## SERVICE MANUAL

### IMPORTANT NOTICE

This manual has been provided for the use of authorized YAMAHA Retailers and their service personnel. It has been assumed that basic service procedures inherent to the industry, and more specifically YAMAHA Products, are already known and understood by the users, and have therefore not been restated.

**WARNING:** Failure to follow appropriate service and safety procedures when servicing this product may result in personal injury, destruction of expensive components and failure of the product to perform as specified. For these reasons, we advise all YAMAHA product owners that all service required should be performed by an authorized YAMAHA Retailer or the appointed service representative.

**IMPORTANT:** The presentation or sale of this manual to any individual or firm does not constitute authorization, certification or recognition of any applicable technical capabilities, or establish a principle-agent relationship of any form.

The data provided is believed to be accurate and applicable to the unit(s) indicated on the cover. The research, engineering, and service departments of YAMAHA are continually striving to improve YAMAHA products. Modifications are, therefore, inevitable and specifications are subject to change without notice or obligation to retrofit. Should any discrepancy appear to exist, please contact the distributor's Service Division.

**WARNING:** Static discharges can destroy expensive components. Discharge any static electricity your body may have accumulated by grounding yourself to the ground buss in the unit (heavy gauge black wires connect to this buss).

**IMPORTANT:** Turn the unit OFF during disassembly and parts replacement. Recheck all work before you apply power to the unit.

## LOCALE MANAGEMENT INFORMATION

Locale Management Information: This DVD player is designed and manufactured to respond to the Locale Management information that is recorded on a DVD disc. If the Locale number described on the DVD disc does not correspond to the Locale number of this DVD player, this DVD player cannot play this disc. (See page1-3, REGION CODE.)

This product incorporates copyright protection technology that is protected by method claims of certain U.S. patents and other intellectual property rights owned by Macrovision Corporation and other rights owners. Use of this copyright protection technology must be authorized by Macrovision Corporation, and is intended for home and other limited viewing uses only unless otherwise authorized by Macrovision Corporation. Reverse engineering or disassembly is prohibited.

## TO SERVICE PERSONNEL

### 1. Critical Components Information

Components having special characteristics are marked  and must be replaced with parts having specifications equal to those originally installed.

### 2. Leakage Current Measurement (For 120V Models Only)

When service has been completed, it is imperative to verify that all exposed conductive surfaces are properly insulated from supply circuits.

- Meter impedance should be equivalent to 1500 ohm shunted by 0.15 $\mu$ F.

- Leakage current must not exceed 0.5mA.

- Be sure to test for leakage with the AC plug in both polarities.

## WARNING: CHEMICAL CONTENT NOTICE!

The solder used in the production of this product contains LEAD. In addition, other electrical/electronic and/or plastic (where applicable) components may also contain traces of chemicals found by the California Health and Welfare Agency (and possibly other entities) to cause cancer and/or birth defects or other reproductive harm.

**DO NOT PLACE SOLDER, ELECTRICAL/ELECTRONIC OR PLASTIC COMPONENTS IN YOUR MOUTH FOR ANY REASON WHATSOEVER!**

Avoid prolonged, unprotected contact between solder and your skin! When soldering, do not inhale solder fumes or expose eyes to solder/flux vapor!

If you come in contact with solder or components located inside the enclosure of this product, wash your hands before handling food.

## WARNING: Laser Safety

This product contains a laser beam component. This component may emit invisible, as well as visible radiation, which may cause eye damage. To protect your eyes and skin from laser radiation, the following precautions must be used during servicing of the unit.

- 1) When testing and/or repairing any component within the product, keep your eyes and skin more than 30cm away from the laser pick-up unit at all times. Do not stare the laser beam at any time.
- 2) Do not attempt readjustment, disassemble or repair of the laser pick-up, unless notes elsewhere in this manual.
- 3) CAUTION : Use of controls, adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

## Laser Emitting conditions:

- 1) When the Top Cover is removed, and POWER SW is turned to the "ON" position, the laser component will emit a beam for several seconds to detect if a disc is present. During this time (5-10sec.) the laser may radiate through the lens of the laser pick-up unit. Do not attempt any servicing during this period! If no disc is detected, the laser will stop emitting the beam. When a disc is set, you will not be exposed to any laser emissions.
- 2) The laser power level can be adjusted with VR on pick-up PWB, however, this level has been set by the factory prior to shipping from the factory. Do not adjust this laser level control unless instruction is provided elsewhere in this manual.  
Adjustment of this control can increase the laser emission level from the device.

## PREVENTION OF ELECTRO STATIC DISCHARGE (ESD) TO ELECTROSTATICALLY SENSITIVE (ES) DEVICES

Some semiconductor (solid state) devices can be damaged easily by static electricity. Such components commonly are called Electrostatically Sensitive (ES) Devices. Examples of typical ES devices are integrated circuits and some field-effect transistors and semiconductor “chip” components. The following techniques are used to help reduce the incidence of component damage caused by electro static discharge (ESD).

1. Immediately before handling any semiconductor component or semiconductor-equipped assembly, drain off any ESD on your body by touching a known earth ground. Alternatively, obtain and wear a commercially available discharging ESD wrist strap, which should be removed for potential shock reasons prior to applying power to the unit under test.
2. After removing an electrical assembly equipped with ES devices, place the assembly on a conductive surface such as aluminum foil, to prevent electrostatic charge buildup or exposure of the assembly.
3. Use only a grounded-tip soldering iron to solder or unsolder ES devices.
4. Use only a anti-static solder removal device. Some solder removal devices not classified as “anti-static (ESD protected)” can generate electrical charge sufficient to damage ES devices.
5. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ES devices.
6. Do not remove a replacement ES device from its protective package until immediately before you are ready to install it. (Most replacement ES devices are packaged with leads electrically shorted together by conductive foam, aluminum foil or comparable conductive material).
7. Immediately before removing the protective material from the leads of a replacement ES device, touch the protective material to the chassis or circuit assembly into which the device will be installed.

CAUTION: Be sure no power is applied to the chassis or circuit, and observe all other safety precautions.

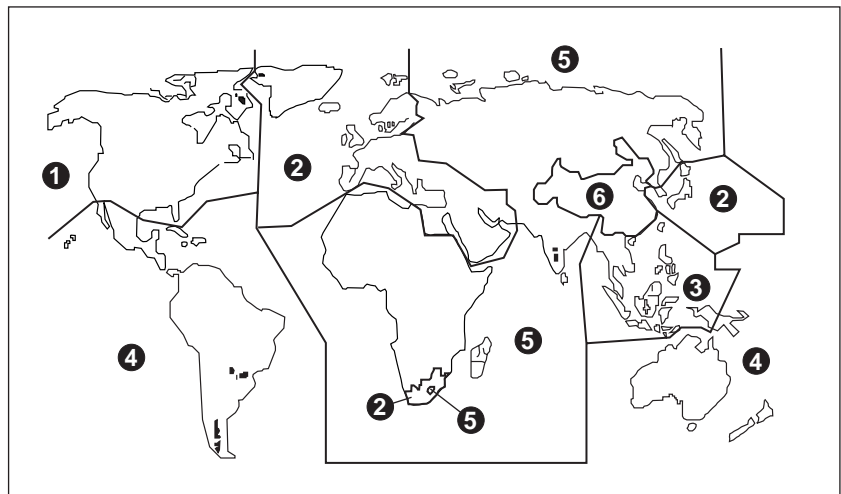

8. Minimize bodily motions when handling unpackaged replacement ES devices. (Otherwise harmless motion such as the brushing together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity (ESD) sufficient to damage an ES device).

### IMPORTANT SAFETY NOTICE

There are special components used in this equipment which are important for safety.

These parts are marked  by in the schematic diagrams, exploded views and replacement parts list. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire, or other hazards. Do not modify the original design without permission of manufacturer.

## REGION CODE

## PRECAUTION OF LASER DIODE

### CAUTION:

This unit utilizes a class II laser. Visible laser radiation is emitted from the optical pickup lens when the unit is tuned on:

1. Do not look directly into the pickup lens.
2. Do not use optical instruments to look at the pickup lens.
3. Do not adjust the preset variable resistor on the optical pickup.
4. Do not disassemble the optical pickup unit.
5. If the optical pickup is replaced, use the manufactures specified replacement pickup only.
6. Use of control or adjustment or performance of procedures other than those specified herein may result in hazardous radiation exposure.

## HANDLING PRECAUTIONS FOR TRAVERSE DECK

The laser diode in the optical pickup may break down due to potential difference caused by static electricity of clothes or human body.

So be careful of electrostatic breakdown during repair of the optical pickup.

### Handling of optical pickup

1. Do not subject the optical pickup to static electricity as it is extremely sensitive to electrical shock.
2. To prevent the breakdown of the laser diode, an antistatic shorting pin is inserted into the flexible board (FPC Board).  
When removing or connecting the short pin, finish the job in as short times as possible.
3. Be careful not to apply excessive stress to the flexible board (FPC Board).
4. Do not turn the variable resistor (Laser power adjustment). It has already been adjusted.

### Grounding for electrostatic breakdown prevention

1. Human body grounding.  
Use the antistatic wrist strap to discharge the static electricity from your body.
2. Work table grounding.  
Put a conductive material (sheet) or steel on the area where the optical pickup is placed and ground the sheet.

### Caution:

The static electricity of your clothes will not be grounded through the wrist strap. So take care not to let your clothes touch the optical pickup.

# OPTICAL PICKUP SELF-DIAGNOSIS AND REPLACEMENT PROCEDURE

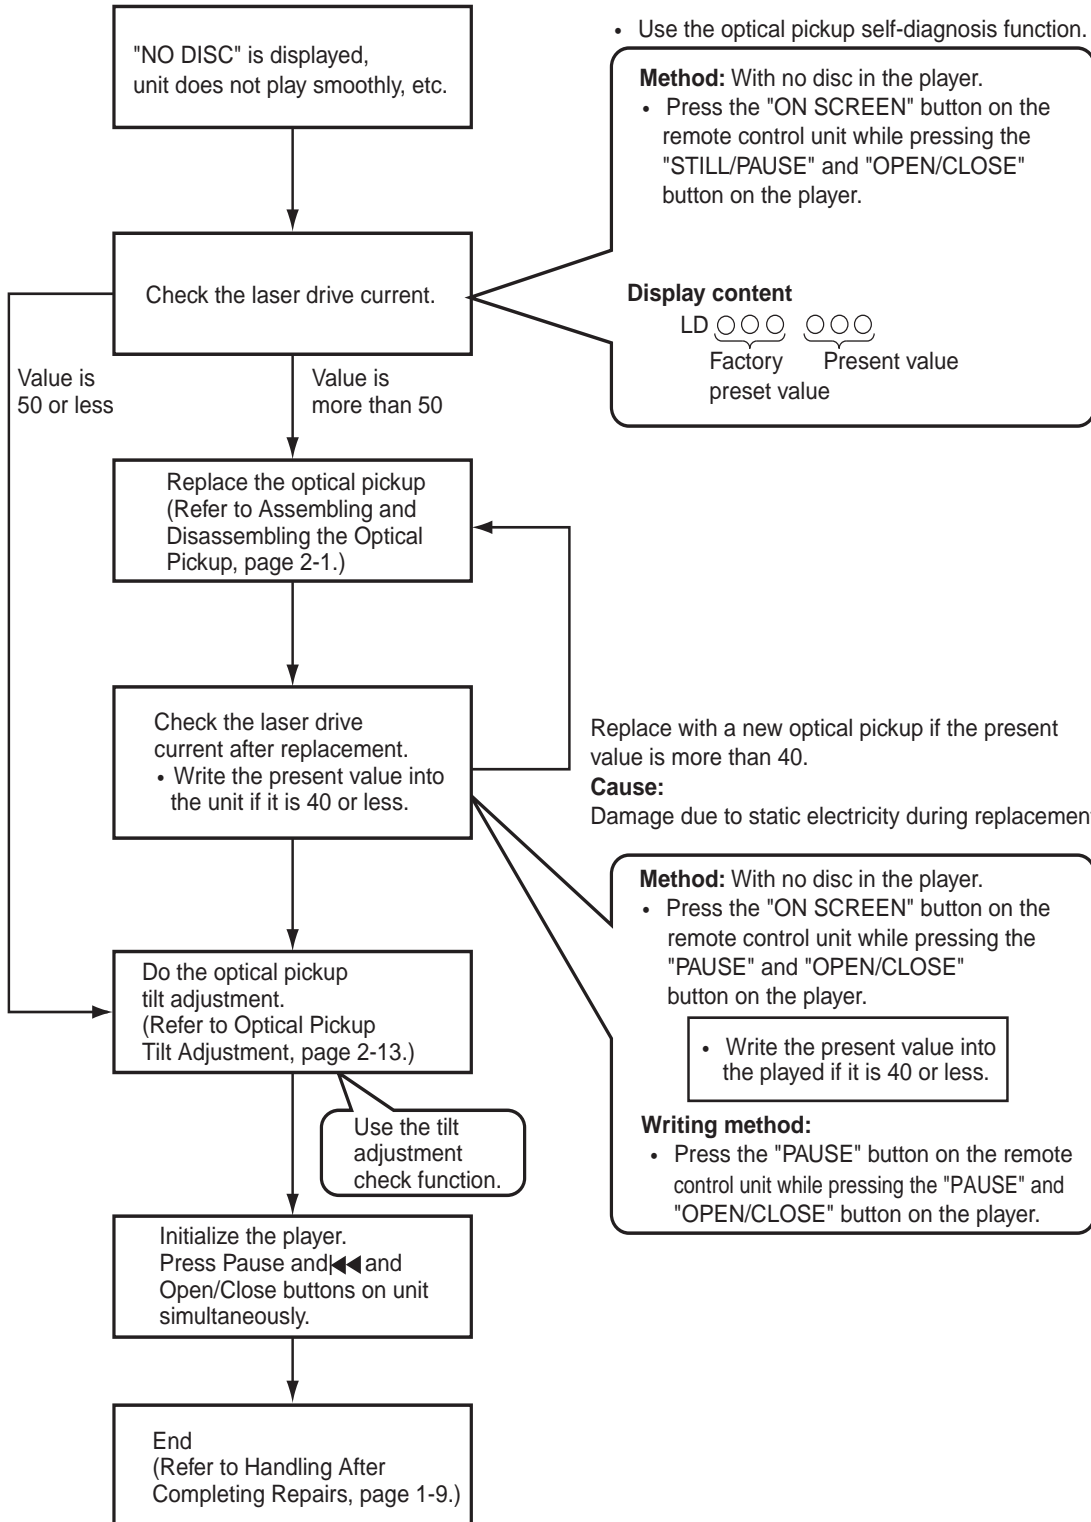

The optical pickup self-diagnosis function and tilt adjustment check function have been newly added to this player. When repairing, use the following procedure for effective Self-diagnosis and tilt adjustment.

Be sure to use the self-diagnosis function before replacing the optical pickup when "NO DISC" is displayed. As a guideline, you should replace the optical pickup when the value of the laser drive current is more than 50.

**Note**

Press the power button to turn on the power, and check the value before the unit warms up (within three minutes).

- Use the self diagnosis function below when "NO DISC" is displayed or unit doesn't read a disc, before replacing the OPU.

# SELF-DIAGNOSIS FUNCTION AND SERVICE MODES

## 1. Service Mode Table

The service mode can be activated by pressing various button combinations on the player and remote control unit.

### 4. Sales Demonstration Lock Function

This function prevents discs from being lost when the unit is used for sales demonstrations, by disabling the disc eject function. "LOCKED" is displayed on the unit, and ordinary operation is disabled.

#### 4-1. Setting Method

The sales demonstration lock function is set by simultaneously pressing the "POWER" button of DVD Player on the remote control unit and the "STOP" button on the main unit. ("LOCKED" is displayed when the lock function is engaged.)

#### 4-2. Release Method

The function can be released using the same procedure as for setting. If the remote control unit is not at hand, the function can be released by using the same method as for player initialization (pressing the "PAUSE", "SKIP ◀◀" and "OPEN/CLOSE" buttons simultaneously).

## SERVICE PRECAUTIONS

### 1. Initializing the DVD Player

Initialize the DVD player whenever you replace a microprocessor, microprocessor peripheral parts, module C.B.A or mother C.B.A.

#### 1-1. Precautions

The customer settings will return to factory preset settings when the player is initialized. Make a note of the settings and reset them after initializing.

- When resetting, see the Initial Setting in the Operating Instructions.

#### 1-2. Initialization Method

The player will be initialized (return to the factory preset condition) when you press the "PAUSE", "SKIP ◀◀" and "OPEN/CLOSE" buttons simultaneously. When the DVD player is initialized, "All Clear" appears on screen, it also displays "INITIALIZED".

### 2. Handling After Completing Repairs

Use the following procedure to secure the traverse unit in the standby position.

#### 2-1. Method

With the power turned on:

1. Press the "OPEN/CLOSE" button to close the tray.
2. Press the "POWER" button to turn off the power.
3. Disconnect the power plug from the outlet.

#### 2-2. Precautions

Do not disconnect the power plug from the outlet with the tray still open, then close the tray manually. If you were to do so, the traverse unit would not go to the upper (standby) position, and the player could not be transported.

### 2. Storing and Handling Test Discs

Surface precision is vital for DVD test discs. Be sure to store and handle them carefully.

1. Do not place discs directly onto the workbench, etc., after use.
2. Handle discs carefully in order to maintain their flatness.  
Place them into their case after use and store them vertically. Store discs in a cool place where they are not exposed to direct sunlight or air from air conditioners.
3. Accurate adjustment will not be possible if the disc is warped from being placed on a surface made of glass, etc. If this happens, use a new test disc to make optical adjustments.
4. If adjustment is done using a warped disc, the adjustment will be incorrect and some discs will not be playable.

## SECTION 2 ASSEMBLING AND DISASSEMBLING THE CASING AND CHECKING C.B.A.s

### 1. Disassembly Procedure

When servicing the unit, use the following procedure to disassemble the casing and inside parts for internal inspection.

## 2. Casing Parts and C.B.A. Positions

## 3. Service Positions

**Note**

To inspect the loading base unit, position the left side upward (as viewed from the front).

### 4. Disassembling the Top Cover

1. Remove the 4 screws.

2. Remove the 3 screws.

### 5. Disassembling the Tray

1. Turn the lever clockwise.
2. Move the tray in the direction of the arrow until it locks.
3. Release the tab locks on the left and right, then pull out the tray.

### 6. Disassembling the Front Panel

1. Release the 3 tabs on the bottom.
2. Release the 2 tabs on the left and right.

3. Release the 2 tabs.
4. Disconnect the 2 flexible cables.

### 7. Disassembling the Loading Base Unit

1. Remove the 4 screws.
2. Pull out the loading base unit vertically.

**Note**

There is a danger of damaging the connectors.

2. Connect the module C.B.A. to the mother C.B.A. extension cables for inspection.
  - Extension cable: AAX16590 (VUC8026)
  - Extension cable: AAX16610 (JGS0116)
 Mother C.B.A. Module C.B.A.  
 PP4201-PS4201  
 PP3201-PS3201

3. Connect the mechanism loading C.B.A. to the mother C.B.A. with the extension cables for inspection.
  - Extension cable: AAX16600 (VUC8027)
 Mother C.B.A. Mechanism Loading C.B.A.  
 PP2591-PS2591

### 8. Checking the Module C.B.A.

1. Remove the screw.

**Note**

Be sure to initialize the player whenever you replace a C.B.A. (Refer to section 1-9, Initializing the DVD Player.)

### 9. Disassembling the Rear Panel

1. Remove all of the screws connected to the rear panel. (The number of screws varies according to the model).

2. Release the two tabs on the left and right.

## 10. Checking the Power Supply C.B.A.

1. Remove the 3 screws.

2. Carefully pull out the power supply C.B.A.

### Note

There is a danger of damaging the connectors.

3. Connect the power supply C.B.A. and the mother C.B.A. with the extension cable for inspection.

- Extension cable: TX946360 (JGS0099) (connects the power supply C.B.A. PS1101 and the mother C.B.A. PP1101)

## 11. Checking the Mother C.B.A.

1. Remove the 4 screws.
2. Release the tab.

3. Checked by connecting the module C.B.A. and the mother C.B.A. with the extension cables.

- Extension cable: AAX16590 (VUC8026)
- Extension cable: AAX16610 (JGS0116)
- Module C.B.A. Mother C.B.A.
- PS3201-PP3201
- PS4201-PP4201

4. Checked by connecting the mechanism loading C.B.A. and the mother C.B.A. with the extension cables.

- Extension cable: AAX16600 (VUC8027)
- Mechanism loading C.B.A. Mother C.B.A.
- PS2951-PP2591

### Note

Be sure to initialize the player whenever you replace a C.B.A. (Refer to section 1-9, initializing the DVD player.)

## 12. Checking the Power Switch C.B.A.

1. Remove the 4 screws.

## 13. Checking the Front Switch C.B.A.

1. Remove the 9 screws.

# ASSEMBLING AND DISASSEMBLING THE OPTICAL PICKUP (MECHANICAL PARTS)

The optical pickup can be damaged by static electricity from your body. Be sure to take static electricity countermeasures when working around the optical pickup.

## 1. Handling the Optical Pickup

The optical pickup can be damaged by static electricity from your body. Be sure to take static electricity countermeasures when working around the optical pickup.

1. The optical pickup is an extremely high-precision mechanism. Do not subject it to strong impact.
2. To preserve the quality of the optical pickup replacement parts during transport and installation, the terminals of the laser diode are short-circuited. After replacing the parts, use the proper procedure to return the laser diode to its original condition. (Refer to page 2-11, Assembling the Optical Pickup.)
3. Testers cannot be used to check the laser diode of the optical pickup. The power supply inside the tester can easily damage the laser diode.
4. Take care when handling the flexible cable because excessive force can cause it to break.
5. You cannot adjust the semifixed resistor for laser power adjustment. Do not turn it.

## 2. Disassembly Procedure

Use the following procedure to replace major parts.  
For the assembly procedure, follow the flow chart in reverse.

### 3. Lubricating the Loading Base Unit

When replacing parts, lubricate the parts made "XXX" in the diagram

## 4. Static Electricity Countermeasures

The laser diode inside the traverse unit (optical pickup) can be damaged by static electricity from your body. Be sure to take static electricity countermeasures when working around the optical pickup.

### 4-1. Static Electricity Countermeasure Methods

1. Ground yourself

Use an anti-static wrist strap to discharge static electricity from your body.

2. Ground the workbench

Lay a conductive material (sheet) or steel sheet on the surface where the traverse unit (optical pickup) is to be placed, then ground the sheet.

### 4-2. Short-circuit the laser diode

Solder the land in the flexible cable of the optical pickup.

**Notes**

- Be sure to do this before disconnecting the flexible cable of the optical pickup from the module C.B.A.
- Use an anti-static soldering iron to short-circuit and unshort-circuit laser diode.  
(Recommended soldering iron: Hakko with ESD countermeasure)
- After you have finished repairing the laser diode, follow the correct procedure to remove the solder from the short-circuit location. (Refer to page 2-7, Assembling and Disassembling the Optical Pickup (Mechanical Parts).)

## 5. Disassembling the Clamp Base Unit

1. Remove the 2 screws.

2. Release the 3 tabs on the clamper.

## 6. Disassembling the Clamper Weight, Clamper Yoke, Magnet and Clamper

1. Remove the tab, and pull out the clamper.

## 7. Disassembling the Traverse Unit

1. Remove the 3 screws.

### Note

Be sure to take static electricity countermeasures before disconnecting the flexible cable. (Refer to page 2-8, Static Electricity Countermeasures.)

2. Disconnect the 2 flexible cables.

### 8. Disassembling the Stepping Motor Unit

1. Disconnect the flexible cable.
2. Remove the 2 screws.

**Note**

Take care when handling the flexible cable because it can be broken by excessive force.

### 9. Disassembling the Optical Pickup Unit

1. Remove the hook of the FPC holder, then remove the FPC holder itself.
2. Remove the screw.
3. Release the tab, then remove spring holder 1.

**Note**

Be sure not to lose the spring.

4. Remove the guide shaft.

**Note**

Be sure to adjust the optical pickup tilt after replacing the optical pickup.

(Refer to page 2-13, Optical Pickup Tilt Adjustment.)

## 10. Disassembling the Nut Unit

1. Remove the screw.

### Notes

- The nut unit is not part of the optical pickup. Before replacing the optical pickup, remove the nut unit for use with the new optical pickup.
- After installation, use screw lock to lock the screw in position.
- When reassembling, use screw lock to lock the screw in position after attaching it.

## 12. Assembling the Optical Pickup

1. Install the optical pickup.

### Note

Take care not to attach the tilt spring and guide shaft in the wrong order.

## 11. Disassembling the Sub-Shaft Preload Spring

1. Remove the screw.

### Notes

- Handle the sub-shaft preload spring carefully because the shape of the tip is easily deformed.
- The sub-shaft preload spring is not part of the optical pickup. Before replacing the optical pickup, remove the sub-shaft preload spring for use with the new optical pickup.
- After installation, use screw lock to lock the screw in position.

2. Insert the pickup FPC into connector FP5201 on the module C.B.A.

3. Remove the solder from the pickup FPC's soldered short-circuit

Open the circuit after short-circuiting it.

4. Adjust the optical pickup tilt after removing the solder.  
(Refer to page 2-13, Optical Pickup Tilt Adjustment.)

5. If installing a new pickup, write the new head current into memory as shown on page 1-6.  
Do this first after turning on the unit with NO disc and while the unit is cold (within the first 3 minutes of power ON), or the jitter reading will not be accurate for the new pickup head.

### 13. Disassembling the Spring Motor Unit

1. Remove the three screws.

**Note**

Be sure to adjust the optical pickup tilt after replacing the spindle motor unit.

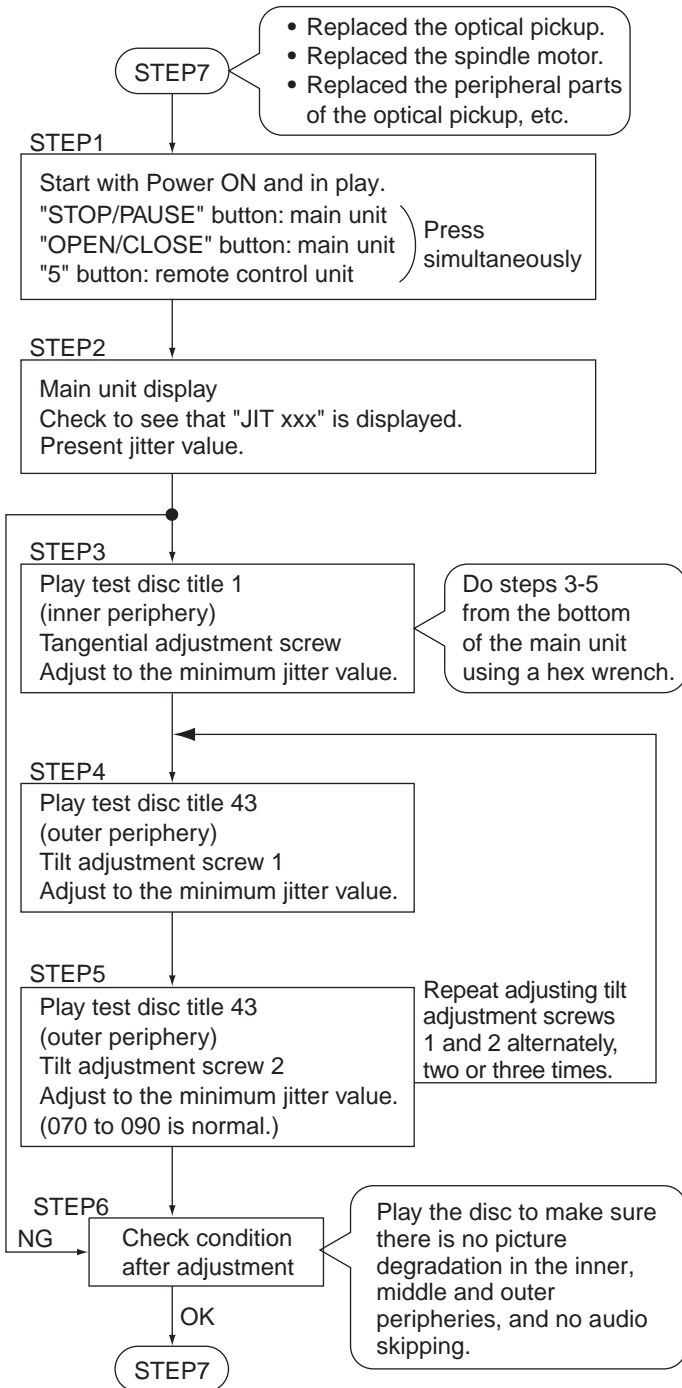

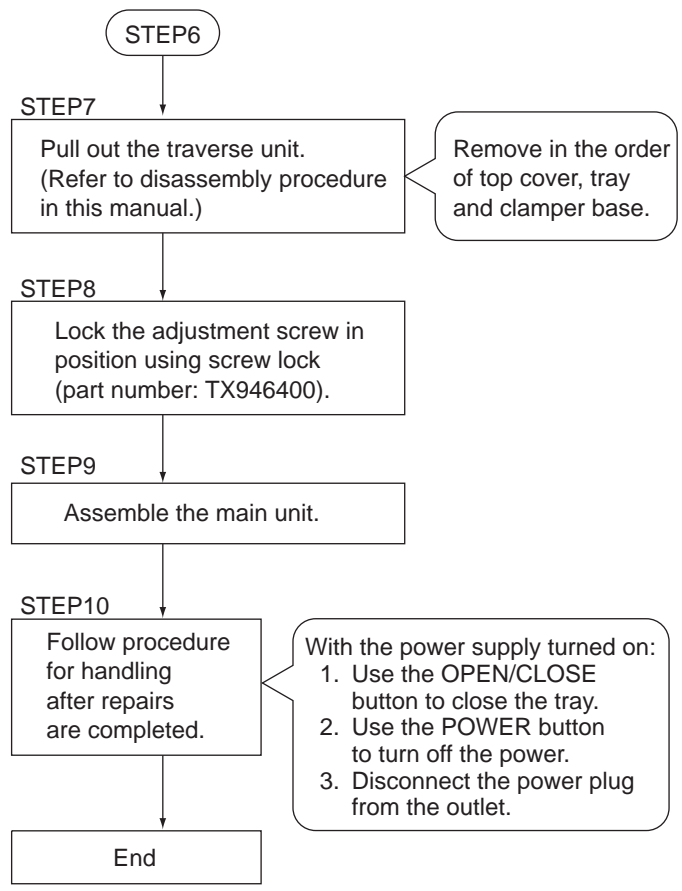

## 14. Optical Pickup Tilt Adjustment

Measurement point	Adjustment point	Mode	Disc
Main unit service display	Tangential adjustment screw Tilt adjustment screw	T1 (inner periphery) play T2 (outer periphery) play	DVDT-S15 (AAx07320) or DVDT-S01 (TX946080)
Measuring equipment, tools		Adjustment value (JIT 070 to 090 is normal.)	
Hex wrench (part number: TX946380), 1.2mm Screw lock (part number: TX946400)		Adjust to the minimum jitter value.	

(070 = 7% and 090 = 9% jitter.)

**Notes**

- Adjustment is generally unnecessary after replacing other parts of the traverse unit. However, adjust if there is a noticeable degradation in picture quality.
- Optical adjustments cannot be made inside the optical pickup.
- Adjustment is generally unnecessary after replacing the traverse unit.

### 15. Disassembling the Intermediate Chassis

1. Push the stopper downward, then rotate it until it contacts the vertical cam.
2. Release the 2 tabs.

### 16. Disassembling the Vertical Cam and Drive Gear

1. Rotate the vertical cam until it reaches the contact position.
2. Lift the vertical cam straight upward to pull it out.
2. Remove the Drive gear.

### 17. Disassembling the Pulley Gear and Deceleration Gear

1. Remove the screw.
2. Remove the pulley gear.
3. Remove the belt.
4. Remove the deceleration gear.

### 18. Disassembling the Mechanism Loading C.B.A.

1. Remove the 2 screws.

2. Remove the 2 screws.
3. Release the 2 tabs.

## 19. Lubricating the Optical Pickup and Peripheral Parts

When replacing parts, lubricate the parts marked "xxx" in the diagram.

## ELECTRICAL CONFIRMATION

### 1. Video Output (Luminance Signal) Confirmation

Do this confirmation after replacing a C.B.A.

Screwdriver, Oscilloscope 200mV/div, 10 usec/div	1000mVp-p±30mV	

**Purpose:** To maintain video signal output compatibility.

1. Connect the oscilloscope to the video output terminal and terminate at 75 ohms.
2. Confirm that the luminance signal (Y+S) level is 1000 mVp-p ±30 mV.

### 2. Video Output (Chrominance Signal) Confirmation

Do this confirmation after replacing a C.B.A.

Measurement point	Mode	Disc
Video output terminal	Color bar 75% PLAY (Title 46): DVDT-S15 PLAY (Title 10): DVDT-S01	DVDT-S15 (AAX07320) or DVDT-S01 (TX946080)

Screwdriver, Oscilloscope 100mV/div, 10 usec/div	525mVp-p±11mV (B, A, G Models) 486mVp-p±10mV (U Model)	

**Purpose:** To maintain video signal output compatibility.

1. Connect the oscilloscope to the video output terminal and terminate at 75 ohms.
2. Apply the trigger at the Y output terminal signal.
3. Confirm that the video component signal (CB) level is 525 mVp-p ±11 mV (B, A, G Models) /486mVp-p ± 10 mV(U Model).
