● **Power supply for service**

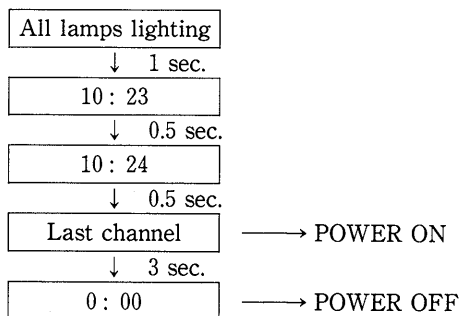

Since this machine has no power source in itself, the power is supplied form AMP TA-H300 used for this series. As shown in the following table, this machine requires 4types of voltage, and supplying each type of voltage separately makes complicated connections.

Accordingly, make connection with TA-H300 at time of service, such as electrifying repair.

- AC 3.9V FL-tube filament voltage
- DC -24V Display controller IC701, grid voltage
- DC 5V Display controller IC701, V_{CC}
- DC 13V PLL control voltage

● **Service mode for checking the timer ON/OFF**

- 1) Connect with AMP TA-H300 and set the power switch of TA-H300 to the state of STANDBY.
- 2) Set the time of tuner to a proper time (any time).
- 3) Press 3 switches simultaneously, namely, TUNING - , SHIFT and ENTER.
- 4) FL-tube display

- 5) End

—Caution for Service—

• Reset of IC701

The display controller IC701 is reset by short-circuiting both edges of C702 (0.47μF) while power OFF and discharging electricity.

After resetting, the following frequencies are pre-set to the memory.

When the repair is completed, return the memory to the preceding state (content).

The automatic tuning allows you to receive stations whose signal is strong enough. When the signal is too weak, use the manual tuning.

Tuning in Automatically

- 1 Press **TUNER**.
- 2 Press **BAND** repeatedly until the desired band appears.
As you press **BAND**, the band changes as follows: FM → MW → LW
- 3 Press **AUTO/MANUAL**.
Make sure that **AUTO** appears in the display.
- 4 Tune in to the station with **TUNING** + or -.
- 5 For receiving FM stations with the stereo effect, press **STEREO/MUTING** so that **MUTING** appears.

Tuning in Manually

- 1 Press **TUNER**.
- 2 Select band by pressing **BAND**.
- 3 Press **AUTO/MANUAL** so that **AUTO** disappears from the display.
- 4 Tune in to the station with **TUNING** + or -.

Indicator on the display

TUNED: Appears when a station of sufficient signal strength is tuned in.
STEREO: Appears when an FM stereo program of sufficient signal strength is received.

When an FM stereo program is noisy or hard to receive
Press **STEREO/MUTING** so that **MUTING** disappears from the display. There will be no stereo effect, but the reception will be improved. Press again to restore the stereo effect.

Antenna adjustment **A**
For MW and LW reception, find the best location for the AM loop antenna.
