NEW MECHANISM SERIES (RAE0201)

SPECIFICATIONS

■ Audio

No. of channels	2 (left and right, stereo)
Frequency response	2-20,000 Hz, ± 0.3 dB
Output voltage	2 V (at 0 dB)
Dynamic range	98 dB
S/N ratio	114 dB
Harmonic distortion	0.002% (1 kHz, 0 dB)
Total harmonic distortion	0.0028% (1 kHz, 0 dB)
Channel separation	110 dB
Wow and flutter	Below measurable limit
DA converter	MASH • 1 bit
Output impedance	Approx. 1 k Ω
Load impedance	More than 10 k Ω
Headphone output level	15 mW max. 32 Ω (adjustable)

■ Pickup

Wavelength	780 nm
------------	--------

■ General

Power consumption	
For Continental Europe:	16 W
For others:	17 W
Power supply	
For (E, EB, EG, GN) areas:	AC 50/60 Hz, 230 V-240 V
For (GC) area:	AC 50/60 Hz, 110 V/127 V/220 V/240 V
Dimensions (W×H×D)	430×130×333 mm
Weight	5.6 kg

Note:

Specifications are subject to change without notice.
Weight and dimensions are approximate.

BEFORE TRANSPORTING THE UNIT

To safeguard against damage in transit, be sure to secure the optical pickup by following the procedure below.

- 1 Remove the compact disc inside, and set the power switch to STANDBY $\text{\textcircled{I}}$ with the disc holder still open.**
- 2 Slowly push in the disc holder by hand.**
 - Do not tilt the unit while doing this.
 - If the disc holder is not pushed in slowly, the optical pick-up may not be secured properly.
- 3 Check that the optical pick-up is secured.**
(Refer to the figure on the right.)

ACCESSORIES

<ul style="list-style-type: none"> •AC power supply cord 1 pc. (SFDAC05E03) (E, EG) (SJA193) (EB) (RJA0004) (GC) (SJA173) (GN) 	<ul style="list-style-type: none"> •Stereo connection cable 1 pc. (SJP2249-3) 	<ul style="list-style-type: none"> •Remote control transmitter 1 pc. (RAK-SL304W) 
	<ul style="list-style-type: none"> •Batteries 2 pcs. (UM-4NE/2S) 	<ul style="list-style-type: none"> •Power plug adaptor 1 pc. (SJP9215) (GC) 

■ PRECAUTION OF LASER DIODE

CAUTION: This product utilizes a laser diode with the unit turned "on", invisible laser radiation is emitted from the pick up lens.

Wave length: 780nm

Maximum output radiation power from pick up: 100 μ W/VDE

Laser radiation from the pick up lens is safety level, but be sure the followings:

1. Do not disassemble the optical pick up unit, since radiation from exposed laser diode is dangerous.
2. Do not adjust the variable resistor on the pickup unit. It was already adjusted.
3. Do not look at the focus lens using optical instruments.
4. Recommend not to look at pick up lens for a long time.

ACHTUNG: Dieses produkt enthält eine laserdioden. Im eingeschalteten zustand wird unsichtbare laserstrahlung von der lasereinheit abgestrahlt.

Wellenlänge: 780nm

Maximale strahlungsleistung der lasereinheit: 100 μ W/VDE

Die strahlung an der lasereinheit ist ungefährlich, wenn folgende punkte beachtet werden:

1. Die lasereinheit nicht zerlegen, da die strahlung an der freigelegten laserdioden gefährlich ist.
2. Den werksseitig justierten einstellregler der lasereinheit nicht verstellen.
3. Nicht mit optischen instrumenten in die fokussierlinse blicken.
4. Nicht über längere zeit in die fokussierlinse blicken.

ADVASEL: I dette a apparat anvendes laser.

• Use of caution labels

■ PLACEMENT

- This unit is a precision instrument. Be sure to place it on a flat surface.
- Avoid places such as the following:
 - Near any equipment or device that generates strong magnetism.
 - On any heat-generating equipment or device, or in any place where the temperature is high (35°C or higher).
 - Extremely cold places (5°C or below).
 - Near a tuner or TV (It may cause noise in the broadcast, or disturbance of the TV picture.)

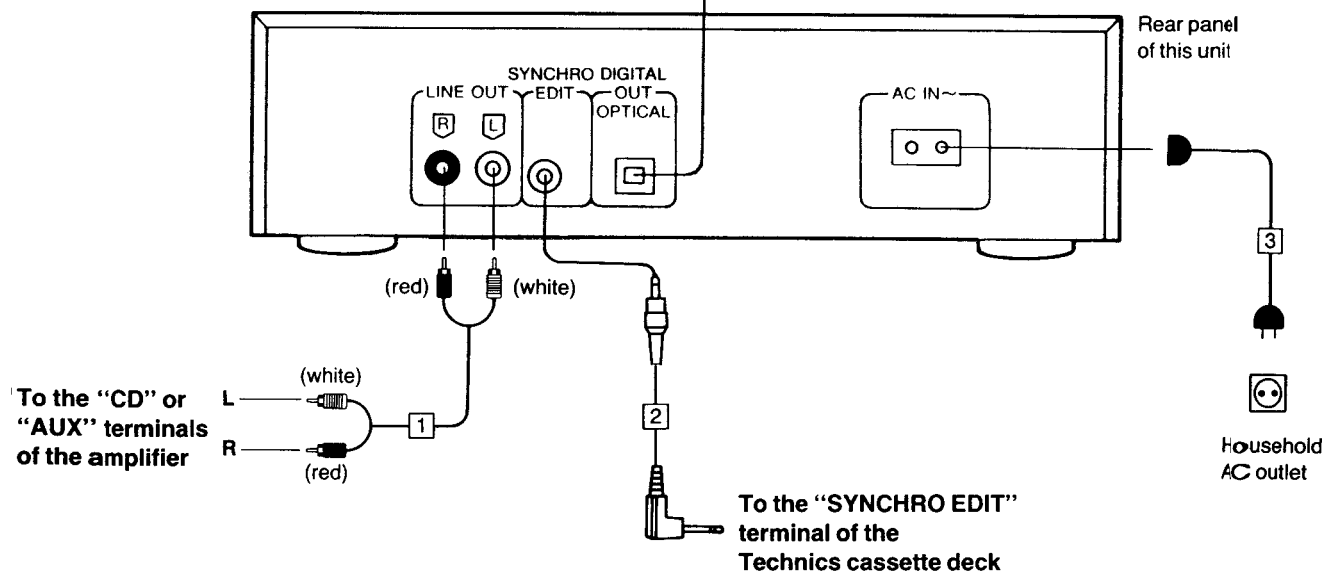

- When carrying or storing the unit, handle it with care so it is not subjected to any strong bumps.
 - Always remove the disc before storing the unit for any period of time.
- To avoid problems due to vibration.
 - Do not place a book or similar object under this unit.
 - Do not route the connection cables (of this or other units) across the operation panel, across the top, or under the unit.

■ CONNECTIONS

Turn power off on all components before making connections.

● Optical output terminal (DIGITAL OUT/OPTICAL)

This terminal can be used for connection with other equipment that has a digital input terminal, such as an amplifier, by using an optical cable (optional). A dust-protection cap is inserted in this terminal. Remove this cap only when a connection is to be made to this terminal.

1 Stereo connection cable (included)

Note:

Be sure to connect the stereo connection cable with the amplifier when using the synchro edit function even if the optical cable has been connected.

2 L-type cable (not included)

When this cable is connected to a Technics cassette deck with a synchro edit connector, the deck's synchro recording function will be activated during CD edit recording.

3 AC power supply cord (included)

Note:

The configuration of the AC outlet and AC power supply cord differs according to area.

For areas except continental Europe

If the power plug will not fit your socket, use the power plug adaptor (included).

LOCATION OF CONTROLS

The functions indicated by the white numbers (with black background, 4 etc.) can also be activated using the remote control transmitter.

Control section

- ① Power "STANDBY ON/OFF" switch (POWER, ■ STANDBY ON/OFF ON)**
This switch switches ON and OFF the secondary circuit power only. The unit is in the "standby" condition when this switch is set to the STANDBY ON/OFF position. Regardless of the switch setting, the primary circuit is always "live" as long as the power cord is connected to an electrical outlet.
- ② Remote control signal sensor (REMOTE SENSOR)**
- ③ Disc holder**
- ④ Disc holder open/close button (▲ OPEN/CLOSE)**
- ⑤ Display mode button (DISPLAY MODE)**
Pressing this button enables the unit to delete the indicators on the display in two steps.
- ⑥ Time mode select button (TIME MODE)**
- ⑦ Buttons for program function**

 - **Program button (PROGRAM)**
Pressing this button initiates the program play mode. You can then enter specific tracks using the numeric buttons.
 - **Clear button (CLEAR)**
Each pressing this button makes one track cleared from the programmed sequence.
 - **Recall button (RECALL)**
This button can be used to display the contents of the programmed track sequence for confirmation.
- ⑧**

 - **Numeric buttons (0~10)**
 - **Input mode button (>10)**
Press this button and then the numeric buttons (0~9) to specify the track number 11 and up.
- ⑨ Stop button (■ STOP)**
This button can be used to stop disc play, as well as to cancel the various play modes.
- ⑩ Pause button and indicator (|| PAUSE)**
- ⑪ Play button and indicator (▶ PLAY)**
- ⑫ Search buttons (◀◀ SEARCH ▶▶)**
These buttons are used for fast forward and backward searching during play. In the function manager mode, they are used to indicate the desired function on the display.
- ⑬ Direct button (DIRECT, F5)**
In the function manager mode, this is used to operate the functions which have not been set in the [F1] to [F4] buttons.
- ⑭ Function buttons (F1~F4)**
In the function manager mode, desired functions can be selected and stored in these buttons.
- ⑮ Function manager button (FUNCTION MANAGER)**
- ⑯ Headphones volume control (LEVEL)**

Avoid listening to music at high volume levels for extended periods of time.
- ⑰ Headphones jack (PHONES)**

Unnumbered buttons on the remote control transmitter function identically to their corresponding parts on the unit.

Indicators section

- ⑱ **Function manager indicator (F.MGR.)**
This lights in the function manager mode.
- ⑲ **Program indicator (PROGRAM)**
- ⑳ **Track number display (TRACK)**
- ㉑ **Index/program number display (No., INDEX)**
- ㉒ **Time display (MIN, SEC)**
- ㉓ **Level indicator (LEVEL)**
This indicator lights when the output level is attenuated by the remote control transmitter.
- ㉔ **Link indicator (LINK)**
- ㉕ **Character display**
- ㉖ **Compact disc edit indicator (EDIT)**
- ㉗ **A-B repeat indicator (A-B)**
- ㉘ **Repeat play indicator ()**
- ㉙ **Auto cue indicator (A. CUE)**
- ㉚ **Time fade indicator (T.FADE)**
- ㉛ **Auto space indicator (A.SPACE)**
This lights when an unrecorded blank lasting about 4 seconds is inserted between tracks during CD edit recording.
- ㉜ **Standby indicator (STANDBY)**
This indicator lights when the display mode button is pressed twice in the stop mode.
- ㉝ **"Over" mark (>)**
This indicator lights if the total number of tracks on the disc is 21 or more.
- ㉞ **Track number indicator (1-20)**
- ㉟ **Tape side indicator (SIDE A, SIDE B)**
- ㊱ **Random play indicator (RANDOM)**

Remote control transmitter

- ㉟ **Level buttons (▼ LEVEL ▲)**
These buttons can be used to control output level (from 0 dB to -12 dB).
- ㊱ **Repeat button (REPEAT)**
Pressing this button enables all the tracks or programmed tracks to be played repeatedly.
- ㊲ **A-B repeat button (A-B REPEAT)**
Pressing this button enables the programs in the selected range to be played repeatedly.
- ㊳ **Remote control signal transmission window**
- ㊴ **Random button (RANDOM)**
This button can be used to play the tracks on a disc in a random sequence.
- ㊵ **Auto cue button (AUTO CUE)**
Pressing this button enables the unit to stop at the beginning of every track and switch to the play standby mode.
- ㊶ **Skip buttons (◀◀ SKIP ▶▶)**
These buttons are used to skip by track in the forward or reverse direction.

■ HANDLING PRECAUTIONS FOR OPTICAL PICKUP

The laser diode in the optical pickup may break down due to potential difference caused by static electricity of clothes or human body.

So, be careful of electrostatic breakdown during repair of the optical pickup.

• Handling of optical pickup

1. Do not subject the optical pickup to static electricity as it is extremely sensitive to electrical shock.
2. To prevent the breakdown of the laser diode, an antistatic shorting pin is inserted into the flexible board (FPC board).
When removing or connecting the short pin, finish the job in as short time as possible.
3. Take care not to apply excessive stress to the flexible board (FPC board).
4. Do not turn the variable resistor (laser power adjustment). It has already been adjusted.

• Grounding for electrostatic breakdown prevention

1. Human body grounding
Use the anti-static wrist strap to discharge the static electricity from your body.
2. Work table grounding
Put a conductive material (sheet) or steel sheet on the area where the optical pickup is placed, and ground the sheet.

Caution:

The static electricity of your clothes will not be grounded through the wrist strap. So, take care not to let your clothes touch the optical pickup.

■ INSTRUCTIONS FOR TRAVERSE OIL (Part No. SZZOL31)

The container contains 6g (approx. 3ml) of oil.

One application (one shaft) uses 0.05ml of oil.

How to Use

- (1) Remove the guide shaft in the traverse deck from the optical pickup and clean off any dust from the guide shaft.
- (2) Apply one drop of the SZZOL31 to the tip of the guide shaft.
- (3) Hold the guide shaft so that its oiled end touches the optical pickup and insert it into the bearing while rotating it slowly.
- (4) After securing the guide shaft, move the optical pickup by hand several times to the left and right to distribute the oil on the guide shaft.

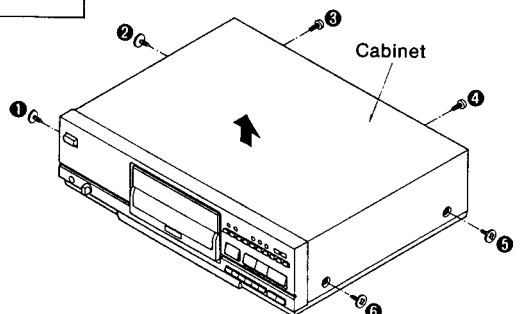

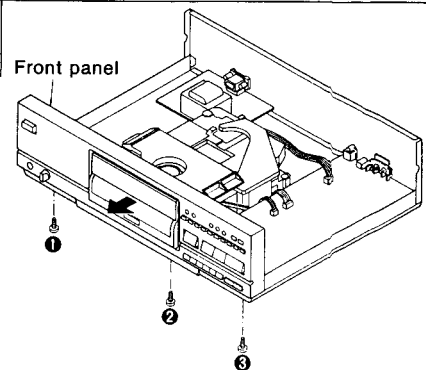

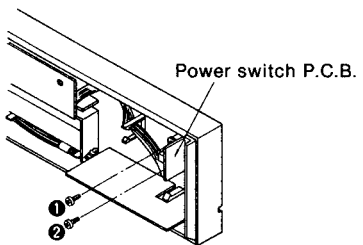

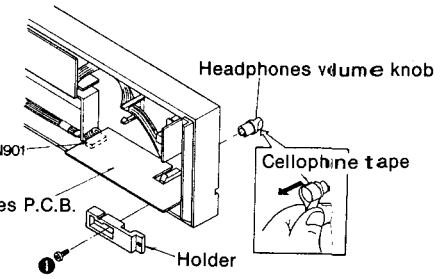

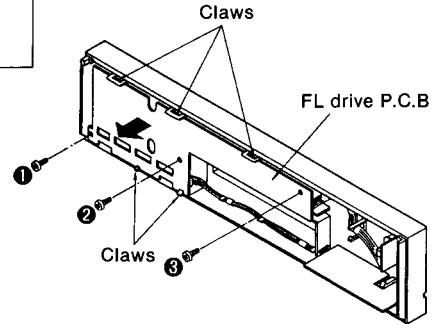

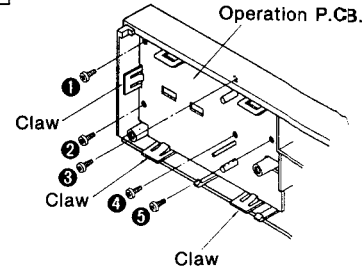

DISASSEMBLY INSTRUCTIONS

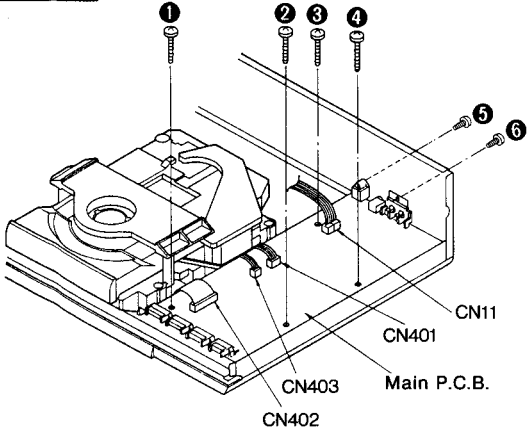

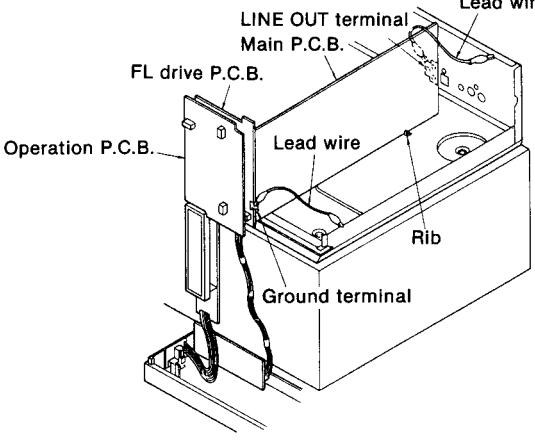

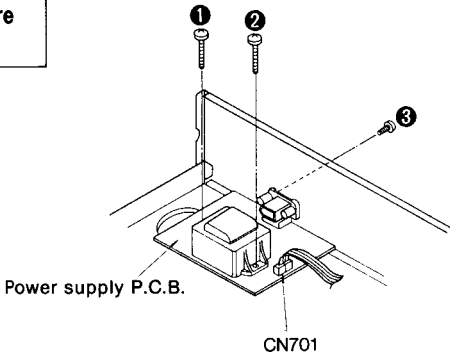

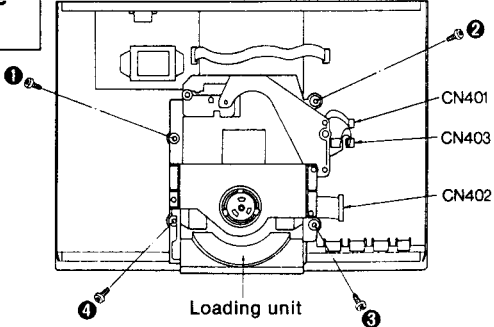

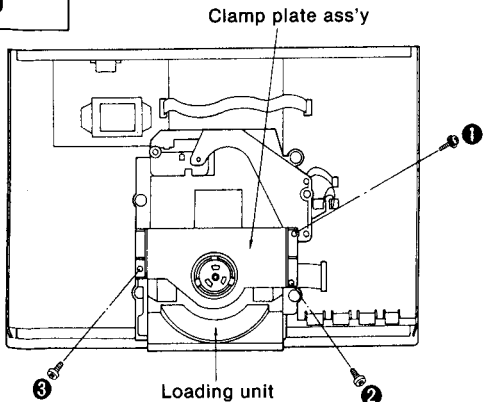

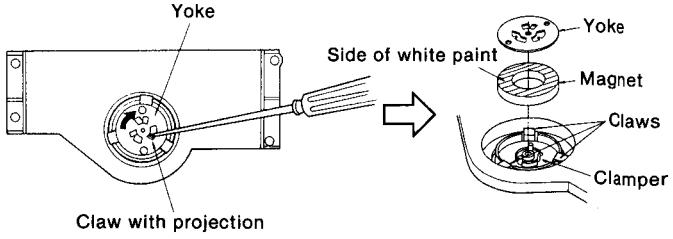

Warning: This product uses a laser diode. Refer to caution statements on page 3.

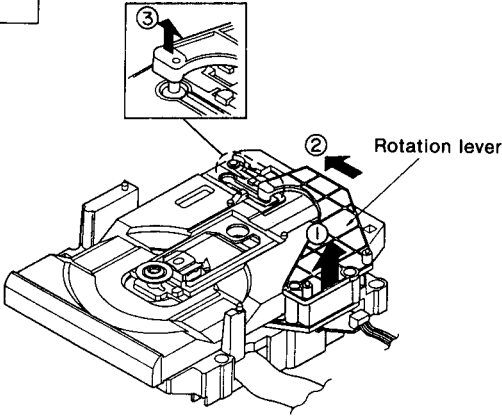

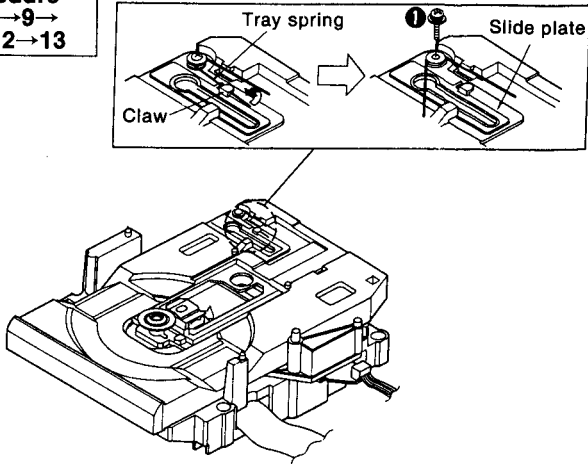

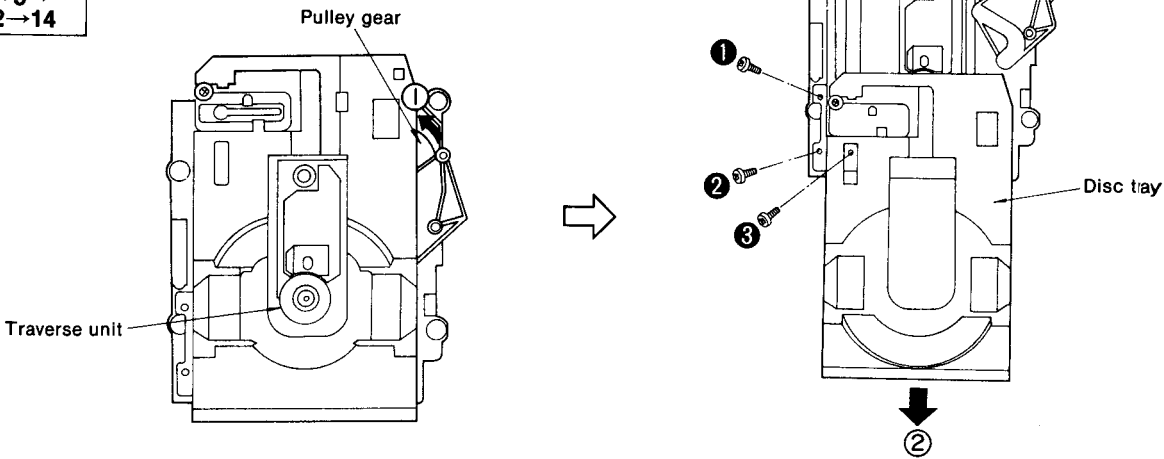

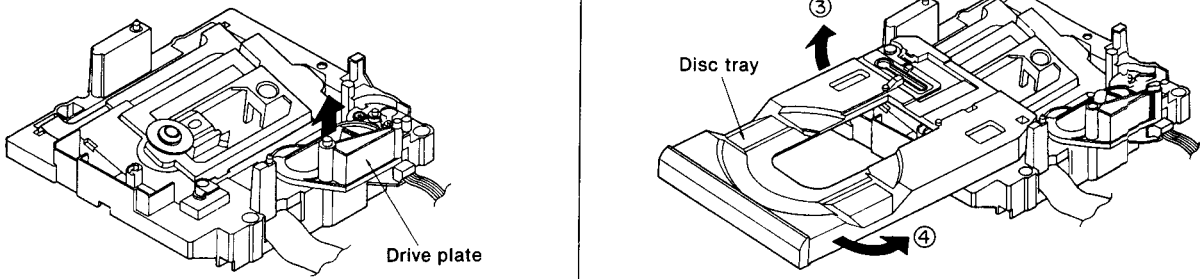

ACHTUNG:

- Die Lasereinheit nicht zerlegen.
- Die Lasereinheit darf nur gegen eine vom Hersteller spezifizierte Einheit ausgetauscht werden.

* This CD player is equipped with FPC board so handle them with care during disassembly and reassembly.

How to check the servo P.C.B.

Procedure
1→9→10→11→
12→14→15→22

1. Turn the pulley gear fully in the direction of arrow until traverse unit comes up.
2. Place the test disc and fix it by using the magnet & clamber.

5. Power switch to ON.
6. While pushing the open/close det. switch (S751) in the direction of arrow, push the play switch.
7. When checking the soldered surface of servo P.C.B. and replacing the parts, do as shown.

3. Connect the 3 flat cables (CN401, CN402, CN403).
4. Fix the loading unit by tape.

MEASUREMENTS AND ADJUSTMENTS

Warning: This product uses a laser diode. Refer to caution statements on page 3.

Caution: During adjustment, never connect CH-2 probe's GND to any place for it may short Vref line. (Connect CH-1 probe's GND to specified TP. described in each section.)

PREPARATION

1. Remove the cabinet and front panel (See Ref. No. 1, 2 of the disassembly instructions).
2. Remove the clamp plate ass'y, magnet and clamber (see Ref. No. 10, 11 of the same).
3. Remove the rotation lever, disc tray and drive plate (see Ref. No. 12, 14, 15 of the same).
4. Attach the front panel to the unit.
5. Turn the pulley gear fully in the direction of arrow until traverse unit comes up.
6. Place the test disc and fix it by using the magnet & clamber.
7. Power switch to ON.
8. While pushing the open/close det. switch (S751) in the direction of arrow, push the play switch.

• Adjustment procedure

Measuring Instruments and Special Tools

- * Test discs
 1. Playability test disc (SZZP1054C)
 2. Uneven test disc (SZZP1056C)
- * Normal disc (Ordinary musical program disc)
- * Filter (Refer to Fig. 1)
- * Dual-beam oscilloscope with bandwidth of 30MHz or better (with EXT. trigger and 1: 1 probe).
- * Allen wrench (M2.0) (SZZP1101C)
- * Allen wrench (M1.27)
- * Lock paint (RZZ0L01)
- * 0.9mm clearance gauge (RZZ0297)

Adjusting Procedure

* If you have replaced the optical pickup, spindle motor, or turntable, do the following adjustment:

(1) TURNTABLE HEIGHT ADJUSTMENT

1. Insert the 0.9mm clearance gauge (RZZ0297) between the turntable and the loading base (see the figure at right).
2. Tighten the turntable retention screw with the 1.27 mm allen wrench.
3. Connect the oscilloscope's CH. 1 probe across TP1 (+) and TP2 (-) terminal via a filter.

Note: For the connection of oscilloscope's CH. 1 probe to servo P.C.B. on foil side. (Refer to Fig. 1)

Oscilloscope setting: VOLT500mV
 SWEEP5ms.
 Input coupling.....DC

4. Adjust oscilloscope's DC zero balance.
5. Switch the play power ON, and play the test disc (SZZP1054C).
6. Measure the voltage amplitude of the signal on the oscilloscope.

7. Adjust the height until the voltage is $0 \pm 1.0V$.
 If the voltage exceeds $+1.0V$, lower turntable.
 If the voltage is below $-1.0V$, elevate the turn table.
- Note:** Measure the voltage as 0V as possible.

(2) MECHANICAL ADJUSTMENT

1. Connect the oscilloscope's CH. 1 probe across TJ101 (RF) and TJ102 (GND) on the servo P.C.B.

Oscilloscope setting: VOLT200mV
 SWEEP0.5μs.
 Input coupling.....AC

2. Switch the player power ON, and play track 7 on the test disc (SZZP1056C).
 (Playing any other track is selected, the HEX screws can not be accessed.)
3. Leave the player in play mode, and place the player as shown Fig. 2 on page 15.
4. Alternately adjust the two mechanical adjusting screws with the 2.0mm allen wrench (SZZP1101C) until the vertical fluctuation of RF signal is minimized and the eye pattern is most stretched.
5. After completing the adjustment, lock the mechanical adjusting screws with lock paint (RZZ0L01).

* Most stretched eye pattern.

(3) BEST EYE (PD BALANCE) ADJUSTMENT

1. Connect the oscilloscope's CH. 1 probe across **TJ101** (RF) and **TJ102** (GND) on the servo P.C.B.
Oscilloscope setting: VOLT200mV
 SWEEP0.5μs.
 Input coupling.....AC
2. Switch the player power ON, and play the 1kHz (track 1) on the test disc (SZZP1054C).
3. Adjust **VR101** until the vertical fluctuation of RF signal is minimized and the eye pattern is most stretched. (Refer to Fig. 3)

* Most stretched eye pattern.

(4) CHECK OF PLAY OPERATION AFTER ADJUSTMENT

* **Checking Skip Search**

1. Play an ordinary musical program disc.
2. Press the skip button to check for normal skip search operation (in both the forward and reverse directions).

* **Checking Manual Search**

1. Play an ordinary musical program disc.
2. Press the manual search button to check for smooth manual search operations at either low or high speed (in both the forward and reverse directions).

* **Checking Playability**

1. Play the 0.7mm black dot and the 0.7mm wedge on the playability test disc (SZZP1054C) and verify that no sound skip or noise occurs.
2. Play the middle tracks of the uneven test disc (SZZP1056C) and verify that no sound skip or noise occurs.

• **Adjustment points**

Note: Please refer to printed circuit boards for test point location.

• **SERVO P.C.B.**

Fig. 3

■ DIGITAL SERVO SYSTEM

The newly-developed digital servo system is adopted in the servo circuit of the unit's CD player instead of the ordinary analog servo system.

- The diagrams shown below represent differences between the analog servo and digital servo systems. The HEAD AMP. output signals (i.e., focus error and tracking error output signals) are analog. These analog signals are converted to the 8-bit digital signals through the MN6650. The MN6650 performs the following adjustments automatically; focus offset, tracking offset, focus gain, tracking gain, and tracking balance adjustments. The outputs from the MN6650 such as the focus coil driving signal, tracking coil driving signal, and traverse motor driving signal are converted to analog signals again and sent to the coils and motor to perform proper servo control for a disc.

2. The servo process adjustments which (1) Focus offset, (2) tracking offset, (3) focus gain, (4) tracking gain, (5) tracking balance adjustments. You can obtain a better servo performance. [You must perform]

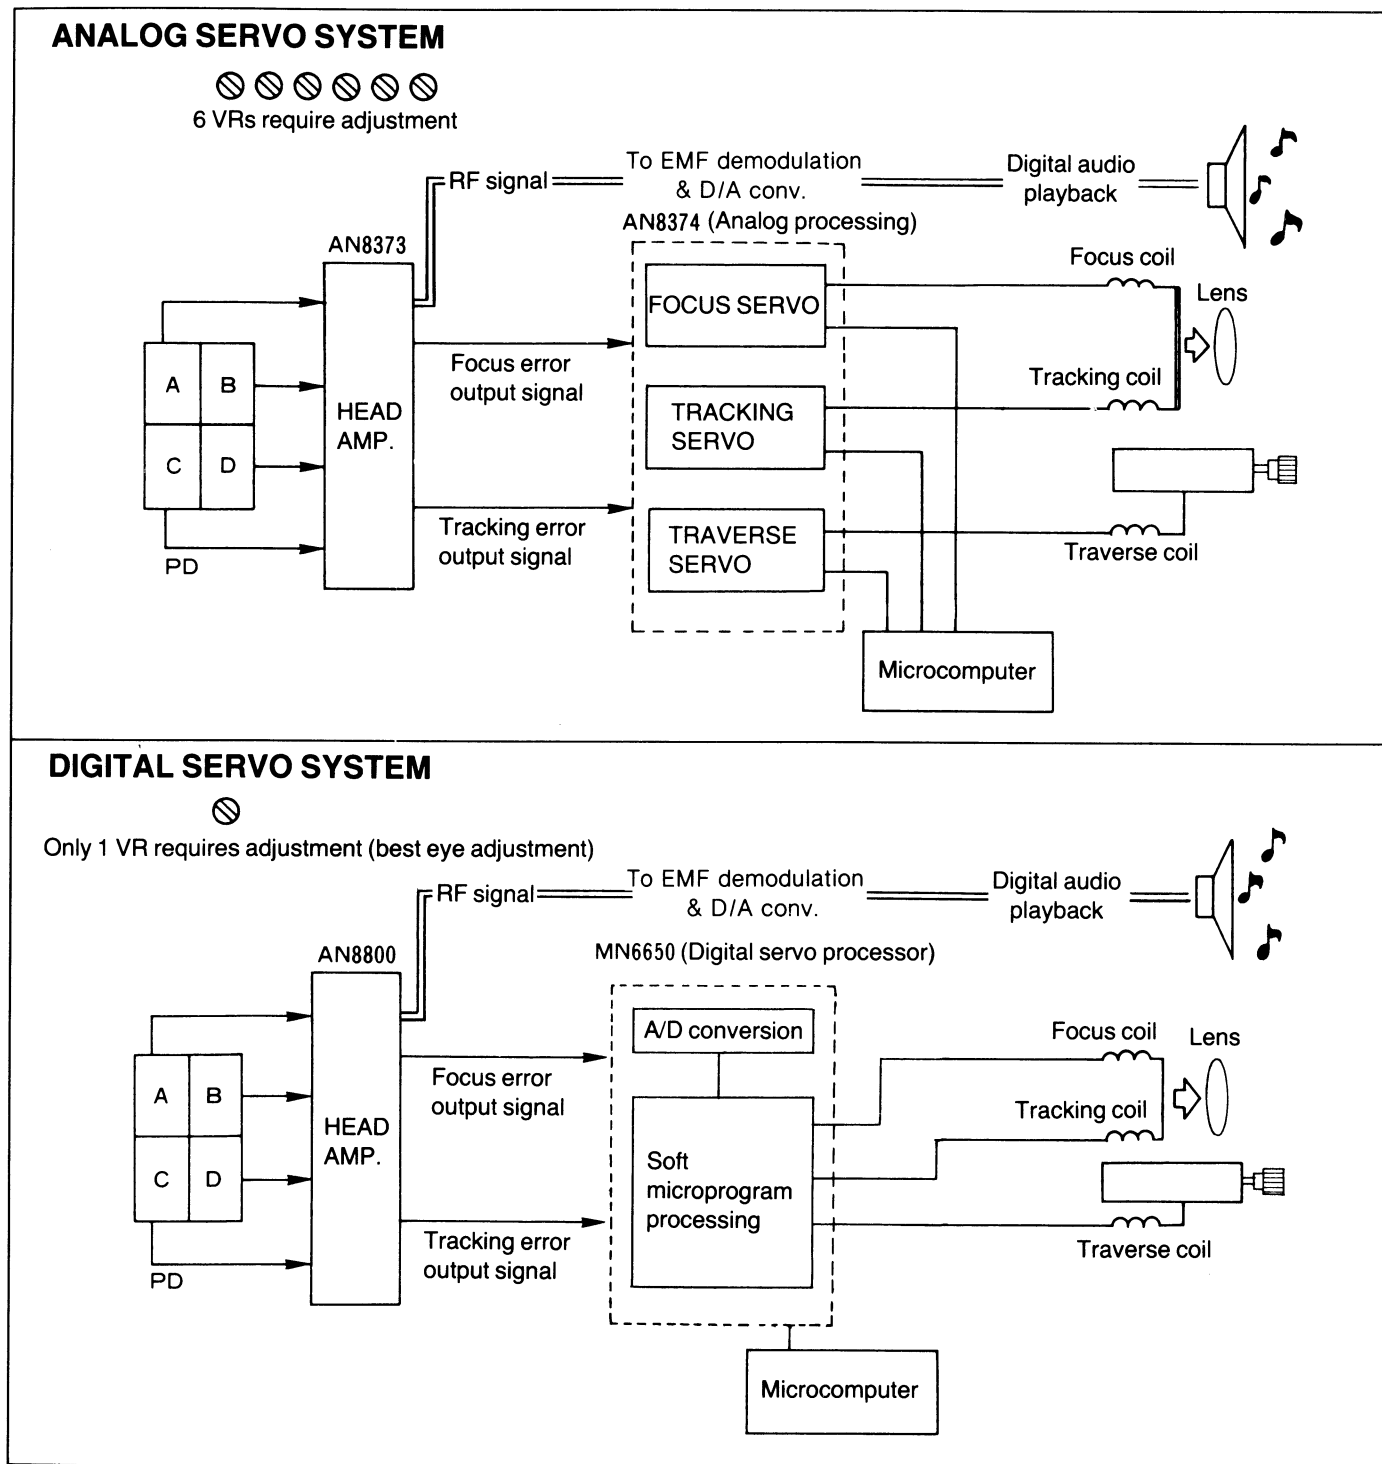

The following flow chart

• Flow chart

DIGITAL SERVO SYSTEM

The newly-developed digital servo system is adopted in the servo circuit of the unit's CD player instead of the ordinary analog servo system.

- The diagrams shown below represent differences between the analog servo and digital servo systems. The HEAD AMP. output signals (i.e., focus error and tracking error output signals) are analog. These analog signals are converted to the 8-bit digital signals through the MN6650. The MN6650 performs the following adjustments automatically; focus offset, tracking offset, focus gain, tracking gain, and tracking balance adjustments. The outputs from the MN6650 such as the focus coil driving signal, tracking coil driving signal, and traverse motor driving signal are converted to analog signals again and sent to the coils and motor to perform proper servo control for a disc.

- The servo processor IC MN6650 of the newly-developed digital servo circuit automatically performs the following adjustments which were originally adjusted in the conventional analog servo circuit: (1) Focus offset, (2) Tracking offset, (3) Focus gain, (4) Tracking gain, and (5) Tracking balance. Therefore, you do not have to perform the above-mentioned electrical adjustments manually. Only the best eye (PD balance) needs to be adjusted. You can obtain an optimum servo control for a disc to be played. [You must perform the best eye (PD balance) adjustment manually.]

The following flow chart shows the sequence of automatic adjustments.

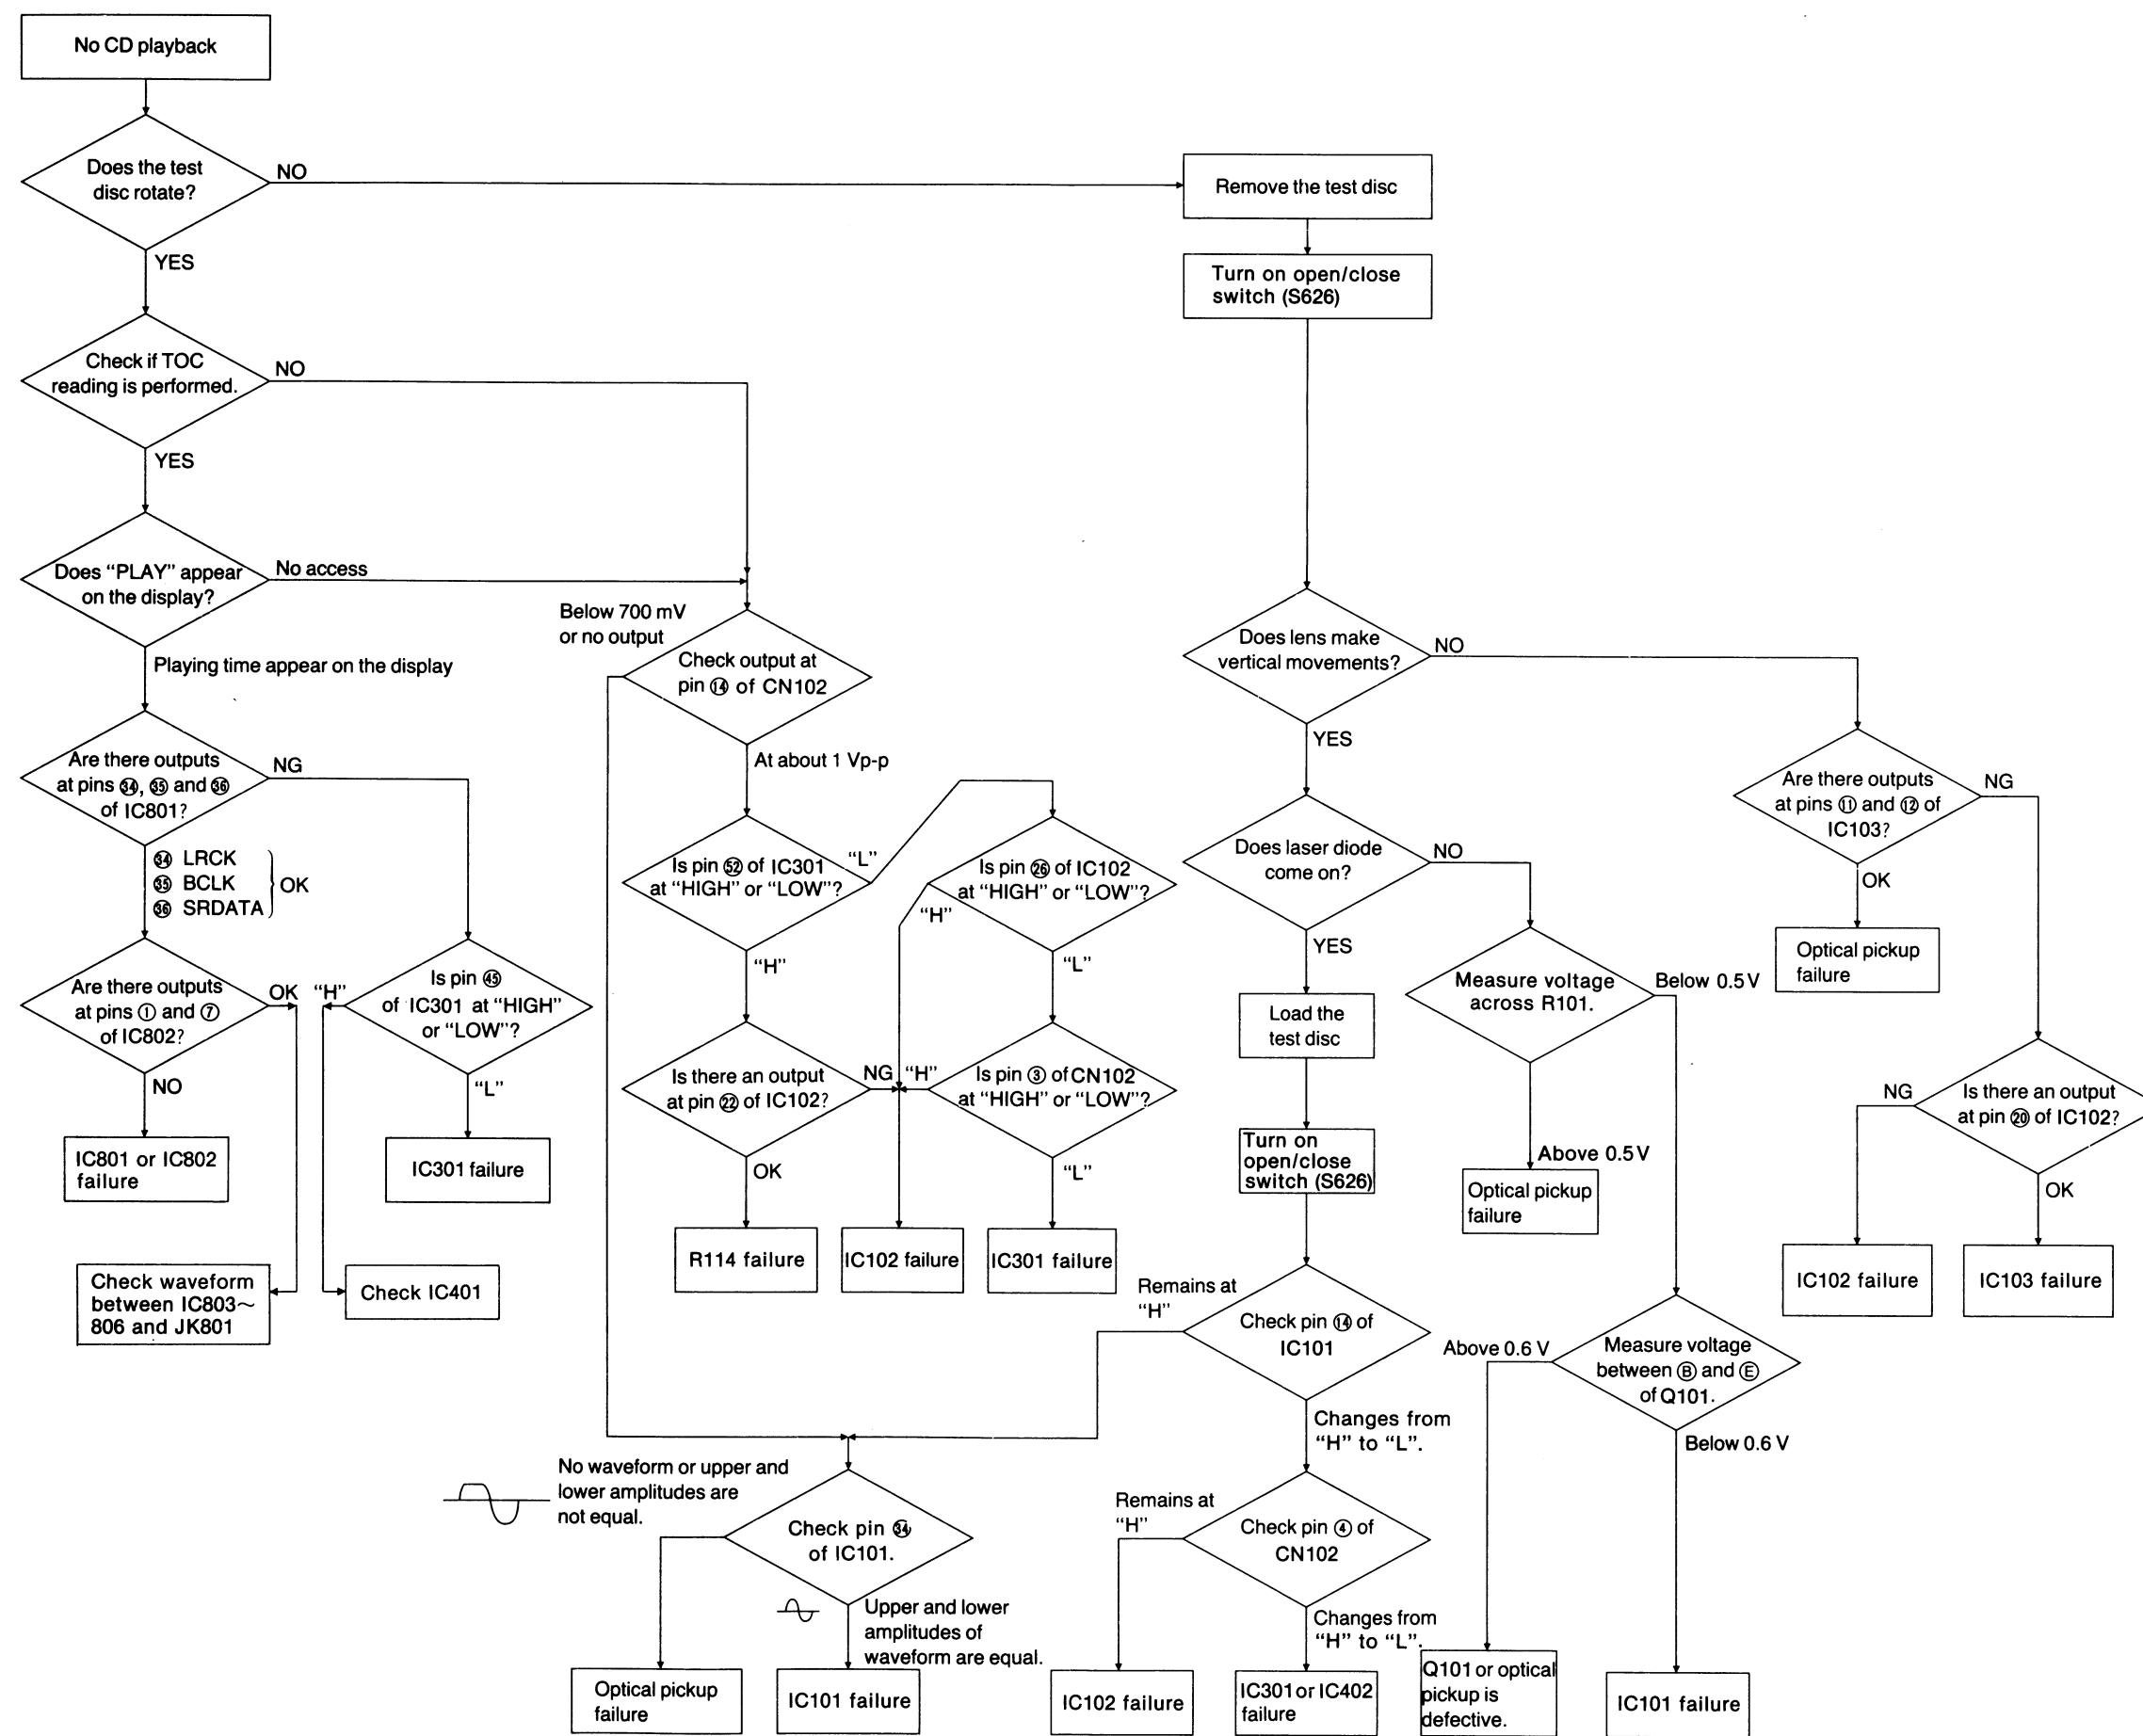

Flow chart on automatic adjustment sequence

Approx. 2.5 sec.

*Because the microcomputer precisely performs automatic adjustments as shown in the flow chart, it will take approx. 5 seconds to finish reading TOC data if a used disc is eccentric one or its surface is warped.

SCHEMATIC DIAGRAM

(Parts list on pages 51~54.)

This schematic diagram may be modified at any time with development of new technology.

Note:

- **S601~610** : Numeric (0~10) switches.
- **S621** : S601: 1, S602: 2, S603: 3, S604: 4, S605: 5, S606: 6, S607: 7, S608: 8, S609: 9, S610: 10, S621: 0
- **S622** : Input mode (>10) switch.
- **S623** : Play (▶) PLAY switch.
- **S624** : Pause (■) PAUSE switch.
- **S625** : Stop (■) STOP switch.
- **S626** : Disc holder open/close (▲) OPEN/CLOSE switch.
- **S627** : Program (PROGRAM) switch.
- **S628** : Recall (RECALL) switch.
- **S629** : Clear (CLEAR) switch.
- **S630** : Time mode select (TIME MODE) switch.
- **S631~634** : Function (F1~F4) switches. [S631: F1, S632: F2, S633: F3, S634: F4]
- **S635** : Direct (DIRECT, F5) switch.
- **S636** : Function manager (FUNCTION MANAGER) switch.
- **S637, 638** : Search (SEARCH) switches. [S637: ◀◀, S638: ▶▶]
- **S639** : Display mode (DISPLAY MODE) switch.
- **S640** : Power (POWER) switch in "on" position.
- **S701** : Voltage adjustment switch in "240V" position. (110V ↔ 127V ↔ 220V ↔ 240V) [For (GC) area only.]
- **S751** : Disc holder open /close detector switch.
- The voltage value and waveforms are the reference voltage of this unit measured by DC electronic voltmeter (high impedance) and oscilloscope on the basis of chassis. Accordingly, there may arise some error in voltage values and waveforms depending upon the internal impedance of the tester or the measuring unit.
- * The parenthesized are the values of voltage generated during playing (Test disc 1 kHz, L+R, 0dB), others are voltage values in stop mode.
- Important safety notice: Components identified by Δ mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.
- The supply part number is described alone in the replacement parts list.

Part No.	Original Part No.	Supply Part No.
IC11	LM2940T5M	LM2940T5
IC402	BA4558FT1	SVIBA4558F
IC602	RCDHC-247	RCD0003
IC802~804	M5219FPTA	M5219FP
IC805, 806	M5238FPTA	SVIM5238FP
IC901	M5218AL	M5218L

- ——— / ——— : Positive voltage lines and negative voltage lines.
- ——— : audio signal liens.

Caution!

- IC and LSI are sensitive to static electricity. Secondary trouble can be prevented by taking care during repair.
- Cover the parts boxes made of plastics with aluminum foil.
- Ground the soldering iron.
- Put a conductive mat on the work table.
- Do not touch the pins of IC or LSI with fingers directly.

■ REPLACEMENT PARTS LIST

Notes : * Important safety notice:
 Components identified by Δ mark have special characteristics important for safety. When replacing any of these components use only manufacturer's specified parts.
 * The parenthesized indications in the Remarks columns specify the areas. (Refer to the cover page for area.)
 Parts without these indications can be used for all areas.
