### SPECIFICATIONS

#### Compact disc player

System	Compact disc digital audio system
Disc	Compact disc
Laser	Semiconductor laser ( $\lambda = 780 \text{ nm}$ )
Emission duration	Continuous
Laser output	Less than 44.6 $\mu\text{W}$
	* This output is the value measured at a distance of 200 mm from the objective lens surface on the Optical Pick-up Block.
Frequency response	2 - 20,000 Hz $\pm 0.3\text{dB}$
Signal to noise ratio	More than 104 dB
Dynamic range	More than 95 dB
Harmonic distortion	Less than 0.003% (1 kHz)
Channel separation	More than 95 dB (1 kHz)
Wow and flutter	Below measurable limit

#### Outputs jacks

LINEOUT (FIXED) (phono jacks)	Output level 2V (at 50 kilohms) Load impedance over 10 kilohms
LINEOUT (VARIABLE) (phono jacks)	Output level max. 2 V (at 50 kilohms) Load impedance over 50 kilohms
HEADPHONES (stereo phone jack)	Output level max. 15 mW Load impedance 32 ohms
DIGITAL OUT (COAXIAL) (phono jacks)	Output level 0.5Vp-p (at 75 ohms) Load impedance 75 ohms (CDP-950: Canadian, AEP model) (CDP-307ESD)

#### Disc

Track pitch	1.6 $\mu\text{m}$
Sampling frequency	44.1 kHz
Quantization	16 bit linear quantizing/channel
Modulation system	EFM
Transfer rate	2.03 Mbit/sec. (before modulation)

#### General

Power requirements	US, Canadian model: 120V AC, 60 Hz AEP model: 220V AC, 50/60Hz E model: 110, 120, 220, 240 V AC, 50/60Hz
Power consumption	13 W
Dimensions	Approx. 430 x 105 x 340 mm (w/h/d) (17 x 4 <sup>1</sup> / <sub>4</sub> x 13 <sup>1</sup> / <sub>2</sub> inches)
Weight	Approx. 5.6 kg (12 lb 6 oz), net

#### Supplied accessories

Remote commander (1)  
Audio signal connecting cord (1)  
Sony SUM-3 (NS) batteries (2)

#### Remote commander (RM - D650)

Remote control system	Infrared control
Power requirements	3V DC with two size AA (R6) batteries
Dimensions	Approx. 62 x 20 x 168.5 mm (w/h/d) (2 <sup>1</sup> / <sub>2</sub> x 1 <sup>3</sup> / <sub>16</sub> x 6 <sup>3</sup> / <sub>4</sub> inches)
Weight	Approx. 130 g (5 oz) incl. batteries

**SAFETY-RELATED COMPONENT WARNING!!**

COMPONENTS IDENTIFIED BY SHADING AND MARK  ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

**ATTENTION AU COMPOSANT AYANT RAPPORT À LA SÉCURITÉ!**

LES COMPOSANTS IDENTIFIÉS PAR UNE TRAME ET UNE MARQUE  SUR LES DIAGRAMMES SCHÉMATIQUES ET LA LISTE DES PIÈCES SONT CRITIQUES POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE REMPLACER CES COMPOSANTS QUE PAR DES PIÈCES SONY DONT LES NUMÉROS SONT DONNÉS DANS CE MANUEL OU DANS LES SUPPLÉMENTS PUBLIÉS PAR SONY.

## MODEL IDENTIFICATION

— Specification Labels —

US, Canadian model: AC: 120V 60Hz 13W  
 AEP model: AC: 220V~50/60Hz 13W  
 E model: AC: 110, 120, 220, 240V~50/60Hz 13W

## SAFETY CHECK-OUT

After correcting the original service problem, perform the following safety check before releasing the set to the customer:

Check the antenna terminals, metal trim, "metallized" knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.

## LEAKAGE TEST

The AC leakage from any exposed metal part to earth ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5 mA (500 microamperes). Leakage current can be measured by any one of three methods.

1. A commercial leakage tester, such as the Simpson 229 or RCA WT-540A. Follow the manufacturers' instructions to use these instruments.
2. A battery-operated AC milliammeter. The Data Precision 245 digital multimeter is suitable for this job.
3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The "limit" indication is 0.75 V, so analog meters must have an accurate low-voltage scale. The Simpson 250 and Sanwa SH-63Trd are examples of a passive VOM that is suitable. Nearly all battery operated digital multimeters that have a 2 V AC range are suitable. (See Fig. A)

Fig. A. Using an AC voltmeter to check AC leakage.

## — SERVICING NOTE —

## PROTECTION OF EYES FROM LASER BEAM DURING SERVICING

This set employs a laser. Therefore, be sure to follow carefully the instructions below when servicing.

**CAUTION**

Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

## 1. Laser Diode Properties

- Material: GaAlAs
- Wavelength: 780 nm
- Emission Duration: continuous
- Laser Output: max. 44.6  $\mu$ W\*

\* This output is the value measured at a distance of about 200 mm from the objective lens surface on the Optical Pick-up Block.

2. During service, do not take the Optical Pick-up Block apart, and do not adjust the APC circuit. If there is a breakdown in the APC circuit (including laser diode), replace the entire Optical Pick-up Block (including APC board).

## BESKYTTELSE AF ØJNE MOD LASERSTRÅLING UNDER SERVICE

I dette apparat anvendes laserlys. Derfor skal nedenstående instruktioner nøje følges under service.

Følg iverigt instruktionerne i servicemanualen.

**ADVARSEL!!**

Under service må øjnene ikke komme nær objektiv-linsen på den optiske pick-up enhed. I tilfælde af at det er nødvendigt at kontrollere udsendelsen af laserlys, skal det ske i en afstand af mere end 25 cm fra den optiske pick-up.

## 1. Laser-dioe data

- Materiale: GaAlAs
- Bølgelængde: 780 nm
- Udstråling: Kontinuerlig
- Laseroutput: Max. 0,4 mW\*

\* Målt i 1,6 mm afstand fra overfladen af objektiv-linsen på den optiske pick-up enhed.

- Klassifikation: Klasse IIIb.

2. Adskil aldrig den optiske pick-up enhed under service, og juster ikke APC kredsløbet (Automatic Power Control). Hvis APC kredsløbet (incl. laser-dioden) bryder ned, skal hele den optiske pick-up enhed (incl. APC printkortet) udskiftes.

## LASER ADVARSEL MÆRKNING

Følgende mærkning findes indvendig i apparatet:

## 1. Advarsel Mærkning

**VAROITUS:** Laite sisältää, laserdiodin, joka lähettää (näkyvätöntä) silmille vaarallista lasersäteilyä.

## HOW TO OPEN THE DISC TRAY WHEN POWER SWITCH TURNS OFF

Caution: When you work, keep the set horizontal.

## DISC TRAY REMOVAL

## NOTES ON HANDLING THE OPTICAL PICK-UP BLOCK OR BASE UNIT

The laser diode in the optical pick-up block may suffer electrostatic breakdown because of the potential difference generated by the charged electrostatic load, etc. on clothing and the human body. During repair, pay attention to electrostatic breakdown and also use the procedure in the printed matter which is included in the repair parts. The flexible board is easily damaged and should be handled with care.

## NOTES ON LASER DIODE EMISSION CHECK

The laser beam on this model is concentrated so as to be focused on the disc reflective surface by the objective lens in the optical pick-up block. Therefore, when checking the laser diode emission, observe from more than 30 cm away from the objective lens.

## LASER DIODE AND FOCUS SEARCH OPERATION CHECK

1. Make POWER switch on with no disc inserted and disc table closed.
2. Confirm that the following operation is performed while observing the objecting lens.

- ① Confirm that laser beam is spread.
- ② Up and down motion of the objective lens. (3 times)

# Location of Controls

## Front Panel

## Remote Commander

## Remote Control Operation

Once the POWER switch is turned on, you can remotely control various functions of the player with the supplied remote commander.

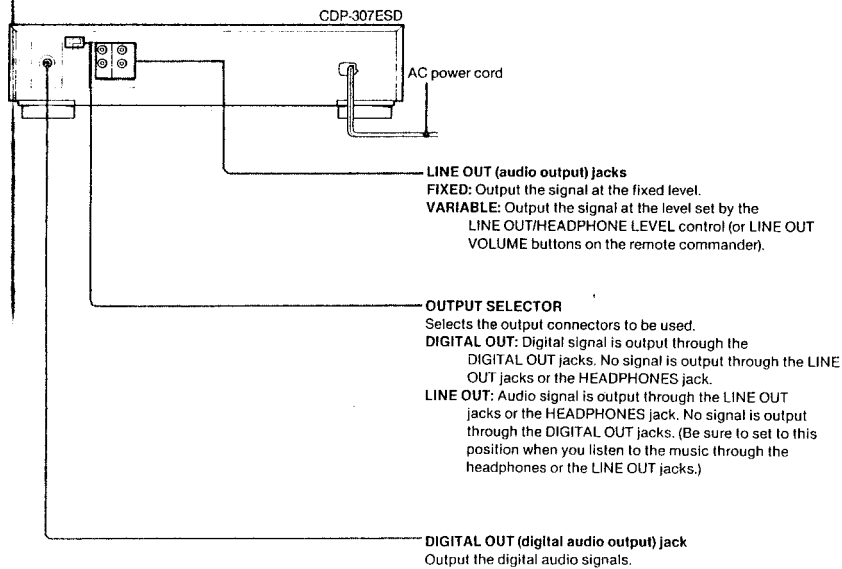

- Operations which is performed only with the remote commander**
- Manual search at low speed
  - A ↔ B repeat

- Operations which cannot be performed with the remote commander**
- Turning the power on and off
  - Setting and releasing auto pause function
  - Setting and releasing auto space function
  - Checking the programmed selections
  - Writing a comment about a disc (disc memo function)
  - Clearing custom indexes
  - Clearing all custom files
  - Timer activated play

\* AMS is an abbreviation of Automatic Music Sensor.

- Notes on the remote commander and remote control operation**
- Keep the commander away from extremely hot or humid places.
  - Avoid dropping any foreign objects into the commander casing, particularly when replacing the batteries.
  - To avoid a malfunction, do not simultaneously depress two or more buttons.
  - Avoid exposure of the remote sensor to direct sunlight or lighting apparatus. Such exposure can cause a malfunction.

## Description of the Rear Panel

### Note

If the LINE OUT/HEADPHONE LEVEL control is turned while recording through the VARIABLE LINE OUT jacks, the level of the recorded sound will be different from that set by the recording level controls of the tape deck.

# Playing in the Desired Order—Program Play

You can play up to 20 selections in the desired order.

## Programming Selections Directly

- 1 Press PROGRAM.
- 2 Press the numeric buttons for the desired selection in the order to be programmed.

To play the programmed selections  
Press ►.

### Adding selections to a program during program play

Press the numeric buttons during play. You can add selections up to 20.

- Pause cannot be programmed during play.

### When each selection ends during program play

That selection number disappears from the display, but the program itself remains. If you press ►, you can play the same program again.

### Note

If you press PROGRAM during the continuous play, single play or shuffle play (page 9), the selection currently being played is programmed as the first selection in the program.

### Program is cleared in the following cases

- **PAUSE** is pressed twice during program play.
- CONTINUE/SINGLE, SHUFFLE or **STOP** is pressed.

### Space between selections during program play

There is a blank of 1 second between each programmed selection. However, when consecutive selections (e.g. 4th → 5th) are programmed, the space on the disc is inserted as it is.

To record program play on a tape, use the auto space function so that a blank of 3 seconds is inserted between selections.

### What is this indication?

"----" indication appears on the display window instead of the numbers, if a selection numbered 21 or higher is programmed or the total playing time of the programmed selection exceeds 100 minutes.

## Programming Selections while Checking the Total Programming Time (Program Edit)

This function is useful for recording, as you can adjust the total playing time to the tape duration.

- 1 Press PROGRAM.
- 2 Choose the desired selection to be programmed with ◀◀ or ▶▶. The designated selection number blinks in the music calendar.

The total playing time including the selection indicated.

If the playing time of that selection is not appropriate, choose another selection.

- 3 Press PROGRAM. The designated selection is programmed and the blinking number lights up steadily.
- 4 Repeat steps 2 and 3 to program additional selections in the desired order.

To play the programmed selections

Press ►.

### To program pause

During programming, press **PAUSE** at the desired point between selections. When the program reaches it, the disc stops and stands by until you press **PAUSE** again.

This function is helpful when changing the tape during recording. The total playing time will be reset to 0.00 when you press **PAUSE**.

P (pause) has been programmed.  
Its turn is third.

### Checking the Programmed Selections

(possible only on the main unit)

Press CHECK.

Each time you press CHECK, the selections are displayed in the order they are programmed. At the last selection, "END" is displayed.

- You can check the programmed selections during play.
- Selection numbers over 20 cannot be displayed in the music calendar, but track numbers and program numbers are displayed in the window.

### Clearing the Programmed Selections

**Clearing the whole program**

Press **■** once during stop, or twice during play. All the selections are cleared.

**Clearing the last selections in the program**

(operated only on the main unit)

Press CLEAR during stop.

The last selection is cleared each time CLEAR is pressed.

**Clearing a specific selection**

(possible only on the main unit)

1 Press CHECK repeatedly until the selection to be cleared is displayed.

2 Press CLEAR while the selection number is displayed. The selection is cleared from the program. You cannot clear the selection currently being played.

## Playing in a Random Order—Shuffle Play

You can play up to 99 selections in a random order.

### Playing All the Selections in a Random Order

- 1 Press SHUFFLE.
- 2 Press **▶**. Shuffle play begins.

**To cancel shuffle play mode**

Press CONTINUE/SINGLE (or CONTINUE on the remote commander).

### Playing Only the Desired Selections in a Random Order—Delete Shuffle Play

- 1 Press SHUFFLE.
- 2 Press the numeric buttons of the undesired selections you wish to delete. The selections disappear from the music calendar.

- 3 Press **▶**.

**To display the remaining number of selections and time of the program**

Press DISPLAY twice.

If pause is programmed, the remaining number of selections and time to the next programmed pause is displayed.

To return to the normal display, press DISPLAY twice, or three times (if a disc memo\* is memorized).

\* See page 11.

**To display the next selection number and the succeeding selection number in the program**

Press DISPLAY three times.

To return to the normal display, press DISPLAY once, or twice (if a disc memo is memorized).

**What is this indication?**

This indication appears while the player is "shuffling" the selections.

**If you press SHUFFLE during play**

Shuffle play begins from the selection being played.

**To record shuffle play**

During shuffle play, a blank of one second is inserted between each selection.

To record shuffle play, use the auto space function so that a blank of 3 seconds is inserted between selections.

**When delete shuffle play ends**

Delete shuffle play mode is released and the player stands by in the shuffle play mode for the whole disc.

**If you press the numeric buttons during shuffle play mode**  
The selections of those numbers are also deleted, but the selection being played cannot be deleted.

**To play a selection which has been deleted**

Press the numeric button of that selection again. The selection number and appear in the display.

## Playing Repeatedly—Repeat Play

You can repeat the whole disc, a single selection, all the programmed selections, shuffle play, A ↔ B repeat play, or play between two custom indexes.

**Press REPEAT** during play or pause. Repeat play begins according to the current play mode.

Play mode	Selections to be repeated
Continue	All the selections
Single	The selection being played
Program	Programmed selections in the programmed order
Shuffle	All the selections, reshuffled each time

For the A ↔ B repeat play, see the description below.  
For the repeat play between two custom indexes, see pages 13.

**To cancel repeat play mode**  
Press REPEAT.

## On Custom Files

The CD player incorporates a memory in which you can store three types of informations called "custom files"

### Three custom files you can store in memory

<b>Disc memo</b>	A comment of up to 10 letters, which you can assign to each individual disc. (page 11)
<b>Program bank</b>	A programmed playing order you store in memory for a disc, so that the disc can be played always in a fixed order. (page 12)
<b>Custom index</b>	Index point you can assign to anywhere you want on a disc. (page 13)

### How many discs can be assigned custom files?

You can give custom files to up to 226 discs.

- A disc memo can be given to a disc which already has a program bank or custom indexes.
- A program bank and custom indexes cannot both be given to a disc at the same time.

### Memory backup for the custom files

Custom files, once memorized, are retained in the compact disc player's memory for approximately 1 month without AC power supply.

## Repeating a Particular Portion (A ↔ B Repeat)

(Possible with the remote commander)  
You can repeat any desired portion on a disc.

- 1 Press A ↔ B at the starting point (A) of the repeat play.  
"A SET" appears in the window.
- 2 Continue playing, or press ►► or ►►► to locate the desired ending point (B).
- 3 Press A ↔ B.  
"A - B REP" appears in the window, and play begins from the point A.

**To cancel A ↔ B repeat**  
Press CLEAR/REPEAT (or REPEAT on the player).

- Going back to the point A from any point on the disc**
- 1 Press A ↔ B at the starting point (A) during play.
  - 2 Press ►► when you desire to return to the registered point. Play begins again from the point A.

**To go back to the point A during A ↔ B repeat play**  
Press ►►.

**A ↔ B repeat and auto pause function**  
If the A ↔ B repeat play is activated while the auto pause function is turned on, the player enters the pause mode each time the point A is reached. Press ■ to resume play.

**If you press REPEAT during delete shuffle play**  
When the desired selections end, shuffle repeat play of all the selections starts.

### What is this indication?

FILE

This indication appears when FILE is pressed while no custom file can be memorized for the disc currently put in the player. To make a custom file for the disc, clear the custom file of another disc.

**To clear all custom files of a disc at once**  
Put the disc in the player and press ERASE. The disc memo and program bank (or the disc memo and custom indexes) are all cleared.

**To clear custom files of all discs at once**  
Press POWER to turn on the player while keeping ERASE and FILE pressed.

# Writing a Comment about a Disc

## Disc Memo Function

Using the disc memo function, you can write a comment of up to 10 letters about a disc. The memo appears in the window every time you put the disc in the player. You can write one disc memo to a disc.

**1** Put the disc in the disc compartment and press the disc compartment to close it. Make sure that the total number of selections and the total playing time is displayed. Then proceed as follows in the stop mode.

**2** Press ◀ or ▶.  
A blinking cursor (indicating where a letter will be written) appears.

**3** Press ◀ or ▶ until the desired letter appears.  
Example: If ▶ is pressed 6 times

**4** Press ▶ to move the cursor to the next position, and select the desired letter.

Repeat steps 3 and 4 to complete the memo.

**5** Press FILE.  
"FILE" appears in the window. After about 1 second, the memo you have written will be displayed.

Each time the disc is put in the compact disc player, the memo will be displayed.

### Usable letters and symbols

For the disc memo, 46 letters and symbols and a space can be used. When the ◀/▶ button is pressed for the first time, the space appears. Each time ▶ is pressed, letters and symbols will

(space) A B C D E F G H I J K L M N O P Q R S T U V W X Y Z  
[ ] \* + / < > 9 8 7 6 5 4 3 2 1 0 -

Use ◀ to call up a previous character.

## Clearing the Disc Memo

**1** Put the disc whose memo you want to clear in the player.

**2** Press ◀ or ▶ on the player.  
The ◀/▶ button on the remote commander cannot be used.

**3** Press CLEAR.

**4** Press FILE.  
"FILE CLR" is displayed in the window.

### To rewrite letters or symbols

Before pressing FILE, move the cursor under the letter/symbol to be changed, and then select the desired letter/symbol using ◀/▶.

### Where is the disc memo stored?

The disc memo is stored in the compact disc player's memory. When a disc is put in the player, the player identifies the disc by the total number of selections and the total playing time. If a disc memo has been made for that disc, the player retrieves the memo from its memory and displays it in the window. Therefore, as the disc memo is not located on the disc itself, when the disc is put in another compact disc player, no memo will be displayed.

# Keeping the Program in Memory

## — Program Bank Function

### Memorizing a Program

After programming selections, you can keep the program memorized, so that the disc is played always in the fixed order. The memorized program is called "program bank".

- 1 Program the selections as you want (page 8).
- 2 Press FILE.

Disappears approx. one second later.

The program is memorized for the program bank.

Only one program bank can be made for a disc.

### Playing the Disc Using the Program Bank

- 1 Press PROGRAM.
- 2 Press ▲ and put the disc in the disc compartment.
- 3 Press ►.

### Clearing the Program Bank

- 1 Put the disc whose program bank is to be cleared in the player.
- 2 Press ■ to clear the program.
- 3 Press FILE.  
"PGM CLR" is displayed, and the program bank is cleared.

#### Where is the program bank memorized?

The program bank is memorized in the compact disc player's memory. Therefore, if a disc for which you made a program bank is used with another compact disc player, play using the program bank is not possible.

#### What is this indication?

**IX FILED**  
This indication appears when the custom index (page 13) has already been made for the disc. The program bank and the custom index cannot both be made for the same disc at the same time. To make the program bank, first clear the custom index.

#### To play a disc having a program bank in other modes

- 1 Set the player in the desired play mode.
  - 2 Put the disc in the disc compartment.
  - 3 Press ►.
- If you press ▲ to close the compartment after setting the player in the continuous play mode or the single play mode, program bank play mode will be entered.

**To play the selections in another program without clearing the program bank**  
Program the selections as you want before putting the disc in the disc compartment, or after putting the disc in the player and pressing ■. The disc will be played in the newly programmed order. You can program even during the program bank play.

# Giving a Disc Indexes as You Want

## — Custom Index Function

A custom index is a special index that can be assigned to any position you want on the disc. If you assign custom indexes to the positions on a disc, you can easily locate the positions during play, or enjoy repeat play between two adjacent custom indexes.

- 1 Press **FILE** where you want to assign a custom index during play.  
The portion for 3 seconds from the point where you pressed **FILE** is played repeatedly (rehearsal play).

- 2 Adjust the repeat start point using **◀◀** or **▶▶**.  
Press **▶▶** to shift the repeat start point forward and **◀◀** to shift it backward. Pressing **◀◀▶▶** 7 times shifts the point by approximately 1 second.

- 3 Press **FILE**.  
The custom index is assigned to the repeat start point.

### How many custom indexes can be assigned?

Up to 6 custom indexes from **A** to **F** can be assigned to a disc.

### What is this indication?

This indication appears when a program bank has already been memorized for the disc. The program bank and the custom index cannot both be made for the same disc at the same time. To assign custom indexes, first clear the program bank.

PG FILED

### To release rehearsal play

Press **CLEAR**. Normal play is resumed.

### Playing from the Desired Custom Index

- 1 Press **CUSTOM INDEX MODE**.  
The music calendar disappears.

- 2 Press the desired numeric button **1 (A)** through **6 (F)**.  
Play begins from the designated custom index. When a custom index position is passed, it disappears from the **[A] - [F]** display.

### Clearing Custom Indexes

- 1 Press **CHECK** so that the letter of the custom index you want to clear blinks.
- 2 Press **CLEAR**.  
Custom indexes succeeding the cleared index will be shifted ahead one position.

The custom indexes cannot be cleared during program play.

### If a new custom index is assigned to a position preceding another index

Previously existing indexes will be shifted as follows.  
Example: If you assign a new index between **B** and **C**.

### If you press **FILE** in the pause mode

The rehearsal play is not made and the custom index is assigned immediately at the position where **FILE** is pressed.

### Repeating the Portion between Two Custom Indexes

During play using custom indexes, you can repeat the desired portion between any two adjacent custom indexes.

- 1 Press **CUSTOM INDEX MODE** twice so that "SINGLE" is displayed in the window.
- 2 Press one of the numeric buttons **1 (A)** to **6 (F)** for the starting point of the repeat play.
- 3 Press **REPEAT**.

The portion between the custom index designated as the starting point and the next custom index is played repeatedly.

To cancel repeat play between custom indexes  
Press **REPEAT**.

### To change the play mode during play using custom indexes

During play using custom indexes (in other words, while the music calendar is not displayed), the play mode switches from continuous play to single play and vice versa each time **CUSTOM INDEX MODE** is pressed.

### To release play using custom indexes

Press one of the **PLAY MODE** buttons (**PROGRAM**, **SHUFFLE** or **CONTINUE/SINGLE**). The music calendar appears.

### Where are the custom indexes memorized?

The custom indexes are memorized in the compact disc player's memory. Therefore, if a disc for which custom indexes are assigned is played in other compact disc player, play using the custom indexes cannot be done.

MEMO

A series of horizontal dotted lines for writing a memo.

# SECTION 1 ELECTRICAL ADJUSTMENTS

1. Perform adjustments in the order given.
2. Use YEDS-18 disc (3-702-101-01) unless otherwise indicated.
3. Use the oscilloscope with more than 10MΩ impedance.

## RF PLL Frequency Adjustment

### Procedure :

1. Connect test point TP (ASY) to ground with jumper wire.
2. Turn POWER switch on.
3. Connect the frequency counter to test point TP(PCK).
4. Adjust RV201 so that the reading on frequency counter is 4.3218MHz±30kHz.
5. Remove lead wire connecting TP(ASY) and ground.
6. Put disc (YEDS-18) in and press ▷ button.
7. Confirm that the reading on frequency counter is 4.3218MHz.

Adjustment Location : main board

## E-F Balance Adjustment

This adjustment should be made when replacing Optical Pick-up Block.

### Procedure :

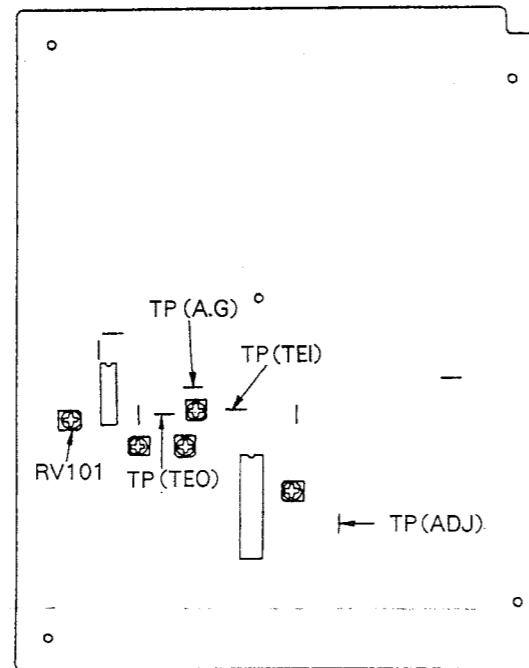

1. Connect test points TP (ADJ) and TP (TE I) to ground with jumper wires.
2. Connect oscilloscope to test points TP(TEO) and TP (A. G).
3. Turn POWER switch on.
4. Put disc (YEDS-18) in and playback the 6th selection.
5. Adjust RV101 so that the oscilloscope waveform is symmetrical on the top and bottom in relation to 0V.

Note: Take sweep time as long as possible to obtain best waveform.

Adjustment Location : main board

## Focus Bias Adjustment

This adjustment should be made when replacing Optical Pick-up Block.

### Procedure :

1. Connect oscilloscope to test points TP(RF) and TP (RF G).
2. Turn POWER switch on.
3. Put disc (YEDS-18) in and playback the 6th selection.
4. Adjust RV104 for an optimum waveform eye pattern or so that the peak is maximum. Optimum eye pattern means that shape "◇" can be clearly distinguished at the center of the waveform.

### ● RF Signal Reference Waveform (eye pattern)

VOLT/DIV : 200mV  
TIME/DIV : 500nS

When observing the eye pattern, set the oscilloscope for AC range and raise vertical sensitivity.

Adjustment Location : main board

## REFERENCE

### Focus/Tracking Gain Adjustment

A frequency response analyzer is necessary in order to perform this adjustment exactly.

However, this gain has a margin, so even if it is slightly off, there is no problem. Therefore, do not perform this adjustment.

Focus/tracking gain determines the pick-up follow-up (vertical and horizontal) relative to mechanical noise and mechanical shock when the 2-axis device operate.

However, as these reciprocate, the adjustment is at the point where both are satisfied.

- When gain is raised, the noise when the 2-axis device operates increases.
- When gain is lowered, it is more susceptible to mechanical shock and skipping occurs more easily.
- When gain adjustment is off, the symptoms below appear.

	Gain	Focus	Tracking
● The time until music starts becomes longer for STOP →▷PLAY or automatic selection (⏮ ⏭ buttons pressed). (Normally takes about 2 seconds.)		low	low or high
● Music does not start and disc continues to rotate for STOP →▷PLAY or auto-matic selection (⏮ ⏭ buttons pressed.)		-	low
● Disc table opens shortly after STOP →▷PLAY.		low or high	-
● Sound is interrupted during PLAY. Or time counter display stops progressing.		-	low
● More poise during 2-axis device operation.	high	high	high

The following is a simple adjustment method.  
-Simple Adjustment-

**Note:** Since exact adjustment cannot be performed, remember the positions of the controls before performing the adjustment. If the positions after the simple adjustment are only a little different, return the controls to the original position.

**Procedure:**

1. Keep the set horizontal. (If the set is not horizontal, this adjustment cannot be performed due to the gravity against the 2 axis device.)
2. Insert disc (YEDS-18) playback the 6th selection.
3. Connect oscilloscope to main board TP(FEO).
4. Adjust RV103 so that the waveform is as shown in the figure below. (focus gain adjustment)

● Incorrect Examples (DC level changes more than on adjusted waveform)

5. Connect oscilloscope to main board TP(TEO).
6. Adjust RV102 so that the waveform is as shown in the figure below. (tracking gain adjustment)

● Incorrect Examples (fundamental wave appears)

high tracking gain (higher fundamental wave than for low gain)

Adjustment Location: main board

## SECTION 3 EXPLODED VIEWS AND PARTS LIST

**NOTE:**

- The mechanical parts with no reference number in the exploded views are not supplied.
- The construction parts of an assembled part are indicated with a collation number in the remark column.
- Items marked "\*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

- Due to standardization, parts with part number suffix -XX and -X may be different from the parts specified in the components used on the set.

- Color Indication of Appearance Parts  
Example:

(RED) ... KNOB, BALANCE (WHITE)

↑  
Cabinet's Color

↑  
Parts' Color

The components identified by shading and mark  are critical for safety. Replace only with part number specified.

Les composants identifiés par une trame et une marque  sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

## SECTION 4 ELECTRICAL PARTS LIST

**NOTE:**

- Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- Items marked "\*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- If there are two or more same circuits in a set such as a stereophonic machine, only typical circuit parts may be indicated and capacitors and resistors in other same circuits may be omitted.

**CAPACITORS:**

MF:  $\mu$ F, PF:  $\mu$  $\mu$ F.

**RESISTORS**

- All resistors are in ohms.
- F: nonflammable

**COILS**

• MMH: mH, UH:  $\mu$ H

**SEMICONDUCTORS**

In each case, U:  $\mu$ , for example:  
 UA...:  $\mu$ A..., UPA...:  $\mu$ PA...,  
 UPC...:  $\mu$ PC, UPD...:  $\mu$ PD...

The components identified by shading and mark are critical for safety. Replace only with part number specified.

Les composants identifiés par une trame et une marque sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

The components identified by shading and mark  are critical for safety. Replace only with part number specified.

Les composants identifiés par une trame et une marque  sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

# SONY COMPACT DISC PLAYER CDP-307ESD/950

- Note:
- All capacitors are in  $\mu\text{F}$  unless otherwise noted.  $\text{pF}$ :  $\mu\text{F}$
  - 50WV or less are not indicated except for electrolytics and tantalums.
  - All resistors are in  $\Omega$  and  $1/4\text{W}$  or less unless otherwise specified.
  - $\triangle$ : internal component.
  - : fusible resistor.

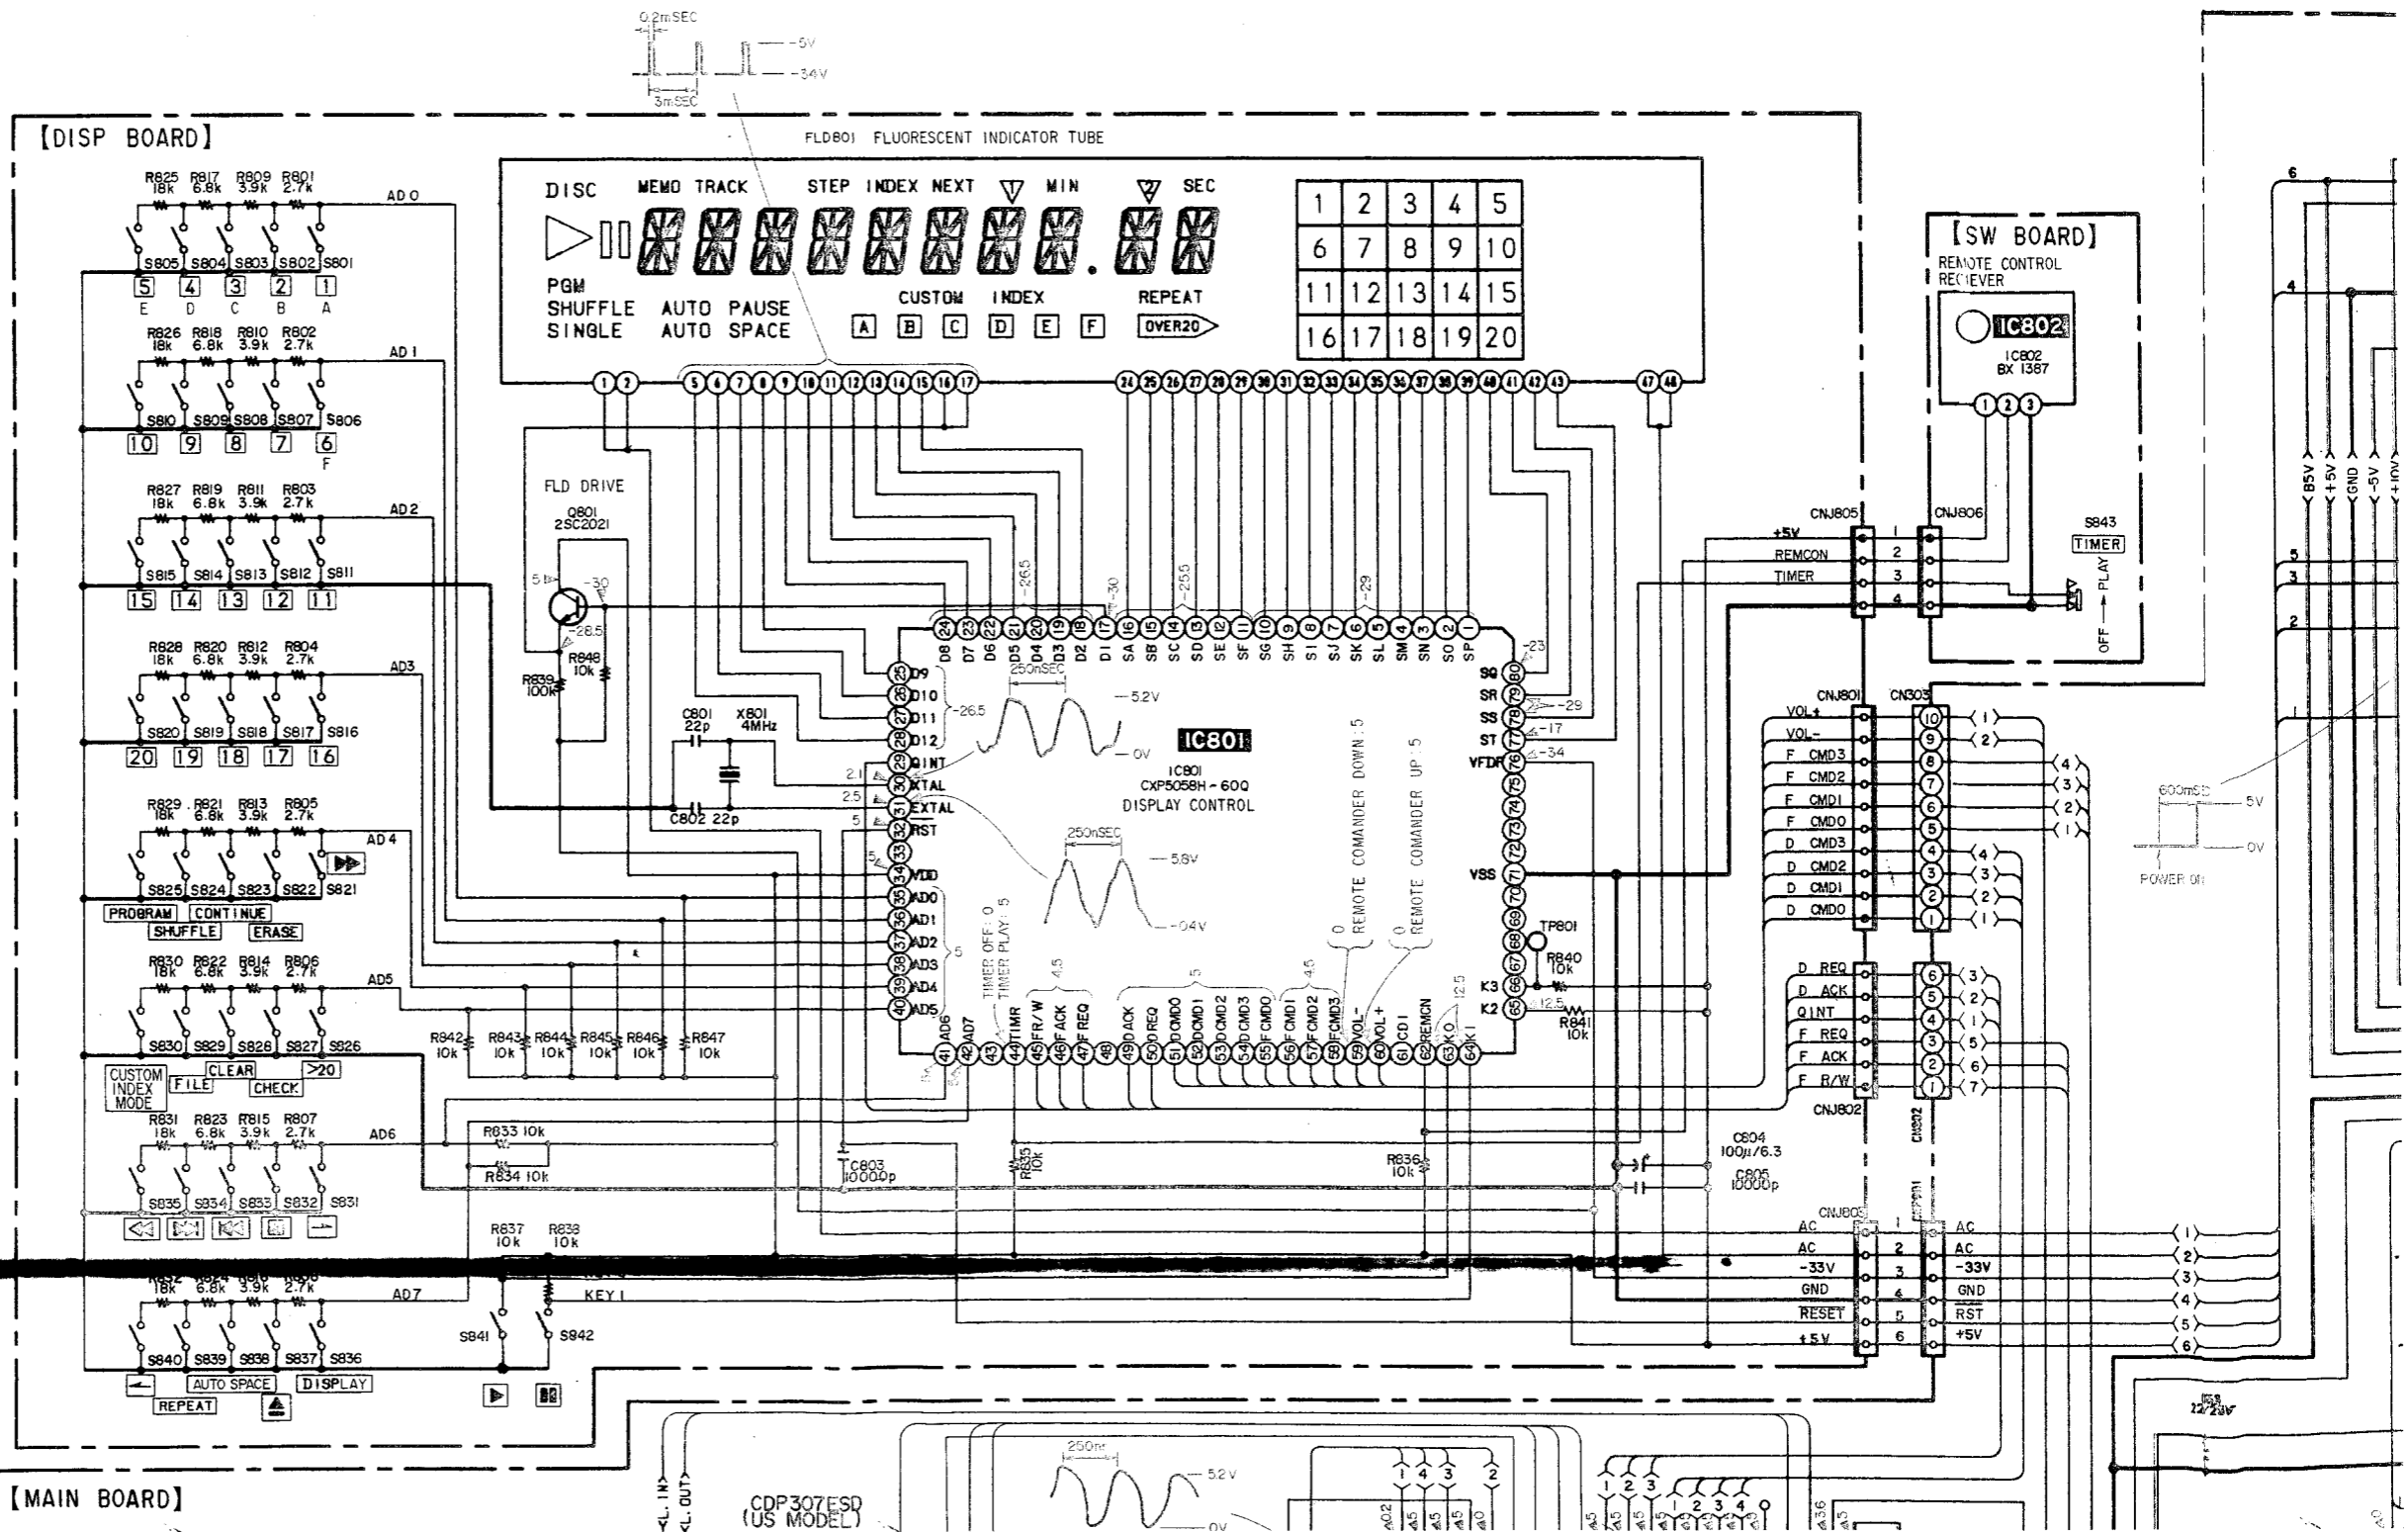

Note: The components identified by shading and mark  $\triangle$  are critical for safety. Replace only with part number specified.

Note: Les composants identifiés par un tramé et une marque  $\triangle$  sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

- : B+ bus.
- : B- bus.
- : adjustment for repair.
- Voltage and waveforms are dc with respect to ground under no-signal conditions.
- no mark: STOP
- ( ): PLAY
- < >: DIGITAL OUT SWITCH ON
- Voltages are taken with a VOM (50 k $\Omega$ /V).
- Voltage variations may be noted due to normal production tolerances.
- Waveforms are taken with an oscilloscope.
- Voltage variations may be noted due to normal production tolerances.
- Signal path.
- : CD
- : digital out
