

Service Manual

Amplifier

Amplifier

SE-CH570

Colour

(K) : Black

Note: The design of SB-PS10 is differ from the above picture.

Because of unique interconnecting cables, when a component requires service, send or bring in the entire system.

Areas

Suffix for Model No.	Area	Colour
(E), (EP)	Europe	(K)
(EB)	Britain	
(EG)	Germany and Italy	
(GC)	Asia, Latin America, Middle East, Africa and Oceania	

System: SC-CH570

Specifications

Power output

DIN 1 kHz, THD 1%, both channel driven 2 × 35 W (6 Ω)
 RMS 1 kHz, THD 10%, both channel driven 2 × 48 W (6 Ω)

PRO LOGIC mode

DIN 1 kHz, THD 1 %

MAIN (both channels driven) 2 × 30 W (6 Ω)
 SURROUND 30 W (4 Ω + 4 Ω)
 CENTER 30 W (8 Ω)

RMS 1 kHz, THD 10 %

MAIN (both channels driven) 2 × 40 W (6 Ω)
 SURROUND 40 W (4 Ω + 4 Ω)
 CENTER 40 W (8 Ω)

[For (GC) area only]

PMPO 1kHz 1400 W
 [MAIN (both channels driven) 6 Ω, SURROUND 4 Ω + 4 Ω,
 CENTER 8 Ω]

Total harmonic distortion

Rated power at 1 kHz 1% (6 Ω)
 Half power at 1 kHz 0.09% (6 Ω)

Load impedance

MAIN 6 Ω - 8 Ω
 SURROUND 4 Ω - 8 Ω
 CENTER 8 Ω

S/N (rated power)

MAIN

90 dB

General

Power consumption

[For (E), (EB), (EG) and (EP) areas] 160 W
 [FOR (GC) area] 350 W

[THD 10 %, MAIN (both channels driven) 6 Ω, SURROUND 4 Ω + 4 Ω, CENTER 8 Ω]

Power supply

[For (E), (EG) and (EP) areas] 230 V, AC 50/60 Hz

[For (EB) area] 230 - 240 V, AC 50/60 Hz

[For (GC) area] 110/127/220/230-240 V, AC 50/60 Hz

Dimensions (W × H × D)

270 × 118.5 × 342.5 mm

Weight

[For (E), (EB) and (EG) areas] 3.9 kg

[FOR (GC) area] 4.3 kg

Notes:

Specifications are subject to change without notice.

Weight and dimensions are approximate.

Total harmonic distortion is measured by the digital spectrum analyzer.

System	Tuner/sound processor	Compact disc player	Amplifier	Cassette deck	Front speakers	Center speaker	Surround speakers

Before Repair

- (1) Turn off the power supply. Using a 10 Ω, 10 W resistor, connect both ends of power supply capacitors (C701, C702) in order to discharge the voltage.
- (2) Before turning the power supply on, after completion of repair, slowly apply the primary voltage by using a power supply voltage controller to make sure that the consumed current at 50/60 Hz in NO SIGNAL mode should be shown below with respect to supply voltage 230 V/240 V.

Area	(E) (EG)	(EB)	(GC)	
	Power supply voltage	AC 230 V	AC 240 V	AC 110 V
Consumed current 50 Hz	60 ~ 220 mA	60 ~ 220 mA	100 ~ 440 mA	50 ~ 220 mA

Protection Circuitry

The protection circuitry may have operated if either of the following conditions is noticed:

- * No sound is heard when the power is switched ON.
- * Sound stops during a performance.

The functions of this circuitry is to prevent circuitry damage if, for example, the positive and negative speaker connection wires are "shorted", or if speaker systems with an impedance less than the indicated rated impedance of this unit are used.

If this occurs, follow the procedure outlined below:

1. Switch OFF the power.
2. Determine the cause of the problem and correct it.
3. Switch ON the power once again.

Note:
When the protection circuitry functions, the unit will not operate unless the power is first switched OFF and then ON again.

Accessories

■ Caution for AC Main Lead

[(EB) area code model only]

For your safety, please read the following text carefully.

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.

A 5-ampere fuse is fitted in this plug.

Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5-ampere and that it is approved by ASTA or BSI to BS1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local dealer.

CAUTION!

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY.

THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13-AMPERE SOCKET.

If a new plug is to be fitted please observe the wiring code as shown below.

If in any doubt please consult a qualified electrician.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral

Brown: Live

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured BLUE must be connected to the terminal in the plug which is marked with the letter N or coloured BLACK.

This apparatus was produced to BS 800.

■ Location of Controls

- ① Power "STANDBY /ON" switch (POWER, "STANDBY" /ON)
- ② Standby indicator (STANDBY)
- ③ Dolby Pro Logic indicators (SURROUND, 3 STEREO)
- ④ Center mode select button (CENTER MODE)
- ⑤ EQ SPACE/flat button (EQ SPACE/FLAT)
- ⑥ V.bass button (V.BASS)
- ⑦ Headphones jack (PHONES) (Ø 3.5, 32 Ω)
- ⑧ DOLBY PRO LOGIC mode select button ( PRO LOGIC)
- ⑨ Test signal button (TEST)
- ⑩ Volume control (VOLUME)
- ⑪ Microphone jack (MIC) (Ø 6.3, 600 Ω)
- ⑫ Microphone volume control (MIC VOL)

The wire which is coloured BROWN must be connected to the terminal in the plug which is marked with the letter L or coloured RED.

Under no circumstances should either of these wires be connected to the earth terminal of the three pin plug, marked with the letter E or the Earth Symbol .

Before use

Remove the connector cover as follows.

How to replace the fuse

1. Remove the fuse cover with a screwdriver.

2. Replace the fuse and attach the fuse cover.

Installation

Stacking the components

Horizontal stacking **A**

- Ⓐ CD player
- Ⓑ Tuner/sound processor
- Ⓒ Cassette deck
- Ⓓ Amplifier

Vertical stacking **B**

- Ⓐ Tuner/sound processor
- Ⓑ Amplifier
- Ⓒ CD player
- Ⓓ Cassette deck

Placement of speakers **C**

As well as enjoying normal stereo reproduction with the left and right front speakers, a center speaker and surround speakers can also be connected to the unit in order to enjoy the sound performance of DOLBY PRO LOGIC Systems.

We recommend that surround speakers be placed on the side of or slightly behind the listener, and about one meter higher than ear level.

However the position should be adjusted to your personal preference, because the effect varies to some degree depending upon the type of music and the music source.

- Ⓐ Front speaker (Left)
- Ⓑ Center speaker
- Ⓒ TV (not included)
- Ⓓ This system
- Ⓔ Front speaker (Right)
- Ⓕ Surround speaker (Left)
- Ⓖ Surround speaker (Right)

Flat Cable (included) Connections

Before marking connections:

Make sure the white line on the cable is on the right side.

To unplug cables:

Hold the connector from both ends.

Note Do not try connecting or disconnecting the flat cables while the power is switched to ON.

After connection:

Fold and press the cable as flat to the back of the unit as possible. (To minimize noise pickup while listening an MW/LW broadcast)

Antenna Connections

Connection of Front and Surround Speakers

■ Connection of Center Speaker

■ Connection of AC Power Supply Cord

● Plug the cord into an outlet only after all other connections have been made.

Insertion of Connector:

Even when the connector is perfectly inserted, depending on the type of inlet used, the front part of the connector may jut out as shown in the drawing.

■ Optional Antenna Connections

FM outdoor antenna (not included) ▣

The outdoor antenna should be used when using this unit in mountainous areas or in spaces enclosed by reinforced concrete where the FM indoor antenna (included) does not provide satisfactory reception.

Note

An outdoor antenna should be installed by a qualified technician only.

AM (MW/LW) outdoor antenna (not included) ▣

The outdoor antenna should be used when using this unit in mountainous areas or in spaces enclosed by reinforced concrete where the AM loop antenna (included) does not provide satisfactory reception.

Use 5-12 m of vinyl-sheathed wire horizontally at the window, or a convenient location.

When the unit is not in use, disconnect the outdoor antenna to prevent possible damage from lightning. Never use an outdoor antenna during an electrical storm.

Note

Be sure to connect the AM loop antenna even when an outdoor antenna is used.

External Unit Connections

- Make sure that the power supply for all components has been turned off before making any connections.
- For details, refer to the operating instructions of the units which are to be connected.
- When units other than those described below are to be connected, please consult with your audio dealer.

Connecting the stereo connection cable (not included) **A**

Connect the red plug to the right (R) connector.
Connect the white plug to the left (L) connector.

Video cassette recorder **B**

Analog player **C**

This example shows how to connect the analog player with the PHONO OUT/LINE OUT switch.

Set the switch to the "PHONO OUT" position at the back of the analog player.

"GND" terminal is for a ground wire use.

Enjoying Sound with DOLBY PRO LOGIC

By combining front, center and surround speakers, you can enjoy the SURROUND mode which conveys a feeling of presence or the 3 STEREO mode which conveys a feeling of orientation.

SURROUND

By reproducing the feeling of depth and movement of sound, video software or compact discs recorded with Dolby Surround provide the listener with a feeling of presence like that of a movie theater.

To enjoy SURROUND, be sure to connect the surround speakers.

3 STEREO

You can enjoy audio/video sources with clear sound, more presence and a good feeling of orientation. 3 STEREO can be used with sources not recorded in DOLBY SURROUND.

To enjoy 3 STEREO, be sure to connect the center speaker.

Manufactured under license from Dolby Laboratories Licensing Corporation.
DOLBY, and the double-D symbol  and "PRO LOGIC" are trademarks of Dolby Laboratories Licensing Corporation.

Setting the center mode

For Dolby Pro Logic systems, center mode setting is necessary to play back bass sounds effectively. Set the center mode in accordance with the size of your center speaker.

- 1 Switch on the power.**
- 2 Press PRO LOGIC to select "SURROUND" or "3 STEREO".**
Each time you press the button, the display will change as follows:
SURROUND → 3 STEREO → OFF
- 3 Press CENTER MODE to select "NORMAL" mode.**
Each time you press the button, the display will change as follows:
NORMAL → WIDE → PHANTOM

Note

"PHANTOM" will not be displayed when you select "3 STEREO" in step 2.

NORMAL:

When the center speaker is smaller than the front speakers

WIDE:

When the center speaker is the same or larger size as the front speakers

PHANTOM: SURROUND only

When no center speaker is connected.

Note

In the PHANTOM mode, the sound which would have been sent to the center speaker will be divided equally between both the left and right front speakers.

Adjusting speaker output level

In order to reproduce the movement of the sound and its clear orientation, it is important to adjust the output level of each speaker. Adjust output to the correct levels while listening to the test signal. Before starting, check your front speakers are correctly balanced (see page 60).

- 1 Press PRO LOGIC to select "SURROUND" or "3 STEREO".**
- 2 Press TEST to output a test signal.**
The test signal is emitted in the following order:
For SURROUND mode
Front speaker (left) → Center speaker
↑
Surround speakers (left, right) ← Front speaker (right)

Note

The test signal is not emitted from the center speaker when the center mode is on PHANTOM.

For 3 STEREO mode

Front speaker (left) → Center speaker
↑
Front speaker (right) ←

- 3 Turn VOLUME to set the volume level normally used for enjoying the source.**
- 4 Press CENTER (-) or (+) or SURROUND (-) or (+) on the remote control to adjust the output level balance.**

Note

- The test signal is output only by the speaker you are now adjusting and does not repeat the sequence until adjustments are complete.
- Remember you cannot adjust output level of the surround speakers if you selected the 3 STEREO mode in step 1.

To stop the test signal:

Press TEST.

Enjoying with SURROUND or 3 STEREO

Before trying anything, have you set the center mode and adjusted speaker output level?

When viewing a video, turn on the power supply for the TV and set the TV to video mode.

1 Press PRO LOGIC to select "SURROUND" or "3 STEREO".

2 Press SELECTOR to select the desired external source.

Each time you press this button, sound sources will be switched as follows.

These indications correspond to terminals on the tuner/sound processor's rear panel. Switch the displayed indication to the source you want to use.

Note

You can not enjoy SURROUND or 3 STEREO in the tuner mode.

3 Start the desired source.

To operate external sources, see the instruction manual provided with the specific unit.

Note

When employing SURROUND, use software recorded in Dolby Surround.

To turn off the DOLBY PRO LOGIC systems:

Press PRO LOGIC to select "OFF".

Note

You cannot record acoustical effects produced in the SURROUND and 3 STEREO modes.

■ Operation Check and Main Component Replacement Procedures

NOTE

1. This section describes procedures for checking the operation of the major printed circuit boards and replacing the main components.
2. For reassembly after operation checks or replacement, reverse the respective procedures. Special reassembly procedures are described only when required.
3. Select items from the following index when checks or replacement are required.
4. Illustrated screws are equivalent to actual size.
5. Refer the parts No. on the page of "Main Component Replacement Procedures", if necessary.

● Contents

•Checking Procedures for each P.C.B.	Page.
1. Checking for the operation P.C.B.	10.
2. Checking for the main P.C.B.	11.
•Main Component Replacement Procedures	
1. Replacement for the power IC and regulator transistor.	12.

■ Checking Procedure for each P.C.B.

1. Checking for the operation P.C.B.

• Check the operation P.C.B. as shown below.

Step 2

Step 3
Remove the top cabinet.

Step 5
Pull out the front panel ass'y.

Step 1

Step 4

Operation P.C.B.

	a
[RHD30007-K1] (Black)	
	b
[XTBS3+10JFZ1] (Black)	
	c
[XTBS3+8JFZ1] (Black)	

2. Checking for the main P.C.B.

-  **a**

-  **b**
[XTBS3+10JFZ1] (Black)
-  **c**
[XTB3+10JFZ] (Black)
-  **d**
[XTB3+20JFZ] (Black)

Step 3
Remove the cabinet.

• Check the main P.C.B. as shown below.

Main Component Replacement Procedures

1. Replacement for the power IC and regulator transistor

- Follow the item 2 (**Step 1** ~ **Step 7**) checking procedures for each P.C.B. on page 11.

NOTE

When mounting the power IC or regulator transistor, apply silicone compound (RFKX0002) to the rear side of power IC or regulator transistors.

Power Source ON/OFF of This Unit

- Connect this unit to an AC outlet by the AC power cord. (This unit comes to stand-by mode.)
- Short the test point **TP701** in Fig. 1. This unit comes to power ON mode.

Operation Check

- Set this unit to power ON mode.
- Input a signal (1 kHz, 100mV), and confirm it to be outputted from the speaker terminal.

	INPUT	OUTPUT
Lch	J603 - J308	Lch speaker terminal
Rch	J604 - J308	Rch speaker terminal
Surround	J611 - J308	Surround speaker terminal (To output a signal, both Lch and Rch should be connected.)
Center	J612 - J308	Center speaker terminal

■ Replacement Parts List

Notes: *Important safety notice:

 Components identified by Δ mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacture's specified parts shown in the parts list.

*The parenthesized indications in the Remarks columns specify the areas. (Refer to the cover page for area.)

Parts without these indications can be used for all areas.

*Remote Control Ass'y: Supply period for three years from termination of production.

*The "(SF)" mark denotes the standard part.

*<VRD>: indicates parts that are supplied by Video Recorder Division.

Audio Visual

email: av.technical@mail.panasonic.co.uk

Product Group: Audio

Model: SE-CH570

Date: 22/10/98

Revision No: 01

Document No: 01

Subject: Fan Motor Failure

SUBJECT: Fan Motor Failure

SYMPTOM: Power supply turns off during operation. 'F61' is displayed on the FL.
(Occurs at a level of sound volume where the fan rotates).

CAUSE: The motor fan dislocated either by a fall during transportation or by vibration, fails to rotate. Upon failure of the fan, the protector circuit turns off power supply and, at the same time, indicates 'F61' on the FL.

REMEDY: The motor fan fixing ribs are changed in shape so that the fan will not be dislocated easily.

SERVICE REMEDY:

- When the fan is found dislocated, insert it. If the inserted fan works properly, it can be used as it is. (No dislocation unless the set is dropped by mistake.)
- The fan motor of which the fan come easily out after re-insertion should be replaced with new one.

ACTION ON PRODUCTION:

From August 1996 production onward.

PART REQUIRED:

REM0057 Fan Motor Ref. No. 29

■ Replacement Parts List

Notes: *Important safety notice:

 Components identified by Δ mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacture's specified parts shown in the parts list.

*The parenthesized indications in the Remarks columns specify the areas. (Refer to the cover page for area.)

Parts without these indications can be used for all areas.

*Remote Control Ass'y: Supply period for three years from termination of production.

*The "(SF)" mark denotes the standard part.

*<VRD>: indicates parts that are supplied by Video Recorder Division.
