

Service Manual

Amplifier

Amplifier

SE-CH505A

Colour

(K) Black Type

Because of unique interconnecting cables, when a component requires service, send or bring in the entire system.

Areas

Suffix for Model No.	Area	Colour
(E)	Europe	(K)
(EB)	Great Britain	
(EG)	Germany and Italy	

System: SC-CH505

Specifications

Power output

DIN 1 kHz, THD 1%, both channel driven
2×50 W (6Ω)

Total harmonic distortion

Rated power at 1 kHz 1% (6Ω)
Half power at 1 kHz 0.09% (6Ω)

Load impedance

MAIN 6~8Ω
SURROUND 8Ω

S/N (rated power) 84 dB

Frequency response 40 Hz~30 kHz (-3 dB)

Input MIC; 600Ω, Ø6.2

Output HEADPHONE; 32Ω, Ø3.5

■ General

Power consumption 170 W

Power supply

For (E) (EG) areas 230 V, AC 50/60 Hz

For (EB) area 230 V~240 V, AC 50/60 Hz

Dimensions (W×H×D) 270×118.5×336 mm

Weight 4.4 kg

Notes:

1. Weights and dimensions shown are approximate.
2. Design and specifications are subject to change without notice.
3. Total harmonic distortion is measured by the digital spectrum analyzer.

System	Tuner	Compact disc player	Amplifier	Cassette deck	Speakers

■ Before Repair

- (1) Turn off the power supply. Using a 10Ω, 10 W resistor, connect both ends of power supply capacitors (C701, C702) in order to discharge the voltage.
- (2) Before turning the power supply on, after completion of repair, slowly apply the primary voltage by using a power supply voltage controller to make sure that the consumed current at 50/60 Hz in NO SIGNAL mode should be shown below with respect to supply voltage 230 V~240 V.

Power supply voltage	AC 230 V	AC 240 V
Consumed current 50 Hz	80~180 mA	80~180 mA

■ Protection Circuitry

The protection circuitry may have operated if either of the following conditions is noticed:

*No sound is heard when the power is switched ON.

*Sound stops during a performance.

The functions of this circuitry is to prevent circuitry damage if, for example, the positive and negative speaker connection wires are "shorted", or if speaker systems with an impedance less than the indicated rated impedance of this unit are used.

If this occurs, follow the procedure outlined below:

1. Switch OFF the power.
2. Determine the cause of the problem and correct it.
3. Switch ON the power once again.

Note:
When the protection circuitry functions, the unit will not operate unless the power is first switched OFF and then ON again.

■ Caution for AC Mains Lead

("EB" area code model only)

For your safety, please read the following text carefully.

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.

A 5-ampere fuse is fitted in this plug.

Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5-ampere and that it is approved by ASTA or BSI to BS1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local dealer.

CAUTION!

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY.

THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13-AMPERE SOCKET.

If a new plug is to be fitted please observe the wiring code as shown below.

If in any doubt please consult a qualified electrician.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral, Brown: Live.

As these colours may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured Blue must be connected to the terminal which is marked with the letter N or coloured Black or Blue.

The wire which is coloured Brown must be connected to the terminal which is marked with the letter L or coloured Brown or Red.

WARNING: DO NOT CONNECT EITHER WIRE TO THE EARTH TERMINAL WHICH IS MARKED WITH THE LETTER E, BY THE EARTH SYMBOL  OR COLOURED GREEN OR GREEN/YELLOW.

THIS PLUG IS NOT WATERPROOF—KEEP DRY.

Before use

Remove the connector cover as follows.

How to replace the fuse

1. Open the fuse cover with a screwdriver.

2. Replace the fuse.

3. Close the fuse cover.

■ Stacking the Components

Install the various components as shown below.

Horizontal stacking

Vertical stacking

System layout example

- ① Left speaker
- ② Television set (not included)
- ③ This system
- ④ Right speaker
- ⑤ Surround speakers

To produce a better stereo sound, install both speakers away from the system.

Surround sound effect differs according to where you install the surround speakers. Install them as you like.

■ Connections

1 Connect the flat cable.

Connecting

Disconnecting

1. Connect the shorter flat cable to the terminal of the tuner/sound processor and amplifier.
2. Connect the longer flat cable to the terminal of the tuner/sound processor, compact disc player, and cassette deck.

Route the cable horizontally (underneath the heat outlet grille) so that the side with the white-coloured lead is positioned at the front.

Be sure to connect the blue-coloured connector to B1 (tuner/sound processor).

After connection, fold and press the cable as flat to the back of the unit as possible.

Do not try connecting or disconnecting the flat cable while the power is switched to ON.

2 Connect the FM indoor antenna.

Install the antenna on a wall at a height and in a direction which result in the best reception.

The tip of the internal antenna wire should not come into contact with any metal objects.

When you cannot get a good reception with this FM indoor antenna, we recommend you install an FM outdoor antenna. (Not included. See page 8.)

3 Connect the AM (MW/LW) loop antenna.

1. Attach the antenna holder to the rear panel of the tuner/sound processor.
2. Clamp the AM loop antenna antenna to the antenna holder and connect the antenna terminal to the rear panel of the tuner/sound processor.
3. Position the loop for the best reception.

You may attach the AM antenna holder with screw (included) to a rack or other structure. In this case, attach as showed in the figure below.

Note

To minimize noise pickup, keep the AM loop antenna cord along the heat outlet grille, and away from the flat cables.

4 Connect the right (R) and left (L) speaker cables.

Notes

- Be sure to connect speaker cables before connecting the AC power supply cord.
- The load impedance of any speaker used with this unit must be 6–8Ω.
- Match the two wires from the left and right speaker cables with the same coloured levers of the speaker terminals, then insert the wires into the respective terminals.

1. Strip off the outer covering, and twist the center conductor.

Make sure the bare ends of the wires are not unraveled. (If they are, twist them tight again.)

2. ① Tilt the lever back and insert the wire.
- ② Close the lever and pull the cord gently to be sure that it is secured.

3. Insert the wire to the rear panel of the amplifier, and close the lever.

Notes

- To prevent damage to circuitry, never short-circuit positive (+) and negative (–) speaker wires.
- Be sure to connect only positive (red) wires to positive (+) terminals and negative (black) wires to negative (–) terminals.

BE SURE TO READ THE CAUTION FOR AC MAINS LEAD ON PAGE 3 BEFORE PROCEEDING TO STEP 5.

5 Connect the AC power supply cord after you have connected all other cables.

Insertion of Connector

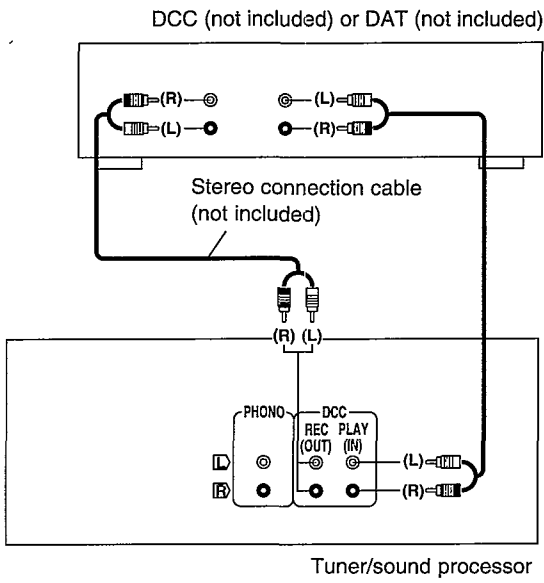

Even when the connector is perfectly inserted, depending on the type of inlet used, the front part of the connector may jut out as shown in the drawing.

However there is no problem using the unit.

External unit connection

DCC (digital compact cassette deck) or DAT (digital audio tape deck)

Rear surround speakers

Note

Be sure to connect both speaker systems. If only one side is connected, no sound will be heard.

Install each speaker left and right at the back of the listening space.

Analog player

"GND" terminal

This terminal is for a ground wire use.

Optional antenna connections

FM outdoor antenna (not included)

If the FM indoor antenna does not provide satisfactory reception of FM broadcasts, use an outdoor antenna.

You may need an outdoor antenna if you use this system in a mountainous region or inside a reinforced-concrete building, etc. An outdoor antenna should be installed by a competent technician only.

FM outdoor antenna

Tuner/sound processor

AM (MW/LW) outdoor antenna (not included)

An outdoor antenna may be required in a mountainous region, or if this system is located inside a reinforced-concrete building, etc.

Run 5 to 12 m of vinyl-covered wire horizontally along a window or other convenient location.

Note

Do not remove the AM loop antenna.

Location of Controls

The functions indicated by the numbers with black background (for example ❶) can also be activated from the remote control transmitter.

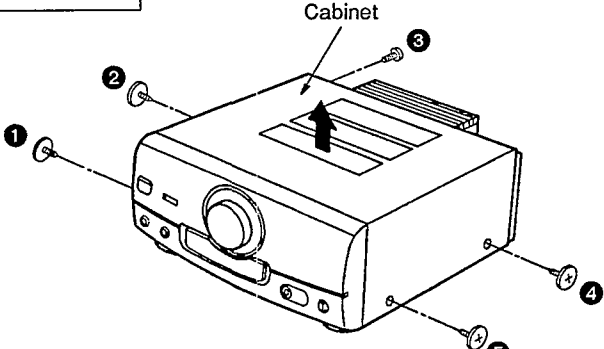

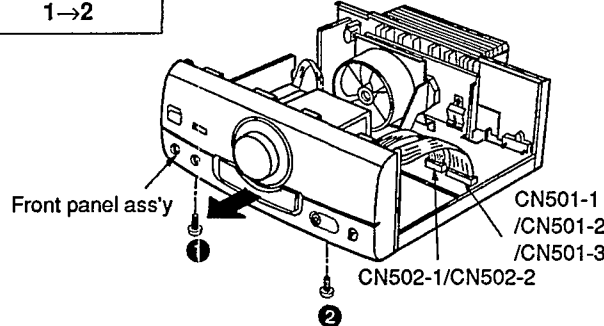

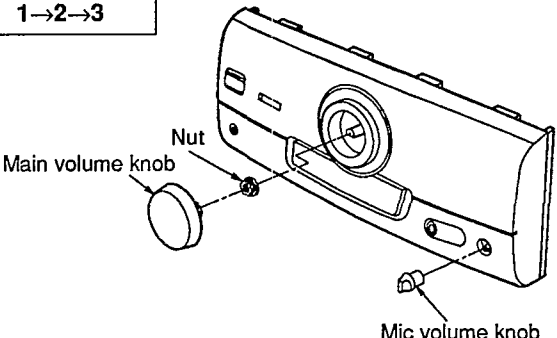

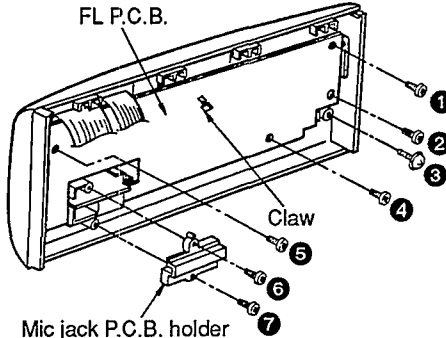

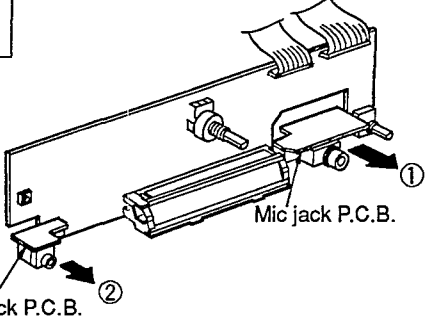

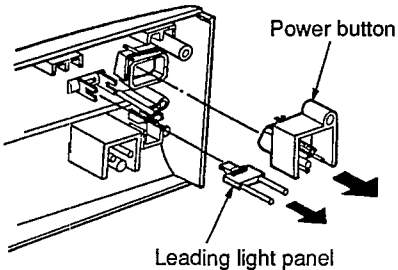

Amplifier section

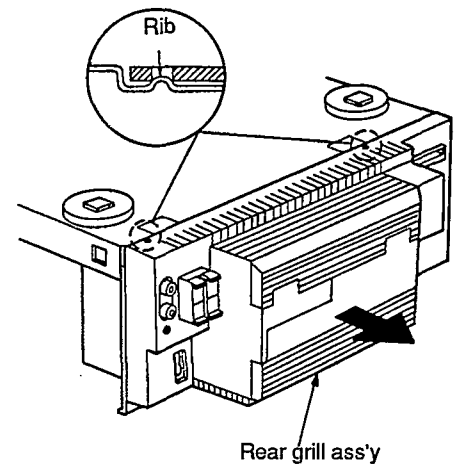

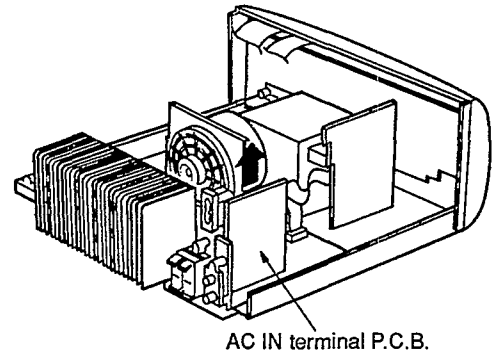

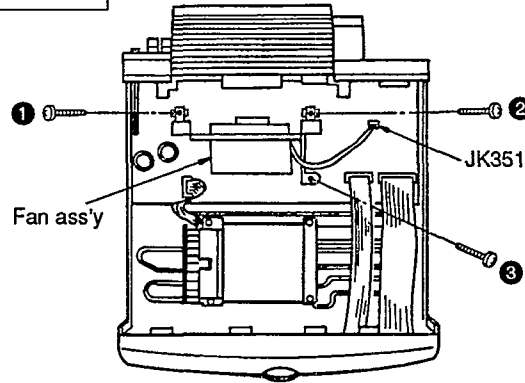

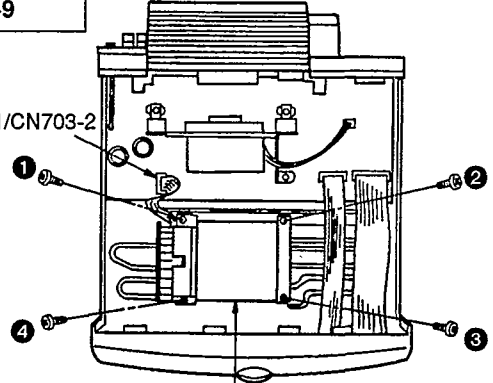

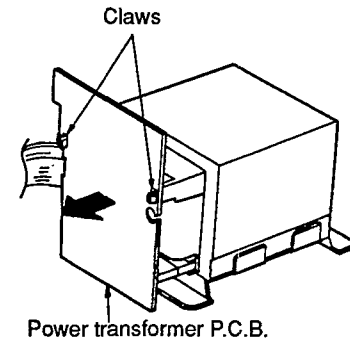

No.	Name
❶	Power “STANDBY ⏻/ON” switch (POWER, STANDBY ⏻/ON) Press to switch the unit from on to standby mode or vice versa. In standby mode, the unit is still consuming a small amount of power.
❷	Standby indicator (STANDBY) When the unit is connected to the AC mains supply, this indicator lights up in standby mode and goes out when the unit is turned on.
❸	Volume control (VOLUME)
❹	Headphones jack (PHONES) (∅3.5, 32Ω)
❺	Range select button (RANGE)
❻	Microphone jack (MIC) (∅6.2, 600Ω)
❼	Microphone volume control (MIC VOLUME)

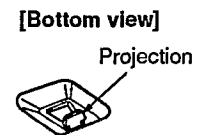

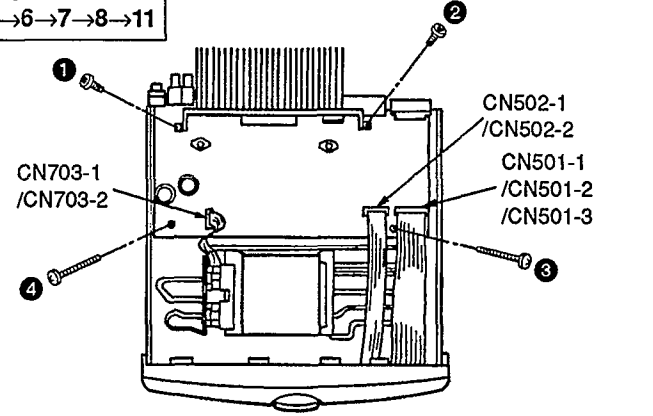

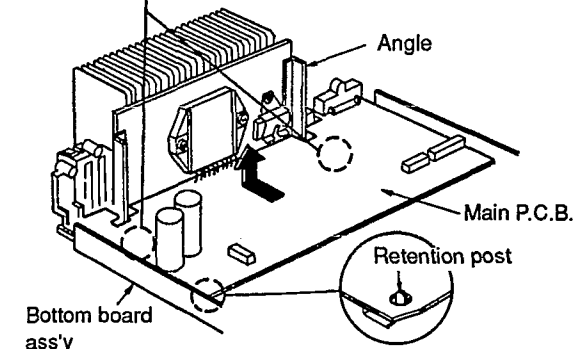

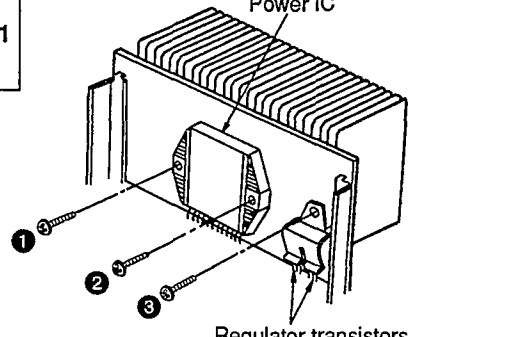

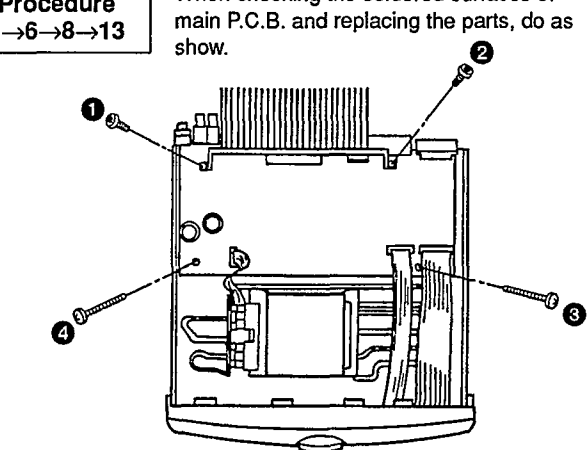

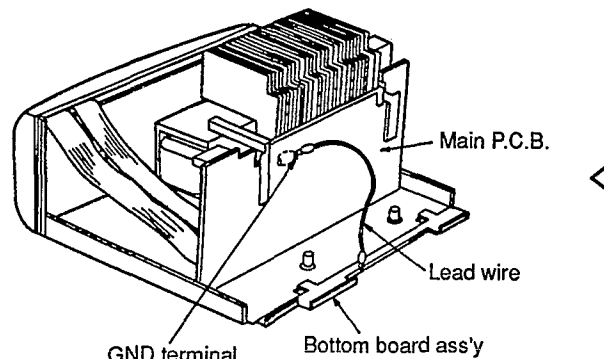

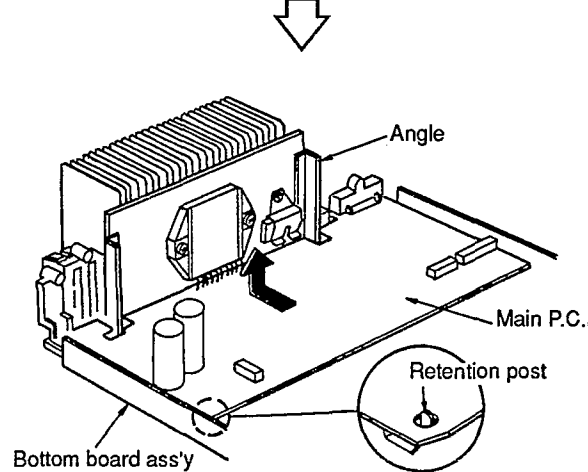

Disassembly Instructions

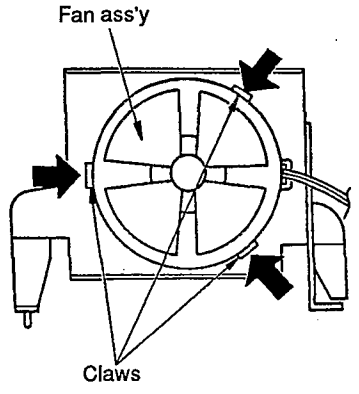

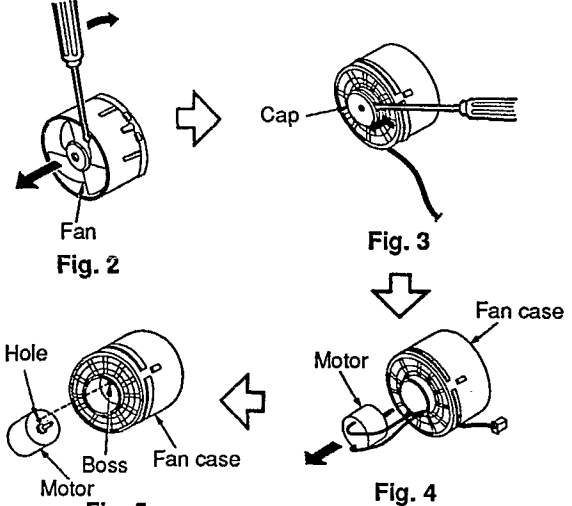

"ATTENTION SERVICER"

Some chassis components may have sharp edges. Be careful when disassembling and servicing.

Ref. No. 1	Removal of the Cabinet	Ref. No. 2	Removal of the Front Panel Ass'y
Procedure 1		Procedure 1→2	
 <p>1. Remove 5 screws (①~⑤).</p> <p>2. Remove the cabinet in the direction of the arrow.</p>		 <p>1. Remove 5 connectors (CN501-1, CN501-2, CN501-3, CN502-1, CN502-2).</p> <p>2. Remove 2 screws (①, ②).</p> <p>3. Remove the front panel ass'y in the direction of the arrow.</p>

Ref. No. 12	Removal of the Power IC and Regulator Transistor	Ref. No. 13	How to check the Main P.C.B.
Procedure 1→6→7→8→11 →12	 <p>1. Unsolder the power IC or regulator transistors.</p> <p>2. Remove 3 screws (1~3).</p> <p>• When mounting the power IC or regulator transistor, apply silicone compound (RFKX0002) to the rear side of power IC or regulator transistors.</p>	 <p>1. Remove 4 screws (1~4).</p>	<p>• When checking the soldered surfaces of main P.C.B. and replacing the parts, do as show.</p>
 <p>4. Connect the GND terminal to the bottom board ass'y by the lead wire.</p>	 <p>2. Lift the main P.C.B. off the retention post on the bottom board ass'y.</p> <p>3. Remove the main P.C.B. in the direction of the arrow.</p>		

Ref. No. 14	Removal of the Fan Ass'y
Procedure 1→8→14	 <p>1. Release 3 claws (shown in Fig. 1).</p>
 <p>2. Insert a screwdriver at the root of the fan (shown in Fig. 2).</p> <p>3. Remove the cap (shown in Fig. 3).</p> <p>4. Remove the motor from the fan case (shown in Fig. 4).</p> <p>5. When mounting the motor, align the boss of the fan case with the hole of the motor (shown in Fig. 5).</p>	

Replacement of the Foot

- Remove the 4 heat melted posts on the bottom board ass'y with a pair of nippers or similar tool.
- To replace the foot (RKA0011A-2) on the bottom board ass'y melt the 4 posts with a soldering iron.

Power Source ON/OFF of This Unit SE-CH505A

- Connect the AC power cord of this unit to an AC outlet and turn it on. (This unit comes to stand-by mode.)
- Make test point TP701 (TP701) short as shown in Fig. 1. POWER indicator lights and this unit comes to power ON mode.

Operation Check

- Set this unit to power ON mode.
- Input a signal (1kHz, 100mV) to the section between the resistor R217 (LINE IN for Lch) and the jumper J93 (LINE IN GND) as well as the section between the resistor R218 (LINE IN for Rch) and the jumper.
- Connect the speaker to the speaker terminals and check if it sounds from the speaker.

- VR601 : Volume control (VOLUME)

•Indicated voltage values are the standard values for the unit measured by the DC electronic circuit tester (high-impedance) with the chassis taken as standard. Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester. No mark: Power ON

•Important safety notice:
Components identified by Δ mark have special characteristics important for safety. Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

•This schematic diagram may be modified at any time with the development of new technology.

•Caution!
IC and LSI are sensitive to static electricity. Secondary trouble can be prevented by taking care during repair. Cover the parts boxes made of plastics with aluminum foil. Ground the soldering iron. Put a conductive mat on the work table. Do not touch the legs of IC or LSI with the fingers directly.

•Voltage and signal line

- : Positive voltage line
- - - : Negative voltage line
- : Source signal line
- : Mic signal (Lch)

Printed Circuit Board Diagram (Parts list on pages 23-25)

Replacement Parts List

Notes: *Important safety notice:

Components identified by Δ mark have special characteristics important for safety. Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list. *The parenthesized indications in the Remarks columns specify the areas. (Refer to the cover page for area.) Parts without these indications can be used for all areas. *Remote Control Ass'y: Supply period for three years from termination of production. *The "(SF)" mark denotes the standard part.

■ Replacement Parts List

Notes: *Important safety notice:

Components identified by Δ mark have special characteristics important for safety. Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list. *The parenthesized indications in the Remarks columns specify the areas. (Refer to the cover page for area.) Parts without these indications can be used for all areas. *Remote Control Ass'y: Supply period for three years from termination of production. *The "(SF)" mark denotes the standard part.
