Model Name Using Similar Mechanism	NEW
CD Mechanism Type	CDM-46
Base Unit Type	KSM-213BFN/M-NP
Optical Pick-up Type	KSS-213B/S-N

### SPECIFICATIONS

#### Compact disc player

<b>Laser</b>	Semiconductor laser ( $\lambda = 780 \text{ nm}$ ) Emission duration: continuous
<b>Laser output</b>	Max 44.6 $\mu\text{W}$ * * This output is the value measured at a distance of 200 mm from the objective lens surface on the Optical Pick-up block with 7 mm aperture.
<b>Frequency response</b>	2 Hz to 20 kHz $\pm 1 \text{ dB}$
<b>Signal-to-noise ratio</b>	More than 100 dB
<b>Dynamic range</b>	More than 88 dB
<b>Harmonic distortion</b>	Less than 0.013 %
<b>Channel separation</b>	More than 95 dB

#### Output

	Jack type	Maximum output level	Load impedance
LINE OUT	Phono jacks	2 V (at 50 kilohms)	Over 10 kilohms

#### General

##### Power requirements

Where purchased	Power requirements
USA/Canada	120 V AC, 60 Hz
Australia/Singapore (CDP-CX50 only)	240 V AC, 50 Hz
UK	220 V - 230 V AC, 50/60 Hz
Australia/Singapore (CDP-CX571 only)	110 V - 120 V or 220 V - 240 V AC, adjustable, 50/60 Hz
Other countries	110 V - 120 V or 220 V - 240 V AC, adjustable, 50/60 Hz

**Power consumption** 12 W

**Dimensions (approx.) (w/h/d)**  
When the front cover is closed  
430  $\times$  182.5  $\times$  295 mm (17  $\times$  7 1/4  $\times$  11 5/8 in.) incl. projecting parts  
When the front cover is open  
430  $\times$  182.5  $\times$  414 mm (17  $\times$  7 1/4  $\times$  16 3/8 in.) incl. projecting parts

**Mass (approx.)** 5.0 kg (11 lbs 4 oz)

Design and specifications are subject to change without notice.

### CAUTION

Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

The laser component in this product is capable of emitting radiation exceeding the limit for Class 1.

This appliance is classified as a CLASS 1 LASER product. The CLASS 1 LASER PRODUCT MARKING is located on the rear exterior.

CAUTION	; INVISIBLE LASER RADIATION WHEN OPEN. AVOID EXPOSURE TO BEAM.
ADVARSEL	; USYNLIG LASERSTRÅLING VED ÅBNING NÅR SIKKERHEDSÅFBRYDERE ER UDE AF FUNKTION. UNDGÅ UDSÆTTELSE FOR STRÅLING.
VARO!	; AVATTAESSA JA SUOJALUKITUS OHITETTAESSA OLET ALTIINA LASERSÄTELYLLE.
VARNING	; LASERSTRÅLING NÅR DENNA DEL ÄR ÖPPNAD OCH SPÄRREN ÄR URKOPPLAD.
ADVARSEL	; USYNLIG LASERSTRÅLING NÅR DEKSEL ÅPNES UNGÅ EKSPONERING FOR STRÅLEN.

This caution label is located inside the unit.

### For the customers in Canada

**CAUTION**  
 TO PREVENT ELECTRIC SHOCK,  
 DO NOT USE THIS POLARIZED AC  
 PLUG WITH AN EXTENSION  
 CORD, RECEPTACLE OR OTHER  
 OUTLET UNLESS THE BLADES  
 CAN BE FULLY INSERTED TO  
 PREVENT BLADE EXPOSURE.

# SECTION 1 SERVICING NOTE

## SAFETY CHECK-OUT

After correcting the original service problem, perform the following safety checks before releasing the set to the customer: Check the antenna terminals, metal trim, "metallized" knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.

### LEAKAGE

The AC leakage from any exposed metal part to earth Ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5 mA (500 microamperes). Leakage current can be measured by any one of three methods.

1. A commercial leakage tester, such as the Simpson 229 or RCA WT-540A. Follow the manufacturers' instructions to use these instruments.
2. A battery-operated AC milliammeter. The Data Precision 245 digital multimeter is suitable for this job.
3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The "limit" indication is 0.75 V, so analog meters must have an accurate low-voltage scale. The Simpson 250 and Sanwa SH-63Trd are examples of a passive VOM that is suitable. Nearly all battery operated digital multimeters that have a 2V AC range are suitable. (See Fig. A)

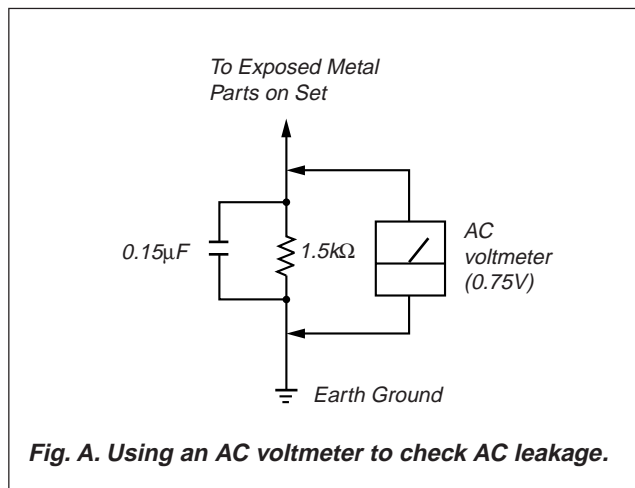

Fig. A. Using an AC voltmeter to check AC leakage.

### NOTES ON HANDLING THE OPTICAL PICK-UP BLOCK OR BASE UNIT

The laser diode in the optical pick-up block may suffer electrostatic breakdown because of the potential difference generated by the charged electrostatic load, etc. on clothing and the human body. During repair, pay attention to electrostatic breakdown and also use the procedure in the printed matter which is included in the repair parts. The flexible board is easily damaged and should be handled with care.

### NOTES ON LASER DIODE EMISSION CHECK

The laser beam on this model is concentrated so as to be focused on the disc reflective surface by the objective lens in the optical pick-up block. Therefore, when checking the laser diode emission, observe from more than 30 cm away from the objective lens.

### LASER DIODE AND FOCUS SEARCH OPERATION CHECK

Carry out the "S curve check" in "CD section adjustment" and check that the S curve waveform is output repeatedly.

### SAFETY-RELATED COMPONENT WARNING !!

COMPONENTS IDENTIFIED BY MARK  $\triangle$  OR DOTTED LINE WITH MARK  $\triangle$  ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

### ATTENTION AU COMPOSANT AYANT RAPPORT À LA SÉCURITÉ!!

LES COMPOSANTS IDENTIFIÉS PAR UNE MARQUE  $\triangle$  SUR LES DIAGRAMMES SCHÉMATIQUES ET LA LISTE DES PIÈCES SONT CRITIQUES POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE REMPLACER CES COMPOSANTS QUE PAR DES PIÈCES SONY DONT LES NUMÉROS SONT DONNÉS DANS CE MANUEL OU DANS LES SUPPLÉMENTS PUBLIÉS PAR SONY.

## SECTION 2 GENERAL

### LOCATION OF PARTS AND CONTROLS

#### Front Panel

- 1 POWER switch
- 2 Front cover
- 3 CONTINUE button
- 4 Display window
- 5 SHUFFLE button
- 6 PROGRAM button
- 7 REPEAT button
- 8 DISC/PUSH ENTER button

- 9 CHECK button
- 10 CLEAR button
- 11 ►►►► button
- 12 ◀◀◀◀ button
- 13 ■ button
- 14 || button
- 15 ▷ button
- 16 PLUS ONE button

## Inserting CDs

You can insert up to 51 discs into this player.

- 1 Press **POWER** to turn on the player.
- 2 Open the front cover by pushing the right edge of the cover.

(Continued)

- 3 Turn the **JOG** dial until you find the disc slot where you want to insert a disc, while checking the disc number (written beside every slot and also indicated in the display).

The disc number at the loading position appears in the display.\* As you turn the **JOG** dial, the disc number changes.

You can play the disc you want independently by using the **Plus One** function. When using this function, insert the disc into the **PLUS ONE** slot. For details, see "Playing Your Favorite Disc Independently" on page 14.

- \* If you have already inserted discs, the disc number at the playing position appears. When you turn the **JOG** dial, the displayed disc number changes to the one at the loading position.

- 4 Insert a disc with the label side facing right.

- Notes**
- Make sure you have inserted the disc into each slot at a right angle to the rotary table. If the disc is not put in straight, it may damage the player or the disc.
  - Make sure the rotary table comes to a complete stop before inserting or removing discs.

With the label side facing right

- 5 Repeat Steps 3 and 4 to insert more discs.
- 6 Close the front cover by pushing the right edge of the cover until it clicks.

The rotary table turns and the disc slot at the loading position is set to the playing position. Always close the front cover except when you insert or remove discs.

**The supplied CD booklet holder helps you locate a disc**  
You can store up to 100 CD booklets.

### Notes

- Do not insert an empty 8 cm (3-inch) CD adaptor (CSA-8). It may damage the player.
- Do not attach anything such as seals or sleeves to CDs. It may damage the player or the disc.
- If you drop a disc into the player and the CD won't go into the slot correctly, consult your nearest Sony dealer.
- When transporting the player, remove all discs from the player.

### Removing CDs

After following Steps 1 to 3 of "Inserting CDs," on pages 5 – 6, remove the discs. Then close the front cover.

#### Note

The disc being played does not come to the loading position if you open the front cover during playback. (The disc number flashes in the display.)

If you want to remove the disc being played, push the JOG dial after opening the front cover. The disc comes to the loading position. Remove the disc after the rotary table comes to a complete stop.

### Locating a Specific Disc

Turn the JOG dial until the disc number you want appears in the display. Push the JOG dial to start play.

### Specifying the Next Disc to Play

You can specify the next disc to play while playing a disc in Continuous or 1 DISC Shuffle Play mode.

While playing a disc, turn the JOG dial until the disc number you want appears in the display.

After the current disc is played, the next disc you have specified starts playing.

If you want to skip to the next disc right away, push the JOG dial while playing the current disc.

#### To cancel the disc you have specified

Press CONTINUE twice.

### Locating a Specific Track or a Point in a Track

You can quickly locate any track while playing a disc using the <<<< (AMS: Automatic Music Sensor) buttons. You can also locate a specific point in a track while playing a disc.

To locate	Press
the next or succeeding tracks	>>>> repeatedly until you find the track
the current or preceding tracks	<<<< repeatedly until you find the track
a point in a track while monitoring the sound	>>>> (forward) or <<<< (backward) and hold down until you find the point
a point in a track quickly by observing the display	>>>> (forward) or <<<< (backward) and hold down until you find the point during pause. You will not hear the sound during the operation.

#### Note

If "7" appears in the display, the disc has reached the end while you were pressing >>>>. Press <<<< to go back.

## Playing Repeatedly

You can play discs/tracks repeatedly in any play mode.

Press REPEAT while playing a disc. "REPEAT" appears in the display. The player repeats the discs/tracks as follows:

When the disc is played in	The player repeats
ALL DISCS Continuous Play (page 8)	All tracks on all discs
1 DISC Continuous Play (page 8)	All tracks on the current disc
ALL DISCS Shuffle Play (page 11)	The player does not repeat discs/tracks but keeps shuffling until you stop play whether or not you press REPEAT.
1 DISC Shuffle Play (page 11)	All tracks on the current disc in random order
Program Play (page 12)	The same program

### To cancel Repeat Play

Press REPEAT repeatedly until "REPEAT" disappears from the display.

### Repeating the current track

You can repeat only the current track.

While the track you want is being played, press REPEAT repeatedly until "REPEAT 1" appears in the display.

## Playing in Random Order (Shuffle Play)

You can have the player "shuffle" the tracks and play in random order. The player shuffles all the tracks on all discs or on the disc you specified.

- 1 Press SHUFFLE to select ALL DISCS or 1 DISC Shuffle Play mode. Each time you press SHUFFLE, "ALL DISCS" or "1 DISC" appears in the display.

When you select	The player plays
ALL DISCS	All tracks on all discs in random order. The player keeps shuffling tracks until you stop play.*
1 DISC	All tracks on the specific disc in random order

\* The player may play the same track more than once.

- 2 When you want to specify the disc for 1 DISC Shuffle Play, turn the JOG dial until the disc number you want appears in the display.

- 3 Push the JOG dial or press  $\blacktriangleleft$ .

ALL DISCS or 1 DISC Shuffle Play starts. "LJ" appears in the display while the player is "shuffling" the discs or the tracks.

## Creating Your Own Program (Program Play)

You can arrange the order of the tracks and/or discs to create your own program and the program is stored automatically. A program can contain up to 32 "steps" — one "step" may contain a track or a whole disc.

- 1 Press PROGRAM. If a program is already stored, the last step of the program appears in the display. When you want to erase the whole program, hold down CLEAR until "All Clr" appears in the display (see page 13).

- 2 Turn the JOG dial until the disc number you want appears in the display.

Disc number

- 3 To program a whole disc, skip this step. Press  $\blacktriangleleft$  until the track number you want appears in the display.

Track number

- 4 Push the JOC dial or press PROGRAM.

- 5 To program other discs/tracks, do the following:

To program	Repeat Steps
Other discs	2 and 4
Other tracks on the same disc	3 and 4
Other tracks on other discs	2 to 4

- 6 Press  $\square$  to start Program Play.

To cancel Program Play

Press CONTINUE.

**Lightbulb icon:** The program remains even after Program Play ends  
When you press  $\square$ , you can play the same program again.

**Lightbulb icon:** When you press PROGRAM during Continuous or Shuffle Play  
The program will be played after the current track.

**Lightbulb icon:** The program remains until you erase them  
If you replace discs, the programmed disc and track numbers remain. So, the player plays only the existing disc and track numbers. However, the disc and track numbers that are not found in the player or on the disc are deleted from the program, and the rest of the program is played in the programmed order.

### Checking the programmed order

You can check your program before or after you start playing.

Press CHECK.  
Each time you press this button, the display shows the disc and track number of each step in the programmed order. (When a whole disc is programmed as one step, "AL" appears instead of the track number.) After the last step in the program, the display shows "End" and returns to the original display.

### Changing the programmed order

You can change your program before you start playing.

To	You need to
Erase a track or disc	Press CHECK until the track or disc you do not want appears in the display, then press CLEAR
Erase the last track or disc in the program	Press CLEAR. Each time you press the button, the last track or disc will be cleared.
Add tracks or discs to the end of the program	Follow the programming procedure
Change the whole program completely	Hold down CLEAR until "All Clr" appears in the display to erase the whole program, then create a new program following the programming procedure

### Erasing the program stored in memory

- 1 Press PROGRAM in the stop mode.
- 2 Hold down CLEAR until "All Clr" appears in the display.

### Playing Your favorite Disc Independently (Plus One Play)

Use a programmed disc to play only one disc, even if you have programmed other discs/tracks in the program. When you press the button, the player automatically starts to play the programmed disc.

- 5 Repeat the programming procedure
- 7 Press CHECK until the programmed disc appears in the display

You can press the button to start to play the programmed disc.

- 3 Press the button to start to play the programmed disc.
- 4 Press the button to start to play the programmed disc. The display shows the track number of the programmed disc.

To cancel the Plus One Play  
Press the button to start to play the programmed disc. The display shows the track number of the programmed disc.

If you have programmed other discs/tracks in the program, you can press the button to start to play the programmed disc.

You can press the button to start to play the programmed disc.

Repeat  
If you have programmed other discs/tracks in the program, you can press the button to start to play the programmed disc.

## SECTION 3 DISASSEMBLY

**Note :** Follow the disassembly procedure in the numerical order given.

### 3-1. FRONT PANEL

### 3-2. ILLUMINATION ASSY

While pressing arrows **A**, **B**, and **C**, rotate the illumination assembly in arrow direction **D** and remove it.

### 3-3. BASE UNIT AND MAGNET HOLDER

**3-4. CD MECHANISM SECTION**

## SECTION 4 TEST MODE

### DISPLAY CHECK MODE

**NOTE:**

This will not work properly if the DISC is set to any slit.

1. Press the **POWER** button, turn ON the power, and set a CD in any slit.
2. Press the **POWER** button, and turn OFF the power.
3. While pressing the **CHECK** and **PLUS ONE** buttons together with the power OFF, press the **POWER** button and turn ON the power.
4. All the segments of the fluorescent indicator tube light up, and the **▷**, **||**, and **PLUS ONE** LEDs light up.
5. To exit the display check mode, press the **POWER** button or **■** button.

### ADJ MODE

1. Press the **POWER** button to turn the power ON.
2. Open the front cover, and press the **PLUS ONE** button.
3. Set the disc (YEDS-18 : 3-702-101-01) in the PLUS ONE slit.
4. Close the front cover, and chuck the disc.
5. Press the **POWER** button, and turn OFF the power.
6. Connect TP (TP301:ADJ) of the DISPLAY board and the ground with a lead wire.
7. Press the **POWER** button and turn ON the power.

The ADJ mode is set with the above.

Differences with normal mode

- No high speed search is performed during access
- Ignored even if GFS becomes L
- Ignored even if Q data cannot be read
- Spindle servo gain is set to 12 cm mode (Even with 8 cm disc)

The following special functions will work when certain functions are pressed in this mode.

#### Special functions in ADJ mode

(The ( ) buttons function only with the general purpose remote.)

Button	Function
(3)	Tracking servo , sled servo OFF
(8)	Tracking servo, sled servo ON
CHECK	S shape observation mode

### FLUORESCENT INDICATOR TUBE, LED ALL LIT, AND KEY CHECK MODE

Connect TP (TP302:AFADJ) of the DISPLAY board and the ground with the power OFF and press the **POWER** button.

The fluorescent indicator tube and LEDs all light up.

When a button is pressed, the left side of the indicator tube will show how many buttons have been pressed so far.

(However, buttons already pressed once will not be counted.)

The right side will show the numbers corresponding to the pressed buttons.

#### [ DISPLAY BOARD ] — CONDUCTOR SIDE —

#### Buttons and Corresponding Button Numbers

Button	Button Number or Display
CONTINUE	1
SHUFFLE	2
PROGRAM	3
REPEAT	4
CHECK	5
CLEAR	6
PLUS ONE	7
▷	8 (The fluorescent indicator tube and LED near by (D801) are lit while pressed.)
	9 (The fluorescent indicator tube (segment check) is partially lit and LED near by (D802) is lit while pressed.)
■	10 (The fluorescent indicator tube is partially lit while pressed (grid check).)
◀◀ ◀	11
▶ ▶▶▶	12

1. Grid check

2. Segment check

**Key Inputs Other than Buttons and How to Display**

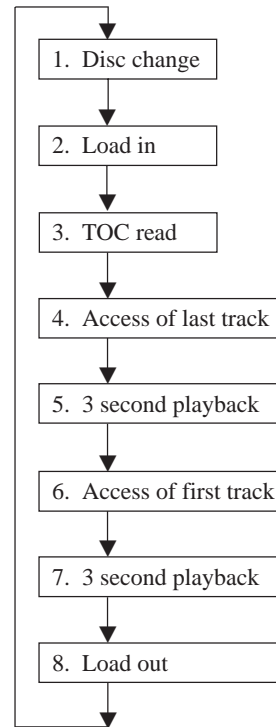

Key input	Display
Rotate the JOG knob to the right	Fluorescent indicator tube block indicator lights up in the order of 1 → 2 → ...8 → 1.
Rotate the JOG knob to the left	Fluorescent indicator tube block indicator lights up in the order of 8 → 7 → ... 1 → 8.
Press the JOG knob (ENTER)	Fluorescent indicator tube block indicator goes OFF.
Door cover "Close"	[PLUS ONE] LED lights up
Door cover "Open"	[PLUS ONE] LED goes OFF

**AGING MODE**

- Mode which repeatedly changes and plays back discs automatically in the unit.
- It will repeat aging as long as no errors occur.
- If an error occurs during aging, it will stop all servos, motors, etc. instantaneously, display the error number, and stop operations. However, the stopping conditions differ according to whether the unit is equipped with the "self-protection function during errors" described later.  
The function serves to maintain the state of the unit when errors occur.

**Sequence of Aging Mode**

**Order of Disc Change**  
(1 cycle takes 3 minutes)

\* DISC No. 40 chucks twice during one cycle. To differentiate, the "[8]" on the block indicator of the fluorescent indicator tube will light up during the second chucking.

**Special Functions in Aging Mode**

There are some useful function in the aging mode.

- Disc setting mode\*1
- Switching of use/disuse of protection function in errors \*2
- Aging cycle count function \*3

\*1 Disc setting mode:

5 discs are set before setting the aging mode. This mode makes the setting of these discs more easy.

\*2 Switching of use/disuse of protection function in errors:

Function which voluntarily corrects errors which occur during normal operations by retries.  
If this function is not provided, all operations will be stopped without retiring. It is suitable for checking errors with low reproducibility.  
If this function is provided, and errors can be corrected by retries, aging will be continued without stopping.  
(The normal aging should be performed with "be".)

\*3 Aging cycle count function:

Functions which displays the number of agings carried out on the Fluorescent indicator tube in numbers. One aging cycle consists of six discs.

### Aging procedure:

Some operating method will be changed depending on if the following jig for the aging mode exists or not.

- Jig

Parts. No	Description
J-2501-123-A	Remote commander (For aging mode)

### With remote commander for aging mode:

1. Turn ON the power of the unit. Open the front cover.
2. Press the **AGING START** button of the remote commander for aging mode.
3. When the disc set mode is set, the  and  LEDs blink.
4. Rotate the JOG dial. The slits (No. 10, 20, 30, 40, 51) for setting the discs will come forward. Insert the discs into these slits. Do not set the discs in other slits.
5. Set the use/disuse of the self protection function in errors. Press the **REPEAT** button. When REPEAT is displayed on the fluorescent indicator tube, the self protection function during the error will become "Use".  
If the REPEAT display is OFF, it means that the function is not used. (Normally set to "Use" when performing aging.)
7. Press the  button.
8. The  LED blinks, the aging mode is set, and aging is started.
9. The aging cycle lasts 3 minutes. When problems occur during aging, the error number will be displayed on the fluorescent indicator tube, and the  LED will light up.  
(Refer to the following table for the details of the errors.)
10. Aging will be repeated as long as no errors occur.
11. After each aging cycle, the number displayed on the Fluorescent indicator tube will increase.
12. To end aging, press the **POWER** button

### Without remote commander for aging mode:

1. Turn ON the power of the unit. Open the front cover.
2. Press the **CLEAR**, , and  buttons in order.
3. When the disc set mode is set, the  and  LEDs blink.

The following procedure is the same as in the case "With remote commander for aging mode".

### Error Display

### Error code

Code number	Name	Contents
Err 01	DISC sensor check 1	No disc in the specified slit
Err 02	DISC sensor check 2	Disc in other slits
Err 03	—————	No function
Err 04	Table operation check 2	No table sensor input
Err 05	Loading operation check 1	Load in timeover
Err 06	Loading operation check 2	Load out timeover
Err *1	BU related check 1	Access timeover
Err *2	BU related check 2	High speed search NG
Err *3	BU related check 3	Q data read error
Err *4	BU related check 4	BU operation (From focus search to until signal can be read) timeover
Err *5	BU related check 5	GFS monitor error
Err *6	BU related check 6	Focus cannot be imposed by focus search

The \* numbers mean the following according to the state of the unit during aging

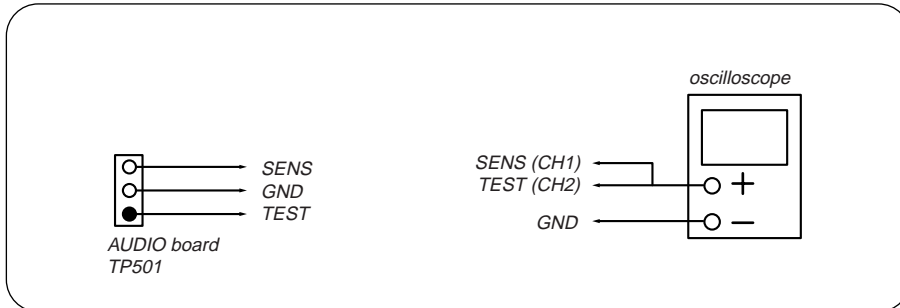

- 2 : From chucking to end of TOC read
- 3 : From end of TOC read to end of last track playback
- 4 : From end of last track playback to end of first track playback

## SECTION 5 MECHANICAL ADJUSTMENTS

To adjust the mechanism section, enter the mechanism section adjustment mode.  
For how to enter the mechanism section adjustment mode, refer to each adjustment section.

### DISC SENSOR ALIGNMENT

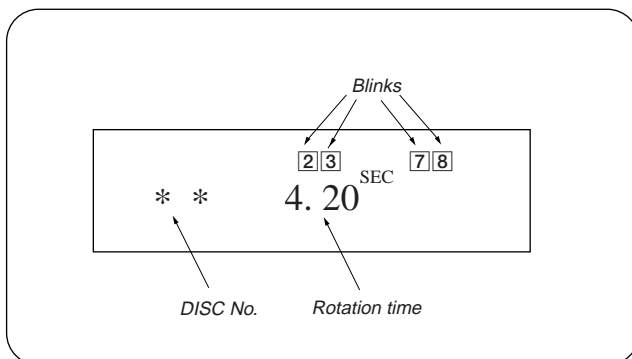

1. Make sure that there is no disc in the unit.
2. Connect an oscilloscope to TP501 of the AUDIO board.

3. While pressing the **CLEAR** and **PLUS ONE** buttons at the same time and turn ON the power.

4. The fluorescent indicator tube shows as follows, and the mechanism section adjustment mode is set.

5. The disc table rotates in the counterclockwise direction. The disc table rotation time is displayed with "PLUS ONE" slit as a measuring point. ("LEFT" is displayed initially.)
6. Measure the waveform of the oscilloscope when the disc table is rotating.

7. Move the holder (sensor) center so that the flat portion center at the top of the SENS (CH1) input waveform and the “H” center of TEST (CH2) coincide.

8. Tighten the fixed screw to fix the disc table, then press the **CLEAR** button.
9. The disc table rotates in the clockwise direction. Measure the waveform and make sure that the flat portion center at the top of the SENS (CH1) input waveform and the “H” center of TEST (CH2) coincide.
10. If the adjustment is not successful, press the **CLEAR** button to rotate the disc table in the counterclockwise direction, and perform steps 6 to 9.
- Note:** During the adjustment mode, the rotational direction is switched each time the **CLEAR** button is pressed. Immediately after the button is pressed, “LEFT” or “right” is displayed to notify of the rotational direction. Pressing the **CHECK** button enters the loading mode which will be described later. Pressing the **CLEAR** button rotates the disc table again.

## MAGNET ASSY ALIGNMENT

1. Check that there is no disc in the unit and then turn ON the power. Open the door, and set a disc in the PLUS ONE slit.
2. Turn OFF the power, close the door, and while pressing the **CLEAR** and **PLUS ONE** buttons simultaneously, turn ON the power again.
3. Press the **CHECK** button, and set the loading mode.
4. Press the **▶▶▶▶▶▶▶▶▶▶** button and chuck the disc.
5. Adjust the magnet assembly and magnet holder so that  $A=B$  as shown in the figure.

## DISC HOLDER A ALIGNMENT

1. Check that there is no disc in the unit and then turn ON the power. Open the door, and set a disc in the PLUS ONE slit.
2. Turn OFF the power, close the door, and while pressing the **CLEAR** and **PLUS ONE** buttons simultaneously, turn ON the power again.
3. Press the **CHECK** button, and set the loading mode.
4. Press the **▶▶▶▶▶▶▶▶▶▶** button and chuck the disc.
5. Press **▶▶▶▶▶▶▶▶▶▶** or **▶▶▶▶▶▶▶▶▶▶** button to stop the disc holder A slightly away from the disc.
6. Rotate and adjust the adjusting screw so that the center of the disc and that of the disc holder coincide.

## SECTION 6 ELECTRICAL ADJUSTMENTS

**Note :**

1. CD Block is basically designed to operate without adjustment. Therefore, check each item in order given.
2. Use YEDS-18 disc (3-702-101-01) unless otherwise indicated.
3. Use an oscilloscope with more than 10MΩ impedance.
4. Clean the object lens by an applicator with neutral detergent when the signal level is low than specified value with the following checks.

**S Curve Check**

**Procedure :**

1. Press the **POWER** button and turn ON the power supply.
2. Open the front cover, and press the **PLUS ONE** button.
3. Set the disc (YEDS-18) into the "PLUS ONE" slit.
4. Close the front cover, and chuck the disc.
5. Press the **POWER** button and turn OFF the power.
6. Connect the oscilloscope to TP (FE) of the BD board.
7. Connect TP (ADJ) of the DISPLAY board and the ground with a lead wire.
8. Press the **POWER** button and turn ON the power.
9. The first track will be played back automatically. When the **CHECK** button is pressed, "S J1" will be displayed on the fluorescent indicator tube, and focus search will be repeated.
10. Check the oscilloscope waveform (S-curve) is symmetrical between A and B. And confirm peak to peak level within  $1.8 \pm 0.6$  Vp-p.

S-curve waveform

11. Turn OFF the power, and remove the lead wire connected at step 7.

- Note :**
- Try to measure several times to make sure than the ratio of A : B or B : A is more than 10 : 7.
  - Take sweep time as long as possible and light up the brightness to obtain best waveform.

**RF Level Check**

**Procedure :**

1. Press the **POWER** button and turn ON the power supply.
2. Open the front cover, and press the **PLUS ONE** button.
3. Set the disc (YEDS-18) into the "PLUS ONE" slit.
4. Close the front cover, and chuck the disc.
5. Press the **POWER** button and turn OFF the power.
6. Connect the oscilloscope to TP (RF) of the BD board.
7. Connect TP (ADJ) of the DISPLAY board and the ground with a lead wire.
8. Press the **POWER** button and turn ON the power.
9. Playback the fifth track of the disc.

10. Confirm that oscilloscope waveform is clear and check RF signal level is correct or not.
11. Turn OFF the power, and remove the lead wire connected at step 7.

**Note :** A clear RF signal waveform means that the shape "∅" can be clearly distinguished at the center of the waveform.

RF signal waveform

**E-F Balance (Traverse) Check**

The procedure for this checking method differs for when a general remote control unit is used and not used.

**When a general remote commander is used:**

1. Press the **POWER** button and turn ON the power supply.
2. Open the front cover, and press the **PLUS ONE** button.
3. Set the disc (YEDS-18) into the "PLUS ONE" slit.
4. Close the front cover, and chuck the disc.
5. Press the **POWER** button and turn OFF the power.
6. Connect the oscilloscope to TP (TE) of the BD board.
7. Connect TP (ADJ) of the DISPLAY board and the ground with a lead wire.
8. Press the **POWER** button and turn ON the power.
9. Playback the fifth track of the disc.
10. Press the **3** button on the remote commander. (The tracking servo and the sledding servo are turned OFF.)
11. Check the level B of the oscilloscope's waveform and the A (DC voltage) of the center of the Traverse waveform. Confirm the following :  
 $A/B \times 100 = \text{less than } \pm 10\%$

Traverse waveform

12. Press the **8** button on the remote control unit. (The tracking servo and sledding servo are turned ON.) Confirm the C (DC voltage) is almost equal to the A (DC voltage) is step 11.

Traverse waveform

13. Turn OFF the power, and remove the lead wire connected at step 7.

## SECTION 7 DIAGRAMS

### 7-1. CIRCUIT BOARDS LOCATION

#### When a general remote commander is not used:

- Solder lead wires to TP (DVDD) and TP (TOFF) on the BD board severally.
- Connect the oscilloscope to TP (TE) of the BD board.
- Press the [POWER] button and turn ON the power supply.
- Open the front cover, and press the [PLUS ONE] button.
- Set the disc (YEDS-18) into the "PLUS ONE" slit.
- Close the front cover, and chuck the disc.
- Playback the fifth track of the disc.
- Short-circuit the lead wire connected at step 1. (The tracking servo is turned OFF)
- Check the level B of the oscilloscope's waveform and the A (DC voltage) of the center of the Traverse waveform.  
Confirm the following:  
 $A/B \times 100 = \text{less than } \pm 10\%$

- Disconnect the lead wire short-circuited at step 8. (The tracking servo is turned ON.) Confirm the C (DC voltage) is almost equal to the A (DC voltage) is step 8.

- Turn OFF the power, and remove the lead wire connected at step 1.

#### RF PLL Free-run Frequency Check

##### Procedure :

- Connect the frequency counter to TP (PLCK) of the BD board.

- Press the [POWER] button and turn ON the power supply.
- Open the front cover, and press the [PLUS ONE] button.
- Set the disc (YEDS-18) into the "PLUS ONE" slit.
- Close the front cover, and chuck the disc.
- Playback the fifth track of the disc.
- Confirm that reading on frequency counter is  $4.3218 \text{ MHz} \pm 30 \text{ kHz}$ .

#### About RV502 on the AUDIO board

RV502 of the AUDIO board requires no adjustments. Please note that it should be dixed to mechanical center position when you moved and do not know origin position.

## 7-8. IC PIN FUNCTIONS

### • IC101 FOCUS/TRACKING/SLED SERVO (LA9240M)

Pin No.	Pin Name	I/O	Function
1	FIN2	I	Connected to the pick-up photodiode Added with FIN1 to create RF signal, subtracted with FIN1 to create FE signal
2	FIN1	I	Connected to the pick-up photodiode
3	E	I	Connected to the pick-up photodiode Subtracted with F to create TE signal
4	F	I	Connected to the pick-up photodiode
5	TB	I	DC component of the TE signal is input
6	TE-	I	Connects the TE signal gain setting resistor between TE pins
7	TE	O	TE signal output
8	TESI	I	TES (Track Error Sense) comparator input. The TE signal is band-passed and input
9	SCI	I	Shock detection input
10	TH	I	Tracking gain time constant setting
11	TA	O	TA amplifier output
12	TD-	I	Creates a tracking phase compensation constant between TD and VR pins
13	TD	O	Tracking phase compensation setting
14	JP	I	Tracking jump signal (kick pulse) amplitude setting
15	TO	O	Tracking control signal output
16	FD	O	Focusing control signal output
17	FD-	I	Creates a focusing phase compensation constant between FD and FA pins
18	FA	O	Creates a focusing phase compensation constant between FD- and FA- pins
19	FA-	I	Creates a focusing phase compensation constant between FA and FE pins
20	FE	O	FE signal output
21	FE-	I	Connects the FE signal gain setting resistor between TE pins
22	AGND	-	Analog signal Ground
23	SP	O	Single end output of CV+ and CV- pin signal
24	SPI	I	Spindle amplifier input
25	SPG	I	Gain setting resistor is connected when the spindle 12cm mode
26	SP-	I	Works together with the SPD pin to connect to the spindle phase compensation constant
27	SPD	O	Spindle control signal output
28	SLEQ	I	Sled phase compensation constant is connected
29	SLD	O	Sled control signal output
30	SL-	I	Sled feeding signal is input from the microprocessor
31	SL+	I	Sled feeding signal is input from the microprocessor
32	JP-	I	Tracking jump signal is input from the DSP
33	JP+	I	Tracking jump signal is input from the DSP
34	TGL	I	Tracking gain control signal is input from the DSP Gain becomes low when TGL is "H"
35	TOFF	I	Tracking off control signal is input from the DSP Tracking becomes off when TOFF is "H"
36	TES	O	Outputs TES signal to the DSP
37	HFL	O	HFL (High Frequency Level) is used to determine whether the main beam is positioned on a pit or a mirror

Pin No.	Pin Name	I/O	Function
38	SLOF	I	Sled servo off control input
39	CV-	I	CLV error signal is input from the digital signal processor
40	CV+	I	CLV error signal is input from the digital signal processor
41	RFSM	O	RF output
42	RFS-	I	Works together with the RFSM pin to set the RF gain and the 3T compensation constant for the EFM signal
43	SLC	O	SLI (Slice Level Control) is output to control a data slice level of the RF waveform by the digital signal processor
44	SLI	I	Input pin for controlling a data slice level by the digital signal processor
45	DGND	-	Digital Ground
46	FSC	O	Focus search smoothing capacitor output
47	TBC	I	TBC (Tracking Balance Control) sets a EF balance variable range
48	NC	-	Not used
49	DEF	O	Defect detection output for a disc
50	CLK	I	Reference clock input The 4.23 MHz of the digital signal processor is input
51	CL	I	Microprocessor command clock input
52	DAT	I	Microprocessor command data input
53	CE	I	Microprocessor command chip enable input
54	DRF	O	DRF (Defect RF) outputs a RF level detection
55	FSS	I	FSS (Focus Search Select) is a switching pin for the focus search mode ( $\pm$ search/+search for a reference voltage)
56	VCC2	-	Servo system and digital system VCC
57	RFFI	I	Reference voltage bus control is connected
58	VR	O	Reference voltage output
59	LF2	I	Constant setting for a disc defect detection
60	PH1	I	Connected to the capacitor for the RF signal peak hold
61	BH1	I	Connected to the capacitor for the RF signal bottom hold
62	LDD	O	APC circuit output
63	LDS	I	APC circuit input
64	VCC1	-	RF system VCC

- Abbreviation  
EFM : Eight to Fourteen Modulation  
APC : Auto Power Control

#### • IC102 DIGITAL SIGNAL PROCESSOR (LC78622E)

Pin No.	Pin Name	I/O	Function
1	DEFI	I	Defect detection signal (DEF) input (Be sure to connect to 0 when not in use)
2	TAI	I	PLL Test input Incorporates a pull-down resistor Be sure to connect to 0V
3	PDO	O	PLL Phase comparison output for external VCO control
4	VVSS	-	PLL Ground for the built-in VCO Be sure to connect to 0 when not in use
5	ISET	I	Connected to a current adjusting resistor for the PDO output
6	VVDD	-	Built-in VCO power supply
7	FR	I	Adjusts the VCO frequency range
8	VSS	-	Digital Ground Be sure to connect to 0
9	EFMO	O	Slice level control EFM signal output
10	EFMIN	I	Slice level control EFM signal input
11	TEST2	I	Test input Incorporates a pull-down resistor Be sure to connect to 0V
12	CLV+	O	Disc motor control output 3-value output available depending on the command
13	CLV-	O	
14	$\overline{V/P}$	O	Rough servo/phase control automatic switching monitor output "H":rough servo, "L":phase servo
15	HFL	I	Tracking detection signal input Schmidt input
16	TES	I	Tracking error signal input Schmidt input
17	TOFF	O	Tracking OFF output
18	TGL	O	Tracking gain switching output Raises gain when "L"
19	JP+	O	Track jump control output 3-value output available depending on the command
20	JP-	O	
21	PCK	O	EFM data playback clock monitor 4.3218 MHz when phase is locked
22	FSEQ	O	Sync signal detection output "H" when a sync signal detected from the EFM signal and that generated internally coincide
23	VDD	-	Digital power supply
24	CONT1	I/O	General purpose output 1 Performs control using a serial data command from the microprocessor When not in use, connect to 0V by setting to an input or set to an open state by setting to an output
25	CONT2	I/O	General purpose output 2 Performs control using a serial data command from the microprocessor When not in use, connect to 0V by setting to an input or set to an open state by setting to an output
26	CONT3	I/O	General purpose output 3 Performs control using a serial data command from the microprocessor When not in use, connect to 0V by setting to an input or set to an open state by setting to an output
27	CONT4	I/O	General purpose output 4 Performs control using a serial data command from the microprocessor When not in use, connect to 0V by setting to an input or set to an open state by setting to an output
28	CONT5	I/O	General purpose output 5 Performs control using a serial data command from the microprocessor When not in use, connect to 0V by setting to an input or set to an open state by setting to an output

- Abbreviation  
PLL : Phase Locked Loop  
EFM : Eight to Fourteen Modulation

Pin No.	Pin Name	I/O	Function
29	EMPH	O	Deemphasis monitor The deemphasis disc is being played back when “H”
30	C2F	O	C2 flag output
31	DOUT	O	Digital OUT output (EIAJ format)
32	TEST3	I	Test input Incorporates a pull-down resistor Be sure to connect to 0V
33	TEST4	I	Test input Incorporates a pull-down resistor Be sure to connect to 0V
34	N. C.	–	Not used Be sure to use it in an open state
35	MUTEL	O	L channel 1-bit DAC L channel mute output
36	LVDD	–	L channel 1-bit DAC L channel power supply
37	LCHO	O	L channel 1-bit DAC L channel output
38	LVSS	–	L channel 1-bit DAC L channel ground Be sure to connect to 0V
39	RVSS	–	R channel 1-bit DAC R channel ground Be sure to connect to 0V
40	RCHO	O	R channel 1-bit DAC R channel output
41	RVDD	–	R channel 1-bit DAC R channel power supply
42	MUTER	O	R channel 1-bit DAC R channel mute output
43	XVDD	–	Power supply for the crystal oscillator
44	XOUT	O	Connected to the 16.9344 MHz crystal oscillator
45	XIN	I	
46	XVSS	–	Ground for the crystal oscillator Be sure to connect to 0V
47	SBSY	O	Sync signal output for the subcode block
48	EFLG	O	C1, C2, single correction, and double correction monitor
49	PW	O	Subcode P, Q, R, S, T, U, W output
50	SFSY	O	Subcode frame sync signal output Rises when the subcode is in a standby
51	SBCK	I	Subcode read clock input Schmidt input (Connect to 0V when not in use)
52	FSX	O	7.35 kHz sync signal output divided from the crystal oscillation
53	WRQ	O	Subcode Q output standby output
54	RWC	I	Read/write control input Schmidt input
55	SQOUT	O	Subcode Q output
56	COIN	I	Command input from the microprocessor
57	$\overline{\text{CQCK}}$	I	Command input fetching clock input or subcode extracting clock input from SQOUT Schmidt input
58	$\overline{\text{RES}}$	I	LC78622 reset input Temporarily set to “L” when the power is turned ON
59	TST11	O	Test output Use it in an open state (Normally, “L” output)
60	16M	O	16.9344 MHz output
61	4.2M	O	4.2336 MHz output
62	TEST5	I	Test input. Incorporates a pull-down resistor. Be sure to connect to 0V
63	$\overline{\text{CS}}$	I	Chip select input Incorporates a pull-down resistor Be sure to connect to 0V when not in control
64	TEST1	I	Test input Does not incorporate a pull-down resistor Be sure to connect to 0V

**Note)** Supply the same potential to each power supply pin (VDD, VVDD, LVDD, RVDD, XVDD).

• IC801 SYSTEM CONTROL (CXP82320-074Q)

Pin No.	Pin Name	I/O	Function
1	TSENS1	I	Table sensor input
2	RMIN	I	SIRCS input
3	GND	–	Ground
4	NC	O	Not used
5	NC	O	Not used
6	DRF	I	DRF (FOK) input
7	RWC	O	RWC (Latch) output
8	CQCK	O	Command output/Clock output for sub code
9	SQOUT	I	Sub code reading data input
10	COIN	O	Command data output
11	TGL	I	TGL input
12	DOOR SW	I	DOOR SW input
13	NC	O	Not used
14	SL+	O	Sled motor (External circuit direction) output
15	SL–	O	Sled motor (Internal circuit direction) output
16	LOAD OUT	O	Loading motor (Out a direction) output PWM output
17	LOAD IN	O	Loading motor (In a direction) output PWM output
18	TABLE L	O	Table rotation (Left a direction) output PWM output
19	TABLE R	O	Table rotation (Right a direction) output PWM output
20	DOWN SW	I	Loading out SW input
21	UP SW	I	Loading in SW input
22	ISENS	O	Not used
23	DSSENS	I	Disc sensor analog input
24	KEY0	I	Operation key (0) analog input
25	KEY1	I	Operation key (1) analog input
26	KEY2	O	Not used
27	TEST MODE	I	Test mode analog input
28	JOG1	I	Jog dial phase input (1)
29	JOG2	I	Jog dial phase input (2)
30	RESET	I	Micon reset input
31	10MHz	–	Ceramic oscillator pin
32	10MHz	–	Ceramic oscillator pin
33	GND	–	Ground
34	PLAY LED	O	PLAY LED Output (H: ON)
35	PAUSE LED	O	PAUSE LED Output (H: ON)
36	PLUS 1 LED	O	PLUS ONE LED Output (H: ON)
37	NC	O	Not used
38	NC	O	Not used
39	NC	O	Not used
40	NC	O	Not used

**SECTION 9  
ELECTRICAL PARTS LIST**

**Note:**

The components identified by mark  $\Delta$  or dotted line with mark  $\Delta$  are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque  $\Delta$  sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

When indicating parts by reference number, please include the board name.

- Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- Items marked "\*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- RESISTORS  
All resistors are in ohms  
METAL: Metal-film resistor  
METAL OXIDE: Metal Oxide-film resistor  
F : nonflammable
- SEMICONDUCTORS  
In each case, u:  $\mu$ , for example:  
uA...:  $\mu$  A..., uPA...:  $\mu$  PA..., uPB...:  $\mu$  PB...,  
uPC...:  $\mu$  PC..., uPD...:  $\mu$  PD...
- CAPACITORS  
uF :  $\mu$  F
- COILS  
uH :  $\mu$  H
- Abbreviation  
CND : Canadian model  
G : German model  
SP : Singapore model  
AUS : Australian model

The components identified by mark △ or dotted line with mark △ are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque △ sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.
