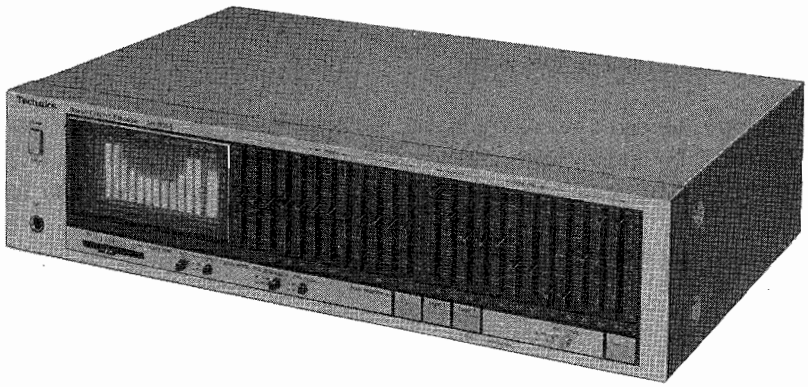
SH-8055 (K)

[E], [EK], [EF], [EB], [EH], [EGA], [XA], [XL]



Areas

* [E] is available in Scandinavia and Switzerland.
* [EK] is available in United Kingdom.
* [EF] is available in France.
* [EB] is available in Belgium.
* [EH] is available in Holland.
* [EGA] is available in F.R. Germany.
* [XA] is available in Southeast Asia, Oceania, Africa, Middle Near East and Central South America.
* [XL] is available in Australia.
* [PA] is available in Far East PX.
* [PE] is available in European Military.
* [Ei] is available in Italy.

* The colors of this model include silver and black.
* The black type model is provided with (K) in the Service Manual.

Specifications

(Specifications are subject to change without notice for further improvement.)

(DIN 45 500)

Frequency response (center position)	: 5 Hz~100 kHz, −1 dB
Maximum output voltage	: 8 V (1 kHz, THD 0.01%)
Rated output vc	V
Rated total harr distortion	003% (20 Hz~20 kHz) 002% (1 kHz)
Input sensitivit	V
Signal-to-noise	)2 dB (110 dB, IHF' A)
Maximum input voltage	V (1 kHz)
Input impedanc	' kΩ
Gain	±1 dB
Channel balanc 250 Hz~6300	0.5 dB
Channel separa 1 kHz	: 70 dB
Band level controls	: +12 dB~−12 dB (12 elements continuously variable per channel)
Center frequency	: 25 Hz, 40 Hz, 63 Hz, 100 Hz, 160 Hz, 250 Hz, 500 Hz, 1 kHz, 2 kHz, 4 kHz, 8 kHz, 16 kHz
Pink noise output voltage	: 50 mV
Compatible microphone sensitivity	: above −74 dBV/μbar (1 kHz)
Microphone attenuator	: −20 dB

GENERAL

Power supply	: AC 110 V/120 V/220 V/240 V, 50 Hz/60 Hz.
Power consumption	: 17 W
Dimensions	: 108×430×270 mm (4-1/4"×16-15/16"×10-5/8")
	: 4.1 kg (9.0 lb)

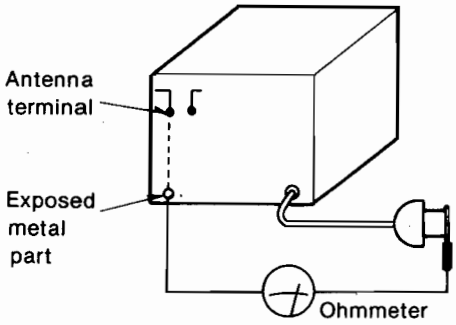
■ SAFETY PRECAUTIONS

1. Before servicing, unplug the power cord to prevent an electric shock.
2. When replacing parts, use only manufacturer's recommended components for safety.
3. Check the condition of the power cord. Replace if wear or damage is evident.
4. After servicing, be sure to restore the lead dress, insulation barriers, insulation papers, shields, etc.
5. Before returning the serviced equipment to the customer, be sure to make the following insulation resistance test to prevent the customer from being exposed to a shock hazard.

• INSULATION RESISTANCE TEST

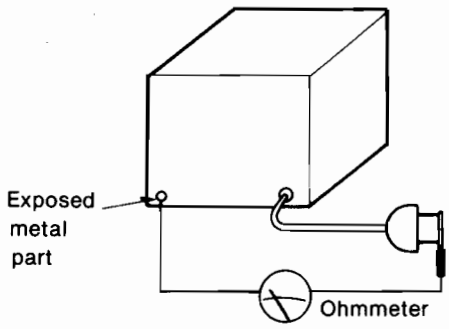
1. Unplug the power cord and short the two prongs of the plug with a jumper wire.
2. Turn on the power switch.
3. Measure the resistance value with ohmmeter between the jumpered AC plug and each exposed metal cabinet part, such as screwheads antenna, control shafts, handle brackets, etc. Equipment with antenna terminals should read between 3MΩ and 5.2MΩ to all exposed parts. (Fig. A) Equipment without antenna terminals should read approximately infinity to all exposed parts. (Fig. B)

Note: Some exposed parts may be isolated from the chassis by design. These will read infinity.



(Fig. A)

Resistance = 3MΩ—5.2MΩ

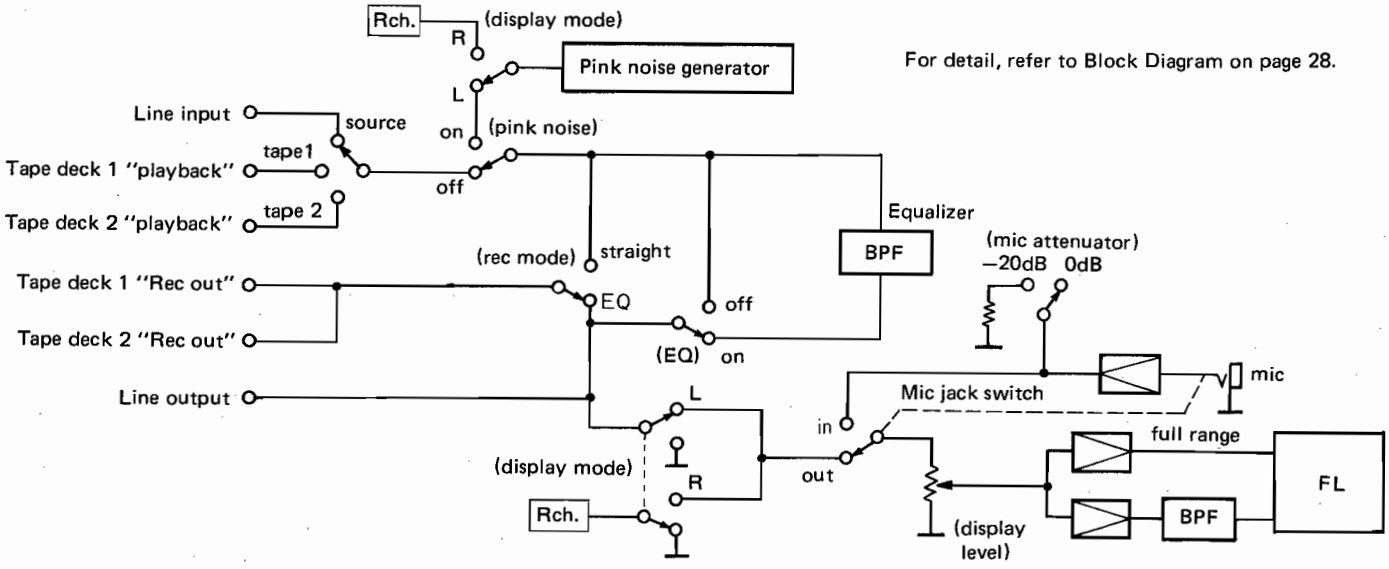


(Fig. B)

Resistance = Approx ∞

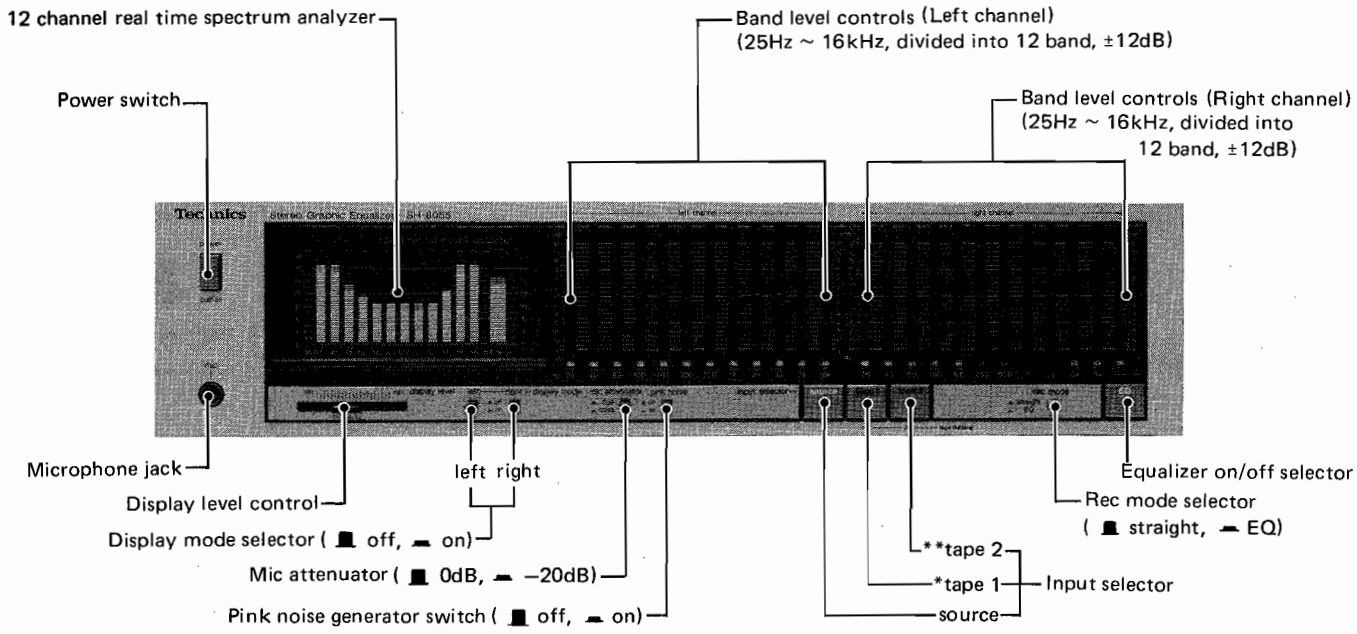
4. If the measurement is outside the specified limits, there is a possibility of a shock hazard. The equipment should be repaired and rechecked before it is returned to the customer.

■ BLOCK DIAGRAM OF FUNCTION



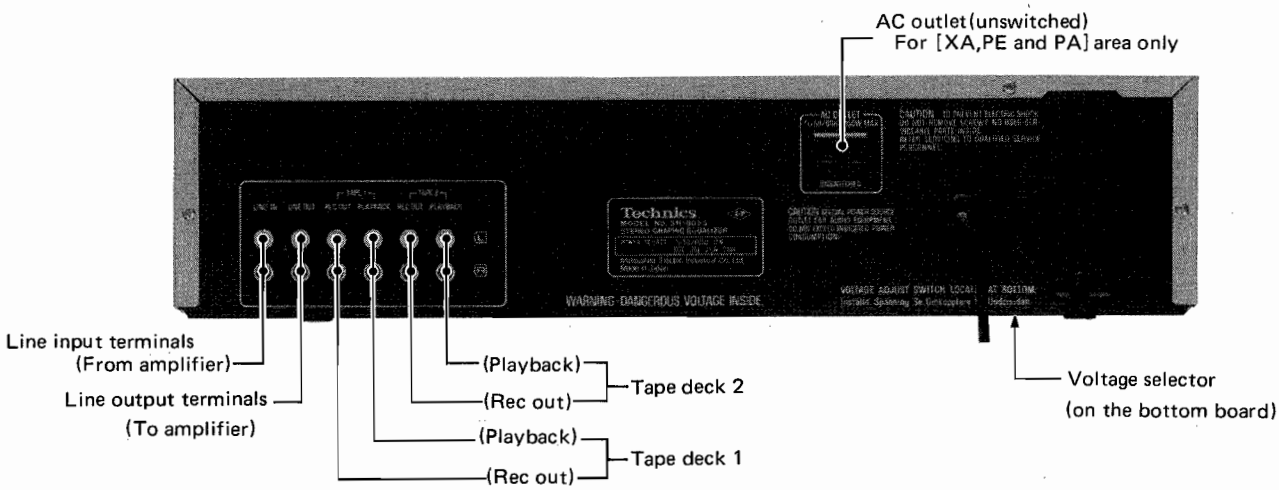
For detail, refer to Block Diagram on page 28.

■ LOCATION OF CONTROLS



*Mic Jack of this unit is not for mixing.

* Dubbing from tape deck 1 to 2 is possible with tape 1 switch.
** Dubbing from tape deck 2 to 1 is possible with tape 2 switch.



- The power supply for this unit varies depending upon the areas. Also, the parts used for power supply are different. So, refer to the circuit diagram and the replacement parts list.

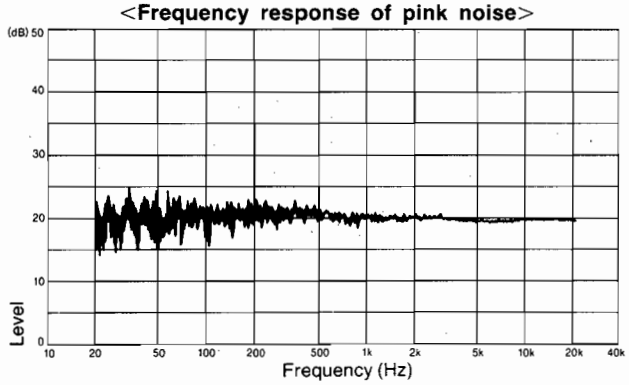
■ REAL TIME SPECTRUM ANALYZER

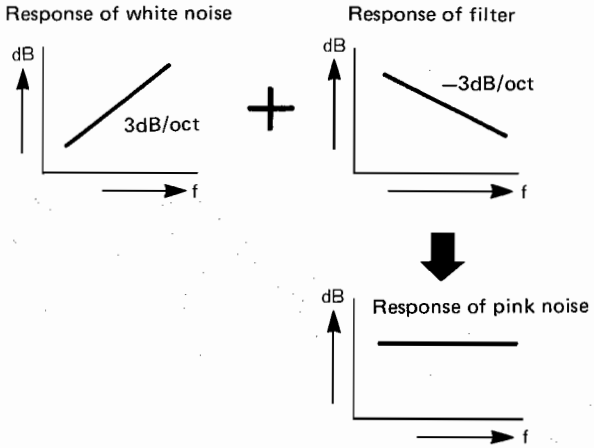
- This can be used to measure and correct the sound field frequency response of a listening room and to measure the frequency components of a sound source.
- The same 12-band frequency divider as for the band level controls allows the levels of the frequency components of voices, music, etc., to be visually displayed.
- The "full range" area on the right side displays the combined level of all of the frequency bands.
- The display is in 12 points for each frequency band and a level width of 30 dB can be displayed.
- The real time spectrum analyzer is connected to the output terminals of this unit. When the equalizer switch is "on", the level of the corrected source is displayed; when pink noise switch is "on", the level of the corrected pink noise is displayed; when the microphone is connected, the microphone input level is displayed.
- The attack time and recovery time of the display is fast for source and slow for pink noise; thus the responsiveness to the source is good and the display is easy to see during sound field correction.

■ PINK NOISE

- Pink noise is used for measurement and correction of the sound field frequency response because it is mostly within the audible range, its energy distribution is uniform, and it has a wide frequency band.
- Because pink noise has large instantaneous level fluctuations, the display may fluctuate.

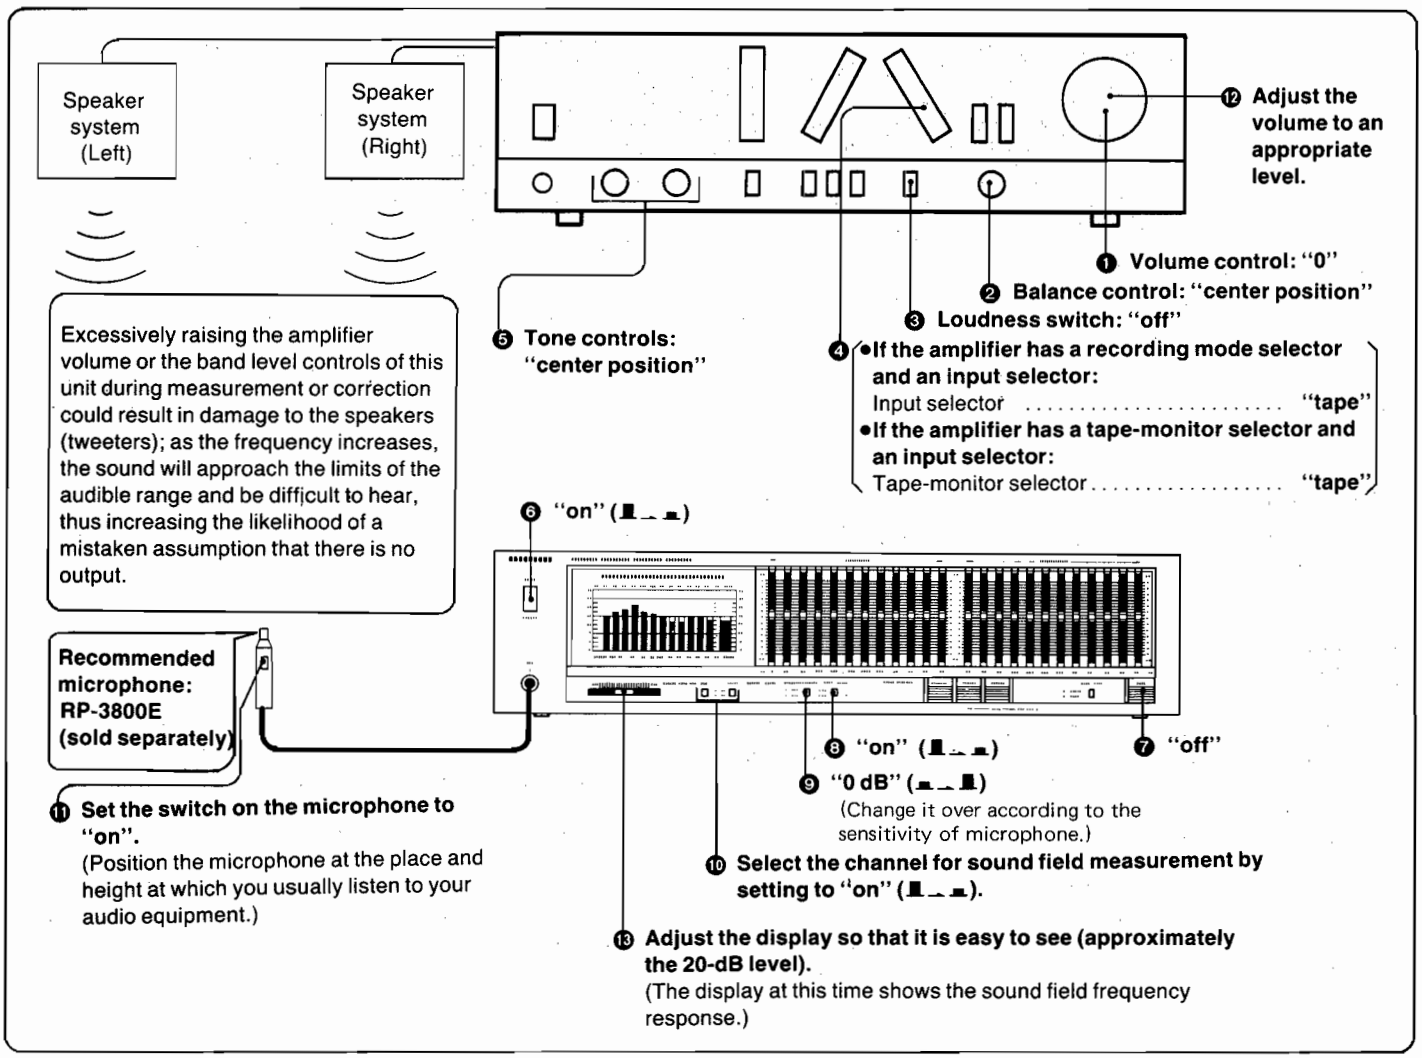
<Frequency response of pink noise>



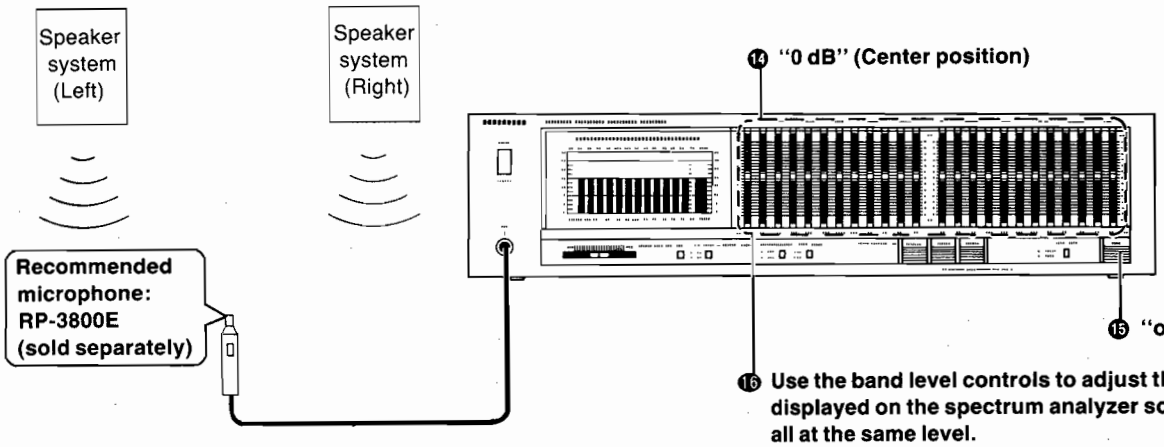


■ HOW TO USE THE REAL-TIME SPECTRUM ANALYZER

- With the sound volume of amplifier set at minimum, the frequency characteristics of sound sources such as human voice, live music and noise can be measured (displayed on spectrum analyzer) through operations in numerical order as shown below.
- As the sound volume of amplifier is increased through operations as shown below, the sound volume of pink noise increases, and then the sound field frequency characteristics can be measured (displayed on spectrum analyzer).



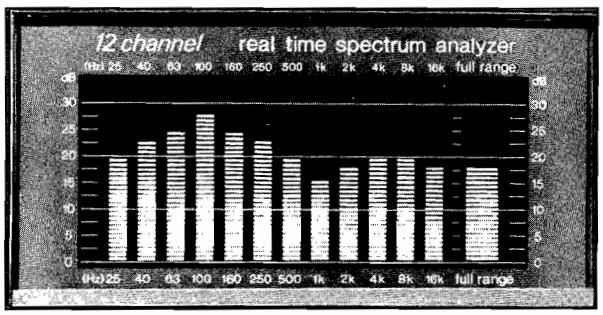
- Correct the sound field in order as shown below according to the data obtained through measurement on page 4.
- Correct is on each of the channels.



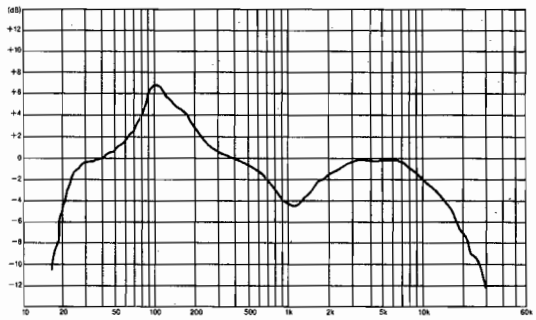
(Position the microphone at the same place and height as it was for the measurement.)

⓰ Use the band level controls to adjust the frequencies displayed on the spectrum analyzer so that they are all at the same level.
Make the adjustment so that the band level controls are centered around the "0 dB" position and are not set too far in either the "+ dB" or "– dB" direction.
(After adjustment, the positions of the band level controls are the ideal listening point.)

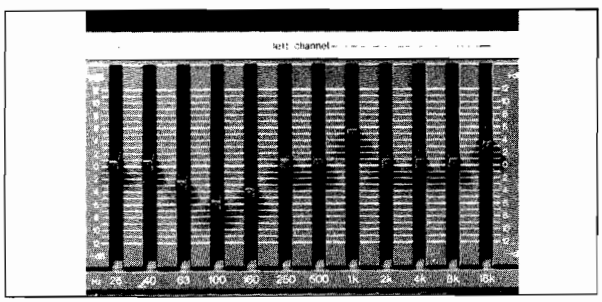
(Example of sound field frequency response obtained through measurement)



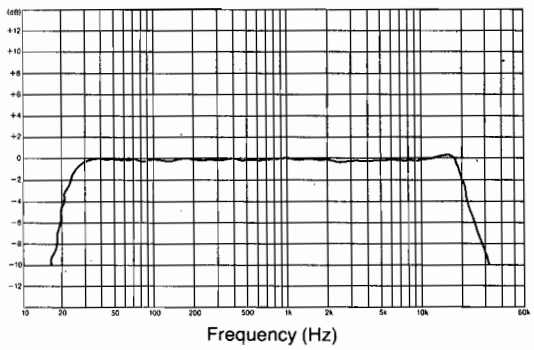
Frequency response prior to correction adjustment



(Position of the band level controls after correction adjustment)



Frequency response after correction adjustment



- Depending on the listening room, it is not always possible to obtain a perfectly flat response for equalization correction.
- When making the correction adjustment, the spectrum analyzer display may not always visually agree with the positions of the band level controls.

<Microphone to be used with this unit>

The microphone that should be used with this unit is the RP-3800E (sold separately). If any other microphone is used, the frequency response displayed on the spectrum analyzer may differ from the actual sound field frequency response.

■ DISASSEMBLY INSTRUCTIONS

1. How to remove the cabinet

1. Remove the screws (**Fig. 1:** ❶ ~ ❼) of the cabinet.
2. Remove the cabinet.

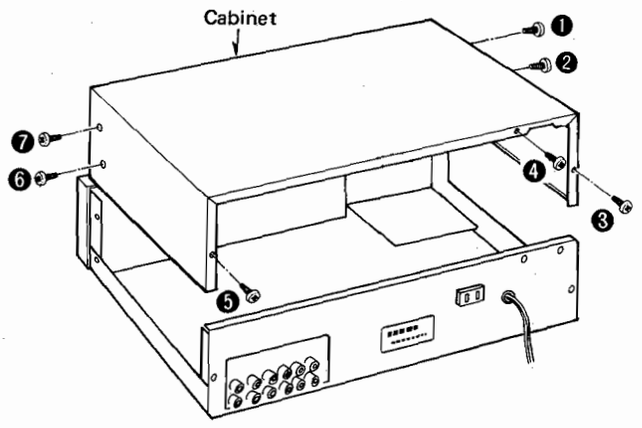


Fig. 1

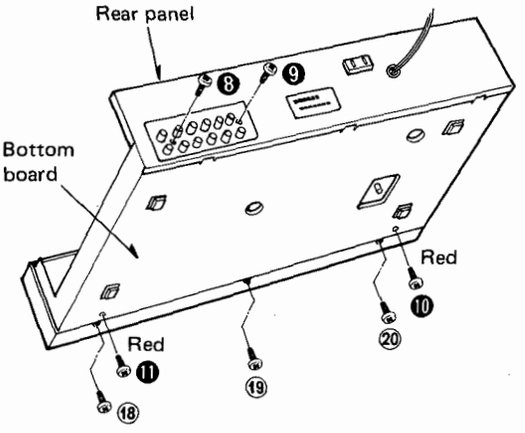

Fig. 2

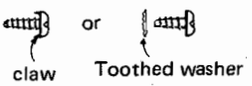
2. How to remove the printed circuit board

1. Romove the cabinet. (Refer to **"How to remove the cabinet"**)
2. Remove the screws (**Fig. 2:** ❽ ~ ⓫) of the rear panel and the bottom board.
3. Remove the screws (**Fig. 3:** ⓬ ~ ⓮) of the main printed circuit board.
4. Remove the stopper **A** (P.C.B. holder) of the FL printed circuit board. (Refer to **Fig. 4**)

(Note) Claw screws or ordinary screws (3 x 8 mm) and toothed washers should be used for screws ⓬ and ⓮ .



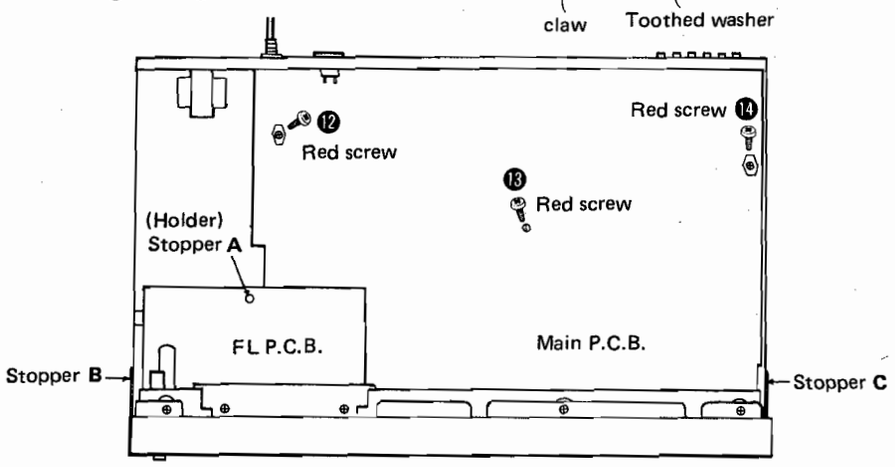


Fig. 3

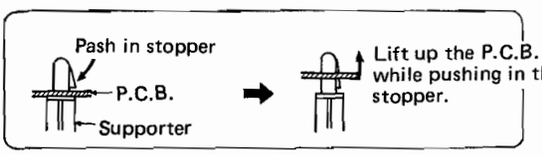

Fig. 4

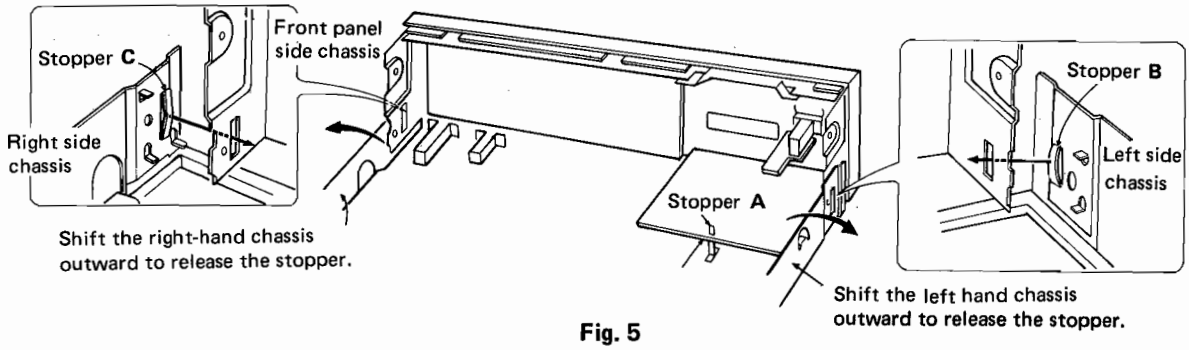

Fig. 5

5. Shift the right and left chassises outward as shown in **Fig. 5** to release the stoppers **B** and **C** out of the chassis holes on the front panel side.
6. Slightly draw out the front panel toward you along with the P.C.B., then raise the chassis as in **Fig. 6** and check.

* When checking the voltage, removing screws ⑫ and ⑭ of **Fig. 3,** touch the ground side of circuit tester rod to the ground line of P.C.B. (power supply circuit terminal (3), etc.) because the chassis is not grounded.

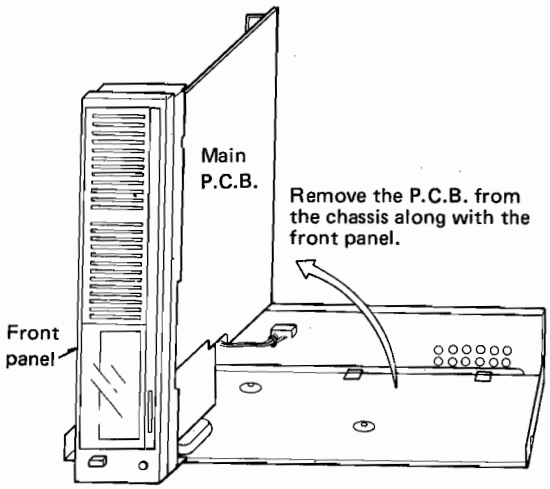

Fig. 6

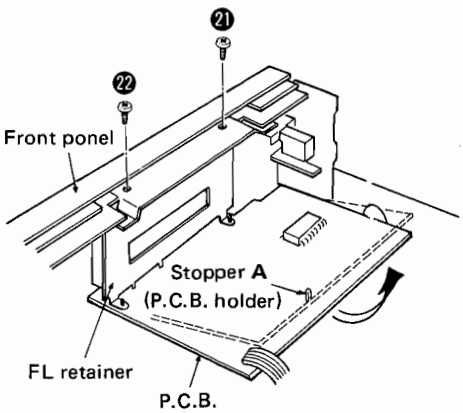

Fig. 7

3. How to remove the FL P.C.B.

1. Remove the cabinet. (See **Fig. 1.**)
2. Remove screws ㉑ and ㉒ as in **Fig. 7.**
3. Remove stopper **A**. (See **Fig. 4.**)
4. Remove P.C.B. together with FL from the chassis in the direction of the arrow in **Fig. 7.**

4. How to remove front panel

1. Remove the cabinet. (See **Fig. 1.**)
2. Remove screws ⑮ ~ ⑳ as in **Fig. 8.** (For screws ⑱ ~ ⑳, See **Fig. 2.**)
3. Remove the front panel from the chassis.
4. Input switch LED P.C.B. and EQ switch LED P.C.B. are fitted to the front panel. Release the claws as in **Fig. 9** to remove the P.C.B. from the front panel.

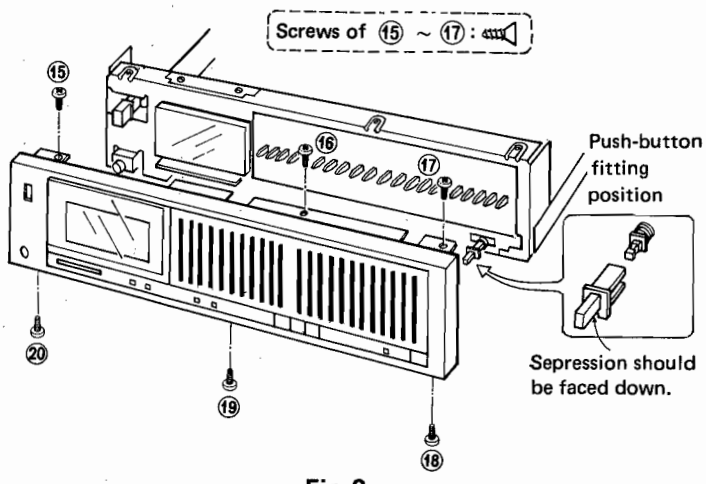

Fig. 8

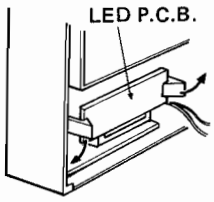

Fig. 9

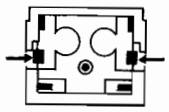

Fig. 10

5. How to remove input select/EQ switch

1. Remove the front panel. (See **Fig. 8.**)
2. Push the claw of the button from the back of front panel in the direction of the arrow as in **Fig. 10** to shift it out toward the front panel.

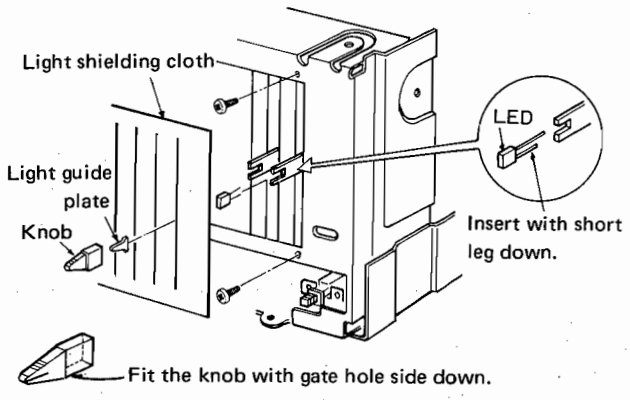

Fig. 11

6. How to remove band level control P.C.B.

1. Remove the front panel. (See **Fig. 8.**)
2. Remove th light shielding cloth as in **Fig. 11.**
3. Remove the 12 screws shown in **Fig. 12** to remove the P.C.B. (It can be removed together with the knobs.)

* The light shielding cloth and control P.C.B. can be removed together with the knobs. When removing the knobs, refer to **Fig. 11.**

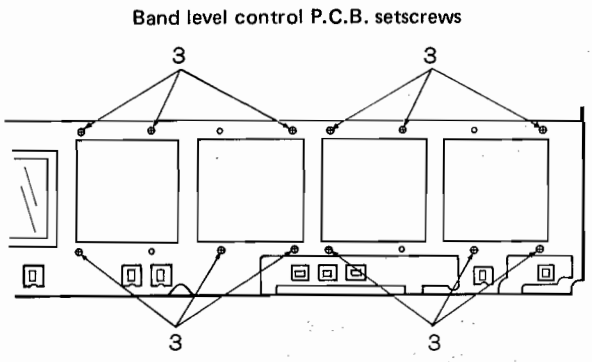

Fig. 12

■ REPLACEMENT PARTS LIST

Notes: 1. Part numbers are indicated on most mechanical parts. Please use this part number for parts order.
2. Important safety notice: Components identified by ⚠ mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.
3. Ⓚ —marked parts are used for black only, while ○ —marked parts are for silver type only.
4. Part other than Ⓚ —and ○ —marked are used for both black and silver type.
5. Bracketed indications in Ref. No. columns specify the area. Parts without these indications can be used for all areas.
6. The " **S** " mark is service standard parts and may differ from production parts.
7. The parenthesized numbers in the column of description stand for the quantity per set.

Black type model No. : SH-8055(K)

Numbering System of Resistor

Example

ERD	25	F	J	101
Type	Wattage	Shape	Tolerance	Value
(carbon)	(¼W)		(±5%)	(100Ω)

- The unit of resistance is Ω (ohm), K = 1000Ω, M = 1000kΩ.
- The unit of capacitance is μF (microfarad). P = 10^{-6} μF

Numberring System of Capacitor

Example

ECKD	1H	103	Z	F
Type	Voltage	Value	Tolerance	Peculiarity

Capacitor Type		Voltage				Tolerance
		ECEA type		Others		
ECEA	: Electrolytic	0J	: 6.3V	05	: 50V DC	J : ± 5%
ECCD	: Ceramic	1A	: 10V	1H	: 50V DC	K : ± 10%
ECKD	: Ceramic	1C	: 16V	2H	: 500V DC	Z : +80%, −20%
ECQM	: Ployester	1E	: 25V	KC	: 400V AC	
ECF	: Semi conductor	1V	: 35V			P : +100%, −0%
ECQV	: TF	1H	: 50V

■ SCHEMATIC DIAGRAM Ⓑ

(This schematic diapram may be modified at any time with the development of new technology.)

- **Spectrum analyzer**

- The part No. of transistros, IC and diodes mentioned in the schematic diagram stand for production part No. Regarding the part No. whith ✪ mark, the production part No. are different from the replacement part No. Therefore, when placing an order for replacement parts, pleases use the part No. in the replacemnt parts list.

Notes:

1. This is basic circuit diagram (For continental Europe) of this unit.
2. Regarding the circuits to be changed in the basic circuit diagram (For continental Europe) and related areas ([PA], [PE] and [XA]) refer to the booklet contains (Order No. SD83062526C9–A).
3. **S1 ~ S3** : Input selector in **"source"** position. (S1–1 ~ S1–3 : source, S2 - 1 ~ S2 - 6 : Tape 1, S3 - 1 ~ S3 - 5 : Tape 2)
4. **S4–1 ~ S4–2** : Pink noise generator switch in **"off"** position.
5. **S5–1 ~ S5–6** : Equalizer on/off selector in **"on"** position.
6. **S6–1 ~ S6–2** : Recording mode selector in **"EQ"** position. (straight ⟷ EQ)
7. **S7–1 ~ S7–2** : Display mode (left channel) switch in **"on"** position.
8. **S8–1 ~ S8–2** : Display mode (right channel) siwtch in **"on"** position.
9. **S9–1** : Microphone attenuator switch in **"0dB"** position. (0dB ⟷ –20dB) * S9–2 is muting switch incase attenuator selection.
10. **S10** : Power source switch in **"on"** position.
11. **S11** : Voltage selector in **"220V"** position. (110V ⟷ 120V ⟷ 220V ⟷ 240V)
12. The circuit is same for both L and R channels.
13. ▭ Indicated voltage values are the standard values for the DC electronic circuit tester (high impedance) with the ground point taken as standard. Therefore, there may exist some errors in the voltage volues, depending on the internal impedance of the DC circuit tester.
14. Signal lines of left channel.
15. Signal lines of band pass filter.
16. Signal lines of mic.
17. Positive (+B) voltage lines.
18. Important safety notice: Components identified by ⚠ mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.

Please revise the original parts list in the Service Manual to conform to the change (s) shown herein. If new part numbers are shown, be sure to use them when orderring parts.

Reason for Change *The circled item indicates the reason. If no marking, see the Notes in the bottom column.

1. Improve performance	
2. Change of material or dimension	
3. To meet approved specification	
4. Standardization	
5. Addition	
6. Deletion	
7. Correction	
8. Other	

Interchangeability Code **The circled item Indicates the interchangeability. If no marking, see the Notes in the bottom column.

	Parts		Set Production	
A	Original	→	Early	Original or new parts may be used in early or late production set. Use original parts until exhausted, then stock new parts.
	New	→	Late	
B	Original	→	Early	Original parts may be used in early production sets only. New parts may be used in early or late production sets. Use original parts where possible, then stock new parts.
	New	→	Late	
C	Original	→	Early	New parts only may be used in early or late production sets. Stock new parts.
	New	→	Late	
D	Original	→	Early	Original parts may be used in early production sets only. New parts may be used in late production sets only. Stock both original and new parts.

■ TECHNISCHE DATEN (Spezifikationen Konnen infolge von Verbesserungen ohne Ankundigung geandert werden.)

(DIN 45 500)

Frequenzgang (mittelstellung drehen)	: 5 Hz~100 kHz, −1 dB
Maximalausgangs-spannung	: 8 V (1 kHz, THD 0,01%)
Nennausgangsspan-nung	: 1 V
Nennklirrfaktor	: 0,003% (20 Hz~20 kHz) 0,002% (1 kHz)
Eingangsspannung	: 1 V
Geräuschabstand	: 102 dB (110 dB, IHF, A)
Maximaleingangs-spannung	: 8 V (1 kHz)
Eingangsimpedanz	: 47 kΩ
Verstärkung	: 0±1 dB
Kanalsy mmetrie 250 Hz~6300 Hz	: ±0,5 dB
Kanaltrennung 1 kHz	: 70 dB
Frequenzgangregler	: +12 dB~−12 dB (12 Regler, stufenlos verstellbar)
Mittenfrequenzen	: 25 Hz, 40 Hz, 63 Hz, 100 Hz, 160 Hz, 250 Hz, 500 Hz, 1 kHz, 2 kHz, 4 kHz, 8 kHz, 16 kHz
Ausgangsspannung für rosa Rauschen	: 50 mV
Mikrofonempfindlichkeit	: über −74 dBV/μ bar (1 kHz)
Mikrofondämpfung	: −20 dB

ALLGEMEINE DATEN

Stromversorgung	: Wechselstrom, 110 V/120 V/220 V/ 240 V, 50 Hz/60 Hz
Leistungsaufnahme	: 17 W
Abmessungen (H×B×T)	:108×430×270 mm (4-1/4"×16-15/16"×10-5/8")
Gewicht	: 4,1 kg (9,0 lb)

FRANÇAIS

■ CARACTERISTIQUES (Sujet a changement sans prearis.)

(DIN 45 500)

Réponse de fréquence (position centrale)	: 5 Hz~100 kHz, −1 dB
Tension de sortie maximale	: 8 V (1 kHz, THD 0,01%)
Tension de sortie nominale	: 1 V
Distortion harmonique total	: 0,003% (20 Hz~20 kHz) 0,002% (1 kHz)
Sensibilité d'entrée	: 1 V
Signal/Bruit	: 102 dB (110 dB, IHF' A)
Tension d'entrée maximale	: 8 V (1 kHz)
Impédance d'entrée	: 47 kΩ
Gain	: 0±1 dB
Equilibrage de canal 250 Hz~6300 Hz	: ±0,5 dB
Séparation de canal 1 kHz	: 70 dB
Commandes de niveau de gamme	: +12 dB~−12 dB (12 éléments, continuellement variables)
Fréquences charnières	: 25 Hz, 40 Hz, 63 Hz, 100 Hz, 160 Hz, 250 Hz, 500 Hz, 1 kHz, 2 kHz, 4 kHz, 8 kHz, 16 kHz
Tension de sortie des bruits roses	: 50 mV
Sensibilité de microphone compatible	: plus de −74 dBV/µbar (1 kHz)
Attenuateur de microphone	: −20 dB

GENERALITES

Alimentation	: CA. 110 V/120 V/220 V/240 V, 50 Hz/60 Hz
Consommation	: 17 W
Dimensions (h×l×pr)	: 108×430×270 mm (4-1/4"×16-15/16"×10-5/8")
Poids	: 4,1 kg (9,0 lb)

■ ESPECIFICACIONES (Estas especificaciones estan sujetas a cualquier cambio sin previo eviso.)

(DIN 45 500)

Respouesta de frecuencia (posición central)	: 5 Hz~100 kHz, −1 dB
Tensión de salida máxima	: 8 V (1 kHz, THD 0.01%)
Tensión de salida de régimen	: 1 V
Distorsión armónica total nominal	: 0.003% (20 Hz~20 kHz) 0.002% (1 kHz)
Sensibilidad de entrada	: 1 V
Relación d señal ruido	: 102 dB (110 dB, IHF' A)
Tensión de entrada máxima	: 8 V (1 kHz)
Impedancia de entrada	: 47 kΩ
Ganancia	: 0±1 dB
Equilibrio de canales 250 Hz~6300 Hz	: ±0,5 dB
Separación de canales 1 kHz	: 70 dB
Controles de nivel de banda	: +12 dB~−12 dB (12 elementos, continuamente variables)
Frecuencia central	: 25 Hz, 40 Hz, 63 Hz, 100 Hz, 160 Hz, 250 Hz, 500 Hz, 1 kHz, 2 kHz, 4 kHz, 8 kHz, 16 kHz
Voltaje de salida del ruido rosado	: 50 mV
Sensibilidad del micrófono compatible	: por sobre −74 dBV/µbar (1 kHz)
Atenuador de micrófono	: −20 dB

EN GENERAL

Alimentación de corriente	: C.A. de 110 V/120 V/220 V/240 V, 50 Hz/60 Hz
Consumo de corriente	: 17 W
Dimensiones (alto×ancho×prof.)	: 108×430×270 mm (4-1/4"×16-15/16"×10-5/8")
Peso	: 4,1 kg (9,0 lb)
