

Service Manual

Stereo Integrated Amplifier

SU-V300M2

Colour

(K).....Black Type

Areas

(E).....Europe.

(EB).....Great Britain.

(EG).....Germany.

Specifications

MAIN AMP section

Power output [at power supply 240 V for (EB) area]:

40 Hz – 20 kHz continuous power output both channels driven;	2 × 27 W (8 Ω)
1 kHz continuous power output both channels driven (THD: 1 %):	2 × 33 W (8 Ω)
63 Hz – 12.5 kHz continuous power output both channels driven (THD: 1 %):	2 × 40 W (4 Ω)
Total harmonic distortion:	

rated power at 20 Hz – 20 kHz; 0.2 % (8 Ω)

Intermodulation distortion (50 Hz: 7 kHz = 4 : 1, SMPTE):

rated power; 0.2 % (8 Ω)

Residual hum and noise:

Damping factor: 1 mV

Headphones output level/impedance:

Load impedance:

A or B; 4 Ω – 16 Ω
A and B; 8 Ω – 16 Ω

PRE AMP section

Input sensitivity/impedance:

PHONO MM; 2.5 mV/47 kΩ
TUNER, CD, AUX, TAPE1, TAPE2; 150 mV/22 kΩ

Input capacitance:

PHONO maximum input voltage (1 kHz, RMS): 270 pF

MM; 150 mV (IHF '66)

S/N (Rated power, 4 Ω):

PHONO MM; 76 dB (76 dB, IHF '66)
TUNER, CD, AUX, TAPE1, TAPE2; 90 dB (76 dB, IHF '66)

S/N at –26 dB power (4 Ω):

PHONO MM;	67 dB
TUNER, CD, AUX, TAPE1, TAPE2;	70 dB

S/N at 50 mW (4 Ω):

PHONO MM;	63 dB
TUNER, CD, AUX, TAPE1, TAPE2;	63 dB

Frequency response:

PHONO MM;	RIAA standard curve ±1 dB (30 Hz – 15 kHz)
TUNER, CD, AUX, TAPE1, TAPE2;	+0, –3 dB (3 Hz – 60 kHz)
	+0, –0.3 dB (20 Hz – 20 kHz)

Tone controls:

BASS;	50 Hz, +10 dB to –10 dB
TREBLE;	20 kHz, +10 dB to –10 dB

Output voltage:

TAPE1, TAPE2 REC OUT;	150 mV
Channel balance (AUX 250 Hz – 6.3 kHz);	±1 dB
Channel separation (AUX 1 kHz);	50 dB

General

Power supply:

For (E) and (EG) areas;	AC 230V, 50/60 Hz
For (EB) area;	AC 230 – 240 V, 50/60 Hz

Power consumption:

110 W

Dimensions (W × H × D):

430 × 125 × 310 mm

Weight:

5.4 kg

Notes: Specifications are subject to change without notice.

Weight and dimensions are approximate.

Total harmonic distortion is measured by the digital spectrum analyzer.

⚠ WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

1 Note

- The contents changed from Model No. SU-V300M2 (Order No. AD99003072C2)

This model [SU-V300M2 (Order No. AD0104089C2)] is changed from Model No. SU-V300M2 (Order No. AD99003072C2) about Printed Circuit Board. So you need to use the service manual properly with distinguishing the unit is sold on and after April 2001 or not.

When the unit is repaired, refer to the table as shown below and confirm IC601 and Part No. of operation P.C.B.

	SU-V300M2 (AD903072C2)	SU-V300M2 (AD0104089C2)
IC601	RSN3502A	RSN3502C
Operation P.C.B.	RJB1273BB-2	RJB1273BB-3
The time of sales	Before April 2001	On and after April 2001

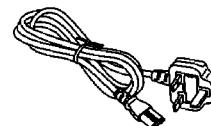

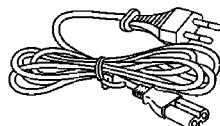

2 Before Repairs

1. Turn off the power supply. Using a 10 Ω, 10 W resistor, connect both ends of power supply capacitors (C703, C704) in order to discharge the voltage.
2. Before turning the power supply on, after completion of repair, slowly apply the primary voltage by using a power supply voltage controller to make sure that the consumed current at 50 Hz in NO SIGNAL mode should be shown below with respect to supply voltage 230/240 V.

Power supply voltage	AC 230 V	AC 240 V
Consumed current 50 Hz	47 ~ 157 mA	45 ~ 150 mA

4 Accessories

- AC power supply cord for (E) and (EG) areas (RJA0019-1X).....1 pc.
- AC power supply cord for (EB) area (RJA0035-2X).....1 pc.

5 Caution for AC Mains Lead

(For United Kingdom)

("EB" area code model only)

For your safety, please read the following text carefully.

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.

A 5-ampere fuse is fitted in this plug.

Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5-ampere and that it is approved by ASTA or BSI to BS1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local dealer.

CAUTION!

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY.

THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13-AMPERE SOCKET.

If a new plug is to be fitted please observe the wiring code as shown below.

If in any doubt please consult a qualified electrician.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral, Brown: Live.

As these colours may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured Blue must be connected to the terminal which is marked with the letter N or coloured Black or Blue.

The wire which is coloured Brown must be connected to the terminal which is marked with the letter L or coloured Brown or Red.

WARNING: DO NOT CONNECT EITHER WIRE TO THE EARTH TERMINAL WHICH IS MARKED WITH THE LETTER E, BY THE EARTH SYMBOL  OR COLOURED GREEN OR GREEN/YELLOW.

THIS PLUG IS NOT WATERPROOF—KEEP DRY.

Before use

Remove the connector cover.

How to replace the fuse

The location of the fuse differ according to the type of AC mains plug (figures A and B). Confirm the AC mains plug fitted and follow the instructions below.

Illustrations may differ from actual AC mains plug.

1. Open the fuse cover with a screwdriver.

Figure A

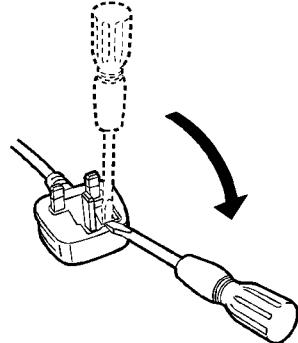

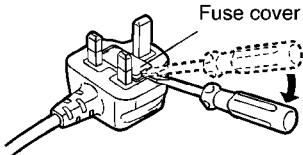

Figure B

2. Replace the fuse and close or attach the fuse cover.

Figure A

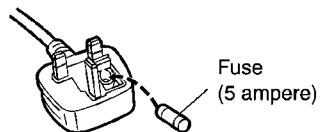

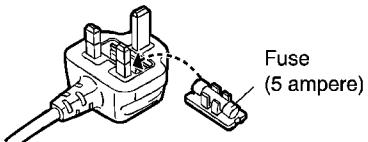

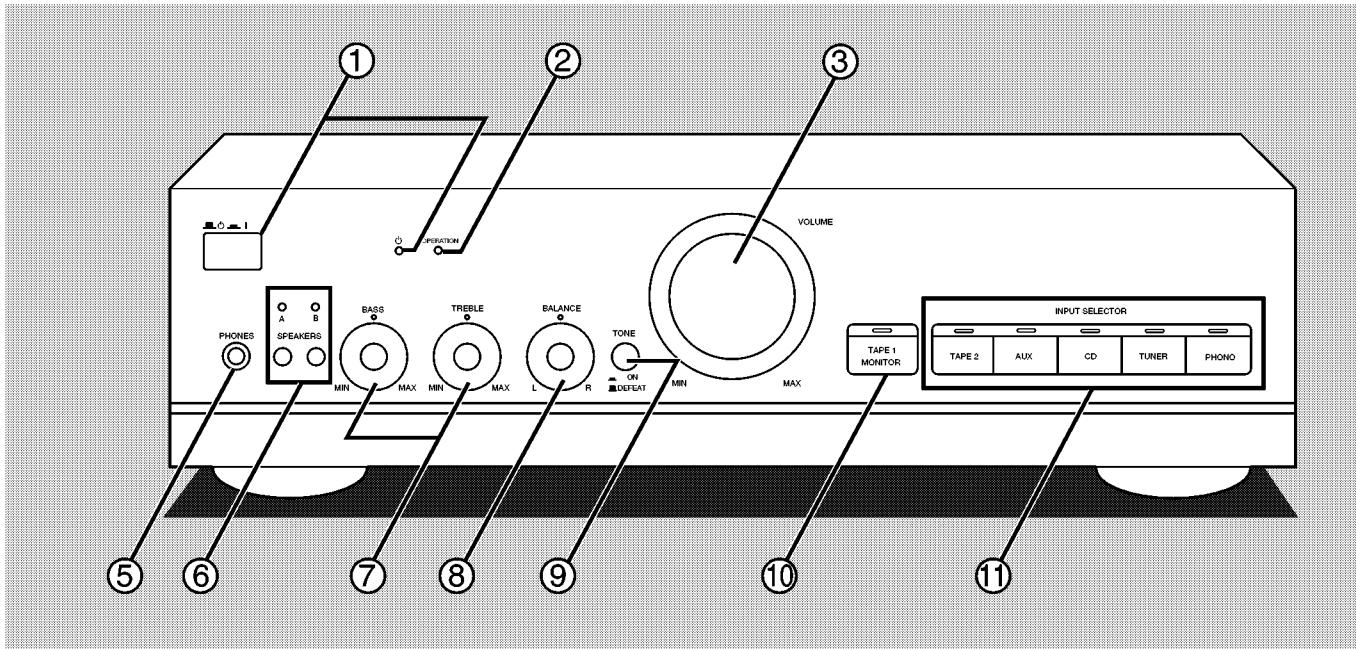

Figure B

6 Location of Controls

No.	Name
-----	------

① Unit on/off button (■ ○ ■ I) and standby indicator (○)

Press to switch the unit from on to standby mode or visa versa.

■ (off): The unit is in standby mode.

■ (on): The unit is on.

In standby mode, the unit is still consuming a small amount of power.

When the unit is connected to the AC mains supply, the indicator lights up in standby mode and goes out when the unit is turned on.

No.	Name
-----	------

② Operation indicator (OPERATION)

When the power is switched ON, this indicator illuminates after about 2 seconds when the unit is in the operating condition.

③ Volume control (VOLUME)

④ Headphone jack (PHONES)

⑤ Speaker select buttons/indicators (SPEAKERS)

⑥ Tone controls (BASS, TREBLE)

⑦ Balance control (BALANCE)

⑧ Tone control button (TONE)

⑨ TAPE 1 MONITOR button/indicator (TAPE 1 MONITOR)

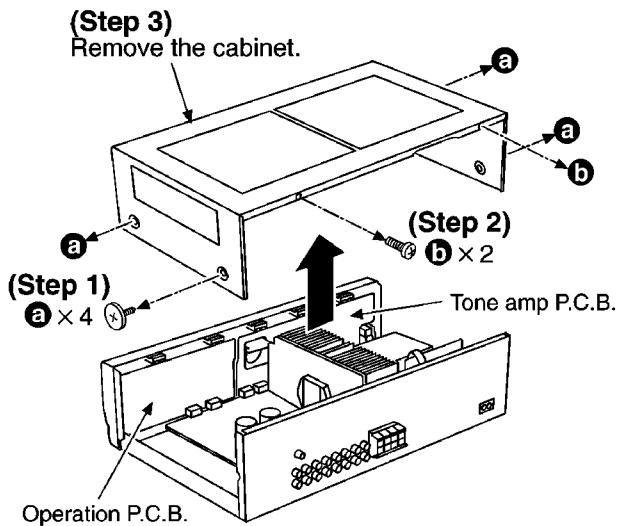

⑩ Input select buttons/indicators (INPUT SELECTOR)

7 Operation Checks and Component Replacement Procedures

• This section describes procedures for checking the operation of the major printed circuit boards and replacing the main components.

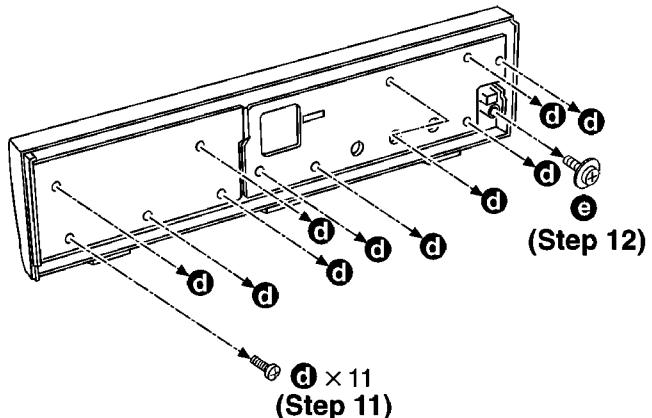

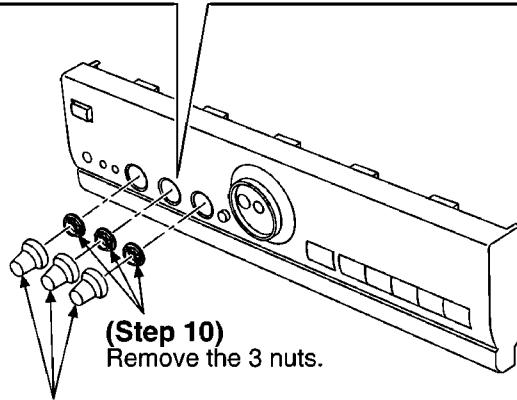

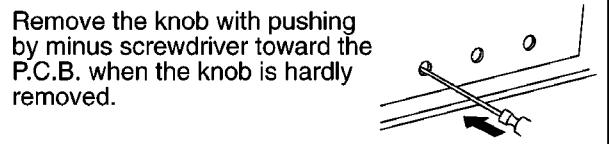

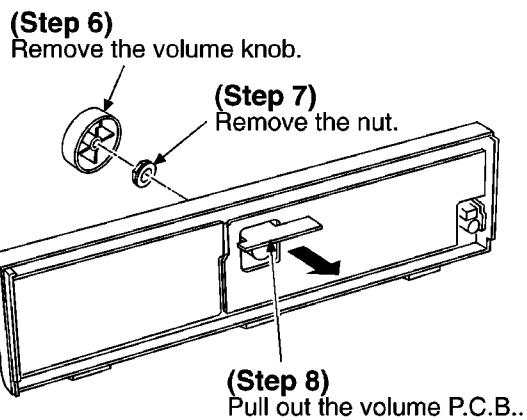

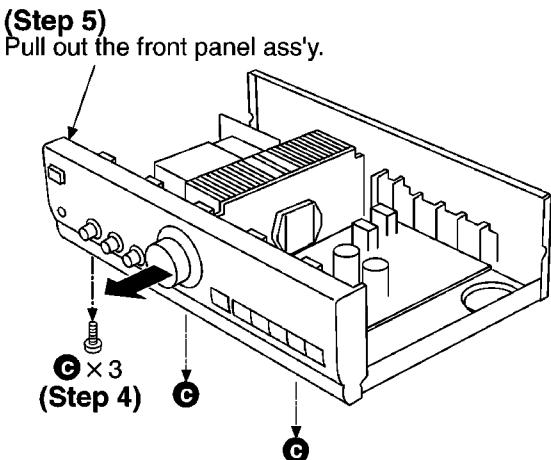

• For reassembly after operation checks or replacement, reverse the respective procedures. Special reassembly procedures are described only when required.

7.1. Checking for the operation P.C.B. and tone amp P.C.B.

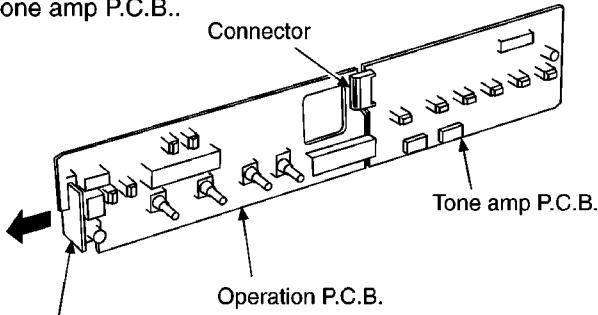

• Check the operation P.C.B. and tone amp P.C.B. as shown above.

To remove each P.C.B.

(Step 14)

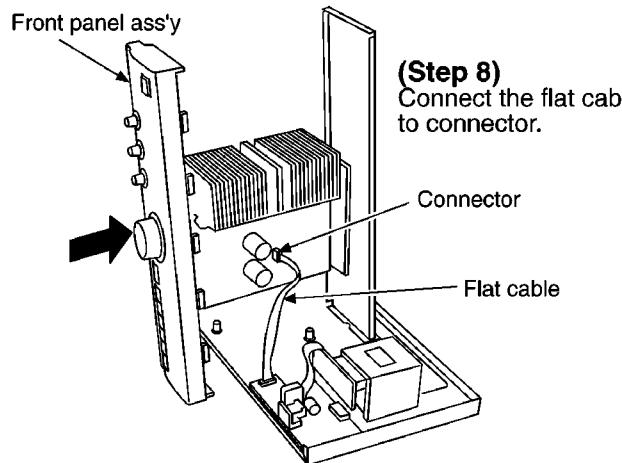

Remove the connector, and then remove the operation P.C.B. and tone amp P.C.B..

**(Step 13)**

Remove the headphones jack P.C.B..

(Step 7)

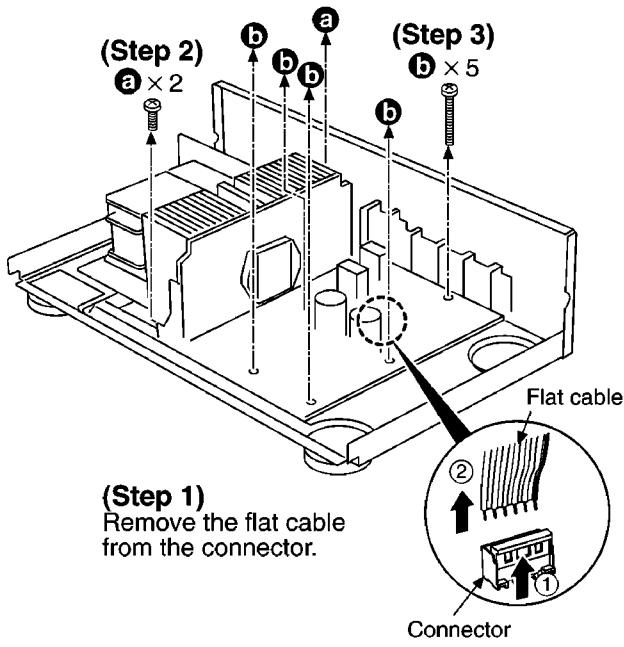

Connect the front panel ass'y of the P.C.B. connectors to the main P.C.B..

**(Step 8)**

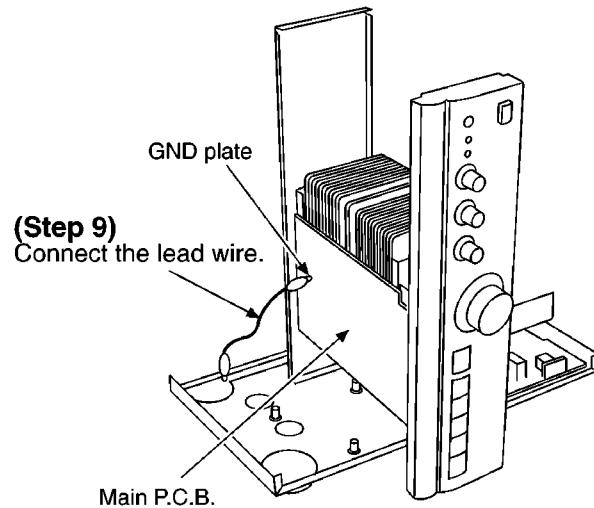

Connect the flat cable to connector.

7.2. Checking for the main P.C.B.

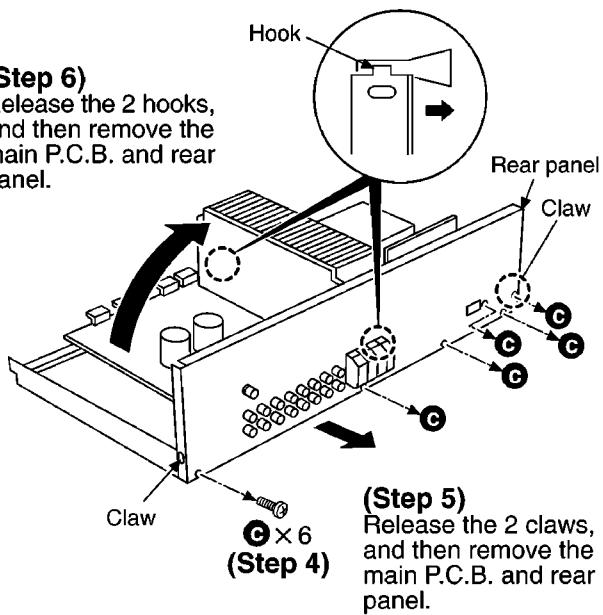

- Follow the (Step 1) - (Step 5) of item 7.1.

- Check the main P.C.B. as shown below.

**(Step 6)**

Release the 2 hooks, and then remove the main P.C.B. and rear panel.

**(Step 5)**

Release the 2 claws, and then remove the main P.C.B. and rear panel.

(Step 4)

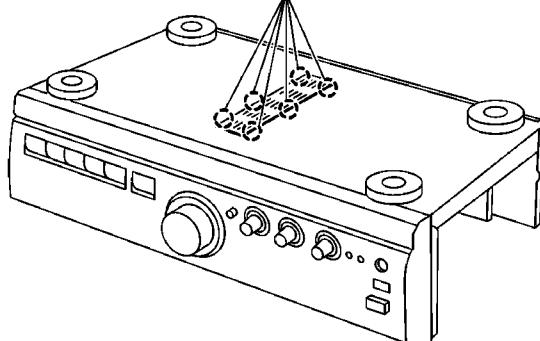

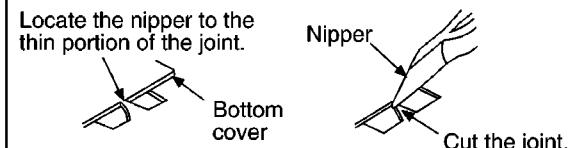

C × 6

7.3. Replacement for the power IC

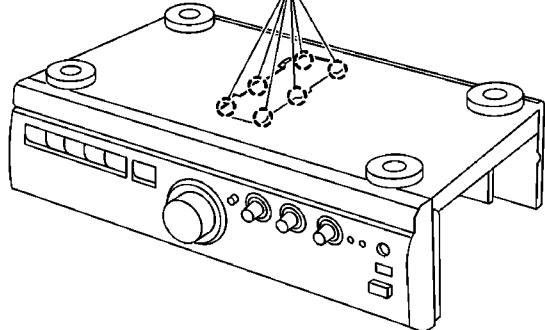

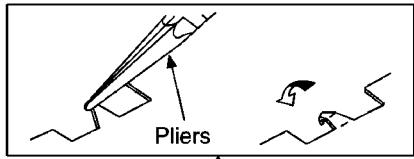

- Follow the (Step 1) - (Step 3) of item 7.1.

(Step 1)

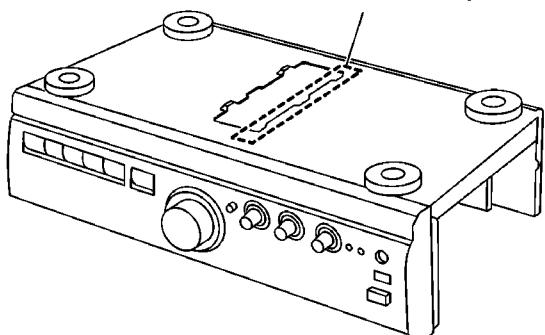

Cut the joints as shown below. (6 portions)

(Step 2)
Fold the joints. (6 portions)

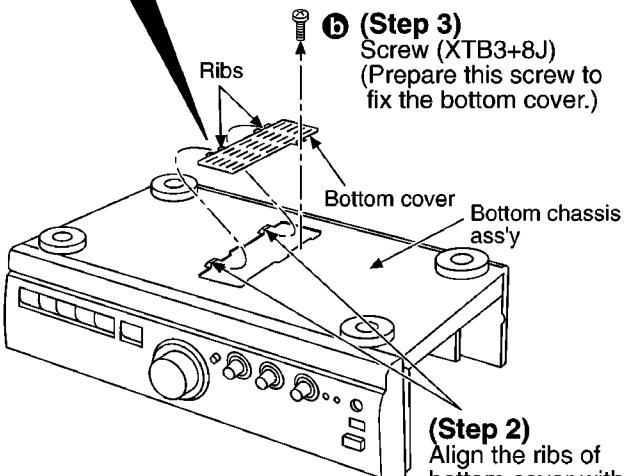

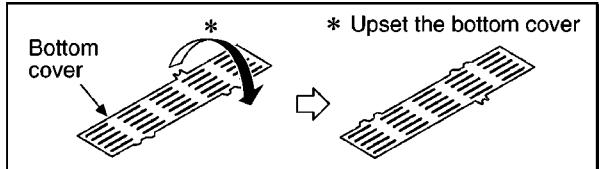

(Step 3)
Unsolder the terminals of power IC.

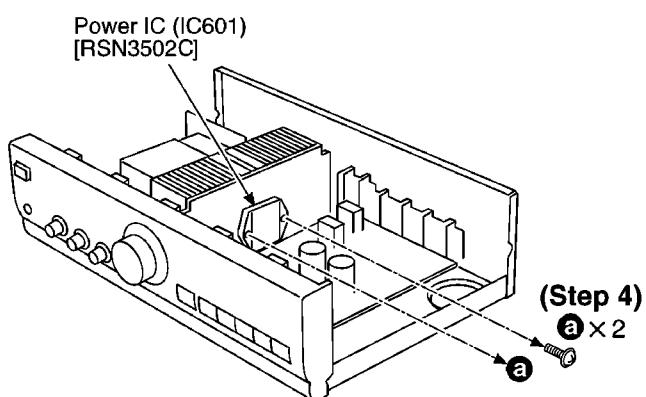

Installation of the bottom cover after replacement

(Step 1)

(Step 2)
Align the ribs of bottom cover with lugs.

NOTE:

1. After replacing the power IC, apply a sufficient quantity of compound grease (RFKX0002) between the heat sink and the power IC (Radiation of power IC).
2. Tighten enough the screws (**a**) after replacing the power IC. Otherwise, the heat radiation works little.

S802: Input selector switch (TUNER)
S803: Input selector switch (CD)
S804: Input selector switch (AUX)
S805: Input selector switch (TAPE2)
S806: Tape1 monitor switch (TAPE1 MONITOR)
S807: Unit on/off switch (■□-I)
S808: Speaker select switch (SPEAKERS A)
S809: Speaker select switch (SPEAKERS B)
VR471: Bass control VR (BASS)
VR472: Treble control VR (TREBLE)
VR501: Volume control VR (VOLUME)
VR502: Balance control VR (BALANCE)

Indicated voltage values are the standard values for the unit measured by the DC electronic circuit tester (high-impedance) with the chassis taken as standard. Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester.

No mark : Power ON

Important safety notice:

Components identified by mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-

retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

The supply part number is described alone in the replacement parts list.

Caution!

IC and LSI are sensitive to static electricity.

Secondary trouble can be prevented by taking care during repair.

Cover the parts boxes made of plastics with aluminum foil.
Ground the soldering iron.

Put a conductive mat on the work table.

Do not touch the legs of IC or LSI with the fingers directly.

14 Terminal Function of ICs

14.1. IC801 (M37470M2536S): Micro Computer

Pin No.	Terminal Name	I/O	Function
1	P17/SRDY	O	Relay drive signal output
2	P16/CLK	-	Remote control signal output (Not used, open)
3	P15/SOUT	O	LED (PHONO) drive signal output
4	P14/SIN	O	LED (TUNER) drive signal output
5	P13/T1	O	LED (CD) drive signal output
6	P12/T0	O	LED (AUX) drive signal output
7	P11	O	LED (TAPE2) drive signal output
8	P10	O	LED (TAPE1 MONITOR) drive signal output
9	P23/IN3	-	Motor (volume control) drive signal output (Not used, open)
10	P22/IN2	-	
11	P21/IN1	I	Input selector switch signal input
12	P20/INO	I	Speaker A, B select switch signal input
13	VREF	I	Reference voltage input

Pin No.	Terminal Name	I/O	Function
14	X IN	I	Crystal oscillator connected terminal (F=4 MHz)
15	X OUT	O	
16	V _{ss}	-	GND
17	V _{cc}	I	Power supply terminal
18	RESET	I	System reset signal input
19	P30/INT0	I	Back up detect signal input
20	P31/INT1	-	Not used, connected to GND
21	P32/CNTR0	I	Power switch signal input (Not used, connected to GND)
22	P23/CNTR1	-	Not used, connected to GND
23	P40	O	Strobe signal output for input selector
24	P41	O	Clock signal output for input selector
25	P00	O	Data signal output for input selector
26	P01	O	Speaker A select signal output
27	P02	O	Speaker B select signal output
28	P03	O	LED (SPEAKER A) drive signal output
29	P04	O	LED (SPEAKER B) drive signal output
30	P05	-	Not used, connected to GND
31	P06	-	Not used
32	P07	O	Audio muting control signal output

15 Replacement Parts List

Notes:

- Important safety notice:

Components identified by Δ mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

- The <IA> <IB> <IC> <ID> <IE> marks in Remarks indicate language of instruction manual.

<IA>: English, Spanish, Swedish

<IB>: Russian, Polish, Czech

<IC>: German, Italian, French

<ID>: Netherlands, Danish,

<IE>: English

- The parenthesized indications in the Remarks columns specify the areas. (Refer to the cover page for area.)

The marking [RTL] indicates that Retention Time is Limited for this item. After the discontinuation of this assembly in production, the item will continue to be available for a specific period of time. The retention period of availability is dependent on the type of assembly, and in accordance with the laws governing part and product retention. After the end of this period, the assembly will no longer be available.

- All parts are supplied by MESA.
