FEATURES

The STR-AV260L is a receiver whose video sound input/output jacks make it possible to connect a hi-fi video cassette recorder to your audio system.

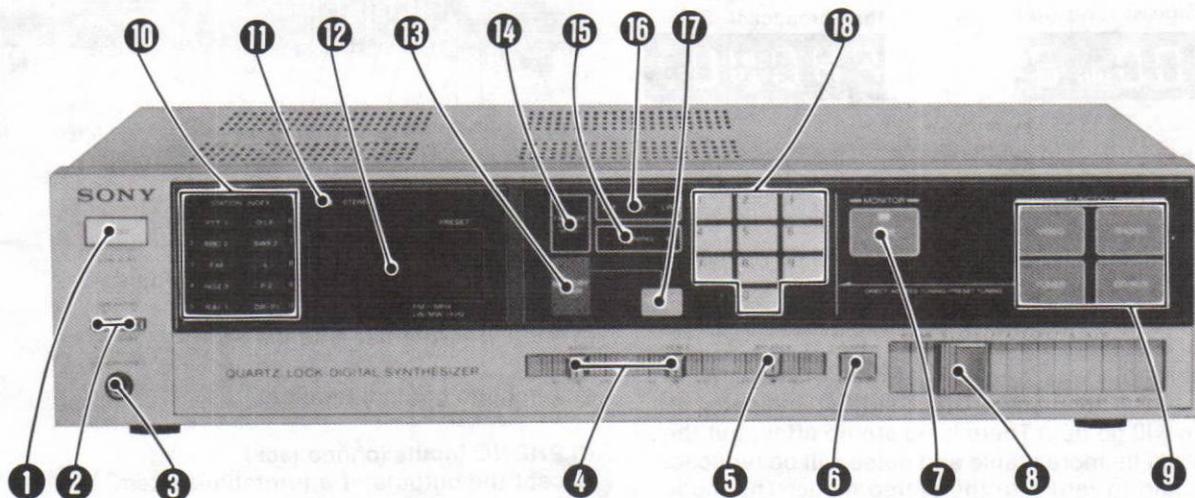

The STR-AV260L employs a direct access tuning system which makes station selection easier than ever.

- A quartz-locked digital synthesizer system with a sophisticated Phase-Locked Loop (PLL) circuit allows extremely precise tuning of FM, MW and LW stations with an electronic digital readout on the frequency display. A total of 10 stations can be preset.

- With the single touch of a key, the desired function can be initiated or a preset station can be immediately tuned in and shown in the fluorescent display.

- Amplifier section provides 30W + 30W power output (DIN 45500) for your home audio-video system.

- Two separate speaker systems can be connected.

Amplifier section

1 POWER switch

Turns the operating power on or off. When this switch is pressed, the frequency of the last station to be received will be displayed.

2 SPEAKERS selectors

Select speaker system A or B, or both.

3 HEADPHONES jack

Accepts any low or high impedance stereo headphones. For headphone monitoring only, keep both SPEAKERS selectors released.

4 BASS and TREBLE controls

Control the prominence of bass and treble response.

5 BALANCE control

Governs the amount of sound coming from each paired speaker to get optimum stereo effect. Sliding the control towards RIGHT will decrease the left channel volume, and sliding the control towards LEFT will decrease the right channel volume.

6 LOUDNESS switch

When listening to program sources at a low VOLUME control setting, depress the switch (ON). The loudness circuit compensates for the human ear's decreased response to very low frequency sound at low volume levels, and provides an apparently uniform response.

7 MONITOR (TAPE) key

Press this key to listen to a tape deck connected to the TAPE inputs on the rear panel. The indicator will light up. Press the key again to disengage it.

8 VOLUME control

Regulates the overall sound level.

9 FUNCTION select keys

Press one of these keys to select a desired program source other than a taped program. The associated indication of the pressed key will appear in the display window.

VIDEO: For video taped programs (connected to VIDEO inputs).

PHONO: For record programs (connected to PHONO inputs).

TUNER: For broadcasting programs.

When this key is pressed, the frequency of the last station to be received will appear.

CD/AUX: For compact disc or auxiliary programs (connected to the CD/AUX inputs).

10 STATION INDEX (station identification) windows

Station labels (supplied) identifying memorized stations can be placed in these windows.

11 STEREO indicator

This indicator will light when an FM stereo program of sufficient signal strength is tuned in.

13 MEMORY SCAN key

Press to scan automatically the stations memorized on the number keys 18.

14 FM MODE key

When receiving a very weak FM station or a noisy FM program, press this key. (The STEREO indicator illumination will go out.) There is no stereo effect but the reception will be more stable and noise will be reduced. Press it again to return to the stereo mode. The mode will automatically return to the stereo mode when the frequency is changed.

15 TUNING key

Press either + or - of this key to scan the frequency coverage.

For FM reception, this key serves as a sweep tuning key and for MW/LW reception as a manual tuning key.

16 Band select key

For direct access tuning, sweep tuning or manual tuning, press the key to select the desired band: FM, MW or LW.

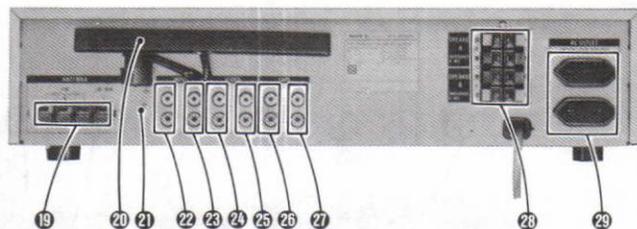

17 MEMORY PRESET key

To memorize the frequency of a station, when the station is received, press this key, then press the number key.

18 DIRECT ACCESS TUNING/PRESET TUNING keys (number keys)

For direct access tuning (the number keys serve as DIRECT ACCESS TUNING keys): After pressing the band select key, input the frequency of the desired station by pressing these keys.

For preset tuning (the number keys serve as PRESET TUNING keys): After pressing the MEMORY PRESET key, press to preset the station being received. Also press to call up a station which has been memorized in this way.

Rear panel

19 FM/MW/LW external antenna terminals

20 MW/LW ferrite bar antenna

21 \perp (phono ground) terminal

22 PHONO inputs (phono jack)

Accept the outputs of a turntable system.

23 CD/AUX (compact disc/auxiliary) inputs (phono jack)

Accept the outputs of a compact disc player or input sources such as a playback only tape deck.

24 VIDEO OUT outputs (phono jack)

Accept the audio inputs of a VTR for recording the audio program source onto the video tape.

25 VIDEO IN inputs (phono jack)

Accept the audio outputs of a VTR for listening to the recorded video tape.

26 REC OUT outputs (phono jack)

Accept the line inputs of a tape deck for tape recording.

27 TAPE inputs (phono jack)

Accept the line outputs of a tape deck for playing back a tape.

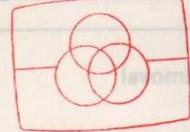

28 SPEAKER A, B connectors

For connecting a pair of speaker system or two pairs of speaker systems. System A and system B can be selected by means of the front panel SPEAKERS selectors.

29 AC OUTLETS (switched)

These are used to power other audio components whose power consumption is less than the wattage indicated on the ac outlet.
