INTEGRATED STEREO AMPLIFIER

Weight:

SPECIFICATIONS

GENERAL	
System:	Preamplifier section: low-noise IC equalizer amp.; ASP tone control Power amplifier section: pure- complementary SEPP OCL power amplifier with all stages direct coupled
Power Requirements:	US, Canadian model: 120 V ac, 60 Hz AEP model: 220 V ac (240 V ac adjustable by authorized Sony personnel), 50/60 Hz UK model: 240 V ac (220 V ac adjustable by authorized Sony personnel), 50/60 Hz E model: 120, 220 or 240 V ac adjustable, 50/60 Hz
Power Consumption:	US, AEP model: 100 watts Canadian model: 155 watts UK model: 270 watts E model: 100 watts
AC Outlets:	 AEP, UK model: 3 switched, total 100 watts max. US, Canadian model: Two switched (total 100 watts) One unswitched (100 watts) E model: 2 switched, total 100 watts max. 1 unswitched, 100 watts max.
Dimensions:	Approx. 430 \times 80 x 290 mm (w/h/d) (17 \times 31/ ₄ \times 11 1/ ₄ inches) including projecting parts and controls

ATTENTION AU COMPOSANT AYANT RAPPORT À LA SÉCURITÉ!

LES COMPOSANTS IDENTIFIES PAR UNE TRAME ET UNE MARQUE A SUR LES DIAGRAMMESSCHÉ-MATIQUES, LES VUES ÉCLATÉES ET LA LISTE DES PIÉCES SONT CRITIQUES POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE REMPLACER CES COMPO-SANTS QUE PAR DES PIÈCES SONY DONT LES NU-MÉROS SONT DONNÉS DANS CE MANUEL OU DANS LES SUPPLÉMENTSPUBLIÉS PAR SONY.

Approx. 6 kg (13 lbs 4 oz) in shipping carton AMPLIFIER SECTION

Approx. 5.6 kg (12 lbs 6 oz) net

POWER OUTPUT AND TOTAL HARMONIC DISTORTION: (US, Canadian model) With 8 ohm loads, both channels driven, from 20 - 20,000 Hz; rated 40 watts per channel minimum RMS power, with no more than 0.008% total harmonic distortion from 250 milliwatts to rated output.

FEATURES

The TA-AX44 integrated stereo amplifier incorporates a number of technical breakthroughs in circuit design. On its attractive front panel most of the controls and switches are "touch pad" switches and the tone, filter and volume settings are shown by fluorescent displays.

HIGHLIGHTS OF THE TA-AX44'S CIRCUIT

ASP (Audio Signal Processor) IC in the preamplifier stage Sony has developed a new audio device, called the Audio Signal Processor IC, which can digitally control the tone, filter and volume settings. The ASP IC also permits electronic program source selection. Mechanical controls and switches have been practically eliminated from the front panel. In combination with a microcomputer and a non-volatile memory IC, the ASP IC offers greater flexibility — an Acoustic Function, an ability to store and recall two sets of tonal adjustments.

Legato linear power amplifier stage

The operation of the power amplifier stage is stable without any observable distortion up through the higher frequencies. We call this power amp "Legato Linear" because its switching distortion is very low and its output waveform smooth.

Simple, straight signal path layout

A heat-pipe cooling system and the ASP IC layout near the input and output terminals minimize wiring losses and allow low distortion operation.

Wireless remote control operation

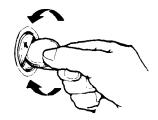

Using the optional RM-44 system remote controller, various opera. tions — power on/off, program selection, acoustic setting selection, muting on/off and volume adjustment — can be remotely controlled.

OPERATING VOLTAGE

Before connecting the unit to the power source, check that the operating voltage of your unit is the same as the local power line voltage.

- The Continental European model (AEP model) operates on 220 V ac (or 240 V ac adjustable by authorized Sony personnel).
- The United Kingdom model (UK model) operates on 240 V ac (or 220 V ac adjustable by authorized Sony personnel).
- The model for other countries (E model) operates on either 120, 220 or 240 V ac. The voltage selector is located on the rear panel. If the selector must be reset, disconnect the ac power cord and turn the selector with a coin so that the arrow mark of the selector points to the proper voltage figure.

The US, Canadian model operates on 120 V ac.

PRECAUTIONS

On safety

• Check that the operating voltage of your unit is identical with the voltage of your local power supply.

• Should any liquid or solid object fall into the cabinet, unplug the unit and have it checked by qualified personnel before operating it any further.

• Unplug the unit from the wall outlet if it is not to be used for an extended period of time. To disconnect the cord, pull it out by grasping the plug. Never pull the cord itself.

On installation

• Do not install the unit in a location near heat sources such as radiators or air ducts, or in a place subject to direct sunlight, excessive dust, mechanical vibration or shock.

• Good air circula ion is essential to prevent internal heat build-up in the unit. Place the unit in the location with adequate air circulation. Do not place the unit on a soft surface, such as a rug that would block the venilation holes on the bottom.

• DO not place anything on top of the cabinet. The top ventilation holes must be unobstructed for the proper opera ion of the unit and to prolong the life of its components.

On operation

 Before making program source connections, be sure to turn the power switch off and unplug the unit.

• Do not attempt to test the protection circuits by blocking the ventilation holes or connecing improper loads.

• When the unit is not used, turn the power off, to conserve energy and to extend the useful life of your unit.

On cleaning the cabinet

Clean the cabinet, panel and controls with a soft cloth lightly moistened with mild detergent solution. Do not use any type of abrasive pad, scouring powder or solvent such as alcohol or benzine

On repacking

Do not throw away the carton and the packing material. It makes an ideal container to transport the unit in. When shipping the unit for repair work or to another location, repack it as illustrated on the carton box.

LOCATION AND FUNCTION OF CONTROLS

Fluorescent display section

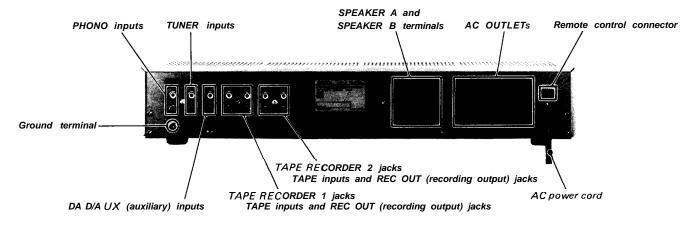

Photo: AEP, UK model

AC outlets

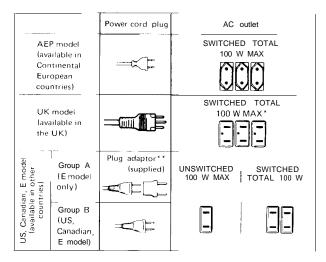

These are used to power other audio components whose power consumption is less than the wattage indicated below the ac outlet.

The SWITCHED outlet is controlled by the front panel POWER switch.

The UNSWITCHED outlet (only on the E model) is not controlled by the POWER switch.

Do not connect any electrical home appliance such as an electric iron, fan, TV or other high-wattage equipment to these ac outlets.

The four groups of ac power cord plugs and ac outlets on your amplifier rear panel are illustrated below

* The ac outlet on the amplifier can supply ac power to the following components :

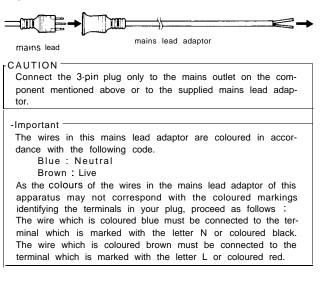

Tuner ST-JX44L. ST-JX-22L Turntable PS-LX33, PS-LX5 Tape deck TC-FX500R, TC-FX44

 * *Use the plug adaptor to connect the amplifier to an ac outlet in the house However, when making power connections among the Sony components, this adaptor is not needed

For the Customers in the United Kingdom

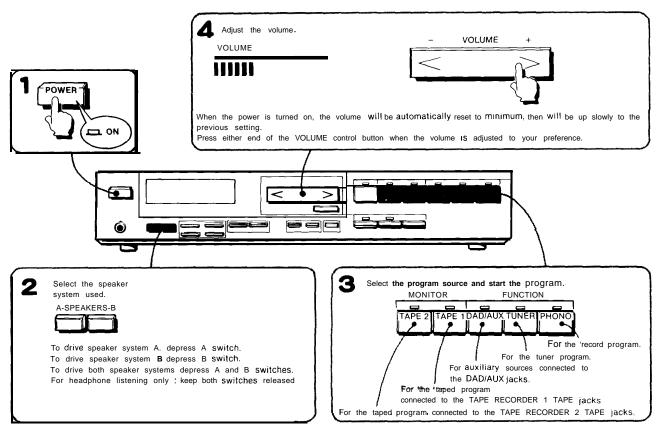

The mains lead plug of your apparatus is a 3-pin type especially designed to be connected only to the Sony RM-44 system remote controller. The remote controller has a receptacle on the rear to receive this plug to supply mains power to other components of your audio system.

To connect the apparatus directly to a mains power point in your house, firmly insert the 3-pin plug into the supplied mains lead adaptor.

OPERATION

TO GET SOUND

-Important points to remember -

• The MONITOR switches have priority over the FUNCTION switches (PHONO, TUNER and DADIAUX) when they are engaged at the same time.

• To disengage he MONITOR switch, press the same switch again.

• The TAPE COPY switch is a push-on/push-off switch, and does not affect any other FUNCTION or MONITOR switch.

SOUND ADJUSTMENTS

Stereo balance

The feeling of direction and depth that stereophonic sound produces is greatly diminished if the volume levels of the two channels are not balanced to produce a well-defined stereo image.

Adjust the BALANCE control buttons as necessary. Proper setting of the BALANCE control will vary with different program sources because of differences in recording levels. Stereo balance is also affected by the acoustics of the listening room, which itself is dependent on the shape and size of the room, the location of the room's furniture, and the carpet and wall coverings.

Tone

Use the tone control buttons to adjust the tone to suit the characteristics of the listening roomand the program SOUICE When listening to a program source with high-frequency noise, press the HI-FILTER switch.

If the woofer cones of the speaker system move a lot when a warped record is played, press the SUBSONIC filter switch to reduce the very low-frequency distortion caused by record warp.

The manipulation of the tone control section does not interrupt the signal path in the amplifier. However, its overuse may adversely affect amplifier tone quality.

TO SET THE ACOUSTIC SETTINGS

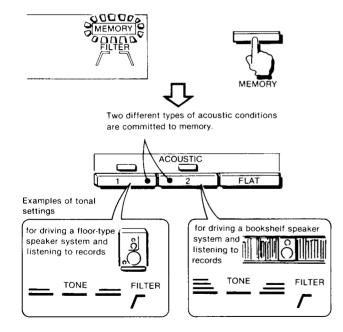

-Acoustic Function-

The TA-AX44 can store and recall the acoustic settings—tone control (BASS and TREBLE), and filters (SUBSONIC and HI-FILTER) used, thus instantly providing a choice of two different acoustic settings. These settings may be based upon the preferences of two individual users of the system, or the speaker system in use, or the type of music being listened to, etc.

Adjust the tonal quality to your preference.

② Press the MEMORY switch. The MEMORY indicator will come on, during which time you should press either the ACOUSTIC 1 or 2 switch.

Now one of the two acoustic settings is committed to memory.

Q. How can I check the acoustic setting?

- A. Once the setting is set, press the FLAT switch. All the acoustic settings are disengaged and a flat frequency response results. Then press the ACOUSTIC switch which you committed to memory, so that the original settings will be recalled. Now compare the effect of the settings with the flat frequency response.
- Q. How can I change temporarily a part of the acoustic settings?
- **A.** Simply change the part of the acoustic setting you want. You can recall the original settings later by pressing the ACOUSTIC switch.

Q. How can I change all the acoustic settings?

A. Simply set the new acoustic settings as you like and memorize them as described before.

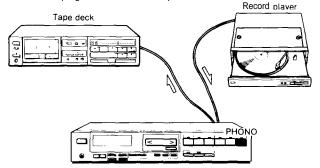

Q. If I turn the amplifier off, are the acoustic settings cancelled?

A. No. The TA-AX44, with its non-volatile IC in the memory circuit, retains the contents of the memory even when the power is off, and recalls them whenever you want.

TAPE RECORDING AND TAPE COPY

TO RECORD

• Select the program to be recorded with the FUNCTION switches. @Start the program and set the tape recorder in the record mode.

The filters, and tone and volume settings have no effect on recording.

Monitoring of a 3-head tape recorder

If your tape recorder has separate record and playback heads, you can monitor the recording results.

When the tape recorder used for recording is connected to the TAPE RECORDER 1 REC OUT jacks, press the TAPE 1 switch and you can monitor the recording results. Press the TAPE 1 switch again to disengage, and the source sound will be heard. Be sure to keep the monitor switch of the tape recorder in the TAPE position.

TO COPY

If you have two tape recorders, you can copy a taped program from tape recorder 1 (connected to TAPE RECORDER 1 TAPE inputs) to tape recorder 2 (connected to TAPE RECORDER 2 REC OUT outputs). Tape copy from tape recorder 2 to tape recorder 1 cannot be made.

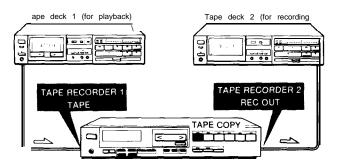

You can copy a tape while listening to a record or a broadcast.

Insert the recorded tape into the tape recorder 1 and a blank tape into the tape recorder 2.

Press the TAPE COPY switch.

Adjust the recording level of tape recorder 2.

Start the playback of tape recorder 1 and the recording of tape recorder 2. Copying will begin.

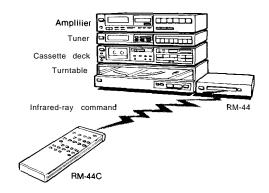

To listen to a program while the tape is being copied : For the playback sound of tape recorder 1 : press the TAPE 1 switch.

For a program source connected to the PHONO, TUNER or DAD/AUX inputs : press the appropriate FUNCTION switch.

REMOTE CONTROL OPERATION WITH AN OPTIONAL REMOTE CONTROLLER

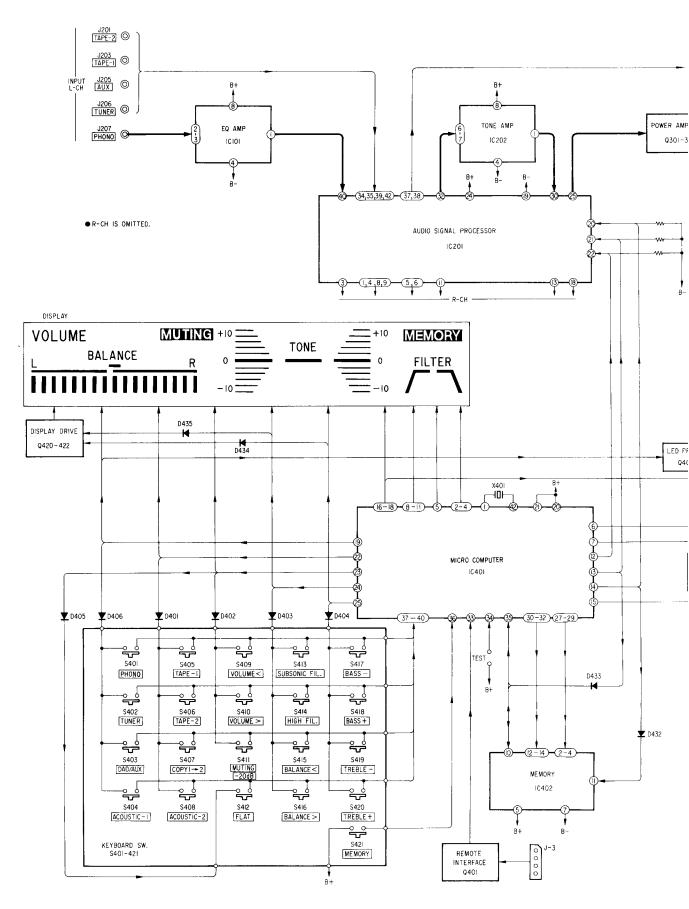

The optional RM-44 system remote controller controls he following functions of the amplifier: power on/off, program selection, acoustic setting selection, muting on/off, and volume adjustment. This remote controller, with its infrared ray sensor, can control connected components by an infrared ray transmitted from he RM-44C remote commander supplied with the system remote controller. For connections and operaions, refer to the system remote controller to the system remote controller.

NOTE:

- Items with no part number and no description are not stocked because they are seldom required for routine service.
- Items marked " " are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- $^\circ$ Due to standardization, parts with part numbers ($\Delta-\Delta\Delta\Delta-\Delta\Delta\Delta-XX$ or $\Delta-\Delta\Delta\Delta\Delta-\Delta\Delta\Delta-X)$ may be different from those used in the set.

SEMICONDUCTORS

In each case, U : μ, for example: UA····: μΑ····, UPA···: μΡΑ···, UPC···: μPC, UPD···: μPD···

CAPACITORS:

All capacitors are in μF . Common capacitors are omitted. Refer to the following lists for their part numbers. MF: μF , PF: $\mu \mu F$.

RESISTORS

 All resistors are in ohms. Common 1/4W, 1/8W and 1/16W carbon resistors are omitted. Refer to the following lists for their part numbers.

• F : nonflammable

NOTE :

 Items with no part number and no description are not stocked because they are seldom required for routine service.

 Items marked " ● " are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

. Due to standardization, parts with part numbers (Δ - $\Delta\Delta\Delta$ - $\Delta\Delta\Delta$ -XX or Δ - $\Delta\Delta\Delta$ - $\Delta\Delta$ -X) may be different from those used in the set.

SEMICONDUCTORS

In each case, U : μ , for example: UA····: μ A····, UPA···: μ PA···, UPC···: μ PC, UPD···: μ PD···

CAPACITORS:

All capacitors are in µF. Common capacitors are omitted. Refer to the following lists for their part numbers.
 MF: µF, PF: µµF.

RESISTORS

- All resistors are in ohms. Common 1/4W, 1/8W and 1/16W carbon resistors are omitted. Refer to the following lists for their part numbers.
- F : nonflammable

COILS

· MMH : mH, UH : μH

The components identified by shading and mark A are critical for safety. Replace only with part number specified.

Les composants identifiés par une trame et une marque Asont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

HARDWARE NOMENCLATURE

Nut, Washer, Retaining ring:

N 3 | L

Unless otherwise indicated, it means cross-recessed head (Phillips type).

Reference Designation	Shape	Description	Remarks				
	·	SCREWS	- #				
Р	₽	pan-head screw	binding-head (B) screw for replacement				
РШН	₽	pan-head screw with washer face	binding-head (B) screw and flat washer for replacement				
PS PSP	85 3	pan-head screw with spring washer	binding-head (B) screw and spring washer for replace- ment				
PSW PSPW	989	pan-head screw with spring and flat washers	binding-head (B) screw and spring and flat washers for replacement				
R	¢	round-head screw	binding-head (B) screw for replacement				
к	1	flat-countersunk-head screw					
RK	Þ	oval-countersunk-head screw					
В	- (P	binding-head screw					
т	Ð	truss-head screw	binding-head (B) screw for replacement				
F 🔁		flat-fillister-head screw					
RF	Ð	fillister-head screw					
в∨	€	brazier-head screw	-				

Reference Designation	Shape	Description	Remarks
SELF TAPPING SCREWS			
ТА		self-tapping screw	ex: TA, P 3 x 10
РТР	€==>	pan-head self-tapping screw	binding-head self- tapping (TA, B) screw for replacement
РТР₩Н	€	pan-head self-tapping screw with washer face	binding-head self tapping (TA, B) screw and flat washer for replacement
РТТ₩Н	€⊐0	pan-head thread-rolling screw with washer face	binding-head (B) screw and flat washer for replacement
SET SCREWS			
\$C		set screw	
SC	-0[hexagon-socket set screw	ex: SC 2.6 x 4, hexagon socket
		NUT	
N	• () • ()	nut	
WASHERS			
w	\odot	flat washer	
sw	-0 1	spring washer	
LW	0	internal-tooth lock washer	ex: LW3, internal
LW	Ô	external-tooth lock washer	ex: LW3, external
RETAINING RINGS			
E	0	retaining ring	· · · · · · · · · · · · · · · · · · ·
G	ß	grip-type retaining ring	

-Diameter of usable screw or shaft
