Stereo Graphic Equalizer

## SH-E4/(K)

[D],[EK],[EW],[EB],[EF],  
[EGA],[EH],[XA],[XL],[Ei],[PC]

- \* The colors of this model include silver and black.
- \* The black type model is indicated by (K) in the Service Manual.

### Areas

- \* [D] is available in Scandinavia.
- \* [EK] is available in United Kingdom.
- \* [EW] is available in Switzerland.
- \* [EB] is available in Belgium.
- \* [EF] is available in France.
- \* [EGA] is available in F.R. Germany.
- \* [EH] is available in Holland.
- \* [XA] is available in Southeast Asia, Oceania, Africa, Middle Near East and Central South America.
- \* [XL] is available in Australia.
- \* [Ei] is available in Italy.
- \* [PC] is available in European Audio Club.

## Specifications

(Specifications are subject to change without notice for further improvement.)

### (DIN 45 500)

Frequency response (center position)	: 5 Hz~100 kHz, -3 dB
Maximum output voltage	: 8 V (1 kHz, THD 0.01%)
Rated output voltage	: 1 V
Rated total harmonic distortion	: 0.005% (20 Hz~20 kHz) 0.003% (1 kHz)
Input sensitivity	: 1 V
Signal-to-noise ratio	: 95 dB (100 dB, IHF' A)
Maximum input voltage	: 8 V (1 kHz)
Input impedance	: 47 k $\Omega$
Gain	: 0 $\pm$ 1 dB
Channel balance 250 Hz~6300 Hz	: $\pm$ 0.5 dB
Channel separation 1 kHz	: 60 dB

Band level controls	: +12 dB~-12 dB (12 elements continuously variable)
Center frequency	: 25 Hz, 40 Hz, 63 Hz, 100 Hz, 160 Hz, 250 Hz, 500 Hz, 1 kHz, 2 kHz, 4 kHz, 8 kHz, 16 kHz

### GENERAL

Power supply	: AC 240 V, 50 Hz/60 Hz. (For United Kingdom and Australia) AC 220 V, 50 Hz/60 Hz. (For continental Europe) AC 110 V/120 V/220 V/240 V, 50 Hz/60 Hz. (For others)
Power consumption	: 9.5 W
Dimensions (H $\times$ W $\times$ D)	: 50 $\times$ 315 $\times$ 240 mm (1-31/32" $\times$ 12-13/32" $\times$ 9-7/16")
Weight	: 2.0 kg (4.4 lb)

# Technics

Matsushita Electric Trading Co., Ltd.  
P.O. Box 228, Central Osaka Japan

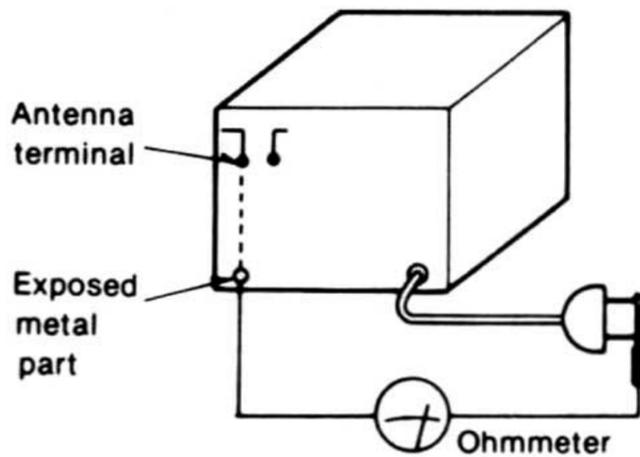

## SAFETY PRECAUTION

1. Before servicing, unplug the power cord to prevent an electric shock.
2. When replacing parts, use only manufacturer's recommended components for safety.
3. Check the condition of the power cord. Replace if wear or damage is evident.
4. After servicing, be sure to restore the lead dress, insulation barriers, insulation papers, shields, etc.
5. Before returning the serviced equipment to the customer, be sure to make the following insulation resistance test to prevent the customer from being exposed to a shock hazard.

### INSULATION RESISTANCE TEST

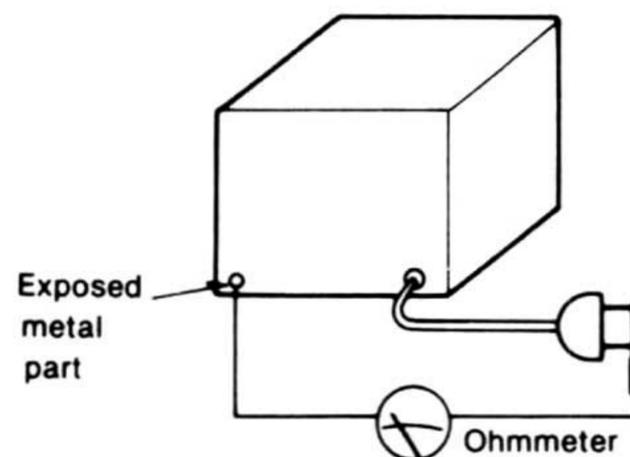

1. Unplug the power cord and short the two prongs of the plug with a jumper wire.
2. Turn on the power switch.
3. Measure the resistance value with ohmmeter between the jumpered AC plug and each exposed metal cabinet part, such as screwheads antenna, control shafts, handle brackets, etc. Equipment with antenna terminals should read between  $3M\Omega$  and  $5.2M\Omega$  to all exposed parts. (Fig. A) Equipment without antenna terminals should read approximately infinity to all exposed parts. (Fig. B)

**Note:** Some exposed parts may be isolated from the chassis by design. These will read infinity.

(Fig. A)

Resistance =  $3M\Omega$ — $5.2M\Omega$

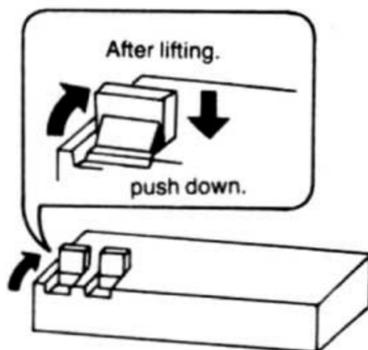

(Fig. B)

Resistance = Approx  $\infty$

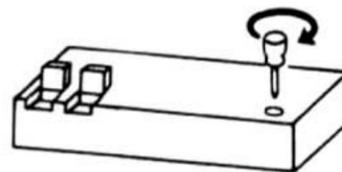

4. If the measurement is outside the specified limits, there is a possibility of a shock hazard. The equipment should be repaired and rechecked before it is returned to the customer.

## STANDARD CONNECTION METHOD WITH DIRECT CONNECTORS

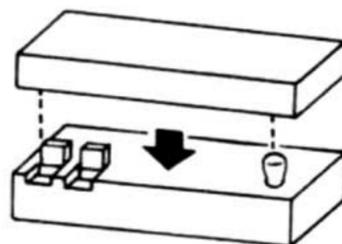

- ① Lift the direct connector on the tape deck. Push it straight down to lock it into place.

- ③ Insert the pin into the top panel. (Push in and turn clockwise  $90^\circ$ .)

- ④ Lower this unit (SH-E4) onto the tape deck. Line up the direct connector and stabilizing pin properly.

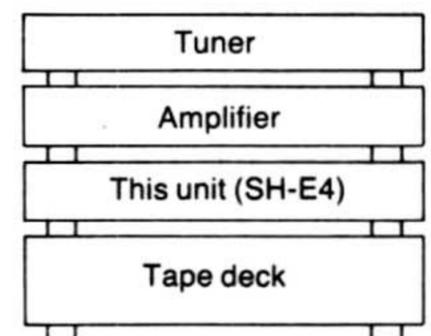

- ⑤ In the same way as in steps ①~③, place the amplifier on the equalizer, and connect the tuner to the amplifier.

- ⑥ Connect the turntable and speakers with their respective accompanying cords.

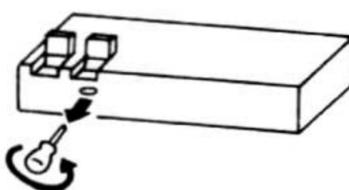

### Notes:

1. When using the direct connectors, do not use pin cords.
2. When using this unit (SH-E4), place it between amplifier and tape deck.

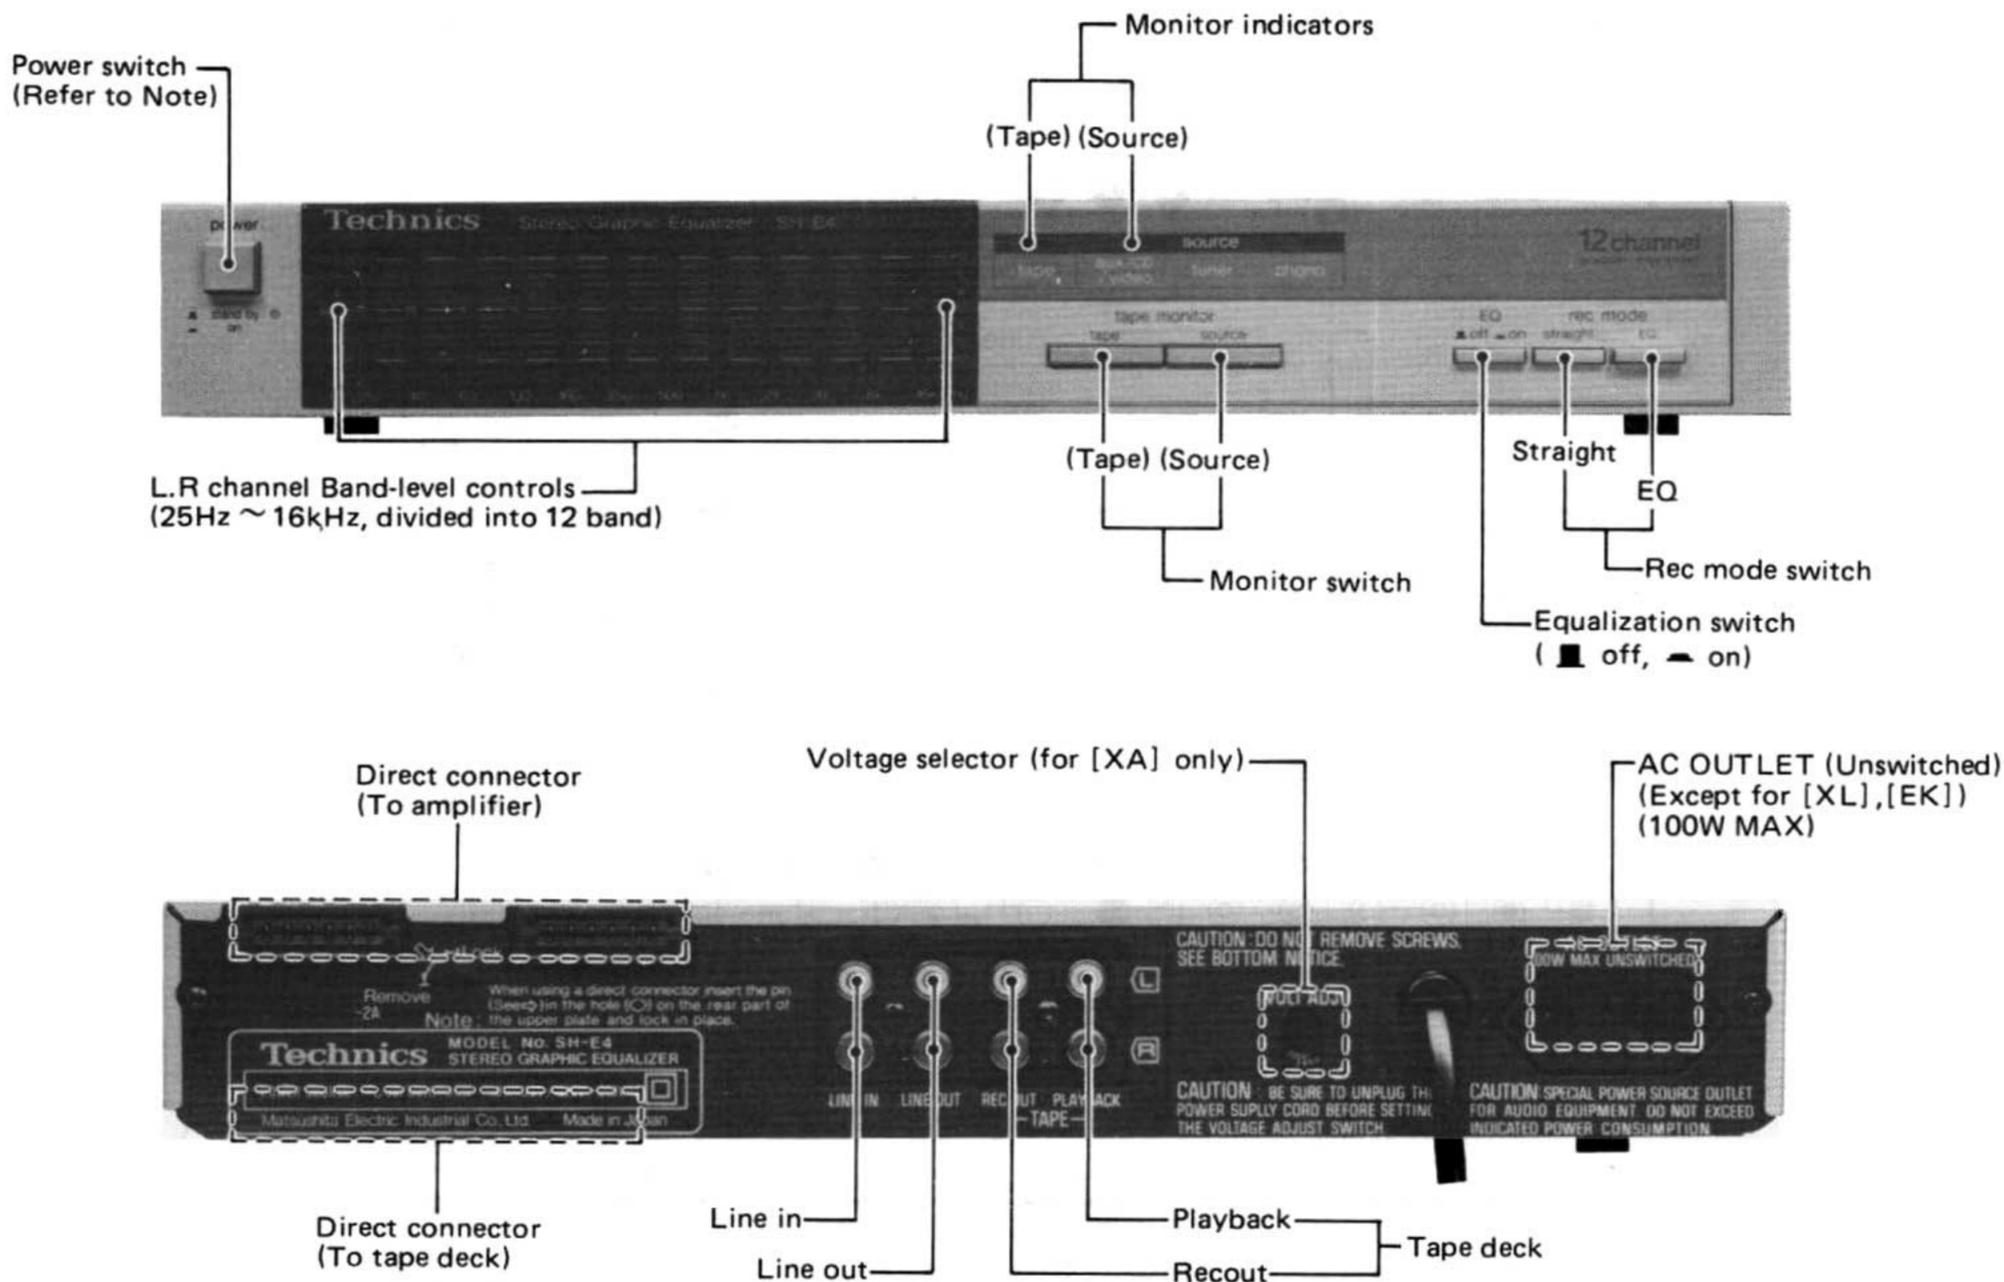

3. Position the units in a straight column to avoid twisting and breaking the direct connectors.
4. If this unit is installed in a rack, first make the direct connector connections.

- ② Remove the stabilizing pin from the back panel. (Turn counter-clockwise  $90^\circ$  and pull.)

# LOCATION OF CONTROLS

## Note:

If the power is switched on while other equipment is being used, the sound will be momentarily interrupted.

Regardless of the switch setting, the primary circuit is always "live" as long as the power cord is connected to an electrical outlet.

## Recording mode selector (rec mode)

This switch is used, when recording on a tape deck, to select whether or not to make correction adjustments during recording.

### •EQ (■—■):

Set the switch to this position to make correction adjustments during recording.

### •Straight (■—■):

Set to this position to record without equalizer correction.

## Equalization switch (EQ)

This switch can be used to turn the equalization circuitry on and off.

### •on (■—■):

Set to this position for equalizer correction.

### •off (■—■):

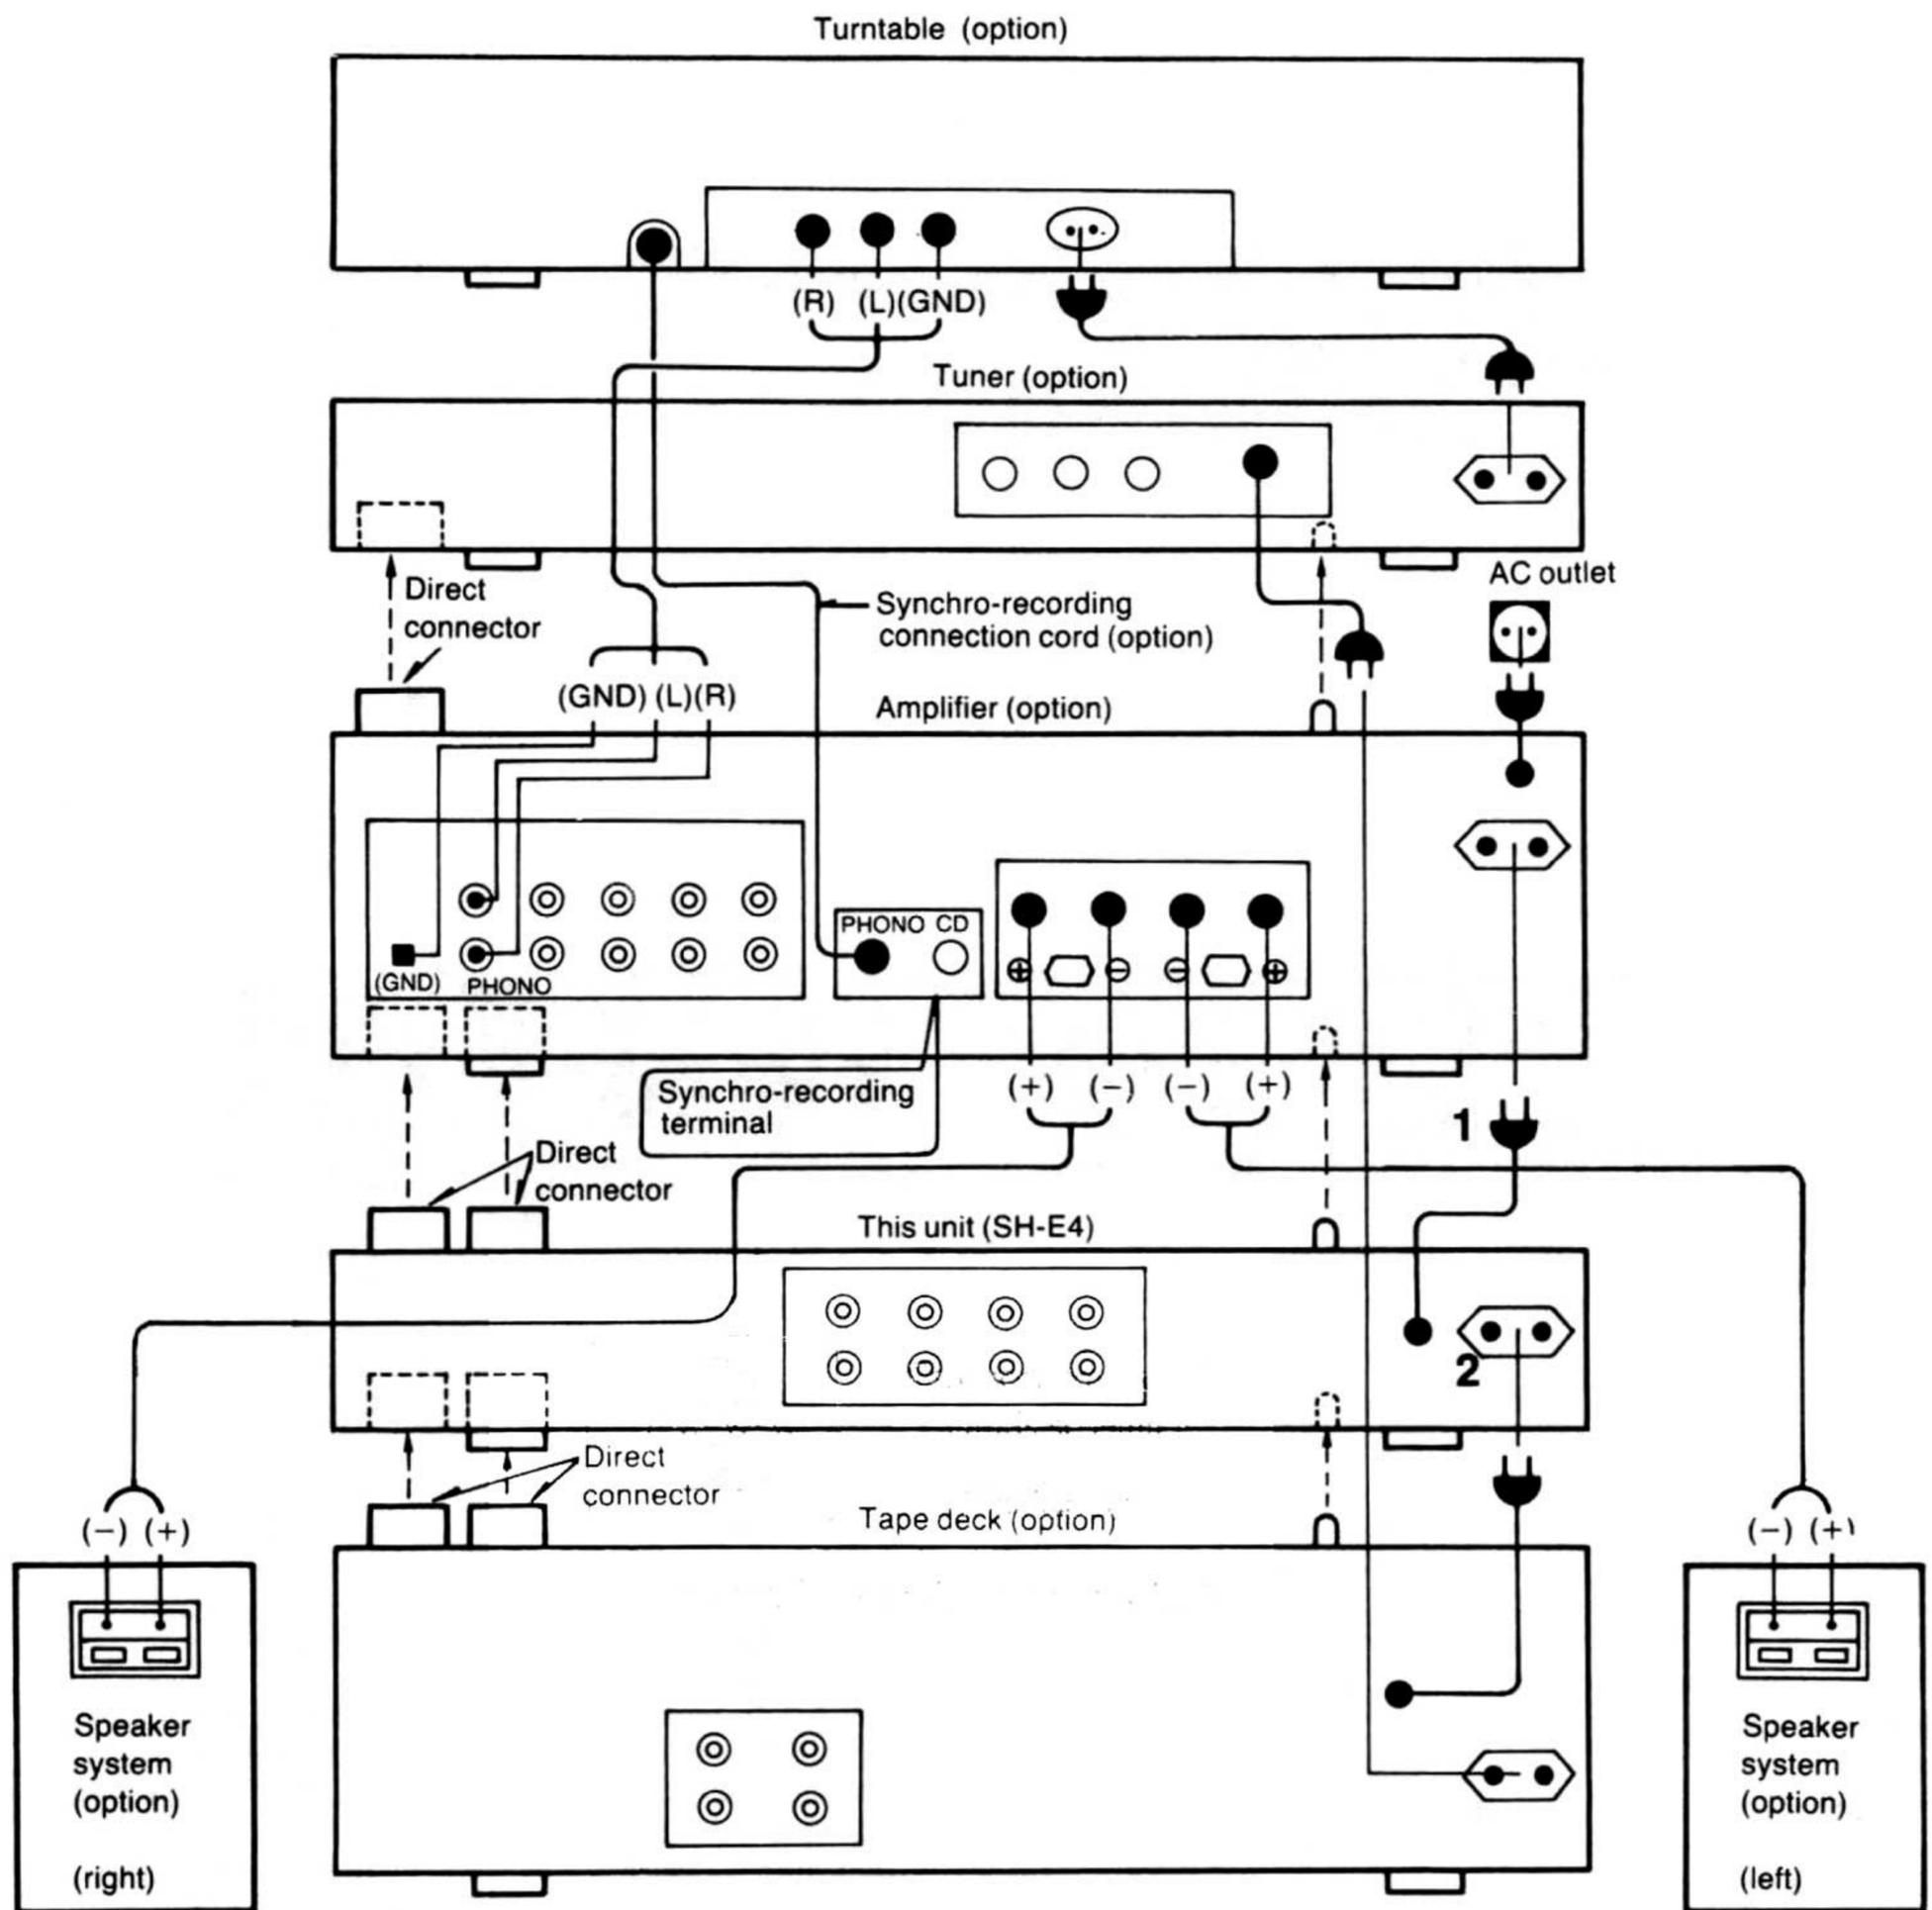

Set to this position to turn off equalizer correction. By turning this switch on and off, the equalizer effect can also be checked. When this switch is in the "off" (■—■) position, signals will still pass through the unit and be emitted, regardless of whether the power "stand by" ⏻•on" switch is in the "on" or "off" position.

• The power supply for this unit varies depending upon the areas. Also, the parts used for power supply are different. So, refer to the circuit diagram and the replacement parts list.

\* 240V (50/60Hz) for Australia. [XL] and United Kingdom [EK] areas.

\* 110V-120V, 220V-240V (50/60Hz) for [XA] and [PC] areas.

# CONNECT WITH DIRECT CONNECTORS

**1** Do not disconnect the power cord of this unit even if the power switch is switched OFF. If the power cord is disconnected, tape deck playback, recording and direct operation functions cannot be used. Note, however, that the power cord should be disconnected if the entire system is not to be used for a long time, because otherwise there is some consumption of electricity even if the power switch is OFF.

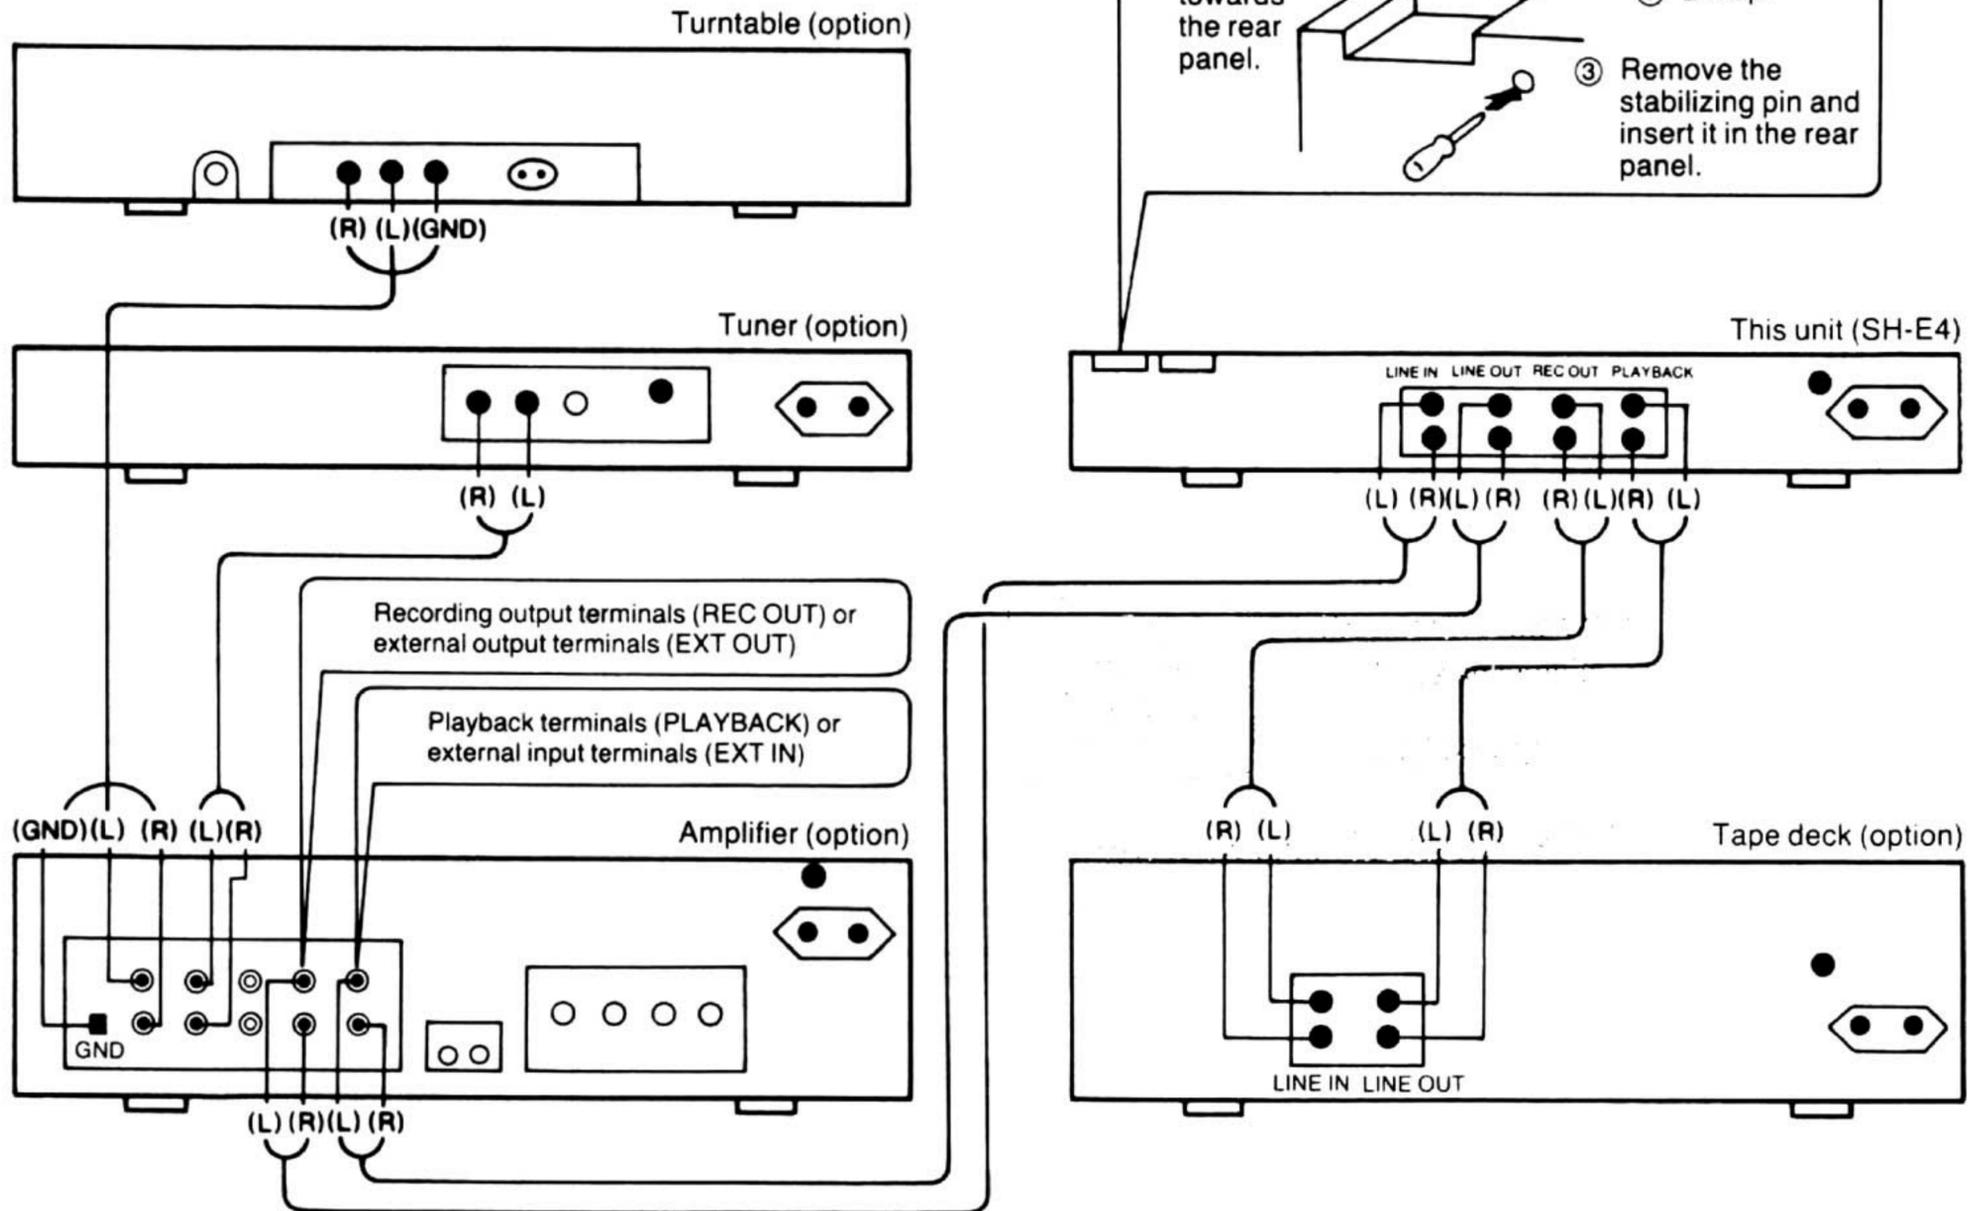

## **2 "UNSWITCHED" outlet:**

Power is always available, regardless of power switch setting. Equipment rated up to 100 W can be connected. (Not equipped for some countries)

**Note:** The configuration of the AC outlet and AC power plug differs according to area.

## CONNECT WITH PIN CORDS

- For connection with an integrated amplifier.  
Connection to the TAPE terminals of an integrated amplifier.

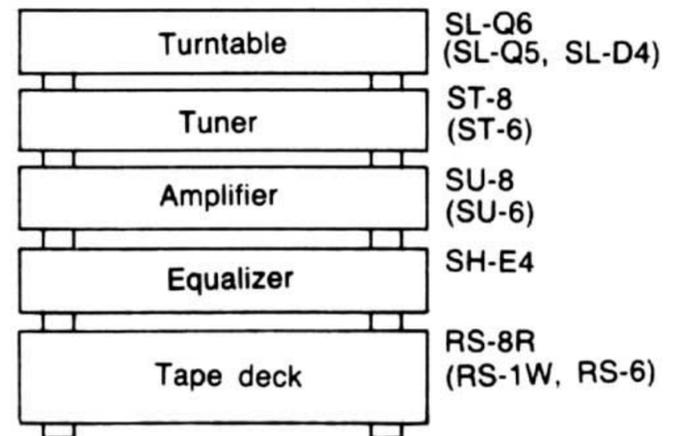

## DIRECT OPERATION

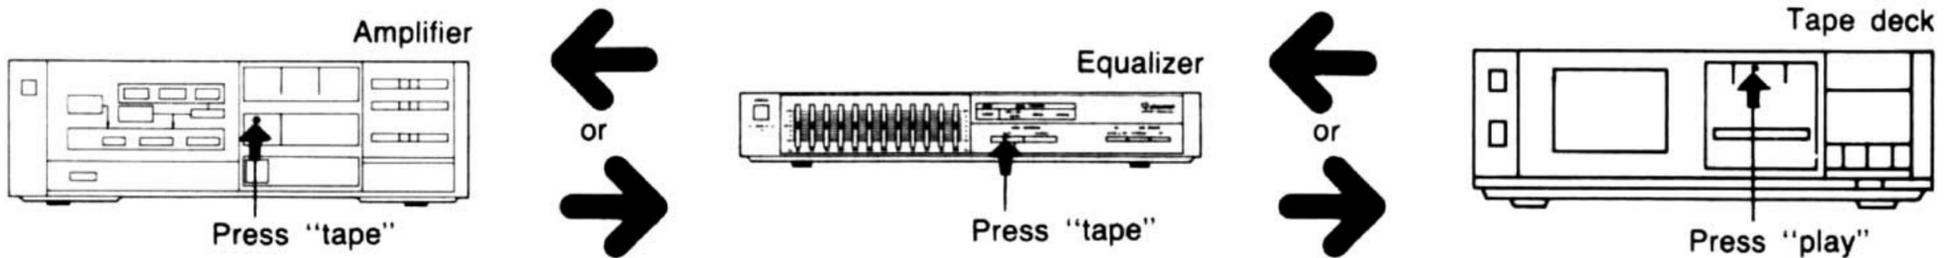

"Direct operation" means that, once each component has been prepared for operation, any operation can be conveniently selected and started by one-touch operation.

This function is possible only by the combination of Technics components shown in the figure at the right, and which have been connected by direct connectors.

Operation at the equalizer, or at the individual components, is possible.

- To listen to a tape... Press the "tape" button on the equalizer or amplifier, or the "play" button on the tape deck.

- To listen to discs...
- To listen to radio broadcasts...

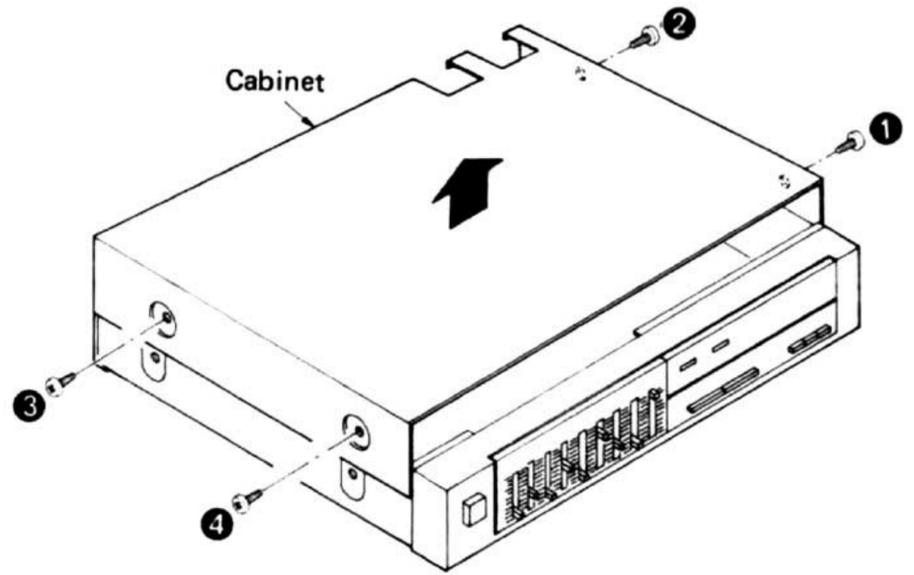

Refer to the section "Direct Operation" (in the operating instructions of the amplifier) for disc play or radio broadcasts.

### Notes:

1. Do not switch the tuner on while playing a disc or tape, or while tape recording, because to do so will cause the "tuner" input selector to be automatically activated.
2. If, while listening to a disc or radio broadcast, the tape deck is switched off and the tape indicator is illuminated, press the tape-monitor selector marked "source".
3. Even though another input selector is pressed while listening to a turntable or a compact-disc player, the turntable or compact-disc player will continue to operate; be sure to stop it.
4. If the equalizer power is ON, switching from "tape" to "source" should be done by using the "source" switch of the equalizer.

# DISASSEMBLY INSTRUCTIONS

## 1. How to remove the cabinet [Fig. 1]

[Fig. 1]

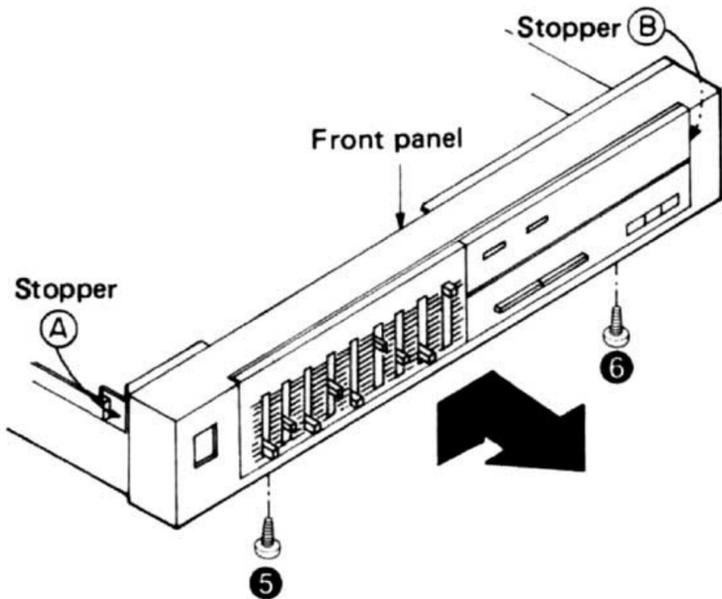

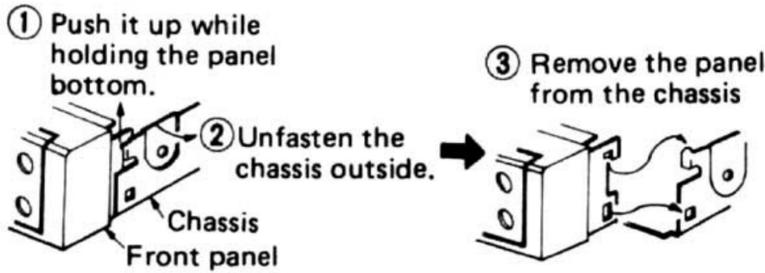

## 2. How to remove the front panel [Fig. 2, 3]

1. Remove the cabinet.
2. Pull to the 3 connectors (Fig. 3 : J4, J7, J8.)
3. Remove the 2 setscrews (Fig. 2: ⑤, ⑥) of the front panel.
4. Release the chassis stopper from inside ①, ②, and lift the front panel to remove.

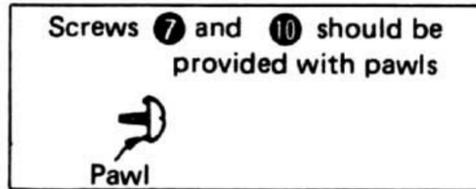

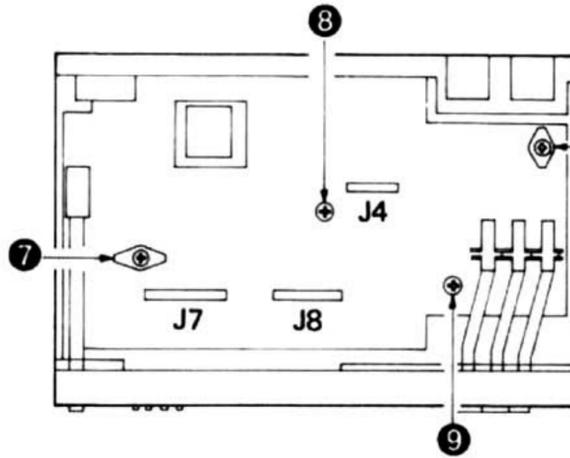

## 3. How to remove the P.C.B. [Fig. 3, 4, 5]

1. Remove the front panel and cabinet.
2. Remove the rear terminals 2 setscrews (Fig. 4: ⑪, ⑫) and the 4 setscrews (Fig. 3: ⑦ ~ ⑩) of the P.C.B.
3. Pull up the P.C.B. (Fig. 5)

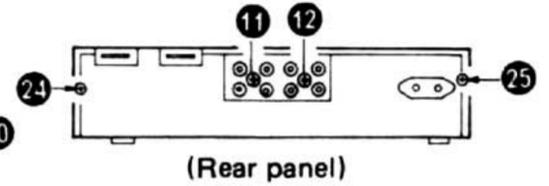

### ● To remove the chassis stopper

[Fig. 2]

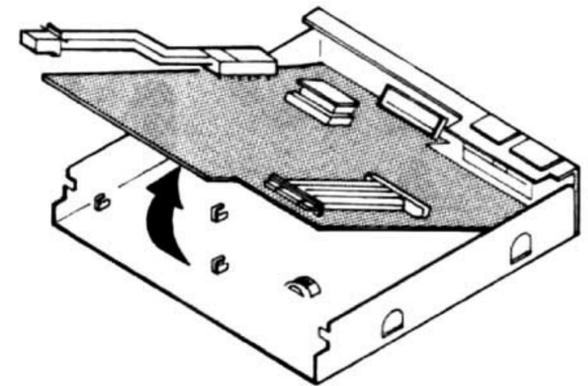

[Fig. 3]

(Rear panel)

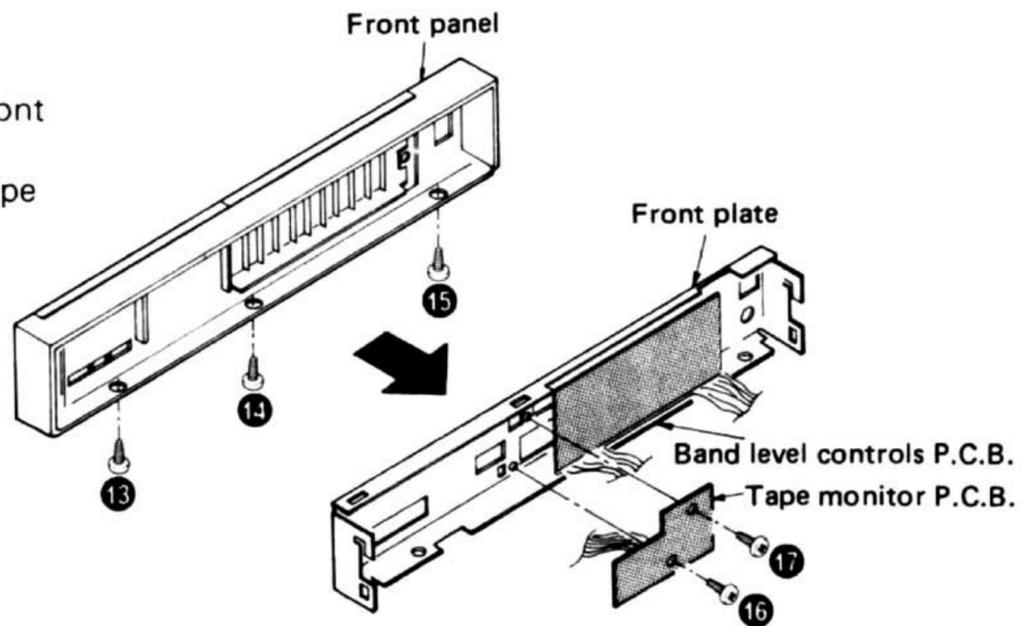

[Fig. 4]

[Fig. 5]

## 4. How to remove the front plate [Fig. 6]

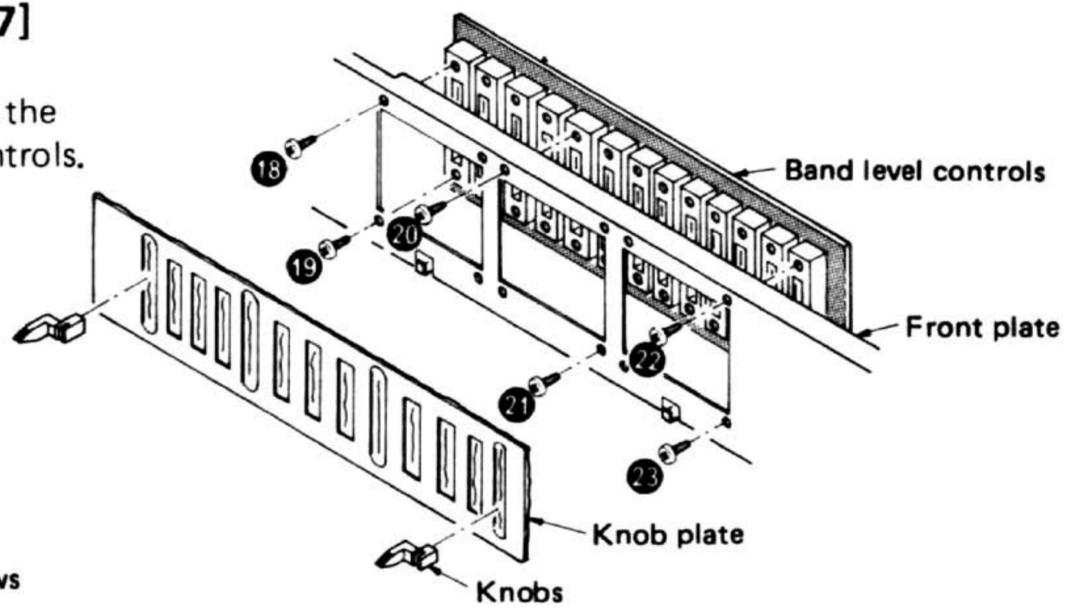

1. Remove the front panel.
2. Remove the 3 setscrews (Fig. 6: ⑬ ~ ⑮) of the front plate.
3. Remove the 2 setscrews (Fig. 6: ⑯, ⑰) of the tape monitor P.C.B.

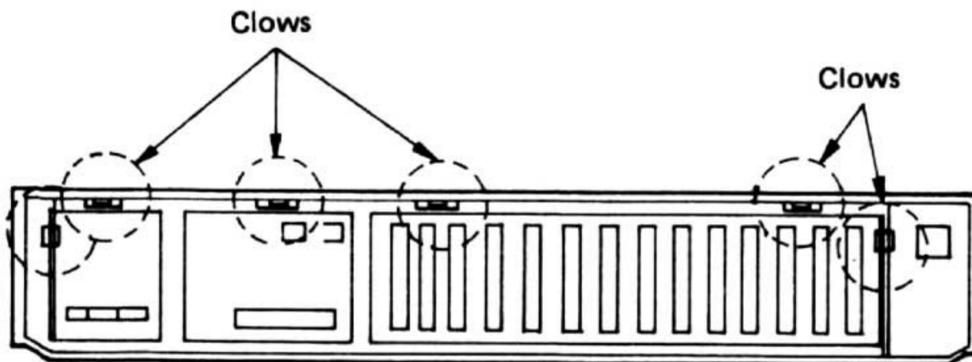

[Fig. 6]

## 5. How to remove the band level controls [ Fig. 7 ]

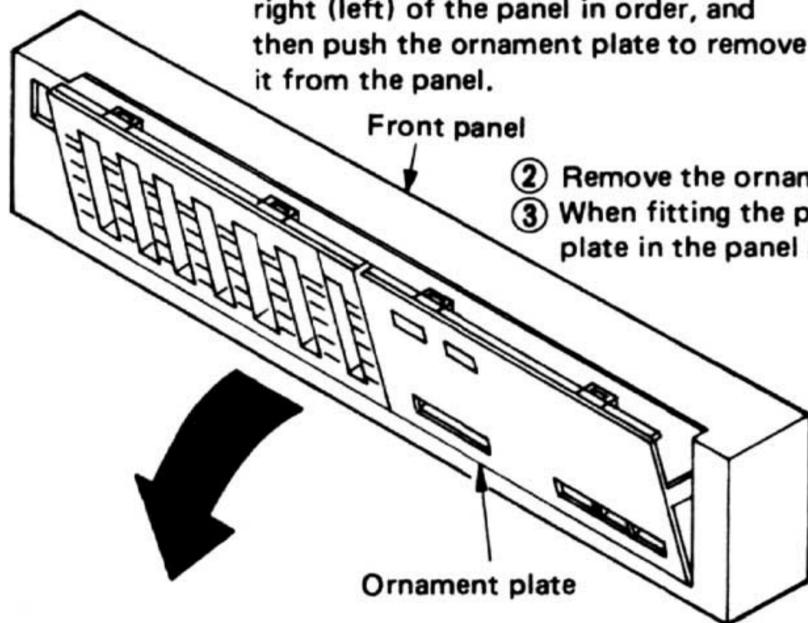

1. Remove the front panel.
2. Remove the knobs and the knob plate, then remove the 6 setscrews (Fig. 6: 18 ~ 23 ) of the band level controls.

[ Fig. 7 ]

- 1 Unfasten the claws from left (right) to right (left) of the panel in order, and then push the ornament plate to remove it from the panel.

- 2 Remove the ornament plate aslant from the panel.
- 3 When fitting the plate, first fit the bottom of the plate in the panel and then push in the upper claws.

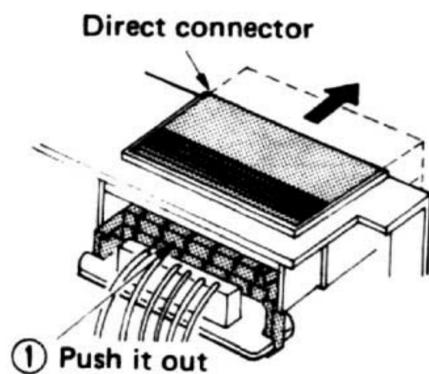

[ Fig. 8 ]

## 6. How to remove the ornament plate [ Fig. 8 ]

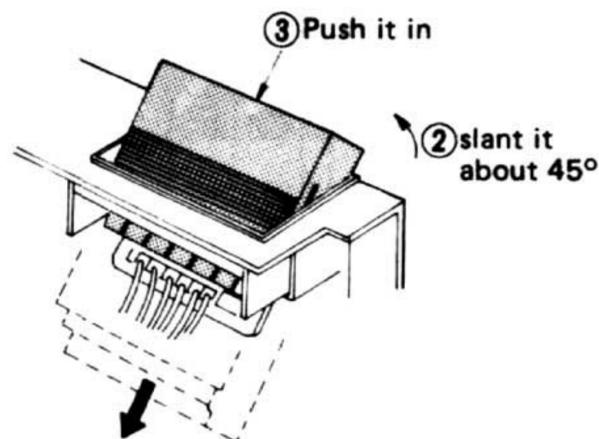

1. Remove the front panel.
2. Remove the ornament plate as shown in Fig. 8.

## 7. How to remove the direct connector [ Fig. 9, 10, 11 ]

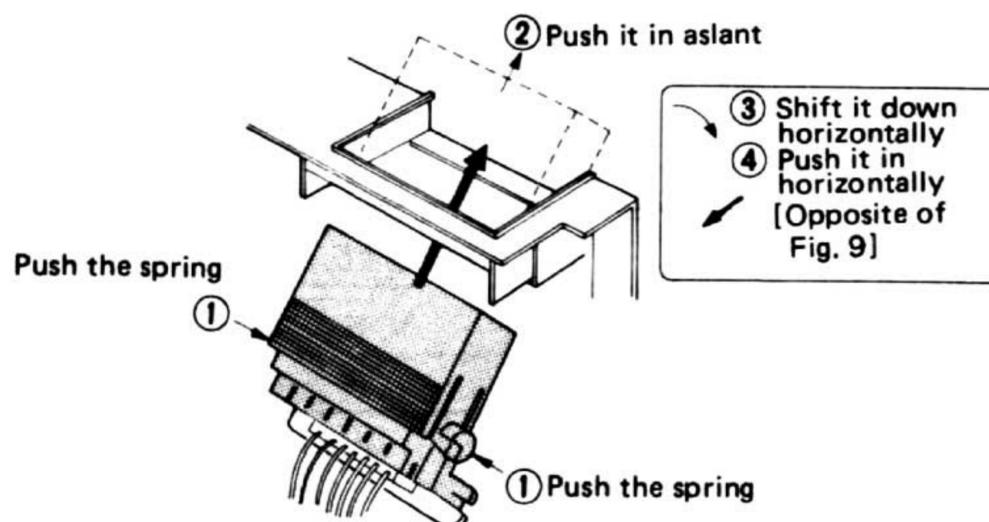

1. Remove the cabinet.
2. Remove the 4 setscrews (Fig. 4: 11, 12, 21, 22) of the rear panel.
3. Remove the direct connector as shown in Fig. 9 and 10.
4. When fitting the connector, follow the procedure shown in Fig. 11.

[ Fig. 9 ]

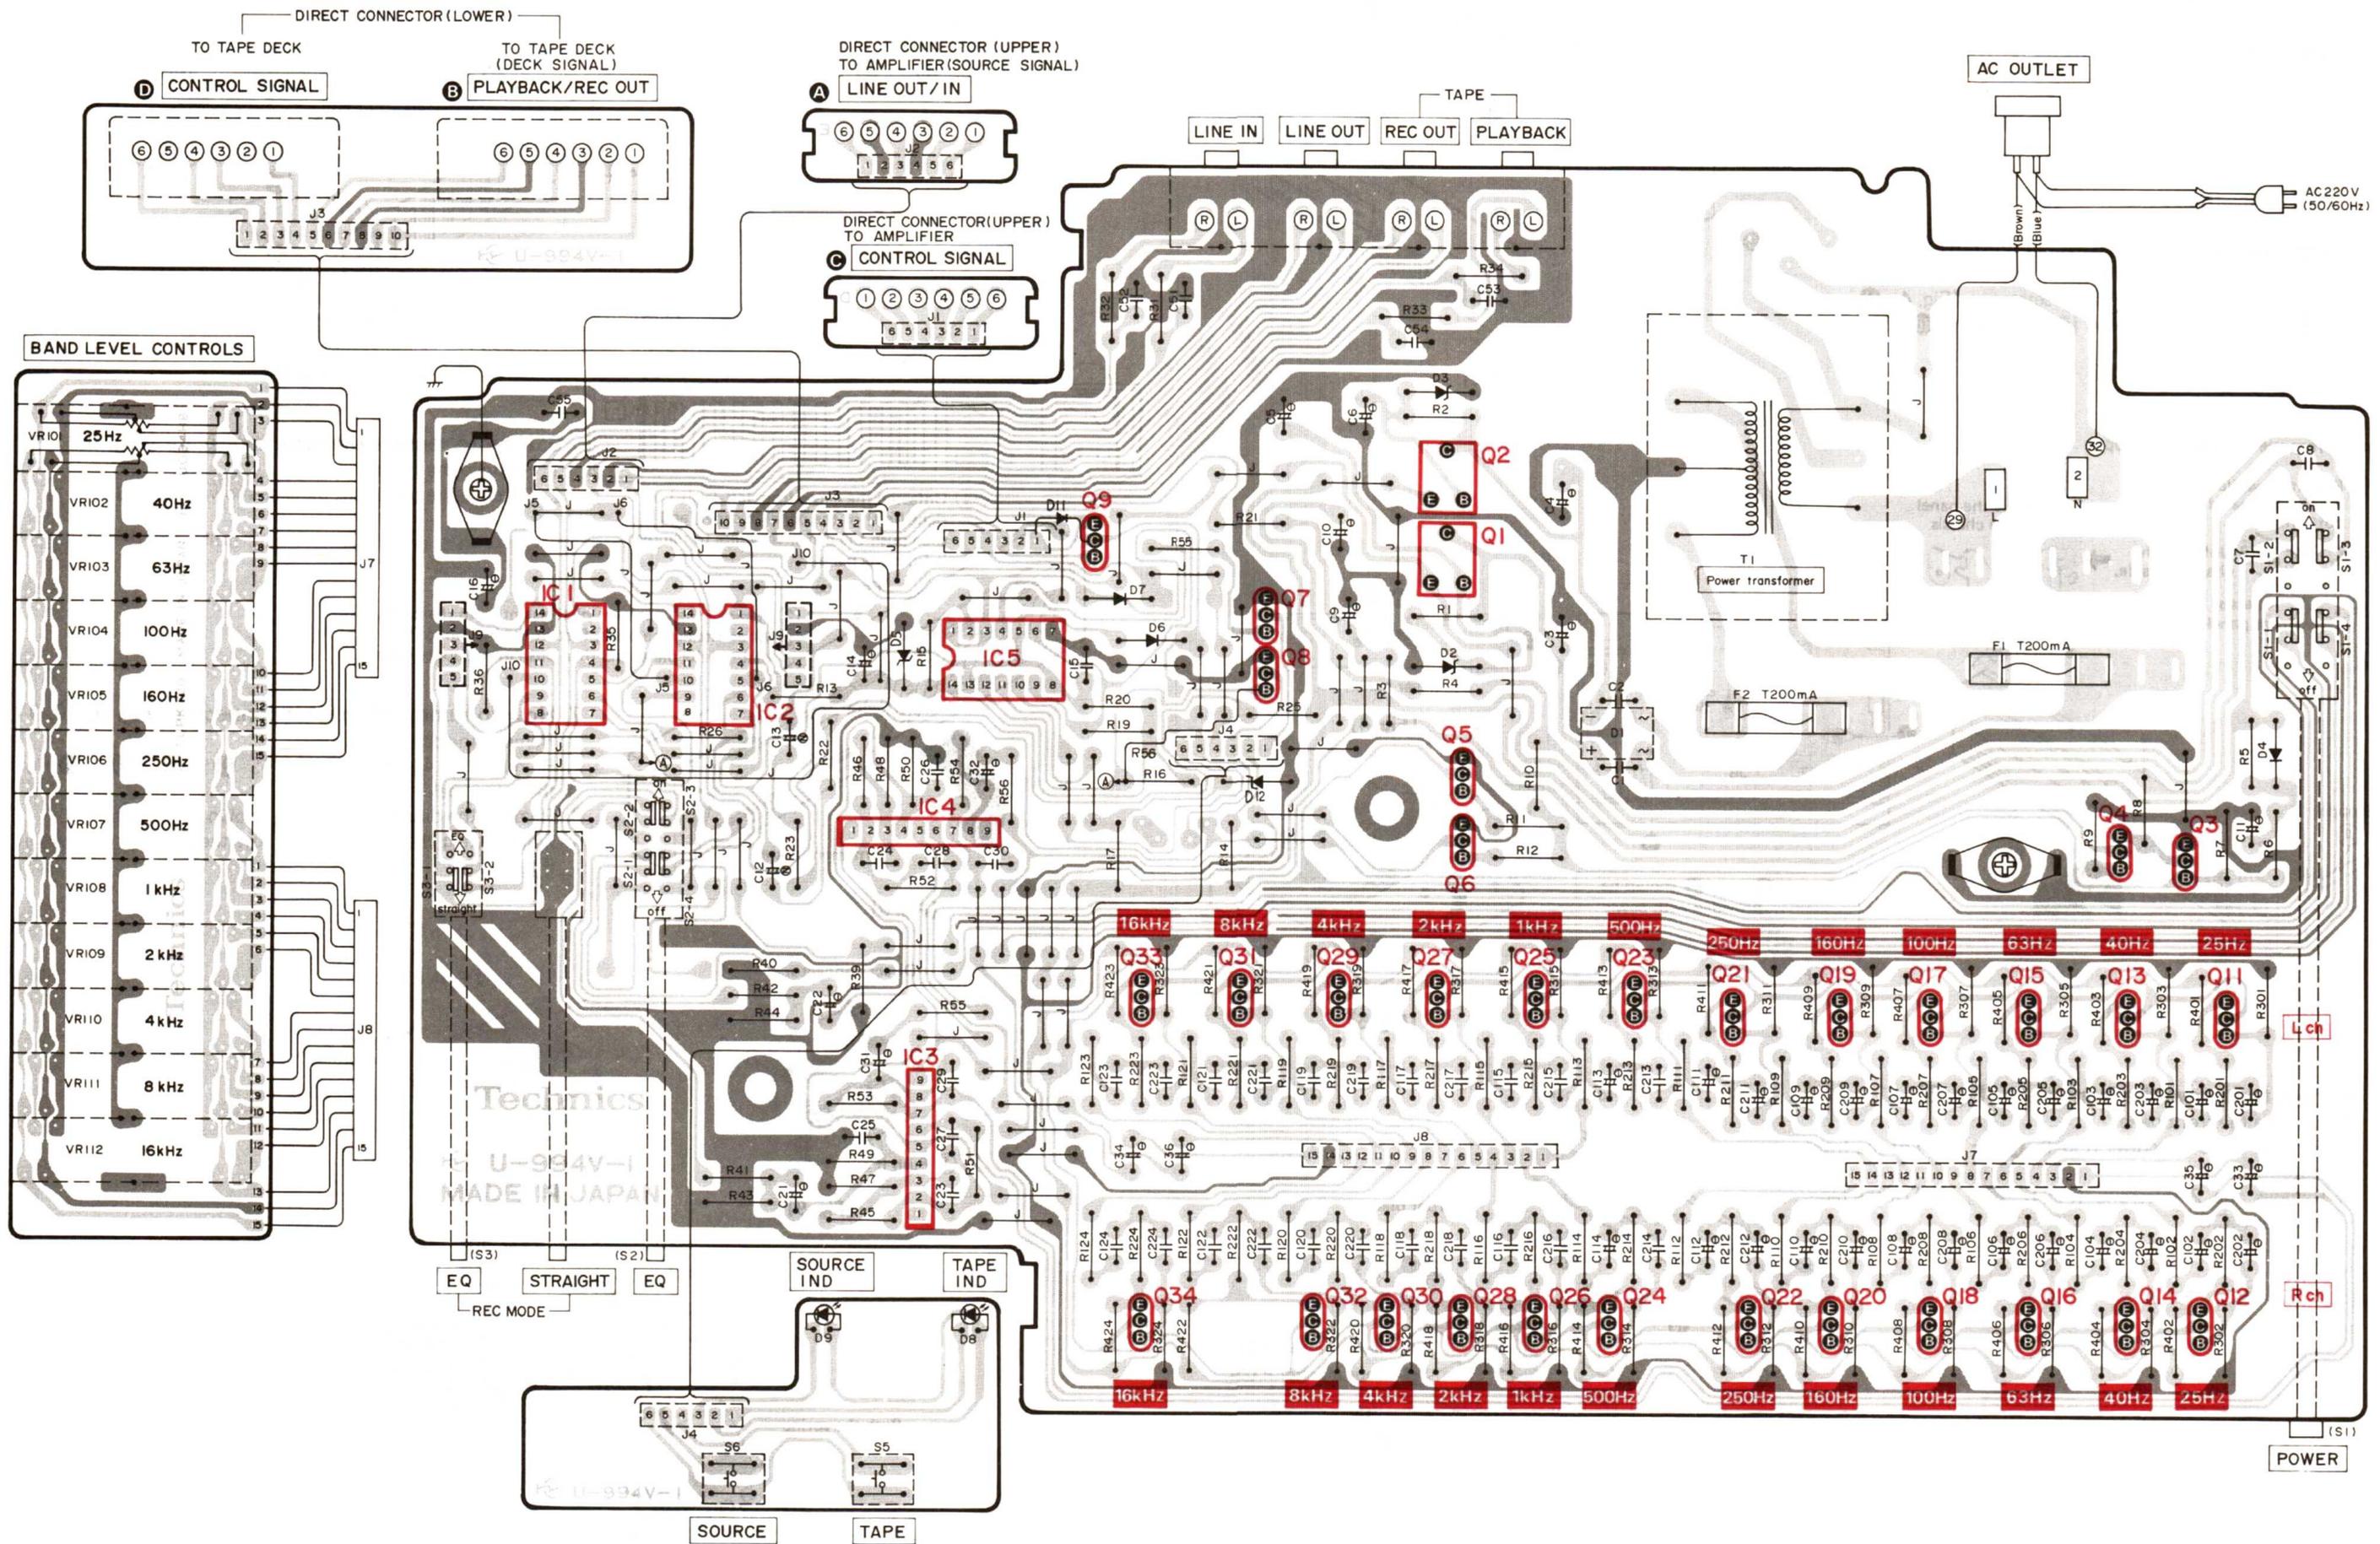

[ Fig. 10 ]

[ Fig. 11 ]

Tape monitor switch to "tape" position

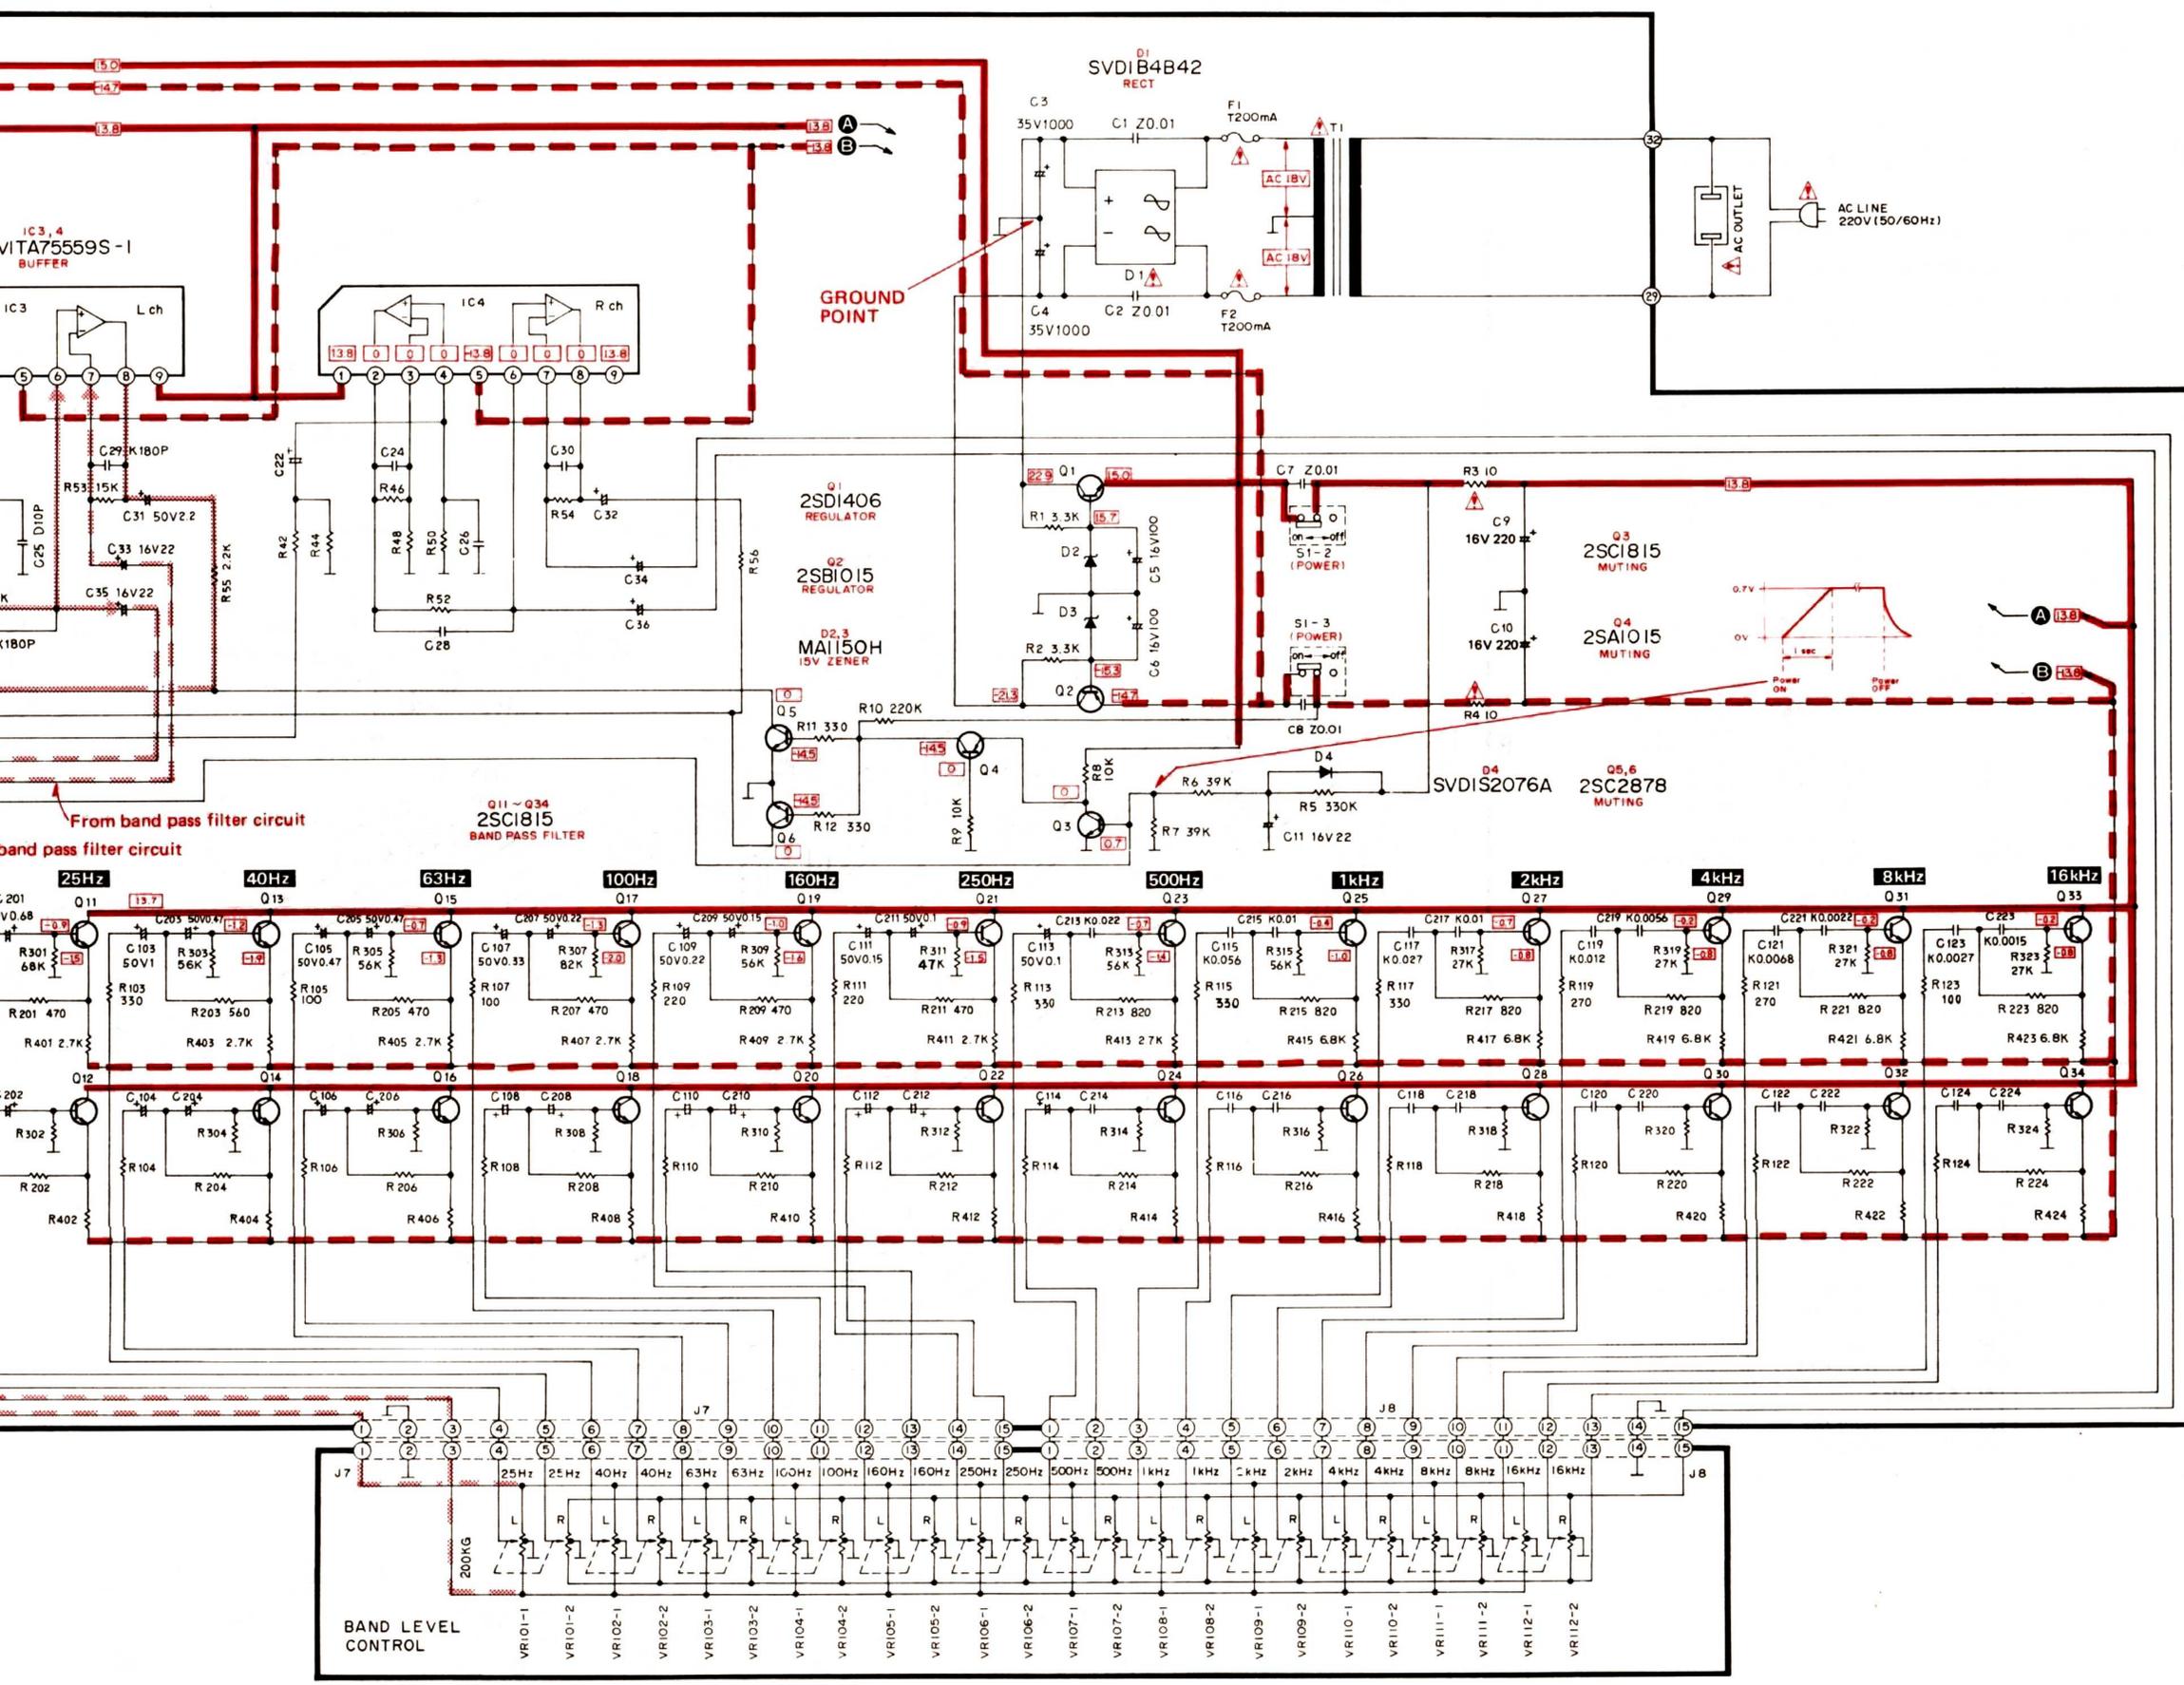

# SCHEMATIC DIAGRAM

(This schematic diagram may be modified at any time with the development of new technology.)

- \* The part No. of transistors, IC and diodes mentioned in the schematic diagram stand for production part No. Regarding the part No. with \* mark, the production part No. are different from the replacement part No. Therefore, when placing an order for replacement part, please use the part No. in the replacement part list.
- \* This is the basic circuit diagram (For continental Europe) of this unit.  
Note that part of the circuit is subject to change depending on the areas.
- \* Regarding the circuits to be changed in the basic circuit diagram (For continental Europe) and related areas [EW], [EK], [XL], [EGA], [PC] and [XA], refer to page 12.

- Note**
1. S1-1 ~ 1-4 : Power source switch in "on" position.  
on ↔ off
  2. S2-1 ~ 2-4 : EQ switch in "on" position.  
on ↔ off
  3. S3-1 ~ 3-2 : Rec mode switch in "straight" position.  
Straight ↔ EQ
  4. S5, 6 : Tape monitor switch in "source" position.  
(S5 Tape switch)  
(S6 Source switch)
  5. S7 [XA] : Power source selector switch in "220V-240V" position.  
110V-120V ↔ 220V-240V
  6.  Indicated voltage values are the standard values for the unit measured by the DC electronic circuit tester (high-impedance) with the chassis taken as standard. Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester.
  7. — Positive voltage lines. - - - Negative voltage lines  
- - - - - Signal lines of left channel  
- - - - - Signal lines of band pass filter (Lch)
  8. Important safety notice.  
Components identified by ▲ mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.

# REPLACEMENT PARTS LIST

- Notes:** 1. Part numbers are indicated on most mechanical parts. Please use this part number for parts order.  
 2. Important safety notice: Components identified by  $\Delta$  mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.  
 3.  $\text{\textcircled{K}}$  -marked parts are used for black type only, while  $\text{\textcircled{O}}$ -marked parts are for silver type only.  
 4. Part other than  $\text{\textcircled{K}}$  and  $\text{\textcircled{O}}$ -marked are used for both black and silver type.  
 5. Bracketed indications in Ref. No. columns specify the area. Parts without these indications can be used for all areas.  
 6. The  $\text{\textcircled{S}}$  mark is service standard parts and may differ from production parts.  
 7. The parenthesized numbers in the column of description stand for the quantity per set. Black type model No. : SH-E4(K)

# RESISTORS & CAPACITORS

- Notes:**
- Part numbers are indicated on most mechanical parts. Please use this part number for parts orders.
  - Important safety notice: Components identified by  $\Delta$  mark have special characteristics important for safety. When replacing any of these components use only manufacturer's specified parts.

- The "S" mark is service standard parts and may differ from production parts.
- Unless otherwise specified. All resistors are in OHMS ( $\Omega$ ) K = 1000 $\Omega$ , M = 1000k $\Omega$ . All capacitors are in MICROFARADS ( $\mu$ F) P =  $\mu$  $\mu$ F

Black type model No. : SH-E4(K)

## Numbering System of Resistor

Example

ERD	25	F	J	101
Type	Wattage (1/4W)	Shape	Tolerance	Value (100 $\Omega$ )
	50			
	Wattage (1/2W)			

## Numbering System of Capacitor

Example

ECKD	1H	102	Z	F
Type	Voltage	Value	Tolerance	Peculiarity
ECEA	50	M	R47	R
Type	Voltage	Peculiarity use	Value	Special use

Capacitor Type	Voltage		Tolerance
	ECEA Type	Others	
ECEA : Electrolytic	1C : 16V	D : 25V DC	J : $\pm$ 5%
ECCD : Ceramic	25 : 25V	1H : 50V DC	K : $\pm$ 10%
ECKD : Ceramic	1E : 25V		Z : +80%, -20%
ECFT : Semi Conductor	1H : 50V		
	50 : 50V

Stereo Graphic Equalizer

SH-E4/(K)

[D],[EK],[EW],[EB],[EF],  
[EGA],[EH],[XA],[XL],[Ei],[PC]

Supplement

## Areas

- \* [D] is available in Scandinavia.
- \* [EK] is available in United Kingdom.
- \* [EW] is available in Switzerland.
- \* [EB] is available in Belgium.
- \* [EF] is available in France.
- \* [EGA] is available in F.R. Germany.
- \* [EH] is available in Holland.
- \* [XA] is available in Southeast Asia, Oceania, Africa, Middle Near East and Central South America.
- \* [XL] is available in Australia.
- \* [Ei] is available in Italy.
- \* [PC] is available in European Audio Club.

- \* The colors of this model include silver and black.
- \* The black type model is indicated by (K) in the Service Manual.

Please use this manual together with the service manual for Model No. SH-E4/(K), Order No. HAD83122693C9.

## CHANGES

1. The positive (+B) voltage and negative (-B) voltage of schematic diagram was changing.
2. The change parts of parts list refer.

### • Parts change note

#### Notes:

1. Important safety notice:

Components identified by  $\Delta$  mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.

2. The "Ⓢ" mark is service standard parts and may differ from production parts.

Ref. No.	Colors	Change of Part No.		Part Name & Description	Pcs/Set	Remarks
		OLD	NEW			
<b>DIODES</b>

# SCHEMATIC DIAGRAM

(This schematic diagram may be modified at any time with the development of new technology.)

\* The part No. of transistors, IC and diodes mentioned in the schematic diagram stand for production part No. Regarding the part No. with  $\star$  mark, the production part No. are different from the replacement part No. Therefore, when placing an order for replacement part, please use the part No. in the replacement part list.

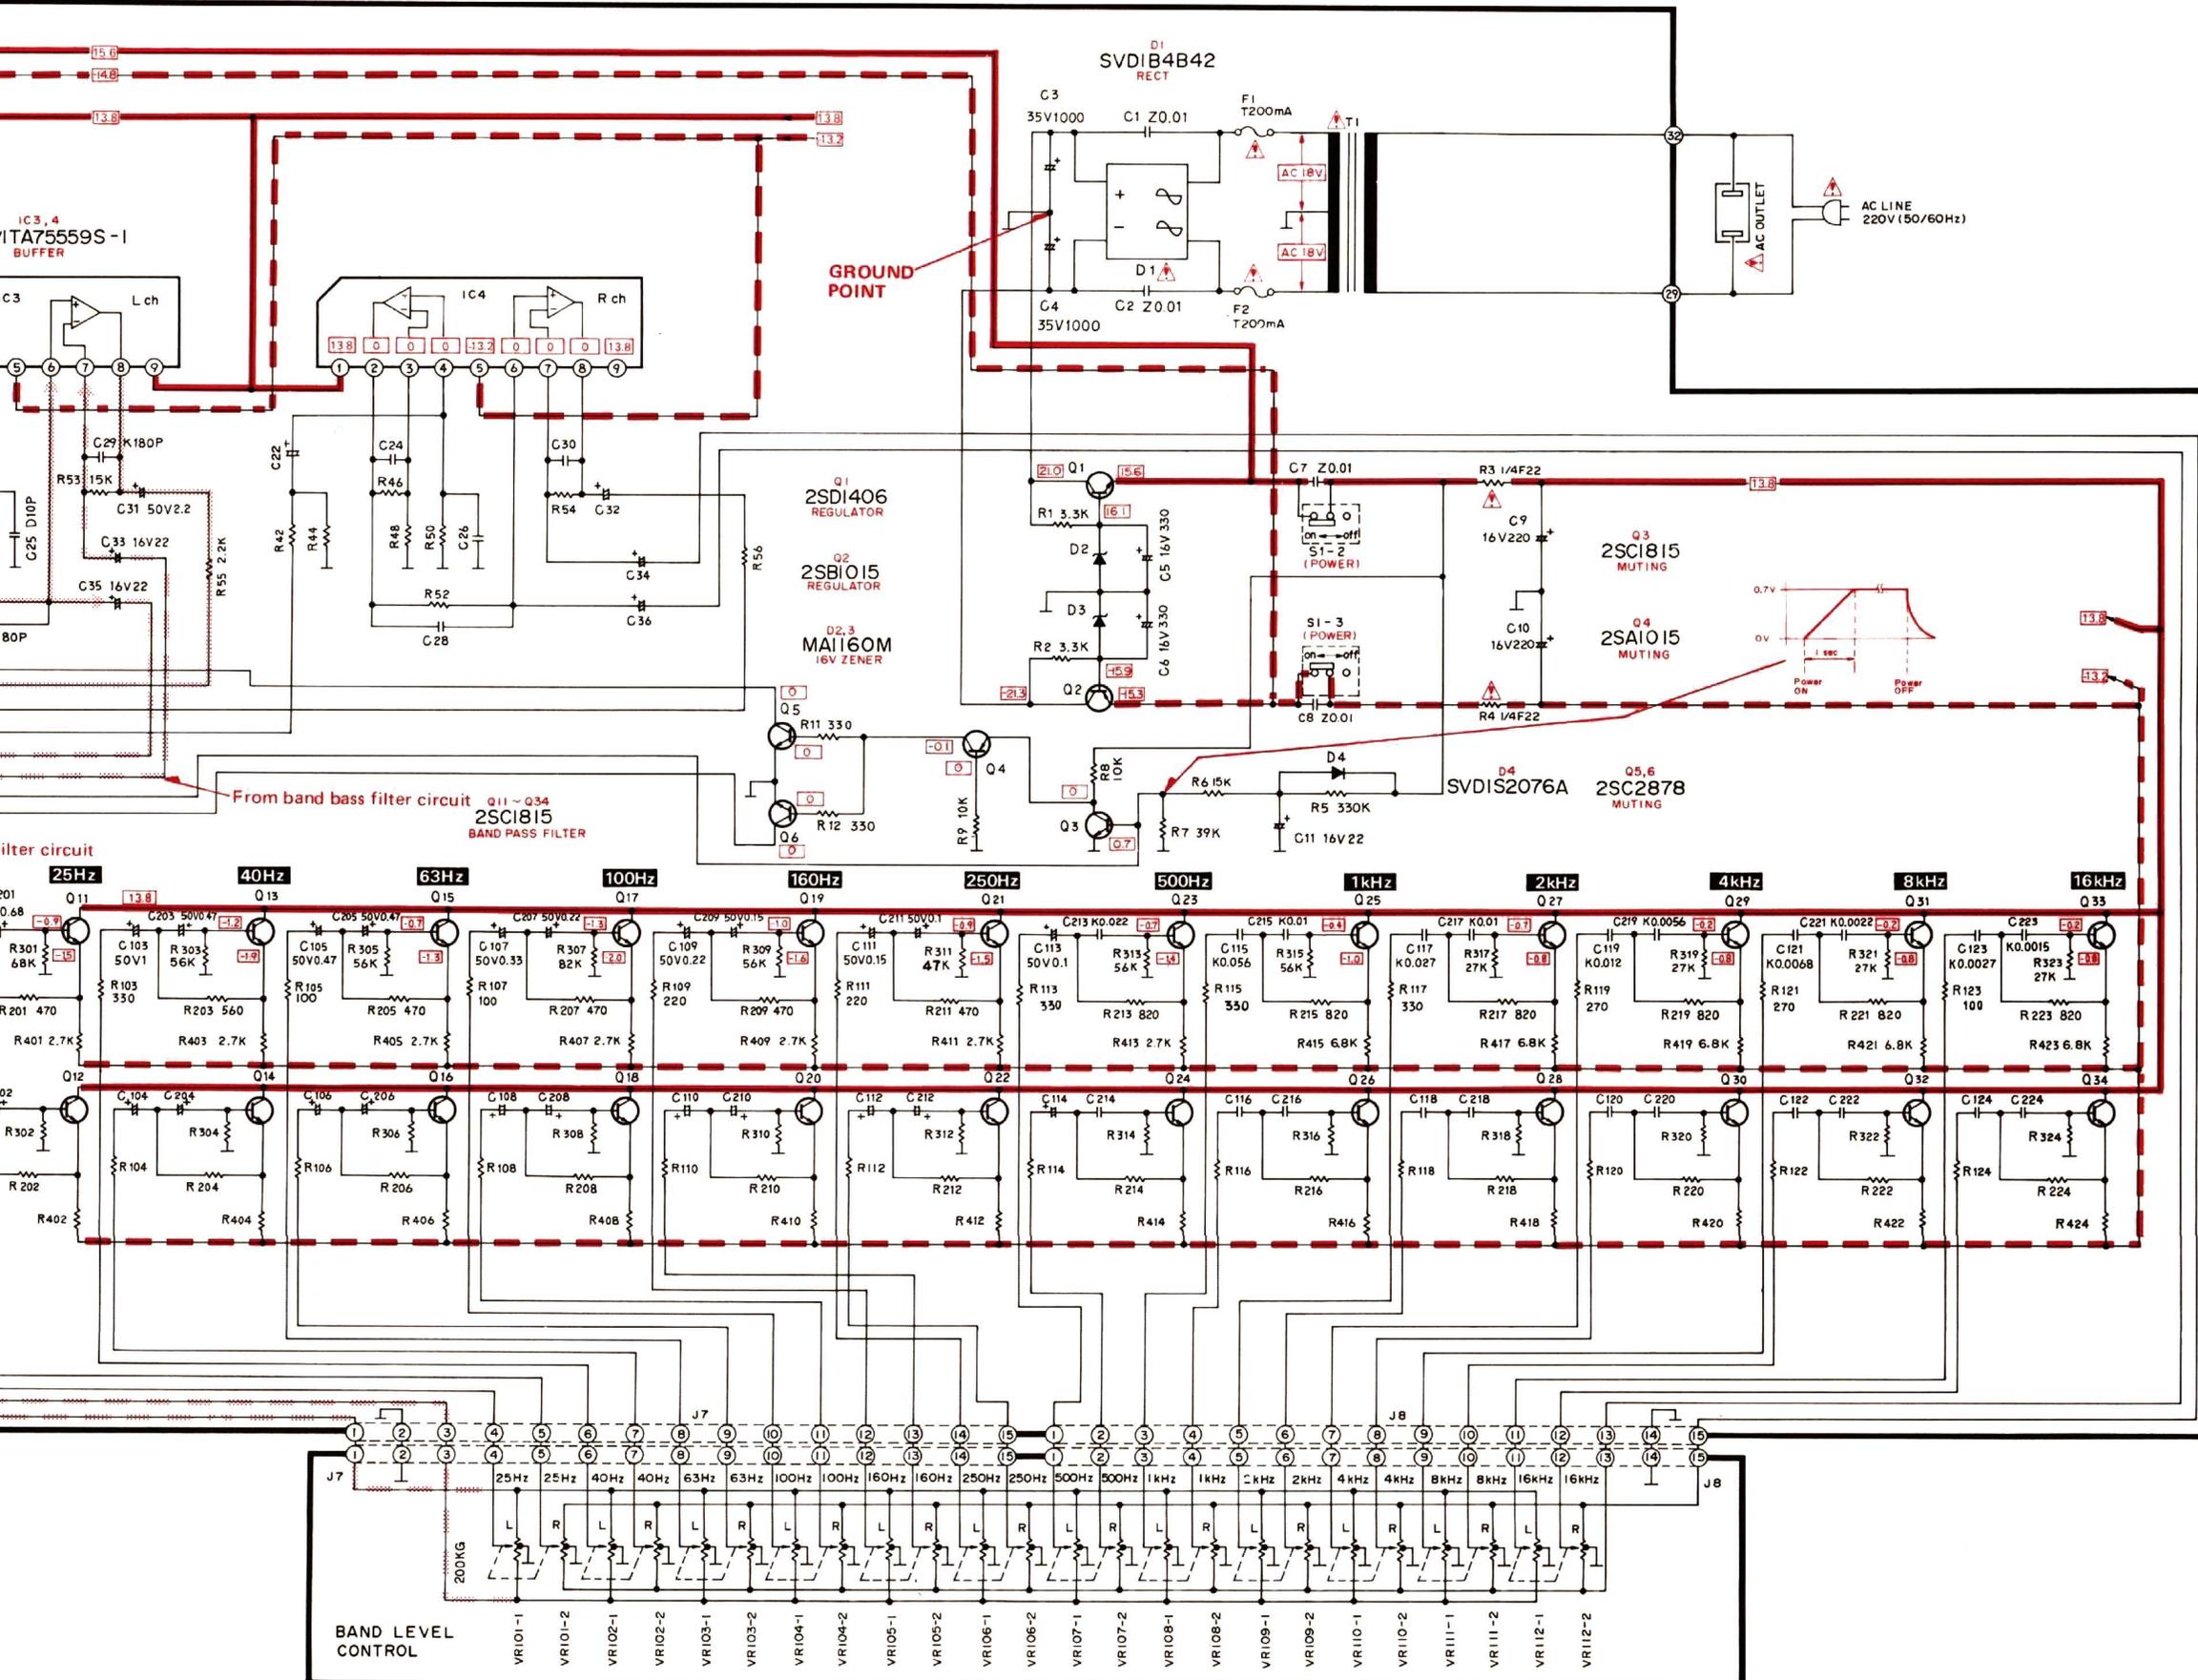

\* This is the basic circuit diagram (For continental Europe) of this unit.

Note that part of the circuit is subject to change depending on the areas.

\* Regarding the circuits to be changed in the basic circuit diagram (For continental Europe) and related areas [EW], [EK], [XL], [EGA], [PC] and [XA].

**Note**

- S1-1 ~ 1-4 : Power source switch in "on" position.  
on  $\leftrightarrow$  off
- S2-1 ~ 2-4 : EQ switch in "on" position.  
on  $\leftrightarrow$  off
- S3-1 ~ 3-2 : Rec mode switch in "straight" position.  
Straight  $\leftrightarrow$  EQ
- S5, 6 : Tape monitor switch in "source" position.  
(S5 Tape switch)  
(S6 Source switch)
- S7 [XA] : Power source selector switch in "220V-240V" position.  
110V-120V  $\leftrightarrow$  220V-240V
- Indicated voltage values are the standard values for the unit measured by the DC electronic circuit tester (high-impedance) with the ground point taken as standard. Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester.
- Positive voltage lines. Negative voltage lines.  
Signal lines of left channel.  
Signal lines of band pass filter (Lch)
- Important safety notice.  
Components identified by  $\Delta$  mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.

- This booklet includes the specifications of Model SH-E4/(K) (Order No. HAD83122693C9) written in German, French and Spanish.
- File this booklet together with the service manual of Model SH-E4/(K).
- Dieses Büchlein umfaßt die technischen Daten von Modell SH-E4/(K) (Bestell-Nr. HAD83122693C9) in den Sprachen Deutsch, Französisch und Spanisch.
- Bewahren Sie dieses Büchlein zusammen mit dem Service-Handbuch von Modell SH-E4/(K) auf.
- Cette brochure comprend les spécifications du Modèle SH-E4/(K) (N° d'ordre: HAD83122693C9) écrites en français, en allemand et en espagnol.
- Classer cette brochure en même temps qu'avec le manuel de service du Modèle SH-E4/(K).
- Este librito incluye las especificaciones de Modelo SH-E4/(K) (Pedido N°. HAD83122693C9) escritas en alemán, francés y español.
- Guardar este librito juntamente con el manual de servicio de Modelo SH-E4/(K).

## DEUTSCH

### ■ TECHNISCHE DATEN (Spezifikationen Können infolge von Verbesserungen ohne Ankündigung geändert werden.)

#### (DIN 45 500)

<b>Frequenzgang (mittelstellung)</b>	: 5 Hz~100 kHz, -3 dB
<b>Maximalausgangsspannung</b>	: 8 V (1 kHz, THD 0,01%)
<b>Nennausgangsspannung</b>	: 1 V
<b>Nennklirrfaktor</b>	: 0,005% (20 Hz~20 kHz) 0,003% (1 kHz)
<b>Eingangsspannung</b>	: 1 V
<b>Geräuschabstand</b>	: 95 dB (100 dB, IHF, A)
<b>Maximaleingangsspannung</b>	: 8 V (1 kHz)
<b>Eingansimpedanz</b>	: 47 kΩ
<b>Verstärkung</b>	: 0±1 dB
<b>Kanalsymmetrie</b>	
250 Hz~6300 Hz	: ±0,5 dB
<b>Kanaltrennung 1 kHz</b>	: 60 dB

<b>Frequenzgangregler</b>	: +12 dB~-12dB (12 Regler, stufenlos verstellbar)
<b>Mittelfrequenzen</b>	: 25 Hz, 40 Hz, 63 Hz, 100 Hz, 160 Hz, 250 Hz, 500 Hz, 1 kHz, 2 kHz, 4 kHz, 8 kHz, 16 kHz

#### ALLGEMEINE DATEN

<b>Stromversorgung</b>	: Wechselstrom, 220 V, 50 Hz/60 Hz. (Für Kontinentaleuropa) Wechselstrom, 110 V/120 V/220 V/ 240 V, 50 Hz/60 Hz. (Für andere Länder)
<b>Leistungsaufnahme</b>	: 9,5 W
<b>Abmessungen (H×B×T)</b>	: 50×315×240 mm (1-31/32"×12-13/32"×9-7/16")
<b>Gewicht</b>	: 2,0 kg (4,4 lb)

## ■ CARACTERISTIQUES (Sujet à changement sans préavis.)

### (DIN 45 500)

<b>Courbe de réponse (position centrale)</b>	: 5 Hz~100 kHz, -3 dB
<b>Tension de sortie maximale</b>	: 8 V (1 kHz, THD 0,01%)
<b>Tension de sortie nominale</b>	: 1 V
<b>Distortion harmonique totale</b>	: 0,005% (20 Hz~20 kHz) 0,003% (1 kHz)
<b>Sensibilité d'entrée Signal/Bruit</b>	: 1 V : 95 dB (100 dB, IHF' A)
<b>Tension d'entrée maximale</b>	: 8 V (1 kHz)
<b>Impédance d'entrée</b>	: 47 kΩ
<b>Gain</b>	: 0±1 dB
<b>Équilibrage de canal 250 Hz~6300 Hz</b>	: ±0,5 dB
<b>Séparation de canal 1 kHz</b>	: 60 dB

### Commandes de niveau de gamme

: +12 dB~-12 dB  
(12 éléments, continuellement variables)

**Fréquences charnières** : 25 Hz, 40 Hz, 63 Hz, 100 Hz, 160 Hz, 250 Hz, 500 Hz, 1 kHz, 2 kHz, 4 kHz, 8 kHz, 16 kHz

### GENERALITES

<b>Alimentation</b>	: CA. 220 V, 50 Hz/60 Hz. (Pour l'Europe continentale) CA. 110 V/120 V/220 V/240 V, 50 Hz/60 Hz. (Pour les autres pays)
<b>Consommation</b>	: 9,5 W
<b>Dimensions (h×l×pr) mm</b>	: 50×315×240 mm (1-31/32"×12-13/32"×9-7/16")
<b>Poids</b>	: 2,0 kg (4,4 lb)

# ESPAÑOL

## ■ ESPECIFICACIONES (Estas especificaciones están sujetas a cualquier cambio sin previo aviso.)

### (DIN 45 500)

<b>Respuesta de frecuencia (posición central)</b>	: 5 Hz~100 kHz, -3 dB
<b>Tensión de salida máxima</b>	: 8 V (1 kHz, THD 0,01%)
<b>Tensión de salida de régimen</b>	: 1 V
<b>Distorsión armónica total nominal</b>	: 0,005% (20 Hz~20 kHz) 0,003% (1 kHz)
<b>Sensibilidad de entrada Relación de señal ruido</b>	: 1 V : 95 dB (100 dB, IHF' A)
<b>Tensión de entrada máxima</b>	: 8 V (1 kHz)
<b>Impedancia de entrada</b>	: 47 kΩ
<b>Ganancia</b>	: 0±1 dB
<b>Equilibrio de canales 250 Hz~6300 Hz</b>	: ±0,5 dB
<b>Separación de canales 1 kHz</b>	: 60 dB

### Controles de nivel de banda

: +12 dB~-12 dB  
(12 elementos, continuamente variables)

**Frecuencia central** : 25 Hz, 40 Hz, 63 Hz, 100 Hz, 160 Hz, 250 Hz, 500 Hz, 1 kHz, 2 kHz, 4 kHz, 8 kHz, 16 kHz

### EN GENERAL

<b>Alimentación de corriente</b>	: C.A. de 220 V, 50 Hz/60 Hz. (Para Europa continental) C.A. de 110 V/120 V/220 V/240 V, 50 Hz/60 Hz. (Para los demás)
<b>Consumo de corriente</b>	: 9,5 W
<b>Dimensiones (alto×ancho×prof.)</b>	: 50×315×240 mm (1-31/32"×12-13/32"×9-7/16")
<b>Peso</b>	: 2,0 kg (4,4 lb)
