• Important safety notice
Components identified by ⚠ mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.

Note 2:

• Use of ceramic filters in pairs
The ceramic filters (CF201, CF202) for FM-IF circuit are available in three ranks. For this circuit, be sure to use the ceramics of the same rank in a pair.
At repairing and replacement, pay close attention to the diodes (D915, D914) for use as different diodes must be used depending on each rank of the ceramic filters.

✻ Caution!

IC and LSI are sensitive to static electricity.
Secondary trouble can be prevented by taking care during repair.
✻ Cover the parts boxes made of plastics with aluminum coil.
✻ Ground the soldering iron.
✻ Put a conductive mat on the work table.
✻ Do not touch the legs of IC or LSI with the fingers directly.
