4 PC BOARDS AND PARTS LIST	9
5 INCLUDED ACCESSORIES	17

NOTES

- PC boards shown are viewed from parts side.
- Parts marked with * require longer delivery time.
- The parts with no reference number or no parts number in the exploded views are not supplied.
- As regards the resistors and capacitors, refer to the circuit diagrams contained in this manual.
- ⚠ Parts marked with this sign are safety critical components. They must be replaced with identical components - refer to the appropriate parts list and ensure exact replacement.
- Parts of [] mark can be used only with the version designated.
[US]:U.S.A. [C]:CANADA [E]:EUROPE

1 SPECIFICATIONS

Electrical characteristics (at 24bit/44.1kHz input)

Frequency response20Hz-20kHz $\pm 0.3\text{dB}$
 S/N ratio116dB
 Dynamic range.....108dB
 THD0.0025%
 Channel separation115dB

Valid sampling frequencies (kHz)

32, 44.1, 48, 88.2, 96, 176.4, 192 (each $\pm 1\%$)

Sampling frequencies (kHz) corresponding to de-emphasis

32, 44.1, 48

Input levels

TOS x 3-24 to -14.5dBm peak (λ :700nm typical)
 SPDIF x 30.5 Vp-p $\pm 0.1\text{V}/75\Omega$
 XLR x 25.0Vp-p $\pm 0.1\text{V}/110\Omega$

Output levels

Analog outputs

RCA x 1 system2.20Vrms $\pm 0.1\text{V}/47\text{k}\Omega$
 XLR x 1 system2.20Vrms $\pm 0.1\text{V}/600\Omega$

Digital output

TOS x 1.....-21 to -15dBm peak

WORD SYNC output

BNC x 2TTL / 75 Ω

General

Power supplyAC 230V, 50Hz (Europe model)
 AC 120V, 60Hz (U.S.A./Canada model)
 AC 220V, 60Hz (Korea model)
 Power consumption26W
 Dimensions (WxHxD)465 x 162 x 369 (mm)
 Weight.....about 25 kg

Remote control unit

Type.....Infrared pulse system
 BatteryDC3V (AA batteries, SUM-3 x 2)
 Dimensions (WxHxD)57 x 21 x 216 (mm)
 Weight.....about 320g (including batteries)

Accessories

Power cord x 1
 Remote Control Unit x 1
 Batteries (AA, SUM-3) x 2
 Felt x 3
 Warranty card x 1
 Owner's manual x 1

Improvements may result in specification or feature changes without notice.

2 ADJUSTMENTS AND CHECKS

2-1 Test Mode

2-1-1 Getting into Test Mode

While holding down the INPUT SELECTOR < and > buttons, power on the unit and hit the DIGITAL FILTER button repeatedly.

2-1-2 Version Display

When the test mode is activated, the microcomputer version information, "uComVer X.XX", is displayed. Then, at each press of the INPUT SELECTOR > button, the RDOT version information, "RDOTver XXXX", and the RAM version information, "RAMversionXX", are displayed in sequence.

2-1-3 FL Grid Check

After displaying a series of version information, pressing the INPUT SELECTOR > button activates the grid check mode and the display reads "GridChecking". Turn the OUTPUT LEVEL control to check to see that the grids turn off one after another. Continue to turn the OUTPUT LEVEL control to check to see that the grids turn on one after another.

2-1-4 FL Segment Check

When the FL grid check is done with, press the INPUT SELECTOR > button to activate the segment check mode. Turn the OUTPUT LEVEL control to check to see that the dot matrix turns on by dot.

2-1-5 LED Check

When the FL segment check is done with, press the INPUT SELECTOR > button to activate the LED check mode. The display reads "LEDCHECK RDT". Turn the OUTPUT LEVEL control to check to see that each LED turns on.

2-1-6 Resetting EEPROM

When the LED check is done with, press the INPUT SELECTOR > button and "EEPRESET !" is displayed. Press the DIGITAL FILTER button and the display changes to read "EEPSAVE OK" and the ROM is reset.

2-2 Audio System

Setting

CLOCK MODE: PLL
AES3 INPUT: SINGLE
DIGITAL FILTER: FIR
DIGITAL IN: Fs=44.1kHz, FullBit

- If you intend to use a digital output of the P-70 or others for connection to the digital input, use a digital signal that is not upconverted.

2-2-1 DC Offset Adjustment

1. Set the OUTPUT SELECT switch on the rear panel to "XLR".
2. Apply a digital signal to the DIGITAL IN and check to see that the input indicator turns on and that a sampling frequency shows in the display. (Check of the lock status.)
3. Turn the OUTPUT LEVEL control counterclockwise, so that the output level is $-\infty$ (as shown by "-----" in the display).
4. Measure the DC offset voltage between pins 2 (+) and 3 (–) of LINE OUT (XLR). Adjust VR303 (L) and VR403 (R) on ANALOG PCB for $\pm 5\text{mV}$.

2-2-2 Output level check

1. Connect the AC voltmeter to the LINE OUT.
2. Play the track 2 (1kHz, 0dB) of the MCD-111, and check the output level.
Specifications: $2.2 \pm 0.2 \text{Vrms}$ (100k Ω load, RCA)
 $4.4 \pm 0.2 \text{Vrms}$ (100k Ω load, XLR)

2-2-3 Distortion check

1. Connect the distortion meter to the LINE OUT.
2. Play the track 2 (1kHz, 0dB) of the MCD-111, and check the distortion.
Specification: 0.005% or less (400Hz HPF + 20kHz LPF)

2-2-4 Frequency response check

1. Play the track 3-6 (20Hz – 20kHz, 0dB) of the MCD-111, and check that output level are within the specified values with respect to the 1kHz reference level.
Specifications: 20Hz – 20kHz, $0 \pm 1 \text{dB}$ (FIR mode)
20Hz – 20kHz, $0 \pm 1 \text{dB}$ (CUSTOM mode)
20kHz, $-3 \pm 1 \text{dB}$ (RDOT mode)

- The DIGITAL FILTER button cycles through the following modes:

2-2-5 S/N check

1. Play the track 7 (non-signal) of the MCD-111, and check that noise level are within the specified values with respect to the 1kHz reference level.
Specification: 100dB or more (IEC-A)

2-2-6 Channel separation check

1. Play the track 8 (L:1kHz / R:non-signal) of the MCD-111, and check the leakage from Lch to Rch.
2. In the same way, play the track 10 (R:1kHz / L:non-signal) of the MCD-111, and check the leakage from Rch to Lch.
Specification: 100dB or more (IEC-A)

注意
 1. 抵抗の単位はΩ (k=K, M=M) です。
 2. コンデンサの単位はμF (p=pF) です。
 3. ユニークのある部品は安全規格部品です。
 交換するときは必ずテック指定の部品を使用してください。
