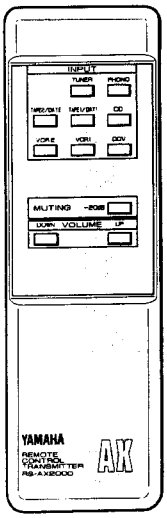
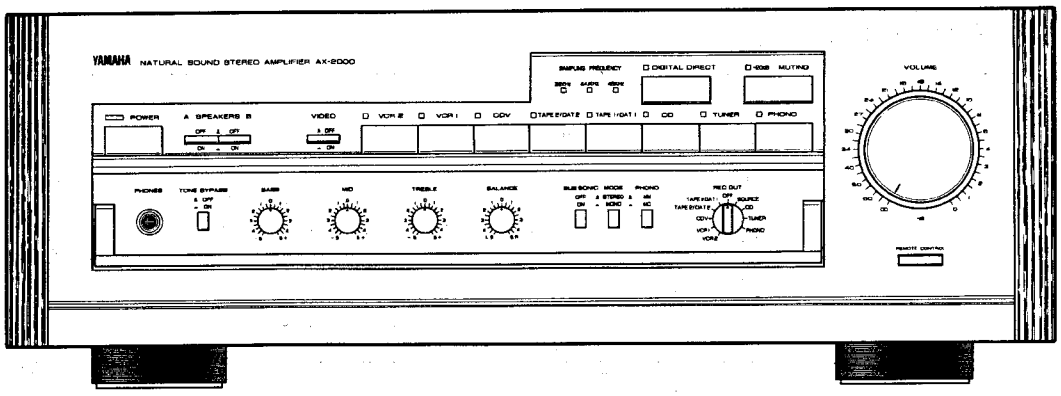
SERVICE MANUAL

● RS-AX2000





IMPORTANT NOTICE

This manual has been provided for the use of authorized Yamaha Retailers and their service personnel. It has been assumed that basic service procedures inherant to the industry, and more specifically Yamaha Products, are already known and understood by the users, and have therefore not been restated.

WARNING: Failure to follow appropriate service and safety procedures when servicing this product may result in personal injury, destruction of expensive components and failure of the product to perform as specified. For these reasons, we advise all Yamaha product owners that all service required should be performed by an authorized Yamaha Retailer or the appointed service representative.

IMPORTANT: The presentation or sale of this manual to any individual or firm does not constitute authorization, certification, recognition of any applicable technical capabilities, or establish a principle-agent relationship of any form.

The data provided is believed to be accurate and applicable to the unit(s) indicated on the cover. The research, engineering, and service departments of Yamaha are continually striving to improve Yamaha products. Modifications are, therefore, inevitable and specifications are subject to change without notice or obligation to retrofit. Should any discrepancy appear to exist, please contact the distributor's Service Division.

WARNING: Static discharges can destroy expensive components. Discharge any static electricity your body may have accumulated by grounding yourself to the ground buss in the unit (heavy gauge black wires connect to this buss).

IMPORTANT: Turn the unit OFF during disassembly and parts replacement. Recheck all work before you apply power to the unit.

■ TO SERVICE PERSONNEL

1. Critical Components Information.
   Components having special characteristics are marked ⚠ and must be replaced with parts having specifications equal to those originally installed.
2. Leakage Current Measurement (For 120V Model Only).
   When service has been completed, it is imperative that you verify that all exposed conductive surfaces are properly insulated from supply circuits.

- Meter impedance should be equivalent to 1500 ohm shunted by 0.15μF.
- Leakage current must not exceed 0.5mA.
- Be sure to test for leakage with the AC plug in both polarities.

c. Remove 4 screws of ④, and remove the cover (A).

3. Removal of Front Panel Unit:

a. Pull out 5 knobs located at inside of Sealing Panel of ⑤.

b. Remove connector which is projected out of circuit board located at inside of front panel.

c. Remove 6 screws of ⑥, then remove the unit trying to pull the front panel toward you.

d. Remove 1 plastic rivet of ⑦.

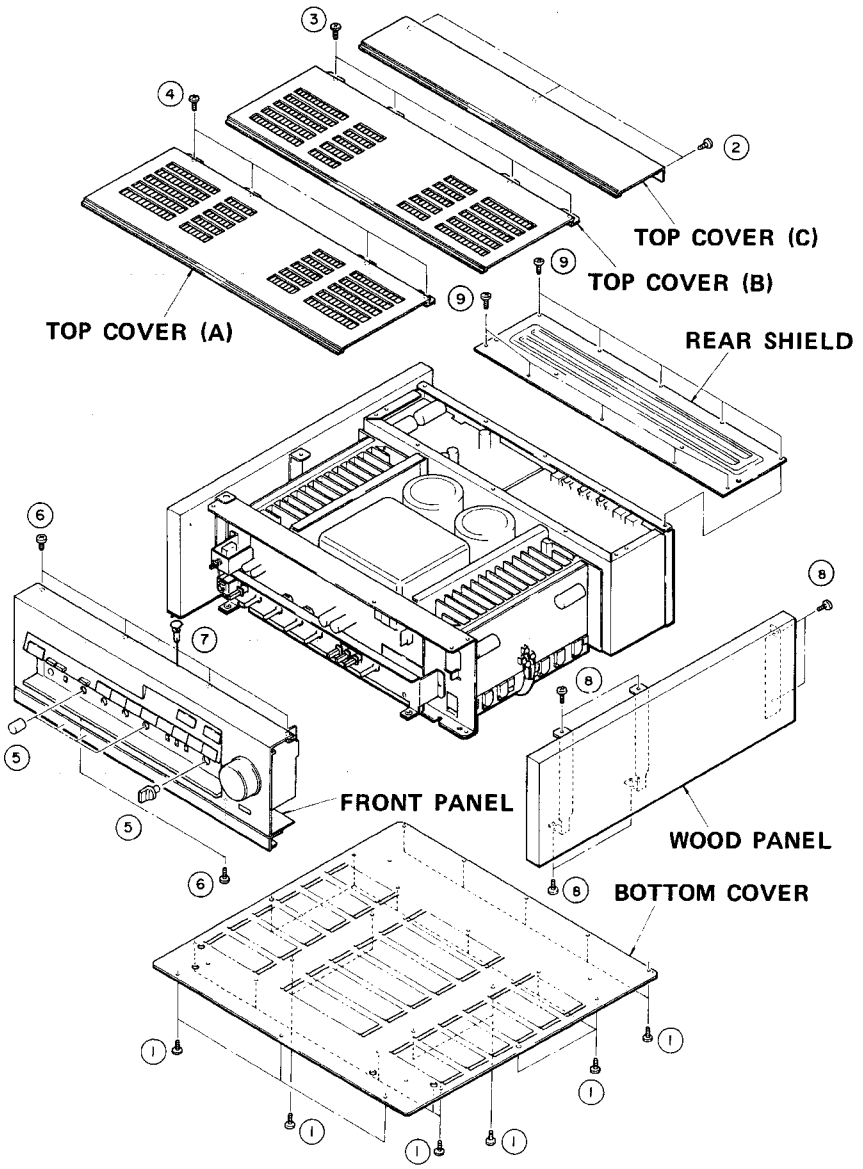
4. Removal of Wood Panel:

a. Remove 6 screws of ⑧, and remove the panel sliding it to the side.

Precaution: Remove both left and right wood panels with the same removal procedure. Also, if you removed the wood panel, the strength weakens.

5. Removal of Rear Shield:

a. Remove 10 screws of ⑨.



■ ADJUSTMENTS

Before adjustment

- In order to stabilize the operation of Amplifier, conduct the adjustment after having done 3 minutes aging under no-load status.

Adjustment	Place to be measured	Place to be adjusted	Specification
Idling of Electric Current	Main Circuit Board TP1 ↔ TP2 (Both L & R)	VR101 (Both L & R)	DC60mV-5mV
Distortion Rate Adjustment of D/A Converter	Selector 2 Circuit Board Digital 1kHz, 0dB Signal	VR401 (L) VR402 (R)	Adjust it so as to be the best condition. (See Note 1.)

Note 1:

- Use 20 kHz, LPF.
- Switch on Digital Direct.
- Let the Main Volume be the minimum
- Set REC OUT SELECTOR at the position of SOURCE REC, and measure output (analogue) of REC OUT. For the Input, input Digital Signal of 1kHz 0dB to DIGITAL CD INPUT Terminal. (CD Player with DIGITAL OUT is connected with it.)
- Digital Signal from either CD or TAPE 1/DAT 1 Terminal chosen by INPUT SELECTOR has to be outputting to DIGITAL OUT Terminal.
- Rated Input is 0.5+0.1V_{P-P}, and Impedance of Signal Source is R_g =75 Ω
- Rated Output is 0.5-0.1V_{P-P} (when its load is 75 Ω.)
