

CDP-C20/C26/C30

SERVICE MANUAL

US Model
CDP-C20/C26/C30

Canadian Model
CDP-C30

Photo : CDP-C30

SPECIFICATIONS

Compact disc player

System	Compact disc digital audio system
Laser	Semiconductor laser ($\lambda = 780 \text{ nm}$) Emission duration: continuous
Laser output	Max. $44.6 \mu\text{W}$ * * This output is the value measured at a distance of about 200 mm from the objective lens surface on the Optical Pick-up Block.
Frequency response	2 Hz - 20 kHz (+1 dB, -2 dB)
Signal to noise ratio	More than 100 dB
Dynamic range	More than 88 dB
Harmonic distortion	Less than 0.05% (1 kHz)
Channel separation	More than 95 dB (1 kHz)
Wow and flutter	Below measurable limit
Outputs	LINE OUT (phono jacks) Output level 2 V (at 50 kilohms) Load impedance over 10 kilohms HEADPHONES (stereo phone jack) (CDP-C30, C20 only) Output level 0 - 2.4 mW (variable) (at 32 ohms)

General

Power requirements	120 V AC, 60 Hz
Power consumption	10 W
Dimensions	Approx. 430 × 110 × 400 mm (w/h/d) ($17 \times 4\frac{3}{8} \times 15\frac{3}{4}$ inches) not including projecting parts and controls
Weight	Approx. 5.8 kg (12 lbs 13 oz), net

Remote commander (supplied only for the CDP-C30, C26)

Remote control system	Infrared control
Power requirements	3 V DC with two size AA (R6) batteries
Dimensions	Approx. 43 × 20 × 175 mm (w/h/d) ($1\frac{11}{16} \times \frac{13}{16} \times 6\frac{15}{16}$ inches)
Weight	Approx. 110 g (4 oz) including batteries

Supplied accessories

Audio signal connecting cord	(phono plug × 2 ↔ phono plug × 2) (1)
CDP-C30, C26 only:	Sony SUM-3 (NS) batteries (2)

Design and specifications subject to change without notice.

SAFETY-RELATED COMPONENT WARNING!!

COMPONENTS IDENTIFIED BY MARK  OR DOTTED LINE WITH MARK  ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

ATTENTION AU COMPOSANT AYANT RAPPORT À LA SÉCURITÉ!

LES COMPOSANTS IDENTIFIÉS PAR UNE MARQUE  SUR LES DIAGRAMMES SCHÉMATIQUES ET LA LISTE DES PIÈCES SONT CRITIQUES POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE REMPLACER CES COMPOSANTS QUE PAR DES PIÈCES SONY DONT LES NUMÉROS SONT DONNÉS DANS CE MANUEL OU DANS LES SUPPLÉMENTS PUBLIÉS PAR SONY.

SAFETY CHECK-OUT

After correcting the original service problem, perform the following safety check before releasing the set to the customer:

Check the antenna terminals, metal trim, "metallized" knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.

LEAKAGE TEST

The AC leakage from any exposed metal part to earth ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5 mA (500 microamperes). Leakage current can be measured by any one of three methods.

1. A commercial leakage tester, such as the Simpson 229 or RCA WT-540A. Follow the manufacturers' instructions to use these instruments.
2. A battery-operated AC milliammeter. The Data Precision 245 digital multimeter is suitable for this job.

3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The "limit" indication is 0.75 V, so analog meters must have an accurate low-voltage scale. The Simpson 250 and Sanwa SH-63Trd are examples of a passive VOM that is suitable. Nearly all battery operated digital multimeters that have a 2V AC range are suitable. (See Fig. A)

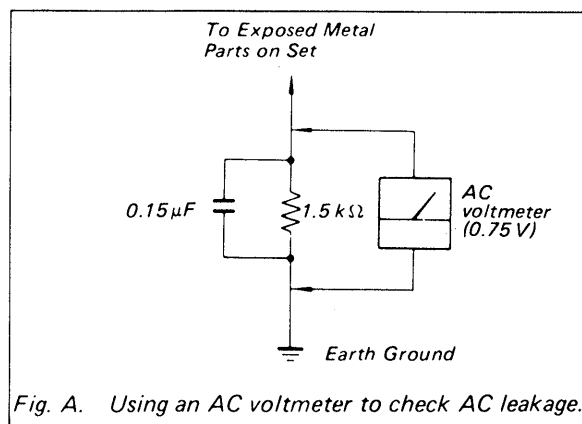

Fig. A. Using an AC voltmeter to check AC leakage.

SERVICING NOTE

NOTES ON HANDLING THE OPTICAL PICK-UP BLOCK OR BASE UNIT

The laser diode in the optical pick-up block may suffer electrostatic breakdown because of the potential difference generated by the charged electrostatic load, etc. on clothing and the human body. During repair, pay attention to electrostatic breakdown and also use the procedure in the printed matter which is included in the repair parts. The flexible board is easily damaged and should be handled with care.

CAUTION

Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

NOTES ON LASER DIODE EMISSION CHECK

The laser beam on this model is concentrated so as to be focused on the disc reflective surface by the objective lens in the optical pick-up block. Therefore, when checking the laser diode emission, observe from more than 30 cm away from the objective lens.

SECTION 1 GENERAL

1-1. LOCATION AND FUNCTION OF CONTROLS

Front Panel

* AMS is the abbreviation of Automatic Music Sensor.

Remote Commander (CDP-C30, C-26 only)

Following functions are operated only by using the remote commander.

Direct disc selection

You can select a discs directly only by pressing a numeric button on the remote commander.

Manual search

You can locate a particular point in a selection by pressing the ◀◀ or ▶▶ button on the remote commander.

Repeat play

You can play your programmed selections or all the discs by pressing the REPEAT button on the remote commander.

	CDP-C30	CDP-C26	CDP-C20 using the remote commander supplied with the Sony stereo systems.
Direct disc selection	○	○	X
Manual search	○	○	X
Repeat play	○	○	○

○: possible X: not possible

Notes on the remote commander and remote control operation

- Keep the commander away from extremely hot or humid places.
- Avoid dropping any foreign objects into the commander casing, particularly when replacing the batteries.

- To avoid a malfunction, do not simultaneously depress two or more buttons.
- Avoid exposure of the remote control sensor to direct sunlight or lighting apparatus. Such exposure can cause a malfunction.

SECTION 2 DISASSEMBLY

NOTE: Follow the disassembly procedure in the numerical order given.

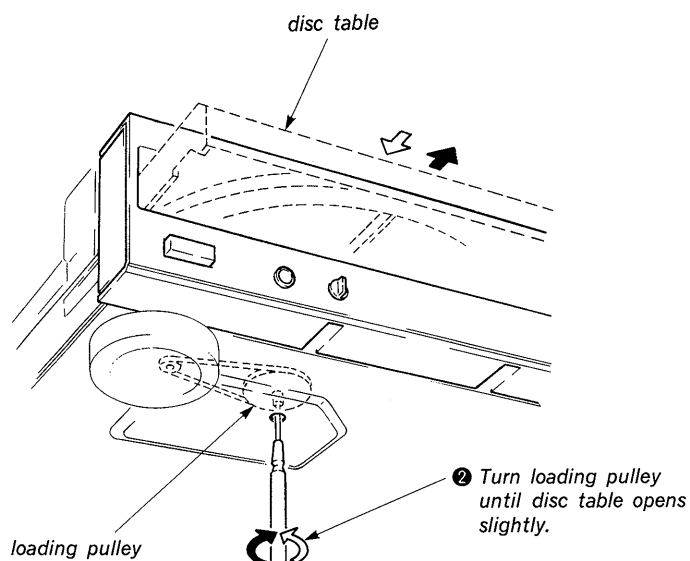

2-1. FRONT PANEL (A)

- ❶ Remove top cover.
- ❷ Press POWER switch to turn the power on.
- ❸ Press OPEN/CLOSE button to open disc table.

2-2. FRONT PANEL (B)

- ❶ Remove top cover.
- ❸ Perform steps A-4 to A-6.

SECTION 3 ELECTRICAL ADJUSTMENTS

1. Perform adjustments in the order given.
2. Use YEDS-18 (Part No : 3-702-101-01) disc unless otherwise indicated.
3. Use the oscilloscope with more than 10 MΩ impedance.

RF PLL Frequency Adjustment/Lock Frequency Check

Procedure :

1. Connect test point TP (ASY) to ground with lead wire.
2. Turn POWER switch on.
3. Connect the frequency counter to test point TP (PCK).
4. Adjust RV5 so that the reading on frequency counter is $4.3218\text{MHz} \pm 30\text{kHz}$.
..... (RF PLL frequency adjustment)
5. Remove lead wire connecting TP (ASY) to ground.
6. Put disc (YEDS-18) in and press ▷ PLAY button.
7. Confirm that the reading on frequency counter is 4.3218MHz.
..... (Lock frequency check)

1. Connect oscilloscope to test point TP (RF) and test point TP (RFG).
2. Turn POWER switch on.
3. Put disc (YEDS-18) in and press ▷ PLAY button.
4. Adjust RV2 for an optimum waveform eye pattern or so that the peak is maximum. Optimum eye pattern means that shape "◇" can be clearly distinguished at the center of the waveform.

REFERENCE

Focus/Tracking Gain Adjustments

A frequency response analyzer is necessary in order to perform this adjustment exactly.

However, this gain has a margin, so even if it is slightly off, there is no problem. Therefore, do not perform this adjustment.

Focus/tracking gain determines the pick-up follow up (vertical and horizontal) relative to mechanical noise and shock when the 2-axis device operate.

However, as these reciprocate, the adjustment is at the point where both are satisfied.

- When gain is raised, the noise when the 2-axis device operates increases.
- When gain is lowered, mechanical shock and skipping occurs more easily.
- When gain adjustment is off, the symptoms below appear.

E-F Balance Adjustment

This adjustment should be made when replacing TOP (T-type Optical Pick-up).

Procedure :

1. Connect test point TP (ADJ) and test point TP (TES) to ground with lead wire.
2. Connect oscilloscope to test point TP (TEO).
3. Turn POWER switch on.
4. Put disc (YEDS-18) in and press ▷ PLAY button.
5. Adjust RV1 so that the traverse waveform is symmetrical above and below.
6. After adjustment, remove the lead wire connected in step 5.

Focus Bias Adjustment

This adjustment should be made when replacing TOP (T-type Optical Pick-up).

Procedure :

Symptoms	Gain	Focus	Tracking
• The time until music starts becomes longer for ■ STOP → ▷ PLAY or automatic selection. (◀◀, ▶▶ buttons pressed.) (Normally takes about 1 seconds.)		low	low or high
• Music does not start and disc continues to rotate for ■ STOP → ▷ PLAY or automatic selection. (◀◀, ▶▶ buttons pressed.)		—	low
• Disc table opens shortly after ■ STOP → ▷ PLAY.		low or high	—
• Sound is interrupted during PLAY or time counter display stops progressing.		—	low
• More noise during 2-axis device operation.		high	high

The following is a simple adjustment method.

—Primary Adjustment—

Note : Since exact adjustment cannot be performed, remember the positions of the controls before performing the adjustment. If the position after the primary adjustment are only a little different, return the controls to the original position.

Procedure :

1. Keep the set horizontal.
(If the set is not horizontal, this adjustment cannot be performed due to the gravity against the 2-axis device.)
2. Insert disc (YEDS-18: Fifth Selection) and press ▶ PLAY button.
3. Connect oscilloscope to main amp board TP (FEO).
4. Adjust RV3 so that the waveform is as shown in the figure below. (focus gain adjustment)

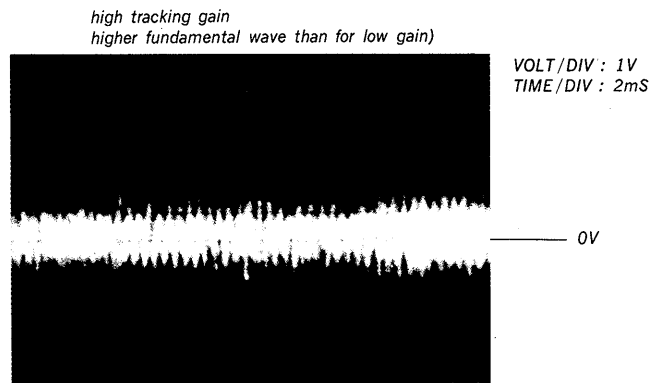

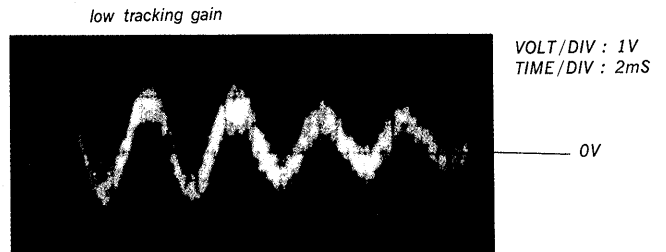

• Inccornt Examples (DC level changes more than on adjusted waveform)

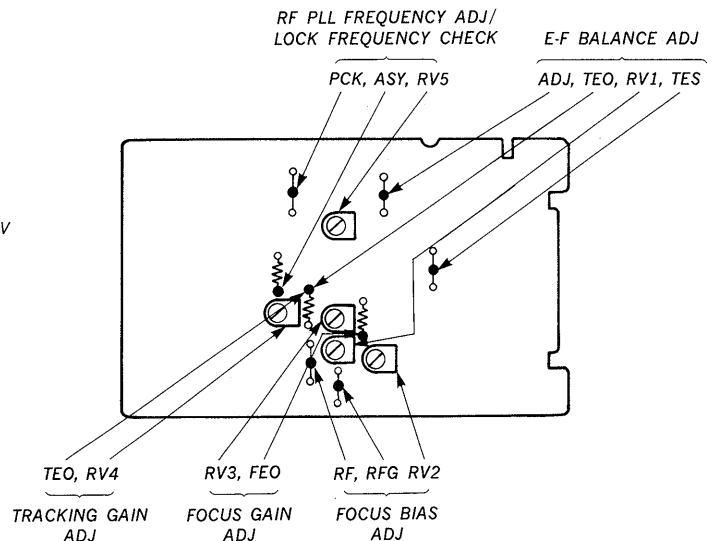

5. Connect oscilloscope to main board TP (TEO).
6. Adjust RV4 so that the waveform is as shown in the figure below. (tracking gain adjustment)

• Incorrect Examples (fundamental wave appears)

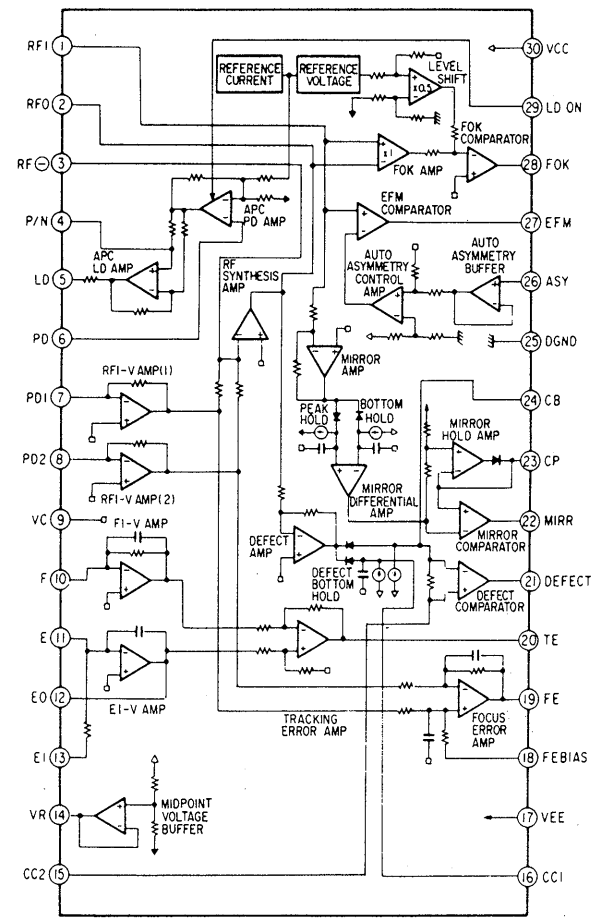

Adjustment Location : main board

SECTION 6 ELECTRICAL PARTS LIST

NOTE:

- Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- Items marked "*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- If there are two or more same circuits in a set such as a stereophonic machine, only typical circuit parts may be indicated and capacitors and resistors in other same circuits may be omitted.

CAPACITORS:

MF: μ F, PF: μ MF.

RESISTORS

- All resistors are in ohms.
- F: nonflammable

COILS

- MMH: mH, UH: μ H

SEMICONDUCTORS

In each case, U: μ , for example:
 UA...: μ A..., UPA...: μ PA...,
 UPC...: μ PC, UPD...: μ PD...

The components identified by mark Δ or dotted line with mark Δ are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque Δ sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

Note:

The components identified by mark ▲ or dotted line with mark ▲ are critical for safety. Replace only with part number specified.

Note:

Les composants identifiés par une marque ▲ sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

REVISED

SUPPLEMENT-1

File this supplement with the service manual.

**Subject: Alteration for pattern of MAIN board
and added for WIND SENSOR board**

1. AS TO CHANGED PARTS

Added parts

• WIND SENSOR BOARD

	*1-629-107-11	PC BOARD, WIND SENSOR				
C1001	1-136-165-00	FILM	0.1MF	5%	50V	
C1002	1-123-875-11	ELECT	10MF	20%	50V	
CNJ1001	*1-564-508-11	PLUG, CONNECTOR 5P				
D1001	8-719-000-26	DIODE US1060M				
D1002	8-719-000-26	DIODE US1060M				
IC1001	8-759-202-24	IC TC74HC86P				
R1001	1-247-895-00	CARBON	470K	5%	1/4W	

• MAIN BOARD

Q701	8-729-115-27	TRANSISTOR BN1L3Z
Q702	8-729-115-77	TRANSISTOR BA1L4M

Deleted parts

MAIN BOARD

C105	FILM	0.1MF	5%	50V
C106	FILM	0.1MF	5%	50V
C107	FILM	0.1MF	5%	50V
C108	FILM	0.1MF	5%	50V
C603	FILM	0.1MF	5%	50V

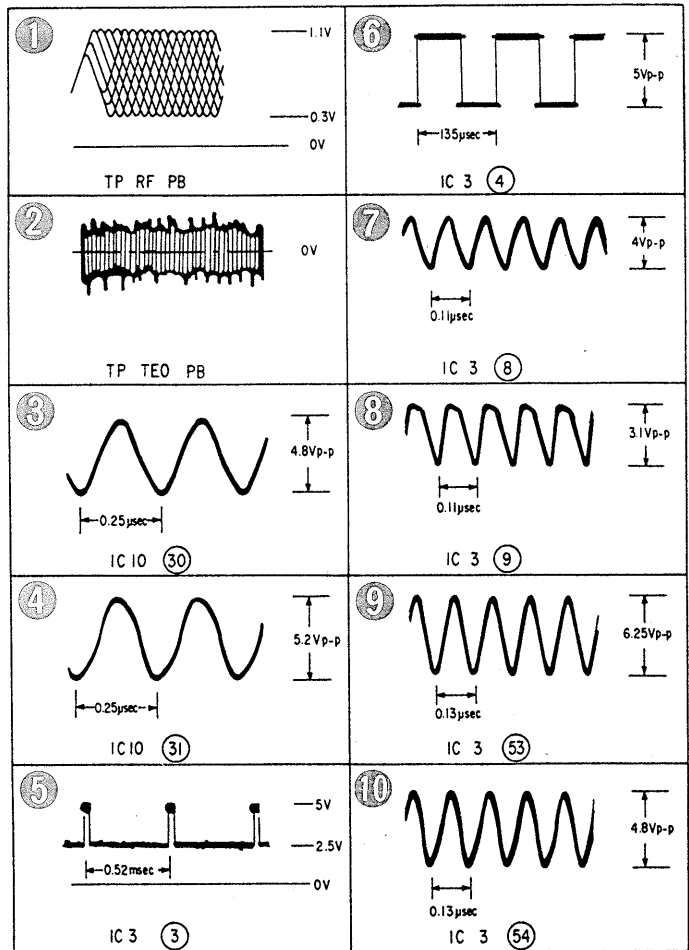

2. AS TO ALTERATION OF IC10

Alteration for repair part of IC10.

	Former type	New type
IC10 (Part No.)	μ PD75208-CW-232 (8-759-142-66)	μ PD75208-CW-257 (8-759-144-54)

Occur to exchange at new type for former type IC10,
certainly remove the connector CNJ1001 of WIND SENSOR board.

• Waveforms

Note:

- All capacitors are in μF unless otherwise noted. pF : $\mu\mu\text{F}$
50WV or less are not indicated except for electrolytics and tantalums.
- All resistors are in Ω and $1/4\text{W}$ or less unless otherwise specified.
- Δ : internal component.
- \square : adjustment for repair.
- Voltage and waveforms are dc with respect to ground under no-signal conditions.
no mark : PLAY
- Voltages are taken with a VOM (50 $\text{k}\Omega/\text{V}$).
Voltage variations may be noted due to normal production tolerances.
- Waveforms are taken with an oscilloscope.
Voltage variations may be noted due to normal production tolerances.
- Circled numbers refer to waveforms.
- Signal path.
 \Rightarrow : CD

SUPPLEMENT -2

File this supplement with the service manual.

1. MAIN board modification. (See page 2.)

CDP-C20 (US model): Serial No. 851929 and later.

CDP-C30 (US model): Serial No. 849101 and later.

2. WIND SENSOR board modification. (See page 3.)

CDP-C30 (US model): Serial No. 855101 to 859100.

CDP-C30 (Canadian model): Serial No. 700001 to 701000.

3. TABLE board is added. (See page 4.)

CDP-C20 (US model): Serial No. 860001 and later.

CDP-C30 (US model): Serial No. 859101 and later.

ADDED PARTS
