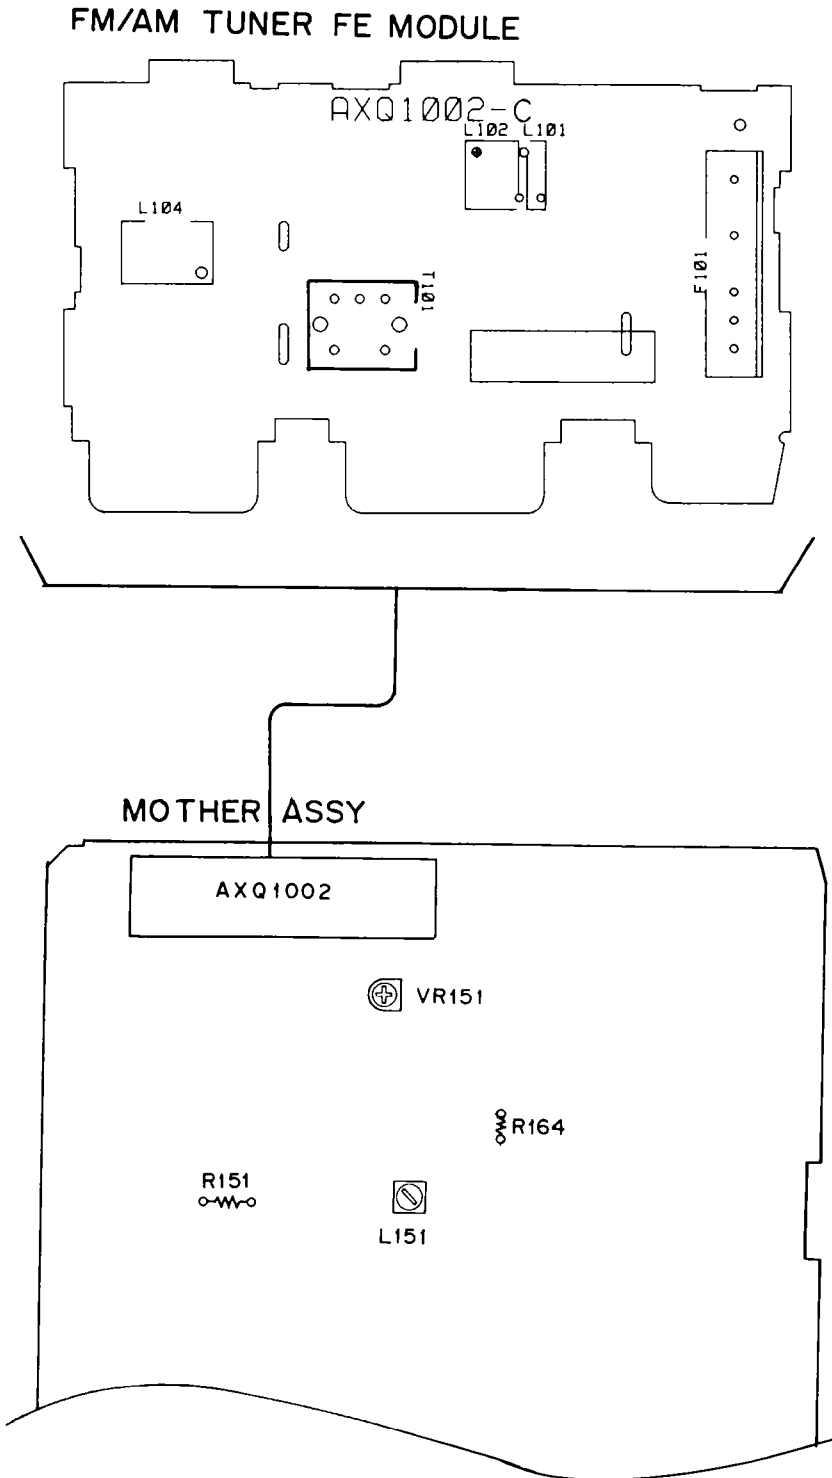

Fig. 1-2. Adjustment Points

9. DISASSEMBLY

CAUTION !

You will get an electric shock if you touch the Radiator (Heat-sink) when the power cord is connected to the power source. Also, the Electrolytic Capacitor contains a charge even when the power cord is unplugged, so the charge must be removed when the bonnet has been taken off.

< Removing the Charge >

- ① Connect the Radiator (top side) and either the Chassis or the Rear panel for 2 to 3 seconds with a Resistor of more than 5W/10Ω.
- ② Connect the +B lead on the J2 and either the Chassis or the Rear panel for 2 to 3 seconds with a Resistor of more than 5W/10Ω.

10. PANEL FACILITIES

FRONT PANEL FACILITIES

● Illustration shows model VSX-405.

1 POWER STANDBY/ON switch **STANDBY** indicator

This is the switch for electric power.

ON : When set to the ON position, power is supplied and the unit becomes operational.

STANDBY : When set to STANDBY position, the main power flow is cut and the unit is no longer fully operational. A minute flow of power feeds the unit to maintain operation readiness.

The STANDBY indicator lights when the power is set to STANDBY, and goes out when set to ON.

(Timer ON/OFF possible)

When the unit is switched ON, ON/OFF control can be performed by means of the optional timer.

NOTE:

When the power is initially turned ON, muting will be applied to prevent sound from being output for about 5 seconds.

2 SFC MODE button (Not available on the VSX-295 model)

RETURN button (VSX-295 only)

Press this button to return the receiver into the initial state. TUNER is selected at this initial state. Adjust the sound level by using the MASTER VOLUME control.

TAPE 2 MONITOR OFF MUTING OFF
 SUPER BASS OFF FUNCTION TUNER (FM)

NOTE:

Press the RETURN button, and the last FM station selected is received. If reception of a station is not possible with that frequency, the mode automatically switches to AUTO TUNING

3 DOLBY PRO LOGIC button

Switches DOLBY PRO LOGIC SURROUND on and off.

4 SUPER BASS button

Press this button when you want to boost the bass.

5 Input selector buttons

PHONO : Press when playing records on a turntable.

TUNER : Press when listening to radio broadcasts.

LD/DVD : Press when performing playback on an LD player or DVD player.

CD : Press when playing compact discs on a CD player.

VCR/TAPE 1

: Press when performing playback on a VCR unit or cassette deck.

TAPE 2 MONITOR

: Press when performing playback on a second cassette deck and when monitoring recording.

6 MASTER VOLUME control

Use it to simultaneously adjust the sound volume from the front, center, and rear speakers.

7 PHONES jack

Connect the plug on your headphones to this jack. Set SPEAKERS A and B switches to OFF if you want to cut the sound from the speakers and listen to it only through the headphones.

VSX-405, VSX-305

8 SPEAKERS buttons (A,B)

ON/OFF switches for the A and B speaker systems.

9 MEMORY button

Press this button to switch to the frequency preset mode.

10 MPX MODE buttons

Use to select the auto stereo mode or monaural mode when listening to FM broadcasts. The monaural mode has been selected when the MONO indicator in the display section is lit.

Auto stereo mode:

Normally, leave in this mode for reception. When a stereo FM broadcast is received, it will be automatically reproduced in stereo.

Monaural mode:

When receiving distant stations or stations with weak broadcast signals, the input signal may be weak, thus resulting in increased noise during FM stereo broadcasts. In this event, setting the receiver to the monaural mode will reduce the noise. In this case, however, FM stereo broadcasts will be reproduced in monaural sound.

NOTE:

This button has no effect on reception of AM broadcasts.

11 Remote sensor

12 Display section

13 CLASS button

Use to switch between preset memory classes 1 to 3. In each class, one station can be memorized in each of the 1 to 10 stations, enabling a total of 30 stations to be memorized.

14 FM/AM button

Use this to switch between FM and AM frequency band reception.

15 TUNING buttons

+: Performs tuning from the currently displayed station frequency in ascending frequency order.

-: Performs tuning in order of descending frequencies.

Auto tuning (FM only):

Press TUNING + (up) or - (down) button until the frequency starts to change, then release it. The tuner will automatically search for a broadcasting station and stops when one is found, and the TUNED indicator lights up. To search for another station, press again.

Manual tuning:

Press TUNING + (up) or - (down) button and release quickly. The tuning frequency will change by one step each time the button is pressed. Press as many times as necessary to tune in the desired station. The TUNED indicator lights up when the station is tuned in best.

- If you keep the TUNING (+/-) button depressed after the frequency has begun to change, the reception frequency changes continuously, and stops when the button is released.

NOTE:

When AUTO TUNING is in use, reception may not be possible over long distances or when signals are weak. At these times MANUAL TUNING is recommended.

16 STATION (+,-) button

+: Use to call preset station numbers in ascending order.

-: Use to call preset station numbers in descending order.

17 BASS control

Use to adjust the low-frequency level. Turn clockwise to boost bass and counterclockwise to attenuate bass.

18 TREBLE control

Use to adjust the high-frequency level. Turn clockwise to boost treble and counterclockwise to attenuate treble.

19 BALANCE control

Use to adjust the sound volume balance between left and right speakers.

L : Decrease the sound on the right side.

R : Decrease the sound on the left side.

Usually, left and right volume levels should be the same.

DISPLAY SECTION

REAR PANEL FACILITIES

Illustration shows VSX-405 Multi-voltage model.

1 FM/AM ANTENNA terminals

2 VCR/TAPE 1 jacks

Connect to the first cassette deck or a VCR. With a VCR, also connect the video jacks.

3 LD/DVD input jacks

4 VIDEO OUT (TO MONITOR TV) jack

5 FRONT SPEAKERS terminals

A: Connect to the first set of speakers.
B: Connect to the second set of speakers.

NOTE:

Do not allow any of the cord's conductors to protrude from the terminals or touch any other conductors. Malfunctions or breakdowns may occur when conductors come into contact with each other. Use front speakers with an impedance of 8 Ω to 16 Ω.

6 TWO VOLTAGE SELECTORS switches (Multi-voltage model only)

7 PHONO input jacks

Connect to the output cables from a turntable.

8 GND terminal

Connect the turntable ground lead to this terminal.

9 TAPE 2 MONITOR jacks

Connect to audio components such as a second cassette deck or a graphic equalizer.

10 CD input jacks

11 CONTROL OUT jacks

OUT: Connect this jack to other Pioneer components when using the remote control of this unit to control the other components.

To the CONTROL IN jack of the Pioneer component bearing the SR mark.

VSX-405, VSX-305

12 CHANNEL STEP switch (Multi-voltage model only)

13 SUB WOOFER PRE-OUT jack (Not available on the VSX-305 model)

If you want to boost the low frequencies, connect to a subwoofer power amplifier.

14 CENTER SPEAKER terminals

Connect the center speaker to these terminals.

NOTE:

Do not allow any of the cord's conductors to protrude from the terminals or touch any other conductors. Malfunctioning or breakdowns may occur when conductors come into contact with each other. Use center speakers with impedance of 8 Ω to 16 Ω .

15 REAR SPEAKERS terminals

Connect the rear speakers to these terminals.

NOTE:

- *Do not allow any of the cord's conductors to protrude from the terminals or touch any other conductors. Malfunctioning or breakdowns may occur when conductors come into contact with each other. Use rear speakers with impedance of 8 Ω to 16 Ω .*
- *Be sure to connect two speakers (L, R). There will be no sound if only one speaker is connected.*

16 Power cord

17 AC OUTLET

(U.S. and Canadian models)

[SWITCHED 100 W (0.8 A) MAX]

Power supplied through this outlet is turned on and off by the receiver's POWER switch. Electrical power consumption of connected equipment should not exceed 100 W (0.8 A).

(Multi-voltage model)

[SWITCHED 100 W MAX]

Power supplied through this outlet is turned on and off by the receiver's POWER switch. Total electrical power consumption of connected equipment should not exceed 100 W.

NOTE:

- *This unit should be disconnected by removing the power plug from the wall socket when not in regular use, e.g. when on vacation.*
- *Do not connect appliances with high power consumption such as heaters, irons, or television sets to this AC OUTLET in order to avoid overheating and fire risk.
This can cause the receiver to malfunction.*

CAUTION:

DO NOT CONNECT MONITOR OR TV SET.

POWER-CORD CAUTION

Handle the power cord by the plug. Do not pull out the plug by tugging the cord and never touch the power cord when your hands are wet as this could cause a short circuit or electric shock. Do not place the unit, a piece of furniture, etc., on the power cord, or pinch the cord. Never make a knot in the cord or tie it with other cords. The power cords should be routed such that they are not likely to be stepped on. A damaged power cord can cause fire or give you an electrical shock. Check the power cord once in a while. When you find it damaged, ask your nearest PIONEER authorized service center or your dealer for a replacement.

11. SPECIFICATIONS

Amplifier section

<VSX-405>

Continuous Power Output

Front 70 W + 70 W (1 kHz, 0.8 %, 8 Ω)

Center 70 W (1 kHz, 0.8 %, 8 Ω)

Rear 70 W (1 kHz, 0.8 %, 8 Ω)

<VSX-305>

Continuous average power output of 60 watts* per channel, min., at 8 ohms, from 20 Hz to 20,000 Hz with no more than 0.9 % total harmonic distortion (front).**

Continuous Power Output

Front 60 W + 60 W (1 kHz, 0.9 %, 8 Ω)

Center 60 W (1 kHz, 0.9 %, 8 Ω)

Rear 60 W (1 kHz, 0.9 %, 8 Ω)

Dynamic Power (2 Ω/4 Ω/8 Ω)

VSX-405/VSX-295 170 W/160 W/130 W

VSX-305 110 W/100 W/70 W

Input (Sensitivity/Impedance)

PHONO MM 2.8 mV/47 kΩ

CD, VCR/TAPE 1, TAPE 2, LD/DVD 200 mV/47 kΩ

Phono Overload Level (T.H.D. 0.1 %, 1 kHz)

PHONO MM 100 mV

Frequency Response

PHONO MM 20 Hz to 20,000 Hz ± 0.3 dB

CD, VCR/TAPE 1, TAPE 2, LD/DVD 5 Hz to 100,000 Hz ± 3 dB

Output (Level/Impedance)

VCR/TAPE 1 REC, TAPE 2 REC 200 mV/2.2 kΩ

VCR OUT 200 mV/2.2 kΩ

Tone Control

BASS ± 8 dB (150 Hz)

TREBLE ± 8 dB (10 kHz)

SUPER BASS +8 dB (80 Hz)

Signal-to-Noise Ratio (IHF, short circuited, A network)

PHONO MM 72 dB

CD, VCR/TAPE 1, TAPE 2, LD/DVD 96 dB

Signal-to-Noise Ratio [EIA, at 1 W (1 kHz)]

PHONO MM 75 dB

CD, VCR/TAPE 1, TAPE 2, LD/DVD 79 dB

* Measured pursuant to the Federal Trade Commission's Trade Regulation rule on Power Output Claims for Amplifier.

** Measured by Audio Spectrum Analyzer.

VIDEO Section

Input (Sensitivity/Impedance)

VCR, LD 1 Vp-p/75 Ω

Output (Level/Impedance)

VCR 1 Vp-p/75 Ω

Frequency Response

VCR, LD → MONITOR 5 Hz to 7 MHz ± 3 dB

Signal-to-Noise Ratio 55 dB

Cross Talk 55 dB

FM Tuner Section

Frequency Range 87.5 MHz to 108 MHz

Usable Sensitivity Mono:11.2 dBf, IHF (1.0 μV/75 Ω)

50 dB Quieting Sensitivity Mono:16.8 dBf

Stereo: 38.6 dBf

Signal-to-Noise Ratio Mono:73 dB (at 85 dBf)

Stereo:70 dB (at 85 dBf)

Distortion Stereo: 0.5 % (1 kHz)

Alternate Channel Selectivity 60 dB (400 kHz)

Stereo Separation 40 dB (1 kHz)

Frequency Response 30 Hz to 15 kHz (±1) dB

Antenna Input 75 Ω unbalanced

AM Tuner Section

Frequency Range 531 kHz to 1,602 kHz (9 kHz step)

530 kHz to 1,700 kHz (10 kHz step)

Sensitivity (IHF, Loop antenna) 350 μV/m

Selectivity 25 dB

Signal-to-Noise Ratio 50 dB

Antenna Loop antenna

Miscellaneous

Power Requirements

U.S. and Canadian models AC 120 V, 60 Hz

Multi-voltage model .. AC 110 V/120-127 V/220 V/240 V (Switchable), 50/60 Hz

Power Consumption

VSX-405

U.S. and Canadian models 200 W, 300 VA

Multi-voltage model 570 W

VSX-305 185W,290VA

In Standby Condition 3 W

AC Outlet

U.S. and Canadian models

SWITCHED 100 W (0.8 A) MAX

Multi-voltage model

SWITCHED 100 W MAX

Dimensions 420 (W) x 140 (H) x 328 (D) mm

16-9/16 (W) x 5-1/2 (H) x 12-15/16 (D) in

Weight (without package)

U.S. and Canadian models 7.2 kg (15 lb 13 oz)

Multi-voltage model

VSX-405 7.5 kg (15lb 76oz)

Furnished Parts

FM Antenna 1

AM Loop Antenna 1

Dry Cell Batteries

[size "AA" (IEC R6)] 2

Remote Control Unit 1

Operating Instructions 1

NOTE:

Specifications and the design are subject to possible modifications without notice, due to improvements.
